Dual Listed Companies Structure and Basis of Preparation of Financial Statements

Merger terms

On 29 June 2001, BHP Billiton Limited (previously known as BHP Limited), an Australian listed company, and BHP Billiton Plc (previously known as Billiton Plc), a UK listed company, entered into a Dual Listed Companies (DLC) merger. This was effected by contractual arrangements between the Companies and amendments to their constitutional documents.

The effect of the DLC merger is that BHP Billiton Limited and its subsidiaries (the BHP Billiton Limited Group) and BHP Billiton Plc and its subsidiaries (the BHP Billiton Plc Group) operate together as a single economic entity (the BHP Billiton Group), with neither assuming a dominant role. Under the arrangements:

the shareholders of BHP Billiton Limited and BHP Billiton Plc have a common economic interest in both Groups;

the shareholders of BHP Billiton Limited and BHP Billiton Plc take key decisions, including the election of Directors, through a joint electoral procedure under which the shareholders of the two Companies effectively vote on a joint basis;

BHP Billiton Limited and BHP Billiton Plc have a common Board of Directors, a unified management structure and joint objectives;

dividends and capital distributions made by the two Companies are equalised; and

BHP Billiton Limited and BHP Billiton Plc each executed a deed poll guarantee, guaranteeing (subject to certain exceptions) the contractual obligations (whether actual or contingent, primary or secondary) of the other incurred after 29 June 2001 together with specified obligations existing at that date.

If either BHP Billiton Limited or BHP Billiton Plc proposes to pay a dividend to its shareholders, then the other Company must pay a matching cash dividend of an equivalent amount per share to its shareholders. If either Company is prohibited by law or is otherwise unable to declare, pay or otherwise make all or any portion of such a matching dividend, then BHP Billiton Limited or BHP Billiton Plc will, so far as it is practicable to do so, enter into such transactions with each other as the Boards agree to be necessary or desirable so as to enable both Companies to pay dividends as nearly as practicable at the same time.

The DLC merger did not involve the change of legal ownership of any assets of BHP Billiton Limited or BHP Billiton Plc, any change of ownership of any existing shares or securities of BHP Billiton Limited or BHP Billiton Plc, the issue of any shares or securities or any payment by way of consideration, save for the issue by each Company of one special voting share to a trustee company which is the means by which the joint electoral procedure is operated. In addition, to achieve a position where the economic and voting interests of one share in BHP Billiton Limited and one share in BHP Billiton Plc were identical, BHP Billiton Limited made a bonus issue of ordinary shares to the holders of its ordinary shares.

Treatment of the DLC merger for accounting purposes

In accordance with the Australian Securities and Investments Commission (ASIC) Practice Note 71 Financial Reporting by Australian Entities in Dual-Listed Company Arrangements, and an order issued by ASIC under section 340 of the Corporations Act 2001 on 2 September 2002, this annual financial report presents the financial results of the BHP Billiton Group as follows:

Results for the years ended 30 June 2005 and 30 June 2004 are of the combined entity including both BHP Billiton Limited and its subsidiaries and BHP Billiton Plc and its subsidiaries;

Results are presented in US dollars unless otherwise stated; and

Results of the single parent entity, BHP Billiton Limited, are presented in note 48 to the financial statements.

The full single parent entity financial statements of BHP Billiton Limited are available on the Company's website (www.bhpbilliton.com) and are available to shareholders on request, free of charge.

BHP Billiton Limited Financial Statements 2005

Table of Contents

Notes to Financial Statements

1 Statement of accounting policies

The financial report has been prepared as a general purpose financial report which complies with the requirements of the Corporations Act 2001, Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board and Urgent Issues Group Consensus Views.

Basis of accounting

Subject to the exceptions noted in the paragraphs below dealing with valuation of property, plant and equipment, the financial report is drawn up on the basis of historical cost principles.

The accounting policies have been consistently applied by all entities in the BHP Billiton Group and are consistent with those applied in the prior year.

Principles of consolidation

The financial report of the BHP Billiton Group includes the combination of BHP Billiton Limited, BHP Billiton Plc and their respective subsidiaries. Subsidiaries are entities controlled by either parent entity. Control generally exists where the parent owns a majority of voting rights in the subsidiary. The financial statements of subsidiaries are included in the consolidated financial statements from the date control commences until the date control ceases.

Where the BHP Billiton Group's interest is less than 100 per cent, the share attributable to outside shareholders is reflected in outside equity interests. The effects of all transactions between entities within the BHP Billiton Group have been eliminated.

Currency of presentation

All amounts are expressed in US dollars unless otherwise stated.

Intangible assets

Amounts paid for identifiable (patents, trademarks and licences) and unidentifiable (goodwill) intangible assets are capitalised and then amortised on a straight-line basis over the expected periods of benefit. Goodwill is amortised over its useful life, not exceeding 20 years, and unamortised balances are reviewed at each balance date to assess the probability of continuing future benefits.

On the subsequent disposal or termination of a previously acquired business, the profit or loss on disposal or termination is calculated after charging the amount of the unamortised balance of any goodwill capitalised.

Investments accounted for using the equity method

Investments in joint venture and associated entities are accounted for using the equity method of accounting. Under the equity method, the cost of the investment in joint venture and associated entities is adjusted by the BHP Billiton Group's proportionate share of the joint venture entity's net profit or loss.

Joint ventures

Joint venture entities

A joint venture entity is an entity in which the BHP Billiton Group holds a long-term interest and which is jointly controlled by the BHP Billiton Group and one or more other venturers. Decisions regarding the financial and operating policies essential to the activities, economic performance and financial position of that venture require the consent of each of the venturers that together jointly control the entity.

Joint venture operations

The BHP Billiton Group has certain contractual arrangements with other participants to engage in joint activities where all significant matters of operating and financial policy are determined by the participants such that the operation itself has no significant independence to pursue its own commercial strategy. These contractual arrangements do not create a joint venture entity due to the fact that these policies are those of the participants, not a separate entity carrying on a trade or business of its own.

The financial statements of the BHP Billiton Group include its share of the assets, liabilities and cash flows in such joint venture operations, measured in accordance with the terms of each arrangement, which is usually pro-rata to the BHP Billiton Group's interest in the joint venture operations.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

1 Statement of accounting policies continued

Foreign currencies

The BHP Billiton Group's reporting and dominant functional currency is US dollars as this is the principal currency in which BHP Billiton Group companies operate.

Transactions denominated in foreign currencies (currencies other than the functional currency of the entity) are recorded using the exchange rate ruling at the date of the transaction or, if hedged forward, at the rate of exchange under the related forward currency contract. Monetary assets and liabilities denominated in foreign currencies are translated using the rate of exchange ruling at the Statement of Financial Position date and the gains or losses on retranslation are included in the Statement of Financial Performance, with the exception of foreign exchange gains or losses on foreign currency provisions for site restoration and rehabilitation which are capitalised in property, plant and equipment, and foreign exchange gains and losses on foreign exchange currency borrowings designated as a hedge of foreign currency net assets of self-sustaining operations.

Statements of Financial Performance of subsidiaries and joint venture operations which have functional currencies other than US dollars are translated to US dollars at average rates for the relevant reporting period, other than significant items which are translated at the rate at the date of the transaction. Assets and liabilities are translated at exchange rates prevailing at the relevant Statement of Financial Position date. Exchange variations resulting from the retranslation at closing rate of the net investment in such subsidiaries and joint venture operations, together with differences between their Statements of Financial Performance translated at average and closing rates, are shown as a movement in the exchange fluctuation account. Exchange differences arising on long-term foreign currency borrowings used to finance such investments, together with any related taxation effects, are also shown as a movement in the exchange fluctuation account. The balance of the exchange fluctuation account relating to a foreign operation that is disposed of, or partially disposed of, is transferred to retained profits in the year of disposal.

