#### INVESTMENT ADVISOR NAME CHANGE

Effective January 1, 2011, Nuveen Asset Management, the Funds' investment adviser, has changed its name to Nuveen Fund Advisors, Inc. ("Nuveen Fund Advisors"). Concurrently, Nuveen Fund Advisors has formed a wholly-owned subsidiary, Nuveen Asset Management, LLC, to house its portfolio management capabilities. Nuveen Asset Management, LLC now serves as the Funds' sub-adviser, and the Funds' portfolio managers have become employees of Nuveen Asset Management, LLC rather than Nuveen Fund Advisors. Nuveen Fund Advisors will compensate Nuveen Asset Management, LLC for the portfolio management services it provides to the Funds from the Funds' management fee, which will not change as a result of this reorganization. Nuveen Fund Advisors and Nuveen Asset Management, LLC retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

#### NUVEEN INVESTMENTS COMPLETES STRATEGIC COMBINATION WITH FAF ADVISORS

On January 3, 2011, Nuveen Investments announced the completion of the strategic combination with FAF Advisors and Nuveen Asset Management LLC, the largest investment affiliate of Nuveen Investments. As part of this transaction, U.S. Bancorp—the parent of FAF Advisors—received a 9.5% stake in Nuveen Investments as well as additional cash consideration in exchange for the long term investment business of FAF Advisors, including investment-management responsibilities for the mutual funds of the First American Funds family.

The approximately \$27 billion of mutual fund and institutional assets managed by FAF Advisors, along with the investment professionals managing these assets and most other key personnel, have become part of Nuveen Asset Management LLC. With these additions to Nuveen Asset Management LLC, this affiliate now manages more than \$100 billion of assets across a broad range of strategies from municipal and taxable fixed income to traditional and specialized equity investments.

This combination does not affect the investment objectives or strategies of the Funds in this report. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at Hyde Park, NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors and Winslow Capital. In total, Nuveen Investments managed approximately \$195 billion of assets as of December 31, 2010.

Chairman's  
Letter to Shareholders

Dear Shareholders,

The global economy recorded another year of recovery from the financial and economic crises of 2008, but many of the factors that caused the crises still weigh on the prospects for continued recovery. In the U.S., ongoing weakness in housing values is putting pressure on homeowners and mortgage lenders. Similarly, the strong earnings recovery for corporations and banks has not been translated into increased hiring or more active lending. Globally, deleveraging by private and public borrowers is inhibiting economic growth and this process is far from complete.

Encouragingly, a variety of constructive actions are being taken by governments around the world to stimulate further recovery. In the U.S., the recent passage of a stimulatory tax bill relieves some of the pressure on the Federal Reserve System to promote economic expansion through quantitative easing and offers the promise of faster economic growth. A number of European governments are undertaking programs that could significantly reduce their budget deficits. Governments across the emerging markets are implementing various steps to deal with global capital flows without undermining international trade and investment.

The success of these government actions could have an important impact on whether 2011 brings further economic recovery and financial market progress. One risk associated with the extraordinary efforts to strengthen U.S. economic growth is that the debt of the U.S. government will continue to grow to unprecedented levels. Another risk is that over time there could be upward pressures on asset values in the U.S. and abroad, because what happens in the U.S. impacts the rest of the world economy. We must hope that the progress made on the fiscal front in 2010 will continue into 2011. In this environment, your Nuveen investment team continues to seek sustainable investment opportunities and to remain alert to potential risks in a recovery still facing many headwinds. On your behalf, we monitor their activities to assure they maintain their investment disciplines.

As you will note elsewhere in this report, on January 1, 2011, Nuveen Investments completed the acquisition of FAF Advisors, Inc., the manager of the First American Funds. The acquisition adds highly respected and distinct investment teams to meet the needs of investors and their advisors and is designed to benefit all fund shareholders by creating a fund organization with the potential for further economies of scale and the ability to draw from even greater talent and expertise to meet these investor needs.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner

Portfolio manager Daniel Close discusses key investment strategies and the six-month performance of the Nuveen Georgia and North Carolina Funds. Dan, who joined Nuveen in 2000, assumed portfolio management responsibility for these seven Funds in 2007.

What key strategies were used to manage the Georgia and North Carolina Funds during the six-month reporting period ended November 30, 2010?

