ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

We are exposed to a variety of market risks, primarily changes in interest rates affecting our investments in marketable securities and foreign currency fluctuations.

INTEREST RATE RISK

Except for our exposure to market risk for changes in interest rates relating to our investments in marketable securities, which are principally denominated in U.S. dollars, we do not have any substantial risk which is derived from a change in interest rates. The net increase in earnings and cash flow for the next year resulting from a ten percent interest rate increase would be negligible.

FOREIGN CURRENCY EXCHANGE RISK

Our financial results may be negatively impacted by foreign currency fluctuations. Our foreign operations are transacted through a global network of subsidiaries. These sales and related expenses are generally denominated in

Edgar Filing: MAGIC SOFTWARE ENTERPRISES LTD - Form 20-F/A

currencies other than the U.S. dollar, except in Israel, where our sales are denominated in U.S. dollars and our expenses are denominated in New Israeli Shekel. Because our financial results are reported in U.S. dollars, our results of operations may be adversely impacted by fluctuations in the rates of exchange between the U.S. dollar and such other currencies as the financial results of our foreign subsidiaries are converted into U.S. dollars in consolidation. Our earnings are predominantly affected by fluctuations in the value of the U.S. dollar as compared to the New Israeli Shekel, the U.S. dollar as compared to the Euro and to the Japanese Yen. An increase of 10% in the value of the New Israeli Shekel relative to the U.S. dollar in 2008 would have resulted in a decrease in the U.S. dollar reporting value of our operating income of \$2 million for that year, while a decrease of 10% in the value of the New Israeli Shekel relative to the U.S. dollar in 2008 would have resulted in an increase in the U.S. dollar reporting value of our operating income of \$1.7 million for the year. An increase of 10% in the value of the Euro and in the value of the Japanese yen relative to the U.S. dollar in 2008 would have resulted in an increase in the U.S. dollar reporting value of our operating income of \$0.6 million and \$0.4 million respectively for that year, while a decrease of 10% in the value of the Euro and in the value of the Japanese Yen relative to the U.S. dollar in 2008 would have resulted in a decrease in the U.S. dollar reporting value of our operating income of \$0.6 million and \$0.3 million respectively for the year.

EQUITY PRICE RISK

The Company had \$3.5 million of trading securities that are classified as available for sale. Those securities have exposure to equity price risk. The estimated potential loss in fair value resulting from a hypothetical ten percent decrease in prices quoted on stock exchanges is approximately \$350,000.
