JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Note 1. Organization and Summary of Significant Accounting Policies

Organization

The accompanying unaudited consolidated financial statements include the accounts of Jefferies Group, Inc. and all its subsidiaries (together, we or us), including Jefferies & Company, Inc. (Jefferies), Jefferies Execution Services, Inc., (Jefferies Execution), Jefferies International Limited, Jefferies Asset Management, LLC, Jefferies Financial Products, LLC and all other entities in which we have a controlling financial interest or are the primary beneficiary, including Jefferies High Yield Holdings, LLC (JHYH), Jefferies Special Opportunities Partners, LLC (JSOP) and Jefferies Employees Special Opportunities Partners, LLC (JESOP). The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S generally accepted accounting principles for complete financial statements. All adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six months ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. These unaudited consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2008.

On April 21, 2008, we issued 26,585,310 shares of common stock and made a cash payment to Leucadia National Corporation (Leucadia) of approximately $100 million. In exchange, we received from Leucadia 10,000,000 common shares of Leucadia. During the second quarter of 2008, we sold the 10,000,000 common shares of Leucadia and thus realized approximately $433.6 million in net cash from the issuance of our shares.

Reclassifications

Certain reclassifications have been made to previously reported balances to conform to the current presentation.

We adopted FASB 160, *Noncontrolling Interests in Consolidated Financial Statements an Amendment of ARB No. 51* (FASB 160), on January 1, 2009. Prior to the adoption of FASB 160, we reported minority interest within liabilities on our Consolidated Statements of Financial Condition and in earnings (loss) of consolidated subsidiaries in the determination of net earnings (loss). We now present noncontrolling interests within stockholders equity, separately from our own equity. We have recast certain prior financial statements to retrospectively reflect the adoption of FASB 160. See Note 10 for further discussion on the adoption of FASB 160.

In addition, these recast financial statements reflect the retrospective application of FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1), adopted on January 1, 2009. Under FSP EITF 03-6-1, net earnings are allocated among common shareholders and participating securities based on their right to share in earnings. The adoption of FSP EITF 03-6-1 reduced previously reported Diluted EPS. See Note 14 to these financial statements for an explanation of the calculation of earnings per share under FSP EITF 03-6-1.

Summary of Significant Accounting Policies

Principles of Consolidation

Our policy is to consolidate all entities in which we own more than 50% of the outstanding voting stock and have control. In addition, in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46(R), *Consolidation of Variable Interest Entities* (FIN 46(R)), as revised, we consolidate entities which lack characteristics of an operating entity or business for which we are the primary beneficiary. Under FIN 46(R), the primary beneficiary is the party that absorbs a majority of the entity s expected losses, receives a majority of its

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

expected residual returns, or both, as a result of holding variable interests, direct or implied. In situations where we have significant influence but not control of an entity that does not qualify as a variable interest entity, we apply the equity method of accounting or fair value accounting. We also have formed nonconsolidated investment vehicles with third-party investors that are typically organized as partnerships or limited liability companies. We act as general partner or managing member for these investment vehicles and have generally provided the third-party investors with termination or kick-out rights as defined by Emerging Issues Task Force (EITF) EITF Issue No. 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights*.

All material intercompany accounts and transactions are eliminated in consolidation.

Revenue Recognition

Commissions. All customer securities transactions are reported on the Consolidated Statements of Financial Condition on a settlement date basis with related income reported on a trade-date basis. Under clearing agreements, we clear trades for unaffiliated correspondent brokers and retain a portion of commissions as a fee for our services. Correspondent clearing revenues are included in other revenue. We permit institutional customers to allocate a portion of their gross commissions to pay for research products and other services provided by third parties. The amounts allocated for those purposes are commonly referred to as soft dollar arrangements. Soft dollar expenses amounted to $8.0 million and $10.7 million for the three months ended June 30, 2009 and 2008, respectively, and $15.1 million and $20.3 million for the six months ended June 30, 2009 and 2008, respectively. We account for the cost of these arrangements on an accrual basis. Our accounting policy for commission revenues incorporates the guidance contained in Emerging Issues Task Force (EITF) Issue No. 99-19, *Reporting Revenues Gross versus Net*, because we are not the primary obligor of such arrangements, and accordingly, expenses relating to soft dollars are netted against the commission revenues.

Principal Transactions. Financial instruments owned, securities pledged and financial instruments sold, but not yet purchased (all of which are recorded on a trade-date basis) are carried at fair value with unrealized gains and losses reflected in principal transactions in the Consolidated Statements of Earnings on a trade date basis, except for unrealized gains and losses on financial instruments held by consolidated asset management entities, which are presented in asset management fees and investment income (loss) from managed funds.

Investment Banking. Underwriting revenues and fees from mergers and acquisitions, restructuring and other investment banking advisory assignments are recorded when the services related to the underlying transaction are completed under the terms of the assignment or engagement. Expenses associated with such assignments are deferred until reimbursed by the client, the related revenue is recognized or the engagement is otherwise concluded. Expenses are recorded net of client reimbursements. Revenues are presented net of related unreimbursed expenses. Unreimbursed expenses with no related revenues are included in business development in the Consolidated Statements of Earnings. Reimbursed expenses totaled approximately $1.9 million and $4.3 million for the three months ended June 30, 2009 and 2008, respectively, and approximately $2.7 million and $7.6 million for the six months ended June 30, 2009 and 2008, respectively.

Asset Management Fees and Investment Income (Loss) From Managed Funds. Asset management fees and investment income (loss) from managed funds include revenues we receive from management, administrative and performance fees from funds managed by us, revenues from management and performance fees we receive from third-party managed funds and investment income (loss) from our investments in these funds. We receive fees in connection with management and investment advisory services performed for various funds and managed accounts. These fees are based on the value of assets under management and may include performance fees based upon the performance of the funds. Management and administrative fees are generally recognized over the period that the related service is provided based upon the beginning or ending net asset value of the relevant period. Generally, performance fees are earned when the return on assets under management exceeds certain benchmark returns, high-

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

water marks or other performance targets. Performance fees are accrued on a monthly basis and are not subject to adjustment once the measurement period ends (annually) and performance fees have been realized.

Interest Revenue and Expense. We recognize contractual interest on financial instruments owned and financial instruments sold, but not yet purchased, on an accrual basis as a component of interest revenue and expense. Interest flows on derivative trading transactions and dividends are included as part of the fair valuation of these contracts in principal transactions in the Consolidated Statements of Earnings and are not recognized as a component of interest revenue or expense. We account for our short-term, long-term borrowings and our mandatorily redeemable convertible preferred stock on an accrual basis with related interest recorded as interest expense. In addition, we recognize interest revenue related to our securities borrowed and securities purchased under agreements to resell activities and interest expense related to our securities loaned and securities sold under agreements to repurchase activities on an accrual basis.

Cash Equivalents

Cash equivalents include highly liquid investments not held for resale with original maturities of three months or less.

Cash and Securities Segregated and on Deposit for Regulatory Purposes or Deposited With Clearing and Depository Organizations

In accordance with Rule 15c3-3 of the Securities Exchange Act of 1934, Jefferies & Company, Inc., as a broker-dealer carrying client accounts, is subject to requirements related to maintaining cash or qualified securities in a segregated reserve account for the exclusive benefit of its clients. In addition, certain financial instruments used for initial and variation margin purposes with clearing and depository organizations are recorded in this caption.

Foreign Currency Translation

Assets and liabilities of foreign subsidiaries having non-U.S. dollar functional currencies are translated at exchange rates at the end of a period. Revenues and expenses are translated at average exchange rates during the period. The gains or losses resulting from translating foreign currency financial statements into U.S. dollars, net of hedging gains or losses and taxes, if any, are included in other comprehensive income (loss). Gains or losses resulting from foreign currency transactions are included in principal transactions in the Consolidated Statements of Earnings.

Financial Instruments Owned and Financial Instruments Sold, not yet Purchased and Fair Value

Financial instruments owned and financial instruments sold, not yet purchased are recorded at fair value, either through the fair value option election or as required by other accounting pronouncements. These instruments primarily represent our trading activities and include both cash and derivative products. Realized and unrealized gains and losses are recognized in principal transactions in our Consolidated Statements of Earnings. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price).

Fair Value Hierarchy

FASB 157, *Fair Value Measurements* (FASB 157), defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the inputs used to measure fair value and enhances disclosure requirements for fair value measurements. FASB 157 maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs reflect our assumptions that market participants would use in pricing the asset or

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the transparency of inputs as follows:

Level 1: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level 2: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these financial instruments include cash instruments for which quoted prices are available but traded less frequently, derivative instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level 3: Instruments that have little to no pricing observability as of the reported date. These financial instruments are measured using management s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

Valuation Process for Financial Instruments

Financial instruments are valued at quoted market prices, if available. For financial instruments that do not have readily determinable fair values through quoted market prices, the determination of fair value is based upon consideration of available information, including types of financial instruments, current financial information, restrictions on dispositions, fair values of underlying financial instruments and quotations for similar instruments. Certain financial instruments have bid and ask prices that can be observed in the marketplace. For financial instruments whose inputs are based on bid-ask prices, mid-market pricing is applied and adjusted to the point within the bid-ask range that meets our best estimate of fair value. For offsetting positions in the same financial instrument, the same price within the bid-ask spread is used to measure both the long and short positions.

The valuation process for financial instruments may include the use of valuation models and other techniques. Adjustments to valuations (such as counterparty, credit, concentration or liquidity) derived from valuation models may be made when, in management s judgment, either the size of the position in the financial instrument in a nonactive market or other features of the financial instrument such as its complexity, or the market in which the financial instrument is traded require that an adjustment be made to the value derived from the models. An adjustment may be made if a financial instrument is subject to sales restrictions that would result in a price less than the quoted market price. Adjustments from the price derived from a valuation model reflect management s judgment that other participants in the market for the financial instrument being measured at fair value would also consider in valuing that same financial instrument and are adjusted for assumptions about risk uncertainties and market conditions. Results from valuation models and valuation techniques in one period may not be indicative of future period fair value measurements.

Cash products Where quoted prices are available in an active market, cash products are classified in Level 1 of the fair value hierarchy and valued based on the quoted price, primarily quoted exchange prices. Level 1 cash products are highly liquid instruments and include listed equity and money market securities and G-7 government and agency securities. Cash products classified within Level 2 of the fair value hierarchy are based primarily on broker quotations, pricing service data from external providers and prices for actual executed market transactions. If quoted market prices are not available for the specific security then fair values are estimated by using pricing models, quoted prices of cash products with similar characteristics or discounted cash flow models. Examples of cash products classified within Level 2 of the fair value hierarchy are corporate, convertible and municipal bonds, agency and non-agency mortgage-backed securities and to-be-announced (TBA) securities. If there is limited transaction activity or less transparency to observe market-based inputs to valuation models, cash products presented at fair value are

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

classified in Level 3 of the fair value hierarchy. Fair values of cash products classified in Level 3 are generally based on an assessment of each underlying investment, cash flow models, market data of any recent comparable company transactions and trading multiples of companies considered comparable to the instrument being valued and incorporate assumptions regarding market outlook, among other factors. Cash products in this category include illiquid equity securities, equity interests in private companies, auction rate securities, commercial loans, private equity and hedge fund investments, distressed debt instruments and Alt-A and subprime non-agency mortgage-backed securities as little external price information is currently available for these products. For distressed debt instruments, commercial loans and loan commitments, loss assumptions must be made based on default scenarios and market liquidity and prepayment assumptions must be made for mortgage-backed securities.

Derivative products Exchange-traded derivatives are valued using quoted market prices and are classified within Level 1 of the fair value hierarchy. Over-the-counter (OTC) derivative products are generally valued using models, whose inputs reflect assumptions that we believe market participants would use in valuing the derivative in a current period transaction. Inputs to valuation models are appropriately calibrated to market data, including but not limited to yield curves, interest rates, volatilities, equity, debt and commodity prices and credit curves. Fair value can be modeled using a series of techniques, including the Black-Scholes option pricing model and simulation models. For certain OTC derivative contracts, inputs to valuation models do not involve a high degree of subjectivity as the valuation model inputs are readily observable or can be derived from actively quoted markets. OTC derivative contracts thus classified in Level 2 include certain credit default swaps, interest rate swaps, commodity swaps, and debt and equity option contracts. Derivative products that are valued based on models with significant unobservable market inputs are classified within Level 3 of the fair value hierarchy. Level 3 derivative products include total return swaps and equity warrant and option contracts where the volatility of the underlying equity securities are not observable due to the terms of the contracts and correlation sensitivity to market indices is not transparent for the term of the derivatives.

Investments in Managed Funds

Investments in managed funds include our investments in funds managed by us and our investments in third-party managed funds in which we are entitled to a portion of the management and/or performance fees. Investments in nonconsolidated managed funds are accounted for on the equity method. Gains or losses on our investments in managed funds are included in asset management fees and investment income (loss) from managed funds in the Consolidated Statements of Earnings.

Other Investments

Other investments includes investments entered into where we exercise significant influence over operating and capital decisions in private equity and other operating entities in connection with our capital market activities and loans issued in connection with such activities. Other investments are accounted for on the equity method or at cost, as appropriate.