Sales revenue

Revenue from the sale of goods and disposal of other assets is recognised when persuasive evidence, usually in the form of an executed sales agreement, of an arrangement exists indicating there has been a transfer of risks and rewards to the customer, no further work or processing is required by the BHP Billiton Group, the quantity and quality of the goods has been determined with reasonable accuracy, the price is fixed or determinable, and collectibility is reasonably assured. This is generally when title passes.

In the majority of sales for most commodities, sales agreements specify that title passes on the bill of lading date, which is the date the commodity is delivered to the shipping agent. Revenue is recognised on the bill of lading date. For certain sales (principally coal sales to adjoining power stations and diamond sales), title passes and revenue is recognised when the goods have been delivered.

In cases where the terms of the executed sales agreement allow for an adjustment to the sales price based on a survey of the goods by the customer (for instance an assay for mineral content), recognition of sales revenue is based on the most recently determined estimate product specifications.

Revenue is not reduced for royalties and other taxes payable from production.

Exploration, evaluation and development expenditure

Development expenditure, including deferred overburden removal costs, for both minerals and petroleum activities is capitalised.

In respect of minerals, exploration and evaluation expenditure is predominantly charged to the Statement of Financial Performance as incurred, in limited circumstances such expenditure is capitalised when:

it is expected that the expenditure will be recouped by future exploitation or sale; and

substantial exploration and evaluation activities have identified a mineral resource with sufficient certainty that permits a reasonable assessment of the existence of commercially recoverable reserves.

BHP Billiton Limited Financial Statements 2005

Table of Contents

Notes to Financial Statements continued

1 Statement of accounting policies continued

In respect of petroleum, exploration and evaluation expenditure is accounted for in accordance with the successful efforts method on an area-of-interest basis where:

significant exploration licence acquisition costs are capitalised and amortised over the term of the licence, except for costs in new unexplored areas which are expensed as incurred;

administrative costs that are not directed to a specific area-of-interest are expensed in the year in which they are incurred;

all other exploration and evaluation expenditure is charged against the Statement of Financial Performance except where the expenditure relates to an area-of-interest and it is expected that the expenditure will be recouped by future exploitation or sale, or, at Statement of Financial Position date exploration and evaluation activities have not reached a stage which permits a reasonable assessment of the existence of commercially recoverable reserves, in which case the expenditure is capitalised as property, plant and equipment;

exploratory wells that find oil or gas in an area requiring major capital expenditure before production can begin are continually evaluated to assure that commercial quantities of reserves have been found or that additional exploration work is underway or planned. To the extent it is considered that the relevant expenditure will not be recovered, it is written off; and

when proved reserves of oil or gas are determined and development is sanctioned and completed, the relevant expenditure, together with related development expenditure, is amortised on a unit of production basis.

Deferred overburden removal costs

Stripping ratios are a function of the quantity of ore mined compared with the quantity of overburden, or waste, required to be removed to mine the ore. Deferral of costs to the Statement of Financial Position is made, where appropriate, when actual stripping ratios vary from average stripping ratios. Deferral of costs to the Statement of Financial Position is not made where ore is expected to be evenly distributed.

Costs, which have previously been deferred to the Statement of Financial Position (deferred overburden removal costs), are included in the Statement of Financial Performance on a units of production basis utilising average stripping ratios. Changes in estimates of average stripping ratios are accounted for prospectively from the date of the change.

As it is not possible to separately identify cash inflows relating to deferred overburden removal costs, such assets are grouped with other assets of an operation for the purposes of undertaking impairment assessments, where necessary, based on future cash flows for the operation as a whole.

Research and development expenditure

Expenditure for research is included in the Statement of Financial Performance as incurred on the basis that continuing research is part of the overall cost of being in business. To the extent that future benefits deriving from development expenditure are expected beyond any reasonable doubt to exceed such expenditure, these costs are capitalised and amortised over the period of expected benefit.

Borrowing costs

Borrowing costs are generally expensed as incurred except where they relate to the financing of construction or development of assets requiring a substantial period of time to prepare for their intended future use. Borrowing costs are capitalised up to the date when the asset is ready for its intended use. The amount of borrowing costs capitalised (gross of tax) for the period is determined by applying the interest rate applicable to appropriate borrowings outstanding during the period to the average amount of accumulated expenditure for the assets during the period.

BHP Billiton Limited Financial Statements 2005

Table of Contents

Notes to Financial Statements continued

1 Statement of accounting policies continued

Property, plant and equipment

Valuation in financial statements

Property, plant and equipment has been recorded at cost.

Recoverable amounts of non-current assets

All non-current assets are reviewed at least annually to determine whether their carrying amounts require write-down to recoverable amounts. Assets are reviewed more regularly if an event or change in circumstances indicates that the carrying amount of an asset may not be recoverable. If the asset is determined to be impaired, an impairment loss will be recorded and the asset written down, based on the amount by which the asset carrying amount exceeds the higher of net realisable value and estimated recoverable amount. Estimated recoverable amount is determined by discounting expected future cash flows using a risk-adjusted pre-tax discount rate appropriate to the risks inherent in the asset. Future cash flows are estimated based on expected production and sales volumes, commodity prices (considering current and historical prices, price trends and related factors), recoverable reserves, operating costs, reclamation costs and capital costs. These estimates are subject to risk and uncertainty, hence there is a possibility that changes in circumstances will alter these projections, which may impact the recoverability of these assets.

Current values of land and buildings

The current value of land is determined mainly by reference to rating authority valuations or cost for recent acquisitions, except where land is an integral part of a producing asset with no significant value beyond such use, in which case book value is used. The current value of buildings is based primarily on depreciated replacement value. Buildings which are integral parts of producing plant are classified as plant and equipment and accordingly excluded from this valuation.

Disposals

Disposals are taken to account in profit/(loss) from ordinary activities. Where they represent the sale or abandonment of a significant business or all of the assets associated with such a business, they are treated as significant items.

Mineral rights

Mineral rights acquired by the BHP Billiton Group are accounted for at cost with provisions made where impairments in value have occurred. Exploitable mineral rights are capitalised and depreciated from commencement of production over the production life of the asset.

Mineral leases

The BHP Billiton Group's mineral leases are of sufficient duration (or convey a legal right to renew for sufficient duration) to enable all reserves on the leased properties to be mined in accordance with current production schedules.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

1 Statement of accounting policies continued

Depreciation of property, plant and equipment

The carrying amount of property, plant and equipment (including the original capital expenditure and any subsequent capital expenditure) is depreciated to its estimated residual value over the useful economic lives of the specific assets concerned or the life of the mine or lease, if shorter. The major categories of property, plant and equipment are depreciated on a units of production and/or straight-line basis as follows:

Buildings	25 to 50 years straight-line
Freehold land	not depreciated
Plant, machinery and equipment	4 to 30 years straight-line
Mineral rights	based on the estimated life of reserves on a units of production basis
Exploration, evaluation and development expenditure of minerals assets and other mining assets	over the life of the proven and probable reserves on a units of production basis
Petroleum interests	over the life of the proved developed oil and gas reserves on a units of production basis
Leasehold land and buildings	over the life of the lease up to a maximum of 50 years
Vehicles	3 to 5 years straight-line
Capitalised leased assets	up to 50 years or life of lease, whichever is shorter
Computer systems	up to 8 years straight-line

Changes in estimates are accounted for over the estimated remaining economic life or the remaining commercial reserves as applicable.

