STERLING FINANCIAL CORPORATION

Notes to Consolidated Financial Statements

1. *Basis of Presentation:*

The foregoing unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2001. In the opinion of management, the unaudited interim consolidated financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim periods presented.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of Sterling Financial Corporation's ("Sterling's") consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of Sterling's consolidated financial position and results of operations.

2. *Interim Financial Statements:*

The financial information set forth in the unaudited interim consolidated financial statements reflects the adjustments, all of which are of a normal and recurring nature, which, in the opinion of management, are necessary for a fair presentation of the periods reported.

3. *Other Borrowings:*

The components of other borrowings are as follows (in thousands):

	June 30, 2002	December 31, 2001
	\$	\$
Term note payable(1)	25,000	30,000
Advances on revolving line of credit(2)	0	0
Sterling obligated mandatorily redeemable preferred capital securities of subsidiary trusts holding solely junior subordinated deferrable interest debentures of Sterling(3)(4)	64,000	64,000
Floating Rate Notes Due 2006(5)	30,000	30,000
Convertible Subordinated Debentures Due 2008(6)	0	3,500
Total other borrowings	\$ 119,000	\$ 127,500

(1)

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Sterling has a variable-rate term note with U.S. Bank, N.A. ("U.S. Bank") with a balance of \$25.0 million outstanding at June 30, 2002. This note matures on September 17, 2007. Interest accrues at the 30-day London Interbank Offering Rate ("LIBOR") plus 2.50% (4.35% at June 30,

6

2002) and is payable monthly. This note is collateralized by a majority of the Common and Preferred Stock of Sterling Savings Bank.

- (2) Sterling has a \$5.0 million revolving line-of-credit with U.S. Bank. This line of credit matures on September 16, 2002. The interest rate is adjustable monthly at the 30-day LIBOR plus 2.50% (4.35% at June 30, 2002) and is payable monthly. This note is collateralized by a majority of the Common and Preferred Stock of Sterling Savings Bank. At June 30, 2002, no amounts were outstanding under this line.
- (3) Sterling has outstanding \$41.2 million of 9.50% junior subordinated deferrable interest debentures ("Junior Subordinated Debentures-I") to Sterling Capital Trust I ("Trust-I"), a Delaware business trust, of which Sterling owns all of the common equity. The sole asset of Trust-I is the Junior Subordinated Debentures-I. Trust-I issued \$40.0 million of 9.50% Cumulative Capital Securities ("Trust-I Preferred Securities") to investors. Sterling's obligations under the Junior Subordinated Debentures-I and related documents, taken together, constitute a full and unconditional guarantee by Sterling of Trust-I's obligations under the Trust-I Preferred Securities. The Trust-I Preferred Securities are treated as debt of Sterling. Although Sterling, as a savings and loan holding company, is not subject to the Federal Reserve capital requirements for bank holding companies, the Trust-I Preferred Securities have been structured to qualify as Tier I capital, subject to certain limitations, if Sterling were to become regulated as a bank holding company. The Junior Subordinated Debentures-I and related Trust-I Preferred Securities mature in 2027 and are redeemable at the option of Sterling in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier I capital is no longer permitted or certain other contingencies arise. The Trust-I Preferred Securities must be redeemed upon maturity of the Junior Subordinated Debentures-I in 2027.
- (4) Sterling has outstanding \$24.7 million of 10.25% junior subordinated deferrable interest debentures ("Junior Subordinated Debentures-II") to Sterling Capital Trust II ("Trust-II"), a Delaware business trust, in which Sterling owns all of the common equity. The sole asset of Trust-II is the Junior Subordinated Debentures-II. Trust-II issued \$24.0 million of 10.25% Cumulative Capital Securities ("Trust-II Preferred Securities") to investors. Sterling's obligations under Junior Subordinated Debentures-II and related documents, taken together, constitute a full and unconditional guarantee by Sterling of Trust-II's obligations under the Trust-II Preferred Securities. The Trust-II Preferred Securities are treated as debt of Sterling. Although Sterling, as a savings and loan holding company, is not subject to the Federal Reserve capital requirements for bank holding companies, the Trust-II Preferred Securities have been structured to qualify as Tier 1 capital, subject to certain limitations, if Sterling were to become regulated as a bank holding company. The Junior Subordinated Debentures-II and related Trust-II Preferred Securities mature in 2031 and are redeemable at the option of Sterling in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier 1 capital is no longer permitted or certain other contingencies arise. The Trust-II Preferred Securities must be redeemed upon maturity of the Junior Subordinated Debentures-II in 2031.
- (5) Sterling has outstanding \$30.0 million of Floating Rate Notes Due 2006. These notes are unsecured general obligations of Sterling and are subordinated to certain other existing and future indebtedness. Under terms of the notes, Sterling is limited in the amount of certain long-term debt that it may incur, and the notes restrict Sterling, under certain circumstances, as to the amount of cash dividends on its preferred or common stock and capital distributions which can be made. At June 30, 2002, Sterling could have incurred approximately \$21.1 million of additional long-term debt. At June 30, Sterling could have paid up to approximately \$22.2 million in additional

7

dividends. Interest accrues at the 90-day LIBOR plus 2.50% (4.39% until September 15, 2002) and is adjustable and payable quarterly. The notes mature in 2006 and may be redeemed under certain conditions after June 15, 2002.

- (6) In September 2001, Sterling assumed \$3.5 million of 7.50% Convertible Subordinated Debentures due 2008 (the "Debentures") as a result of a business combination. As of May 31, 2002, the holders of all of the Debentures had exercised their right to convert the Debentures into shares of Sterling's Common Stock resulting in the issuance of 228,305 shares of Sterling Common Stock.

4. Income Per Share:

The following table presents the basic and diluted income per share computations including the effects of the 10% stock dividend which was paid on May 31, 2002:

Three Months Ended June 30,

	2002			2001		
	Net Income	Weighted Avg. Shares	Per Share Amount	Net Income	Weighted Avg. Shares	Per Share Amount
Basic computations	\$ 5,736,000	11,847,004	\$ 0.48	\$ 3,799,000	10,795,714	\$ 0.35
Effect of dilutive securities:

Total operating expenses	\$ 19,752	\$ 17,557	\$ 39,419	\$ 35,161

6. Business Segments:

Sterling has identified its business segments as residential loan production and commercial real estate production.

Sterling operates residential loan production offices primarily in the Spokane and Seattle, Washington; Portland, Oregon; and Boise, Idaho metropolitan areas through its subsidiary Action Mortgage Company. Residential mortgage banking operations include revenues from servicing-released and servicing-retained sales of originated residential loans, bulk sales of loan servicing rights and other fees.