Receivable from and Payable to Customers

Receivable from and payable to customers includes amounts receivable and payable on cash and margin transactions. Securities owned by customers and held as collateral for these receivables are not reflected in the accompanying consolidated financial statements. Receivable from officers and directors represents balances arising from their individual security transactions. These transactions are subject to the same regulations as customer transactions and are provided on substantially the same terms.

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Securities Borrowed and Securities Loaned

Securities borrowed and securities loaned are carried at cost. In connection with both trading and brokerage activities, we borrow securities to cover short sales and to complete transactions in which customers have failed to deliver securities by the required settlement date, and lend securities to other brokers and dealers for similar purposes. We have an active securities borrowed and lending matched book business in which we borrow securities from one party and lend them to another party. When we borrow securities, we generally provide cash to the lender as collateral, which is reflected in our Consolidated Statements of Financial Condition as securities borrowed. We earn interest revenues on this cash collateral. Similarly, when we lend securities to another party, that party provides cash to us as collateral, which is reflected in our Consolidated Statements of Financial Condition as securities loaned. We pay interest expense on the cash collateral received from the party borrowing the securities. A substantial portion of our interest revenues and interest expenses results from this matched book activity. The initial collateral advanced or received approximates or is greater than the fair value of the securities borrowed or loaned. We monitor the fair value of the securities borrowed and loaned on a daily basis and request additional collateral or return excess collateral, as appropriate.

Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

Securities purchased under agreements to resell and securities sold under agreements to repurchase (collectively repos) are accounted for as collateralized financing transactions and are recorded at their contracted repurchase amount. We earn net interest revenues from this activity which is reflected in our Consolidated Statements of Earnings.

We monitor the fair value of the underlying securities daily versus the related receivable or payable balances. Should the fair value of the underlying securities decline or increase, additional collateral is requested or excess collateral is returned, as appropriate.

We carry repos on a net basis when permitted under the provisions of FASB Interpretation No. 41, *Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements* (FIN 41).

Premises and Equipment

Premises and equipment are depreciated using the straight-line method over the estimated useful lives of the related assets (generally three to ten years). Leasehold improvements are amortized using the straight-line method over the term of the related leases or the estimated useful lives of the assets, whichever is shorter.

Goodwill

At least annually, and more frequently if warranted, we assess whether goodwill has been impaired by comparing the estimated fair value, calculated based on earnings and book value multiples, of each reporting unit with its estimated net book value, by estimating the amount of stockholders equity required to support each reporting unit. Periodically estimating the fair value of a reporting unit requires significant judgment and often involves the use of significant estimates and assumptions. These estimates and assumptions could have a significant effect on whether or not an impairment charge is recorded and the magnitude of such a charge. We have completed our annual assessment of goodwill as of September 30, 2008 and no impairment was identified. We updated our assessment of goodwill for impairment as of December 31, 2008 and no impairment was identified. We do not believe there have been any events or changes in circumstances since our last assessment warranting an update of our evaluation.

Income Taxes

We file a consolidated U.S. federal income tax return, which includes all of our qualifying subsidiaries. We also are subject to income tax in various states and municipalities and those foreign jurisdictions in which we operate.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Amounts provided for income taxes are based on income reported for financial statement purposes and do not necessarily represent amounts currently payable. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and for tax loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income taxes are provided for temporary differences in reporting certain items, principally, share-based compensation, deferred compensation, unrealized gains and losses on investments and tax amortization on intangible assets. The realization of deferred tax assets is assessed and a valuation allowance is recorded to the extent that it is more likely than not that any portion of the deferred tax asset will not be realized.

We adopted EITF Issue No. 06-11, *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards* (EITF 06-11), as of January 1, 2008. EITF 06-11 requires that the tax benefit related to dividends and dividend equivalents paid on nonvested share based payment awards and outstanding equity options should be recognized as an increase to additional paid in capital. Prior to EITF 06-11, such income tax benefit was recognized as a reduction of income tax expense. These amounts are included in tax benefits for issuance of share-based awards on the Consolidated Statement of Changes in Stockholders Equity.

Legal Reserves

We recognize a liability for a contingency when it is probable that a liability has been incurred and when the amount of loss can be reasonably estimated. When a range of probable loss can be estimated, we accrue the most likely amount of such loss, and if such amount is not determinable, then we accrue the minimum of the range of probable loss.

We record reserves related to legal proceedings in accrued expenses and other liabilities. Such reserves are established and maintained in accordance with FASB 5, *Accounting for Contingencies*, and FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss an Interpretation of FASB Statement No. 5*. The determination of these reserve amounts requires significant judgment on the part of management. We consider many factors including, but not limited to: the amount of the claim; the basis and validity of the claim; previous results in similar cases; and legal precedents and case law. Each legal proceeding is reviewed with counsel in each accounting period and the reserve is adjusted as deemed appropriate by management.

Share-Based Compensation

We account for share-based compensation under the guidance of FASB 123R, *Share-Based Payment* (FASB 123R). Share-based awards are measured based on the grant-date fair value of the award and recognized over the period from the service inception date through the date the employee is no longer required to provide service to earn the award. Expected forfeitures are included in determining share-based compensation expense.

Earnings per Common Share

Basic earnings per share (EPS) is computed by dividing net earnings (loss) available to common shareholders by the weighted average number of common shares outstanding and certain other shares committed to be, but not yet issued. Net earnings (loss) available to common shareholders represents net earnings (loss) to common shareholders reduced by the allocation of earnings to participating securities. Losses are not allocated to participating securities. Common shares outstanding and certain other shares committed to be, but not yet issued, include restricted stock and restricted stock units for which no future service is required. Diluted EPS is computed by dividing net earnings available to common shareholders plus dividends on dilutive mandatorily redeemable convertible preferred stock by the weighted average number of common shares outstanding and certain other shares committed to be, but not yet issued, plus all dilutive common stock equivalents outstanding during the period.

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

We adopted FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1) on January 1, 2009. Under FSP EITF 03-6-1, unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and, therefore, are included in the earnings allocation in computing earnings per share under the two-class method described in FASB 128, *Earnings per Share*. We grant restricted stock and restricted stock units as part of our share-based compensation that contain nonforfeitable rights to dividends and dividend equivalents, respectively, and therefore, prior to the requisite service being rendered for the right to retain the award, restricted stock and restricted stock units meet the definition of a participating security under FSP EITF 03-6-1. As such, we calculate Basic and Diluted earnings per share under the two-class method. FSP EITF 03-6-1 is to be applied retrospectively. All prior-period earnings per share data presented have been adjusted to comply with the provisions of FSP EITF 03-6-1.

Securitization Activities

We engage in securitization activities related to residential mortgage-backed securities. Generally, such transfers of financial assets are accounted for as sales when we have relinquished control over the transferred assets. The gain or loss on sale of such financial assets depends, in part, on the previous carrying amount of the assets involved in the transfer allocated between the assets sold and the retained interests, if any, based upon their respective fair values at the date of sale. We may retain interests in the securitized financial assets as one or more tranches of the securitization. These retained interests are included in the Consolidated Statement of Financial Condition at fair value. Any changes in the fair value of such retained interests are recognized in the Consolidated Statement of Earnings.

Accounting Developments

FASB 141R. In December 2007, the FASB issued FASB 141 (revised 2007), *Business Combinations* (FASB 141R). Under FASB 141R, an entity is required to recognize the assets acquired, liabilities assumed, contractual contingencies and contingent consideration measured at their fair value at the acquisition date for any business combination consummated after the effective date. It further requires that acquisition-related costs are to be recognized separately from the acquisition and expensed as incurred. This statement is effective for financial statements issued for fiscal years beginning after December 15, 2008. Accordingly, we apply the provisions of FASB 141R to business combinations occurring after January 1, 2009. Adoption of FASB 141R did not affect our financial condition, results of operations or cash flows, but may have an effect on accounting for future business combinations.

FASB 160. In December 2007, the FASB issued FASB 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (FASB 160). FASB 160 requires an entity to clearly identify and present ownership interests in subsidiaries held by parties other than the entity in the consolidated financial statements within the equity section but separate from the entity s equity. It also requires the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income; changes in ownership interest be accounted for similarly, as equity transactions; and when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary and the gain or loss on the deconsolidation of the subsidiary be measured at fair value. We adopted FASB 160 on January 1, 2009. Refer to Note 10 for further discussion on the adoption of FASB 160.

FSP FAS 140-3. In February 2008, the FASB issued FSP FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* (FSP FAS 140-3). FSP FAS 140-3 requires an initial transfer of a financial asset and a repurchase financing that was entered into contemporaneously or in contemplation of the initial transfer to be evaluated as a linked transaction under FASB 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (FASB No. 140) unless certain criteria are met. FSP FAS 140-3 is effective for fiscal years beginning after November 15, 2008. FSP FAS 140-3 is to be applied prospectively for new

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

transactions entered into after the adoption date. The adoption of FSP FAS 140-3 did not have a material effect on financial condition, cash flows or results of operations.

FASB 161. In March 2008, the FASB issued FASB 161, *Disclosures about Derivative Instruments and Hedging Activities* (FASB 161). FASB 161 amends and expands the disclosure requirements of FASB 133, *Accounting for Derivative Instruments and Hedging Activities*, and requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair values and amounts of gains and losses on derivative contracts and disclosures about credit-risk-related contingent features in derivative agreements. FASB 161 is effective for the fiscal years and interim periods beginning after November 15, 2008. Accordingly, we adopted FASB 161 effective January 1, 2009. Since FASB 161 requires only additional disclosures concerning derivatives and hedging activities, adoption of FASB 161 did not affect our financial condition, results of operations or cash flows.

FSP APB 14-1. In May 2008, the FASB issued FSP APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP APB 14-1). FSP APB 14-1 clarifies that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) are not addressed by APB 14, *Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants* and specifies that issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity s nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. FSP APB 14-1 is effective for fiscal years and interim periods beginning after December 31, 2008. The adoption of FSP APB 14-1 did not affect our financial condition, results of operations or cash flows.

FSP EITF 03-6-1. In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, are included in the earnings allocation in computing earnings per share under the two-class method described in FASB 128, *Earnings per Share*. Under FSP EITF 03-6-1, unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of EPS pursuant to the two-class method. FSP EITF 03-6-1 is effective for fiscal years and interim periods beginning after December 31, 2008. Accordingly, we adopted FSP EITF 03-6-1 on January 1, 2009. All prior-period EPS data presented has been adjusted to comply with the provisions of FSP EITF 03-6-1. The adoption of FSP EITF 03-6-1 reduced previously reported Basic and Diluted EPS from a loss of $0.03 to a loss of $0.05 for the three months ended June 30, 2008 and reduced previously reported Basic and Diluted EPS from a loss of $0.42 to a loss of $0.47 for the six months ended June 30, 2008.

FSP FAS 133-1 and FIN 45-4. In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161* (FSP FAS 133-1 and FIN 45-4). FSP FAS 133-1 and FIN 45-4 require enhanced disclosures by sellers of credit derivatives, including credit derivatives embedded in a hybrid instrument, and require additional disclosure about the current status of the payment/performance risk of a guarantee. We adopted FSP FAS 133-1 and FIN 45-4 for our year end consolidated financial statements as of December 31, 2008. Since FSP FAS 133-1 and FIN 45-4 require only additional disclosures, the adoption did not have an effect on our financial condition, results of operations or cash flows.

FSP FAS 157-4. In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4). FSP FAS 157-4 provides additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. FSP FAS 157-4 also includes guidance on identifying circumstances that indicate a transaction is not orderly. We adopted FSP FAS 157-4 as of April 1, 2009. The adoption of FSP FAS 157-4 did not have a material effect on our financial condition, results of operations and cash flows.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

FASB 165. In May 2009, the FASB issued FASB 165, *Subsequent Events* (FASB 165). FASB 165 requires that management evaluate events and transactions that may occur for potential recognition or disclosure in the financial statements after the balance sheet date through the date the financial statements are issued and determines the circumstances under which such events or transactions must be recognized in the financial statements. We adopted FASB 165 as of our financial period ended June 30, 2009. The adoption of FASB 165 did not have an effect on our financial condition, results of operations or cash flows.

FASB 166. In June 2009, the FASB issued FASB 166, *Accounting for Transfers of Financial Assets* (FASB 166). FASB 166 amends FASB 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. FASB 166 eliminates the concept of a qualifying special purpose entity, requires that a transferor consider all arrangements made contemporaneously with, or in contemplation of, a transfer of assets when determining whether derecognition of a financial asset is appropriate, clarifies the requirement that a transferred financial asset be legally isolated from the transferor and any of its consolidated affiliates, stipulates that constraints on a transferee s ability to freely pledge or exchange transferred assets causes the transfer to fail sale accounting, and defines participating interests and provides guidance on derecognizing participating interests. We will adopt FASB 166 as of January 1, 2010. We are currently evaluating the impact of FASB 166 on our consolidated financial statements.

FASB 167. In June 2009, the FASB issued FASB 167, *Amendments to FASB Interpretation No. 46(R)* (FASB 167). FASB 167 amends certain requirements of FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities,* and requires that the party who has the power to direct the activities of a variable interest entity that most significantly impact the entity s economic performance and who has an obligation to absorb losses of the entity or a right to receive benefits from the entity that could potentially be significant to the entity consolidate the variable interest entity. FASB 167 eliminates the quantitative approach previously applied to assessing the consolidation of a variable interest entity and requires ongoing reassessments for consolidation. We will adopt FASB 167 as of January 1, 2010. We are currently evaluating the impact of FASB 167 on our consolidated financial statements.

