Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

1. Summary of Significant Accounting Policies

Basis of Presentation

Our fiscal years are based on a 52- or 53-week period ending on the last Saturday in December. The condensed consolidated balance sheet at December 29, 2007 has been derived from our audited financial statements at that date. The interim condensed consolidated financial statements as of March 29, 2008 (also referred to as the first quarter of fiscal 2008) and March 31, 2007 (also referred to as the first quarter of fiscal 2007) are unaudited. However, in management's opinion, these financial statements reflect all adjustments (consisting only of normal, recurring items) necessary to provide a fair presentation of our financial position, results of operations and cash flows for the periods presented. The first quarter of fiscal 2008 and 2007 were each comprised of 13 weeks.

Our interim results are not necessarily indicative of the results that should be expected for the full year. For a better understanding of Cohu, Inc. and our financial statements, we recommend reading these interim condensed consolidated financial statements in conjunction with our audited financial statements for the year ended December 29, 2007, which are included in our 2007 Annual Report on Form 10-K, filed with the U. S. Securities and Exchange Commission (SEC). In the following notes to our interim condensed consolidated financial statements, Cohu, Inc. is referred to as Cohu , we , our and us .

Risks and Uncertainties

We are subject to a number of risks and uncertainties that may significantly impact our future operating results. These risks and uncertainties are discussed under Item 1A. Risk Factors included in this Form 10-Q. As our interim description of risks and uncertainties only includes any material changes to our annual description, we also recommend reading the description of the risk factors associated with our business previously disclosed in Item 1A. of our 2007 Annual Report on Form 10-K. Understanding these risks and uncertainties is integral to the review of our interim condensed consolidated financial statements.

Discontinued Operations

On May 12, 2006, we sold our metal detection equipment business, FRL, Incorporated (FRL). Subsequent to the sale, the operating results of FRL are being presented as discontinued operations (Note 2) and all prior period financial statements have been reclassified accordingly.

Share-Based Compensation

Share-based compensation expense related to stock options is recorded based on the fair value of the award on its grant date which we estimate using the Black-Scholes valuation model.

Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the grant date, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit.

Reported share-based compensation is classified, in the condensed consolidated interim financial statements, as follows (*in thousands*):

	Three months ended	
	March	
	29,	March 31,
	2008	2007
Cost of sales	\$ 85	\$ 117
Research and development	300	306
Selling, general and administrative	640	670
Total share-based compensation	1,025	1,093
Income tax benefit	(266)	(231)
Total share-based compensation, net of tax	\$ 759	\$ 862

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

Income Per Share

Income per share is computed in accordance with FASB Statement No. 128, *Earnings per Share*. Basic income per share is computed using the weighted average number of common shares outstanding during each period. Diluted income per share includes the dilutive effect of common shares potentially issuable upon the exercise of stock options utilizing the treasury stock method. For purposes of computing diluted income per share, stock options with exercise prices that exceed the average fair market value of our common stock for the period are excluded. For the three months ended March 29, 2008, options to purchase approximately 1,610,000 shares of common stock, were excluded from the computation. For the three months ended March 31, 2007, options to purchase approximately 729,000 shares of common stock, respectively, were excluded from the computation. The following table reconciles the denominators used in computing basic and diluted income per share (*in thousands*):

	Three months ended March 29, 2008	March 31, 2007
Weighted average common shares	23,053	22,717
Effect of dilutive stock options	182	394
	23,235	23,111

Revenue Recognition

Our revenue recognition policy is disclosed in Note 1 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 29, 2007. As more fully described in that policy, revenue from products that have not previously satisfied customer acceptance requirements is recognized upon customer acceptance. The gross profit on sales that are not recognized is generally recorded as deferred profit and reflected as a current liability in our consolidated balance sheet.

At March 29, 2008, we had deferred revenue totaling approximately \$8.1 million and deferred profit of \$5.0 million. At December 29, 2007, we had deferred revenue totaling approximately \$9.2 million and deferred profit of \$4.9 million.

Retiree Medical Benefits

We provide post-retirement health benefits to certain executives and directors under a noncontributory plan. The net periodic benefit cost incurred during the first three months of fiscal 2008 and 2007 was not significant.

Recent Accounting Pronouncements

In December 2007, the FASB issued Statement No. 141(Revised 2007), *Business Combinations* (Statement No. 141R), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. Statement No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning

of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. Statement No. 141R will become effective for our fiscal year beginning in 2009. We are currently evaluating the effect the adoption of Statement No. 141R could have on our consolidated financial statements, if any.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (Statement No. 159). Statement No. 159 expands the use of fair value measurement by permitting entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. This statement was effective for us on December 30, 2007, the first day of our 2008 fiscal year. We have not elected to measure any items at fair value under Statement No. 159 and, as a result, Statement No. 159 did not have any impact on our consolidated financial statements.

We adopted FASB Statement No. 157, *Fair Value Measurements* (Statement No. 157) on December 30, 2007, the first day of fiscal year 2008. Statement No. 157 defines fair value, establishes a methodology for measuring fair value, and expands the required disclosure for fair value measurements. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which amends Statement No. 157 by delaying its effective date by one year for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. Therefore, beginning on December 30, 2007, this standard applies prospectively to new fair value measurements of financial instruments and recurring fair value measurements of non-financial assets and non-financial liabilities. On December 28, 2008, the beginning of our 2009 fiscal year, the standard will also apply to all other fair value measurements. See Note 10, Fair Value Measurements, for additional information.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

2. Discontinued Operations

On May 12, 2006, we sold substantially all the assets of our metal detection equipment business, FRL. Our decision to sell FRL resulted from management's determination that this industry segment was no longer a strategic fit within our organization. We are currently attempting to sell our FRL facility in Los Banos, California and believe the current fair value of the property is in excess of its \$0.5 million carrying value at March 29, 2008.