During this period, the combination of strong demand and tighter supply of new tax-exempt municipal issuance continued to create favorable conditions. One reason for the decline in new tax-exempt supply was the considerable issuance of taxable municipal debt under the Build America Bond (BAB) program. Build America Bonds, first issued in April 2009, generally offer municipal issuers a federal subsidy equal to 35% of a security's interest payments, providing issuers with an alternative to traditional tax-exempt debt. For the six months ended November 30, 2010, taxable Build America Bond issuance totaled \$57.5 billion, representing 26% of new bonds in the municipal marketplace nationwide. In Georgia and North Carolina during this period, Build America Bonds accounted for approximately 10% and 18% of municipal supply, respectively. Although these percentages were lower than the national average for BABs, the impact on tax-exempt supply was meaningful in both states, due to the fact that municipal issuance in Georgia and North Carolina was already down sharply from the same period a year earlier. Since interest payments from Build America Bonds represent taxable income, we do not view these bonds as good investment opportunities for these Funds.

---

In this environment of constrained tax-exempt municipal issuance, we continued to take a bottom-up approach in an attempt to discover undervalued sectors and individual credits with the potential to perform well over the long term. For the most part, the Funds were focused on bonds with maturities at the longer end of the yield curve. During this period, the Georgia Funds found value primarily in health care bonds. When in-state issues became especially scarce, the Georgia Funds took advantage of their ability to invest up to 20% of their net assets in out-of-state credits, buying insured Alabama electric utility bonds in order to keep the Funds as fully invested as possible. In the North Carolina Funds, our purchases included higher education credits, bonds issued for Raleigh Durham Airport and health care bonds, including those issued for Charlotte-Mecklenburg Hospital and Novant Health.

Some of our investment activity resulted from opportunities created by the provisions of the Build America Bond program. For example, tax-exempt supply was more plentiful in the health care and higher education sectors because, as 501(c)(3) (nonprofit) organizations, hospitals and private universities generally did not qualify for the Build America Bond program and continued to issue bonds in the tax-exempt municipal market. Bonds with proceeds earmarked for refundings, working capital and private activities also were not covered by the Build America Bond program, and this resulted in attractive opportunities in various other sectors of the market.

The impact of the Build America Bond program also was evident in the area of longer-term issuance, as municipal issuers sought to take full advantage of the attractive financing terms offered by these bonds. Approximately 70% of Build America Bonds were issued with maturities of at least 30 years. This significantly reduced the availability of tax-exempt credits with longer maturities and made locating appropriate longer bonds more challenging in both of these states, although we continued to find opportunities to purchase attractive longer-term bonds for these Funds. The issuance of Build America Bonds ended on December 31, 2010.

Cash for new purchases during this period was generated primarily by the proceeds from bond calls and maturing bonds, which we worked to redeploy to keep the Funds fully invested. Although the North Carolina Funds sold a few small positions in pre-refunded bonds, active selling was relatively minimal in both states, as the bonds in our portfolios generally offered higher yields than those available in the current marketplace.

As of November 30, 2010, all seven of these Funds continued to use inverse floating rate securities.<sup>1</sup> We employ inverse floaters as a form of leverage for a variety of reasons, including duration management, income enhancement and total return enhancement.

<sup>1</sup> An inverse floating rate security, also known as an inverse floater, is a financial instrument designed to pay long-term interest at a rate that varies inversely with a short-term interest rate index. For the Nuveen Funds, the index typically used is the Securities Industry and Financial Markets Association (SIFMA) Municipal Swap Index. Inverse floaters, including those inverse floating rate securities in which the Funds invested during this reporting period, are further defined within the Notes to Financial Statements and Glossary of Terms Used in this Report sections of this report.

For the six months ended November 30, 2010, the cumulative returns on common share net asset value (NAV) for all seven of the Nuveen Georgia and North Carolina Funds underperformed the returns for their respective state's Standard & Poor's (S&P) Municipal Bond Index as well as the Standard & Poor's (S&P) National Municipal Bond Index. NNC exceeded the average return for the Lipper Other States Municipal Debt Funds Average, while the remaining six Funds underperformed the group average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. In addition, all of the Funds except NPG had holdings pre-refunded during this period, which benefited these Funds through price appreciation and enhanced credit quality. The use of financial leverage also factored into the Funds' performance. Leverage is discussed in more detail on page five.