Leased assets

Assets held under leases which result in the BHP Billiton Group receiving substantially all the risks and rewards of ownership of the asset (finance leases) are capitalised as property, plant and equipment at the estimated present value of the minimum lease payments.

The corresponding finance lease obligation is included within interest bearing liabilities. The interest element is allocated to accounting periods during the lease term to reflect a constant rate of interest on the remaining balance of the obligation for each accounting period.

Operating lease assets are not capitalised and rental payments are generally included in the Statement of Financial Performance on a straight-line basis over the lease term. Provision is made for future operating lease payments in relation to surplus lease space when it is first determined that the space will be of no probable future benefit.

Operating lease incentives are recognised as a liability when received and subsequently reduced by allocating lease payments between rental expense and the liability.

Other financial assets

Non-current other financial assets are stated individually at cost less provision for impairments.

Current other financial assets are recorded at the lower of cost and net realisable value and dividends are included in the Statement of Financial Performance on a receivable basis. Interest is included in the Statement of Financial

Performance on an accrual basis. In determining net realisable values, market values are used in the case of listed investments and Directors estimates are used in the case of unlisted investments.

Inventories

Inventories, including work in progress, are valued at the lower of cost and net realisable value. Cost is determined primarily on the basis of average costs. In some cases, the first-in-first-out method or actual cost is used. For processed inventories, cost is derived on an absorption costing basis. Cost comprises cost of purchasing raw materials and cost of production, including attributable mining and manufacturing overheads.

BHP Billiton Limited Financial Statements 2005

Table of Contents

Notes to Financial Statements continued

1 Statement of accounting policies continued

Taxation

Tax-effect accounting is applied in respect of income tax and resource rent tax. Deferred tax liabilities, the provision for resource rent tax (non-current liabilities) and deferred tax assets (non-current assets) represent the tax effect of timing differences which arise from the recognition in the financial statements of items of revenue and expense in periods different to those in which they are assessable or allowable for income tax or resource rent tax purposes. Income taxes have not been provided on undistributed overseas earnings of controlled entities to the extent the earnings are intended to remain indefinitely invested in those entities.

Deferred tax is not recognised on the difference between the carrying amounts and fair value of non-monetary assets arising on acquisitions or purchased fixed assets which have subsequently been revalued unless there is a binding agreement to sell such an asset and the gain or loss expected to arise has been recognised.

Future income tax and capital gains tax benefits in respect of losses incurred by BHP Billiton Group companies together with carried forward resource rent tax benefits are included in the Statement of Financial Performance where realisation of the benefits is considered to be virtually certain. In so doing it is recognised that the realisation of the benefits will depend upon:

- (a) an expectation that legislation will not change in a manner which would adversely affect the ability of the companies concerned to realise the benefits;
- (b) the ability of the companies concerned to comply with the conditions for deductibility imposed by law; and
- (c) the ability of the companies concerned to derive future assessable income of a nature and of sufficient amount to enable the benefits to be realised, or to transfer tax losses to related companies.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply when the timing differences are expected to reverse.

Capital gains tax, if applicable, is provided for in establishing period income tax expense when an asset is sold.

Tax consolidation

During the year ended 30 June 2004, the Group elected to consolidate its Australian subsidiaries under the Australian tax consolidation regime, as introduced by the Australian Federal Government.

As a consequence, and in accordance with Urgent Issues Group Abstract 52, the head entity in each of the tax consolidated groups recognises current and deferred tax amounts relating to transactions, events and balances of the wholly-owned Australian controlled entities in that group as if those transactions, events and balances were its own, in addition to the current and deferred tax amounts arising from its own transactions, events and balances. Entities within a tax consolidated group enter into a tax sharing agreement and tax contribution agreement with the head entity of each tax consolidated group. Amounts receivable or payable under a tax sharing and contribution agreement with the tax consolidated entities are recognised separately as tax-related amounts receivable or payable. Expenses and revenues arising under the tax contribution agreement are recognised as a component of income tax expense or revenue.

Upon initial implementation, the deferred tax balances in relation to a wholly-owned entity joining each tax consolidated group are measured as if it were a stand alone entity and essentially this method of calculating the contribution requires calculation of the tax as if the entity had not been a member of the tax consolidated group, with one exception. The deferred tax balances relating to assets that have their tax values reset on joining a tax consolidated group are remeasured based on the carrying amount of those assets at a tax consolidated group level and their reset tax values. The remeasurement adjustments to these deferred tax balances are recognised in the consolidated financial statements as income tax expense or revenue.

Provision for employee benefits

Provision is made in the financial statements for all employee benefits, including on-costs. In relation to industry-based long service leave funds, the BHP Billiton Group's share of receivables and payables, including obligations for funding shortfalls, have been recognised.

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave expected to be settled within 12 months of the reporting date are recognised in other creditors or provision for employee benefits in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non-accumulating sick leave are recognised when the leave is taken and measured at the rates paid or payable.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued****1 Statement of accounting policies continued**

The liability for long service leave expected to be settled within 12 months of the reporting date is recognised in the provision for employee benefits and is measured in accordance with annual leave above. The liability for long service leave expected to be settled more than 12 months from the reporting date is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Employee share awards

The estimated cost of share awards made by the BHP Billiton Group is charged to the Statement of Financial Performance over the period from grant date to the date of expected vesting (where there are no performance hurdles) or the performance period, as appropriate. The accrued employee entitlement is recorded as an equal credit to the Employee Share Awards reserve. The estimated cost of awards is based on the market value of shares at the grant date (in the case of Long Term Incentive Plan Performance Shares, Group Incentive Scheme Performance Shares, Performance Rights, the Bonus Equity Plan, the Restricted Share Scheme and Co-Investment Plan) or the intrinsic value of options awarded (being the difference between the exercise price and the market price at the date of granting the award), adjusted to reflect the impact of performance conditions, where applicable.

Where awards are satisfied by on-market purchases, the cost of acquiring the shares is carried in the Employee Share Awards reserve, and any difference between the cost of awards and the consideration paid to purchase shares on-market is transferred to retained earnings when the shares vest to the employees unconditionally. In addition, the assets and liabilities of Employee Share Ownership Plan trusts utilised by the BHP Billiton Group to hold shares for employee remuneration schemes are consolidated.

Superannuation, pensions and other post-retirement benefits

The BHP Billiton Group operates or participates in a number of pension (including superannuation) schemes throughout the world. The funding of the schemes complies with local regulations. The assets of the schemes are generally held separately from those of the BHP Billiton Group and are administered by trustees or management boards. For schemes of the defined-contribution type or those operated on an industry-wide basis, where it is not possible to identify assets attributable to the participation by the BHP Billiton Group's employees, the pension charge is calculated on the basis of contributions payable.

For defined benefit schemes, the cost of providing pensions is charged to the Statement of Financial Performance so as to allocate the cost systematically over the employees' service lives on the basis of independent actuarial advice. This is consistent with the principles of the UK Statement of Standard Accounting Practice (SSAP) 24 Accounting for Pension Costs. This basis of measurement takes into account the performance of scheme assets and changes in the funded status of each scheme, to the extent that deficits represent a legal or constructive obligation of the Group to its employees and that surpluses are recoverable by the Group over the expected remaining service lives of employees. A pension liability or asset is consequently recognised in the Statement of Financial Position to the extent that the contributions payable either lag or precede expense recognition. The liability or asset therefore represents those funding deficits or surpluses together with changes in the funding status of the schemes that will be recognised in the Statement of Financial Performance in future periods.