A summary of key financial information of our discontinued operations is as follows (*in thousands*):

	Three months ended	
	March 29, 2008	March 31, 2007
Net sales	\$	\$
Income (loss) from operations	\$	\$
Loss on sale of metal detection equipment business		(39)
Loss from discontinued operations		(39)
Income tax benefit		(14)
Discontinued operations, net	\$	\$ (25)

3. Strategic Technology Transactions, Goodwill and Other Intangible Assets

On March 30, 2007, we purchased Tandberg Television AVS GmbH (AVS). The results of AVS operations have been included in our consolidated financial statements since that date. Pro forma results of operations have not been presented because the effect of the acquisition was not material. AVS, located near Frankfurt, Germany, designs, develops, manufactures and sells digital microwave transmitters, receivers and communications systems. This acquisition expands our digital microwave communications solutions, especially in high definition broadcast television and public safety and law enforcement applications.

The purchase price of this acquisition was approximately \$8.2 million, and was funded primarily by our cash reserves (\$8.0 million), other acquisition costs (\$0.2 million) and certain AVS liabilities assumed (\$2.3 million). The acquisition was considered a business in accordance with EITF 98-3, *Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business* (EITF 98-3), and the total cost of the acquisition was allocated to the assets acquired and liabilities assumed based on their estimated respective fair values, in accordance with FASB Statement No. 141, *Business Combinations*, (Statement No. 141). The acquisition was nontaxable and certain of the assets acquired, including goodwill and intangibles, will not be deductible for tax purposes. The goodwill was assigned to our microwave communications segment.

The allocation of purchase price to the acquired assets and assumed liabilities was as follows (*in thousands*):

Current assets	\$ 4,344
Fixed assets	831

Intangible assets	2,190
Goodwill	3,140
Total assets acquired	10,505
Current liabilities assumed	(2,336)
Net assets acquired	\$ 8,169

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

Amounts allocated to intangible assets are being amortized on a straight-line basis over their useful lives of four years. Fluctuations in the exchange rate of the Euro, the functional currency of AVS, impact the U.S. dollar value of the goodwill and intangible assets in our consolidated financial statements and, as a result, the future gross carrying value and amortization of the acquired intangible assets may differ from the amounts presented below.

Intangible assets, subject to amortization, were as follows (*in thousands*):

	March 29, 2008		December 29, 2007	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Unigen technology	\$ 7,020	\$ 2,872	\$ 7,020	\$ 2,517
KryoTech technology	1,950	1,892	1,950	1,730
AVS technology	2,594	632	2,409	437
	\$ 11,564	\$ 5,396	\$ 11,379	\$ 4,684

Amortization expense related to intangible assets was approximately \$0.7 million and \$0.5 million in the first quarter of fiscal 2008 and 2007, respectively. As of March 29, 2008, we expect amortization expense in future periods to be as follows: 2008 \$1,598,000; 2009 \$2,052,000; 2010 \$2,052,000 and 2011 \$466,000.

4. Employee Stock Benefit Plans

Employee Stock Purchase Plan The Cohu, Inc. 1997 Employee Stock Purchase Plan (the Plan) provides for the issuance of a maximum of 1,400,000 shares of our Common Stock. Under the Plan, eligible employees may purchase shares of common stock through payroll deductions. The price paid for the common stock is equal to 85% of the fair market value of our Common Stock on specified dates. At March 29, 2008, there were 602,019 shares available for issuance under the Plan.

Stock Options Under our equity incentive plans, stock options may be granted to employees, consultants and directors to purchase a fixed number of shares of our Common Stock at prices not less than 100% of the fair market value at the date of grant. Options generally vest and become exercisable after one year or in four annual increments beginning one year after the grant date and expire five to ten years from the grant date. At March 29, 2008, 1,048,801 shares were available for future equity grants under the Cohu, Inc. 2005 Equity Incentive Plan. We have historically issued new shares of Cohu Common Stock upon share option exercise.

At March 29, 2008 we had 2,311,428 stock options outstanding. These options had a weighted-average exercise price of \$15.96 per share, an aggregate intrinsic value of approximately \$2.3 million and the weighted average remaining contractual term was approximately 5.6 years.

At March 29, 2008 we had 1,700,588 stock options outstanding that were exercisable. These options had a weighted-average exercise price of \$15.84 per share, an aggregate intrinsic value of approximately \$2.1 million and the weighted average remaining contractual term was approximately 4.7 years.

Restricted Stock Units We issue restricted stock units to certain employees and directors. Restricted stock units vest over either a one-year or a four-year period from the date of grant. Prior to vesting, restricted stock units do not have dividend equivalent rights, do not have voting rights and the shares underlying the restricted stock units are not considered issued and outstanding. Shares of our common stock will be issued on the date the restricted stock units vest.

At March 29, 2008 we had 370,373 restricted stock units outstanding with an aggregate intrinsic value of approximately \$5.9 million and the weighted average remaining recognition period was approximately 3.1 years.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

5. Comprehensive Income

Comprehensive income represents all non-owner changes in stockholders' equity and consists of, on an after-tax basis where applicable, the following (*in thousands*):

	Three months ended March 29, 2008	March 31, 2007
Income from continuing operations	\$ 1,952	\$ 1,716
Loss from discontinued operations		(25)
Net income	1,952	1,691
Foreign currency translation adjustment	664	
Change in unrealized gain on investments	202	10
Comprehensive income	\$ 2,818	\$ 1,701

Our accumulated other comprehensive income totaled approximately \$1.3 million and \$0.5 million at March 29, 2008 and December 29, 2007, respectively, and was attributed to, net of income taxes where applicable, unrealized losses and gains on investments, adjustments resulting from the adoption of FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, (an amendment of FASB Statements No. 87, 88, 106, and 132R) and, beginning in the second quarter of fiscal 2007, foreign currency adjustments resulting from the translation of certain accounts into U.S. dollars where the functional currency is the Euro.

