NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(dollars in thousands, except per share data)

NOTE 1- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION: The accompanying consolidated financial statements include the accounts of Ohio Valley Banc Corp. ("Ohio Valley") and its wholly-owned subsidiaries, The Ohio Valley Bank Company (the "Bank"), Loan Central, Inc. ("Loan Central"), a consumer finance company, and Ohio Valley Financial Services Agency, LLC ("Ohio Valley Financial Services"), an insurance agency. Ohio Valley and its subsidiaries are collectively referred to as the "Company". All material intercompany accounts and transactions have been eliminated in consolidation.

These interim financial statements are prepared by the Company without audit and reflect all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly the consolidated financial position of the Company at September 30, 2006, and its results of operations and cash flows for the periods presented. The results of operations for the nine months ended September 30, 2006 are not necessarily indicative of the operating results to be anticipated for the full fiscal year ending December 31, 2006. The accompanying consolidated financial statements do not purport to contain all the necessary financial disclosures required by accounting principles generally accepted in the United States of America (US GAAP) that might otherwise be necessary in the circumstances. The Annual Report of the Company for the year ended December 31, 2005 contains consolidated financial statements and related notes which should be read in conjunction with the accompanying consolidated financial statements.

The accounting and reporting policies followed by the Company conform to US GAAP. The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for loan losses is particularly subject to change.

The majority of the Company's income is derived from commercial and retail lending activities. Management considers the Company to operate in one segment, banking.

INCOME TAX: Income tax expense is the sum of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax consequences of temporary

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

differences between the carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

CASH FLOW: For consolidated financial statement classification and cash flow reporting purposes, cash and cash equivalents include cash on hand, noninterest-bearing deposits with banks and federal funds sold. Generally, federal funds are purchased and sold for one-day periods. The Company reports net cash flows for customer loan transactions, deposit transactions, short-term borrowings and interest-bearing deposits with other financial institutions.

STOCK SPLIT: On April 13, 2005, Ohio Valley's Board of Directors declared a five-for-four stock split, effected in the form of a stock dividend, on Ohio Valley's common shares. Each shareholder of record on April 25, 2005, received an additional common share for every four common shares then held. The common shares were issued on May 10, 2005. The stock split was recorded by transferring from retained earnings an amount equal to the stated value of the shares issued. The Company retained the current par value of \$1.00 per share for all common shares. Earnings and cash dividends per share amounts in 2005 have been retroactively adjusted to reflect the effect of the stock split.

7

EARNINGS PER SHARE: Earnings per share are computed based on net income divided by the weighted average number of common shares outstanding during the period. The weighted average common shares outstanding were 4,228,798 and 4,270,276 for the three months ended September 30, 2006 and 2005, respectively. Weighted average shares outstanding were 4,239,291 and 4,282,089 for the nine months ended September 30, 2006 and 2005, respectively. Ohio Valley had no dilutive effect and no potential common shares issuable under stock options or other agreements for any period presented. The weighted average number of shares outstanding in 2005 has been retroactively adjusted to reflect the effect of the stock split in 2005.

LOANS: Loans are reported at the principal balance outstanding, net of unearned interest, deferred loan fees and costs, and an allowance for loan losses. Interest income on loans is reported on an accrual basis using the interest method and includes amortization of net deferred loan fees and costs over the loan term. Interest income is not reported when full loan repayment is in doubt, typically when the loan is impaired or payments are past due over 90 days. Payments received on such loans are reported as principal reductions.

ALLOWANCE FOR LOAN LOSSES: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and decreased by charge-offs less recoveries. Loan losses are charged against the allowance when management believes the uncollectibility of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired or loans otherwise classified as substandard or doubtful. The general component covers non-classified loans and is based on historical loss experience adjusted for current factors.

A loan is impaired when full payment under the loan terms is not expected.

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Commercial and commercial real estate loans are individually evaluated for impairment. Impaired loans are carried at the present value of expected cash flows discounted at the loan's effective interest rate or at the fair value of the collateral if the loan is collateral dependent. A portion of the allowance for loan losses is allocated to impaired loans. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures.

RECLASSIFICATIONS: The consolidated financial statements for 2005 have been reclassified to conform with the presentation for 2006. These reclassifications had no effect on the net results of operations.

8

NOTE 2 - LOANS

Total loans as presented on the balance sheet are comprised of the following classifications:

	September 30, 2006	December 2005
	-----	-----
Commercial and industrial loans	\$242,196	\$236,5
Real estate loans	240,076	235,0
Consumer loans	142,271	145,8
Other loans	4,268	1
	-----	-----
	\$ 628,811	\$ 617,5
	=====	=====

At September 30, 2006 and December 31, 2005, loans on nonaccrual status were approximately \$7,252 and \$1,240, respectively. Loans past due more than 90 days and still accruing at September 30, 2006 and December 31, 2005 were \$1,311 and \$1,317, respectively.

NOTE 3 - ALLOWANCE FOR LOAN LOSSES AND IMPAIRED LOANS

Following is an analysis of changes in the allowance for loan losses for the nine months ended September 30:

	2006	2005
	-----	-----
Balance - January 1,	\$ 7,133	\$
Loans charged off:		
Commercial	524	
Real estate	139	
Consumer	1,645	
	-----	-----
Total loans charged off	2,308	
Recoveries of loans:		
Commercial	402	
Real estate	203	

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Consumer	924	
	-----	-----
Total recoveries of loans	1,529	
	-----	-----
Net loan charge-offs	(779)	
Provision charged to operations	1,931	
	-----	-----
Balance - September 30,	\$ 8,285	\$
	=====	=====

Information regarding impaired loans is as follows:

	September 30, 2006	December 2005
	-----	-----
Balance of impaired loans	\$ 13,602	\$ 7,98
Less portion for which no specific allowance is allocated	3,162	2,82
	-----	-----
Portion of impaired loan balance for which a specific allowance for credit losses is allocated	\$ 10,440	\$ 5,15
	=====	=====
Portion of allowance for loan losses specifically allocated for the impaired loan balance	\$ 4,148	\$ 2,60
	=====	=====
Average investment in impaired loans year-to-date	\$ 13,680	\$ 8,31
	=====	=====

9

Interest on impaired loans was \$495 and \$217 for the nine-month periods ended September 30, 2006 and 2005, respectively. Accrual basis income was not materially different from cash basis income for the periods presented.