Certain BHP Billiton Group companies provide post-retirement medical benefits to qualifying employees. In some cases the benefits are provided through medical care schemes to which the company, the employees, the retirees and covered family members contribute. In some schemes there is no funding of the benefits before retirement. For the unfunded schemes and for funded schemes, where it is possible to identify assets that are attributable to current and future retirees of the BHP Billiton Group companies, the cost of providing the post-retirement benefits is charged to the Statement of Financial Performance so as to allocate the cost systematically over the employees' service lives on the basis of independent actuarial advice, in a manner similar to that applied for defined benefit pension schemes. For other funded schemes the charge to the Statement of Financial Performance is calculated on the basis of premiums

payable.

Provision for restoration and rehabilitation

BHP Billiton Group companies are generally required to restore mines, oil and gas facilities and processing sites, either during or at the end of their producing lives to a condition acceptable to the relevant authorities and consistent with the BHP Billiton Group's environmental policies.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

1 Statement of accounting policies continued

The expected cost of any approved decommissioning or restoration programme, discounted to its net present value, is provided when the related environmental disturbance occurs, based on the BHP Billiton Group's interpretation of environmental and regulatory requirements and its own environmental policies where these are more stringent and this has created an obligation on the BHP Billiton Group. The cost is capitalised where it gives rise to future benefits, whether the rehabilitation activity is expected to occur over the life of the operation or at the time of closure. The capitalised cost is amortised over the life of the operation and the increase in the net present value of the provision is included in borrowing costs. Expected decommissioning and restoration costs are based on the estimated current cost of detailed plans prepared for each site. Where there is a change in the expected decommissioning and restoration costs, an adjustment is recorded against the carrying value of the provision and any related asset, and the effect is then recognised in the Statement of Financial Performance on a prospective basis over the remaining life of the operation. The provisions referred to above do not include any amounts related to remediation costs associated with unforeseen circumstances. Such costs are recognised where environmental contamination as a result of oil and chemical spills, seepage or other unforeseen events give rise to a loss which is probable and reliably estimable.

The cost of other activities to prevent and control pollution and to rehabilitate the environment that is not included in provisions is charged to the Statement of Financial Performance as incurred.

Financial instruments

The BHP Billiton Group is exposed to changes in interest rates, foreign currency exchange rates and commodity prices and, in certain circumstances, uses derivative financial instruments (including cash settled commodity contracts) to hedge these risks.

When undertaking risk mitigation transactions, hedge accounting principles are applied, whereby derivatives are matched to the specifically identified commercial risks being hedged. These matching principles are applied to both realised and unrealised transactions. Derivatives undertaken as hedges of anticipated transactions are recognised when such transactions are recognised. Upon recognition of the underlying transaction, derivatives are valued at the appropriate market spot rate.

When an underlying transaction can no longer be identified, gains or losses arising from a derivative that has been designated as a hedge of that transaction will be included in the Statement of Financial Performance whether or not such derivative is terminated.

When a hedge is terminated, the deferred gain or loss that arose prior to termination is:

- (a) deferred and included in the measurement of the anticipated transaction when it occurs; or
- (b) included in the Statement of Financial Performance where the anticipated transaction is no longer expected to occur.

The premiums paid on interest rate options and foreign currency put and call options are included in other assets and are deferred and included in the settlement of the underlying transaction.

Use of estimates

The preparation of the BHP Billiton Group's financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported revenue and costs during the period. On an ongoing basis, management evaluates its estimates and judgements in relation to assets, liabilities, contingent liabilities, revenue and costs. Management bases its estimates and judgements on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Rounding of amounts

Amounts in this financial report have, unless otherwise indicated, been rounded to the nearest million dollars.

Comparatives

Where applicable, comparatives have been adjusted to disclose them on a comparable basis with current period figures. Amounts owing to joint venture participants of US\$196 million at 30 June 2004 were reclassified from current payables to current interest bearing liabilities to better reflect the funding nature of these amounts.

Total by Customer Sector Group	(134)	104	(30)

Sale of equity interest in North West Shelf Project

During the year ended 30 June 2005, BHP Billiton sold an equity participation in the North West Shelf (NWS) Project to China National Offshore Oil Corporation (CNOOC). CNOOC purchased an interest in a new joint venture that is being established within the NWS Project to supply LNG to the Guangdong LNG Project in China. CNOOC will acquire title to approximately 5.8 per cent of current NWS Project gas reserves and rights to process its gas and associated LPG and condensate through NWS venture offshore and onshore infrastructure. CNOOC paid each joint venture partner US\$59 million resulting in a profit on sale of US\$56 million (no tax effect).

Sale of Laminaria and Corallina

In January 2005, the Group disposed of its interest in the Laminaria and Corallina oil fields to Paladin Resources plc. Proceeds on the sale were US\$130 million resulting in a profit before tax of US\$134 million (US\$10 million tax expense).

Disposal of Chrome operations

Effective 1 June 2005, BHP Billiton disposed of its economic interest in the majority of its South African chrome business to the Kermas Group. The total proceeds on the sale were US\$421 million, resulting in a profit of US\$127 million (US\$1 million tax expense) in accordance with Australian GAAP. In addition, the Group sold its interest in the Palmiet chrome business to Mogale Alloys in May 2005 for proceeds of US\$12 million, resulting in a profit of US\$15 million (US\$5 million tax expense).

The BHP Billiton share of profit before tax on disposal of the Chrome operations is US\$90 million (US\$4 million tax expense), whilst the minority interest in the profit after tax of the disposal was US\$50 million.

Restructuring provisions

The Group is required to record a charge against earnings in respect of restructuring certain operations. This totalled US\$79 million (US\$56 million after tax) and related to a charge of US\$50 million (US\$15 million tax benefit) in respect of restructuring associated with the acquisition of WMC in June 2005 primarily relating to redundancy and termination costs, office closures and termination of previous contractual arrangements and a charge of US\$29 million (US\$8 million tax benefit) for other restructurings, primarily for redundancies at Ingwe (South Africa).

Provision for termination of operations

The Group decided to decommission the Boodarie Iron (Australia) operations and a charge of US\$266 million (US\$80 million tax benefit) relating to termination of the operation was recognised. The charge primarily relates to settlement of existing contractual arrangements, plant decommissioning, site rehabilitation, redundancy and other closure related costs/charges associated with the closure.

Closure plans

As part of the Group's regular review of decommissioning and site restoration plans, the Group reassessed plans in respect of certain closed operations. A total charge of US\$121 million (US\$104 million after tax) was recorded and included a charge of US\$73 million (US\$21 million tax benefit) for closed mines at Ingwe (South Africa) in relation to revision of the Group's assessed rehabilitation obligation, predominantly resulting from revised water management plans and a charge of US\$48 million (US\$4 million tax expense) in relation to other closed mining operations.

Introduction of tax consolidation regime in Australia

During the year ended 30 June 2004, BHP Billiton elected to consolidate its Australian subsidiaries under the Australian tax consolidation regime, as introduced by the Australian Federal Government. Under the transitional rules, the Group chose to reset the tax cost base of certain depreciable assets which will result in additional tax depreciation over the lives of these assets. This resulted in the restatement of deferred tax balances and a tax benefit of US\$267 million being recorded in accordance with Urgent Issues Group Abstract 52.

Litigation settlement

In December 2003, BHP Billiton announced that it was part of a consortium that had reached a settlement with Dalmine SpA with respect to a claim brought against Dalmine in April 1998. The claim followed the failure of an underwater pipeline installed in 1994 in the Liverpool Bay area of the UK continental shelf. As a result of the settlement, BHP Billiton recorded a gain of US\$66 million, before tax expense of US\$18 million.

