FOR IMMEDIATE RELEASE

BRAZIL'S LEADING WIRELESS ISP LEVERAGES NEW LICENSE WITH  
\$1.0M OF ORDERS OF ALVARION'S BROADBAND EQUIPMENT  
DirectNet to Use BreezeACCESS(TM) XL to Provide High Speed Internet Services to  
Residential and Business Users in Greater Sao Paulo

-----

Tel Aviv, Israel, February 1, 2005 - Alvarion Ltd., (NASDAQ: ALVR), the world's leading provider of wireless broadband solutions and specialized mobile networks, today announced that DirectNet, Brazil's leading wireless internet service provider, has placed equipment orders of approximately \$1.0 million over the last few months. A first step in the company's plans to leverage its recent 3.5 GHz frequency license, DirectNet is expanding the existing network by using Alvarion's BreezeACCESS(TM) XL system in areas where the unlicensed band would allow for interference.

Over the last few years, DirectNet has deployed the company's BreezeACCESS(TM) II system in metropolitan Sao Paulo and surrounding areas. However, given the vast size of Sao Paulo (17 million inhabitants) and the density of the hundreds of thousands buildings, the WISP required a robust, high capacity solution to

## Edgar Filing: ALVARION LTD - Form 6-K

operate in the licensed 3.5 GHz frequency.

"Alvarion's BreezeACCESS product line has contributed to our gaining leadership in the ISP Brazilian market," said Helder de Azevedo, Director of DirectNet. "We have chosen to deploy the XL network, due to its capacity to upgrade into a IEEE 802.16 (WiMAX) standard, in which our network roll-out and business plan is based upon."

Alvarion's BreezeACCESS XL is an advanced broadband wireless access solution optimized for data and voice applications and is an excellent alternative to wired connectivity. Operating in the 3.5 GHz frequency bands licensed around the world, BreezeACCESS XL offers service providers a high-speed wireless Internet platform with a full complement of options to efficiently maintain and grow their subscriber base. A frequency division duplex (FDD) system, BreezeACCESS XL uses wireless packet data switching technology with frequency hopping - code division multiple access (FH-CDMA) radios.

4

"DirectNet is a valued customer and I am pleased that they renewed their commitment to Alvarion, now building their 3.5GHz network with BreezeACCESS XL. In receiving a 3.5 GHz license for the entire greater metropolitan area of Sao Paulo, DirectNet has really come of age quickly," added Zvi Slonimsky, CEO of Alvarion.

###

### About DirectNet

DirectNet is the largest independent high-speed Internet access and connection provider in Brazil, using optical fiber and radio (fixed wireless) technologies. A member of the Iqara Brasil group, DirectNet operates in the State of Sao Paulo and has been in the ranking of the 200 Best in Info, published by the publishing house Abril, for three years, with the largest companies in the IT and Telecom segment. It is also one of the Top Five in the Top Condominios Awards from Secovi Magazine. For further information, please visit the website [www.directnet.com.br](http://www.directnet.com.br).

### About Alvarion

With more than 2 million units deployed in 130 countries, Alvarion is the worldwide leader in wireless broadband providing systems to carriers, ISPs and private network operators. Leading the WiMAX revolution, Alvarion has the most extensive deployments and proven product portfolio in the industry covering the full range of frequency bands. Alvarion's products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, Hotspot coverage extension, community interconnection, and public safety communications. Alvarion works with several top OEM providers and over 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for over 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience deploying OFDM-based systems, the company's prominent work in the WiMAX Forum™ is focused on increasing widespread adoption of standards-based products in the wireless broadband market.
