REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders, Board of Directors and Management of
Ultrapar Participações S.A.
São Paulo - SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Ultrapar Participações S.A. (the “Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the three-month period ended September 30, 2013, which comprises the balance sheet as of September 30, 2013 and the related statements of income and comprehensive income for the three and nine-month periods then ended and of changes in equity and cash flows for the nine-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and the consolidated interim financial information in accordance with CPC 21 (R1) and the international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1), applicable to the preparation of the Interim Financial Information (ITR), and presented in accordance with the standards issued by CVM.

Conclusion on consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by CVM.

Emphasis of matter

Restatement of corresponding amounts

We draw attention to note 2.w) to the interim financial information, which states that, due to the changes in the accounting policy for joint ventures and for employee benefits, the individual and consolidated corresponding figures relating to the balance sheet as of December 31, 2012, and the individual and consolidated corresponding interim financial information relating to the statements of income and comprehensive income for the three and nine-month periods ended September 30, 2012 and of changes in equity, cash flows and value added (supplemental information) for the nine-month period ended September 30, 2012, presented as comparative information, have been adjusted and are restated as required by CPC 23 and IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors, and CPC 26 (R1) and IAS 1 (Revised 2007) - Presentation of Financial Statements. Our conclusion is not qualified in respect of this matter.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added, for the nine-month period ended September 30, 2013, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR) and considered as supplemental information for International Financial Reporting Standards - IFRS, which do not require the presentation of these statements. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.

(In thousands of Brazilian Reais, unless otherwise stated)

1. Operations

Ultrapar Participações S.A. (“Ultrapar” or “Company”), is a publicly-traded company headquartered at the Brigadeiro Luis Antônio Avenue, 1343 in the city of São Paulo – SP, Brazil.

The Company engages in the investment of its own capital in services, commercial and industrial activities, by the subscription or acquisition of shares of other companies. Through its subsidiaries, it operates in the segments of liquefied petroleum gas - LPG distribution (“Ultragaz”), fuel distribution and related businesses (“Ipiranga”), production and marketing of chemicals (“Oxitenó”), and storage services for liquid bulk (“Ultracargo”). The Company also operates in oil refining through its joint-venture in Refinaria de Petróleo Riograndense S.A. (“RPR”).

On September 30, 2013, Ultrapar signed an association agreement with Imifarma Produtos Farmacêuticos e Cosméticos S.A., which operates a drugstore chain in Brazil through the brand Extrafarma, in order to operate in the retail pharmacy sector. The transaction is expected to close in the first quarter of 2014. For further details see Material Notice released on September 30, 2013.

2. Summary of significant accounting policies

The Company’s consolidated interim financial information are presented in accordance with International Accounting Standards (“IAS”) 34 – Interim Financial Reporting by the International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and accounting practices adopted in Brazil (“BR GAAP”) in accordance with CPC 21 (R1), as issued by the Accounting Pronouncements Committee (“CPC”) and approved by the Brazilian Securities and Exchange Commission (“CVM”).

The Company’s individual interim financial information are presented in accordance with CPC 21 (R1) of the BR GAAP. The investments in subsidiaries, associates and joint ventures are measured by the equity method of accounting, which, for purposes of IFRS, would be measured at cost or fair value.

The presentation currency of the Company’s individual and consolidated interim financial information is the Brazilian Real (“R\$”), which is the Company’s functional currency.

The accounting policies described below were applied by the Company and its subsidiaries in a consistent manner for all periods presented in these individual and consolidated interim financial information.

a. Recognition of income

Revenue and cost of sales are recognized when all risks and benefits associated with the products are transferred to the purchaser. Revenue from services provided and their costs are recognized when the services are provided. Costs of products and services sold provided include goods (mainly fuels/lubricants and LPG), raw materials (chemicals and petrochemicals) and production, distribution, storage and filling costs.

b. Cash and cash equivalents

Include cash, banks deposits and short-term highly-liquid investments that are readily convertible into a known amount of cash and are subject to an insignificant risk of change in value. See Note 4 for further details on cash and cash equivalents of the Company and its subsidiaries.

c. Financial instruments

In accordance with IAS 32, IAS 39 and IFRS 7 (CPC 38, 39 and 40 (R1)), the financial instruments of the Company and its subsidiaries are classified in accordance with the following categories:

- Measured at fair value through profit or loss: financial assets and liabilities held for trading, that is, acquired or incurred principally for the purpose of selling or repurchasing in the near term, and derivatives. The balances are stated at fair value. The interest earned, the exchange variation and changes in fair value are recognized in profit or loss.
- Held to maturity: non-derivative financial assets with fixed or determinable payments, and fixed maturities for which the entity has the positive intention and ability to hold to maturity. The interest earned and the foreign currency exchange variation are recognized in profit or loss, and balances are stated at acquisition cost plus the interest earned, using the effective interest rate method.
- Available for sale: non-derivative financial assets that are designated as available for sale or that are not classified into other categories at initial recognition. The balances are stated at fair value and the interest earned and the foreign currency exchange variation are recognized in profit or loss. Differences between fair value and acquisition cost plus the interest earned are recognized in a specific account in the shareholders' equity. Accumulated gains and losses recognized in the shareholders' equity are reclassified to profit or loss in case of prepayment.
- Loans and receivables: non-derivative financial assets with fixed or determinable payments or receipts, not quoted in an active market, except: (i) those which the entity intends to sell immediately or in the near term and which the entity classified as measured at fair value through profit or loss; (ii) those classified as available for sale; or (iii) those for which the Company may not recover substantially all of its initial investment for reasons other than credit deterioration. The interest earned and the foreign currency exchange variation are recognized in profit or loss. The balances are stated at acquisition cost plus the interests, using the effective interest rate method. Loans and receivables include cash and banks, trade receivables, dividends receivable and other trade receivables.

The Company and its subsidiaries use derivative financial instruments for hedging purposes, applying the concepts described below:

- Fair value hedge: derivative financial instrument used to hedge exposure to changes in the fair value of an item, attributable to a particular risk, which can affect the entity's profit or loss.
- Hedge accounting: In the initial designation of the fair value hedge, the relationship between the hedging instrument and the hedged item is documented, including the objectives of risk management, the strategy in conducting the transaction and the methods to be used to evaluate its effectiveness. Once the fair value hedge has been qualified as effective, the hedge item is also measured at fair value. Gains and losses from hedge instruments and hedge items are recognized in profit or loss. The hedge accounting must be discontinued when

the hedge becomes ineffective.

For further detail on financial instruments of the Company and its subsidiaries, see Notes 4, 14, and 22.

d. Trade receivables

Trade receivables are recognized at the amount invoiced, adjusted to present value if applicable, including all direct taxes attributable to the Company and its subsidiaries. An allowance for doubtful accounts is recorded based on estimated losses and is set at an amount deemed by management to be sufficient to cover any probable loss on realization of trade receivables (see Note 22 - Customer credit risk).

BUG

e. Inventories

Inventories are stated at the lower of acquisition cost or net realizable value. The cost value of inventory is measured using the weighted average cost and includes the costs of acquisition and processing directly related to the units produced based on the normal capacity of production. Estimates of net realizable value are based on the average selling prices at the end of the reporting period, net of applicable direct selling expenses. Subsequent events related to the fluctuation of prices and costs are also considered, if relevant. If net realizable values are below inventory costs, a provision corresponding to this difference is recognized. Provisions are also made for obsolescence of products, materials or supplies that (i) do not meet the Company and its subsidiaries' specifications, (ii) have exceeded their expiration date or (iii) are considered slow-moving inventory. This classification is made by management with the support of its industrial team.

f. Investments

Investments in subsidiaries are accounted for under the equity method of accounting in the individual interim financial information of the parent company.

Investments in associates in which management has a significant influence or in which it holds 20% or more of the voting stock, or that are under shared control are also accounted for under the equity method of accounting in the individual and consolidated interim financial information (see Note 11).

Other investments are stated at acquisition cost less provision for losses, unless the loss is considered temporary.

g. Property, plant and equipment

Property, plant and equipment is recognized at acquisition or construction cost, including financial charges incurred on property, plant and equipment under construction, as well as maintenance costs resulting from scheduled plant outages and estimated costs to remove, to decommission or to restore assets (see Note 18).

