ULTRAPAR PARTICIPAÇÕES S.A.

Ultrapar announces the signature of a preliminary agreement to acquire

the chemical division of the Berci Group (CANAMEX)

São Paulo, Brazil, July 17, 2003 - ULTRAPAR PARTICIPAÇÕES S.A. (ULTRAPAR) (BOVESPA:UGPA4/NYSE:UGP), a company engaged in LPG distribution (Ultragaz), chemical and petrochemical production (Oxitenos) as well as transportation and storage of related products (Ultracargo), announces that it has signed a preliminary agreement to acquire the chemical division of the Berci Group (CANAMEX).

CANAMEX is a specialty chemical producer with 2 plants in Mexico (Guadalajara and Coatzacoalcos), an installed production capacity of 52,800 ton/year and the same technological base as exists at Oxitenos surfactants plants. The company's product range is similar to Oxitenos and, in the case of some markets, complementary. In 2002, CANAMEX reported sales of US\$19.0 million and an operating cash generation (EBITDA) of US\$2.0 million. A few years ago, CANAMEX experienced serious financial difficulties, with its control being transferred to a committee of creditor banks. Currently, CANAMEX has been operating at 25% of its installed capacity.

The acquisition is designed to establish a more active presence in the Mexican market of specialty chemicals and to create a production and distribution platform to the United States, besides representing the first stage in Oxitenos globalization process.

The agreement, which foresees the acquisition of 100% of the assets of the chemical division of the Berci Group (CANAMEX) in a single cash payment of US\$ 11.0 million with no assumption of any remaining debt, should be concluded through the signing of a stock purchase and sale contract. The agreement is still subject to completion of negotiations on a satisfactory basis, a process which is expected to be finalized within two months.

In addition to existing synergies, Ultrapar's decision to invest was based on the growth potential stemming from the integration of its operations with those of CANAMEX. We expect our own range of technologies, products and uses to boost the future growth of CANAMEX's chemical operations.

About Ultrapar

Incorporated on December 20, 1953, Ultrapar manages three businesses: Ultragaz, a distributor of Liquefied Petroleum Gas (LPG), Oxiteno, a chemical and petrochemical company, and Ultracargo, a company involved with the transport and storage of chemical and petrochemical products and LPG. Our origins go back to 1937 when Ernesto Igel founded Companhia Ultragaz S.A and introduced LPG as a source of domestic cooking gas in Brazil. Today, we deliver LPG to an estimated 7.5 million households using our own fleet of trucks and approximately 3,000 independent retailers. Oxiteno has four industrial plants located in each one of the Brazilian petrochemical complexes and is one of the largest chemical companies in Brazil with broad-based activities in both the domestic and international markets. Oxiteno's basic operations are in second generation petrochemicals and extend downstream to more than 30 market segments, notably agricultural chemicals, foodstuffs, cosmetics, leather, detergents, packages, polyester thread and filaments, brake fluids, oil and paints and varnishes. Ultracargo is the only company in the market to provide integrated bulk liquid transport and storage services to the petrochemical segment. The company operates in the fields of projects for, and the operation and management of, logistical solutions for products and operations that require special care as well as dockside handling, pipeline operations, logistics programming and installation engineering.
