Yes ☐

No ☒

If ☒ Yes marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____

PRESS RELEASE

Veolia ES Waste-to-Energy Awarded a 17 year Contract with Pinellas County, FL. Estimated at \$615 Million over the term

Facility Capable of Generating Enough Electricity to Power 45,000 Homes Daily

Paris, January 26, 2007. During meeting of the Pinellas County Board of County Commissioners on January 23, Veolia ES Waste-to-Energy, Inc. was awarded the contract to be the long-term operator of the Pinellas Waste-to-Energy Facility by unanimous approval. The \$25 million yearly contract extends for 17 years, representing an estimated total turnover of \$ 615 million over the term when including facility refurbishments. Veolia ES Waste-to-Energy, which is a division of Veolia Environmental Services North America, manages 10 other such facilities across North America.

Steve Passage, CEO of Veolia ES Waste-to-Energy, reacted enthusiastically to the decision. *"Going into today's Commissioners' hearing, we were confident of a positive outcome due to the high scores our proposal received from the Evaluation Committee,"* he said. *"We are now ready to validate the Committee's recommendation to give us the number one ranking."*

Selection criteria was based upon cost, staffing and transition plans, and historical safety and environmental performance as well as relationships with other public sector facility owners. Veolia ES Waste-to-Energy had the highest scores of the three competitors in each category.

The CEO of Veolia Environmental Services North America, Michel Gourvennec, greeted the news of the win with optimism. *"Our businesses in North America had another strong year of performance in 2006, even while undertaking our mission of rebranding our company from Onyx to Veolia Environmental Services. In 2007, we will continue to pursue future growth opportunities across all of our business lines,"* remarked Gourvennec. He continued, *"We look forward to providing the very highest quality of service to the staff and residents of Pinellas County."*

The Pinellas Waste-to-Energy Facility, which is owned by the County, began commercial operations in 1983. It consists of three boilers, each of which is capable of burning 1, 050 tons of solid waste per day. These boilers are the largest waste-to-energy boilers in the United States. Pressurized steam created from the combustion process turns turbine generators that create electricity. The plant generates about 75 megawatts of electricity per hour, enough to power approximately 45,000 homes and businesses every day.

There will be a transition period between now and May 6, 2007 when the current operator's contract expires. During that time, Veolia intends to interview and offer employment to a majority of the current staff. *"It has been our practice to make job offers to existing facility staff when we take over the operation of a facility,"* remarked Passage. *"For those positions we don't fill with existing staff, we will seek out local talent here in southwest Florida."*

###

Veolia Environmental Services, the division of Veolia Environnement in charge of waste management business, is the only provider of a full range of services for hazardous and non-hazardous solid and liquid waste all over the world. The company provides waste management and logistics services (collection, pipe systems maintenance, cleaning, waste flow management), as well as materials recovery and recycling. Veolia Environmental Services generated revenue of €6.6 billion in 2005, representing 25% of Veolia Environnement's revenue.