Depreciation is calculated using the straight-line method, for the periods mentioned in Note 12, taking into account the useful life of the assets, which are reviewed annually.

Leasehold improvements are depreciated over the shorter of the lease contract term and useful life of the property.

Ultrapar Participações S.A. and Subsidiaries

Notes to the interim financial information

(In thousands of Brazilian Reais, unless otherwise stated)

h. Leases

- Finance leases

Certain lease contracts transfer substantially all the risks and benefits associated with the ownership of an asset to the Company and its subsidiaries. These contracts are characterized as finance leases, and assets thereunder are capitalized at lease commencement at their fair value or, if lower, present value of the minimum lease payments under the contracts. The items recognized as assets are depreciated and amortized using the straight-line method based on the useful lives applicable to each group of assets as mentioned in Notes 12 and 13. Financial charges under the finance lease contracts are allocated to profit or loss over the lease contract term, based on the amortized cost and the effective interest rate method of the related lease obligation (see Note 14.i).

- Operating leases

There are lease transactions where the risks and benefits associated with the ownership of the asset are not transferred and where there is no purchase option or the purchase option at the end of the contract is equivalent to the market value of the leased asset. Payments made under an operating lease contract are recognized as cost or expenses in the income statement on a straight-line basis over the term of the lease contract (see Note 23.g).

i. Intangible assets

Intangible assets include assets acquired by the Company and its subsidiaries from third parties, according to the criteria below (see Note 13):

- Goodwill is carried net of accumulated amortization as of December 31, 2008, when it ceased to be amortized. Goodwill generated since January 1, 2009 is shown as intangible asset corresponding to the positive difference between the amount paid or payable to the seller and the fair value of the identified assets and liabilities assumed of the acquired entity, and is tested annually for impairment. Goodwill is allocated to the respective cash generating units (“CGU”) for impairment testing purposes.
- Bonus disbursements as provided in Ipiranga’s agreements with reseller service stations and major consumers are recognized as distribution rights when paid and amortized using the straight-line method according to the term of the agreement.
- Other intangible assets acquired from third parties, such as software, technology and commercial property rights, are measured at the total acquisition cost and amortized using straight-line method, for the periods mentioned in Note 13, taking into account their useful life, which is reviewed annually.

The Company and its subsidiaries have not recognized intangible assets that were created internally. The Company and its subsidiaries have not recognized intangible assets that have an indefinite useful life, except for goodwill and the “am/pm” brand.

j. Other assets

Other assets are stated at the lower of cost and realizable value, including, if applicable, interest earned, monetary changes and changes in exchange rates incurred or less a provision for loss and, if applicable, adjustment to present value (see Note 2.u).

k. Financial liabilities

The Company and its subsidiaries' financial liabilities include trade payables and other payables, loans, debentures and hedging instruments. Financial liabilities are classified as "financial liabilities at fair value through profit or loss" or "financial liabilities at amortised cost". The financial liabilities at fair value through profit or loss refer to derivative financial instruments and financial liabilities designated as hedged items in a fair value hedge relationship upon initial recognition (see Note 2.c – fair value hedge). The financial liabilities at amortised cost are stated at the initial transaction amount plus related charges and transaction costs, net of amortization. The charges are recognized in profit or loss using the effective interest rate method (see Note 14.j).

Transaction costs incurred and directly attributable to the activities necessary for contracting loans or for issuing bonds, as well as premiums and discounts upon issuance of debentures and other debt or equity instruments, are allocated to the instrument and amortized to profit or loss over its term, using the effective interest rate method.

l. Income and social contribution taxes on income

Current and deferred income tax ("IRPJ") and social contribution on net income tax ("CSLL") are calculated based on their current rates, considering the value of tax incentives. Taxes are recognized based on the rates of IRPJ and CSLL provided for by the laws enacted on the last day of the interim financial information. For further details about recognition and realization of IRPJ and CSLL, see Note 9.

m. Provision for assets retirement obligation – fuel tanks

The Company and its subsidiaries have the legal obligation to remove Ipiranga's underground fuel tanks located at Ipiranga-branded service stations after a certain period. The estimated cost of the obligation to remove these fuel tanks is recognized as a liability when tanks are installed. The estimated cost is recognized in property, plant and equipment and depreciated over the respective useful life of the tanks. The amounts recognized as a liability are monetarily restated until the respective tank is removed (see Note 18). An increase in the estimated cost of the obligation to remove the tanks could result in negative impact in future results. The estimated removal cost is reviewed and updated annually or when there is significant change in its amount.

n. Provisions for tax, civil and labor risks

A provision for tax, civil and labor risks is recognized for quantifiable risks, when the chance of loss is more-likely-than-not in the opinion of management and internal and external legal counsel, and the amounts are recognized based on evaluation of the outcomes of the legal proceedings (see Note 23 items a,b,c,d).

o. Post-employment benefits

Post-employment benefits granted and to be granted to employees, retirees, and pensioners are based on an actuarial calculation prepared by an independent actuary, using the projected unit credit method (see Note 24.b). The actuarial gains and losses are recognized in other comprehensive income and presented in the shareholder's equity. Past service cost is recognized through the income statement.

p. Other liabilities

Other liabilities are stated at known or measurable amounts plus, if applicable, related charges, monetary restatement and changes in exchange rates incurred. When applicable, other liabilities are recognized at present value based on interest rates that reflect the term, currency and risk of each transaction.

q. Foreign currency transactions

Foreign currency transactions carried out by the Company or its subsidiaries are remeasured into their functional currency at the exchange rate prevailing at the date of each transaction. Outstanding monetary assets and liabilities of the Company and its subsidiaries are translated using the exchange rate at the end of the reporting period. The effect of the difference between those exchange rates is recognized in profit or loss until the conclusion of each transaction.

r. Basis for translation of interim financial information of foreign subsidiaries

Assets and liabilities of the foreign subsidiaries, denominated in currencies other than that of the Company (functional currency: Brazilian Real), which have administrative autonomy, are translated using the exchange rate at the end of the reporting period. Revenues and expenses are translated using the average exchange rate of each period and shareholders' equity are translated at the historic exchange rate of each transaction affecting shareholders' equity. Gains and losses resulting from changes in these foreign investments are directly recognized in the shareholders' equity as cumulative translation adjustments and will be recognized in profit or loss if these investments are disposed of. The recognized balance in other comprehensive income and presented in the shareholders' equity as cumulative translation adjustments as of September 30, 2013 was a gain of R\$ 13,613 (gain of R\$ 12,621 as of December 31, 2012).

The foreign subsidiaries with functional currency different from the Company and which have administrative autonomy, are listed below:

Subsidiary	Functional currency	Location
Oxiteno México S.A. de C.V.	Mexican Peso	Mexico
Oxiteno Servicios Corporativos S.A. de C.V.	Mexican Peso	Mexico
Oxiteno Servicios Industriales de C.V.	Mexican Peso	Mexico
Oxiteno USA LLC	U.S. Dollar	United States
Oxiteno Andina, C.A.	Bolivar	Venezuela
Oxiteno Uruguay S.A.	U.S. Dollar	Uruguay

According to IAS 29, Venezuela is classified as a hyperinflationary economy. As a result, the interim financial information of Oxiteno Andina, C.A. ("Oxiteno Andina") were adjusted by the Venezuelan Consumer Price Index.

The subsidiary Oxiteno Uruguay S.A. (“Oxiteno Uruguay”) determined its functional currency as the U.S. dollar, as its sales and purchases of goods, and financing activities are performed substantially in this currency.

Assets and liabilities of the other foreign subsidiaries, which do not have administrative autonomy, are considered as an extension of the activities of their parent company and are translated using the exchange rate at the end of the reporting period. Gains and losses resulting from changes in these foreign investments are directly recognized as financial income or loss. The gain recognized in income as of September 30, 2013 amounted to R\$ 3,574 (R\$ 2,436 gain as of September 30, 2012).