\* Six-month returns are cumulative; all other returns are annualized.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

2 The Standard & Poor's (S&P) Municipal Bond Indexes for Georgia and North Carolina are unleveraged, market value-weighted indexes designed to measure the performance of the tax-exempt, investment-grade municipal bond markets in Georgia and North Carolina, respectively. These indexes do not reflect any initial or ongoing expenses and are not available for direct investment.

3

The Standard & Poor's (S&P) National Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade U.S. municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.

- 4 The Lipper Other States Municipal Debt Funds Average is calculated using the returns of all leveraged and unleveraged closed-end funds in this category for each period as follows: 6-month, 46 funds; 1-year, 46 funds; 5-year, 46 funds; and 10-year, 20 funds. Lipper returns account for the effects of management fees and assume reinvestment of dividends, but do not reflect any applicable sales charges. The Lipper average is not available for direct investment. Shareholders should note that the performance of the Lipper Other States Average represents the overall average of returns for funds from ten different states with a wide variety of municipal market conditions, making direct comparisons less meaningful.

#### 4 Nuveen Investments

---

During this period, municipal bonds with intermediate maturities generally outperformed other maturities, with credits at both the shortest and longest ends of the municipal yield curve posting the weakest returns. Overall, duration and yield curve positioning proved positive for the performance of the three Georgia Funds as well as NNC and NII. These Funds generally had good weightings in the outperforming intermediate-maturity sector and less exposure to the underperforming long part of the curve. NRB and NNO were not as well positioned in terms of duration and yield curve positioning, which detracted from their performance during this period.

Credit exposure also played a role in the performance of these Funds. For the period, bonds rated AA generally performed poorly on a relative basis, while those rated BBB or below and non-rated bonds posted stronger returns. In this environment, the Funds' performance benefited from their allocations to lower quality and non-rated credits. All four of the North Carolina Funds tended to be underweighted in these lower quality credit categories, which lessened the positive impact. In addition, NPG in particular, as well as NNO, had the heaviest allocations of bonds rated AA among these Funds, which negatively impacted their relative performance for this period.

Holdings that generally made positive contributions to the Georgia Funds' returns during this period included an underweight exposure to the underperforming transportation sector while housing was negative for all three Georgia funds. For the North Carolina Funds, the tax supported sector outperformed while our utility exposure was generally a negative.

In contrast, the education and water and sewer sectors turned in relatively weak performances and zero coupon bonds trailed the municipal market by the widest margin. The transportation sector, with the exception of the airport subsector, also failed to keep pace with the municipal market return for the six months.

#### IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of most of these Funds relative to the comparative indexes was the Funds' use of financial leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of these Funds over this reporting period.

Nuveen Investments 5

## RECENT DEVELOPMENTS REGARDING THE FUNDS' LEVERAGED CAPITAL STRUCTURE

Shortly after their respective inception, each of the Funds issued auction rate preferred shares (ARPS) to create financial leverage. As noted in past shareholder reports, the ARPS issued by many closed-end funds, including these Funds, have been hampered by a lack of liquidity since February 2008. Since that time, more ARPS have been submitted for sale in each of their regularly scheduled auctions than there have been offers to buy. In fact, offers to buy have been almost completely non-existent since late February 2008. This means that these auctions have "failed to clear," and that many, or all, of the ARPS shareholders who wanted to sell their shares in these auctions were unable to do so. This lack of liquidity in ARPS did not lower the credit quality of these shares, and ARPS shareholders unable to sell their shares continued to receive distributions at the "maximum rate" applicable to failed auctions, as calculated in accordance with the pre-established terms of the ARPS. In the recent market, with short-term rates at multigenerational lows, those maximum rates also have been low.

One continuing implication for common shareholders from the auction failures is that each Fund's cost of leverage likely has been incrementally higher at times than it otherwise might have been had the auctions continued to be successful. As a result, each Fund's common share earnings likely have been incrementally lower at times than they otherwise might have been.

As noted in past shareholder reports, the Nuveen funds' Board of Directors/Trustees authorized several methods that can be used separately or in combination to refinance a portion of the Nuveen funds' outstanding ARPS. Some funds have utilized tender option bonds (TOBs), also known as inverse floating rate securities, for leverage purposes. The amount of TOBs that a fund may use varies according to the composition of each fund's portfolio. Some funds have a greater ability to use TOBs than others. Some funds have issued Variable Rate Demand Preferred (VRDP) Shares, a floating rate form of preferred stock. Some funds have issued MuniFund Term Preferred (MTP) Shares, a fixed rate form of preferred stock with a mandatory redemption period of five years.