Sterling also operates commercial real estate loan production offices primarily in the Spokane and Seattle, Washington; and Portland, Oregon metropolitan areas through its subsidiary INTERVEST Mortgage Investment Company. Commercial real estate mortgage banking operations include revenues from sales of commercial real estate loans and participation interests in commercial real estate loans, loan fees and servicing fees.

9

The following summarizes certain financial information regarding Sterling's segments and provides a reconciliation to the amounts reported in the consolidated financial statements:

	Mortgage Banking Operations			
	Banking Operations	Residential	Commercial Real Estate	Total
(Dollars in thousands)				
As of and for the three months ended June 30, 2002:

Total assets	2,638,983	8,642	11,623	2,659,248
As of and for the six months ended June 30, 2002:				
Interest income	\$ 90,232	\$ 3,359	\$ 2,276	\$ 95,867
Other fee income	7,168	480	281	7,929
Gains on sales of loans	0	1,019	576	1,595
Expenses	35,017	3,347	1,055	39,419
Income before taxes	11,088	2,216	2,295	15,599
Total assets	3,059,516	13,669	14,893	3,088,078

As of and for the six months ended June 30, 2001:

Interest income	\$ 96,495	\$ 2,963	\$ 1,998	\$ 101,456
Other fee income	5,926	138	319	6,383
Gains on sales of loans	570	475	226	1,271
Expenses	32,264	1,938	959	35,161
Income before taxes	7,510	2,084	1,743	11,337
Total assets	2,638,983	8,642	11,623	2,659,248

Sterling adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS Nos. 137 and 138, effective January 1, 2001. This Statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. Under recently adopted Derivatives Implementation Group Statement 133 Implementation Issue C13, "Scope Exceptions: When a Loan Commitment Is Included in the Scope of Statement 133," Sterling must apply Statement 133 to interest rate lock agreements related to the origination or acquisition of mortgage loans that will be held for resale beginning in July 2002. The recognition of loan commitments related to the origination or acquisition of mortgage loans held for resale may accelerate the recognition of some of the gain or loss on the sale of mortgage loans held for

10

resale. Sterling estimates that the effect of adopting this guidance will increase its assets and liabilities by approximately \$4.0 million.

7. Goodwill and Intangible Assets:

In June 2001, the Financial Accounting Standards Board ("FASB") approved for issuance Statement of Financial Accounting Standards No. 142 ("SFAS No. 142"), "Goodwill and Intangible Assets," which revises the accounting for purchased goodwill and intangible assets. Under SFAS No. 142, goodwill and intangible assets with indefinite lives will no longer be amortized, but will be tested for impairment at least annually. If goodwill is found to be impaired, it will be written down to its fair market value. Sterling adopted SFAS No. 142 on January 1, 2002. Sterling tested the amortized balance of goodwill and determined that no impairment existed as of June 30, 2002. The net effect of adopting this accounting standard was to increase net income by \$717,000 or \$0.06 per diluted share for the quarter ended June 30, 2002. For the six months ended June 30, 2002, the increase to net income was \$1.4 million or \$0.11 per diluted share.

In May 2002, the FASB issued a Proposed Statement of Financial Accounting Standards, "Acquisition of Certain Financial Institutions, an amendment of FASB Statements No. 72 and No. 144 and FASB Interpretation No. 9" (the ED). While the ED provides guidance that management believes is consistent with Sterling's adoption of SFAS No. 142 and subsequent discontinuation of the amortization of goodwill, the final statement, if changed from the ED, could alter the treatment adopted by Sterling and require a continuation of amortization, which would have the effect of increasing annual expenses by approximately \$3.8 million, resulting in a decrease in net income.

In accordance with SFAS No. 142, the effect of this accounting change is reflected prospectively. Comparative disclosure as if the change had been retroactively applied to the prior year is as follows:

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Adjusted earnings per share	\$ 0.47	\$ 0.40	\$ 0.93	\$ 0.79

8. Other Accounting Policies:

In August 2001, the FASB approved for issuance Statement of Financial Accounting Standards No. 144 ("SFAS No. 144"), "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 was issued to resolve implementation issues that had been created under Statement of Financial Accounting Standards No. 121. Under SFAS No. 144, one accounting model is required to be

11

used for long-lived assets to be disposed of by sale, whether previously held and used or newly acquired, and certain additional disclosures are required. The adoption of SFAS No. 144 did not have a material effect on Sterling's consolidated financial statements.

In April 2002, the FASB issued Statement of Financial Accounting Standards No. 145 ("SFAS No. 145"), "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 updates, clarifies and simplifies existing accounting pronouncements, by rescinding SFAS No. 4, which required all gains and losses from extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. As a result, the criteria in Accounting Principles Board Opinion No. 30 will now be used to classify those gains and losses. Additionally, SFAS No. 145 amends SFAS No. 13 to require that certain lease modifications that have economic effects similar to sale-leaseback transactions be accounted for in the same manner as sale-leaseback transactions. Finally, SFAS No. 145 also makes technical corrections to existing pronouncements. Management currently believes that the adoption of SFAS No. 145 will not have a material impact on Sterling's consolidated financial statements.

In July 2002, the FASB issued Statement of Financial Accounting Standards No. 146 ("SFAS No. 146"), "Accounting for Costs Associated with Exit or Disposal Activities." SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. Examples of costs covered by the standard include lease termination costs and certain employee severance costs that are associated with a restructuring, discontinued operation, plant closing, or other exit or disposal activity. SFAS No. 146 replaces the prior guidance that was provided by EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations**STERLING FINANCIAL CORPORATION****Comparison of the Three and Six Months Ended June 30, 2002 and 2001**

This report contains forward-looking statements, which are not historical facts and pertain to our future operating results. These forward-looking statements are within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, expectations and intentions and other statements contained in this report that are not historical facts. When used in this report, the words "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," and similar expressions are generally intended to identify forward-looking statements. These forward-looking statements are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. Actual results may differ materially from the results discussed in these forward-looking statements because of numerous possible risks and uncertainties. These include but are not limited to: the possibility of adverse economic developments which may, among other things, increase default and delinquency risks in Sterling's loan portfolios; shifts in interest rates which may result in lower interest rate margins; shifts in the demand for Sterling's loan and other products; lower than expected revenue or cost savings in connection with acquisitions; changes in accounting policies; changes in the monetary and fiscal policies of the federal government; changes in laws, regulations and the competitive environment. Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Consolidated Financial Statements and Notes presented elsewhere in this report and in Sterling's current annual report on Form 10-K.