NOTE 4 - CONCENTRATIONS OF CREDIT RISK AND FINANCIAL INSTRUMENTS
WITH OFF-BALANCE SHEET RISK

The Company, through its subsidiaries, grants residential, consumer, and commercial loans to customers located primarily in the central and southeastern areas of Ohio as well as the western counties of West Virginia. Approximately 3.64% of total loans were unsecured at September 30, 2006 as compared to 3.14% at December 31, 2005.

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments primarily include commitments to extend credit, standby letters of credit and financial guarantees. The contract amounts of these instruments are not included in the consolidated financial statements. At September 30, 2006, the contract amounts of these instruments totaled approximately \$78,494, compared to \$66,594 at December 31, 2005. Since many of these instruments are expected to expire without being drawn upon, the total

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

contract amounts do not necessarily represent future cash requirements.

NOTE 5 - OTHER BORROWED FUNDS

Other borrowed funds at September 30, 2006 and December 31, 2005 are comprised of advances from the Federal Home Loan Bank (FHLB) of Cincinnati, promissory notes and Federal Reserve Bank (FRB) Notes.

	FHLB Borrowings	Promissory Notes	FRB Notes
September 30, 2006.....	\$ 56,254	\$ 5,423	\$ 4,821
December 31, 2005.....	\$ 66,385	\$ 5,113	\$ 4,675

Pursuant to collateral agreements with the FHLB, advances are secured by \$218,811 in qualifying mortgage loans and \$5,946 in FHLB stock at September 30, 2006. Fixed-rate FHLB advances of \$56,254 mature through 2010 and have interest rates ranging from 3.16% to 6.62%. The Company had no variable-rate FHLB borrowings at September 30, 2006.

At September 30, 2006, the Company had a cash management line of credit enabling it to borrow up to \$35,000 from the FHLB. All cash management advances have an original maturity of 90 days. The line of credit must be renewed on an annual basis. There was \$35,000 available on this line of credit at September 30, 2006.

Based on the Company's current FHLB stock ownership, total assets and pledgeable residential first mortgage loans, the Company had the ability to obtain borrowings from the FHLB up to a maximum of \$162,082 at September 30, 2006.

Promissory notes, issued primarily by Ohio Valley, have fixed rates of 4.00% to 6.25% and are due at various dates through a final maturity date of September 30, 2008. As of September 30, 2006, a total of \$3,268 represented promissory notes payable by Ohio Valley to related parties.

FRB notes consist of the collection of tax payments from Bank customers under the Treasury Tax and Loan program. These funds have a variable interest rate and are callable on demand by the U.S. Treasury. At September 30, 2006, the interest rate for the Company's FRB notes was 5.04%. Various investment

10

securities from the Bank used to collateralize the FRB notes totaled \$6,070 at September 30, 2006 and December 31, 2005.

Letters of credit issued on the Bank's behalf by the FHLB to collateralize certain public unit deposits as required by law totaled \$44,950 at September 30, 2006 and \$27,950 at December 31, 2005.

Scheduled principal payments over the next five years:

	FHLB Borrowings	Promissory Notes	FRB Notes
2006	\$ 11,019	\$ 3,235	\$ 4,821
2007	12,061	2,088	----
2008	18,010	100	----
2009	8,005	----	----

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

2010	7,006	----	----
Thereafter	153	----	----
	-----	-----	-----
	\$ 56,254	\$ 5,423	\$ 4,821
	=====	=====	=====

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(dollars in thousands, except share and per share data)

Forward Looking Statements

Except for the historical statements and discussions contained herein, statements contained in this report constitute "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Act of 1934 and as defined in the Private Securities Litigation Reform Act of 1995. Such statements are often, but not always, identified by the use of such words as "believes," "anticipates," "expects," and similar expressions. Such statements involve various important assumptions, risks, uncertainties, and other factors, many of which are beyond our control, which could cause actual results to differ materially from those expressed in such forward looking statements. These factors include, but are not limited to, the risk factors discussed in Part I, Item 1A of Ohio Valley's Annual Report on Form 10-K for the fiscal year ended December 31, 2005 and Ohio Valley's other securities filings. Readers are cautioned not to place undue reliance on such forward looking statements, which speak only as of the date hereof. The Company undertakes no obligation and disclaims any intention to republish revised or updated forward looking statements as a result of unanticipated future events.

Financial Overview

The Company is primarily engaged in commercial and retail banking, offering a blend of commercial, consumer and agricultural banking services within central and southeastern Ohio as well as western West Virginia. The banking services offered by the Bank include the acceptance of deposits in checking, savings, time and money market accounts; the making and servicing of personal, commercial, floor plan and student loans; and the making of construction and real estate loans. The Bank also offers individual retirement accounts, safe deposit boxes, wire transfers and other standard banking products and services. As part of its lending function, the Bank also offers credit card services. Loan Central engages in consumer finance, offering smaller balance personal and mortgage loans to individuals with higher credit risk history. Loan Central's line of business also includes seasonal tax refund loan services during the January through April periods. Ohio Valley Financial Services sells life insurance.

Net income increased by \$81, or 4.7%, to \$1,817 for the three months ended September 30, 2006, compared to the same period in 2005. For the first nine months of 2006, net income increased by \$344, or 6.8%, to \$5,382, compared to \$5,038 for the first nine months of 2005. Earnings per share for the third quarter of 2006 finished at \$.43, up 4.9% over the same period in 2005. Earnings per share for the first nine months of 2006 grew \$.09, or 7.6%, to finish at \$1.27 per share as compared to the same period in 2005. The annualized net income to average asset ratio (ROA) and net income to average equity ratio (ROE) improved to .95% and 12.07% during the first nine months of 2006, as compared to .93% and 11.76%, respectfully, for the same periods in 2005. The Company accomplished these positive results by: 1) growing average loan balances by \$31,694, or 5.3%, over the first nine months of 2005 to an all-time high of \$626,796; and 2) increasing its emphasis on expense control, which helped to

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

minimize overhead costs to just a 3.8% and 2.4% increase over the third quarter and year-to-date periods of 2005 while growing noninterest revenue by 16.0% and 10.1% over the same periods in 2005.

The Company's net interest income for the nine-month period of 2006 exceeded the year-to-date income of 2005, increasing \$959, or 4.6%. The increase has been in large part due to growth in average-earning assets and higher market rates that have been instituted by the Federal Reserve. The Bank's commercial loan portfolio in particular has been significantly affected by changes in the prime interest rate, which is the rate offered on loans to borrowers with strong credit. The prime rate began September 30, 2005 at 6.75% and increased 150 basis points during the past four quarters to finish at 8.25% at September 30, 2006. Year-to-date average earning asset yields are up 68 basis points to finish at 7.36% at September 30, 2006 as compared to the same period in 2005. Furthermore, the Company experienced loan growth of \$11,279, or 1.8%, during the nine-month period of 2006, which has outpaced the growth in loans of \$6,884, or 1.1%, during the same period in 2005, primarily from originations in commercial and participation loans.