Notes to the interim financial information

(In thousands of Brazilian Reais, unless otherwise stated)

s. Use of estimates, assumptions and judgments

The preparation of the interim financial information requires the use of estimates, assumptions and judgments for the accounting of certain assets, liabilities and income. Therefore, Company and subsidiaries' management use the best information available at the time of preparation of the interim financial information, as well as the experience of past and current events, also considering assumptions regarding future events. The interim financial information therefore include estimates, assumptions and judgments related mainly to determining the fair value of financial instruments (Notes 4, 14 and 22), the determination of the allowance for doubtful accounts (Note 5), the determination of provisions for income taxes (Note 9), the useful life of property, plant and equipment (Note 12), the useful life of intangible assets and the determination of the recoverable amount of goodwill (Note 13), provisions for assets retirement obligations (Note 18), tax, civil and labor provisions (Note 23 items a,b,c,d) and estimates for the preparation of actuarial reports (Note 24.b). The actual result of the transactions and information may differ from their estimates.

t. Impairment of assets

The Company and its subsidiaries review, at least annually, the existence of indication that an asset may be impaired. If there is an indication, the Company and its subsidiaries estimate the recoverable amount of the asset. Assets that cannot be evaluated individually are grouped in the smallest group of assets that generate cash flow from continuous use and that are largely independent of cash flows of other assets (CGU). The recoverable amount of assets or CGUs corresponds to the greater of their fair value net of applicable direct selling costs and their value in use.

To assess the value in use, the Company and its subsidiaries consider the projections of future cash flows, trends and outlooks, as well as the effects of obsolescence, demand, competition and other economic factors. Such cash flows are discounted to their present values using the discount rate before tax that reflects market conditions for the period of impairment testing and the specific risks of the asset or CGU being evaluated. In cases where the expected discounted future cash flows are less than their carrying amount, the impairment loss is recognized for the amount by which the carrying value exceeds the fair value of these assets. Losses for impairment of assets are recognized in profit or loss. In case goodwill has been allocated to a CGU, the recognized losses are first allocated to reduce the corresponding goodwill. If the goodwill is not enough to absorb such losses, the surplus is allocated to the assets on a pro-rata basis. An impairment of goodwill cannot be reversed. For other assets, impairment losses may be reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if the impairment had not been recognized.

No impairment was recognized in the periods presented.

u. Adjustment to present value

Some of the Company's subsidiaries recognized a present value adjustment to Tax on Goods and Services ("ICMS", the Brazilian VAT) credit balances related to property, plant and equipment (CIAP – see Note 7). Because recovery of these credits occurs over a 48 months period, the present value adjustment reflects, in the interim financial information, the time value of the ICMS credits to be recovered.

The Company and its subsidiaries reviewed all items classified as non-current and, when relevant, current assets and liabilities and did not identify the need to recognize other present value adjustments.

v. Statements of value added

As required by Brazilian Corporate Law, the Company and its subsidiaries prepare the individual and consolidated statements of value added (“DVA”) according to CPC 09 – Statement of Value Added, as an integral part of the interim financial information as applicable to publicly-traded companies, and as supplemental information for IFRS, that do not require the presentation of DVA.

w. Adoption of the pronouncements issued by CPC and IFRS

The following standards are effective on January 1st, 2013 and have impacted the Company's financial statements and interim financial information previously disclosed in 2012.

(1) adoption of IFRS 11 (CPC 19 (R2)) - Joint arrangements: the investments in RPR, Maxfácil Participações S.A. ("Maxfácil"), União Vopak Armazéns Gerais Ltda. ("União Vopak") and ConectCar Soluções de Mobilidade Eletrônica S.A. ("Conectcar") were no more proportionally consolidated and were accounted for using the equity method.

(2) amendments to IAS 19 Revised (CPC 33 (R2))- Employee benefits: actuarial gains and losses are no longer recognized in the income statement and have been recognized in shareholders' equity as other comprehensive income. Past service costs were recognized in shareholders' equity in the date of transition. From the date of transition, past service costs will be recognized in income statements.

The table below summarizes the effects of adopting these standards on the consolidated balance sheet as of December 31, 2012 and on the consolidated income statements and consolidated statement of cash flow as of September 30, 2012:

(In thousands of Brazilian Reais, unless otherwise stated)

On December 31, 2012 the Company tested the balances of goodwill shown in the table above for impairment. The determination of value in use involves assumptions, judgments and estimates of cash flows, such as growth rates of revenues, costs and expenses, estimates of investments and working capital and discount rates. The assumptions about growth projections and future cash flows are based on the Company's business plan, as well as comparable market data, and represent management's best estimate of the economic conditions that will exist over the economic life of the various CGUs, to which goodwill is related.

The evaluation of the value in use is calculated for a period of five years, after which we calculate the perpetuity, considering the possibility of carrying the business on indefinitely.

The discount and growth rates used to extrapolate the projections ranged from 10.4% to 29.6% and 0% to 3.5% p.a., respectively, depending on the CGU analyzed.

The Company's goodwill impairment tests did not result in the recognition of losses for the year ended December 31, 2012.

ii) Software includes user licenses and costs for the implementation of the various systems used by the Company and its subsidiaries, such as: integrated management and control, financial management, foreign trade, industrial automation, operational and storage management, accounting information and other systems.

iii) The subsidiaries Oxiteno S.A., Oxiteno Nordeste and Oleoquímica Indústria e Comércio de Produtos Químicos Ltda. ("Oleoquímica") recognize as technology certain rights of use held by them. Such licenses include the production of ethylene oxide, ethylene glycols, ethanalamines, glycol ethers, ethoxylates, solvents, fatty acids from vegetable oils, fatty alcohols, and specialty chemicals, which are products that are supplied to various industries.

iv) Commercial property rights include those described below:

- On July 11, 2002, subsidiary Terminal Químico de Aratu – Tequimar ("Tequimar") executed an agreement with CODEBA – Companhia das Docas do Estado da Bahia, which allows it to explore the area in which the Aratu Terminal is located for 20 years, renewable for a similar period. The price paid by Tequimar was R\$ 12,000, which is being amortized over the period from August 2002 to July 2042.
- In addition, subsidiary Tequimar has a lease contract for an area adjacent to the Port of Santos for 20 years from December 2002, renewable for a similar period, which allows the construction, operation, and use of a terminal for liquid bulk unloading, tank storage, handling, and distribution. The price paid by Tequimar was R\$ 4,334, which is being amortized over the period from August 2005 to December 2022.

v) Distribution rights refer mainly to bonus disbursements as provided in Ipiranga's agreements with resellers and large customers. Bonus disbursements are recognized when paid and recognized as an expense in the income statement over the term of the agreement (typically 5 years) which is reviewed as per the changes occurred in the agreements.

vi) Others are represented substantially by the acquisition cost of the 'am/pm' brand in Brazil.

22. Risks and financial instruments (Consolidated)

Risk management and financial instruments - Governance

The main risks to which the Company and its subsidiaries are exposed reflect strategic/operational and economic/financial aspects. Operational/strategic risks (including, but not limited to, demand behavior, competition, technological innovation, and material changes in the industry structure) are addressed by the Company's management model. Economic/financial risks primarily reflect default of customers, behavior of macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company and its subsidiaries and their counterparties. These risks are managed through control policies, specific strategies, and the establishment of limits.

The Company has a conservative policy for the management of resources, financial instruments and risks approved by its Board of Directors ("Policy"). In accordance with the Policy, the main objectives of financial management are to preserve the value and liquidity of financial assets and ensure financial resources for the development of the business, including expansions. The main financial risks considered in the Policy are risks associated with currencies, interest rates, credit and selection of financial instruments. Governance of the management of financial risks and financial instruments follows the segregation of duties below:

- Implementation of the management of financial assets, instruments and risks is the responsibility of the financial area, through its treasury department, with the assistance of the tax and accounting departments.
- Supervision and monitoring of compliance with the principles, guidelines and standards of the Policy is the responsibility of the Risk and Investment Committee composed of members of the Company's Executive Board ("Committee"). The Committee holds regular meetings and is in charge, among other responsibilities, of discussing and monitoring the financial strategies, existing exposures, and significant transactions involving investment, fund raising, or risk mitigation. The Committee monitors the risk standards established by the Policy through a monitoring map on a monthly basis.
- Changes in the Policy or revisions of its standards are subject to the approval of the Board of Directors of Ultrapar.
- Continuous improvement of the Policy is the joint responsibility of the Board of Directors, the Committee, and the financial area.
- The internal audit department audits the compliance with the requirements of the Policy.