6. Income Taxes

The income tax provision included in the statements of income for the three months ended March 29, 2008 and March 31, 2007 is based on the estimated annual effective tax rate for the entire year. These estimated effective tax rates are subject to adjustment in subsequent quarterly periods as our estimates of pretax income for the year are increased or decreased. The effective tax rates of 40.2% and 34.8%, for the three months ended March 29, 2008 and March 31, 2007, respectively, differ from the U.S. federal statutory rate primarily due to state taxes, research and development tax credits, foreign income taxed at lower rates and manufacturing activities tax benefits offset by the effects of Statement No. 123R that does not allow deferred tax benefits to be initially recognized on compensation expense related to incentive stock options and employee stock purchase plans.

Realization of our deferred tax assets is based upon the weight of available evidence, including such factors as our recent earnings history and expected future taxable income. We believe that it is more likely than not that the majority of these assets will be realized; however, ultimate realization could be negatively impacted by market conditions or other factors not currently known or anticipated. In accordance with Statement No. 109, net deferred tax assets are reduced by a valuation allowance if it is more likely than not that some or all of the deferred tax assets will not be realized. A valuation allowance of approximately \$2.4 million was provided on deferred tax assets at March 29, 2008 and December 29, 2007, respectively, for state tax credit and net operating loss carryforwards that, in the opinion of management, are more likely than not to expire before we can use them.

We adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No.109, (FIN 48) on December 31, 2006, the first day of our 2007 fiscal year. As a result of the adoption of FIN 48, we recognized a decrease in the liability for unrecognized tax benefits of approximately \$423,000, a decrease in deferred tax assets of approximately \$381,000 and a corresponding increase in the December 31, 2006 balance of retained earnings of approximately \$42,000.

Our unrecognized tax benefits, excluding accrued interest, totaled approximately \$4.8 million at December 29, 2007. If these unrecognized tax benefits are ultimately recognized, this amount, less the related federal benefit for state items of approximately \$0.9 million and excluding any increase in our valuation allowance for deferred tax assets, would result in a reduction in our income tax expense and effective tax rate. There was no significant change in our unrecognized tax benefits in the first quarter of fiscal 2008.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

We recognize interest accrued related to unrecognized tax benefits, net of federal and state tax benefits, in income tax expense. Cohu had approximately \$377,000 and \$317,000 accrued for the payment of interest at March 29, 2008 and December 29, 2007, respectively. Interest expense recognized in the three months ended March 29, 2008 and March 31, 2007 was approximately \$60,000 and \$40,000, respectively.

The Internal Revenue Service has examined our income tax returns through 2002, and the California Franchise Tax Board through 1999.

In October, 2007 the IRS commenced a routine examination of our U.S. income tax return for 2005. This examination is expected to be completed in 2008. We believe it is reasonably possible that a portion of our total unrecognized tax benefits will decrease in the next 12 months upon the conclusion of the examination or the lapse of the applicable statute of limitations. However, it is premature to assess the range or the nature of the reasonably possible changes to our unrecognized tax benefits.

7. Industry Segments

We have three reportable segments as defined by FASB Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information*. As discussed in Note 2, in May, 2006, we sold substantially all the assets of FRL, which comprised our metal detection equipment segment, and have presented financial information for this segment as discontinued operations. Our reportable segments are business units that offer different products and are managed separately because each business requires different technology and marketing strategies.

We allocate resources and evaluate the performance of segments based on profit or loss from operations, excluding interest, corporate expenses and unusual gains or losses. Intersegment sales were not significant for any period.

Financial information by industry segment is as follows (*in thousands*):

	Three months ended	
	March 29, 2008	March 31, 2007
<i>Net sales by segment:</i>		
Semiconductor equipment	\$ 44,692	\$ 43,339
Television cameras	4,434	4,192
Microwave communications	9,283	5,837
Total consolidated net sales and net sales for reportable segments	\$ 58,409	\$ 53,368
<i>Segment profit (loss):</i>		
Semiconductor equipment	\$ 2,272	\$ 1,591
Television cameras	(465)	(403)
Microwave communications	1,126	311
Profit for reportable segments	2,933	1,499
<i>Other unallocated amounts:</i>		
Corporate expenses	(1,118)	(931)

Edgar Filing: COHU INC - Form 10-Q

Interest and other, net	1,448	2,062
Income from continuing operations before income taxes	\$ 3,263	\$ 2,630

12

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
March 29, 2008

	March 29, 2008	December 29, 2007
<i>Total assets by segment (in thousands):</i>		
Semiconductor equipment	\$ 108,129	\$ 111,787
Television cameras	9,443	9,505
Microwave communications	27,005	27,704
 Total assets for reportable segments	 144,577	 148,996
Corporate, principally cash and investments and deferred taxes	191,580	190,885
Discontinued operations	475	498
 Total consolidated assets	 \$ 336,632	 \$ 340,379

A small number of customers historically have been responsible for a significant portion of our consolidated net sales. Three customers of the semiconductor equipment segment accounted for 57% of our consolidated net sales for the first quarter of fiscal 2008 and 2007, respectively.