Partially offsetting the increase in net interest income was a contraction in the net interest margin. While the Company's net interest income continues to grow, pressure from the sustained rise in rates over the past year continues to impact funding costs, causing interest expense to grow at a faster pace than interest income. The faster pace of interest expense growth has caused the Company's net interest income to grow at a decreasing pace during 2006 as compared to 2005. Furthermore, the Company's net interest income and net interest margin have been negatively affected by an increase in loans on nonaccrual status, which have increased \$6,012 from year-end 2005 to finish at \$7,252 at September 30, 2006. This was due in large part to several commercial mortgages from two commercial relationships representing approximately 78.0% of total loans on nonaccrual status. As a result of these interest rate pressures, the Company's year-to-date net interest margin has decreased from 4.11% at September 30, 2005 to 4.10% at September 30, 2006. With the Company's balance sheet being in a liability sensitive position, continued pressures are expected to negatively impact the net interest margin for the remainder of 2006.

The growth in net interest income and stable overhead expenses has resulted in much improved efficiency. The efficiency ratio, which represents the cost to generate a dollar in revenue, improved to 63.1% for the nine-month period ended September 30, 2006, as compared to 65.2% for the same period in 2005.

The consolidated total assets of the Company increased \$22,482, or 3.0%, during the first nine months of 2006 to finish at \$772,201, primarily due to increased loan and federal funds sold balances, which increased \$11,279 and \$8,800, respectively, from year-end 2005. Loans were primarily funded by an increase in the Company's interest-bearing deposits, which increased \$46,368 from year-end 2005. The excess funds available from the increases in interest-bearing deposits were used to reduce other borrowed funds and support the decline in the Company's securities sold under agreements to repurchase ("repurchase agreements"), which decreased \$9,675 and \$9,147, respectively, from year-end 2005.

12

The Company's Board of Directors approved a five-for-four stock split, effected in the form of a stock dividend, on April 13, 2005. The additional common shares issued were distributed on May 10, 2005 to stockholders of record as of April 25, 2005. References to 2005 share and per share data have been retroactively restated for this stock split.

Comparison of
Financial Condition

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

at September 30, 2006 and December 31, 2005

The following discussion focuses, in more detail, on the consolidated financial condition of the Company at September 30, 2006 compared to December 31, 2005. The purpose of this discussion is to provide the reader a more thorough understanding of the consolidated financial statements. This discussion should be read in conjunction with the interim consolidated financial statements and the footnotes included in this Form 10-Q.

Cash and Cash Equivalents

The Company's cash and cash equivalents consist of cash and balances due from banks and federal funds sold. The amounts of cash and cash equivalents fluctuate on a daily basis due to customer activity and liquidity needs. At September 30, 2006, cash and cash equivalents had increased \$5,409, or 27.6%, to \$25,025 as compared to \$19,616 at December 31, 2005. This increase was primarily attributable to the Company's improved liquidity position from aggressive time deposit growth that produced excess federal funds sold of \$9,900 at September 30, 2006 as compared to \$1,100 in federal funds sold at year-end 2005. Cash and noninterest-bearing deposits with banks decreased by \$3,391, or 18.3%, due to increased funding needs related to the growth in the loan portfolio, primarily in the first quarter of 2006. While down from year-end 2005, management believes that the current balance of cash and cash equivalents remains at a level that will meet cash obligations and provide adequate liquidity. Further information regarding the Company's liquidity can be found under the caption "Liquidity" in this Management's Discussion and Analysis.

Securities

During the nine-month period of 2006, investment securities increased \$4,075, or 5.2%, driven by increases in U.S. government agency securities of \$4,497, or 24.8%, and municipal bonds of \$1,439, or 12.0%, as compared to year-end 2005. The growth in U.S. government agencies and municipal bonds was the result of attractive yield opportunities and a desire to increase diversification within the Company's securities portfolio. This growth was partially offset by a decrease in mortgage-backed securities of \$1,861, or 3.9%, from year-end 2005. The Company continues to benefit from the advantages of mortgage-backed securities, which make up the largest portion of the Company's investment portfolio, totaling \$46,369, or 56.2% of total investments at September 30, 2006. The primary advantage of mortgage-backed securities has been the increased cash flows due to the more rapid (monthly) repayment of principal as compared to other types of investment securities, which deliver proceeds upon maturity or call date. Principal repayments from mortgage-backed securities totaled \$5,510 from January 1, 2006 through September 30, 2006. For the remainder of 2006, the Company's focus will be to generate interest revenue primarily through loan growth due to higher asset yields.

Loans

During the nine-month period of 2006, total loans, the Company's primary category of earning assets, were up \$11,279, or 1.8%, from year-end 2005. Most of this year-to-date increase occurred in 2006's first quarter period where loans were up from year-end 2005 by \$8,841, or 1.4%. Total loan growth was mostly influenced by commercial loans increasing \$5,660, or 2.4%, from year-end 2005.

This growth is consistent with the Company's continued emphasis on commercial lending, which generally yields a higher return on investment as compared to other types of loans. Commercial loan growth during the nine-month period of

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

2006 was primarily driven by loan participations with other banks outside the Company's primary market area, which increased \$7,391, or 39.1%. Although the Company is not actively marketing participation loans outside its primary market area, it is taking advantage of the relationships it has with certain lenders in those areas where the Company believes it can profitably participate with an acceptable level of risk. This growth in participation loans was partially offset by a decrease in the remaining commercial loan balances of \$2,463, or 1.1%, in large part due to significant payoffs from three commercial real estate accounts. The commercial loan portfolio, including participation loans, consists primarily of rental property loans (16.4% of portfolio), medical industry loans (13.3% of portfolio), land development loans (9.7% of portfolio), and hotel and motel loans (8.4% of portfolio). The primary market areas for the Company's commercial loans, excluding loan participations, are in the areas of Gallia, Jackson, Pike and Franklin counties in Ohio, which accounted for 76.0% of total originations during the first nine months of 2006, and the growing West Virginia markets, which accounted for 11.9% of total originations for the same time period. While management believes lending opportunities exist in the Company's markets, future commercial lending activities will depend upon economic and related conditions, such as general demand for loans in the Company's primary markets, interest rates offered by the Company and normal underwriting considerations. Additionally, the potential for larger than normal commercial loan payoffs may continue to limit loan growth during the remainder of 2006.