Currency risk

Most transactions of the Company and its subsidiaries are located in Brazil and, therefore, the reference currency for risk management is the Brazilian Real. Currency risk management is guided by neutrality of currency exposures and considers the transactional, accounting, and operational risks of the Company and its subsidiaries and their exposure to changes in exchange rates. The Company considers as its main currency exposures the assets and liabilities in foreign currency and the short-term flow of net sales in foreign currency of Oxiteno.

The Company and its subsidiaries use exchange rate hedging instruments (especially between the Brazilian Real and the U.S. dollar) available in the financial market to protect their assets, liabilities, receipts and disbursements in foreign currency, in order to reduce the effects of changes in exchange rates on its results and cash flows in Brazilian Reais within the exposure limits under its Policy. Such foreign exchange hedging instruments have amounts, periods, and rates substantially equivalent to those of assets, liabilities, receipts and disbursements in foreign currency to which they are related. Assets and liabilities in foreign currencies are stated below, translated into Brazilian Reais as of September 30, 2013 and as of December 31, 2012:

Interest rate risk

The Company and its subsidiaries adopt conservative policies for borrowing and investing financial resources and for capital cost minimization. The financial investments of the Company and its subsidiaries are primarily held in transactions linked to the CDI, as set forth in Note 4. Borrowings primarily relate to financing from Banco do Brasil, BNDES and other development agencies, debentures and borrowings in foreign currency, as shown in Note 14.

The Company does not actively manage risks associated with changes in the level of interest rates and attempts to maintain its financial interest assets and liabilities at floating rates. As of September 30, 2013, the Company and its subsidiaries had interest rate derivative financial instruments linked to domestic loans, swapping the fixed interest rate of certain debts to floating interest rate (CDI).

The table below shows the financial assets and liabilities exposed to floating interest rates as of September 30, 2013 and December 31, 2012:

Credit risks

The financial instruments that would expose the Company and its subsidiaries to credit risks of the counterparty are basically represented by cash and bank deposits, financial investments, hedging instruments and trade receivables.

Credit risk of financial institutions - Such risk results from the inability of financial institutions to comply with their financial obligations to the Company and its subsidiaries due to insolvency. The Company and its subsidiaries regularly conduct a credit review of the institutions with which they hold cash and cash equivalents, financial investments, and hedging instruments through various methodologies that assess liquidity, solvency, leverage, portfolio quality, etc. Cash and cash equivalents, financial investments, and hedging instruments are held only with institutions with a solid credit history, chosen for safety and soundness. The volumes of cash and cash equivalents, financial investments and hedging instruments are subject to maximum limits by institution and, therefore, require diversification of counterparty.

Government credit risk - The Company's policy allows investments in government securities from countries classified as investment grade AAA or Aaa by specialized credit rating agencies and in Brazilian government bonds. The volume of such financial investments is subject to maximum limits by each country and, therefore, requires diversification of counterparties.

Customer credit risk - Such risks are managed by each business unit through specific criteria for acceptance of customers and credit rating and are additionally mitigated by diversification of sales. No single customer or group accounts for more than 10% of total revenue.

The Company maintained the following allowances for doubtful accounts on trade receivables:

	09/30/2013	12/31/2012

Liquidity risk

The Company and its subsidiaries' main sources of liquidity derive from (i) cash, cash equivalents and financial investments, (ii) cash generated from operations and (iii) financings. The Company and its subsidiaries believe that these sources are sufficient to satisfy their current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt and payment of dividends.

The Company and its subsidiaries periodically examine opportunities for acquisitions and investments. They consider different types of investments, either directly or through joint ventures, or associated companies, and finance such investments using cash generated from operations, debt financing, through capital increases or through a combination of these methods.

The Company and its subsidiaries believe to have enough working capital to satisfy their current needs. The gross indebtedness due over the next twelve months totals R\$ 1,807.4 million, including estimated interests on loans. Furthermore, the investment plan for 2013 totals R\$ 1,426 million. On September 30, 2013, the Company and its subsidiaries had R\$ 3,160.0 million in cash, cash equivalents and short-term financial investments (for quantitative information, see Notes 4 and 14).

The table below presents a summary of financial liabilities as of September 30, 2013 to be settled by the Company and its subsidiaries, by maturity. The amounts disclosed in this table are the contractual undiscounted cash outflows, and, therefore, these amounts can be different from the amounts disclosed on the balance sheet as of September 30, 2013.

(2) Includes estimated interest payments on short-term and long-term loans until the payment.

(3) The currency and interest rate hedging instruments were estimated based on projected U.S dollar futures contracts and the futures curve of DI x Pre contract quoted on BM&FBOVESPA as of September 30, 2013, and on the futures curve of LIBOR (BBA - British Bankers Association) on September 30, 2013. In the table above, only the hedging instruments with negative result at the time of settlement were considered.

Capital management

The Company manages its capital structure based on indicators and benchmarks. The key performance indicators related to the capital structure management are the weighted average cost of capital, and the net debt / EBITDA, interest coverage and indebtedness / equity ratios. Net debt is composed of cash, cash equivalents and financial investments (see Note 4) and loans, including debentures (see Note 14). The Company can change its capital structure depending on the economic and financial conditions, in order to optimize its financial leverage and capital management. The Company seeks to improve its return on capital employed by implementing an efficient working capital management and a selective investment program.

Selection and use of financial instruments

In selecting financial investments and hedging instruments, an analysis is conducted to estimate rates of return, risks involved, liquidity, calculation methodology for the carrying value and fair value, and documentation applicable to the financial instruments. The financial instruments used to manage the financial resources of the Company and its subsidiaries are intended to preserve value and liquidity.

The Policy contemplates the use of derivative financial instruments only to cover identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). The risks identified in the Policy are described in the above sections, and are subject to risk management. In accordance with the Policy, the Company and its subsidiaries can use forward contracts, swaps, options, and futures contracts to manage identified risks. Leveraged derivative instruments are not permitted. Because the use of derivative financial instruments is limited to the coverage of identified risks, the Company and its subsidiaries use the term “hedging instruments” to refer to derivative financial instruments.

As mentioned in the section “Risk management and financial instruments – Governance”, the Committee monitors compliance with the risk standards established by the Policy through a risk monitoring map, including the use of hedging instruments, on a monthly basis. In addition, the internal audit department verifies the compliance with the requirements of the Policy.

Hedging instruments existing as of September 30, 2013 are described below, according to their category, risk, and protection strategy:

a - Hedging against foreign exchange exposure of liabilities in foreign currency - The purpose of these contracts is (i) to offset the effect of the change in exchange rates of debts or firm commitments in U.S. dollars by converting them into debts or firm commitments in Brazilian Reais linked to CDI and (ii) change a financial investment linked to the CDI and given as guarantee to loan in U.S. dollar, into a financial investment linked to U.S. dollar. As of September 30, 2013, the Company and its subsidiaries had outstanding swap contracts totaling US\$ 225.6 million in notional amount with liability position, on average of 104.9% of CDI, of which US\$ 85.6 million, on average, had asset position at US\$ + 4.56% p.a. and US\$ 140.0 million had asset position at US\$ + LIBOR + 1.0% p.a.

b - Hedging against foreign exchange exposure of operations - The purpose of these contracts is to make the exchange rate of the revenues of subsidiaries Oleoquímica, Oxiteno S.A. and Oxiteno Nordeste equal to the exchange rate of the cost of their main raw materials during their operating cycles. As of September 30, 2013, these swap contracts totaled US\$ 12.1 million and, on average, had an asset position at 74.4% of CDI and liability position at US\$ + 0.0% p.a.

c - Hedging against the interest rate fixed in local financing - The purpose of these contracts is to convert the interest rate on financing contracted in Brazilian Reais from fixed into floating. On September 30, 2013 these swap contracts totaled R\$ 627.5 million of notional amount, and on average had an asset position at 12.0% p.a. and liability position at 98.8% of CDI.

Hedge accounting

The Company and its subsidiaries test, throughout the duration of the hedge, the effectiveness of their derivatives, as well as the changes in their fair value. The Company and its subsidiaries designate as fair value hedges certain derivative financial instruments used to offset the variations in interest and exchange rates, based on the market value of financing contracted in Brazilian Reais and U.S. dollars.