While all these efforts have reduced the total amount of outstanding ARPS issued by the Nuveen funds, the funds cannot provide any assurance on when the remaining outstanding ARPS might be redeemed.

During 2010, and as of the time this report was prepared, 33 Nuveen leveraged closed-end funds (excluding all of the Funds included in this report) received a demand letter from a law firm on behalf of purported holders of common shares of each such fund, alleging that Nuveen and the funds' officers and Board of Directors/ Trustees breached their fiduciary duties related to the redemption at par of the funds' ARPS. In response, the Board established an ad hoc Demand Committee consisting of certain of its disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation. Based upon its investigation, the Demand Committee found that it was not in the

6 Nuveen Investments

---

best interests of each fund or its shareholders to take the actions suggested in the demand letters, and recommended that the full Board reject the demands made in the demand letters. After reviewing the findings and recommendation of the Demand Committee, the full Board of each fund unanimously adopted the Demand Committee’s recommendation.

Subsequently, 26 of the funds that received demand letters, were named as nominal defendants in a putative shareholder derivative action complaint captioned Safier and Smith v. Nuveen Asset Management, et al. that was filed in the Circuit Court of Cook County, Illinois, Chancery Division (the “Cook County Chancery Court”) on July 27, 2010. Three additional funds were named as nominal defendants in a similar complaint captioned Curbow v. Nuveen Asset Management, et al. filed in the Cook County Chancery Court on August 12, 2010, and three additional funds were named as nominal defendants in a similar complaint captioned Beidler v. Nuveen Asset Management, et al. filed in the Cook County Chancery Court on September 21, 2010 (collectively, the “Complaints”). The Complaints, filed on behalf of purported holders of each fund’s common shares, also name Nuveen Asset Management as a defendant, together with current and former Officers and interested Director/Trustees of each of the funds (together with the nominal defendants, collectively, the “Defendants”). The Complaints contain the same basic allegations contained in the demand letters. The suits seek a declaration that the Defendants have breached their fiduciary duties, an order directing the Defendants not to redeem any ARPS at their liquidation value using fund assets, indeterminate monetary damages in favor of the funds and an award of plaintiffs’ costs and disbursements in pursuing the action. Nuveen Asset Management believes that the Complaints are without merit, and intends to defend vigorously against these charges.

As of November 30, 2010, the amount of ARPS redeemed by the Funds are as shown in the accompanying table.

Fund	Auction Rate Preferred Shares Redeemed	% of Original Auction Rate Preferred Shares
NPG	\$27,800,000	100.0%
NZX	\$15,000,000	100.0%

MTP

As of November 30, 2010, the Funds have issued and outstanding MTP Shares, at liquidation value, as shown in the accompanying table.

Fund	MTP Shares at Liquidation Value
NPG	\$28,340,000
NZX	\$14,340,000
NKG	\$32,265,000
NNC	\$24,300,000
NRB	\$16,600,000
NNO	\$29,700,000
NII	\$28,725,000

Subsequent to the reporting period, NNC completed the issuance of \$25.53 million of 2.60%, Series 2016 MTP. The newly issued MTP Shares trade on the NYSE under the symbol “NNC PrD.” The net proceeds from this offering were used to refinance the Fund’s remaining outstanding ARPS at par. Immediately following its MTP issuance, NNC noticed for redemption at par its remaining \$21.550 million ARPS outstanding using the MTP proceeds.

(Refer to Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies and Footnote 4 – Fund Shares for further details on MTP Shares.)

As of November 30, 2010, all 84 of the Nuveen closed-end municipal funds that had issued ARPS have redeemed at par all or a portion of these shares. These redemptions bring the total amount of Nuveen’s municipal closed-end funds’ ARPS redemptions to approximately \$5.8 billion of the approximately \$11.0 billion originally outstanding.

Common Share Dividend and Share Price Information

The monthly dividends of all seven Funds in this report remained stable throughout the six-month reporting period ended November 30, 2010.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of November 30, 2010, all of the Funds in this report had positive UNII balances, based on our best estimates, for tax purposes and positive UNII balances for financial reporting purposes.