8. Contingencies

We previously disclosed in our Form 10-Q for the quarter ended June 30, 2007 that in May, 2007 our Broadcast Microwave Services subsidiary (BMS) received a subpoena from a grand jury seated in the Southern District of California, requesting the production of certain documents related to BMS' export of microwave communications equipment. BMS completed production of documents responsive to the request in September 2007 and has fully cooperated. BMS has not been informed that it is a target of an investigation. As of the date of this report, it is premature to assess whether this matter will have any impact on the BMS business or results of operations.

In addition to the above matter, from time-to-time we are involved in various legal proceedings, examinations by various tax authorities and claims that have arisen in the ordinary course of our businesses. Although the outcome of such legal proceedings, claims and examinations cannot be predicted with certainty, we do not believe any such matters exist at this time that will have a material adverse effect on our financial position or results of operations.

9. Guarantees

Our products are generally sold with a 12-month to 36-month warranty period following sale or installation. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical and projected experience by product and configuration.

Changes in accrued warranty during the first quarter of fiscal 2008 and 2007 were as follows (*in thousands*):

	Three months ended March 29, 2008	March 31, 2007
Balance at beginning of period	\$ 6,760	\$ 8,118
Warranty expense accruals	2,034	1,907

Warranty payments	(2,484)	(2,756)
Warranty liability assumed		154
Balance at end of period	\$ 6,310	\$ 7,423

From time-to-time, during the ordinary course of business, we provide standby letters of credit to certain parties. As of March 29, 2008, the maximum potential amount of future payments that Cohu could be required to make under these standby letters of credit was approximately \$1.3 million. We have not recorded any liability in connection with these guarantee arrangements beyond that required to appropriately account for the underlying transaction being guaranteed. We do not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these arrangements.

Table of Contents**10. Fair Value Measurements**

In September 2006, the FASB issued Statement No. 157, which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement indicates, among other things, that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. Statement No. 157 defines fair value based upon an exit price model.

We adopted Statement No. 157 on December 30, 2007, with the exception of the application of the statement to non-recurring nonfinancial assets and nonfinancial liabilities. Non-recurring nonfinancial assets and nonfinancial liabilities for which we have not applied the provisions of Statement No. 157 include those measured at fair value in goodwill impairment testing and those initially measured at fair value in a business combination.

Statement No. 157 establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following table provides the assets carried at fair value measured on a recurring basis as of March 29, 2008 (*in thousands*):

	Total carrying value at March 29, 2008	Fair value measurements at March 29, 2008		
		Quoted prices in active markets (Level 1)	using Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
U.S. Treasury note	\$ 1,818	\$ 1,818	\$	\$
All other short-term investments	78,174		78,174	
Total	\$ 79,992	\$ 1,818	\$ 78,174	\$

When available, we use quoted market prices to determine the fair value of our investments, and they are included in Level 1. When quoted market prices are unobservable, we use quotes from independent pricing vendors based on recent trading activity and other relevant information. These investments are included in Level 2 and primarily comprise our portfolio of corporate debt securities, bank certificates of deposit, government-sponsored enterprise, and asset-backed securities.

Management's Discussion and Analysis of Financial Condition and Results of Operations

March 29, 2008

This Form 10-Q contains certain forward-looking statements including expectations of market conditions, challenges and plans, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and is subject to the Safe Harbor provisions created by that statute. Such forward-looking statements are based on management's current expectations and beliefs, including estimates and projections about our industries and include, but are not limited to, statements concerning financial position, business strategy, and plans or objectives for future operations. Forward-looking statements are not guarantees of future performance, and are subject to certain risks, uncertainties, and assumptions that are difficult to predict and may cause actual results to differ materially from management's current expectations. Such risks and uncertainties include those set forth in this Quarterly Report on Form 10-Q and our 2007 Annual Report on Form 10-K under the heading Item 1A. Risk Factors. The forward-looking statements in this report speak only as of the time they are made, and do not necessarily reflect management's outlook at any other point in time. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or for any other reason, however, readers should carefully review the risk factors set forth in other reports or documents we file from time to time with the SEC after the date of this Quarterly Report.

OVERVIEW

Our primary business activity involves the development, manufacture, marketing, sale and servicing of test handling and burn-in related equipment and thermal sub-systems for the global semiconductor industry. This business is significantly dependent on capital expenditures by semiconductor manufacturers and test subcontractors, which in turn are dependent on the current and anticipated market demand for semiconductors that are subject to significant cyclical trends in demand. We expect that the semiconductor equipment industry will continue to be cyclical and volatile as consumer electronics, rather than personal computers, are now the principal end market for integrated circuits.

Demand for consumer electronic products is unpredictable and product life cycles are becoming shorter. Integrated circuit manufacturers are unwilling to absorb the carrying costs of excess capacity, and as a result, delay placing large orders with equipment suppliers until business conditions improve. Changes in the semiconductor, electronics, computer and telecommunications industries, as well as rapidly shifting global economic conditions, have had and will continue to have a significant impact on our primary business.

After several years of order growth, orders for our test handling and burn-in related equipment began to decline in the second half of 2006 and this softness carried into 2007. Conditions in the semiconductor equipment industry were generally weak in 2007 and remain challenging and we do not expect this to change in the near term.

As a result of the volatility within the industry the composition of orders and revenues of our primary business changed dramatically during fiscal 2007 as orders for thermal semiconductor test handler and burn-in equipment declined significantly and orders for high speed semiconductor test handler and thermal sub-systems increased. This shift in product mix and other factors described herein led to a decline in our gross margin during fiscal 2007.