On September 30, 2013 the notional amount of interest rate hedging instruments totaled R\$ 627.5 million referring to the principal of the pre-fixed loans in Brazilian Reais. As of September 30, 2013, a loss of R\$ 18.3 million related to the result of hedging instruments, an income of R\$ 63.2 million related to the fair value adjustment of debt and an expense of R\$ 105.6 million related to the accrued interest rate of the debt were recognized in the income statements, transforming the average effective cost of the operations into 98.8% of CDI.

On September 30, 2013 the notional amount of foreign exchange hedging instruments designated as fair value hedge totaled US\$ 80.0 million. As of September 30, 2013, a gain of R\$ 6.3 million related to the result of hedging instruments, an expense of R\$ 0.6 million related to the fair value adjustment of debt and an expense of R\$ 16.6 million related to the financial expense of the debt were recognized in the income statements, transforming the average effective cost of the operation into 104.1% of CDI (see Note 14.c.1).

Notes to the interim financial information

(In thousands of Brazilian Reais, unless otherwise stated)

The fair value of financial instruments, including currency and interest hedging instruments, was determined as follows:

- The fair values of cash and bank deposits balances are identical to their carrying values.
- Financial investments in investment funds are valued at the value of the fund unit as of the date of the reporting period, which corresponds to their fair value.
- Financial investments in CDBs (Bank Certificates of Deposit) and similar investments offer daily liquidity through repurchase at the “yield curve” and, therefore, the Company believes their fair value corresponds to their carrying value.
- The fair value calculation of LPG Inc.’s notes in the foreign market (see Note 14.b) is based on the quoted prices in an active market.

The fair value of other financial investments and financings was determined using calculation methodologies commonly used for marking-to-market, which consist of calculating future cash flows associated with each instrument adopted and adjusting them to present value at the market rates as of September 30, 2013 and December 31, 2012. For some cases where there is no active market for the financial instrument, the Company and its subsidiaries can use quotes provided by the transaction counterparties.

The interpretation of market information on the choice of calculation methodologies for the fair value requires considerable judgment and estimates to obtain a value deemed appropriate to each situation. Consequently, the estimates presented do not necessary indicate the amounts that may be realized in the current market.

Financial instruments were classified as loans and receivables or financial liabilities measured at amortized cost, except (i) all exchange rate and interest rate hedging instruments, which are measured at fair value through profit or loss, (ii) financial investments classified as measured at fair value through profit or loss, (iii) financial investments that are classified as available for sale, which are measured at fair value through other comprehensive income (see Note 4), (iv) fundings measured at fair value through profit or loss (see Note 14) and (v) guarantees to customers that have vendor arrangements (see Note 14.k), which are measured at fair value through profit or loss. The financial investments classified as held-to-maturity are measured at amortized cost. Cash, banks and trade receivables are classified as loans and receivables. Trade payables and other payables are classified as financial liabilities measured at amortized cost.

Fair value hierarchy of financial instruments on the balance sheet

The financial instruments recognized at fair value on the balance sheet are classified in the following categories:

- (a) Level 1 - prices negotiated (without adjustment) in active markets for identical assets or liabilities;
- (b) Level 2 - inputs other than prices negotiated in active markets included in Level 1 and observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- (c) Level 3 - inputs for the asset or liability which are not based on observable market variables (unobservable inputs).

The table below shows a summary of the financial assets and financial liabilities measured at fair value in the Company's and its subsidiaries' balance sheet as of September 30, 2013 and December 31, 2012:

Sensitivity analysis

The Company and its subsidiaries use derivative financial instruments only to hedge against identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). Thus, for purposes of sensitivity analysis of market risks associated with financial instruments, as required by CVM Instruction 475/08, the Company analyzes the hedging instrument and the hedged item together, as shown on the charts below.

For the sensitivity analysis of foreign exchange hedging instruments, management adopted as a likely scenario the Real/U.S. dollar exchange rates at maturity of each swap, projected by U.S dollar futures contracts quoted on BM&FBOVESPA as of September 30, 2013. As a reference, the exchange rate for the last maturity of foreign

exchange hedging instruments is R\$ 2.99 in the likely scenario. Scenarios II and III were estimated with a 25% and 50% additional appreciation or depreciation of the Brazilian Real against the likely scenario, according to the risk to which the hedged item is exposed.

Ultrapar Participações S.A. and Subsidiaries

Notes to the interim financial information

(In thousands of Brazilian Reais, unless otherwise stated)

Based on the balances of the hedging instruments and hedged items as of September 30, 2013, the exchange rates were replaced, and the changes between the new balance in Brazilian Reais and the balance in Brazilian Reais as of September 30, 2013 were calculated in each of the three scenarios. The table below shows the change in the values of the main derivative instruments and their hedged items, considering the changes in the exchange rate in the different scenarios:

	Risk	Scenario I (likely)	Scenario II	Scenario III
Currency swaps receivable in U.S. dollars				
(1) U.S. Dollar / Real swaps	Dollar	77,137	222,627	368,117
(2) Debts/firm commitments in dollars	appreciation	(77,116)	(222,594)	(368,073)
(1)+(2)	Net effect	21	33	44
Currency swaps payable in U.S. dollars				
(3) Real / U.S. Dollar swaps	Dollar	(112)	6,664	13,439
(4) Gross margin of Oxiteno	devaluation	112	(6,664)	(13,439)
(3)+(4)	Net effect	-	-	-

For sensitivity analysis of hedging instruments for interest rates in Brazilian Reais, the Company used the futures curve of DI x Pre contract on BM&FBOVESPA as of September 30, 2013 for each of the swap and debt (hedged item) maturities, to determine the likely scenarios. Scenarios II and III were estimated based on a 25% and 50% deterioration, respectively, of the likely scenario pre-fixed interest rate.

Based on the three scenarios of interest rates in Brazilian Reais, the Company estimated the values of its debt and hedging instruments according to the risk which is being hedged (variations in the pre-fixed interest rates in Brazilian Reais), by projecting them to future value at the contracted rates and bringing them to present value at the interest rates of the estimated scenarios. The result is shown in the table below:

	Risk	Scenario I (likely)	Scenario II	Scenario III
Interest rate swap (in R\$)				
(1) Fixed rate swap - CDI	Decrease in	-	26,142	53,898
(2) Fixed rate financing	Pre-fixed rate	-	(26,147)	(53,904)
(1)+(2)	Net effect	-	(5)	(6)

Provisions for losses are estimated and updated by management, supported by the opinion of the legal departments of the Company and its outside legal counsel.

The table below demonstrates the breakdown of provisions by nature and its movement:

b. Tax matters

Provisions

On October 7, 2005, the subsidiaries Cia. Ultragaz and Bahiana Distribuidora de Gás Ltda. (“Bahiana”) filed for and obtained a preliminary injunction to recognize and offset PIS and COFINS credits on LPG purchases, against other taxes levied by the Brazilian Federal Revenue Service, notably IRPJ and CSLL. The decision was confirmed by a trial court on May 16, 2008. Under the preliminary injunction, the subsidiaries were required to make escrow deposits for these debits in the accumulated amount of R\$ 322,889 as of September 30, 2013 (R\$ 291,483 as of December 31, 2012) and have recognized a corresponding liability.

The subsidiary IPP has provisions for IRPJ and CSLL related to the unconstitutionality of Law No. 9316/1996, that denied the deduction of CSLL from the IRPJ tax basis, in the amount of R\$ 19,605 as of September 30, 2013 (R\$ 19,120 as of December 31, 2012).

The subsidiaries Oxiteno S.A., Oxiteno Nordeste, Cia. Ultragaz, Tequimar, Tropical, Empresa Carioca de Produtos Químicos S.A. (“EMCA”) and IPP filed for a preliminary injunction seeking the deduction of ICMS from their PIS and COFINS tax bases. Oxiteno Nordeste and IPP obtained the right to pay the amounts into escrow deposits through an injunction, and recognized a corresponding provision in the amount of R\$ 84,934 as of September 30, 2013 (R\$ 81,622 as of December 31, 2012). The decisions of these and all claims involving this issue are suspended owing to the granting of injunctive relief on the Declaration of Constitutionality Action No. 18.