COMMON SHARE REPURCHASES AND SHARE PRICE INFORMATION

Since the inception of the Funds' repurchase program, the Funds have not repurchased any of their outstanding common shares.

- (a) The amounts shown are based on Common share equivalents.
- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.  
Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.
- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders; Net Investment Income ratios reflect income earned and expenses incurred on assets attributable to Auction Rate Preferred shares and/or MuniFund Term Preferred shares, where applicable.
- (d) After expense reimbursement from Adviser, where applicable. Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.
- (e)

The expense ratios reflect, among other things, payments to MuniFund Term Preferred shareholders and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, as described in Footnote 1 –General Information and Significant Accounting Policies, MuniFund Term Preferred Shares and Inverse Floating Rate Securities, respectively.

(f) For the six months ended November 30, 2010.

N/A Fund does not have a contractual reimbursement with the Adviser.

\* Annualized.

- (a) The amounts shown are based on Common share equivalents.
- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.  
Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.
- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders; Net Investment Income ratios reflect income earned and expenses incurred on assets attributable to Auction Rate Preferred shares and/or MuniFund Term Preferred shares, where applicable.
- (d) After expense reimbursement from Adviser, where applicable. Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.
- (e)

The expense ratios reflect, among other things, payments to MuniFund Term Preferred shareholders and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, as described in Footnote 1 –General Information and Significant Accounting Policies, MuniFund Term Preferred Shares and Inverse Floating Rate Securities, respectively.

- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.  
Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. 1. General Information and Significant Accounting Policies

The state funds covered in this report and their corresponding Common share stock exchange symbols are Nuveen Georgia Premium Income Municipal Fund (NPG), Nuveen Georgia Dividend Advantage Municipal Fund (NZX), Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG), Nuveen North Carolina Premium Income Municipal Fund (NNC), Nuveen North Carolina Dividend Advantage Municipal Fund (NRB), Nuveen North Carolina Dividend Advantage Municipal Fund 2 (NNO) and Nuveen North Carolina Dividend Advantage Municipal Fund 3 (NII) (collectively, the “Funds”). Common shares of Georgia Premium Income (NPG), Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage (NRB), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) are traded on the New York Stock Exchange (“NYSE”) while Common shares of North Carolina Premium Income (NNC) are traded on the NYSE Amex. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end registered investment companies.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within a single state or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”).

Investment Valuation

Prices of municipal bonds are provided by a pricing service approved by the Funds’ Board of Trustees. These securities are generally classified as Level 2. When price quotes are not readily available (which is usually the case for municipal bonds) the pricing service establishes a security’s fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor’s credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity, provided by Nuveen Asset Management (the “Adviser”), a wholly-owned subsidiary of Nuveen Investments, Inc. (“Nuveen”). These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value. These securities are generally classified as Level 1 or Level 2, which is usually the case for municipal bonds.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds’ Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund’s net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security’s fair value. As a general

principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Trustees or its designee.

Refer to Footnote 2 – Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

#### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At November 30, 2010, North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) had outstanding delayed delivery purchase commitments of \$246,958 and \$493,917, respectively. There were no such outstanding purchase commitments in any of the other Funds.

#### Investment Income

Interest income, which reflects the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

#### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

#### Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

#### Auction Rate Preferred Shares

Each Fund is authorized to issue Auction Rate Preferred Shares ("ARPS"). The following Fund has issued and outstanding ARPS, \$25,000 stated value per share, which approximates market value, as a means of effecting financial leverage. The Fund's ARPS are issued in one Series. The dividend rate paid by the Fund on the Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. As of November 30, 2010, the number of ARPS outstanding for the Fund is as follows:

Notes to  
Financial Statements (Unaudited) (continued)

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the ARPS issued by the Funds than there were offers to buy. This meant that these auctions “failed to clear,” and that many ARPS shareholders who wanted to sell their shares in these auctions were unable to do so. ARPS shareholders unable to sell their shares received distributions at the “maximum rate” applicable to failed auctions as calculated in accordance with the pre-established terms of the ARPS. As of November 30, 2010, the aggregate amount of outstanding ARPS redeemed by each Fund is as follows:

	Georgia Premium Income (NPG)	Georgia Dividend Advantage (NZX)	Georgia Dividend Advantage 2 (NKG)
ARPS redeemed, at liquidation value	\$ 27,800,000	\$ 15,000,000	\$ 33,000,000