US and Canadian taxation deductions

During the year ended 30 June 2004, the level of certainty regarding potential benefits arising from prior period taxation deductions and foreign tax credits available in the US and Canada increased to the extent that some of the provisions against deferred tax assets established in prior years were no longer necessary. This was a result of higher income generation, changes in legislation and effective utilisation of tax credits during the year, along with increasing confidence regarding the ability to realise benefits in the future. Accordingly, the Group recorded a tax benefit of US\$238 million.

Closure plans

During the year ended 30 June 2004, the Group refined its plans in relation to certain closed operations. In relation to the Group's Southwest Copper business in the US, this resulted in a charge of US\$425 million resulting from a re-estimation of short-term closure costs and the inclusion of residual risks, longer-term water management and other costs, and an increase in the residual value of certain assets. Additionally, at other closed sites a charge of US\$109 million (before a tax benefit of US\$22 million) was recorded, mainly in relation to the Island Copper mine, the Newcastle Steelworks and the Selbaie copper mine. Accordingly, the Group has recorded a net after-tax loss of US\$512 million. Refer note 29.

Notes to Financial Statements continued

3 Acquired operations

On 3 June 2005 the BHP Billiton Group obtained control of WMC Resources Ltd (WMC) with acceptance for 76.25 per cent of the equity shares. On 17 June the BHP Billiton Group had acquired more than 90 per cent of the equity shares in WMC, which triggered the compulsory acquisition of all remaining shareholdings. Payment for 100 per cent ownership was completed on 2 August. WMC was acquired for a total cash consideration of US\$7 229 million made up of a price of A\$7.85 per share plus acquisition related costs.

WMC was one of Australia's leading resource companies. WMC's major assets are:

the Olympic Dam copper/uranium/gold mine and related treatment plants located in South Australia;

an integrated nickel mining, refining and smelting business with operations in Western Australia;

The Queensland Fertilizer Operation (QFO) which consists of an integrated phosphate mine and ammonium phosphate fertiliser production facility; and

the Corridor Sands mineral sands project in Mozambique.

Olympic Dam produces copper, uranium, gold and silver. It is the fourth largest copper reserve, the fourth largest gold reserve and the largest uranium reserve in the world, and is the largest underground mine in Australia. Olympic Dam consists of an underground mine and a mineral processing plant, smelter and refinery with associated supporting infrastructure. Copper and uranium sales are the major revenue stream for Olympic Dam. Gold and silver are also mined and sold. Uranium oxide concentrate is sold under long-term contracts with major international power companies.

The WMC nickel operations consist of ore treatment facilities at Kambalda, mining and milling operations at Mt Keith and Leinster, a nickel smelter in Kalgoorlie and a refinery in Kwinana. WMC purchases nickel ore from a variety of mines for processing through the treatment facility at Kambalda. Kambalda concentrate is transported to the nickel smelter at Kalgoorlie. Mt Keith is a large open-cut mine where ore is mined and the concentrate transported to Leinster for drying. Leinster comprises both underground and open-cut mines as well as treatment and drying facilities. Blended concentrate from Leinster and Mt Keith is transported to the smelter. The smelter processes the concentrate received and produces nickel matte, of which the majority is further processed at the Kwinana refinery to produce high purity nickel briquettes, nickel powder and other nickel intermediate products. The nickel concentrate, matte and metal production is exported to Asia, Europe and North America and is principally used in making stainless steels.

WMC's fertiliser operations consists of QFO, which is an ammonium phosphate manufacturing facility with distribution and marketing operations, and a one-third investment in Hi-Fert, which distributes and markets fertiliser products. QFO produces and markets di-ammonium phosphate and mono-ammonium phosphate. The QFO includes a sulphuric acid plant at Mt Isa, a mining operation and fertiliser plant at Phosphate Hill and storage and port facilities at Townsville. The finished product is distributed in Australia by Incitec Pivot, Hi-Fert, Summitt and Impact, and by Cargill internationally under a marketing agreement. Hi-Fert procures, markets and distributes all major fertilisers into eastern Australia and is the second largest distributor to that region. Hi-Fert owns patented coating technology that it uses to provide value-added products including zinc and sulphur-coated products.

WMC's Corridor Sands mineral sands project is located in Mozambique and is expected to culminate in an integrated mining, concentration and smelting operation to produce titanium dioxide slag. Titanium dioxide feedstocks are used to produce pigments, titanium metal and other specialist products.

BHP Billiton expects the acquisition of WMC to provide a number of benefits. These include the following:

WMC's nickel business comprises an outstanding set of assets, in terms of operating capability, country risk, scale and environmental standards, which complements BHP Billiton's existing nickel business. The combined business will have a range of operations, products and technologies that will provide a robust and flexible platform for further growth.

BHP Billiton now operates two of the world's four largest copper deposits. BHP Billiton's track record in developing and operating Escondida, the world's largest copper mine, will allow the Group to maximise the value of the large, long-life Olympic Dam resource base.

BHP Billiton is now a major producer of uranium with the largest resource base in the world. Uranium is an important energy source in an increasingly energy intensive world. Not only is this valuable on a stand-alone basis, but it complements BHP Billiton's existing energy portfolio of oil, gas and coal.

BHP Billiton can maximise synergies in the nickel and copper business, marketing and other corporate functions. BHP Billiton will eliminate duplicate functions by using the proven systems and processes that were successfully used following the BHP Billiton merger in 2001.

Table of Contents**Notes to Financial Statements continued**

3 Acquired operations continued

The following table details the fair value of the net assets acquired:

	Book value US\$M	Adjustment for accounting policies US\$M	Provisional fair value adjustments US\$M	Provisional fair value value US\$M
Cash assets	396			396
Receivables	444		(162)	282
Inventories	520	(21)	116	615
Investments accounted for using the equity method	33		(8)	25
Property, plant and equipment	4 428		2 708	7 136
Other assets	84		(1)	83
Current liabilities	(477)	(5)	35	(447)
Non-current liabilities	(1 454)	(42)	452	(1 044)
Net assets acquired	3 974	(68)	3 140	7 046
Goodwill				183
Total cost of acquisition				7 229
Total cost of acquisition satisfied by the following consideration:				
Cash paid				6 594
Cash payable				635
				7 229

The book values included in the table above are the Australian dollar values of WMC assets and liabilities acquired converted to US dollars at the acquisition day rate of 0.7556.

Due to the complexity and timing of this acquisition, the fair values currently established are provisional and are subject to review during the year ended 30 June 2006.

The material provisional fair value adjustments principally relate to:

Property, plant and equipment reflecting the fair value of mineral assets, together with revaluation of property, plant and equipment representing replacement cost and estimated remaining useful lives;

Investments have been revalued to reflect current market values;

An upward revaluation of inventory balances held at Olympic Dam and nickel operations. This is a result of the fair value principles applying where the fair value is broadly defined as selling prices less costs to sell, less a reasonable profit margin for the selling effort of the acquirer. Essentially this results in a sales price being applied to value inventory as opposed to the cost recorded in the acquirer's balance sheet. As a result of this treatment,

sales margins have been recognised in advance of the inventory being sold external to the Group. When the inventory on hand at the date of acquisition is subsequently sold external to the Group, effectively no margin will be realised;

Debtors and creditors have been revalued to reflect the expected timing and amount of settlements. External fixed rate debt and derivative financial instruments have been revalued to reflect current market terms. Deferred gains and losses relating to commodity price and foreign currency hedging arrangements have been de-recognised;

Provisions include the recognition of accumulated unfunded pension liabilities; and

Deferred tax asset and liability balances have been adjusted to take into account revised fair values for book purposes and resetting of tax bases as a result of the acquisition, where applicable. Deferred tax balances relating to tax losses have been adjusted where it is not virtually certain that the Group will be able to utilise the losses.