Our deferred revenue totaled \$8.1 million and \$9.2 million at March 29, 2008 and December 29, 2007, respectively. Our operating results in the last three years have been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues. These charges totaled approximately \$20.7 million during the three-year period ended December 29, 2007 (approximately \$0.4 million in the first quarter of fiscal 2008) and were primarily the result of decreases in customer forecasts, competitive conditions in the test handler industry and, to a lesser extent, changes in our sales product mix. Exposure related to inventories is common in the semiconductor equipment industry due to the narrow customer base, the custom nature of the products and inventory and the shortened product life cycles caused by rapid changes in semiconductor manufacturing technology. Increased competition, particularly in the last several years, has also negatively impacted our gross margins on certain products and we believe it is likely these conditions will exist for the foreseeable future.

Our non-semiconductor equipment businesses have comprised approximately 15% of our consolidated revenues during the last three years. During fiscal 2007, our television camera and microwave communications businesses underperformed and we implemented strategies which we believed would help improve the profitability of these businesses. These initiatives included the introduction of new products and a strategic acquisition. During the first

quarter of fiscal 2008 results in our microwave equipment operation improved significantly while our television camera business continued to underperform.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008

Our financial condition is strong with significant cash and short-term investments and no long-term debt. During the three-year period ended March 29, 2008, total cash and investments increased from \$121.1 million at March 31, 2005 to \$172.1 million at March 29, 2008.

Our management team uses several performance metrics to manage our various businesses. These metrics, which tend to focus on near-term forecasts due to the limited order backlog in our businesses, include (i) order bookings and backlog for the most recently completed quarter and the forecast for the next quarter; (ii) inventory levels and related excess exposures typically based on the next twelve month's forecast; (iii) gross margin and other operating expense trends; (iv) industry data and trends noted in various publicly available sources; and (v) competitive factors and information. Due to the short-term nature of our order backlog that historically has represented about three months of business and the inherent volatility of the semiconductor equipment business, our past performance is frequently not indicative of future near term operating results or cash flows.

Application of Critical Accounting Estimates and Policies

Our discussion and analysis of our financial condition and results of operations are based upon our unaudited interim condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience, forecasts and on various other assumptions that are believed to be reasonable under the circumstances, however actual results may differ from those estimates under different assumptions or conditions. The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Our most critical accounting estimates that we believe are the most important to an investor's understanding of our financial results and condition and require complex management judgment include:

- revenue recognition, including the deferral of revenue on sales to customers, which impacts our results from operations;

- estimation of valuation allowances and accrued liabilities, specifically product warranty, inventory reserves and allowance for doubtful accounts, which impact gross margin or operating expenses;

- the recognition and measurement of current and deferred income tax assets and liabilities, which impact our tax provision;

- the assessment of recoverability of long-lived assets, which primarily impacts gross margin or operating expenses if we are required to record impairments of assets or accelerate their depreciation; and

- the valuation and recognition of share-based compensation, which impacts gross margin, research and development expense, and selling, general and administrative expense.

Below, we discuss these policies further, as well as the estimates and judgments involved. We also have other policies that we consider key accounting policies; however, these policies typically do not require us to make estimates or judgments that are difficult or subjective.

Revenue Recognition: We generally recognize revenue upon shipment and title passage for established products (i.e., those that have previously satisfied customer acceptance requirements) that provide for full payment tied to shipment. Revenue for products that have not previously satisfied customer acceptance requirements or from sales where customer payment dates are not determinable is recognized upon customer acceptance. For arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred at estimated fair value until delivery of

the deferred elements.

Accounts Receivable: We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. If the financial condition of our customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

Warranty: We provide for the estimated costs of product warranties in the period sales are recognized. Our warranty obligation estimates are affected by historical product shipment levels, product performance and material and labor costs incurred in correcting product performance problems. Should product performance, material usage or labor repair costs differ from our estimates, revisions to the estimated warranty liability would be required.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008

Inventory: The valuation of inventory requires us to estimate obsolete or excess inventory as well as inventory that is not of saleable quality. The determination of obsolete or excess inventory requires us to estimate the future demand for our products. The demand forecast is a direct input in the development of our short-term manufacturing plans. We record valuation reserves on our inventory for estimated excess and obsolete inventory and lower of cost or market concerns equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future product demand, market conditions and product selling prices. If future product demand, market conditions or product selling prices are less than those projected by management or if continued modifications to products are required to meet specifications or other customer requirements, increases to inventory reserves may be required which would have a negative impact on our gross margin.

Income Taxes: We estimate our liability for income taxes based on the various jurisdictions where we conduct business. This requires us to estimate our (i) current tax exposure; (ii) temporary differences that result from differing treatment of certain items for tax and accounting purposes and (iii) unrecognized tax benefits. Temporary differences result in deferred tax assets and liabilities that are reflected in the consolidated balance sheet. The net deferred tax assets are reduced by a valuation allowance if, based upon all available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Establishing, reducing or increasing a valuation allowance in an accounting period results in an increase or decrease in tax expense in the statement of operations. We must make significant judgments to determine the provision for income taxes, deferred tax assets and liabilities, unrecognized tax benefits and any valuation allowance to be recorded against net deferred tax assets. Our gross deferred tax asset balance as of March 29, 2008 was \$26.6 million, with a valuation allowance of \$2.4 million for state tax credit and loss carryforwards. The deferred tax assets consist primarily of deductible temporary differences and tax credit and net operating loss carryforwards.

Contingencies: We are subject to certain contingencies that arise in the ordinary course of our businesses. In accordance with FASB Statement No. 5, *Accounting for Contingencies*, (Statement No. 5) we assess the likelihood that future events will confirm the existence of a loss or an impairment of an asset. If a loss or asset impairment is probable, as defined in Statement No. 5 and the amount of the loss or impairment is reasonably estimable, we accrue a charge to operations in the period such conditions become known.