MuniFund Term Preferred Shares

Each Fund has issued and outstanding MuniFund Term Preferred (“MTP”) Shares, with a \$10 stated value per share. Proceeds from the issuance of MTP Shares, net of offering expenses, were used to redeem all, or a portion of, each Fund’s outstanding ARPS. Each Fund’s MTP Shares are issued in one Series. Dividends, which are recognized as interest expense for financial reporting purposes, are paid monthly at a fixed annual rate, subject to adjustments in certain circumstances. The MTP Shares trade on the NYSE. As of November 30, 2010, the number of MTP Shares outstanding, fixed annual rate and the NYSE “ticker” symbol for each Fund are as follows:

Each Fund is obligated to redeem its MTP Shares by the date as specified in its offering document (“Term Redemption Date”), unless earlier redeemed or repurchased by the Fund. MTP Shares are subject to optional and mandatory redemption in certain circumstances. MTP Shares will be subject to redemption at the option of each Fund (“Optional Redemption Date”), subject to a payment of premium for one year following the Optional Redemption Date (“Premium Expiration Date”), and at par thereafter. MTP Shares also will be subject to redemption, at the option of each Fund, at par in the event of certain changes in the credit rating of the MTP Shares. Each Fund may be obligated to redeem certain of the MTP Shares if the Fund fails to maintain certain asset coverage and leverage ratio requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends. The Term Redemption Date, Optional Redemption Date and Premium Expiration Date for each Fund’s MTP Shares are as follows:

The average liquidation value of MTP Shares outstanding for each Fund during the six months ended November 30, 2010, was as follows:

	Georgia Premium Income (NPG)	Georgia Dividend Advantage (NZX)	Georgia Dividend Advantage 2 (NKG)
Average liquidation value of MTP Shares outstanding	\$ 28,340,000	\$ 14,340,000	\$ 32,265,000

Statement of Assets and Liabilities. Dividends paid on MTP Shares are recognized as a component of “Interest expense and amortization of offering costs” on the Statement of Operations.

Net amounts earned by Nuveen as underwriter of each Fund’s MTP Share offering were recorded as reductions of offering costs recognized by the Funds. For the six months ended November 30, 2010, the net amounts earned by Nuveen were as follows:

Financial Statements (Unaudited) (continued)

Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

During the six months ended November 30, 2010, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At November 30, 2010, the Funds were not invested in externally-deposited Recourse Trusts.

### Derivative Financial Instruments

Each Fund is authorized to invest in futures, options, swaps and other derivative instruments. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended November 30, 2010.

### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

### Offering Costs

Costs incurred by the Funds in connection with their offerings of MTP Shares were recorded as a deferred charge, which will be amortized over the 5-year life of the shares. Each Fund's amortized deferred charges are recognized as a component of "Interest expense and amortization of offering costs" on the Statement of Operations. Each Fund's offering costs incurred were as follows:

		Georgia Premium Income (NPG)	Georgia Dividend Advantage (NZX)	Georgia Dividend Advantage 2 (NKG)
MTP Shares offering costs	\$	653,780	\$ 419,600	\$ 737,233
		North Carolina Premium Income (NNC)	North Carolina Dividend Advantage (NRB)	North Carolina Dividend Advantage 2 (NNO)
MTP Shares offering costs	\$	668,198	\$ 504,000	\$ 710,500
				North Carolina Dividend Advantage 3 (NII)
	\$			699,115

### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

### Indemnifications

Under the Funds' organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the

reporting period. Actual results may differ from those estimates.

## 2. Fair Value Measurements

In determining the fair value of each Fund's investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of November 30, 2010:

## 3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. The Funds did not invest in derivative instruments during the six months ended November 30, 2010.