While commercial loans comprise the largest portion of the Company's loan portfolio, generating residential real estate loans remains a key focus of the Company's lending efforts. The Company's total real estate loan balances increased \$5,068, or 2.2%, from year-end 2005 to total \$240,076. Throughout the past 12 months, consumer demand for real estate loans has steadily increased due to the continuation of lower mortgage rates that have not responded as much to the documented rise in short-term interest rates. The Company's fixed-rate real estate loans have become increasingly more popular than the adjustable-rate mortgage product. A flattened yield curve influenced by these many short-term rate increases has led to a specific demand for long-term, fixed-rate real estate loans, which still remain affordable for the Company's mortgage consumers. Management continues to feel comfortable with the Company's minimal interest rate risk exposure and, as a result, the Company kept a large portion of its fixed-rate real estate originations in its portfolio during the nine-month period of 2006. This led to an increase in fixed-rate real estate loan balances of \$16,264, or 14.6%, from year-end 2005. To help further satisfy this increasing demand in fixed-rate real estate loans, the Company continues to originate and sell some fixed-rate mortgages to the secondary market, but has sold just \$2,731 in loans during the first nine months of 2006, which is relatively even with the same volume in the first nine months of 2005. Partially offsetting real estate loan growth was a decrease in the Company's one-year adjustable-rate mortgage balances of \$10,348, or 12.6%, as a result of the slowed volume of refinancing that had been more aggressive during the 2004 and 2005 periods. The remaining real estate loan portfolio balances increased, primarily from the Company's other variable-rate real estate loan products.

During the nine-month period of 2006, consumer loans fell \$3,544, or 2.4%, from year-end 2005 to \$142,271. This decrease in consumer volume was mostly attributable to the automobile lending segment, which decreased \$5,088, or 7.3%, from year-end 2005. While the automobile lending segment continues to represent the largest portion of the Company's consumer loan portfolio, management's emphasis on profitable loan growth with higher returns has contributed most to the reduction in loan volume within this area. Indirect automobile loans bear additional costs from dealers that partially offset interest revenue and lower the rate of return. Furthermore, economic factors and the continued rising rate environment have caused a decline in automobile loan volume. As rates have aggressively moved up, continued competition with local banks and alternative methods of financing, such as captive finance companies offering loans at below-market interest rates have continued to challenge automobile loan growth

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

during the nine-month period of 2006. Partially offsetting the decrease in auto

14

loans was an increase in the Company's capital line balances, primarily home equity loans, which increased \$924, or 4.6%, from year-end 2005.

The Company recognized an increase of \$4,095 in other loans from year-end 2005. Other loans consist primarily of state and municipal loans and overdrafts. This increase was largely due to an increase in state and municipal loans of \$4,131.

The Company is pleased with its total loan growth results during the first nine months of 2006. Loan balances have largely been driven by unseasonable commercial loan increases during the first quarter of 2006. Since that quarter, general demand for commercial loans has been flat, variable-rate real estate mortgages continue to shift to longer term fixed-rate real estate products and consumer volume has been declining. As a result, the Company expects total loan volume to continue at a moderate pace throughout the remainder of 2006. The Company remains committed to sound underwriting practices without sacrificing asset quality and avoiding exposure to unnecessary risk that could weaken the credit quality of the portfolio.

Allowance for Loan Losses

During the first nine months of 2006, the Company increased its allowance for loan losses by \$1,152, or 16.2%, in large part due to an increase in nonperforming loan balances and loan growth since year-end 2005. Since December 31, 2005, the level of nonperforming loans, which consist of nonaccruing loans and accruing loans past due 90 days or more, has significantly increased from \$2,557 at year-end 2005 to \$8,563 at September 30, 2006. The nonperforming loan balances increased primarily from two commercial loan relationships representing 66.0% of total nonperforming loans. These commercial loans are secured by liens on commercial real estate and equipment, personal guarantees and life insurance. As a result, the Company's ratio of nonperforming loans as a percentage of total loans increased from 0.41% at year-end 2005 to 1.36% at September 30, 2006. The Company views this increase as unique in nature and not a trend that will consistently grow throughout the remainder of 2006. The Company's ratio of nonperforming assets, which includes real estate acquired through foreclosure and referred to as other real estate owned ("OREO"), as a percentage of total assets also increased from 0.62% at year-end 2005 to 1.36% at September 30, 2006. The two commercial relationships mentioned above represent 0.90% of total loans and 0.74% of total assets at September 30, 2006. While increases in impaired loan allocations based on specific reviews were necessary to adequately prepare the allowance for probable and incurred loan losses, the Company's net charge-offs decreased \$542, or 41.0%, during the first nine months of 2006 as compared to the same period in 2005, mostly from larger commercial loan charge-offs during the nine-month period of 2005.

As a result of higher nonperforming loan balances, the ratio of allowance for loan losses to total loans increased to 1.32% at September 30, 2006 as compared to 1.16% at December 31, 2005. Management believes that the allowance for loan losses is adequate and reflects probable incurred losses in the loan portfolio. Asset quality remains a key focus, as management continues to stress not just loan growth, but quality in loan underwriting as well.

Deposits

Deposits, both interest-bearing and noninterest bearing, continue to be the most significant source of funds used by the Company to support earning assets. Deposits are influenced by changes in interest rates, economic conditions and competition from other banks. During the first nine months of 2006, total deposits were up \$36,170, or 6.4%, from year-end 2005, resulting from the

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

efforts to attract deposits to fund loan growth as well as the rise in interest rates. The change in deposits came primarily from increases in money market and time deposit balances.

15

Money market account balances increased \$27,798, or 124.4%, during the first nine months of 2006, primarily from the Company's new Market Watch product, which generated \$29,034 in additional deposit balances from year-end 2005. Introduced in August 2005, the Market Watch product is a limited transaction investment account with tiered rates that will compete with current market rate offerings.

Also supplementing deposit growth were time deposits, increasing \$23,353, or 7.1%, from year-end 2005. Time deposits, particularly certificates of deposit ("CD's"), continue to be the most significant source of funding for the Company's earning assets during the nine months ended September 30, 2006, making up 58.5% of total deposits. The Company's retail CD balances increased \$40,816, or 15.0%, from year-end 2005 while wholesale funding deposits (i.e., brokered and network CD issuances) decreased \$17,463, or 31.2% from year-end 2005. As interest rates have risen during the first half of 2006, wholesale funding rates from brokered and network CD deposits have increased at a faster pace than funding rates on retail CD deposits, making retail CD deposits more affordable and cost effective to utilize as a loan funding source.