BHP Billion Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

3 Acquired operations continued

A number of the revaluation adjustments have resulted in policy alignment with BHP Billiton accounting policies and relate to:

BHP Billiton policy in respect of decommissioning, site restoration and environmental rehabilitation provisions requires that the present value of estimated future costs of rehabilitation of operating sites is capitalised where it gives rise to future benefits and amortised over the life of the operation. Additional provisions have been raised in accordance with this policy.

Under BHP Billiton's accounting policies, mined ore stocks held underground are not recorded as inventory until the ore is brought above ground. Accordingly, underground stocks held by WMC at the date of acquisition have been adjusted to a value of nil.

At the date of acquisition, the application of BHP Billiton policy will result in WMC adopting the US dollar as the functional currency for the majority of its operations. The provisional fair values for non-monetary items in US dollars included in the table above will represent the acquisition historical rate for WMC by BHP Billiton. The treatment of foreign currencies is detailed in the Accounting Policies section of these financial statements.

Since the acquisition, WMC cash flows have contributed US\$16 million to the Group's net operating cash flows, US\$50 million to net investing cash outflows and US\$2 million to net financing cash inflows.

The unaudited Summarised Statement of Financial Performance of WMC for the period 1 January 2005 to 3 June 2005 prepared in accordance with the accounting policies applicable to WMC for that period prior to acquisition by BHP Billiton were as follows:

Summarised Statement of Financial Performance for the period 1 January 2005 to 3 June 2005

	US\$M
Revenue from ordinary activities	1 322
Profit from ordinary activities before income tax	394
Income tax expense attributable to ordinary activities	(108)
Net profit	286
Net exchange differences recognised directly to equity	2
Total changes in equity other than those resulting from transactions with owners	288

The amounts included in the table above are the Australian dollar values converted to US dollars at an average rate for the period of A\$1 = US\$0.7739.

Statement of Financial Performance for the year ended 31 December 2004

For the year ended 31 December 2004, WMC reported an audited post-tax profit of A\$1 327 million (US\$977 million) prepared in accordance with the accounting policies used by WMC for the financial year to 31 December 2004.

Borrowing costs charged against net profit from ordinary activities	499	490

(a) Interest has been capitalised at the rate of interest applicable to the specific borrowings financing the assets under construction or, where financed through general borrowings, at a capitalisation rate representing the average borrowing cost of the Group's interest bearing liabilities. The capitalisation rate was 4.6 per cent (2004: 4.6 per cent).

(b) Exchange differences primarily

represent the effect on borrowings of the movement in the South African rand against the US dollar.

Factors that may affect future tax charges

The BHP Billiton Group operates in many countries across the world, each with separate taxation authorities which results in significant complexity. At any point in time there are tax computations which have been submitted but not agreed by those tax authorities and matters which are under discussion between Group companies and the tax authorities. The Group provides for the amount of tax it expects to pay taking into account those discussions and professional advice it has received. Whilst conclusion of such matters may result in amendments to the original computations, the Group does not believe that such adjustments will have a material adverse effect on its financial position, though such adjustments may be significant to any individual year's Statement of Financial Performance. Those countries where tax rates are higher than the UK tax rate of 30 per cent include Canada (approximately 36 per cent), Colombia (37 per cent), Chile (effective rate of 35 per cent), South Africa (effective rate of approximately 37 per cent) and the US (35 per cent). Furthermore, petroleum operations in the UK are subject to an additional 10 per cent tax above the ordinary UK tax rate of 30 per cent.

The BHP Billiton Group's subsidiaries generally have tax balances denominated in currencies other than US dollars. Where the subsidiary has a US dollar functional currency, any adjustments on translation of such balances will be taken to the tax charge for the period. The level of such adjustments in future years is dependent upon future movements in exchange rates relative to the US dollar.

As at 30 June 2005, the BHP Billiton Group has not recognised a potential tax expense of US\$516 million (2004: US\$255 million; 2003: US\$240 million), which mainly relates to the tax impact of unrealised foreign exchange gains and losses on US dollar net debt held by subsidiaries which maintain local currency records for tax purposes. The tax expense will be recognised when such gains and losses are realised for tax purposes.

BHP Billiton Limited Financial Statements 2005

Table of Contents

Notes to Financial Statements continued

9 Income tax continued

In June 2005, the Australian Taxation Office (ATO) issued assessments against BHP Billiton subsidiary BHP Billiton Finance Ltd in respect of the 2000, 2001 and 2002 financial years. The assessments relate to the deductibility of bad debts in respect of funding Australian subsidiary company operations. The assessments are for primary tax of US\$444 million and interest (net of tax) and penalties of US\$284 million. In August 2005, the ATO advised it will be issuing further flow on amended assessments for subsidiaries which received related loss transfers from BHP Billiton Finance Ltd involving primary tax of approximately US\$118 million and interest (net of tax) and penalties of US\$76 million.

Objections are being lodged against all assessments. As at 30 June 2005 the total amount in dispute relating to loans to subsidiaries which undertook the Beenup, Boodarie Iron and Hartley projects is approximately US\$963 million including accrued interest on unpaid amounts (after tax). An amount of US\$414 million has been paid pursuant to ATO disputed assessments guidelines, of which US\$368 million was paid in July 2005. Upon any successful challenge of the assessments, any sums paid will be refundable with interest.

The Group has taken legal advice and remains confident of its position and intends to vigorously defend the claims.

Tax losses and timing differences

At 30 June 2005, the BHP Billiton Group has ordinary tax losses and capital losses of approximately US\$3 591 million (2004:

US\$2 535 million), and gross timing differences of US\$2 025 million (2004: US\$1 586 million) which have not been tax effected. The Group recognises tax losses to the extent that it expects to earn virtually certain future profits that can absorb those losses.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued****10 Segment results**

The BHP Billiton Group has grouped its major operating assets into the following Customer Sector Groups (CSGs):

Petroleum (exploration for and production, processing and marketing of hydrocarbons including oil, gas and LNG);

Aluminium (exploration for and mining of bauxite, processing and marketing of aluminium and alumina);

Base Metals (exploration for and mining, processing and marketing of copper, silver, zinc, lead and copper by-products including gold);

Carbon Steel Materials (exploration for and mining, processing and marketing of coking coal, iron ore and manganese);

Diamonds and Specialty Products (EKATI diamond mine, titanium operations, fertilisers, exploration and technology activities);

Energy Coal (exploration for and mining, processing and marketing of steaming coal); and

Stainless Steel Materials (exploration for and mining, processing and marketing of chrome and nickel).

Net unallocated interest represents the charge to profit of debt funding to the BHP Billiton Group.

Group and unallocated items represent Group centre functions and certain comparative data for divested assets and investments.

It is the Group's policy that inter-segment sales are made on a commercial basis.

Dividends are stated net of amounts which are not payable outside the BHP Billiton Group under the terms of the share repurchase scheme and ESOP trusts.

- (a) BHP Billiton Limited dividends per American Depositary Share (ADS) for 2005 were 46.0 US cents per share (2004: 33.0 US cents per share). BHP Billiton Plc dividends per ADS for 2005 were 46.0 US cents per share (2004: 33.0 US cents per share). Each ADS represents two ordinary shares.
- (b) BHP Billiton dividends for all periods presented

are fully franked.