Use of Estimates

We have made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with U.S. generally accepted accounting principles. The most important of these estimates and assumptions relate to fair value measurements and compensation and benefits. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Note 2. Cash, Cash Equivalents and Short-Term Investments

We generally invest our excess cash in money market funds and other short-term investments. Cash equivalents include highly liquid investments not held for resale with original maturities of three months or less. The following are financial instruments that are cash and cash equivalents or are deemed by us to be generally readily convertible into cash as of June 30, 2009 and December 31, 2008 (in thousands of dollars):

	June 30, 2009	December 31, 2008
Cash and cash equivalents:		
Cash in banks	$ 164,576	$ 765,056
Money market investments	799,449	529,273
Total cash and cash equivalents	964,025	1,294,329
Cash and securities segregated (1)	1,050,331	1,151,522
	$ 2,014,356	$ 2,445,851

(1) Consists of deposits at exchanges and clearing organizations, as well as deposits in accordance with Rule 15c3-3 of the Securities Exchange Act of 1934, which subjects Jefferies, as a broker dealer carrying client accounts, to requirements related to maintaining cash or qualified securities in a segregated reserve account for the exclusive benefit of its clients.

Note 3. Financial Instruments

The following is a summary of the fair value of major categories of financial instruments owned and financial instruments sold, not yet purchased, as of June 30, 2009 and December 31, 2008 (in thousands of dollars):

	June 30, 2009		December 31, 2008	
	Financial Instruments Owned	Financial Instruments Sold, Not Yet Purchased	Financial Instruments Owned	Financial Instruments Sold, Not Yet Purchased
Corporate equity securities	$ 1,163,078	$ 1,308,676	$ 945,747	$ 739,166
Corporate debt securities	2,115,462	1,819,590	1,851,216	1,578,395
Government, federal agency and other sovereign obligations	1,613,552	1,240,843	447,233	211,045
Mortgage- and asset-backed securities	2,721,545	¾	1,035,996	¾
Loans and other receivables	446,733	229,438	34,407	¾
Derivatives	220,043	188,019	298,144	220,738
Investments	73,441	¾	75,059	¾
Other	¾	4,288	¾	223
	$ 8,353,854	$ 4,790,854	$ 4,687,802	$ 2,749,567

We elected to apply the fair value option to loans and loan commitments made in connection with our investment banking and senior loan trading activities and certain investments held by subsidiaries that are not registered broker-dealers as defined in the AICPA Audit and Accounting Guide, *Brokers and Dealers in Securities*. Loans and investments at fair value are included in financial instruments owned and loan commitments are included in financial instruments sold, not yet purchased derivatives on the Consolidated Statements of Financial Condition. The fair

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

value option was elected for loans and loan commitments and investments held by subsidiaries that are not registered broker-dealers because they are risk managed by us on a fair value basis.

Financial instruments owned includes securities pledged to creditors. The following is a summary of the fair value of major categories of securities pledged to creditors as of June 30, 2009 and December 31, 2008 (in thousands of dollars):

	June 30, 2009	December 31, 2008
Corporate equity securities	$ 489,093	$ 360,356
Corporate debt securities	2,248	1,409
	$ 491,341	$ 361,765

At June 30, 2009 and December 31, 2008, the approximate fair value of collateral received by us that may be sold or repledged by us was $12.6 billion and $9.7 billion, respectively. This collateral was received in connection with resale agreements and securities borrowings. At June 30, 2009 and December 31, 2008, a substantial portion of this collateral received by us had been sold or repledged.

(1) Realized and unrealized gains/ (losses) are reported in principal transactions in the Consolidated Statements of Earnings.

(2) During the quarter ended June 30, 2009, we changed our valuation methodology for auction rate securities, which are included within corporate debt securities and U.S. issued municipal securities. Previously, auction rate securities were valued based on an internal model based on projected cash flows for the securities discounted for

lack of liquidity. As of June 30, 2009, auction rate securities are valued using a valuation technique that benchmarks the securities to transactions and market prices of comparable securities, adjusting for projected cash flows and security structure, where appropriate.

(1) Realized and unrealized gains/ (losses) are reported in principal transactions in the Consolidated Statements of Earnings.

Level 3 cash instruments are frequently hedged with instruments classified within Level 1 and Level 2, and accordingly, gains or losses that have been reported in Level 3 are frequently offset by gains or losses attributable to instruments classified within Level 1 or Level 2 or by gains or losses on derivative contracts classified in Level 3 of the fair value hierarchy.

Note 4. Derivative Financial Instruments

Off-Balance Sheet Risk

We have contractual commitments arising in the ordinary course of business for securities loaned or purchased under agreements to resell, repurchase agreements, future purchases and sales of foreign currencies, securities transactions on a when-issued basis and underwriting. Each of these financial instruments and activities contains varying degrees of off-balance sheet risk whereby the fair values of the securities underlying the financial instruments may be in excess of, or less than, the contract amount. The settlement of these transactions is not expected to have a material effect upon our consolidated financial statements.

Derivative Financial Instruments

Our derivative activities are recorded at fair value in the Consolidated Statements of Financial Condition, with realized and unrealized gains and losses recognized in principal transactions in the Consolidated Statements of Earnings on a trade date basis and as a component of cash flows from operating activities in the Consolidated Statements of Cash Flows. Acting in a trading capacity, we may enter into derivative transactions to satisfy the needs of our clients and to manage our own exposure to market and credit risks resulting from our trading activities. Derivatives are subject to various risks similar to other financial instruments, including market, credit and operational risk. In addition, we may be exposed to legal risks related to derivative activities. The risks of derivatives should not be viewed in isolation, but rather should be considered on an aggregate basis along with our other trading-related activities. We manage the risks associated with derivatives on an aggregate basis along with the risks associated with proprietary trading as part of our firmwide risk management policies. In connection with our derivative activities, we may enter into master netting agreements and collateral arrangements with counterparties. These agreements provide

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

us with the ability to offset a counterparty s rights and obligations, request additional collateral when necessary or liquidate the collateral in the event of counterparty default.

A portion of our derivative activities are performed by Jefferies Financial Products, LLC (JFP). JFP is a market maker in commodity index products and a trader in commodity futures and options. Where appropriate, JFP utilizes various credit enhancements, including guarantees, collateral, margin and master netting agreements to mitigate the credit exposure relating to these swaps and options. JFP establishes credit limits based on, among other things, the creditworthiness of the counterparties, the transaction s size and tenor, and estimated potential exposure. JFP maintains credit intermediation facilities with highly rated European banks (the Banks), which allow JFP customers that require a counterparty with a high credit rating for commodity index transactions to transact with the Banks. The Banks simultaneously enter into offsetting transactions with JFP and receive a fee from JFP for providing credit support. In certain cases, JFP is responsible to the Banks for the performance of JFP s customers.

The fair value of derivative assets and derivative liabilities are presented on the Consolidated Statements on Financial Condition in Financial Instruments Owned Derivatives and Financial Instruments Sold, Not Yet Purchased Derivatives net of cash paid or received under credit support agreements and on a net counterparty basis when a legal right to offset exists under a master netting agreement. Net unrealized and realized gains and losses on derivative contracts are recognized within principal transactions revenue in our Consolidated Statements of Earnings. (See Notes 3 and 16 for additional disclosures about derivative instruments.)

The following table presents the fair value and related notional amounts of derivative contracts at June 30, 2009 categorized by predominant risk exposure. The fair value of assets/liabilities related to derivative contracts represents our receivable/payable for derivative financial instruments, gross of counterparty netting and cash collateral received and pledged:

Commodity contracts	(1,311)	(4,867)
Credit contracts	10,265	17,480
Total	$ (10,266)	$ (204,221)

The following tables set forth the remaining contract maturity of the fair value of OTC derivative assets and liabilities as of June 30, 2009 (in thousands). Derivative fair values include counterparty netting and are gross of cash collateral received and pledged:

	OTC derivative assets (1) (2)				
	0 12 Months	1 5 Years	Greater Than 5 Years	Cross-Maturity Netting (3)	Total
Commodity swaps	$ 6,242	$ 162	$	$ (162)	$ 6,242
Commodity options	16,617	10,106			26,723
Total return swaps	4,396	5,720			10,116
Credit default swaps			3,602		3,602
Equity options		20			20
Forward contracts	45			(45)	
Total	$ 27,300	$ 16,008	$ 3,602	$ (207)	$ 46,703

(1) At June 30, 2009, we held exchange traded derivative assets of $188.7 million.

(2) Option and swap contracts in the table above are gross of collateral

received. Option and swap contracts are recorded net of collateral received on the Consolidated Statement of Financial Condition. At June 30, 2009, collateral received was $15.4 million.

(3) Amounts represent the netting of receivable balances with payable balances for the same counterparty across maturity categories.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

	OTC derivative liabilities (1) (2)				
	0 12 Months	1 5 Years	Greater Than 5 Years	Cross-Maturity Netting (3)	Total
Commodity swaps	$ 73,755	$	$	$ (162)	$ 73,593
Commodity options	6,379	5,069			11,448
Total return swaps	63	11,617			11,680
Interest rate swaps		76	7,985		8,061
Credit default swaps		356	1,750		2,106
Equity options		7,538			7,538
Forward contracts		4,679		(45)	4,634
Total	$ 80,197	$ 29,335	$ 9,735	$ (207)	$ 119,060

(1) At June 30, 2009, we held exchange traded derivative liabilities of $162.2 million.

(2) Option and swap contracts in the table above are gross of collateral pledged. Option and swap contracts are recorded net of collateral pledged on the Consolidated Statement of Financial Condition. At June 30, 2009, collateral pledged was $93.3 million.

(3) Amounts represent the

netting of receivable balances with payable balances for the same counterparty across maturity categories.

At June 30, 2009, the counterparty credit quality with respect to the fair value of our OTC derivatives assets was as follows (in thousands). Derivative fair values include counterparty netting and are gross of cash collateral received:

	Total pre-credit enhancement netting	Credit enhancement netting (1)	Total post-credit enhancement netting
Counterparty credit quality:			
A or higher	$ 51,780	$ (9,713)	$ 42,067
Unrated	4,636		4,636
Total	$ 56,416	$ (9,713)	$ 46,703

(1) Credit enhancement netting relates to JFP credit intermediation facilities with AA-rated European banks.

Contingent Features

Certain of our derivative instruments contain provisions that require our debt to maintain an investment grade credit rating from each of the major credit rating agencies. If our debt were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on our derivative instruments in liability positions. The aggregate fair value of all derivative instruments with such credit-risk-related contingent features that are in a liability position at June 30, 2009, is $14.8 million for which we have posted collateral of $26.1 million in the normal course of business. If the credit-risk-related contingent features underlying these agreements were triggered on June 30, 2009, we would be required to post an additional $3.1 million of collateral to our counterparties.

Note 5. Securitization Activities and Variable Interest Entities

Securitization Activities

We engage in securitization activities related to residential mortgage-backed and other asset-backed securities. In our securitization activities, we use special purpose entities (SPEs). We do not consolidate certain securitization vehicles, commonly known as qualifying special purpose entities (QSPEs), if they meet certain criteria regarding the types of assets and derivatives they may hold, the types of sales they may engage in and the range of discretion they may exercise in connection with the assets they hold. The determination of whether a SPE meets the criteria to be a QSPE requires considerable judgment, particularly in evaluating whether the permitted activities of the SPE are significantly limited and in determining whether derivatives held by the SPE are passive and non-excessive.

We derecognize financial assets transferred in securitizations, when we have relinquished control over such assets. Transferred assets are carried at fair value prior to securitization, with unrealized gains and losses reflected in principal transactions in the Consolidated Statements of Earnings. We act as underwriter of the beneficial interests issued by securitization vehicles. Net revenues are recognized in connection with these underwriting activities.

During the three and six months ended June 30, 2009 we transferred assets of $1,976.9 million and $3,055.0 million, respectively, as part of our securitization activities, received proceeds of $1,992.7 million and $3,072.8 million, respectively, and recognized net revenues of $15.8 million and $18.4 million, respectively. These transfers were accounted for as sales of assets. During the three and six months ended June 30, 2008, we did not engage in any securitization activities.

The following table presents the total assets (unpaid principal amount) of, and retained interests in, QSPEs to which we, acting as principal, have transferred assets and for which we received sale accounting treatment at June 30, 2009 (in millions):

Securitization Type	Total QSPE Assets	Retained Interests (1)
Residential mortgage-backed securities	$ 1,158.4	$ 169.5

(1) At June 30, 2009, 99% of our retained interests in these securitizations are AA-rated.

The following table presents cash flows received on retained interests during the six months ended June 30, 2009 (in millions):

	Residential mortgage-backed securities
Cash flows received on retained interests	$ 0.4

We have not provided financial or other support to these QSPEs during the three and six months ended June 30, 2009. We have no explicit or implicit arrangements to provide additional financial support to these QSPEs and have no liabilities related to these QSPEs at June 30, 2009.

