Item 8.01 Other Events.

On June 29, 2007, Georgia Power Company ("Georgia Power") filed a request to increase retail base rates with the Georgia Public Service Commission ("GPSC"). The request includes an increase effective January 1, 2008 of approximately \$406.7 million or 5.98 percent in retail revenues, based on a future test year ending July 31, 2008 and a proposed retail return on common equity of 12.5 percent. The majority of the increase in retail revenues is being requested to cover the costs of environmental compliance and continued investment in new generation, transmission and distribution facilities to support growth and ensure reliability. The remainder of the increase would include recovery of higher operation, maintenance and other investment costs to meet the rising demand for electricity.

In January 2005, Georgia Power began operating under a three-year

retail rate order that expires December 31, 2007. Under the terms of the existing order, earnings are evaluated annually against a retail return on common equity range of 10.25 percent to 12.25 percent. Two-thirds of any earnings above the 12.25 percent return are applied to rate refunds, with the remaining one-third retained by Georgia Power. The order required Georgia Power to file a general rate case by July 1, 2007, in response to which the GPSC would be expected to determine whether the rate order should be continued, modified or discontinued. See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - "PSC Matters - Georgia Power" of The Southern Company ("Southern") and MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - "PSC Matters - Rate Plans" of Georgia Power in Item 7 of the Annual Report on Form 10-K for the year ended December 31, 2006 (the "Annual Report") and Note 3 to the financial statements of Southern and Georgia Power under "Georgia Power Retail Regulatory Matters" and "Retail Regulatory Matters - Rate Plans" in Item

8 of the Annual Report for additional information. If the GPSC is interested in a continuation of the current three-year rate plan, Georgia Power has also filed an option that includes additional increases of approximately \$191 million or 2.65 percent and \$45 million or 0.61 percent in retail revenues effective January 1, 2009 and 2010, respectively, to cover the costs of additional environmental controls and certified purchased power agreements.

Georgia Power expects to invest approximately \$9.1 billion over the next five years in capital expenditures (including \$1.9 billion in 2007 and \$1.8 billion in each of 2008 - 2011). Of the total capital expenditures, approximately \$2.7 billion is related to environmental controls (including \$1.0 billion in 2007, \$0.6 billion in 2008, \$0.3 billion in 2009, \$0.3 billion in 2010 and \$0.5 billion in 2011).

Georgia Power expects the GPSC to issue a final order in this matter during December 2007. The final outcome of this matter cannot now be determined.

Cautionary Notice Regarding Forward-Looking Statements

This Current Report on Form 8-K includes forward-looking statements regarding Georgia Power's projected capital expenditures for a five year period ending in 2011 and Georgia Power's filing with the GPSC to increase retail base rates. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include: the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry, implementation of the Energy Policy Act of 2005, and also changes in environmental, tax, and other laws to which Southern and its subsidiaries, including Georgia Power, are subject, as well as changes in application of existing laws and regulations; current and future litigation, regulatory investigations, proceedings or inquiries, including the pending Environmental Protection Agency civil actions against certain Southern subsidiaries, FERC matters, IRS audits and Mirant matters; the effects, extent and timing of the entry of additional competition in the markets in which Southern's subsidiaries, including Georgia Power, operate; variations in the demand for electricity, including those related to weather, the general economy and population, and business growth (and declines); available sources and costs of fuel; ability to control costs; investment performance of Southern's employee benefit plans; advances in technology; state and federal rate regulations and the impact of pending and future rate cases and negotiations, including rate actions relating to fuel cost recovery; internal