Deposit growth was partially offset by a \$3,288, or 3.4%, decrease in the Company's interest-bearing demand deposits from year-end 2005. This was largely affected by a decrease in the Company's Gold Club NOW product, which lowered by \$13,348, or 30.7%, from year-end 2005, due to the success of the aforementioned Market Watch product, which caused this deposit balance shift from NOW account balances. The Company's Public Fund NOW balances increased \$10,487, or 37.1% to partially offset the decline in Gold Club NOW account balances. Furthermore, the Company's interest-free funding source, noninterest bearing demand deposits, decreased \$10,198, or 12.4%, from year-end 2005, primarily from seasonal decreases in business checking balances from several large commercial accounts.

The Company will continue to experience increased competition for deposits in its market areas, which should challenge its net growth in retail CD balances. The Company will continue to target growth in these retail funds during the remainder of 2006, reflecting the Company's efforts to reduce its reliance on higher cost funding.

Securities Sold Under Agreements to Repurchase

Repurchase agreements, which are financing arrangements that have overnight maturity terms, were down \$9,147, or 31.5%, from year-end 2005. This decline was mostly due to typical seasonal fluctuations of two commercial accounts in the first quarter of 2006.

Other Borrowed Funds

The Company also accesses other funding sources, including short-term and long-term borrowings, to fund asset growth and satisfy short-term liquidity needs. During the first nine months of 2006, other borrowed funds were down \$9,675, or 12.7%, from year-end 2005, primarily due to the continued emphasis on retail deposits as the primary source of funding for growth in earning assets. Management will continue to utilize various wholesale borrowings to help manage interest rate sensitivity and liquidity.

Shareholders' Equity

The Company maintains a capital level that exceeds regulatory requirements as a

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

margin of safety for its depositors. Total shareholders' equity at September 30, 2006 of \$61,178 was up \$1,907, or 3.2%, as compared to the balance of \$59,271 on December 31, 2005. Contributing most to this increase was year-to-date net income of \$5,382. Partially offsetting the growth in capital were cash dividends paid of \$2,120, or \$.50 per share, year-to-date, and an increase in the amount of treasury stock repurchases. The Company had treasury stock totaling \$9,480 at September 30, 2006, an increase of \$1,231 as compared to the total at year-end 2005. The Company anticipates repurchasing additional common shares from time to

16

time as authorized by its stock repurchase program. The Company's Board of Directors has approved annual extensions to the plan. Most recently, the Board of Directors extended the stock repurchase program from August 16, 2006 to February 16, 2007, and authorized Ohio Valley to repurchase up to 175,000 of its common shares through open market and privately negotiated purchases. As of September 30, 2006, 15,450 shares had been repurchased pursuant to the new terms of the program.

Further offsetting the growth in capital was a decrease in the market value of available-for-sale securities held by the Company, which lowered shareholders' equity by \$125, net of deferred income taxes. The Company has approximately 83.6% of its securities classified as available-for-sale. As a result, the securities and shareholders' equity sections of the Company's balance sheet are more sensitive to the changing market values of securities than if the Company held more securities which could be classified as held-to-maturity.

Comparison of
Results of Operations
for the Quarter and Year-To-Date Periods
Ended September 30, 2006 and 2005

The following discussion focuses, in more detail, on the consolidated results of operations of the Company for the quarterly and year-to-date periods ended September 30, 2006 compared to the same period in 2005. The purpose of this discussion is to provide the reader a more thorough understanding of the consolidated financial statements. This discussion should be read in conjunction with the interim consolidated financial statements and the footnotes included in this Form 10-Q.

Net Interest Income

The most significant portion of the Company's revenue, net interest income, results from properly managing the spread between interest income on earning assets and interest expense on interest-bearing liabilities. The Company earns interest and dividend income from loans, investment securities and short-term investments while incurring interest expense on interest-bearing deposits, repurchase agreements as well as short and long-term borrowings. For the third quarter of 2006, net interest income exceeded the same quarterly period in 2005 by \$13, or 0.2%. Through the first nine months of 2006, net interest income increased \$959, or 4.6%, as compared to the same period in 2005. The increase in the quarterly and year-to-date net interest income is primarily due to growth in earning assets and a slightly compressing net interest margin. While the net interest margin was relatively unchanged between the nine months ended September 30, 2005 and the nine months ended September 30, 2006, the net interest margin continued to decrease during the third quarter of 2006 as a result of higher nonaccrual loan balances experienced since the first quarter of 2006 as well as interest rate pressures felt from higher funding costs of the Company's interest-bearing liabilities.

Total interest income increased \$1,634, or 13.9%, for the third quarter of 2006

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

and increased \$5,241, or 15.5%, through the first nine months of 2006 as compared to the same periods in 2005. Growth in 2006's year-to-date average earning assets of \$33,675, or 4.9%, as compared to the same period in 2005 was complemented with a 68 basis point increase in asset yields, growing from 6.68% to 7.36% for the same time periods. The growth in average earning assets was largely comprised of commercial loan participations as well as real estate mortgages since June 2005. The significant change in asset yields can be attributed to the rising rate environment that has generated consistent increases in short-term interest rates that have been evident since June 2004. Between June 2004 and June 2006, the Federal Reserve's Open Market Committee has increased the target federal funds rate 425 basis points, causing a similar increase in short-term market interest rates. The Company's commercial and participation loan portfolios were most sensitive to the increase in short-term interest rates, with weighted average loan yields increasing 96 basis points from 6.64% at September 30, 2005 to 7.60% at September 30, 2006. Market driven longer-term interest rates have risen very little during this same period, causing the Company's real estate loan portfolio yields to increase at a slower pace than commercial and participation loans.

17

Total interest expense increased \$1,621, or 34.7%, for the third quarter of 2006 and increased \$4,282, or 32.7%, through the first nine months of 2006 as compared to the same periods in 2005 as a result of higher rates and larger average earning asset balances which required additional funding. The increase came mostly from interest expense incurred on the Bank's CD account deposits, which have been more responsive to the rising rate environment experienced since September 2005. The weighted average cost of the Bank's CD balances grew 88 basis points from 3.25% at September 30, 2005 to 4.13% at September 30, 2006. The change in interest expense was further impacted by the Company's money market accounts largely due to the new Market Watch product added in 2005 with tiered market rates that compete well with other such rate offerings in the Company's existing market areas. As a result of the continued rise in rates, the Bank's weighted average funding costs have increased 70 basis points from September 30, 2005 to September 30, 2006.