General

Sterling Financial Corporation ("Sterling") is a unitary savings and loan holding company, the significant operating subsidiary of which is Sterling Savings Bank. The significant operating subsidiaries of Sterling Savings Bank are Action Mortgage Company ("Action Mortgage"), INTERVEST Mortgage Investment Company ("INTERVEST") and Harbor Financial Services, Inc. ("Harbor Financial").

Sterling provides personalized, quality financial services to its customers as exemplified by its "Hometown Helpful" philosophy. Sterling believes that this dedication to personalized service has enabled it to maintain a stable retail deposit base. With \$3.09 billion in total assets at June 30, 2002, Sterling attracts Federal Deposit Insurance Corporation ("FDIC") insured deposits from the general public through 77 retail branches located primarily in rural and suburban communities in Washington, Oregon, Idaho and Montana. Sterling originates loans through its branch offices as well as Action Mortgage residential loan production offices in the metropolitan areas of Spokane and Seattle, Washington; Portland, Oregon; and Boise, Idaho; and through INTERVEST commercial real estate lending offices located in the metropolitan areas of Spokane and Seattle, Washington; and Portland, Oregon. Sterling also markets tax-deferred annuities, mutual funds and other financial products through Harbor Financial.

On May 31, 2002, Sterling paid a 10% stock dividend to shareholders of record at May 3, 2002. As a result, Sterling issued 1,084,646 shares of common stock.

Sterling continues to enhance its presence as a community bank by increasing its commercial real estate, business banking, consumer and construction lending while increasing its retail deposits, particularly transaction accounts. Commercial real estate, business banking, consumer and construction loans generally produce higher yields than residential loans. Such loans, however, generally involve a higher degree of risk than financing residential real estate. Sterling's revenues are derived primarily

from interest earned on loans, investments and asset-backed securities ("ABS"), from fees and service charges and from mortgage banking operations. The operations of Sterling Savings Bank, and savings institutions generally, are influenced significantly by general economic conditions and by policies of its primary regulatory authorities: the Office of Thrift Supervision ("OTS"); the FDIC and the State of Washington Department of Financial Institutions ("Washington Supervisor").

Management believes that a community bank mix of assets and liabilities will enhance its net interest income ("NII") (the difference between the interest earned on loans and investments and the interest paid on liabilities) and other fee income will increase, although there can be no assurance in this regard. Sterling intends to continue to pursue an aggressive growth strategy, which may include acquiring other financial institutions, businesses or branches thereof or other substantial assets or deposit liabilities. Sterling may not be successful in identifying further acquisition candidates, integrating acquired businesses or preventing deposit erosion or loan quality deterioration at acquired businesses. There is significant competition for acquisitions in Sterling's market area, and Sterling may not be able to acquire other institutions or businesses on attractive terms. Furthermore, the success of Sterling's growth strategy will depend on increasing and maintaining sufficient levels of regulatory capital, obtaining necessary regulatory approvals, generating appropriate growth and favorable economic and market conditions. There can be no assurance that Sterling will be successful in implementing its growth strategy.

Critical Accounting Policies

Various elements of our accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In particular, we have identified five policies that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of our financial statements. These policies relate to the valuation of our goodwill and other intangibles, the determination of our allowance for loan losses, the valuation of investments, the valuation of and accounting for stock options and the valuation of real estate held for sale. These policies and the judgments, estimates and assumptions are described in greater detail in subsequent sections of Management's Discussion and Analysis, in the Consolidated Financial Statements included herein, and in the "Summary of Significant Accounting Policies" presented in Sterling's current annual report on Form 10-K. We believe that the judgments, estimates and assumptions used in the preparation of our Consolidated Financial Statements are appropriate given the factual circumstances at the time. However, given the sensitivity of our Consolidated Financial Statements to these critical accounting policies, the use of other judgments, estimates and assumptions could result in material differences in our results of operations or financial condition.

Results of Operations

Overview. Sterling recorded net income of \$5.7 million, or \$0.47 per diluted share, for the three months ended June 30, 2002, compared with net income of \$3.8 million, or \$0.35 per diluted share, for the three months ended June 30, 2001. Sterling recorded net income of \$11.3 million, or \$0.93 per diluted share, for the six months ended June 30, 2002. This compares with net income of \$7.4 million, or \$0.68 per diluted share, for the six months ended June 30, 2001. The increase in net income for both periods reflected an increase in other income, net interest income and a discontinuation of the amortization of goodwill.

The annualized return on average assets was 0.75% and 0.57% for the three months ended June 30, 2002 and 2001, respectively. For the six months ended June 30, 2002 and 2001, the annualized return on average assets was 0.75% and 0.56%, respectively. The increases in the ratios were primarily due to the increase in other income.

14

The annualized return on average equity was 13.0% and 10.2% for the three months ended June 30, 2002 and 2001, respectively. For the six months ended June 30, 2002 and 2001, the annualized return on average equity was 13.2% and 10.2%, respectively. The increases in the ratios were primarily due to the increase in net income.

Net Interest Income. The most significant component of earnings for a financial institution typically is NII, which is the difference between interest income, primarily from loan, ABS and investment portfolios, and interest expense, primarily on deposits and borrowings. During the three months ended June 30, 2002 and 2001, NII was \$23.4 million and \$20.3 million, respectively, representing an increase of 15.3%. During the six months ended June 30, 2002 and 2001, NII was \$46.8 million and \$40.5 million, respectively, an increase of 15.3%.

Changes in NII result from changes in volume, net interest spread and net interest margin. Volume refers to the dollar level of interest-earning assets and interest-bearing liabilities. Net interest spread refers to the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Net interest margin refers to NII divided by total interest-earning assets and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities. The increase in NII during the three and six months ended June 30, 2002, compared to the same periods in 2001, was primarily due to an approximate 15% increase in the volume of average interest-earning assets and to a significant decrease in the cost of funds.

During the three months ended June 30, 2002 and 2001, the volume of average interest-earning assets was \$2.86 billion and \$2.49 billion, respectively. For the three months ended June 30, 2002, average loans increased by \$163.3 million, while average investments and ABS increased by \$201.9 million over the same period in 2001. Net interest spread during these periods was 3.28% and 3.22%, respectively. The net interest margin for the three months ended June 30, 2002 and 2001 was 3.28% and 3.27%, respectively. Net interest spread increased due to a

sharper decrease in the cost of funds relative to the yields on average interest-earning assets. Sterling has been asset-sensitive in preparation for the Federal Reserve raising interest rates, which resulted in a slight margin compression during the current quarter.