Variable Interest Entities

Variable interest entities (VIEs) are defined in FIN 46(R) as entities in which equity investors lack the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support. VIEs are consolidated by the primary beneficiary. The primary beneficiary

is the party that absorbs a majority of the entity s expected losses, receives a majority of its expected residual returns, or both, as a result of holding variable interests, direct or implied.

(Unaudited)

VIEs Where We Are The Primary Beneficiary

We conduct our high yield secondary market trading activities through Jefferies High Yield Trading, LLC (JHYT). JHYT is a registered broker-dealer engaged in the secondary sales and trading of high yield securities and special situation securities, including bank debt, post-reorganization equity, public and private equity, equity derivatives, credit default swaps and other financial instruments. JHYT makes markets in high yield and distressed securities and provides research coverage on these types of securities. JHYT is a wholly-owned subsidiary of Jefferies High Yield Holdings, LLC (JHYH).

We own voting and non-voting interests in JHYH and have entered into management, clearing, and other services agreements with JHYH. We and Leucadia National Corporation (Leucadia) each have the right to nominate two of a total of four directors to JHYH s board of directors. Two funds managed by us, Jefferies Special Opportunities Fund (JSOP) and Jefferies Employees Special Opportunities Fund (JESOP), are also investors in JHYH. The term of the arrangement is for six years, with an option to extend. We and Leucadia expect to increase our respective investments in JHYH to $600 million each over time. As a result of agreements entered into with Leucadia in April 2008, any request to Leucadia for additional capital investment in JHYH requires the unanimous consent of our Board of Directors, including the consent of any Leucadia designees to our board. (See Note 1, *Organization and Summary of Significant Accounting Policies*, herein for additional discussion of agreements entered into with Leucadia.)

Under the provisions of FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, we determined that JHYH and JESOP meet the definition of a variable interest entity. We are the primary beneficiary of JHYH and JESOP and accordingly consolidate JHYH (and the assets, liabilities and results of operations of its wholly-owned subsidiary JHYT) and JESOP.

The following tables present information about the assets and liabilities of our consolidated VIEs which are presented within our Consolidated Statement of Financial Condition in the respective asset and liability categories, as of June 30, 2009 and December 31, 2008 (in millions):

	VIE Assets	
	June 30, 2009	December 31, 2008
Cash	$ 225.7	$ 277.1
Financial instruments owned	800.0	546.9
Securities borrowed	335.5	242.7
Receivable from brokers and dealers	240.6	
Other	6.6	49.3
	$ 1,608.4	$ 1,116.0

	VIE Liabilities	
	June 30, 2009	December 31, 2008
Financial instruments sold, not yet purchased	$ 533.0	$ 230.8
Payable to brokers and dealers	193.2	
Mandatorily redeemable interests (1)	875.4	854.0
Other	7.0	31.4
	$ 1,608.6	$ 1,116.2

(1) After consolidation, which eliminates our interests and the interests of our consolidated subsidiaries, JSOP and JESOP, the carrying amount of the mandatorily redeemable financial interests pertaining to the above VIEs included within mandatorily redeemable preferred interests of consolidated subsidiaries in the Consolidated Statements of Financial Condition was approximately $287.9 million and $280.9 million at June 30, 2009 and December 31, 2008, respectively.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

The assets of these VIE s are available for the benefit of the mandatorily redeemable interest holders.

Our maximum exposure to loss at June 30, 2009 and December 31, 2008 was $298.4 million and $291.2 million, respectively, which consist of our debt, equity and partnership interests in JHYH and JESOP which are eliminated in consolidation.

JHYH s net revenue and formula-determined non-interest expenses amounted $55.7 million and $18.3 million, respectively, for the three months ended June 30, 2009 and amounted to $53.6 million and $32.3 million, respectively, for the six months ended June 30, 2009. JHYH s net revenue and formula-determined non-interest expenses amounted $35.4 million and $11.0 million, respectively, for the three months ended June 30, 2008 and amounted to $(9.5) million and $22.9 million, respectively, for the six months ended June 30, 2008. These revenues and expenses are included in commissions and principal transactions and in our non-interest expenses. These formula-determined non-interest expenses do not necessarily reflect the actual expenses of operating JHYH. Based on the terms of our interests in JHYH and JESOP, percentages of JHYH and JESOP s net revenue and non-interest expenses are allocated to us and to third party interest holders.

There have been no changes in our conclusion to consolidate JHYH and JESOP since formation.

VIEs Where We Have a Significant Variable Interest

We also hold significant variable interests in VIEs in which we are not the primary beneficiary and accordingly do not consolidate. Determining whether an interest in a VIE is significant is a matter of judgment and is based on an assessment of our exposure to the overall assets and liabilities of a VIE. We do not consolidate these VIEs as we do not absorb a majority of the entity s expected losses or receive a majority of its expected residual returns as a result of holding these variable interests. We have not provided financial or other support to these VIEs during the three and six months ended June 30, 2009. We have no explicit or implicit arrangements to provide additional financial support to these VIEs and have no liabilities related to these VIEs at June 30, 2009.

The following table presents total assets in these nonconsolidated VIEs and our maximum exposure to loss associated with these non-consolidated VIEs in which we hold significant variable interests at June 30, 2009 and December 31, 2008 (in millions):

	June 30, 2009		
	VIE Assets	Maximum exposure to loss in non-consolidated VIEs (2)	Carrying Amount
Managed CLOs	$ 1,211.9	$ 0.5	$ 0.5
Third Party Managed CLO	523.6	3.2	3.2
Mortgage- and Asset-Backed Vehicles (1)	58,374.8	248.8	248.8
Total	$ 60,110.3	$ 252.5	$ 252.5

(1) VIE assets represent the unpaid principal balance of the assets in these

vehicles at June 30, 2009.

(2) Our maximum exposure to loss in non-consolidated VIEs is limited to our investment.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

	December 31, 2008		
	VIE Assets	Maximum exposure to loss in non-consolidated VIEs (2)	Carrying Amount
Managed CLOs	$ 925.0	$ 4.1	$ 4.1
Third Party Managed CLO	390.2	3.3	3.3
Mortgage- and Asset-Backed Vehicles (1)	19,274.9	86.8	86.8
Total	$ 20,590.1	$ 94.2	$ 94.2

(1) VIE assets represent the unpaid principal balance of the assets in these vehicles at December 31, 2008.

(2) Our maximum exposure to loss in non-consolidated VIEs is limited to our investment.

Managed CLOs. We own significant variable interests in various managed collateralized loan obligations (CLOs) for which we are not the primary beneficiary, and therefore, do not consolidate these entities. We receive management fees for our interest in these CLOs. Our exposure to loss is limited to our capital contributions. Our investments in these VIEs consists of securities and are accounted for at fair value and are included in investments in managed funds on our Consolidated Statements of Financial Condition.

Third Party Managed CLO. We have significant variable interests in Babson Loan Opportunity CLO, Ltd., a third party managed CLO. This VIE has assets consisting primarily of senior secured loans, unsecured loans and high yield bonds. Our variable interests in this VIE consists of debt securities. The fair value of our interests in this VIE consist of a direct interest and an indirect interest via Jefferies Finance, LLC. The direct investment is accounted for at fair value and included in financial instruments owned in our Consolidated Statements of Financial Condition.

Mortgage and Asset-Backed Vehicles. We purchase and sell variable interests in VIEs, which primarily issue mortgage-backed and other asset-backed securities, in connection with our trading and market-making activities. Our variable interests in these VIEs consist of mortgage and asset-backed securities and are accounted for at fair value and included in financial instruments owned on our Consolidated Statements of Financial Condition.

Note 6. Acquisitions

On March 27, 2009, we acquired 100% of the membership interests of Depfa First Albany Securities LLC (Depfa), a leading New York City-based municipal securities broker-dealer that provides integrated investment banking, advisory, and sales and trading services. As of March 31, 2009, Depfa has been merged into Jefferies & Company. The Depfa acquisition is being accounted for under the acquisition method of accounting in accordance with FASB 141R, *Business Combinations* (FASB 141R). Accordingly, the purchase price is allocated to the acquired assets and liabilities based on their estimated fair values at acquisition date as summarized in the following table. Goodwill of $568,000 is measured as the excess of the cash consideration over fair value of net assets acquired, including identified intangible assets, and represents the value expected from the synergies and economies of scale created from combining Depfa s municipal securities business with our full-service sales and trading, and investment banking capabilities. All goodwill is assigned to our capital markets segment and is expected to be deductible for income tax purposes.

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

The following table presents the consideration paid for Depfa and the amounts of the assets acquired and liabilities assumed at the acquisition date (in thousands):

Cash consideration	$ 38,760
Recognized assets and assumed liabilities:	
Cash	300
Financial instruments owned	31,458
Receivable from broker	16,691
Premises and equipment	155
Intangible assets	1,151
Other assets	2,781
Financial instruments sold, not yet purchased	(1,084)
Other liabilities	(13,260)
Total identifiable net assets	$ 38,192

The following is a summary of goodwill activity for the six months ended June 30, 2009 (in thousands of dollars):

		Six Months Ended June 30, 2009
Balance, at December 31, 2008	$	358,837
Add: Acquisition		568
Less: Translation adjustment		(4,347)
Balance, at June 30, 2009	$	355,058

Acquisitions of LongAcre Partners Limited, Helix Associates, and Randall & Dewey executed in prior years each contain a five-year contingency for additional consideration to the selling owners, based on future revenues. This additional consideration is paid in cash annually. There is no contractual dollar limit to the potential of additional consideration. The last contingency period of these acquisitions expires in 2012. During the three and six months ended June 30, 2009, we paid approximately $14.6 million and $22.8 million, respectively, in cash related to contingent consideration that had been earned during the current year or prior periods.

Note 7. Short-Term Borrowings

Bank loans represent short-term borrowings that are payable on demand and generally bear interest at a spread over the federal funds rate. Unsecured bank loans are typically overnight loans used to finance securities owned or clearing related balances. We had no outstanding unsecured or secured bank loans as of June 30, 2009 and December 31, 2008. Average daily bank loans for the six months ended June 30, 2009 and the year ended December 31, 2008 were $75.3 million and $94.9 million, respectively.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Note 8. Long-Term Debt

The following summarizes long-term debt outstanding at June 30, 2009 and December 31, 2008 (in thousands of dollars):

	June 30, 2009	December 31, 2008
7.75% Senior Notes, due 2012, net of unamortized discount of $2,472 (2009)	$ 307,261	$ 328,215
5.875% Senior Notes, due 2014, net of unamortized discount of $1,282 (2009)	248,718	248,608
5.5% Senior Notes, due 2016, net of unamortized discount of $1,226 (2009)	348,774	348,683
8.5% Senior Notes, due 2019, net of unamortized discount of $6,144 (2009)	393,856	
6.45% Senior Debentures, due 2027, net of unamortized discount of $3,615 (2009)	346,385	346,333
6.25% Senior Debentures, due 2036, net of unamortized discount of $7,510 (2009)	492,489	492,435
	$ 2,137,483	$ 1,764,274

We previously entered into a fair value hedge with no ineffectiveness using interest rate swaps in order to convert $200 million aggregate principal amount of unsecured 7.75% senior notes due March 15, 2012 into floating rates based upon LIBOR. During the third quarter of 2007, we terminated these interest rate swaps and received cash consideration less accrued interest of $8.5 million. The $8.5 million basis difference related to the fair value of the interest rate swaps at the time of the termination is being amortized as a reduction in interest expense of approximately $1.9 million per year over the remaining life of the notes through March 2012.

In June 2009, we issued 8.5% Senior Notes, due in 2019, with a par amount of $400 million and received proceeds of $393.9 million. During the six months ended June 30, 2009, we repurchased approximately $20.3 million of our outstanding long-term debt, resulting in a gain on debt extinguishment of $7.7 million, which is recognized in other income on the Consolidated Statements of Earnings.

Note 9. Mandatorily Redeemable Convertible Preferred Stock

In February 2006, Massachusetts Mutual Life Insurance Company (MassMutual) purchased in a private placement $125.0 million of our Series A convertible preferred stock. Our Series A convertible preferred stock has a 3.25% annual, cumulative cash dividend and is currently convertible into 4,105,138 shares of our common stock at an effective conversion price of approximately $30.45 per share. The preferred stock is callable beginning in 2016 and will mature in 2036. As of June 30, 2009, 10,000,000 shares of preferred stock were authorized and 125,000 shares of preferred stock were issued and outstanding. The dividend is recorded as a component of interest expense as the Series A convertible preferred stock is treated as debt for accounting purposes. The dividend is not deductible for tax purposes because the Series A convertible preferred stock is considered equity for tax purposes.