## 6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At November 30, 2010, the cost and unrealized appreciation (depreciation) of investments as determined on a federal income tax basis, were as follows:

		Georgia Premium Income (NPG)	Georgia Dividend Advantage (NZX)	Georgia Dividend Advantage 2 (NKG)
Cost of investments	\$	78,317,421	\$ 41,333,390	\$ 92,104,816
Gross unrealized:

Depreciation	(897,609)	(326,785)	(637,803)	(602,347)
Net unrealized appreciation (depreciation) of investments	\$ 3,864,817	\$ 1,508,543	\$ 2,188,983	\$ 1,675,382

Permanent differences, primarily due to federal taxes paid, taxable market discount and distribution character reclassifications, resulted in reclassifications among the Funds' components of common share net assets at May 31, 2010, the Funds' last tax year end, as follows:

	Georgia Premium Income (NPG)	Georgia Dividend Advantage (NZX)	Georgia Dividend Advantage 2 (NKG)

Post-October capital losses	\$ 22,422	\$ 51,040	\$ 2,300

#### 7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee is separated into two components – a fund-level fee, based only on the amount of assets within each individual Fund, and a complex-level fee, based on the aggregate amount of all fund assets managed by the Adviser. This pricing structure enables each Fund's shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets*	Georgia Premium Income (NPG) North Carolina Premium Income (NNC) Fund-Level Fee Rate
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For managed assets over \$5 billion	.3750

Notes to

\$250 billion	.1469
\$300 billion	.1445

\* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen funds, with such daily managed assets defined separately for each fund in its management agreement, but excluding assets attributable to investments in other Nuveen funds. As of November 30, 2010, the complex-level fee rate was .1824%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its trustees who are affiliated with the Adviser or

to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first ten years of Georgia Dividend Advantage's (NZX) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending September 30,		Year Ending September 30,

## 8. New Accounting Standards

### Fair Value Measurements

On January 21, 2010, the Financial Accounting Standards Board issued changes to the authoritative guidance under U.S. GAAP for fair value measurements. The objective of which is to provide guidance on how investment assets and liabilities are to be valued and disclosed. Specifically, the amendment requires reporting entities to disclose Level 3 activity for purchases, sales, issuances and settlements in the Level 3 roll-forward on a gross basis rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2010. At this time, management is evaluating the implications of this guidance and the impact it will have to the footnote disclosures, if any.

Financial Statements (Unaudited) (continued)

9. Subsequent Events

Investment Advisory Agreements

Effective January 1, 2011, Nuveen Asset Management, the Funds' Adviser, has changed its name to Nuveen Fund Advisors, Inc. ("Nuveen Fund Advisors"). Concurrently, Nuveen Fund Advisors has formed a wholly-owned subsidiary, Nuveen Asset Management, LLC, to house its portfolio management capabilities. Nuveen Asset Management, LLC now serves as the Funds' sub-adviser, and the Funds' portfolio managers have become employees of Nuveen Asset Management, LLC rather than Nuveen Fund Advisors.

This allocation of responsibilities between Nuveen Fund Advisors and Nuveen Asset Management, LLC affects each Fund within this report. Nuveen Fund Advisors (as each affected Fund's investment adviser) will compensate Nuveen Asset Management, LLC (as each such Fund's newly-appointed sub-adviser) for the portfolio management services it provides to the Fund from the Fund's management fee, which will not change as a result of this restructuring. Nuveen Fund Advisors and Nuveen Asset Management, LLC retain the right to reallocate investment management and advisory responsibilities and fees between themselves in the future.

Preferred Shares

Subsequent to the reporting period, North Carolina Premium Income (NNC) successfully completed the issuance of \$25.535 million of 2.60%, Series 2016 MTP. The newly issued MTP Shares trade on the NYSE under the symbol "NNC PrD." Immediately following its MTP issuance, North Carolina Premium Income (NNC) noticed for redemption at par its remaining \$21.550 million ARPS outstanding using the MTP proceeds.

Board Approval of Sub-Advisory Arrangements (Unaudited)