The Federal Reserve's actions to increase interest rates over the past year has been effective in allowing asset yields to grow. This, combined with the Company's emphasis on profitable loan pricing, has contributed to a relatively stable net interest margin for the nine months of 2006, finishing at 4.10% compared to 4.11% during the same year-to-date period in 2005. However, interest rate pressures have been felt by an increase in the Company's nonaccrual loan balances, which are up \$5,601 from September 30, 2005 to finish at \$7,252. Furthermore, additional pressures have been felt by increased funding costs in relation to the same sustained rising rate environment which has resulted in a compression of the Company's net interest margin for the three months ended September 30, 2006, finishing at 3.97% as compared to 4.13% during the the same quarterly period ended September 30, 2005. This margin compression is also evident when comparing the Company's 2006 third quarter net interest margin to the previous linked quarters at June 30, 2006 of 4.09% and March 31, 2006 of 4.24%, a decrease of 12 basis points and 27 basis points, respectively. While the frequency and size of changes in market interest rates are difficult to predict, management believes that the Federal Reserve has reached its "target" zone of economic stability and anticipates no future interest rate increases for the remainder of 2006. There can be no assurance, however, to this effect as changes in market interest rates are dependent upon a variety of factors that are beyond the Company's control. The anticipated combinations of modest earning asset growth and a compressing net interest margin should continue to stabilize net interest income growth for the remainder of 2006. For additional discussion on the Company's rate sensitive assets and liabilities, please see Item 3, Quantitative and Qualitative Disclosure About Market Risk of this Form 10-Q.

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Provision for Loan Losses

Management performs, on a quarterly basis, a detailed analysis of the allowance for loan losses that encompasses loan portfolio composition, loan quality, loan loss experience and other relevant economic factors. During the first nine months of 2006, provision expense increased \$783 over the same time period in 2005. This increase is primarily a direct result of the Company's increase in nonperforming loan balances and increasing rate of loan growth over the 12 months ended September 30, 2006. At September 30, 2006, the Company's nonperforming loan balances had increased to \$8,563, compared to \$2,557 at year-end 2005 and \$2,889 at September 30, 2005 as a result of the two commercial relationships already discussed under the caption "Allowance for Loan Losses" within this management's discussion and analysis. As a result, through the nine-month period of 2006, the ratio of the Company's nonperforming loans to total loans increased to 1.36%, compared to 0.41% at December 31, 2005 and .48% at September 30, 2005, while nonperforming assets to total assets also increased to 1.36%, compared to .62% and .67% for the same time periods. Management believes that the allowance for loan losses is adequate and reflective of probable losses in the portfolio. The allowance for loan losses was 1.32% of total loans at September 30, 2006, up from 1.16% at December 31, 2005. Future provisions to the allowance for loan losses will continue to be based on management's quarterly in-depth evaluation that is discussed further in detail under the caption "Critical Accounting Policies - Allowance for Loan Losses" of this Form 10-Q.

18

Noninterest Income

Net interest income was supplemented by growth in total noninterest income, increasing \$223, or 16.1%, during the third quarter of 2006 and \$411, or 10.1%, through the first nine months of 2006 as compared to the same time periods in 2005. Quarterly and year-to-date results were impacted most by earnings from the Company's bank owned life insurance ("BOLI") contracts, which increased \$121, or 81.2%, and \$287, or 65.2%, in 2006 as compared to the same periods in 2005, respectively. BOLI activity was impacted by additional investments in life insurance contracts purchased, higher earnings rate on such contracts and life insurance proceeds received in June and September 2006. Since September 30, 2005, the Company's investment in BOLI has increased \$1,175, or 8.0%. Other noninterest income was also up \$88, or 23.5%, during the third quarter of 2006 and \$187, or 17.4%, through the first nine months of 2006 as compared to the same time periods in 2005. Debit card interchange fees were the key drivers of other noninterest income, increasing \$17, or 16.3%, in the third quarter of 2006 and \$52, or 17.0%, through the first nine months of 2006 as compared to the same time periods in 2005. The volume of transactions utilizing the Company's Jeanie(R) Plus debit card continue to increase over a year ago. The Company's customers used their Jeanie(R) Plus debit cards to complete 740,710 transactions during the first nine months of 2006, up 20.9% from the 612,903 transactions during the same period in 2005, derived mostly from gasoline and restaurant purchases. Other noninterest income growth also came from gains on sale of OREO and insurance commission sales from loan originations. Partially offsetting the year-to-date increases from BOLI and other noninterest revenue was a decrease in the Company's service charge on deposit accounts, lowering \$54, or 2.3%, during the first nine months of 2006 as compared to the same time period in 2005, due to the growth in the number of service charge free checking accounts (Easy Checking) which also feature no minimum balance requirements.

Noninterest Expense

The Company remains committed to improving efficiency by placing strong emphasis on overhead expense control. During the third quarter of 2006, total noninterest expense was up \$206, or 3.8%, as compared to the same period in 2005. Through

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

the first nine months of 2006, noninterest expense was up \$384, or 2.4%, as compared to the same period in 2005. Contributing to the quarterly and year-to-date increase were salaries and employee benefits, the Company's largest noninterest expense item, which increased \$34, or 1.0%, for the third quarter of 2006 and \$233, or 2.4%, for the nine-month period of 2006 as compared to the same time periods in 2005. This increase was largely due to higher salaries and benefit costs from annual salary adjustments as well as higher accrued incentive costs based on the Company's higher earnings per share reflected in the first three quarters of 2006. Data processing expenses increased \$27, or 15.9%, during the third quarter of 2006 and \$112, or 22.4%, during the nine-month period of 2006 as compared to the same time periods in 2005, primarily from the transactional volume increase in the Company's Jeanie(R) Plus debit cards. Also increasing was the Company's other noninterest expense, which was up \$167, or 11.9% for the third quarter of 2006 and \$109, or 2.5%, during the nine-month period of 2006 as compared to the same time periods in 2005. Other noninterest expense was led by losses incurred on the sale of various OREO properties as well as various loan and collection expenses associated with higher nonperforming loan balances. These increases in personnel, data processing and other noninterest costs were partially offset by a decrease in occupancy, furniture and equipment expenses, which were down \$22, or 3.5%, during the third quarter of 2006 and \$70, or 3.7%, during the nine-month period of 2006 as compared to the same time periods in 2005. This was in large part due to the maturities of depreciation terms on several asset acquisitions from previous years as well as the decreasing nature of current depreciable assets that have incurred lower depreciation expense during 2006.