During the six months ended June 30, 2002 and 2001, the volume of average interest-earnings assets was \$2.85 billion and \$2.49 billion, respectively. Net interest spread during these periods was 3.30% and 3.25%, respectively. The net interest margin for the six months ended June 30, 2002 and 2001 was 3.30% and 3.28%, respectively. The increase in the net interest spread for the six months ended June 30, 2002, compared with the same period in 2001, was primarily due to a sharper decrease in the cost of funds relative to the yields on average interest-earning assets.

Provision for Losses on Loans and Leases. Management's policy is to establish valuation allowances for estimated losses by charging corresponding provisions against income. The evaluation of the adequacy of specific and general valuation allowances is an ongoing process. This process includes information derived from many factors including historical loss trends, trends in classified assets, trends in delinquency and nonaccrual loans, trends in portfolio volume, diversification as to type of loan, size of individual credit exposure, current and anticipated economic conditions, loan policies, collection policies and effectiveness, quality of credit personnel, effectiveness of policies, procedures and practices, and recent loss experience of peer banking institutions.

Sterling recorded provisions for losses on loans and leases of \$2.2 million and \$1.5 million for the three months ended June 30, 2002 and 2001, respectively. Sterling recorded provisions for losses on loans of \$4.3 million and \$2.9 million for the six months ended June 30, 2002 and 2001. The current provision reflects the analysis and assessment of the relevant factors mentioned in the preceding paragraph. Management anticipates that its provisions for losses on loans and leases will continue to increase, reflecting Sterling's strategic direction of originating more commercial real estate,

construction, business banking and consumer loans which have a somewhat higher loss profile than the traditional thrift institution mix of loans.

The following table summarizes loan and lease loss allowance activity for the periods indicated.

	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)	
Allowance for losses on loans and leases:		
Balance at January 1:	\$ 20,599	\$ 16,740
Quarter ended March 31:		
Provision for losses on loans and leases	2,086	1,400
Amounts written off net of recoveries and other	(1,370)	(1,076)
Balance at March 31	21,315	17,064
Quarter ended June 30:		
Provision for losses on loans and leases	2,227	1,475
Amounts written off net of recoveries and other	(2,007)	(797)
Balance at June 30	\$ 21,535	\$ 17,742

At June 30, 2002, Sterling's total classified assets were \$67.6 million, compared with \$29.3 million at June 30, 2001. Total nonperforming loans and leases were \$28.9 million at June 30, 2002, compared with \$13.5 million at June 30, 2001. The increase in nonperforming loans and leases and classified assets was primarily attributable to the nonperforming loans, leases and classified assets acquired in the business combination with Source Capital Corporation. At June 30, 2002, Sterling's loan and lease delinquency rate (60 days or more) as a percentage of total loans and leases was 1.09%, compared with 0.54% at June 30, 2001. Excluding delinquent Source Capital loans, the delinquency ratio at June 30, 2002 would have been 0.74%.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

The delinquency ratio, even without the Source Capital assets, has increased over the prior year's comparable quarter. This increase reflects both the continuing change in Sterling's loan mix to a greater emphasis on commercial and consumer loans and the low level of economic activity in the region. Management believes that Sterling's emphasis on originating higher-risk commercial real estate, construction, business banking and consumer loans is appropriate and will endeavor to maintain asset quality at acceptable levels.

Other Income. Other income was \$6.7 million and \$4.6 million for the three months ended June 30, 2002 and 2001, respectively. The increase for the three months ended June 30, 2002, compared with the three months ended June 30, 2001 was primarily due to increases in fee structures for service charges and an increase in the cash surrender value of BOLI. For the six months ended June 30, 2002, other income was \$12.6 million compared with \$8.8 million for the six months ended June 30, 2001. Also included in other income for the three months ended June 30, 2002 was a \$311,000 gain on the sale of securities.

16

The increase in income from mortgage banking operations for the six months ended June 30, 2002 compared to the same period in 2001, was primarily due to increased refinancing activity and loan sales. The following table summarizes loan originations and sales of loans for the periods indicated.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2002	2001	2002	2001
(Dollars in millions)				
Originations of one- to four-family permanent mortgage loans	\$ 58.0	\$ 45.1	\$ 116.1	\$ 71.2
Sales of residential loans	37.7	135.8	72.4	148.5
Sales of commercial real estate loans	5.5	9.0	59.5	38.2
Principal balances of mortgage loans serviced for others	383.0	321.5	383.0	321.5

Operating Expenses. Operating expenses were \$19.8 million and \$17.6 million for the three months ended June 30, 2002 and 2001, respectively. During the six months ended June 30, 2002 and 2001, operating expenses were \$39.4 million and \$35.2 million, respectively. The higher level of operating expenses was primarily a result of expanded staffing in Sterling's branch delivery network, an increase in employee benefits, data processing and increased occupancy costs.

Employee compensation and benefits were \$10.4 million and \$8.2 million for the three months ended June 30, 2002 and 2001, respectively. During the six months ended June 30, 2002 and 2001, employee compensation and benefits were \$21.0 million and \$16.5 million, respectively. The employee costs reflected increased mortgage banking staff and additional staff for Sterling's cash management operations and Portland Corporate Banking Center. At June 30, 2002, full-time-equivalent employees were 944, compared with 837 at June 30, 2001.

Data processing expense was \$1.5 million and \$1.3 million for the three months ended June 30, 2002 and 2001, respectively. During the six months ended June 30, 2002 and 2001, data processing expense was \$3.0 million and \$2.7 million, respectively. The increase in both periods was primarily due to an increase in costs associated with a higher volume of transaction accounts.

Goodwill litigation expenses were \$225,000 and \$255,000 for the three months ended June 30, 2002 and 2001, respectively. During the six months ended June 30, 2002 and 2001, goodwill litigation expenses were \$520,000 and \$515,000, respectively. The increase primarily reflected the completion of the fact discovery phase and commencement of the expert discovery phase of Sterling's goodwill litigation. Because of the increased level of effort required to bring the case to conclusion, Sterling likely will continue to incur legal expenses at recent levels over the next one to two years.

Amortization of goodwill was \$0 and \$963,000 for the three months ended at June 30, 2002 and 2001, respectively, reflecting the cessation of goodwill amortization. For the six months ended June 30, 2002 and 2001, respectively, amortization of goodwill was \$0 and \$1.9 million. With Sterling's adoption of SFAS No. 142, goodwill and intangible assets with indefinite lives are no longer amortized, but will be tested annually for impairment. See Note 7 of "Notes to Consolidated Financial Statements."