Note 10. Noncontrolling Interest and Mandatorily Redeemable Preferred Interests of Consolidated Subsidiaries

Noncontrolling Interest

Noncontrolling interest represents equity interests in consolidated subsidiaries that are not attributable, either directly or indirectly, to us (i.e., minority interests). Noncontrolling interest includes the minority equity holders proportionate share of the equity of JSOP, JESOP and our consolidated asset management entities. The following table presents our noncontrolling interests at June 30, 2009 and December 31, 2008 (in millions):

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

	June 30, 2009	December 31, 2008
JSOP	$ 258.6	$ 252.3
JESOP	30.1	29.4
Consolidated asset management entities	4.4	6.1
Noncontrolling interests	$ 293.1	$ 287.8

We adopted FASB 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (FASB 160), on January 1, 2009. Prior to the adoption of FASB 160, we reported minority interests within liabilities on our Consolidated Statements of Financial Condition. FASB 160 requires an entity to clearly identify and present ownership interests in subsidiaries held by parties other than the entity in the consolidated financial statements within the equity section but separate from the entity s equity and accordingly, we now present noncontrolling interests within stockholders equity, separately from our own equity. The adoption of FASB 160 resulted in an increase to total stockholders equity of $287.8 million and a decrease to total liabilities of $287.8 million on our Consolidated Statement of Financial Condition as of December 31, 2008. Previously reported balances have been reclassified to conform with the requirements of FASB 160.

FASB 160 also requires that revenues, expenses, net income or loss, and other comprehensive income or loss be reported in the consolidated financial statements at the consolidated amounts, which includes amounts attributable to both owners of the parent and noncontrolling interests. Net income or loss and other comprehensive income or loss shall then be attributed to the parent and noncontrolling interest. Prior to the adoption of FASB 160, we recorded minority interest in earnings (loss) of consolidated subsidiaries in the determination of net earnings (loss). Upon the adoption of FASB 160, net loss to noncontrolling interests is deducted from net earnings (loss) to determine net earnings (loss) to common shareholders. The adoption of FASB 160 resulted in an increase to net earnings (loss) of approximately $5.8 million for the three months ended June 30, 2008 and a decrease to net loss of approximately $8.0 million for the six months ended June 30, 2008. The adoption of FASB 160 did not have an impact on other comprehensive income or loss because all other comprehensive income or loss is attributable to us.

Mandatorily Redeemable Interests of Consolidated Subsidiaries

Certain interests in consolidated subsidiaries meet the definition of a mandatorily redeemable financial instrument and require liability classification under FASB 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (FASB 150) and remeasurement at the estimated amount of cash that would be due and payable to settle such interests under the applicable entity s organization agreement. These mandatorily redeemable financial instruments represent interests held in Jefferies High Yield Holdings, LLC (JHYH), which are entitled to a pro rata share of the profits and losses of JHYH and are scheduled to terminate in 2013, with an option to extend up to three additional one-year periods. We previously reported these mandatorily redeemable financial instruments within minority interest. FASB 160 requires only financial instruments issued by a subsidiary that are classified as equity in the subsidiary s financial statements to be treated as noncontrolling interests in the consolidated financial statements. Therefore, these mandatorily redeemable financial instruments are reported within liabilities as mandatorily redeemable preferred interests of consolidated subsidiaries on our Consolidated Statements of Financial Condition. In addition, changes to these mandatorily redeemable financial instruments of JHYH were previously reflected as minority interest in earnings (loss) of consolidated subsidiaries. Upon the adoption of FASB 160, we reclassified these changes to be part of net revenues and are reflected as interest on mandatorily redeemable preferred interest of consolidated subsidiaries on our Consolidated Statements of Earnings. The reclassification did not impact net earnings (loss), but resulted in a decrease to net revenues of $9.0 million for the three months ended June 30, 2008 and an increase to net revenues of $12.0 million for the six months ended June 30, 2008. The carrying amount of the

mandatorily redeemable interests of consolidated subsidiaries was approximately $287.9 million and $280.9 million at June 30, 2009 and December 31, 2008, respectively.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Note 11. Benefit Plans

The following summarizes the net periodic pension cost for the three and six months ended June 30, 2009 and 2008 (in thousands of dollars):

	Three Months Ended		Six Months Ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
Net pension cost included the following components:				
Service cost (1)	$ 50	$ 69	$ 100	$ 138
Interest cost on projected benefit obligation	658	595	1,316	1,189
Expected return on plan assets	(614)	(731)	(1,228)	(1,462)
Net amortization	229	¾	458	¾
Net periodic pension cost (income)	$ 323	$ (67)	$ 646	$ (135)

(1) Service cost relates to administrative expenses incurred during the periods.

We did not contribute to our pension plan during the six months ended June 30, 2009 and do not anticipate any contributions during 2009. Effective December 31, 2005, benefits under the pension plan have been frozen. There are no incremental benefit accruals for service after December 31, 2005.

Note 12. Compensation Plans

We sponsor the following share-based compensation plans: incentive compensation plan, director plan, employee stock purchase plan and the deferred compensation plan. The fair value of share based awards is estimated on the date of grant based on the market price of our common stock less the impact of selling restrictions subsequent to vesting, if any, and is amortized as compensation expense on a straight-line basis over the related requisite service periods.

As of June 30, 2009, we had $8.9 million of total unrecognized compensation cost related to nonvested share based awards, which is expected to be recognized over a remaining weighted-average vesting period of approximately 3.8 years. FASB 123R requires cash flows resulting from tax deductions in excess of the grant-date fair value of share-based awards to be included in cash flows from financing activities. Accordingly, we reflected the excess tax benefit of $6.9 million and $8.2 million related to share-based compensation in cash flows from financing activities for the six-months ended June 30, 2009 and 2008 respectively.

We have historically and generally expect to issue new shares of common stock when satisfying our issuance obligations pursuant to share based awards, as opposed to reissuing shares from our treasury stock.

In addition, we sponsor non-share based compensation plans. Non-share based compensation plans sponsored by us include an employee stock ownership plan and a profit sharing plan.

The following are descriptions of the compensation plans sponsored by us and the activity of such plans for the three and six months ended June 30, 2009 and 2008:

Incentive Compensation Plan. We have an Incentive Compensation Plan (Incentive Plan) which allows awards in the form of incentive stock options (within the meaning of Section 422 of the Internal Revenue Code), nonqualified stock

options, stock appreciation rights, restricted stock, unrestricted stock, performance awards, restricted stock units, dividend equivalents or other share-based awards. The plan imposes a limit on the number of shares of our common stock that may be subject to awards. An award relating to shares may be granted if the aggregate number of shares subject to then-outstanding awards (as defined in the Incentive Plan) plus the number of shares subject to the

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

award being granted do not exceed 30% of the number of shares issued and outstanding immediately prior to the grant.

Restricted Stock and Restricted Stock Units

The Incentive Plan allows for grants of restricted stock awards, whereby employees are granted restricted shares of common stock subject to forfeiture. The Incentive Plan also allows for grants of restricted stock units. Restricted stock units give a participant the right to receive fully vested shares at the end of a specified deferral period. One advantage of restricted stock units, as compared to restricted stock, is that the period during which the award is deferred as to settlement can be extended past the date the award becomes non-forfeitable, allowing a participant to hold an interest tied to common stock on a tax deferred basis. Prior to settlement, restricted stock units carry no voting or dividend rights associated with the stock ownership, but dividend equivalents are paid or accrued to the extent there are dividends declared on our common stock.

On December 2, 2008, we approved an overall compensation strategy that modified the terms of all outstanding restricted stock and restricted stock units of active employees and addressed the terms of future restricted stock and restricted stock units granted as part of year-end compensation. We modified these awards by removing the service requirement employees must fulfill in exchange for the right to those awards. As such, employees who terminate their employment or are terminated without cause may continue to vest, so long as the awards are not forfeited as a result of the other forfeiture provisions of those awards (e.g. competition). Prior to the modifications, these awards were generally subject to annual ratable vesting upon a five year service requirement, with provisions related to retirement eligibility. As a result of the removal of the service requirements, we accelerated the remaining compensation cost of the outstanding awards to be recognized on the modification date and recognized the compensation expense associated with 2008 year-end compensation awards on the date of grant (December 30, 2008).

Upon approval of the overall compensation strategy, we determined that the service inception date precedes the grant date for future restricted stock and restricted stock units granted as part of year-end compensation, and, as such, the compensation expense associated with these awards is accrued over the one-year period prior to the grant date. For the three and six months ended June 30, 2009, we accrued compensation expense of approximately $46.3 million and $62.7 million related to restricted stock and restricted stock units that we expect to grant as part of our 2009 year-end compensation.

In addition to year-end compensation awards, we may grant restricted stock and restricted stock units to new employees as sign-on awards. Sign-on awards are generally subject to annual ratable vesting upon a four year service requirement and are amortized as compensation expense on a straight-line basis over the related four years.

The total compensation cost associated with restricted stock and restricted stock units amounted to $37.9 million and $58.4 million for the three months ended June 30, 2009 and 2008, respectively, and $55.0 million and $101.4 million for the six months ended June 30, 2009 and 2008, respectively.

The following table details the activity of restricted stock:

	Period Ended June 30, 2009 (Shares in 000s)	**Weighted Average Grant Date Fair Value**
Restricted stock		
Balance, beginning of year		$
Grants	614 (1)	$ 12.17
Fulfillment of service requirement	(274) (1)	$ 12.53

Balance, end of period	340 (2)	$ 11.89

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

(1) Includes approximately 266,000 shares of restricted stock granted with no future service requirement in the first half of 2009. As such, these shares are shown as granted and vested in the first half of 2009.

(2) Represents restricted stock with a future service requirement.

The following table details the activity of restricted stock units:

	Period Ended June 30, 2009 (Shares in 000s)		**Weighted Average Grant Date Fair Value**	
	Future Service Required	No Future Service Required	Future Service Required	No Future Service Required
Restricted stock units				
Balance, beginning of year		34,262	$	$14.78
Grants	485	109	$12.93	$13.38
Distribution of underlying shares		(7,291)	$	$14.90
Forfeited		(290)	$	$20.32
Balance, end of period	485	26,790	$12.93	$14.68

The aggregate fair value of restricted stock and restricted stock units vested during the six months ended June 30, 2009 and 2008 was $3.4 million and $80.1 million, respectively. In addition, we granted restricted stock units with no future service period during the six months ended June 30, 2009 with an aggregate fair value of $1.5 million.

Stock Options

The fair value of all option grants are estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for all fixed option grants in 2004: dividend yield of 0.9%; expected volatility of 32.6%; risk-free interest rates of 3.0%; and expected lives of 4.8 years. There are no option

grants subsequent to 2004. A summary of our stock option activity for the six months ended June 30, 2009 is presented below (amounts in thousands, except per share data):

	Six Months Ended June 30, 2009	
	Options	Weighted Average Exercise Price
Outstanding at beginning of year	60	$ 7.24
Exercised	(12)	$ 5.64
Outstanding at end of period	48	$ 7.65
Options exercisable at period-end	48	$ 7.65

The total intrinsic value of stock options exercised during the six months ended June 30, 2009 and 2008 was $94,000 and $700,000, respectively. Cash received from the exercise of stock options during the six months ended June 30, 2009 and 2008 totaled $69,000 and $679,000, respectively, and the tax benefit realized from stock options exercised during the six months ended June 30, 2009 and 2008 was $37,000 and $274,000, respectively.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

The table below provides additional information related to stock options outstanding at June 30, 2009:
Dollars and shares in thousands, except per share data

June 30, 2009	**Outstanding, Net of Expected Forfeitures**	**Options Exercisable**
Number of options	48	48
Weighted-average exercise price	$ 7.65	$ 7.65
Aggregate intrinsic value	$ 657	$ 657
Weighted-average remaining contractual term, in years	1.85	1.85

At June 30, 2009, the intrinsic value of vested options was approximately $657,000 for which tax benefits expected to be recognized in equity upon exercise are approximately $258,000.

Directors Plan. We have a Directors Stock Compensation Plan (Directors Plan) which provides for an annual grant to each non-employee director of $100,000 of restricted stock or deferred shares (which are similar to restricted stock units). These grants are made automatically on the date directors are elected or reelected at our annual shareholders meeting. These grants vest three years after the date of grant and are expensed over the requisite service period. Additionally, the Directors Plan permits each non-employee director to elect to be paid annual retainer fees, meeting fees and fees for service as chairman of a Board committee in the form of cash, deferred cash or deferred shares. If deferred cash is elected, interest is credited to such deferred cash at the prime interest rate in effect at the date of each annual meeting of stockholders. If deferred shares are elected, dividend equivalents equal to dividends declared and paid on our common stock are credited to a Director s account and reinvested as additional deferred shares.

Employee Stock Purchase Plan. We also have an Employee Stock Purchase Plan (ESPP) which we consider non-compensatory effective January 1, 2007. All regular full-time employees and employees who work part-time over 20 hours per week are eligible for the ESPP. Annual employee contributions are limited to $21,250, are voluntary and are made via payroll deduction. The employee contributions are used to purchase our common stock. The stock price used is 95% of the closing price of our common stock on the last day of the applicable session (monthly).

Deferred Compensation Plan. We also have a Deferred Compensation Plan, which was established in 2001. In 2009 and 2008, employees with annual compensation of $200,000 or more were eligible to defer compensation on a pre-tax basis by investing it in our common stock at a discount (DCP shares) and/or stock options (prior to 2004) or by specifying the return in other alternative investments. We often invest directly, as a principal, in such investment alternatives related to our obligations to perform under the Deferred Compensation Plan. The compensation deferred by our employees is expensed in the period earned. As of the third quarter of 2008, the change in fair value of the specified other alternative investments are recognized in investment income and changes in the corresponding deferral compensation liability are reflected as compensation and benefits expense in our Consolidated Statements of Earnings. Prior financial statement periods have not been adjusted for this change in presentation as the impact of such change does not have a material impact on the related line items within the Consolidated Statements of Earnings for each of the periods presented.