At a meeting held on May 25-26, 2010 (the “May Meeting”), the Boards of Trustees or Directors (as the case may be) (each a “Board” and each Trustee or Director, a “Board Member”) of the Funds, including a majority of the Independent Board Members, considered and approved the advisory agreements (each an “Advisory Agreement”) between each Fund and Nuveen Asset Management (“NAM”). Since the May Meeting, Nuveen has engaged in an internal restructuring (the “Restructuring”) pursuant to which the portfolio management services provided by NAM to the Funds would be transferred to Nuveen Asset Management, LLC (“NAM LLC”), a newly-organized wholly-owned subsidiary of NAM and NAM would change its name to Nuveen Fund Advisors, Inc. (“NFA”). NAM, under its new name NFA, will continue to serve as investment adviser to the Funds and, in that capacity, will continue to provide various oversight, administrative, compliance and other services. To effectuate the foregoing, NFA will enter into a sub-advisory agreement with NAM LLC on behalf of the Funds (the “Sub-Advisory Agreement”). Under the Sub-Advisory Agreement, NAM LLC, subject to the oversight of NFA and the Board, will furnish an investment program, make investment decisions for, and place all orders for the purchase and sale of securities for the portion of each Fund’s investment portfolio allocated to it by NFA. There will be no change in the advisory fees paid by the Funds. Rather, NFA will pay a portion of the investment advisory fee it receives to NAM LLC for its sub-advisory services. The Independent Board Members reviewed the allocation of fees between NFA and NAM LLC. NFA and NAM LLC do not anticipate any reduction in the nature or level of services provided to the Funds following the Restructuring. The personnel of NFA who engaged in portfolio management activities prior to the spinoff of NAM LLC are not expected to materially change as a result of the spinoff. In light of the foregoing, at a meeting held on November 16-18, 2010, the Board Members, including a majority of the Independent Board Members, approved the Sub-Advisory Agreement on behalf of each Fund. Given that the Restructuring was not expected to reduce the level or nature of services provided and the advisory fees paid by the Funds were the same, the factors considered and determinations made at the May Meeting in approving the Advisory Agreement were equally applicable to the approval of the Sub-Advisory Agreement. For a discussion of these considerations, please see the shareholder report of the Fund that was first issued after the May Meeting for the period including May 2010.

### Reinvest Automatically Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

#### Nuveen Closed-End Funds Automatic Reinvestment Plan

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### Easy and convenient

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per

share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

## Glossary of Terms Used in this Report

**Auction Rate Bond:** An auction rate bond is a security whose interest payments are adjusted periodically through an auction process, which process typically also serves as a means for buying and selling the bond. Auctions that fail to attract enough buyers for all the shares offered for sale are deemed to have “failed,” with current holders receiving a formula-based interest rate until the next scheduled auction.

**Average Annual Total Return:** This is a commonly used method to express an investment’s performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment’s actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

**Average Effective Maturity:** The market-value-weighted average of the effective maturity dates of the individual securities including cash. In the case of a bond that has been advance-refunded to a call date, the effective maturity is the date on which the bond is scheduled to be redeemed using the proceeds of an escrow account. In most other cases the effective maturity is the stated maturity date of the security.

**Inverse Floaters:** Inverse floating rate securities, also known as inverse floaters, are created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. This trust, in turn, (a) issues floating rate certificates typically paying short-term tax-exempt interest rates to third parties in amounts equal to some fraction of the deposited bond’s par amount or market value, and (b) issues an inverse floating rate certificate (sometimes referred to as an “inverse floater”) to an investor (such as a Fund) interested in gaining investment exposure to a long-term municipal bond. The income received by the holder of the inverse floater varies inversely with the short-term rate paid to the floating rate certificates’ holders, and in most circumstances the holder of the inverse floater bears substantially all of the underlying bond’s downside investment risk. The holder of the inverse floater typically also benefits disproportionately from any potential appreciation of the underlying bond’s value. Hence, an inverse floater essentially represents an investment in the underlying bond on a leveraged basis.

**Leverage-Adjusted Duration:** Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

**Market Yield (also known as Dividend Yield or Current Yield):** An investment's current annualized dividend divided by its current market price.

**Net Asset Value (NAV):** A Fund's NAV per common share is calculated by subtracting the liabilities of the Fund (including any Preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of common shares outstanding. Fund NAVs are calculated at the end of each business day.

**Pre-refunding:** Pre-refunding, also known as advanced refundings or refinancings, is a procedure used by state and local governments to refinance municipal bonds to lower interest expenses. The issuer sells new bonds with a lower yield and uses the proceeds to buy U.S. Treasury securities, the interest from which is used to make payments on the higher-yielding bonds. Because of this collateral, pre-refunding generally raises a bond's credit rating and thus its value.

**Taxable-Equivalent Yield:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

**Zero Coupon Bond:** A zero coupon bond does not pay a regular interest coupon to its holders during the life of the bond. Tax-exempt income to the holder of the bond comes from accretion of the difference between the original purchase price of the bond at issuance and the par value of the bond at maturity and is effectively paid at maturity. The market prices of zero coupon bonds generally are more volatile than the market prices of bonds that pay interest periodically.