The subsidiary Oxiteno S.A. decided to pay off, within the Decree 58811/2012 amnesty issued by the State of São Paulo, a tax assessment based on alleged undue ICMS credits taken on invoices issued for the symbolic return of raw materials that had previously been delivered to the subsidiary Oxiteno Nordeste for industrialization. The provision in the amount of R\$ 15,364 was paid in April 2013 (R\$ 15,226 as of December 31, 2012).

The subsidiary IPP and its subsidiaries have provisions related to ICMS, mainly with respect to: (a) tax notices filed in connection with interstate sales of fuel to industrial customers without the payment of ICMS in accordance with the interpretation of Article 2 of Supplementary Law No. 87/1996, R\$ 12,563 as of September 30, 2013 (R\$ 11,741 as of December 31, 2012), and (b) payment of ICMS for several reasons that resulted in tax assessments for which the proof of payment is not so evident, R\$ 19,022 as of September 30, 2013 (R\$ 19,499 as of December 31, 2012).

Contingent liabilities

The main tax claims of subsidiary IPP and its subsidiaries classified as having a possible risk of loss, and that have not been recognized in the interim financial information due to this assessment, are related to: (a) the required proportional reversal of ICMS credits recognized on the purchase of ethanol that was later resold at lower prices as a result of PROÁLCOOL, a Federal Government program to encourage alcohol production, determining the anticipation of financial subsidy by the distributors to the mill owners and their subsequent reimbursement by the DNC (current National Oil Agency), R\$ 111,147 as of September 30, 2013 (R\$ 104,086 as of December 31, 2012), (b) alleged undue ICMS credits for which the tax authorities understand that there was no proof of origin, R\$ 29,493 as of September 30, 2013 (R\$ 23,901 as of December 31, 2012), (c) assessments for alleged non-payment of ICMS,

R\$ 24,758 as of September 30, 2013 (R\$ 23,096 as of December 31, 2012), (d) assessment issued in Ourinhos/SP in connection with the return of ethanol loans made with deferred tax, R\$ 39,755 as of September 30, 2013 (R\$ 36,324 as of December 31, 2012), (e) assessments in the State of Rio de Janeiro demanding the reversal of ICMS credits on interstate sales made under Article 33 of ICMS Convention 66/88, which allowed the use of the ICMS credit but was suspended by an injunction granted by STF, R\$ 17,075 as of September 30, 2013 (R\$ 16,060 as of December 31, 2012), (f) ICMS credits taken in relation to bills considered invalid, though the understanding of the STJ (the Brazilian High Court of Justice) is that it is possible to take credit, even if there is defect in the document of the seller, as long as it is confirmed that the transaction occurred, R\$ 27,242 as of September 30, 2013 (R\$ 28,515 as of December 31, 2012); (g) assessments arising from surplus or shortage of inventory, generated by differences in temperature or handling of the product, without the corresponding issuance of invoices, R\$ 41,195 as of September 30, 2013 (R\$ 31,380 as of December 31, 2012), (h) infraction relating to ICMS credits due to alleged non-compliance with legal formalities, R\$ 36,146 as of September 30, 2013 (R\$ 35,032 as of December 31, 2012) and; (i) assessments arising from ICMS credits related to inputs of ethanol from certain States that had granted tax benefits to producers of alcohol in alleged disagreement with the law, R\$ 30,328 as of September 30, 2013 (R\$ 24,662 as of December 31, 2012).

The subsidiary IPP has assessments invalidating the set-off of IPI credits in connection with the purchase of raw materials used in the manufacturing of products which sales are not subject to IPI under the protection of tax immunity. The non-provisioned amount of this contingency, as of September 30, 2013, is R\$ 99,661 (R\$ 81,868 as of December 31, 2012).

Contigent assets

The Company and its subsidiaries have favorable judgments to pay contributions to PIS and COFINS without the changes introduced by Law 9718/1998 in its original version. The ongoing questioning refers to the levy of these contributions on sources of income other than gross revenue. In 2005, the STF (the Brazilian Supreme Federal Court) decided the question in favor of the taxpayers. Although this has set a favorable precedent, the effect of this decision does not automatically apply to all companies, since they must await the formal decision in their own lawsuits. Certain lawsuits of the Company's subsidiaries are currently pending trial and, in the event all such lawsuits are decided in favor of the subsidiaries, the Company estimates that the total positive effect on income before income and social contribution taxes, may reach R\$ 35,876, net of attorney's fees.

c. Civil claims

Provisions

The Company and its subsidiaries maintained provisions for lawsuits and administrative proceedings, mainly derived from contracts entered into with customers and former services providers, as well as proceedings related to environmental issues in the amount of R\$ 94,830 as of September 30, 2013 (R\$ 91,242 as of December 31, 2012).

Contingent liabilities

The subsidiary Cia. Ultragaz is party to an administrative proceeding before CADE (Brazilian antitrust authority) based on alleged anti-competitive practices in the State of Minas Gerais in 2001. The CADE entered a decision against Cia. Ultragaz imposing a penalty of R\$ 23,104. The imposition of such administrative decision was suspended by a court order and its merit is being judicially reviewed. Based on the above elements and on the opinion of its legal counsel, the subsidiary did not recognize a provision for this contingency.

d. Labor matters

Provisions

The Company and its subsidiaries maintained provisions of R\$ 57,688 as of September 30, 2013 (R\$ 44,186 as of December 31, 2012) for labor litigation filed by former employees and by employees of our service providers mainly contesting the non-payment of labor rights.

Contingent liabilities

In 1990, the Petrochemical Industry Labor Union (Sindicatimica), of which the employees of Oxiteno Nordeste and EMCA, companies located in the Camaçari Petrochemical Complex, are members, filed separate lawsuits against the subsidiaries demanding the compliance with the fourth section of the collective labor agreement, which provided for a salary adjustment in lieu of the salary policies practiced. In the same year, a collective labor dispute was also filed by the Union of Employers (SINPEQ) against Sindicatimica, requiring the recognition of the loss of effectiveness of such fourth section. Individual claims were rejected. The collective bargain agreement is currently pending trial by STF. In the second half of 2010, some companies in the Camaçari Petrochemical Complex signed an agreement with Sindicatimica and reported the fact in the collective bargain agreement dispute. Based on the opinion of their legal advisors, that reviewed the latest STF decision in the collective bargain agreement dispute as well as the status of the individual claims involving the subsidiaries Oxiteno Nordeste and EMCA, the management of such subsidiaries believed that it was not necessary to recognize a provision as of September 30, 2013.

The Company and its subsidiaries have other pending administrative and legal proceedings of tax, civil and labor nature, individually less relevant, which were estimated by their legal counsel as possible and/or remote risk (proceedings whose chance of loss is 50% or less), and the related potential losses were not provided for by the Company and its subsidiaries based on these opinions. The Company and its subsidiaries are also litigating for recovery of taxes and contributions, which were not recognized in the interim financial information due to their

contingent nature.

a. ULTRAPREV- Associação de Previdência Complementar

In February 2001, the Company's Board of Directors approved the adoption of a defined contribution pension plan to be sponsored by Company and each of its subsidiaries. Participating employees have been contributing to this plan, managed by Ultraprev - Associação de Previdência Complementar ("Ultraprev"), since August 2001. Under the terms of the plan, every year each participating employee chooses his or her basic contribution to the plan. Each sponsoring company provides a matching contribution in an amount equivalent to each basic contribution, up to a limit of 11% of the employee's reference salary, according to the rules of the plan. As participating employees retire, they may choose to receive either (i) a monthly sum ranging between 0.5% and 1.0% of their respective accumulated fund in Ultraprev or (ii) a fixed monthly amount which will exhaust their respective accumulated fund over a period of 5 to 25 years. The sponsoring company does not guarantee the amounts or the duration of the benefits received by each employee that retires. As of September 30, 2013, the Company and its subsidiaries contributed R\$ 13,196 (R\$ 11,548 as of September 30, 2012) to Ultraprev, which amount is recognized as expense in the income statement. In addition, Ultraprev had 29 former employees receiving benefits under the rules of a previous plan whose reserves are fully constituted.