Additionally, we recognize compensation cost related to the discount provided to employees in electing to defer compensation in DCP shares. This compensation cost was $0.1 million and $0.4 million during the three months ended June 30, 2009 and 2008, respectively, and $0.3 million and $0.6 million during the six months ended June 30, 2009 and 2008, respectively. As of June 30, 2009, there were 3,436,000 DCP shares issuable under the Plan.

Employee Stock Ownership Plan. We have an Employee Stock Ownership Plan (ESOP) which was established in 1988. We had no contributions and no compensation cost related to the ESOP during the three-month and six-month periods ended June 30, 2009 and 2008.

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Profit Sharing Plan. We have a profit sharing plan, covering substantially all employees, which includes a salary reduction feature designed to qualify under Section 401(k) of the Internal Revenue Code. The compensation cost related to this plan was $0.8 million and $1.7 million for the three months ended June 30, 2009 and 2008, respectively, and $3.0 million and $6.7 million for the six months ended June 30, 2009 and 2008, respectively.

Note 13. Income Taxes

As of June 30, 2009 and December 31, 2008, we had approximately $12.5 million and $13.5 million, respectively, of total gross unrecognized tax benefits. The total amount of unrecognized benefits that, if recognized, would favorably affect the effective tax rate in future periods was $8.1 million and $8.8 million (net of federal benefit of state taxes) at June 30, 2009 and December 31, 2008, respectively.

We are subject to U.S. federal income tax as well as income tax in multiple state and foreign jurisdictions. We have concluded all U.S federal income tax matters for the years through 2004. Substantially all material state and local and foreign income tax matters have been concluded for the years through 2001. The New York State income tax returns for the years 2001 through 2004 are currently under examination. The final outcome of these examinations is not yet determinable. The resolution of tax matters is not expected to have a material effect on our financial condition, but could be material to our results of operations for a particular period depending upon the results for that period.

We recognize interest accrued related to unrecognized tax benefits in interest expense. Penalties, if any, are recognized in other expenses. As of June 30, 2009 and December 31, 2008, we have accrued interest related to unrecognized tax benefits of approximately $3.6 million and $3.7 million, respectively. No penalties were accrued at June 30, 2009 and December 31, 2008.

Note 14. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per common share computations for the three and six month ended June 30, 2009 and 2008 (in thousands, except per share amounts):

	Three Months Ended		Six Months Ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
Earnings for basic earnings per common share:				
Net earnings (loss)	$ 73,995	$ 1,453	$ 106,421	$ (72,961)
Net earnings (loss) to noncontrolling interests	12,095	5,838	6,184	(8,039)
Net earnings (loss) to common shareholders	61,900	(4,385)	100,237	(64,922)
Less: Allocation of earnings to participating securities (1)	236	3,283	240	6,831
Net earnings (loss) available to common shareholders	$ 61,664	$ (7,668)	$ 99,997	$ (71,753)
Earnings for diluted earnings per common share:				
Net earnings (loss)	$ 73,995	$ 1,453	$ 106,421	$ (72,961)
Net earnings (loss) to noncontrolling interests	12,095	5,838	6,184	(8,039)
Net earnings (loss) to common shareholders	61,900	(4,385)	100,237	(64,922)
Add: Convertible preferred stock dividends	1,016	¾	¾	¾
Less: Allocation of earnings to participating securities (1)	235	3,283	240	6,831
Net earnings (loss) available to common shareholders	$ 62,681	$ (7,668)	$ 99,997	$ (71,753)
Shares:				
Average common shares used in basic computation	201,902	165,694	202,485	153,739
Stock options	20	¾	20	¾
Mandatorily redeemable convertible preferred stock	4,105	¾	¾	¾
Average common shares used in diluted computation	206,027	165,694	202,505	153,739
Earnings (loss) per common share:				
Basic	$ 0.31	$ (0.05)	$ 0.49	$ (0.47)
Diluted	$ 0.30	$ (0.05)	$ 0.49	$ (0.47)

(1) Represents dividends declared during the period on participating securities plus an allocation of undistributed earnings to participating securities. Losses are not allocated to participating securities. Participating securities represent restricted stock and restricted stock units for which requisite service has not yet been rendered and amounted to weighted average shares of 774,000 and 29,988,000 for the three-month periods ended June 30, 2009 and 2008, respectively, and 486,000 and 30,712,000 for the six-month periods ended June 30, 2009 and 2008, respectively. Dividends declared during the period on participating securities amounted to approximately $3.3 million and

$6.8 million for the three and six months ended June 30, 2008. No dividends were declared during the six months ended June 30, 2009. Undistributed earnings are allocated to participating securities based upon their right to share in earnings if all earnings for the period had been distributed.

The following securities were considered antidilutive and, therefore, not included in the computation of Diluted EPS:

	Number of securities outstanding at	
	6/30/2009 (1)	6/30/2008 (2)
Stock options		125,810
Mandatorily redeemable convertible preferred stock	4,105,138	4,105,138

(1) Mandatorily redeemable convertible preferred stock was considered antidilutive for the six-months ended June 30, 2009.

There were no antidilutive securities for the three-months ended June 30, 2009.

(2) Stock options and mandatorily redeemable convertible preferred stock were considered antidilutive for

the three- and
six-months
ended June 30,
2008.

Note 15. Segment Reporting

The Capital Markets reportable segment includes our traditional securities brokerage trading activities, including the results of our high yield secondary market trading activities, and investment banking activities. The Capital Markets reportable segment is managed as a single operating segment that provides the sales, trading and origination effort for various fixed income, equity and advisory products and services. The Capital Markets segment comprises a number of interrelated divisions. In addition, we choose to voluntarily disclose the Asset Management segment even though it is currently an immaterial non-reportable segment as defined by FASB Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information.*

Our reportable business segment information is prepared using the following methodologies:

- Net revenues and expenses directly associated with each reportable business segment are included in determining earnings before taxes.
- Net revenues and expenses not directly associated with specific reportable business segments are allocated based on the most relevant measures applicable, including each reportable business segment s net revenues, headcount and other factors.
- Reportable business segment assets include an allocation of indirect corporate assets that have been fully allocated to our reportable business segments, generally based on each reportable business segment s capital utilization.

Our net revenues, expenses, and total assets by segment are summarized below (amounts in millions):

	Capital Markets	Asset Management	Total
Three months ended June 30, 2009			
Net revenues	$ 589.7	$ 0.5	$ 590.2
Expenses	$ 450.9	$ 4.6	$ 455.5
Six months ended June 30, 2009			
Net revenues	$ 931.7	$ 0.5	$ 932.2
Expenses	$ 743.3	$ 10.3	$ 753.6
Segment assets	$ 26,140.0	$ 123.5	$ 26,263.5
Three months ended June 30, 2008			
Net revenues	$ 378.6	$ 13.5	$ 392.1
Expenses	$ 363.3	$ 14.3	$ 377.6
Six months ended June 30, 2008			

Net revenues	$ 607.6	$ (14.3)	$ 593.3
Expenses	$ 703.6	$ 28.5	$ 732.1
Segment assets	$ 24,909.7	$ 310.1	$ 25,219.8

Net Revenues by Geographic Region

Net revenues are recorded in the geographic region in which the senior coverage banker is located in the case of investment banking, or where the position was risk-managed within Capital Markets or the location of the investment advisor in the case of Asset Management. In addition, certain revenues associated with U.S. financial instruments and services that result from relationships with non-U.S. clients have been classified as non-U.S. revenues using an allocation consistent with our internal reporting. The following table presents net revenues by geographic region for the three and six months ended June 30, 2009 and 2008 (amounts in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
Americas (1)	$ 525,674	$ 319,838	$ 831,908	$ 479,089
Europe	65,009	69,943	100,569	107,523
Asia (including Middle East)	(490)	2,301	(327)	6,666
Net Revenues	$ 590,193	$ 392,082	$ 932,150	$ 593,278

(1) Substantially all relates to U.S. results.

Note 16. Commitments, Contingencies and Guarantees

The following table summarizes other commitments and guarantees at June 30, 2009:

		Maturity Date				
	Notional / Maximum Payout	2009	2010	2011 and 2012	2013 and 2014	2015 and Later
	(Dollars in Millions)					
Bank credit	$ 36.0		$ 18.0	$18.0		
Equity commitments	$ 418.2	$ 0.1	$250.0	$ 0.9	$22.4	$144.8
Loan commitments	$ 165.2	$150.0	$ 15.1		$ 0.1	
Derivative contracts- non credit related	$1,527.1	$974.2	$540.8	$ 9.2	$ 2.9	
Derivative contracts- credit related:						
Single name credit default swaps	$ 5.0			$ 5.0		
Index credit default swaps	$ 10.0					$ 10.0

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

The following table summarizes the external credit ratings of the underlyings or referenced assets for credit related guarantees and derivatives:

	Notional / Maximum Payout	External Credit Rating AAA/ Aaa	A	Unrated
		(Dollars in Millions)		
Bank credit	$ 36.0			$ 36.0
Loan commitments	$165.2			$165.2
Derivative contracts- credit related:				
Single name credit default swaps	$ 5.0		$5.0	
Index credit default swaps	$ 10.0	$10.0		

Bank Credit. As of June 30, 2009, we had outstanding guarantees of $36.0 million relating to bank credit obligations ($8.4 million of which is undrawn) of associated investment vehicles in which we have an interest.

Equity Commitments. On October 7, 2004, we entered into an agreement with Babson Capital and MassMutual to form Jefferies Finance LLC, a joint venture entity created for the purpose of offering senior loans to middle market and growth companies. The total committed equity capitalization by the partners to Jefferies Finance LLC is $500 million as of June 30, 2009. Loans are originated primarily through the investment banking efforts of Jefferies & Company, Inc., with Babson Capital providing primary credit analytics and portfolio management services. As of June 30, 2009, we have funded $107.5 million of our aggregate $250.0 million commitment leaving $142.5 million unfunded.

As of June 30, 2009, we have an aggregate commitment to invest equity of approximately $16.7 million in Jefferies Capital Partners IV L.P. and its related parallel fund, a private equity fund managed by a team led by Brian P. Friedman (one of our directors and Chairman, Executive Committee).

We have an aggregate commitment to fund JHYH of $600.0 million and have funded approximately $350.0 million as of June 30, 2009, leaving $250.0 million unfunded.

As of June 30, 2009, we had other equity commitments to invest up to $9.0 million in various other investments.

Loan Commitments. From time to time we make commitments to extend credit to investment-banking and other clients in loan syndication, acquisition-finance and securities transactions. These commitments and any related drawdowns of these facilities typically have fixed maturity dates and are contingent on certain representations, warranties and contractual conditions applicable to the borrower. As of June 30, 2009, we had $155.1 million of loan commitments outstanding to clients.

On August 11, 2008, we entered into a Credit Agreement with JCP Fund V Bridge Partners, LLC (the Borrower or JCP V), pursuant to which we may make loans to the Borrower in an aggregate principal amount of up to $50.0 million. As of June 30, 2009, we have funded approximately $39.9 million of the aggregate principal balance leaving approximately $10.1 million unfunded. (See Note 19 for additional discussion of the credit agreement with JCP V.)

Derivative Contracts. In accordance with FASB Interpretation No. 45, *Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45), we disclose certain derivative contracts meeting the FIN 45 definition of a guarantee. Such derivative contracts include credit default swaps (whereby a default or significant change in the credit quality of the underlying financial instrument may

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

obligate us to make a payment) and written equity put options. At June 30, 2009, the maximum payout value of derivative contracts deemed to meet the FIN 45 definition of a guarantee was approximately $1,542.1 million. For purposes of determining maximum payout, notional values are used; however, we believe the fair value of these contracts is a more relevant measure of these obligations because we believe the notional amounts overstate our expected payout. At June 30, 2009, the fair value of such derivative contracts approximated $(48.4) million. In addition, the derivative contracts deemed to meet the FIN 45 definition of a guarantee are before consideration of hedging transactions. We substantially mitigate our risk on these contracts through hedges, such as other derivative contracts and/or cash instruments. We manage risk associated with derivative contracts meeting the FIN 45 definition of a guarantee consistent with our risk management policies.

Jefferies Financial Products, LLC. JFP maintains credit intermediation facilities with highly rated European banks (the Banks), which allow JFP customers that require a counterparty with a high credit rating for commodity index transactions to transact with the Banks. The Banks simultaneously enter into offsetting transactions with JFP and receive a fee from JFP for providing credit support. In certain cases, JFP is responsible to the Banks for the performance of JFP s customers.

Other Guarantees. In the normal course of business we provide guarantees to securities clearinghouses and exchanges. These guarantees generally are required under the standard membership agreements, such that members are required to guarantee the performance of other members. To mitigate these performance risks, the exchanges and clearinghouses often require members to post collateral. Our obligations under such guarantees could exceed the collateral amounts posted; however, the potential for us to be required to make payments under such guarantees is deemed remote.

Note 17. Net Capital Requirements

As registered broker-dealers, Jefferies, Jefferies Execution and Jefferies High Yield Trading are subject to the Securities and Exchange Commission Uniform Net Capital Rule (Rule 15c3-1), which requires the maintenance of minimum net capital. Jefferies, Jefferies Execution and Jefferies High Yield Trading have elected to use the alternative method permitted by the Rule.