Income Tax Provision. Sterling recorded federal and state income tax provisions of \$2.4 million and \$2.0 million for the three months ended June 30, 2002 and 2001, respectively. Tax provisions were \$4.3 million and \$4.0 million for the six months ended June 30, 2002 and 2001, respectively. The income tax provision for the three months ended June 30, 2002, is reflective of earnings and an effective tax rate of 29%, compared to an effective tax rate of 35% for the three months ended June 30, 2001. The decrease in the effective tax rate for the three months

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

ended June 30, 2002 is due to the tax effect of (1) the change in the cash surrender value of BOLI which is excluded from taxable

17

earnings, (2) the tax treatment relating to certain discounts of the Source Capital acquisition and (3) tax-exempt municipal bond interest.

Financial Position

Assets. At June 30, 2002, Sterling's assets were \$3.09 billion, up \$50.0 million from \$3.04 billion at December 31, 2001.

Investments and ABS. Sterling's investment and ABS portfolio at June 30, 2002 was \$658.1 million, a decrease of \$35.9 million from the December 31, 2001 balance of \$694.0 million. The decrease was primarily due to principal payments on ABS and sales of investments and ABS.

Loans and Leases Receivable. At June 30, 2002, gross loans and leases receivable were \$2.20 billion, up \$63.9 million from \$2.13 billion at December 31, 2001. The increase was primarily due to increases in loan originations, primarily in business banking, commercial real estate and consumer lending. During the three months ended June 30, 2002, total loan originations were \$450.9 million compared with \$384.5 million for the prior year's comparable quarter. Approximately 84% of these were construction, business banking and consumer loans. During the six months ended June 30, 2002 and 2001, total loan originations were \$806.6 million and \$620.3 million, respectively, approximately 80% of which were construction, business banking and consumer loans.

The following table sets forth the composition of Sterling's loan and lease portfolio at the dates indicated. Loan and lease balances exclude deferred loan and lease origination costs and fees and allowances for loan and lease losses.

	June 30, 2002		December 31, 2001	
	Amount	%	Amount	%
(Dollars in thousands)

BOLI and All Other Assets. BOLI and other assets increased to \$87.0 million at June 30, 2002 from \$60.5 million at December 31, 2001. The increase was primarily due to the purchase of \$25.0 million in BOLI at the beginning of the year.

Deposits. Total deposits increased \$125.7 million to \$1.98 billion at June 30, 2002 from \$1.85 billion at December 31, 2001, primarily due to increases in noninterest and NOW checking accounts.

The following table sets forth the composition of Sterling's deposits at the dates indicated.

	June 30, 2002		December 31, 2001	
	Amount	%	Amount	%
(Dollars in thousands)				
Certificates of deposit	\$ 1,077,247	54.4	\$ 1,062,241	57.3

2.75%

Borrowings. Deposit accounts are Sterling's primary source of funds. Sterling does, however, rely upon advances from the Federal Home Loan Bank of Seattle ("FHLB Seattle"), reverse repurchase agreements and other borrowings to supplement its funding and to meet deposit withdrawal requirements. At June 30, 2002, the total of such borrowings was \$890.5 million, compared with \$979.1 million at December 31, 2001, a decrease of \$88.6 million. See "Liquidity and Sources of Funds."

Asset and Liability Management

The results of operations for financial institutions may be materially and adversely affected by changes in prevailing economic conditions, including rapid changes in interest rates, declines in real estate market values and the monetary and fiscal policies of the federal government. Like all financial institutions, Sterling's NII and the net present value of assets, liabilities and off-balance sheet contracts ("NPV"), or estimated fair value, are subject to fluctuations in interest rates. For example, some of Sterling's adjustable rate mortgages are indexed to the one-year or five-year U.S. Treasury index or fixed-rate LIBOR swaps curve. When interest-earning assets such as loans are funded by interest-bearing liabilities such as deposits, FHLB Seattle advances and other borrowings, a changing interest

rate environment may have a dramatic effect on Sterling's earnings. Currently, Sterling's interest-bearing liabilities, consisting primarily of savings and time deposits, FHLB Seattle advances and other borrowings, mature or reprice more rapidly, or on different terms, than do its interest-earning assets. The fact that liabilities mature or reprice more frequently on average than assets may be beneficial in times of declining interest rates; however, such an asset/liability structure may result in declining NII during periods of rising interest rates.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Additionally, the extent to which borrowers prepay loans is affected by prevailing interest rates. When interest rates increase, borrowers are less likely to prepay loans; whereas when interest rates decrease, borrowers are more likely to prepay loans. Prepayments may affect the levels of loans retained in an institution's portfolio as well as its NII.

Sterling maintains an asset and liability management program intended to manage NII through interest rate cycles and to protect its NPV by controlling its exposure to changing interest rates. Sterling uses a simulation model designed to measure the sensitivity of NII and NPV to changes in interest rates. This simulation model is designed to enable Sterling to generate a forecast of NII and NPV given various interest rate forecasts and alternative strategies. The model is also designed to measure the anticipated impact that prepayment risk, basis risk, customer maturity preferences, volumes of new business and changes in the relationship between long-term and short-term interest rates have on the performance of Sterling. The model calculates the present value of assets, liabilities, off-balance sheet financial instruments, and equity at current interest rates and at hypothetical higher and lower interest rates at various intervals. The present value of each major category of financial instruments is calculated using estimated cash flows based on weighted-average contractual rates and terms, then discounted at the estimated current market interest rate for similar financial instruments. The present value of longer term fixed-rate financial instruments is more difficult to estimate because such instruments are susceptible to changes in market interest rates. Present value estimates of adjustable-rate financial instruments are more reliable since they represent the difference between the contractual and discounted rates until the next interest rate repricing date.

The calculations of present value have certain shortcomings. The discount rates utilized for loans, investments and ABS are based on estimated nationwide market interest rate levels for similar loans and securities, with prepayment assumptions based on historical experience and market forecasts. The unique characteristics of Sterling's loans and ABS may not necessarily parallel those in the model. The discount rates utilized for deposits and borrowings are based upon available alternative types and sources of funds which are not necessarily indicative of the market value of deposits and FHLB Seattle advances since such deposits and advances are unique to and have certain price and customer relationship advantages for depository institutions. The present values are determined based on the discounted cash flows over the remaining estimated lives of the financial instruments on the assumption that the resulting cash flows are reinvested in financial instruments with virtually identical terms.