- (c) 5.5 per cent dividend on 50 000 preference shares of £1 each (2004: 5.5 per cent).
- (d) Subsequent to year end on 24 August 2005, BHP Billiton declared a final dividend of 14.5 US cents per share fully franked (2004: 9.5 US cents per share on 18 August 2004) which will be paid on 28 September 2005 (2004: 22 September 2004). The final dividend has not been provided for at 30 June 2005. The final dividend not provided at 30 June 2004 is presented as a 2005 dividend in notes 33 and 35.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

11 Dividends continued

For the purposes of AASB 1034 Financial Reports Presentation and Disclosures, the Group had an adjusted franking account balance of US\$328 million (on a tax paid basis) at 30 June 2005. It is anticipated that dividends payable in the following year will be fully franked.

12 Earnings per share

	2005	2004
Basic earnings per share (US cents)	98.1	54.7
Diluted earnings per share (US cents)	97.6	54.5
Basic earnings per ADS (US cents) ^(a)	196.2	109.4
Diluted earnings per ADS (US cents) ^(a)	195.2	109.0
Basic earnings (US\$ million)	6 009	3 403
Diluted earnings (US\$ million)	6 012	3 403

The weighted average number of shares used for the purposes of calculating diluted earnings per share reconciles to the number used to calculate basic earnings per share as follows:

	2005	2004
	Million	Million
Weighted average number of shares ^(b)		
Basic earnings per share denominator	6 124	6 218
Shares and options contingently issuable under employee share ownership plans	34	28
Diluted earnings per share denominator	6 158	6 246

(a) Each American Depository Share (ADS) represents two ordinary shares.

(b) Under the terms of the DLC merger, the rights to dividends of a holder of an ordinary share in BHP Billiton Plc and a holder of an ordinary share in BHP Billiton Limited are identical. Consequently, earnings per share have been

calculated on the basis of the aggregate number of ordinary shares ranking for dividend. The weighted average number of shares used for the purposes of calculating basic earnings per share is calculated after deduction of the shares held by the share repurchase scheme and the Group's ESOP trusts.

13 Receivables (current)

	2005 US\$M	2004 US\$M
Trade receivables	2 527	2 018
<i>deduct</i> Provision for doubtful debts	(4)	(4)

Term deposits	32	6
Other investments	180	161
Total book value of not quoted securities ^{(a)(b)}	212	167
Total current other financial assets	212	167

(a) Not quoted securities include US\$167 million (2004: US\$153 million) held by the Ingwe, Selbaie and Rio Algom Environmental Trust Funds. The future realisation of these investments is intended to fund environmental obligations relating to the eventual closure of Ingwe s, Selbaie s and Rio Algom s mines. Consequently these investments,

whilst under the BHP Billiton Group control, are not available for the general purposes of the BHP Billiton Group. All income from these investments is reinvested or spent to meet these obligations. The BHP Billiton Group retains responsibility for these environmental obligations until such time as the former mine sites have been rehabilitated in accordance with the relevant environmental legislation. These obligations are therefore included under non-current provisions. Refer note 29.

- (b) Not quoted securities include US\$13 million (2004: US\$14 million) relating to the BHP Billiton Group's self-insurance arrangements. These investments are held for the benefit of the BHP Billiton Group but are not available for the

general purposes
of the BHP
Billiton Group.

- (a) The proportion of voting power held corresponds to ownership interest.
- (b) Richards Bay Minerals comprises two legal entities, Tisand (Pty) Limited and Richards Bay Iron and Titanium (Pty) Limited of which the BHP Billiton Group's effective ownership interest is 51 per cent (2004: 51 per cent) and 49.45 per cent (2004: 49.45 per cent) respectively. In accordance with the shareholder agreement between the BHP Billiton Group

and Rio Tinto (which owns the shares of Tisand (Pty) Limited and Richards Bay Iron and Titanium (Pty) Limited not owned by the BHP Billiton Group), Richards Bay Minerals functions as a single economic entity. The overall profit of Richards Bay Minerals is shared equally between the venturers.

- (c) Includes various immaterial joint venture and associated entities.
- (d) Effective January 2005, the BHP Billiton Group sold its interest in Integris Metals Inc for US\$202 million. In 2005, the share of net profit of investments accounted for using the equity method included the results of the Group's 50 per cent interest in Integris Metals Inc up until the date of sale. This includes revenue of

US\$523 million,
 expenses of
 US\$499 million,
 profit before
 income tax of
 US\$24 million
 and income tax
 expense of
 US\$7 million.

Table of Contents

Notes to Financial Statements continued

29 Other provisions and liabilities (non-current) continued

(d) The BHP Billiton Group's activities are subject to various national, regional, and local laws and regulations governing the protection of the environment. Furthermore, the BHP Billiton Group has a policy of ensuring that reclamation is planned and financed from the early stages of any operation. Provision is made for the reclamation of the BHP Billiton Group's mining and processing facilities along with the decommissioning of oil platforms and infrastructure associated with petroleum activities. The estimation of the cost of future reclamation and decommissioning activities is subject to potentially significant uncertainties. These uncertainties include the legal and regulatory framework, the

magnitude of possible contamination, and the timing and extent of reclamation and decommissioning activities required.

Accordingly, whilst the provisions at 30 June 2005 represent the best estimate of the future costs required, these uncertainties are likely to result in future actual expenditure differing from the amounts provided at this time.

These reclamation and decommissioning expenditures are mostly expected to be paid over the next 30 years. The provisions for reclamation and decommissioning are derived by discounting the expected expenditures to their net present value. The estimated total site rehabilitation cost (undiscounted and in today's dollars) to be incurred in the future arising from operations to date, and including

amounts already provided for, is US\$6 284 million (2004: US\$5 402 million).

At 30 June 2005, US\$2 475 million (2004: US\$1 702 million) was provided for reclamation and decommissioning costs relating to operating sites in the provision for site rehabilitation. In addition, the BHP Billiton Group has certain obligations associated with maintaining and/or remediating closed sites. At 30 June 2005, US\$1 109 million (2004: \$1 081 million) was provided for closed sites. The amounts provided in relation to closed sites are reviewed at least annually based upon the facts and circumstances available at the time and the provisions are updated accordingly. Adjustments to the provisions in relation to these closed sites are recognised in profit and loss during the period

in which the adjustments are made with US\$121 million included as a significant item in the current year (2004: US\$534 million; 2003: US\$ nil). In addition to the uncertainties associated with the closure activity noted above, uncertainty remains over the extent and costs of the required short-term closure activities, the extent, cost and timing of post-closure monitoring and, in some cases, longer-term water management. Also, certain of the closure activities are subject to legal dispute and depending on the ultimate resolution of these matters the final liability could vary. The BHP Billiton Group believes that it is reasonably possible that, due to the nature of the closed site liabilities and the degree of uncertainty which surrounds them, these liabilities could be in the

order of 30 per cent (2004: 35 per cent) greater or in the order of 20 per cent lower than the US\$1 109 million provided at year end. The main closed site to which this total amount relates is Southwest Copper in the US and this is described in further detail below, together with a brief description of other closed sites.

*Southwest
Copper, Arizona,
US*

The Southwest Copper operations comprised several mining and smelting operations and associated facilities, much of which had been operating for many years prior to the BHP Billiton Group acquiring the operation in 1996. In 1999 the facilities were effectively placed on a care and maintenance basis, pending evaluation of various alternative strategies to realise maximum

value from the respective assets. The BHP Billiton Group announced the closure of the San Manuel mining facilities, and the San Manuel plant facilities in 2002 and 2003 respectively.

A comprehensive review of closure plans conducted in the prior year indicated (a) higher short-term closure costs, due to changes in the nature of closure work required in relation to certain facilities, particularly tailings dams and waste and leach dumps; (b) a need for costs, such as water management and environmental monitoring, to continue for a longer period; and, (c) an increase in the residual value of certain assets. The closure provisions for Southwest Copper, including amounts in relation to Pinal Creek litigation, total US\$731 million at 30 June 2005 (2004:

US\$771 million).