As of June 30, 2009, Jefferies, Jefferies Execution and Jefferies High Yield Trading s net capital and excess net capital were as follows (in thousands of dollars):

	Net Capital	Excess Net Capital
Jefferies	$690,799	$648,090
Jefferies Execution	$ 7,774	$ 7,524
Jefferies High Yield Trading	$497,853	$497,603

JEFFERIES GROUP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS CONTINUED
(Unaudited)

Note 18. Quarterly Dividends

The only restrictions on our present ability to pay dividends on our common stock are the dividend preference terms of our Series A convertible preferred stock and the governing provisions of the Delaware General Corporation Law.
Dividends per Common Share (declared and paid):

	1st Quarter	2nd Quarter
2009		
2008	$0.125	$0.125

No dividends have been declared or paid on our common stock since the second quarter of 2008.
During the year ended December 31, 2008, we recognized dividend equivalents of $34.4 million distributed on restricted stock units that were granted in prior periods, but which had not previously been charged against retained earnings.

Note 19. Related Party Transactions

On August 11, 2008, we entered into a Credit Agreement (the Credit Facility) with JCP Fund V Bridge Partners, LLC, a Delaware limited liability company (the Borrower), pursuant to which we may make loans to the Borrower in an aggregate principal amount of up to $50.0 million. The Borrower is owned by its two managing members, including Brian P. Friedman, one of our directors and executive officers. The loan proceeds may be used by the Borrower to make investments that are expected to be sold to Jefferies Capital Partners V, L.P. (Fund V) upon its capitalization by third party investors. Fund V will be managed by a team led by Mr. Friedman.
In July of 2009, the Borrower exercised its right to extend the final maturity date of the Credit Facility from August 12, 2009 to January 11, 2010. The interest rate on any loans made under the Credit Facility is the Prime Rate (as defined in the Credit Facility) plus 200 basis points, payable at the final maturity date, or upon repayment of any principal amounts, as applicable. The obligations of the Borrower under the Credit Facility are secured by its interests in each investment. As of June 30, 2009 and December 31, 2008, loans in the aggregate principal amount of approximately $41.3 million and $31.3 million, respectively, were outstanding under the Credit Facility and recorded in other investments on the consolidated statements of financial condition.

Note 20. Subsequent Events

We have evaluated whether events or transactions have occurred after June 30, 2009 that would require recognition or disclosure in these consolidated financial statements through August 6, 2009, which is the date of issuance of these financial statements.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

This report contains or incorporates by reference forward-looking statements within the meaning of the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include statements about our future and statements that are not historical facts. These forward-looking statements are usually preceded by the words believe, intend, may, will, or similar expressions. Forward-looking statements may contain expectations regarding revenues, earnings, operations and other financial projections, and may include statements of future performance, plans and objectives. Forward-looking statements also include statements pertaining to our strategies for future development of our business and products. Forward-looking statements represent only our belief regarding future events, many of which by their nature are inherently uncertain and outside of our control. It is possible that the actual results may differ, possibly materially, from the anticipated results indicated in these forward-looking statements. Information regarding important factors that could cause actual results to differ, perhaps materially, from those in our forward-looking statements is contained in this report and other documents we file. You should read and interpret any forward-looking statement together with these documents, including the following:

- the description of our business and risk factors contained in our annual report on Form 10-K for the fiscal year ended December 31, 2008 and filed with the SEC on February 27, 2009;
- the discussion of our analysis of financial condition and results of operations contained in this report under the caption Management s Discussion and Analysis of Financial Condition and Results of Operations ;
- the notes to the consolidated financial statements contained in this report; and
- cautionary statements we make in our public documents, reports and announcements.

Any forward-looking statement speaks only as of the date on which that statement is made. We will not update any forward-looking statement to reflect events or circumstances that occur after the date on which the statement is made.

Critical Accounting Policies

The consolidated financial statements are prepared in conformity with U.S. generally accepted accounting principles, which require management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related notes. Actual results can and will differ from estimates. These differences could be material to the financial statements.

We believe our application of accounting policies and the estimates required therein are reasonable. These accounting policies and estimates are constantly re-evaluated, and adjustments are made when facts and circumstances dictate a change. Historically, we have found our application of accounting policies to be appropriate, and actual results have not differed materially from those determined using necessary estimates.

We believe our critical accounting policies (policies that are both material to the financial condition and results of operations and require our most subjective or complex judgments) are our valuation of financial instruments, assessment of goodwill and our use of estimates related to compensation and benefits during the year. For further discussion of these and other significant accounting policies, see Note 1, Organization and Summary of Significant Accounting Policies, in our consolidated financial statements.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Valuation of Financial Instruments

Financial instruments owned and financial instruments sold, not yet purchased are recorded at fair value. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price). Unrealized gains or losses are generally recognized in principal transactions in our Consolidated Statements of Earnings.

The following is a summary of the fair value of major categories of financial instruments owned and financial instruments sold, not yet purchased, as of June 30, 2009 and December 31, 2008 (in thousands of dollars):

	June 30, 2009		December 31, 2008	
	Financial Instruments Owned	Financial Instruments Sold, Not Yet Purchased	Financial Instruments Owned	Financial Instruments Sold, Not Yet Purchased
Corporate equity securities	$ 1,163,078	$ 1,308,676	$ 945,747	$ 739,166
Corporate debt securities	2,115,462	1,819,590	1,851,216	1,578,395
Government, federal agency and other sovereign obligations	1,613,552	1,240,843	447,233	211,045
Mortgage- and asset-backed securities (1)	2,721,545		1,035,996	
Loans and other receivables	446,733	229,438	34,407	
Derivatives	220,043	188,019	298,144	220,738
Investments	73,441		75,059	
Other		4,288		223
	$ 8,353,854	$ 4,790,854	$ 4,687,802	$ 2,749,567

(1) A portion of our mortgage- and asset-backed securities inventory has been economically hedged through the forward sale of such securities with the execution of to-be-announced (TBA) securities with a notional amount outstanding of $2,201 million and $534 million at June 30, 2009

and December 31, 2008, respectively. TBA securities had a net fair value of $2.0 million and $1.7 million at June 30, 2009 and December 31, 2008, respectively, and are included in Financial Instruments Owned and Financial Instruments Sold, Not Yet Purchased in our Consolidated Statement of Financial Condition.

Fair Value Hierarchy FASB 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the inputs used to measure fair value and enhances disclosure requirements for fair value measurements. FASB 157 maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs reflect our assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the transparency of inputs as follows:

Level 1: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level 2: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these financial instruments include cash instruments for which quoted prices are available but traded less frequently, derivative instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level 3: Instruments that have little to no pricing observability as of the reported date. These financial

JEFFERIES GROUP, INC. AND SUBSIDIARIES

instruments are measured using management s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The availability of observable inputs can vary for different products. Fair value is a market-based measure; therefore, when market observable inputs are not available, our judgment is applied to reflect those judgments that a market participant would use in valuing the same asset or liability. We use prices and inputs that are current as of the measurement date even in periods of market disruption or illiquidity. Greater judgment in valuation is required when inputs are less observable or unobservable in the marketplace and judgment must be applied in determining the appropriateness of available prices, particularly in assessing whether available data reflects current prices and/or reflects the results of recent market transactions. The valuation of financial instruments classified in Level 3 of the fair value hierarchy involves the greatest amount of management judgment.

In April 2009, the FASB issued FASB Staff Position No. FAS 157-4 (FSP FAS 157-4), *Determining Whether a Market is Not Active and a Transaction Is Not Distressed*, which indicates that greater use of management judgment will be required in determining fair value when the volume or level of trading activity for a financial instrument has decreased and when certain factors suggest that observed transactions may not be reflective of orderly market transactions. FSP FAS 157-4 provides that prices or quotes should be weighed when estimating fair value with greater reliability placed on information from transactions that are considered to be representative of orderly market transactions. We adopted FSP FAS 157-4 in the second quarter of 2009. Our fair value measurement policies have been consistent with the guidance in FSP FAS 157-4 and the adoption of FSP FAS 157-4 did not have a material impact on our fair value estimates.

<u>Valuation Process for Financial Instruments</u> Financial instruments are valued at quoted market prices, if available. For financial instruments that do not have readily determinable fair values through quoted market prices, the determination of fair value is based upon consideration of available information, including current financial information, restrictions on dispositions, fair values of underlying financial instruments and quotations for similar instruments. Certain financial instruments have bid and ask prices that can be observed in the marketplace. For financial instruments whose inputs are based on bid-ask prices, mid-market pricing is applied and adjusted to the point within the bid-ask range that meets our best estimate of fair value. For offsetting positions in the same financial instrument, the same price within the bid-ask spread is used to measure both the long and short positions.

The valuation process for financial instruments may include the use of valuation models and other techniques. Adjustments to valuations derived from valuation models may be made when, in management s judgment, either the size of the position in the financial instrument in a nonactive market or other features of the financial instrument such as its complexity, or the market in which the financial instrument is traded require that an adjustment be made to the value derived from the models. An adjustment may be made if a financial instrument is subject to sales restrictions that would result in a price less than the quoted market price. Adjustments from the price derived from a valuation model reflect management s judgment that other participants in the market for the financial instrument being measured at fair value would also consider in valuing that same financial instrument and are adjusted for assumptions about risk uncertainties and market conditions. Results from valuation models and valuation techniques in one period may not be indicative of future period fair value measurements.

Cash products Where quoted prices are available in an active market, cash products are classified in Level 1 of the fair value hierarchy and valued based on the quoted exchange price, which is generally obtained from pricing services. Level 1 cash products are highly liquid instruments and include listed equity and money market securities and G-7 government and agency securities. Cash products classified within Level 2 of the fair value hierarchy are based primarily on broker quotations, pricing service data from external providers and prices observed for recently executed market transactions. If quoted market prices are not available for the specific security, then fair values are estimated by using pricing models, quoted prices of cash products with similar characteristics or discounted cash flow models. Examples of cash products classified within Level 2 of the fair value hierarchy are corporate, convertible and municipal bonds, agency and non-agency mortgage-backed securities and to-be-announced (TBA) securities. If there is limited transaction activity or less transparency to observe market-based inputs to valuation models, cash products presented at fair value are classified in Level 3 of the fair value hierarchy. Fair values of cash products

JEFFERIES GROUP, INC. AND SUBSIDIARIES

classified in Level 3 are generally based on an assessment of each underlying investment, cash flow models, market data of any recent comparable company transactions and trading multiples of companies considered comparable to the instrument being valued and incorporate assumptions regarding market outlook, among other factors. Cash products in this category include illiquid equity securities, equity interests in private companies, auction rate securities, commercial loans, private equity and hedge fund investments, distressed debt instruments and certain mortgage-backed securities as little external price information is currently available for these products. For distressed debt instruments and commercial loans, loss assumptions must be made based on default scenarios and market liquidity and prepayment assumptions must be made for mortgage-backed securities.

Derivative products Exchange-traded derivatives are valued using quoted market prices, which are generally obtained from pricing services, and are classified within Level 1 of the fair value hierarchy. Over-the-counter (OTC) derivative products are generally valued using models, whose inputs reflect assumptions that we believe market participants would use in valuing the derivative in a current period transaction. Inputs to valuation models are appropriately calibrated to market data, including, but not limited to, yield curves, interest rates, volatilities, equity, debt and commodity prices and credit curves. Fair value can be modeled using a series of techniques, including the Black-Scholes option pricing model and other comparable simulation models. For certain OTC derivative contracts, inputs to valuation models do not involve a high degree of subjectivity as the valuation model inputs are readily observable or can be derived from actively quoted markets. OTC derivative contracts classified in Level 2 include credit default swaps, interest rate swaps, foreign currency forwards, commodity swaps and option contracts, and debt and equity option contracts. Derivative products that are valued based on models with significant unobservable market inputs are classified within Level 3 of the fair value hierarchy. Level 3 derivative products include total return swaps and equity warrant and option contracts where the volatility of the underlying equity securities is not observable due to the terms of the contracts and the correlation sensitivity to market indices is not transparent for the term of the derivatives.