19

Capital Resources

All of the Company's capital ratios exceeded the regulatory minimum guidelines as identified in the following table:

	Company Ratios		Regulatory Minimum
	9/30/06	12/31/05	
	-----	-----	-----
Tier 1 risk-based capital	12.3%	12.3%	4.00%
Total risk-based capital ratio	13.5%	13.5%	8.00%
Leverage ratio	9.8%	9.9%	4.00%

Cash dividends paid of \$2,120 for the first nine months of 2006 represent a 4.8% increase over the cash dividends paid during the same period in 2005. The quarterly dividend rate increased from \$0.16 per share in 2005 to \$0.17 per share in 2006. The dividend rate has increased in proportion to the consistent growth in retained earnings. At September 30, 2006, approximately 81% of the Company's shareholders were enrolled in the Company's dividend reinvestment plan. As part of the Company's stock purchase program, management will continue to utilize reinvested dividends and voluntary cash, if necessary, to purchase shares on the open market to be redistributed through the dividend reinvestment plan.

Liquidity

Liquidity relates to the Company's ability to meet the cash demands and credit needs of its customers and is provided by the ability to readily convert assets to cash and raise funds in the market place. Total cash and cash equivalents, interest-bearing deposits with other financial institutions, held-to-maturity securities maturing within one year and securities available-for-sale of \$94,687

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

represented 12.3% of total assets at September 30, 2006. In addition, the FHLB offers advances to the Bank which further enhances the Bank's ability to meet liquidity demands. At September 30, 2006, the Bank could borrow an additional \$61,000 from the FHLB. The Bank also has the ability to purchase federal funds from several of its correspondent banks. For further cash flow information, see the condensed consolidated statement of cash flows contained in this Form 10-Q. Management does not rely on any single source of liquidity and monitors the level of liquidity based on many factors affecting the Company's financial condition.

Off-Balance Sheet Arrangements

As discussed in Note 4 - Concentrations of Credit Risk and Financial Instruments with Off-Balance Sheet Risk, the Company engages in certain off-balance sheet credit-related activities, including commitments to extend credit and standby letters of credit, which could require the Company to make cash payments in the event that specified future events occur. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. While these commitments are necessary to meet the financing needs of the Company's customers, many of these commitments are expected to expire without being drawn upon. Therefore, the total amount of commitments does not necessarily represent future cash requirements.

Critical Accounting Policies

The most significant accounting policies followed by the Company are presented in Note 1 to the consolidated financial statements. These policies, along with the disclosures presented in the other financial statement notes, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Management views critical accounting policies to be those that are highly dependent on subjective

20

or complex judgments, estimates and assumptions, and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management currently views the adequacy of the allowance for loan losses to be a critical accounting policy.

Allowance for loan losses: To arrive at the total dollars necessary to maintain an allowance level sufficient to absorb probable losses incurred at a specific financial statement date, management has developed procedures to establish and then evaluate the allowance once determined. The allowance consists of the following components: specific allocation, general allocation and other estimated general allocation.

To arrive at the amount required for the specific allocation component, the Company evaluates loans for which a loss may be incurred either in part or whole. To achieve this task, the Company has created a quarterly report ("Watchlist") which lists the loans from each loan portfolio that management deems to be potential credit risks. The criteria to be placed on this report are: past due 60 or more days, nonaccrual and loans management has determined to be potential problem loans. These loans are reviewed and analyzed for potential loss by the Large Loan Review Committee, which consists of the President of the Company and members of senior management with lending authority. The function of the Committee is to review and analyze large borrowers for credit risk, scrutinize the Watchlist and evaluate the adequacy of the allowance for loan losses and other credit related issues. The Committee has established a grading

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

system to evaluate the credit risk of each commercial borrower on a scale of 1 (least risk) to 10 (greatest risk). After the Committee evaluates each relationship listed in the report, a specific loss allocation may be assessed. The specific allocation is currently made up of amounts allocated to the commercial and real estate loan portfolios.

Included in the specific allocation analysis are impaired loans, which consist of loans with balances of \$200 or more on nonaccrual status or non-performing in nature. These loans are also individually analyzed and a specific allocation may be assessed based on expected credit loss. Collateral dependent loans will be evaluated to determine a fair value of the collateral securing the loan. Any changes in the impaired allocation will be reflected in the total specific allocation.

The second component (general allowance) is based upon total loan portfolio balances minus loan balances already reviewed (specific allocation). The Large Loan Review Committee evaluates credit analysis reports that provide management with a "snapshot" of information on borrowers with larger-balance loans (aggregate balances of \$1,000 or greater), including loan grades, collateral values, and other factors. A list is prepared and updated quarterly that allows management to monitor this group of borrowers. Therefore, only small balance commercial loans and homogeneous loans (consumer and real estate loans) are not specifically reviewed to determine minor delinquencies, current collateral values and present credit risk. The Company utilizes actual historic loss experience as a factor to calculate the probable losses for this component of the allowance for loan losses. This risk factor reflects an actual 1 year or 3 year performance evaluation of credit losses per loan portfolio, whichever is greater. The risk factor is achieved by taking the average net charge-off per loan portfolio for the last 12 or 36 consecutive months, whichever is greater, and dividing it by the average loan balance for each loan portfolio over the same time period. The Company believes that by using the greater of the 12 or 36 month average loss risk factor, the estimated allowance will more accurately reflect current probable losses.

The final component used to evaluate the adequacy of the allowance includes five additional areas that management believes can have an impact on collecting all principal due. These areas are: 1) delinquency trends, 2) current local economic conditions, 3) non-performing loan trends, 4) recovery vs. charge-off, and 5) personnel changes. Each of these areas is given a percentage factor, from a low of 10% to a high of 30%, determined by the degree of impact it may have on the allowance. To calculate the impact of other economic conditions on the allowance, the total general allowance is multiplied by this factor. These dollars are then added to the other two components to provide for economic

21

conditions in the Company's assessment area. The Company's assessment area takes in a total of ten counties in Ohio and West Virginia. Each assessment area has its individual economic conditions; however, the Company has chosen to average the risk factors for compiling the economic risk factor.

The adequacy of the allowance may be determined by certain specific and nonspecific allocations; however, the total allocation is available for any credit losses that may impact the loan portfolios.