(1) The EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) presented in this document represents the net income before (i) income and social contribution taxes, (ii) net financial expense (income) and (iii) depreciation and amortization, presented in accordance with ICVM 527. The purpose of including EBITDA information is to provide a measure used by the management for internal assessment of our operating results, and because a portion of our employee profit sharing plan is linked directly or indirectly to EBITDA performance. It is also a financial indicator widely used by investors and analysts to measure our ability to generate cash from operations and our operating performance. We also calculate EBITDA in connection with covenants related to some of our financing, as described in Note 14 to our consolidated financial statements. We believe EBITDA allows a better understanding not only of our financial performance but also of our capacity of meeting the payment of interest and principal from our debt and of obtaining resources for our investments and working capital. Our definition of EBITDA may differ from, and, therefore, may not be comparable with similarly titled measures used by other companies, thereby limiting its usefulness as a comparative measure. Because EBITDA excludes net financial expense (income), income and social contribution taxes and depreciation and amortization, it provides an indicator of general economic performance that is not affected by debt restructurings, fluctuations in interest rates or changes in income and social contribution taxes, depreciation and amortization. EBITDA is not a measure of financial performance under accounting practices adopted in Brazil or IFRS, and it should not be considered in isolation, or as a substitute for net income, as a measure of operating performance, as a substitute for cash flows from operations or as a measure of liquidity. EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that could significantly affect profitability such as financial expense (income), income and social contribution taxes and depreciation and amortization.

The calculation of the EBITDA from the net income is presented below:

“We are very pleased to announce today a period of great achievements, which were made possible by the investments in strengthening and developing our businesses and by a corporate governance structure designed to align interests and to endure the company and its growth. We have reached our 29th consecutive quarter of EBITDA growth, as a result of strong investments in our businesses, in which we have solid foundations to continue in this growth trajectory. In addition, in late September, we opened new opportunities for the company's value creation by signing an agreement with Extrafarma to enter the growing retail pharmacy sector in Brazil, in which we intend to implement a more accelerated expansion plan and obtain cross-benefits with our two specialized distribution and retail businesses – Ipiranga and Ultragas.”

Thilo Mannhardt – CEO

Considerations on the financial and operational information

The financial information presented in this document has been prepared according to International Financial Reporting Standards (IFRS). The financial information of Ultrapar corresponds to the company's consolidated information. The financial information of Ultragaz, Ipiranga, Oxiteno and Ultracargo is reported without elimination of intercompany transactions. Therefore, the sum of such information may not correspond to the consolidated financial information of Ultrapar. In addition, except when otherwise indicated, the amounts presented in this document are expressed in millions of Reais and, therefore, are subject to rounding off. Consequently, the total amounts presented in the tables may differ from the direct sum of the amounts that precede them.

On October 4th, 2012, CVM issued the Instruction No. 527 ("ICVM 527"), which governs the disclosure by listed companies in Brazil of EBITDA — Earnings Before Interest, Taxes, Depreciation and Amortization, and EBIT — Earnings Before Interest and Taxes, for the results disclosed from January 1st, 2013 onwards.

From 2013 onwards, the adoption of IFRS 11 and IAS (International Accounting Standard) 19 became mandatory in the presentation of financial statements of publicly-traded companies, resulting in the following changes: (i) results from joint ventures ("JV") are no longer proportionally consolidated and will be recognized through the equity method and (ii) actuarial gains and losses from post-employment benefits cease to affect the operating results and start to be recognized under shareholders' equity.

In order to provide comparability of financial statements with periods prior to the adoption of the aforementioned accounting changes, the figures presented in this document relating to 2012 have been updated in accordance with ICVM 527, IFRS 11 and IAS 19. EBITDA according to ICVM 527, IFRS 11 and IAS 19 and net earnings according to IAS 19 differ from EBITDA and net earnings previously reported by the company, as shown below:

Highlights

Ø Ultrapar enters into an association agreement with Extrafarma – On September 30th, 2013, Ultrapar entered into an association agreement with Extrafarma, one of Brazil’s ten largest drugstore chains. The association with Extrafarma and its management team marks Ultrapar’s entry into Brazil’s retail pharmacy sector, opening new opportunities for the company’s value creation. Brazilian drugstores’ total revenues, according to IMS Health and ABIHPEC data, exceeded R\$ 60 billion in 2012, with real growth rate of over 10% per year in the last years, and are expected to continue this path of significant growth, mainly due to (i) aging population; (ii) increasing consumer income; (iii) greater access to medicines, especially due to the growing participation of generic drugs; and (iv) growing demand for personal care and beauty products, in addition to the consolidation process in the sector in its initial stage. The association with Ultrapar will allow the acceleration of Extrafarma’s expansion plan through (i) increased investment capacity, (ii) access for drugstore openings in Ipiranga’s service stations and Ultragaz’s resellers, with over 10 thousand retail outlets; and (iii) strengthening of Extrafarma’s experienced retail pharmacy management team, by implementing Ultrapar’s recognized mechanisms of corporate governance, incentives, and alignment of interests. According to the terms of the agreement, Ultrapar and Extrafarma will enter into an incorporaco de aoes (merger of shares), pursuant to which Ultrapar will acquire 100% of the shares of Extrafarma in exchange for up to 2.9% of shares to be issued by Ultrapar to Extrafarma’s shareholders. As a result of the transaction, Extrafarma will become a wholly-owned subsidiary of Ultrapar. The total amount of the transaction is R\$ 1,006 million, consisting of the issuance of up to 16,028,131 shares of Ultrapar and the assumption by Ultrapar of Extrafarma’s net debt of R\$ 106 million as of December 31, 2012. This amount is subject to working capital and net debt adjustments as of the closing date of the transaction. The transaction was approved by the General Superintendence of the Brazilian Antitrust Authority (Conselho Administrativo de Defesa Econmica – CADE) on October 25, 2013 and will be submitted to Ultrapar’s and Extrafarma’s extraordinary general shareholders’ meetings.

Ø Ultrapar receives important awards – Ultrapar was ranked number 1 in “The Best Companies for Shareholders 2013” award (“As Melhores Companhias para os Acionistas 2013”) of Capital Aberto magazine in the category of companies with over R\$ 15 billion of market value, which considers aspects of liquidity and share performance, value creation during the year, corporate governance, and sustainability. In 2012, Ultrapar was ranked number 2 in the Best Companies for Shareholders award, attesting the consistency of its value creation and stock appreciation. Ultrapar was also elected, for the second year in a row, one of the World’s Most Innovative Companies by Forbes. Additionally, Ultrapar stood out in a survey conducted by Institutional Investor magazine for investor relations, including best CFO, IR Manager and IR team by buy-side analyst, and best CFO and IR Manager by sell-side analysts in the segment of Oil, Gas and Petrochemicals in Latin America.

Executive summary of the results

Executive summary of the results

The continuation of a more challenging macroeconomic scenario in the third quarter, including the maintenance of high levels of inflation, contributed to an increase in the base interest rate, which increased from 8.0% p.a. in late June to 9.0% in late September and, more recently, to 9.5% in October. Furthermore, the economic instability environment in the international market persisted and also helped to maintain a weaker Real against the dollar during 3Q13, with an average exchange rate of R\$ 2.29/US\$ in 3Q13 compared to R\$ 2.03/US\$ in 3Q12. The number of light vehicles licensed in 3Q13 was approximately 930 thousand, which represents a decline from 3Q12, given the expectation that the IPI tax collection (tax on industrialized products) would be resumed in that period, what actually occurred in a gradual manner during 2013. The addition of licensed light vehicles in 9M13 totals 2.6 million, which, on annualized basis, would represent a growth in the fleet of approximately 7%.

In 3Q13, Ultragaz reported a 2% growth in sales volume compared to 3Q12, due to an increase of 5% in the bulk segment, mainly resulting from investments in capturing new customers. In 3Q13, Ultragaz's EBITDA increased by 17% compared to 3Q12, thus showing the continuity of the company's earnings recovery plan, mainly as a consequence of commercial initiatives implemented over the last quarters and lower expenses.