The total measurement of Sterling's exposure to interest rate risk ("IRR") as presented in the following table may not be representative of the actual values which might result from a higher or lower interest rate environment. A higher or lower interest rate environment most likely will result in different investment and borrowing strategies by Sterling designed to further mitigate the effect on the value of and the net earnings generated from Sterling's net assets from any change in interest rates.

The following table presents Sterling's estimates of changes in NPV for the periods indicated. The results indicate the potential effects of instantaneous, parallel shifts in the market yield curve. These

20

calculations are highly subjective and technical and are relative measurements of IRR which do not necessarily reflect any expected rate movement.

Change in Interest Rate in Basis Points (Rate Shock)	June 30, 2002			December 31, 2001		
	NPV	Ratio of NPV to the Present Value of Total Assets	% Change in NPV	NPV	Ratio of NPV to the Present Value of Total Assets	% Change in NPV
(Dollars in thousands)						
+300	\$ 67,610	2.30	(46.7)	\$ 28,769	1.00	(72.7)
+200	87,840	2.95	(30.7)	55,326	1.89	(47.5)
+100	110,976	3.66	(12.4)	75,598	2.55	(28.3)
Static	126,739	4.12	N/A	105,406	3.48	N/A
-100	130,718	4.20	3.1	125,865	4.10	19.4
-200	121,999	3.89	(3.7)	117,709	3.80	11.7
-300	120,158	3.81	(5.2)	120,002	3.85	13.8

At June 30, 2002, Sterling calculated that its NPV was \$126.7 million and that its NPV would decrease by 30.7% and 46.7% if interest rate levels generally were to increase by 2% and 3%, respectively. This compares with an NPV of \$105.4 million at December 31, 2001, which would decline by 47.5% and 72.7% if interest rates generally were to increase by 2% and 3%, respectively.

Sterling also uses gap analysis, a traditional analytical tool designed to measure the difference between the amount of interest-earning assets and the amount of interest-bearing liabilities expected to mature or reprice in a given period. Sterling calculated its one-year cumulative gap positions to be positive 2.7% and negative 4.3% at June 30, 2002 and 2001, respectively. Sterling calculated its three-year gap positions to be positive 3.8% and negative 1.1% at June 30, 2002 and 2001, respectively. The changes in the gap positions were primarily due to the shortening of asset maturities and extending liability maturities. Management attempts to maintain Sterling's gap position between positive 10% and negative 25%. At June 30, 2002, Sterling's gap positions were within limits established by its Board of Directors.

Sterling is continuing to pursue strategies to manage the level of its IRR while increasing its NII and NPV through the origination and retention of variable-rate consumer, business banking, construction and commercial real estate loans, which generally have higher yields than residential permanent loans, by the sale of certain long-term fixed-rate loans and investments and by increasing the level of its core deposits, which are generally a lower-cost funding source than borrowings. There can be no assurance that Sterling will be successful in implementing any of these strategies or that, if implemented, they will have the intended effect of reducing IRR or increasing NII.

Liquidity and Sources of Funds

As a financial institution, Sterling's primary sources of funds are investing and financing activities, including the collection of loan principal and interest payments. Financing activities consist primarily of customer deposits, advances from FHLB Seattle and other borrowings. Deposits increased to \$1.98 billion at June 30, 2002 from \$1.85 billion at December 31, 2001, primarily due to an increase in checking deposits. The net increase in deposits was primarily used to fund loans, purchase ABS and pay down other borrowings. At June 30, 2002 and December 31, 2001, securities sold subject to repurchase agreements were \$148.5 million and \$218.5 million, respectively. These borrowings are required to be collateralized by investments and ABS with a market value exceeding the face value of the borrowings. Under certain circumstances, Sterling could be required to pledge additional securities or reduce the borrowings.

21

During the six months ended June 30, 2002, cash used in investing activities consisted primarily of the funding of loans and the purchase of ABS. The levels of these payments increase or decrease depending on the size of the loan and ABS portfolios and the general trend and level of interest rates, which influences the level of refinancing and mortgage prepayments. During the same period, cash provided by investing activities consisted primarily of principal payments on loans and proceeds from sales of ABS. During the six months ended June 30, 2002, cash provided by operating activities consisted primarily of proceeds from sales of loans.

Sterling Savings Bank's credit line with FHLB Seattle provides for borrowings up to a percentage of its total assets subject to collateralization requirements. At June 30, 2002, this credit line represented a total borrowing capacity of \$939.0 million, of which \$318.8 million was available. Sterling Savings Bank also borrows on a secured basis from major broker/dealers and financial entities by selling securities subject to repurchase agreements. At June 30, 2002, Sterling Savings Bank had \$148.5 million in outstanding borrowings under reverse repurchase agreements and had securities available for additional secured borrowings of approximately \$207.2 million.

Sterling, on a parent company-only basis, had cash and other resources of approximately \$8.8 million and a revolving line of credit from U.S. Bank of \$5.0 million at June 30, 2002 with no funds drawn on this line of credit. This line of credit as well as a \$25.0 million term note are secured by a majority of the Common and Preferred Stock of Sterling Savings Bank. See Note 3 of "Notes to Consolidated Financial Statements."

At June 30, 2002 and December 31, 2001, Sterling had an investment of \$110.1 million in the Preferred Stock of Sterling Savings Bank. At June 30, 2002 and December 31, 2001, Sterling had an investment in the Common Stock of Sterling Savings Bank of \$106.2 million. Sterling received cash dividends on Sterling Savings Bank Preferred Stock of \$5.8 million during the six months ended June 30, 2002. These resources were sufficient to meet the operating needs of Sterling, including interest expense on its long-term debt. Sterling Savings Bank's ability to pay dividends is limited by its earnings, financial condition and capital requirements, as well as rules and regulations imposed by the OTS. See Note 3 of "Notes to Consolidated Financial Statements."

OTS regulations require savings institutions such as Sterling Savings Bank to maintain sufficient liquidity to ensure safe and sound operations. At June 30, 2002 and December 31, 2001, Sterling Savings Bank's liquidity ratio was 3.7% and 3.6%, respectively. Sterling Savings Bank's strategy generally is to maintain its liquidity ratio at or near the level necessary to support expected and potential loan fundings and deposit withdrawals. Sterling Savings Bank tries to minimize liquidity levels in order to maximize its yield on alternative investments. The regulatory liquidity ratio does not take into account certain other sources of liquidity, such as funds invested through Sterling Savings Bank subsidiaries, potential borrowings against investments and ABS and other potential financing alternatives. The required minimum liquidity ratio may vary from time to time, depending on economic conditions, savings flows and loan funding needs.