Goodwill, Intangible and Long-Lived Assets: Goodwill and intangible assets with indefinite lives are tested for impairment each year on October 1 or more frequently, if a significant event occurs. To test goodwill for impairment, we compare the fair value of our reporting units, and, if necessary, the implied fair value of goodwill, with the corresponding carrying values. If necessary, we record an impairment charge for any shortfall. Intangible and long-lived assets with finite lives are tested for impairment when events or a change in circumstances indicate the carrying value may not be recoverable. Factors that we consider in deciding when to perform an impairment review include significant under-performance of a business or product line in relation to expectations, significant negative industry or economic trends and significant changes or planned changes in our use of the assets. Recoverability of assets that will continue to be used in our operations is measured by comparing the carrying amount of the asset to our estimate of the related total future undiscounted net cash flows. If an asset's carrying value is not recoverable through the related undiscounted cash flows, the asset is considered to be impaired. The impairment is measured by the difference between the asset grouping's carrying amount and its fair value, based on the best information available, including market prices or discounted cash flow analysis. During fiscal 2007 and the first quarter of fiscal 2008, we have not recorded an impairment of our goodwill, intangible and long-lived assets.

Share-based Compensation: Share-based compensation expense related to stock options is recorded based on the fair value of the award on its grant date which we estimate using the Black-Scholes valuation model.

Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the grant date, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit.

Table of Contents**Cohu, Inc.****Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008**

Recent Accounting Pronouncements: In December 2007, the FASB issued Statement No. 141(Revised 2007), *Business Combinations* (Statement No. 141R), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. Statement No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. Statement No. 141R will become effective for our fiscal year beginning in 2009. We are currently evaluating the effect the adoption of Statement No. 141R could have on our consolidated financial statements, if any.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (Statement No. 159). Statement No. 159 expands the use of fair value measurement by permitting entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. This statement is effective for us on December 30, 2007, the first day of our 2008 fiscal year. We have not elected to measure any items at fair value under Statement No. 159 and, as a result, Statement No. 159 did not have any impact on our consolidated financial statements.

We adopted FASB Statement No. 157, *Fair Value Measurements* (Statement No. 157) on December 30, 2007, the first day of fiscal year 2008. Statement No. 157 defines fair value, establishes a methodology for measuring fair value, and expands the required disclosure for fair value measurements. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which amends Statement No. 157 by delaying its effective date by one year for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. Therefore, beginning on December 30, 2007, this standard applies prospectively to new fair value measurements of financial instruments and recurring fair value measurements of non-financial assets and non-financial liabilities. On December 28, 2008, the beginning of our 2009 fiscal year, the standard will also apply to all other fair value measurements. See Note 10, *Fair Value Measurements*, of the notes to unaudited condensed consolidated financial statements included elsewhere herein for additional information.

RESULTS OF OPERATIONS

The following table summarizes certain operating data from continuing operations as a percentage of net sales for the three-month periods ended March 29, 2008 and March 31, 2007.

	Three months ended	
	March 29, 2008	March 31, 2007
Net sales	100.0%	100.0%
Cost of sales	(64.4)	(63.2)
Gross margin	35.6	36.8
Research and development	(17.1)	(19.3)
Selling, general and administrative	(15.4)	(16.5)
Income from operations	3.1%	1.0%

In May, 2006, we sold our metal detection equipment business, FRL. Subsequent to the sale, the operating results of FRL are being presented as discontinued operations and the consolidated financial statements for all prior periods have been reclassified accordingly. Unless otherwise indicated, the discussion and amounts provided in the Results of

Operations section and elsewhere in this Quarterly Report on Form 10-Q relate to continuing operations only.

First Quarter of Fiscal 2008 Compared to First Quarter of Fiscal 2007

Net Sales

Our net sales increased 9.4% to \$58.4 million in 2008, compared to net sales of \$53.4 million in 2007. Sales of semiconductor equipment in the first quarter of fiscal 2008 increased 3.1% from the comparable 2007 period and accounted for 76.5% of consolidated net sales in 2008 versus 81.2% in 2007. The increase in sales of semiconductor equipment was attributable to increased sales of thermal subsystems and higher than expected orders and related shipments of spares within the first quarter of fiscal 2008.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008

Sales of television cameras accounted for 7.6% of consolidated net sales in 2008 and increased 5.8% when compared to the same period of fiscal 2007. The primary cause of this increase in sales is a result of the timing of revenue recognition. During the first quarter of fiscal 2008 we received customer acceptance and recognized \$0.5 million in revenue that was deferred at December 29, 2007. Excluding the impact of the recognition of deferred revenue, sales within this segment decreased 7.2% due to lower demand for board level and traffic cameras during the first quarter of fiscal 2008.

Sales of microwave communications equipment accounted for 15.9% of consolidated net sales in 2008 and increased 59.0% when compared to the same period in fiscal 2007. The increase in sales of our microwave communications business during the first quarter of fiscal 2008 was primarily attributable to increased international demand for our products in surveillance and military applications and approximately \$1.7 million in incremental sales recognized as a result of our March 30, 2007 acquisition of AVS.

Gross Margin

Gross margin consists of net sales less cost of sales. Cost of sales consists primarily of the cost of materials, assembly and test labor, and overhead from operations. Our gross margin can fluctuate due to a number of factors, including, but not limited to, the mix of products sold, product support costs, inventory reserve adjustments, and utilization of manufacturing capacity. Our gross margin, as a percentage of net sales, decreased to 35.6% in 2008 from 36.8% in 2007.