At Ipiranga, sales volume increased by 7% in 3Q13 compared to 3Q12, driven mainly by growth in the light vehicle fleet and the investments made in the expansion of the distribution network and related logistics infrastructure. EBITDA reached R\$ 494 million, an increase of 17% compared to 3Q12, mainly due to increased sales volume, notably in the reseller segment, and to the strategy of constant innovation in services and convenience in the service station, generating greater customer satisfaction and loyalty.

At Oxiteno, sales volume reached 193 thousand tons, down 6% from 3Q12, mainly due to lower commodity sales for specialty chemicals inventory buildup, given the 4Q13 scheduled stoppage in the Camaçari petrochemical complex. EBITDA totaled R\$ 146 million in 3Q13, or US\$ 331/ton, up 28% over 3Q12, mainly as a result of the 13% weaker Real and a favorable sales mix in 3Q13.

At Ultracargo, the average storage grew by 13% compared to 3Q12, mainly as a result of the increase in product handling in the Santos and Aratu terminals and the acquisition of Temmar. Ultracargo's EBITDA reached R\$ 42 million in 3Q13, up 6% over 3Q12, mainly due to the increased average storage at the terminals, which was partially offset by extraordinary effects on expenses.

Ultrapar reported consolidated EBITDA of R\$ 765 million in 3Q13, up 17% compared to 3Q12, as a result of the EBITDA growth in all businesses. Net earnings for 3Q13 reached R\$ 328 million, an increase of 13% over 3Q12, as a result of the EBITDA growth.

Operational performance

Ultragaz – In 3Q13, Ultragaz’s sales volume reached 447 thousand tons, up 2% over 3Q12, driven by the 5% growth in the bulk segment as a consequence of investments made to capture new customers, especially in the residential and commercial segments. Compared with 2Q13, sales volume increased by 4%, mainly as a result of the seasonality between periods. In 9M13, Ultragaz’s sales volume totaled 1,274 thousand tons, up 1% over 9M12.

Ultragaz – Sales volume (000 tons)

Ipiranga – Ipiranga’s sales volume totaled 6,492 thousand cubic meters in 3Q13, 7% above 3Q12 volume. In 3Q13, sales volume of fuels for light vehicles (Otto cycle) increased by 11%, due to the growth in the vehicle fleet and investments made in brand conversion and new service stations. The volume of diesel increased by 5% compared with 3Q12, as a result of investments made in the network expansion and the economic growth. Compared with 2Q13, sales volume increased by 6%, mainly due to the seasonality between periods. In 9M13, Ipiranga accumulated sales volume of 18,195 thousand cubic meters, up 6% over 9M12.

Ipiranga – Sales volume (000 m³)

Oxiteno – Oxiteno’s sales volume in 3Q13 totaled 193 thousand tons, down 6% from 3Q12. In the Brazilian market, sales volume decreased by 10% (15 thousand tons), due to lower sales of glycols (a decrease of 17 thousand tons, or 55%), for the purpose of building up specialties inventories in preparation for the 4Q13 scheduled stoppage in the Camaçari petrochemical complex. In the international market, sales volume grew by 6% (3 thousand tons), due to the acquisition of the specialty chemicals plant in Uruguay, partially offset by lower exports of glycols. Compared with 2Q13, sales volume decreased by 7% (14 thousand tons), mainly derived from lower sales of glycols, as a result of the specialty inventory buildup mentioned above. Oxiteno’s sales volume in 9M13 totaled 597 thousand tons, up 4% over 9M12.

Oxitenó – Sales volume (000 tons)

Ultracargo – In 3Q13, Ultracargo's average storage grew by 13% compared to 3Q12, mainly due to the increased product handling in the Santos and Aratu terminals and the acquisition of Temmar from August 2012 onwards. Compared with 2Q13, Ultracargo's average storage increased by 1%. In 9M13, Ultracargo's average storage increased by 15% compared with 9M12.

Ultracargo – Average storage (000 m³)

Economic-financial performance

In 9M13, Ultrapar's net sales and services increased by 13% compared to 9M12, totaling R\$ 44,714 million.

Net sales and services (R\$ million)

Ultragaz – Ultragaz’s net sales and services totaled R\$ 1,050 million in 3Q13, 5% and 4% growth over 3Q12 and 2Q13, respectively, mainly due to increased sales volume and commercial initiatives, including an improved sales mix with greater share of the residential and commercial segments. In 9M13, Ultragaz’s net sales and services reached R\$ 2,975 million, up 3% over 9M12.

Ipiranga – Ipiranga’s net sales and services totaled R\$ 13,912 million in 3Q13, a 14% growth over 3Q12, mainly as a result of (i) increased sales volume, (ii) increases in diesel and gasoline costs by Petrobras, and (iii) improved sales mix, resulting from investments in the service station network expansion, which enabled a higher share of fuels for light vehicles and diesel sold through the reseller segment. Compared with 2Q13, Ipiranga’s net sales and services increased by 5%, mainly derived from higher seasonal volume. In 9M13, Ipiranga’s net sales and services amounted to R\$ 39,071 million, up 14% over 9M12.

Oxitenó – Oxitenó’s net sales and services totaled R\$ 867 million in 3Q13, up 9% over 3Q12, due to the 13% weaker Real and the 3% higher average dollar prices, which benefited from an improved sales mix, partially offset by lower sales volume. Compared with 2Q13, net sales and services increased by 6%, mainly due to the 11% weaker Real, partially offset by lower sales volume. Oxitenó’s net sales and services in 9M13 reached R\$ 2,443 million, up 13% over 9M12.

Ultracargo – Ultracargo’s net sales and services totaled R\$ 89 million in 3Q13, up 16% over 3Q12, mainly due to the increased average storage in its terminals and the acquisition of Temmar from August 2012 onwards. Ultragaz – Ultragaz’s cost of goods sold totaled R\$ 892 million in 3Q13, a 4% growth over 3Q12, mainly as a result of (i) increased sales volume, (ii) the effects of inflation on costs, and (iii) increased requalification of LPG bottles. Compared with 2Q13, the cost of goods sold increased by 4%, mainly as a result of seasonally higher volume. In 9M13, Ultragaz’s cost of goods sold totaled R\$ 2,534 million, up 2% compared to 9M12.

Ipiranga – Ipiranga’s cost of goods sold totaled R\$ 13,108 million in 3Q13, an increase of 14% over 3Q12, due to the growth in sales volume and the cost increases by Petrobras (i) in diesel, in January and March 2013, and (ii) in gasoline, in January 2013. Compared with 2Q13, Ipiranga’s cost of goods sold increased by 5%, mainly due to seasonally higher volume. In 9M13, Ipiranga’s cost of goods sold totaled R\$ 36,769 million, up 14% over 9M12.

Oxitenó – Oxitenó’s cost of goods sold in 3Q13 totaled R\$ 619 million, 1% above 3 that of Q12, mainly due to the effect of the 13% weaker Real on variable costs, partially offset by lower sales volume and a 6% reduction in unit variable costs in dollars. Outlook

Even with the maintenance of a challenging economic environment, we expect to continue the growth trajectory of our results, based on the characteristics of our businesses and the consistent planning and execution of our strategy, reaping benefits from investments made and from the growth of our markets. Ipiranga will continue to capture the benefits from the growth of the vehicle fleet in Brazil and the expansion in the North, Northeast and Midwest regions of the country, through investments in the expansion of its distribution network and related logistics infrastructure. Additionally, Ipiranga will intensify its differentiation initiatives, based on increasing the offer of products, services and convenience to its customers. Oxiteno will keep capturing benefits from the completion and maturing process of investments made in capacity expansion in Brazil, now in a more favorable exchange rate environment, in addition to focusing on its international expansion plan, with investments underway in the United States and in Mexico, and the implementation of the business plan of the acquisition in Uruguay. Ultracargo will continue to focus on capturing the benefits from the capacity expansions of its terminals and from the acquisition of the terminal in the port of Itaquí, which strengthened its operating scale, and will remain attentive for opportunities derived from the growing demand for liquid bulk storage in Brazil. At Ultragaz, the benefits from the recent investments in capturing new customers and the constant focus on managing costs and expenses will contribute to the earnings progression. In addition, in the next months, we expect to complete the transaction with Extrafarma, integrating it from 1Q14 onwards, and to start our expansion plan in the retail pharmacy sector.