Concentration of Credit Risk

The Company maintains a diversified credit portfolio, with commercial loans currently comprising the most significant portion. Credit risk is primarily subject to loans made to businesses and individuals in central and southeastern Ohio as well as western West Virginia. Management believes this risk to be general in nature, as there are no material concentrations of loans to any

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

industry or consumer group. To the extent possible, the Company diversifies its loan portfolio to limit credit risk by avoiding industry concentrations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK.

The Company's goal for interest rate sensitivity management is to maintain a balance between steady net interest income growth and the risks associated with interest rate fluctuations. Interest rate risk ("IRR") is the exposure of the Company's financial condition to adverse movements in interest rates. Accepting this risk can be an important source of profitability, but excessive levels of IRR can threaten the Company's earnings and capital.

The Company evaluates IRR through the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The modeling process starts with a base case simulation, which assumes a flat interest rate scenario. The base case scenario is compared to rising and falling interest rate scenarios assuming a parallel shift in all interest rates. Comparisons of net interest income and net income fluctuations from the flat rate scenario illustrate the risks associated with the projected balance sheet structure.

The Company's Asset/Liability Committee monitors and manages IRR within Board approved policy limits. The current IRR policy limits anticipated changes in net interest income over a 12 month horizon to plus or minus 10% of the base net interest income assuming a parallel rate shock of up 100, 200 and 300 basis points and down 100, 200 and 300 basis points.

The following table presents the Company's estimated net interest income sensitivity:

Change in Interest Rates in Basis Points -----	September 30, 2006 Percentage Change in Net Interest Income -----	Decem Percent Net In -----
+300	(5.60%)	(
+200	(2.79%)	
+100	(.90%)	
-100	.54%	
-200	.79%	
-300	1.10%	

The estimated change in net interest income reflects minimal interest rate risk exposure and is well within the policy guidelines established by the Board. At September 30, 2006, the Company's analysis of net interest income reflects a modest liability sensitive position. Based on current assumptions, an instantaneous increase in interest rates would negatively impact net interest income primarily due to variable rate loans reaching their annual interest rate cap or potentially their lifetime interest rate cap.

22

Furthermore, in a rising rate environment the prepayment amounts on loans and mortgage-backed securities slow down producing less cash flow to reinvest at higher interest rates. In an instantaneous decrease in interest rates, the analysis reflects a balanced interest rate risk profile which produces a nominal increase in net interest income. As compared to December 31, 2005, the Company's interest rate risk profile has become more liability sensitive in anticipation of interest rates peaking in 2006 and potentially decreasing in 2007.

ITEM 4. CONTROLS AND PROCEDURES

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Evaluation of Disclosure Controls and Procedures

With the participation of the President and Chief Executive Officer (the principal executive officer) and the Vice President and Chief Financial Officer (the principal financial officer) of Ohio Valley, Ohio Valley's management has evaluated the effectiveness of Ohio Valley's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, Ohio Valley's President and Chief Executive Officer and Vice President and Chief Financial Officer have concluded that Ohio Valley's disclosure controls and procedures are effective as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q to ensure that information required to be disclosed by Ohio Valley in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Ohio Valley in the reports that it files or submits under the Exchange Act is accumulated and communicated to Ohio Valley's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in Ohio Valley's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during Ohio Valley's fiscal quarter ended September 30, 2006, that has materially affected, or is reasonably likely to materially affect, Ohio Valley's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There are no material pending legal proceedings to which Ohio Valley or any of its subsidiaries is a party, other than ordinary, routine litigation incidental to their respective businesses. In the opinion of Ohio Valley's management, these proceedings should not, individually or in the aggregate, have a material effect on Ohio Valley's results of operations or financial condition.

ITEM 1A. RISK FACTORS

In addition to other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the risk factors discussed in Part I, "Item 1A. Risk Factors" in Ohio Valley's Annual Report on Form 10-K for the year ended December 31, 2005, as filed with the U.S. Securities and Exchange Commission on March 16, 2006 and available at www.sec.gov. These risk factors could materially affect the Company's business, financial condition or future results. The risk factors described in the Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to

23

the Company or that management currently deems to be immaterial also may materially adversely affect the Company's business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Not Applicable.

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

(b) Not Applicable.

(c) The following table provides information regarding Ohio Valley's repurchases of its common shares during the fiscal quarter ended September 30, 2006:

ISSUER REPURCHASES OF EQUITY SECURITIES(1)				
Period	Total Number of Common Shares Purchased	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum of Shares Yet Be Under Announ Pr
July 1 - 31, 2006	8,741	\$25.21	8,741	1
August 1 - 31, 2006	----	----	----	1
September 1 - 30, 2006	15,450	\$25.15	15,450	1
TOTAL	24,191	\$25.18	24,191	1

(1) On June 15, 1999, Ohio Valley's Board of Directors authorized a stock repurchase program to repurchase up to 175,000 of Ohio Valley's common shares through open market and privately negotiated purchases. Ohio Valley's Board of Directors has approved annual extensions to the plan. Most recently, the Board of Directors extended the stock repurchase program from August 16, 2006 to February 16, 2007, and authorized Ohio Valley to repurchase up to 175,000 of its common shares through open market and privately negotiated purchases. The timing of the purchases, the prices paid and actual number of shares purchased will depend upon market conditions and limitations imposed by applicable federal securities laws.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not Applicable.

ITEM 5. OTHER INFORMATION

Not Applicable.

ITEM 6. EXHIBITS

(a) Exhibits:
Reference is made to the Exhibit Index set forth immediately following the signature page of this Form 10-Q.

EXHIBIT INDEX

The following exhibits are included in this Form 10-Q or are incorporated by reference as noted in the following table:

Exhibit Number	Exhibit Description
-----	-----
3(a)	Amended Articles of Incorporation of Ohio Valley. Incorporated herein by reference to Exhibit 3(a) to Ohio Valley's Annual Report on Form 10-K for fiscal year ending December 31, 1997 (SEC File No. 0-20914).
3(b)	Code of Regulations of Ohio Valley. Incorporated herein by reference to Exhibit 3(b) to Ohio Valley's current report on Form 8-K (SEC File No. 0-20914) filed November 6, 1992.
31.1	Rule 13a-14 (a) / 15d-14(a) Certification (Principal Executive Officer). Filed herewith.
31.2	Rule 13a-14 (a) / 15d-14(a) Certification (Principal Financial Officer). Filed herewith.
32	Section 1350 Certification (Principal Executive Officer and Principal Financial Officer). Filed herewith.