Capital Resources

Sterling's total shareholders' equity was \$186.8 million at June 30, 2002 compared with \$165.7 million at December 31, 2001. The increase in total shareholders' equity was primarily due to the increase in net income and the conversion of the 7.50% Convertible Subordinated Debentures to common equity. Shareholders' equity was 6.0% of total assets at June 30, 2002 compared with 5.5% at December 31, 2001.

At June 30, 2002, Sterling had an unrealized gain of \$1.0 million, net of related income taxes, on investments and ABS classified as available for sale. At December 31, 2001, Sterling had an unrealized loss of \$4.6 million, net of related income taxes, on investments and ABS classified as available for sale.

22

Fluctuations in prevailing interest rates continue to cause volatility in this component of accumulated comprehensive income or loss in shareholders' equity and may continue to do so in future periods.

Sterling has outstanding \$30.0 million of Floating Rate Notes Due 2006. The notes mature in 2006 and may be redeemed subject to certain conditions after June 15, 2002. These notes are general unsecured obligations of Sterling and are subordinate to certain other existing and future indebtedness. The indenture governing the notes limits the ability of Sterling under certain circumstances to incur additional indebtedness, to pay cash dividends or to make other capital distributions. See Note 3 of "Notes to Consolidated Financial Statements."

Sterling has issued and outstanding \$40.0 million of Trust-I Preferred Securities. The indenture governing the Trust-I Preferred Securities limits the ability of Sterling under certain circumstances to pay dividends or to make other capital distributions. The Trust-I Preferred Securities are treated as debt of Sterling. The Trust-I Preferred Securities mature in 2027 and are redeemable at the option of Sterling in 2002 or earlier in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier 1 capital is no longer permitted or certain other contingencies arise. See Note 3 of "Notes to Consolidated Financial Statements."

Sterling has issued and outstanding \$24.0 million of Trust-II Preferred Securities. The indenture is the same as the Trust-I Securities. The Trust-II Securities are treated as debt of Sterling. The Trust-II Securities mature in 2031 and are redeemable at the option of Sterling in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier 1 capital is no longer permitted or certain other contingencies arise.

In September 2001, Sterling assumed \$3.5 million of 7.50% Convertible Subordinated Debentures due 2008 (the "Debentures") as a result of a business combination. The holders of all of the Debentures exercised their right to convert the Debentures into shares of Sterling's Common Stock. As of May 1, 2002, the Debentures had been converted into 228,305 shares of Sterling Common Stock.

Sterling anticipates total capital expenditures of approximately \$6.3 million for the remainder of the year ending December 31, 2002. Sterling anticipates continuing to fund these expenditures from various sources, including retained earnings and borrowings with various maturities. Sterling continually explores opportunities to sell certain developed properties and enter into lease arrangements. There can be no assurance that Sterling's estimates of capital expenditures or the funding thereof are accurate.

Sterling Savings Bank is required by applicable regulations to maintain certain minimum capital levels with respect to core (Tier 1) capital, core (Tier 1) risk-based capital and total risk-based capital. Sterling Savings Bank anticipates that it will continue to enhance its capital resources and regulatory capital ratios through the retention of earnings and the management of the level and mix of assets, although there can be no assurance in this regard. At June 30, 2002, Sterling Savings Bank exceeded all such regulatory capital requirements for well-capitalized institutions.

Goodwill Litigation

In connection with Sterling Savings Bank's acquisition of three insolvent savings institutions between 1985 and 1988, the U.S. government agreed that Sterling could use \$13.5 million of cash assistance and \$38.0 million of "supervisory goodwill" associated with the acquisitions to help meet its regulatory capital and liquidity requirements. In 1989, Congress enacted FIRREA which provided, among other things, that savings institutions such as Sterling Savings Bank were no longer permitted to include supervisory goodwill in their regulatory capital. Consequently, Sterling Savings Bank was required to discontinue use of its supervisory goodwill in calculating its capital ratios, which resulted in Sterling Savings Bank's failing to comply with its minimum regulatory capital requirements from 1989 through 1991.

23

In May 1990, Sterling sued the U.S. Government with respect to the loss of the goodwill treatment and other matters in a lawsuit entitled *Sterling Savings Association and Sterling Financial Corporation v. The United States*, No. 95 829 C (the "Goodwill Litigation"). In the Goodwill Litigation, Sterling seeks damages for, among other things, breach of contract and for deprivation of property without just compensation.

In 1996, the United States Supreme Court ruled in three cases similar to the Goodwill Litigation that the U.S. Government was liable for having breached its acquisition contracts with certain savings associations. Sterling is encouraged by the Supreme Court's decision, however, the outcome of the Goodwill Litigation cannot be predicted with certainty.

Sterling's Goodwill Litigation, which had been stayed for almost ten years, has completed the fact discovery phase. Recently, the expert witness discovery phase of the case commenced. During this phase, Sterling will present to the Court of Federal Claims Sterling's experts' damages calculations. Although it is impossible to accurately predict when this effort will be concluded, management anticipates that the expert witness discovery stage will be completed by the end of 2002 and that, thereafter, Sterling's case will be scheduled for trial in the ensuing one or two years. Because of the increased level of effort required to bring the case to conclusion, Sterling likely will continue to incur legal expenses at recent levels over the next one to two years.

New Accounting Policies

In June 2001, the Financial Accounting Standards Board ("FASB") approved for issuance Statement of Financial Accounting Standards No. 142 ("SFAS No. 142"), "Goodwill and Intangible Assets," which revises the accounting for purchased goodwill and intangible assets. Under SFAS No. 142, goodwill and intangible assets with indefinite lives will no longer be amortized, but will be tested for impairment at least annually. If goodwill is found to be impaired, it will be written down to its fair market value. Sterling adopted SFAS No. 142 on January 1, 2002. Sterling tested the amortized balance of goodwill and determined that no impairment existed as of June 30, 2002. The net effect of adopting this accounting standard was to increase net income by \$717,000 or \$0.06 per diluted share for the quarter ended June 30, 2002. For the six months ended June 30, 2002, the increase to net income was \$1.4 million or \$0.11 per diluted share.

In May 2002, the FASB issued a Proposed Statement of Financial Accounting Standards, "Acquisition of Certain Financial Institutions, an amendment of FASB Statements No. 72 and No. 144 and FASB Interpretation No. 9" (the ED). While the ED provides guidance that management believes is consistent with Sterling's adoption of SFAS No. 142 and subsequent discontinuation of the amortization of goodwill, the final statement, if changed from the ED, could alter the treatment adopted by Sterling and require a continuation of amortization, which would have the effect of increasing annual expenses by approximately \$3.8 million, resulting in a decrease in net income.