Our gross margin has been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues and in fiscal 2007 higher warranty costs associated with certain test handlers. We compute the majority of our excess and obsolete inventory reserve requirements using a one-year inventory usage forecast. During the first quarter of 2008 and 2007, we recorded net charges to cost of sales of approximately \$0.4 million and \$1.2 million, respectively, for excess and obsolete inventory. While we believe our reserves for excess and obsolete inventory and lower of cost or market concerns are adequate to cover known exposures at March 29, 2008, reductions in customer forecasts or continued modifications to products, as a result of our failure to meet specifications or other customer requirements, may result in additional charges to operations that could negatively impact our gross margin in future periods. Conversely, if our actual inventory usage is greater than our forecasted usage, our gross margin in future periods may be favorably impacted.

Research and Development Expense

R&D expense consists primarily of salaries and related costs of employees engaged in ongoing research, product design and development activities, costs of engineering materials and supplies, and professional consulting expenses. R&D expense as a percentage of net sales was 17.1% in 2008, compared to 19.3% in 2007, decreasing from \$10.3 million in 2007 to \$10.0 million in 2008. Decreased R&D expense in 2008 was primarily a result of decreased labor and material costs within our semiconductor equipment business of approximately \$0.7 million offset by an additional \$0.4 million of R&D related costs incurred by our microwave communications business resulting from the March 2007 acquisition of AVS, and other labor and material costs associated with new product development.

Selling, General and Administrative Expense

SG&A expense consists primarily of salaries and benefit costs of employees, commission expense for independent sales representatives, product promotion and costs of professional services. SG&A expense as a percentage of net sales decreased to 15.4% in 2008, from 16.5% in 2007 while increasing in absolute dollars from \$8.8 million in 2007 to \$9.0 million in 2008. This increase in costs is primarily due to an additional \$0.9 million of SG&A related costs incurred by our microwave communications business resulting from increased business volume, additional headcount, legal fees and the March 2007 acquisition of AVS. These increases were partially offset by decreased costs within our semiconductor equipment and television camera businesses of approximately \$0.8 million and \$0.1 million, respectively. The decrease in costs incurred by our semiconductor equipment business is a result of decreased administrative labor costs and professional fees of \$0.4 million and decreased sales commission and sales office expense of \$0.4 million.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008

Interest and other, net

Interest and other, net was approximately \$1.4 million and \$2.1 million in the first quarter of fiscal 2008 and 2007, respectively. During the first quarter of fiscal 2008 our interest income was negatively impacted by lower short-term interest rates and by a loss of approximately \$0.4 million recorded on our short-term investment portfolio.

Income Taxes

The income tax provision included in the statements of income for the three months ended March 29, 2008 and March 31, 2007 is based on the estimated annual effective tax rate for the entire year. These estimated effective tax rates are subject to adjustment in subsequent quarterly periods as our estimates of pretax income for the year are increased or decreased. The effective tax rates of 40.2% and 34.8%, for the three months ended March 29, 2008 and March 31, 2007, respectively, differ from the U.S. federal statutory rate primarily due to state taxes, research and development tax credits, foreign income taxed at lower rates and manufacturing activities tax benefits offset by the effects of Statement No. 123R that does not allow deferred tax benefits to be initially recognized on compensation expense related to incentive stock options and employee stock purchase plans.

Realization of our deferred tax assets is based upon the weight of available evidence, including such factors as our recent earnings history and expected future taxable income. We believe that it is more likely than not that the majority of these assets will be realized; however, ultimate realization could be negatively impacted by market conditions or other factors not currently known or anticipated. In accordance with Statement No. 109, net deferred tax assets are reduced by a valuation allowance if it is more likely than not that some or all of the deferred tax assets will not be realized. A valuation allowance of approximately \$2.4 million was provided on deferred tax assets at March 29, 2008 and December 29, 2007, respectively, for state tax credit and net operating loss carryforwards that, in the opinion of management, are more likely than not to expire before we can use them.

We adopted the provisions of FIN 48 on December 31, 2006, the first day of our 2007 fiscal year. As a result of the adoption of FIN 48, we recognized a decrease in the liability for unrecognized tax benefits of approximately \$423,000, a decrease in deferred tax assets of approximately \$381,000 and a corresponding increase in the December 31, 2006 balance of retained earnings of approximately \$42,000.

Our unrecognized tax benefits, excluding accrued interest, totaled approximately \$4.8 million at December 29, 2007. If these unrecognized tax benefits are ultimately recognized, this amount, less the related federal benefit for state items of approximately \$0.9 million and excluding any increase in our valuation allowance for deferred tax assets, would result in a reduction in our income tax expense and effective tax rate. There was no significant change in our unrecognized tax benefits in the first quarter of fiscal 2008.

We recognize interest accrued related to unrecognized tax benefits, net of federal and state tax benefits, in income tax expense. Cohu had approximately \$377,000 and \$317,000 accrued for the payment of interest at March 29, 2008 and December 29, 2007, respectively. Interest expense recognized in the three months ended March 29, 2008 and March 31, 2007 was approximately \$60,000 and \$40,000, respectively.

The Internal Revenue Service has examined our income tax returns through 2002, and the California Franchise Tax Board through 1999.

In October, 2007 the IRS commenced a routine examination of our U.S. income tax return for 2005. This examination is expected to be completed in 2008. We believe it is reasonably possible that a portion of our total unrecognized tax benefits will decrease in the next 12 months upon the conclusion of the examination or the lapse of the applicable statute of limitations. However, it is premature to assess the range or the nature of the reasonably possible changes to our unrecognized tax benefits.

As a result of the factors set forth above, our net income was \$2.0 million in 2008, compared to \$1.7 million in 2007.