In relation to Pinal Creek, BHP Copper Inc (BHP Copper) is involved in litigation concerning groundwater contamination resulting from historic mining operations near the Pinal Creek/Miami Wash area located in the State of Arizona.

In 1994, Roy Wilkes and Diane Dunn initiated a toxic tort class action lawsuit in the Federal District Court for the District of Arizona. In September 2000, the Court approved settlement reached between the parties for a non-material amount, and the terms of the settlement are now being implemented as a monitoring programme.

A State consent decree (the Decree) was approved by the Federal District Court for the District of

Arizona in August 1998. The Decree authorises and requires groundwater remediation and facility-specific source control activities, and the members of the Pinal Creek Group (which consists of BHP Copper, Phelps Dodge Miami Inc and Inspiration Consolidated Copper Co) are jointly liable for performing the non-facility specific source control activities. Such activities are currently ongoing. As of 30 June 2005 the BHP Billiton Group has provided US\$110 million (30 June 2004: US\$102 million) for its anticipated share of the planned remediation work, based on a range reasonably foreseeable up to US\$138 million (30 June 2004: US\$138 million), and the BHP Billiton Group has paid out US\$50 million up to 30 June 2005. These amounts are based on the provisional equal

allocation of costs among the three members of the Pinal Creek Group. BHP Copper is seeking a judicial restatement of the allocation formula to reduce its share, based upon its belief, supported by relevant external legal and technical advice, that its property has contributed a smaller share of the contamination than the other parties' properties. BHP Copper is contingently liable for the whole of these costs in the event that the other parties are unable to pay.

BHP Billiton Limited Financial Statements 2005

Table of Contents**Notes to Financial Statements continued**

29 Other provisions and liabilities (non-current) continued

BHP Copper and the other members of the Pinal Creek Group filed a contribution action in November 1991 in the Federal District Court for the District of Arizona against former owners and operators of the properties alleged to have caused the contamination. The claim is for an undetermined amount but under current state and federal laws applicable to the case, BHP Copper should recover a significant percentage of the total remediation costs from the Defendants, based upon their operations' proportionate contributions to the total contamination in the Pinal Creek drainage basin. Such action seeks recovery from these historical owners and operators for remediation and source control costs. BHP Copper's predecessors in interest have asserted a counterclaim in this action seeking indemnity from BHP Copper based upon their interpretation of the historical transaction documents relating to the succession in interest of the parties. BHP Copper has also filed suit against a number of insurance carriers seeking to recover under various insurance policies for remediation, response, source control and other costs noted above incurred by BHP Copper. The reasonable assessment of recovery in the various insurances cases has a range from US\$4 million to approximately US\$15 million, depending on many factors. Neither insurance recoveries nor other claims or offsets have been recognised in the financial statements and will not be recognised until such offsets are considered virtually certain of realisation.

Other closed sites

The closure provisions for other closed sites total US\$378 million at 30 June 2005 (2004: US\$310 million). The key sites covered by this amount are described briefly below.

Newcastle Steelworks - the BHP Billiton Group closed its Newcastle Steelworks in 1999 and retains responsibility for certain sediment in the Hunter River adjacent the former steelworks site, together with certain other site remediation activities in the Newcastle area.

Island Copper - the BHP Billiton Group ceased operations at its Island Copper mine in December 1995 and has responsibility for various site reclamation activities, including the long-term treatment of the pit lake and water management.

Selbaie copper mine - the BHP Billiton Group closed its Selbaie copper mine in January 2004 and has responsibility for site reclamation and remediation activities.

Rio Algom - the BHP Billiton Group has responsibility for long-term remediation costs for various closed mines and processing facilities in Canada and the US operated by Rio Algom Ltd prior to its acquisition by the former Billiton Plc in October 2000.

Ingwe Collieries - the BHP Billiton Group has responsibility for site reclamation and remediation activities, including the long-term management of water leaving mining properties, for closed mines within the Ingwe operations.

Roane - the BHP Billiton Group ceased operations at Roane chrome in 1982. A review of the closure plans during the year identified a need for additional remediation costs.

Closure provisions for other closed sites have been increased in the current period mainly due to refinements of closure plans at the Selbaie copper mine, Ingwe Collieries, Roane chrome and several other smaller sites. These increases resulted from a number of causes, including (a) a reassessment during the period of water management issues and (b) a comprehensive risk valuation completed during the period in relation to sites which closed during the last two years where closure activities have now commenced.

(a) On 23
November 2004,

the BHP Billiton Group completed an off-market share buy-back of 180 716 428 BHP Billiton Limited shares. In accordance with the structure of the buy-back, US\$296 million was allocated to the contributed equity of BHP Billiton Limited. The final price for the buy-back was A\$12.57 per share, representing a discount of 12 per cent to the volume weighted average price of BHP Billiton Limited shares over the five days up to and including the closing date of the buy-back.

- (b) 210 000 (2004: 690 000) shares paid to A\$1.36 and nil (2004: 240 000) shares paid to A\$1.40 were converted to fully paid during 2005. There were no partly paid shares issued during the year (2004: nil). Including bonus shares, 347 018 (2004: 1 035 048) shares were issued on conversion of

these partly paid shares. 70 000 (2004: 190 000) partly paid shares are entitled to 79 928 (2004: 216 936) bonus shares on becoming fully paid. As a consequence of the BHP Steel demerger, an instalment call of A\$0.69 per share was made on partly paid shares which was then immediately replaced by the application of the capital reduction.

- (c) Each of BHP Billiton Limited and BHP Billiton Plc issued one Special Voting Share to facilitate joint voting by shareholders of BHP Billiton Limited and BHP Billiton Plc on Joint Electoral Actions.
- (d) The number of shares issued on exercise of options after 7 July 2001 includes bonus shares. Refer note 31.
- (e) During the period 1 July 2005 to 8 September 2005, no Executive Share Scheme

partly paid shares were paid up in full, 1 373 575 fully paid ordinary shares (including attached bonus shares) were issued on the exercise of Employee Share Plan Options, no fully paid ordinary shares (including attached bonus shares) were issued on the exercise of Performance Share Plan Performance Rights and no fully paid ordinary shares were issued on the exercise of Group Incentive Scheme awards.

- (f) Under UK Companies Act 1985, BHP Billiton Plc has share capital with a par value of US\$0.50. Total capital subscribed by shareholders less capital returned to shareholders is included as contributed equity and includes US\$518 million (2004: US\$518 million) of premium on the issue of

shares.

- (g) During the year ended 30 June 2004, 3 890 000 ordinary shares (US\$20 million) of BHP Billiton Plc, which were held as part of the BHP Billiton Plc share repurchase scheme, were transferred to a Group ESOP trust. Refer note 32.
- (h) Preference shares have the right to repayment of the amount paid up on the nominal value and any unpaid dividends in priority to the holders of any other class of shares in BHP Billiton Plc on a return of capital or winding up. The holders of preference shares have limited voting rights if payment of the preference dividends are six months or more in arrears or a resolution is passed changing the rights of the preference shareholders. Since the merger these shares have been held by

JPMorgan plc.

- (i) An Equalisation Share has been authorised to be issued to enable a distribution to be made by BHP Billiton Plc to the BHP Billiton Limited Group should this be required under the terms of the DLC merger. The Directors have the ability to issue the Equalisation Share if required under those terms. The Constitution of BHP Billiton Limited allows the Directors of that Company to issue a similar Equalisation Share.
