RADVISION REPORTS PRELIMINARY FIRST QUARTER RESULTS

- Company Revises Guidance for the Second Quarter and Comments on Outlook for Fiscal 2001 -

Tel Aviv, Israel, April 5, 2001 -- RADVISION Ltd. (NASDAQ: RVSN), the leading provider of award-winning, industry-standard products and technology for real-time voice and video communication over IP (V2oIP(TM)), today reported preliminary results for the first quarter of 2001. Revenues for the first quarter are expected to be in the range of \$14.8 to \$14.9 million, compared with revenues of \$7.8 million in the first quarter of 2000. Net income is expected to be between \$1.8 and \$1.9 million, or \$0.08 to \$0.09 per share, compared to a net loss of \$0.5 million, or \$0.04 per share, in the first quarter of 2000. These anticipated first quarter results for 2001 compare to prior guidance of \$15.3 million in revenues and net income of \$1.9 million, or \$0.09 per share.

Commenting on the expected results for the quarter, Ami Amir, chief executive officer of RADVISION, said, "We are seeing a slow down in enterprise spending in the United States, leading to lower orders from some of our customers for our networking products compared to what we expected at the time of our fourth quarter conference call. At the same time, we expect revenues from enabling technologies to be on plan for the quarter."

Citing a less predictable business environment and ongoing softness in enterprise spending in the United States, Mr. Amir said that the Company expects to report revenues

Edgar Filing: RADVISION LTD - Form 6-K

for the second quarter in the range of \$11.5 to \$12.5 million and earnings in the range of \$0.01 and \$0.02 per share. According to Mr. Amir, "The current lack of visibility makes it extremely difficult for us to put forward guidance for the second half of the year with a high degree of confidence. Minimally, we expect revenues for fiscal 2001 to be no less than the \$46 million we reported in fiscal 2000."

"We are aligning our cost structure with our lower revenue expectations with a view toward maintaining positive earnings in fiscal 2001. We are concentrating our resources on sales driven activities and on establishing new channel partners outside of the United States and strengthening our existing channel partnerships. We have reduced overall spending and have implemented a 10% reduction in our workforce effective April 2nd. We are focusing our efforts on improving our performance by doing more with less and without sacrificing our long-term goals."

Concluded Mr. Amir, "With cash and cash equivalents of \$97 million as of December 31, 2000 and virtually no debt, we believe that we have the financial stability to weather this slowdown and maintain our market leadership and the technological advantage that we have relative to our competitors. We have the resources to leverage our current reputation as the recognized experts in V2oIP and build for the future through continued investment in new product and market development."

First Quarter 2001 Earnings Conference Call and Webcast - April 18, 2001 at 9:00a.m. EST