March 29, 2008

LIQUIDITY AND CAPITAL RESOURCES

Our business is dependent on capital expenditures by semiconductor manufacturers and test subcontractors that are, in turn, dependent on the current and anticipated market demand for semiconductors. Demand for semiconductors is cyclical and volatile. We have implemented cost reduction programs aimed at aligning our ongoing operating costs with our currently expected revenues over the near term. These cost management initiatives include reductions to headcount and reduced spending. The cyclical and volatile nature of our industry makes estimates of future revenues, results of operations and net cash flows difficult.

Our primary historical source of liquidity and capital resources has been cash flow generated by operations. While we maintain a credit facility, we have not used this as a source of cash and do not intend to do so. We use cash to fund growth in our operating assets, including accounts receivable and inventory, and to fund new products and product enhancements primarily through research and development.

Liquidity

Working Capital: The following summarizes our cash, cash equivalents, short-term investments and working capital:

<i>(in thousands)</i>	March 29, 2008	December 29, 2007	Increase	Percentage Change
Cash, cash equivalents and short-term investments	\$172,070	\$170,118	\$1,952	1.1%
Working capital	237,225	234,345	2,880	1.2%

Cash Flows

Operating Activities: Cash generated from operating activities consists of net income, adjusted for non-cash expenses and changes in operating assets and liabilities. Non-cash items include depreciation and amortization; non-cash share-based compensation expense; and deferred income taxes. Our net cash flows provided from operating activities in the three months ended March 29, 2008 totaled \$3.5 million. Cash provided by operating activities was impacted by changes in current assets and liabilities and included decreases in accounts receivable, accounts payable and accrued compensation and other liabilities of \$3.8 million, \$4.7 million and \$2.9 million, respectively. The decrease in accounts receivable was primarily due to cash collections in excess of shipments during the first quarter of fiscal 2008. The decrease in accounts payable and accrued compensation was a result of the timing of cash payments primarily within our semiconductor equipment business.

Investing Activities: Investing cash flows consist primarily of cash used for capital expenditures in support of our businesses, proceeds from investment maturities, asset disposals and divestitures, and cash used for purchases of investments and business acquisitions. Our net cash provided from investing activities in the first fiscal quarter of 2008 totaled \$12.4 million and was primarily the result of \$37.9 million in net proceeds from sales and maturities of short-term investments, offset by \$25.0 million in cash used for purchases of short-term investments. We invest our excess cash, in an attempt to seek the highest available return while preserving capital, in short-term investments since excess cash is only temporarily available and may be required for a business-related purpose. Other expenditures in the first quarter of fiscal 2008 included purchases of property, plant and equipment of \$0.4 million. The purchases of property, plant and equipment were primarily made to support activities in our semiconductor equipment and microwave communications equipment businesses and consisted primarily of equipment used in engineering, manufacturing and related functions.

Financing Activities: Cash flows from financing activities consist primarily of net proceeds from the issuance of common stock under our stock option and employee stock purchase plans which totaled \$0.2 million during the first quarter of fiscal 2008. We issue stock options and maintain an employee stock purchase plan as components of our overall employee compensation. We paid dividends totaling \$1.4 million, or \$0.06 per common share, during the first quarter of fiscal 2008. We intend to continue to pay quarterly dividends subject to capital availability and periodic

determinations by our Board of Directors that cash dividends are in the best interests of our stockholders.

Capital Resources

In May, 2007, we renewed our \$5.0 million unsecured bank line of credit bearing interest at the bank's prime rate. The line of credit will expire in July, 2008, and requires that we maintain specified minimum levels of net worth, limits the amount of our capital expenditures and requires us to meet certain other financial covenants. We are currently in compliance with these covenants. No borrowings were outstanding at March 29, 2008; however, approximately \$1.3 million of the credit facility was allocated to standby letters of credit at March 29, 2008, leaving the balance of \$3.7 million available for future borrowings.

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
March 29, 2008

We expect that we will continue to make capital expenditures to support our business and we anticipate that present working capital and available borrowings under our line of credit will be sufficient to meet our operating requirements for at least the next twelve months.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations: Our significant contractual obligations consist of operating leases that have not changed materially from those disclosed in our Annual Report on Form 10-K for the year ended December 29, 2007.

Purchase Commitments: From time to time, we enter into commitments with our vendors to purchase inventory at fixed prices or in guaranteed quantities. We are not able to determine the aggregate amount of such purchase orders that represent contractual obligations, as purchase orders may represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current manufacturing needs and are fulfilled by our vendors within relatively short time horizons. We do not have significant agreements for the purchase of raw materials or other goods specifying minimum quantities or set prices that exceed our expected requirements for the next three months.

Off-Balance Sheet Arrangements: During the ordinary course of business, we provide standby letters of credit instruments to certain parties as required. As of March 29, 2008, the maximum potential amount of future payments that we could be required to make under these standby letters of credit was approximately \$1.3 million. No liability has been recorded in connection with these arrangements beyond those required to appropriately account for the underlying transaction being guaranteed. We do not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest rate risk.

At March 29, 2008 our investment portfolio includes fixed-income securities with a fair value of approximately \$80.0 million. These securities are subject to interest rate risk and will decline in value if interest rates increase. Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates (e.g. 4.00% to 4.40%) would not have a material impact on our financial condition or results of operations.

Foreign currency exchange risk.

Except for our subsidiary based in Germany that conducts business in Euros, we generally conduct business, including sales to foreign customers, in U.S. dollars and as a result we have limited foreign currency exchange rate risk.

Monetary assets and liabilities of our foreign operations are not significant. The effect of an immediate ten percent change in foreign exchange rates would not have a material impact on our financial condition or results of operations.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives and our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

(b) Changes in Internal Controls. During the last fiscal quarter, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