In August 2001, the FASB approved for issuance Statement of Financial Accounting Standards No. 144 ("SFAS No. 144"), "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 was issued to resolve implementation issues that had been created under Statement of Financial Accounting Standards No. 121. Under SFAS No. 144, one accounting model is required to be used for long-lived assets to be disposed of by sale, whether previously held and used or newly acquired, and certain additional disclosures are required. The adoption of SFAS No. 144 did not have a material effect on Sterling's consolidated financial statements.

In April 2002, the FASB issued Statement of Financial Accounting Standards No. 145 ("SFAS No. 145"), "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 updates, clarifies and simplifies existing accounting pronouncements, by rescinding SFAS No. 4, which required all gains and losses from extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of related income tax

effect. As a result, the criteria in Accounting Principles Board Opinion No. 30 will now be used to classify those gains and losses. Additionally, SFAS No. 145 amends SFAS No. 13 to require that certain lease modifications that have economic effects similar to sale-leaseback transactions be accounted for in the same manner as sale-leaseback transactions. Finally, SFAS No. 145 also makes technical corrections to existing pronouncements. Management currently believes that the adoption of SFAS No. 145 will not have a material impact on Sterling's consolidated financial statements.

In July 2002, the FASB issued Statement of Financial Accounting Standards No. 146 ("SFAS No. 146"), "Accounting for Costs Associated with Exit or Disposal Activities." SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are

incurred rather than at the date of a commitment to an exit or disposal plan. Examples of costs covered by the standard include lease termination costs and certain employee severance costs that are associated with a restructuring, discontinued operation, plant closing, or other exit or disposal activity. SFAS No. 146 replaces the prior guidance that was provided by EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002.

Regulation and Compliance

Sterling is subject to many laws and regulations applicable to banking activities. As a thrift holding company, Sterling is subject to comprehensive examination and regulation by the OTS. Sterling Savings Bank, as a Washington State-chartered savings association, is subject to comprehensive regulation and examination by the Washington Supervisor as its chartering authority, the OTS as its primary federal regulator, and by the FDIC, which administers the Savings Association Insurance Fund, which insures Sterling Savings Bank's deposits to the maximum extent permitted by law. Sterling Savings Bank is a member of FHLB Seattle, which is one of the twelve regional banks which comprise the FHLB System. Sterling Savings Bank is further subject to regulations of the Board of Governors of the Federal Reserve System governing reserves required to be maintained against deposits and certain other matters.

In July 2002, the Sarbanes-Oxley Act of 2002 (the "SOA") was enacted. The SOA overhauls corporate governance and auditing rules with the intent of protecting investors by improving the accuracy and reliability of corporate disclosures. The SOA, among other things, demands greater independence of audit functions and requires the chief executive officer and chief financial officer of public companies to certify their company's financial statements filed with the SEC. The SOA also requires enhanced financial disclosures regarding off-balance sheet transactions and relationships, generally prohibits a corporation from making loans to corporate executives and reduces the mandatory period for principal stockholders or senior executives to disclose changes in ownership of securities.

Item 3 Quantitative and Qualitative Disclosures About Market Risk

For a discussion of Sterling's market risks, see "Management's Discussion and Analysis Asset and Liability Management."

25

PART II Other Information

Item 1 Legal Proceedings

Periodically various claims and lawsuits are brought against Sterling and its subsidiaries, such as claims to enforce liens, condemnation proceedings involving properties on which Sterling holds security interests, claims involving the making and servicing of real property loans and other issues incidental to Sterling's business. No material loss is expected from any of such pending claims or lawsuits.

Item 2 Changes in Securities and Use of Proceeds

On May 31, 2002, Sterling issued 228,305 shares of its Common Stock to the holders of its 7.5% Convertible Subordinated Debentures due 2008 (the "Debentures"). The shares of Common Stock were issued on the conversion of all of the outstanding Debentures in the aggregate principal amount of \$3.5 million. Sterling assumed the Debentures as a result of the merger of Source Capital Corporation into Sterling on September 30, 2001. No commission or other remuneration was paid or given directly or indirectly for soliciting the exchange and no underwriters were involved in the transaction. Sterling claims the exemption from registration available under Section 3(a)(9) of the Securities Act of 1933 for the shares of its Common Stock issued upon the conversion of the Debentures described under this Item 2.

Item 3 Defaults Upon Senior Securities

Not applicable.

Item 4 Submission of Matters to a Vote of Security Holders

Sterling's Annual Meeting of Shareholders ("the Meeting") was held on April 23, 2002. The following matters were submitted to a vote of the security holders of Sterling at the Meeting:

- (1) Elect three Directors to serve for the following terms:

Terms expiring in the year 2005:

Harold B. Gilkey	Votes for: 8,857,914	Withheld: 111,354
Thomas H. Boone	Votes for: 8,848,066	Withheld: 121,202
Robert E. Meyers	Votes for: 8,842,915	Withheld: 126,353

Approximate Broker Non-votes: 0

- (2) Ratify the appointment of BDO Seidman L.L.P. as independent public accountants for the year ending December 31, 2002 and any interim periods. The proposal received the following votes:

For:	8,923,112	Against: 23,764
Abstain:	22,392	Approximate Broker Non-votes: 0

Item 5 Other Information

Not applicable.

Item 6 Exhibits and Reports on Form 8-K

(a)	Exhibit No.	Exhibit
	3.1	Restated Articles of Incorporation of Registrant and Articles of Amendment of Restated Articles of Incorporation. Filed as Exhibits 3.1 and 3.2, respectively, to Registrant's Form S-4 dated November 7, 1994 and incorporated by reference herein.
	3.2	Copy of Bylaws of Registrant (amended and restated as of May 24, 1999). Filed as Exhibit 3.3 to Registrant's Annual Report on Form 10-K for the year ended December 31, 1999 and incorporated by reference herein.
	4.1	Reference is made to Exhibits 3.1 through 3.3.
	4.2	The Registrant has outstanding certain long-term debt. None of such debt exceeds ten percent of Registrant's total assets; therefore, copies of the constituent instruments defining the rights of the holders of such debt are not included as exhibits. Copies of instruments with respect to such long-term debt will be furnished to the Securities and Exchange Commission upon request.
	99.1	Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350.
	99.2	Certification of Principal Financial Officer Pursuant to 18 U.S.C. Section 1350.