At June 30, 2009, the measurements of our cash products and derivative products at fair value were based on the following:

Valuation Basis	Financial Instruments Owned	Financial Instruments Sold, Not Yet Purchased
Exchange closing prices	16%	31%
Recently observed transaction prices	3%	
Data providers/pricing services	51%	40%
Broker quotes	16%	24%
Valuation techniques	14%	5%
	100%	100%

Pricing information obtained from external data providers may incorporate a range of market quotes from dealers, recent market transactions and benchmarking model derived prices to quoted market prices and trade data for comparable securities. External pricing data is subject to evaluation for reasonableness using a variety of means including comparisons of prices to those of similar product types, quality and maturities, consideration of the narrowness or wideness of the range of prices obtained, knowledge of recent market transactions and an assessment of the similarity in prices to comparable dealer offerings in a recent time period.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Certain cash products and derivative products trade infrequently and therefore have little price transparency. As a result, we may use alternative valuation techniques or valuation models as methods for determining fair value. When using alternative valuation techniques or valuation models, the following techniques are applied to different financial instruments classes:

Financial Instrument Classes	Valuation Techniques
Equity securities and convertible bonds	Valuations based on pending transactions involving the issuer or comparable companies, subsequent financings or recapitalizations, changes in financial ratios and cash flows of the underlying issuer and prices of comparable securities
High-yield corporate bonds	Valuations based on pending transactions involving the issuer or comparable companies, subsequent financings or recapitalizations, changes in financial ratios and cash flows of the underlying issuer and prices of comparable securities
Non-agency mortgage-backed and other asset-backed securities	Benchmarked to yields from market prices for comparable securities and calibrated based on expected cash flow characteristics of the underlying assets
Auction rate securities	Benchmarked to transactions and market prices of comparable securities and adjusted for projected cash flows and security structure, where appropriate *
Corporate bank and other commercial loans and other receivables	References to prices for other debt instruments of the same issuer; estimates of expected future cash flows incorporating assumptions regarding creditor default and/or recovery
Investments in hedge funds, funds of funds and certain private equity funds	Net asset values, as adjusted for any redemption restrictions
Investments in certain private equity funds	Discounted cash flow techniques
OTC equity and commodity options and equity warrants	Black-Scholes and comparable simulation models
Interest rate, credit default, commodity and total return swaps and foreign exchange forward contracts	Modeling, primarily involving discounted cash flows, which incorporate observable inputs related to interest rate curves, commodity indices, equity prices and volatilities, foreign currency spot curves and credit spreads of the underlying credit

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Level 3 Assets and Liabilities Level 3 assets were $661.3 million and $469.4 million as of June 30, 2009 and December 31, 2008, respectively, and represented approximately 8% and 10%, respectively, of total assets measured at fair value. Level 3 liabilities were $241.8 million and $11.7 million as of June 30, 2009 and December 31, 2008, respectively, and represented approximately 5% and 0.4%, respectively, of total liabilities measured at fair value. While our financial instruments sold, not yet purchased, which are included within liabilities on our Consolidated Statement of Financial Condition, are accounted for at fair value, we do not account for any of our other liabilities at fair value. At June 30, 2009 and December 31, 2008, Level 3 financial instruments were comprised of the following asset and liability classes:

	Financial Instruments Owned		Financial Instruments Sold, Not Yet Purchased	
(in thousands)	June 30, 2009	December 31, 2008	June 30, 2009	December 31, 2008
Loans and other receivables	$ 275,694	$ 107,929	$ 229,438	$
Corporate bonds	104,504	165,248	4,802	3,515
Mortgage and asset-backed securities	119,182	65,154		
Investments in hedge funds, fund of funds, and private equity funds	73,441	75,059		
Auction rate securities	59,772	10,579		
Equity securities and warrants	20,297	43,227		
Derivatives	5,499		7,538	8,197
Collateralized loan obligations	2,119	2,179		
Emerging market bonds	777			
Total Level 3 financial instruments	661,285	469,375	241,778	11,712
Level 3 financial instruments for which the firm bears no economic exposure	(251,268)	(146,244)		
Level 3 financial instruments for which the firm bears economic exposure	$ 410,017	$ 323,131	$ 241,778	$ 11,712

During the three and six months ended June 30, 2009, we had transfers of assets of $89.5 million and $115.0 million, respectively, from Level 2 to Level 3 and transfers of $77.3 million and $89.8 million, respectively, from Level 3 to Level 2. Transfers of assets from Level 2 to Level 3 during the three and six months ended June 30, 2009 were primarily related to residential mortgage-backed securities as observable transaction data became less available for the specific class of securities in inventory that were transferred. Additionally during the six months ended June 30, 2009, transfers of assets from Level 2 to Level 3 were related to some high yield corporate bond positions as market quotes became less observable throughout the quarter due to less frequent or nominal market activity and the opaqueness of observable credit spreads. Transfers of assets from Level 3 to Level 2 for the three and six months ended June 30, 2009 were primarily related to high yield corporate bonds where pricing information, trading activity observed and recently executed transactions provided transparency for purposes of determining fair values and related to residential mortgage-backed securities. During the three and six months ended June 30, 2009, we had transfers of liabilities of $3.0 million and $3.0 million, respectively, from Level 2 to Level 3 and transfers of liabilities of $-0- and $3.5 million from Level 3 to Level 2. Net losses on Level 3 assets of $2.6 million and $45.3 million for the three and six months ended June 30, 2009, respectively, are attributed primarily to equity warrants and certain equity securities due to

declining underlying equity prices and increased market volatility, and declines in loan positions due to widening of pricing due to increasing default probabilities for particular credits during the quarter, partially offset by increases in fair value for certain mortgage-backed securities due to increased market transactions observed for comparable positions and net gains on credit derivative positions. Additionally, for the three months ended June 30, 2009, net losses on Level 3 assets were also attributed to net writedowns on auction rate securities as market-based pricing levels and redemptions have dampened during the second quarter of 2009. Net losses on Level 3 liabilities were $3.7 million for the three months ended June 30, 2009 primarily attributed to writedowns on certain written equity options

JEFFERIES GROUP, INC. AND SUBSIDIARIES

due to declines in underlying equity prices. Net gains on Level 3 liabilities were $0.3 million for the six months ended June 30, 2009.

Level 3 cash instruments are frequently hedged with instruments classified within Level 1 and Level 2, and accordingly, gains or losses that have been reported in Level 3 are frequently offset by gains or losses attributable to instruments classified within Level 1 or Level 2 or by gains or losses on derivative contracts classified in Level 3 of the fair value hierarchy.

See Note 3, Financial Instruments, to the consolidated financial statements for information regarding the classification of our assets and liabilities measured at fair value.

Controls Over the Valuation Process for Financial Instruments Our Risk Management Department, independent of the trading function, plays an important role in determining that our financial instruments are appropriately valued and that fair value measurements are reliable. This is particularly important where prices or valuations that require inputs are less observable. In the event that observable inputs are not available, the control processes are designed to assure that the valuation approach utilized is appropriate and consistently applied and that the assumptions are reasonable. These control processes include reviews of the pricing model s theoretical soundness and appropriateness by risk management personnel with relevant expertise who are independent from the trading desks. Where a pricing model is used to determine fair value, recently executed comparable transactions and other observable market data are considered for purposes of validating assumptions underlying the model. An independent price verification process, separate from the trading process, is in place to ensure that observable market prices and market-based inputs are applied in valuation where possible.

Goodwill

As a result of acquisitions, we have acquired goodwill. Our goodwill balance of $355.1 million at June 30, 2009 is wholly attributed to our Capital Markets segment, which is our reporting unit under Statement of Financial Accounting Standards No. 142 (FASB 142), *Goodwill and Other Intangible Assets*. At least annually, we are required to assess goodwill for impairment by comparing the estimated fair value of the operating segment with its net book value. Periodically estimating the fair value of the Capital Markets segment requires significant judgment. We estimate the fair value of the operating segment based on valuation methodologies we believe market participants would use, including consideration of control premiums for recent acquisitions observed in the marketplace. We completed our annual impairment test as of September 30, 2008 and no impairment was identified.

During 2008, the financial services sector and the equity markets in general were affected by declines in stock prices and by lack of liquidity. Our market capitalization declined below recorded book value at various points during the year, particularly in the second half of 2008. Although we believe that market capitalization as a fair value indicator should be considered in the context of a reasonable time frame and general market conditions, we updated our goodwill impairment assessment subsequent to our annual testing date and no impairment was identified as of December 31, 2008. The judgments applied in estimating the fair value of our operating segment have an impact on the evaluation of any impairment. We do not believe there have been any events or changes in circumstances since our last assessment of goodwill for impairment warranting an update of our evaluation under FASB 142.

Compensation and Benefits

The use of estimates is important in determining compensation and benefits expenses for interim periods. A portion of our compensation and benefits represents discretionary bonuses, which are finalized at year end. In addition to the level of net revenues, our overall compensation expense in any given year is influenced by prevailing labor markets, revenue mix and our use of share-based compensation programs. We believe the most appropriate way to allocate estimated annual discretionary bonuses among interim periods is in proportion to projected net revenues earned. Consequently, during the year we accrue compensation and benefits based on annual targeted compensation ratios, taking into account the guidance contained in FASB 123R regarding the timing of expense recognition.

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Consolidated Results of Operations

The following table provides an overview of our consolidated results of operations:

(Dollars in Thousands, except for per share amounts)	Three Months Ended June 30, 2009	Three Months Ended June 30, 2008	Six Months Ended June 30, 2009	Six Months Ended June 30, 2008
Net revenues, less mandatorily redeemable preferred interest	$577,866	$383,080	$925,126	$ 605,227
Non-interest expenses	455,538	377,611	753,616	732,064
Earnings (loss) before income taxes	122,328	5,469	171,510	(126,837)
Income tax expense (benefit)	48,333	4,016	65,089	(53,876)
Net earnings (loss)	73,995	1,453	106,421	(72,961)
Net earnings (loss) to noncontrolling interests	12,095	5,838	6,184	(8,039)
Net earnings (loss) to common shareholders	61,900	(4,385)	100,237	(64,922)
Earnings (loss) per diluted common share	$ 0.30	$ (0.05)	$ 0.49	$ (0.47)
Effective tax rate	40%	73%	38%	42%

Our consolidated results of operations for the three and six months ended June 30, 2009 and June 30, 2008 include the effect of the adoption of FASB 160, *Noncontrolling Interests in Consolidated Financial Statements* (FASB 160) and FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities (FSP EITF 03-6-1). The results of operations and earnings per share information for 2008 have been retrospectively adjusted to conform with these new accounting pronouncements. For further discussion, see Note 10, Noncontrolling Interest and Mandatorily Redeemable Preferred Interests of Consolidated Subsidiaries, and Note 14, Earnings Per Share, in our consolidated financial statements.

Net revenues, less mandatorily redeemable preferred interest, for the three and six months ended June 30, 2009 (total revenues, net of interest expense and mandatorily redeemable preferred interest) increased 51% and 53%, respectively, from the three and six months ended June 30, 2008 to $577.9 million and $925.1 million, respectively, reflective of the strong performance from our expanded Fixed Income business, positive contributions from our High Yield business and improving capital markets activities, partially offset by declines in Equities net revenues.

Non-interest expenses of $455.5 million and $753.6 million for the second quarter and six months ended June 30, 2009, respectively, increased 21% and 3% from the comparable 2008 periods, respectively, primarily due to increased compensation costs due to due to revenue growth.

The effective tax rate was 40% for the second quarter of 2009, a decline compared to an effective tax rate of 73% for the second quarter of 2008. The decrease in our effective tax rate for the three months ended June 30, 2009 as compared to the same period ended June 30, 2008 is attributable to greater net income for the 2009 second quarter as compared to the comparable 2008 period and due to the changes in the mix of businesses that generated earnings during those periods.

On March 27, 2009, we acquired 100% of the membership interests of Depfa First Albany Securities LLC (Depfa), a leading New York City-based municipal securities broker-dealer that provides integrated investment banking, advisory, and sales and trading services. As of March 31, 2009, Depfa has been merged into Jefferies & Company and our consolidated results of operations for the three and six months ended June 30, 2009 include these municipal securities activities since the date of acquisition. See Note 6, Acquisitions, in our consolidated financial statements for further information regarding the acquisition of Depfa.

Effective June 18, 2009, Jefferies & Company, our wholly-owned subsidiary and a U.S. regulated broker-dealer, was designated a Primary Dealer by the Federal Reserve Bank of New York (FRBNY). As a Primary Dealer, Jefferies &

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Company, will be a counterparty to FRBNY in its open market operations, will participate directly in U.S. Treasury auctions and will provide market information and analysis to the trading desks at the FRBNY.

At June 30, 2009, we had 2,307 employees globally, inclusive of the addition of 75 employees with the acquisition of Depfa, compared to 2,451 employees globally at June 30, 2008 and 2,270 at December 31, 2008.

Our business, by its nature, does not produce predictable earnings. Our results in any given period can be materially affected by conditions in global financial markets and economic conditions generally. For a further discussion of the factors that may affect our future operating results, see Risk Factors in Part I, Item IA of our Annual Report on Form 10-K for the year ended December 31, 2008.

Revenues by Source

The Capital Markets reportable segment includes our traditional securities trading activities and our investment banking activities. The Capital Markets reportable segment is managed as a single operating segment that provides the sales, trading and origination effort for various equity, fixed income, high yield and advisory products and services. The Capital Markets segment comprises many divisions, with interactions among each. In addition, we choose to voluntarily disclose the Asset Management segment, even though it is currently an immaterial non-reportable segment as defined by FASB 131, *Disclosures about Segments of an Enterprise and Related Information*.

For presentation purposes, the remainder of Results of Operations is presented on a detailed product and expense basis rather than on a business segment basis because the Asset Management segment is immaterial as compared to the consolidated Results of Operations. Beginning with the first quarter of 2009, the net revenues presented of our equity, fixed income and high yield businesses include allocations of interest income and interest expense as we assess the profitability of these businesses inclusive of the net interest revenue or expense generated by the respective sales and trading activities, which is a function of the mix of each business assets and liabilities and the underlying funding requirements of such positions. Reclassifications have been made to our previous presentation of Revenues by Source for the three and six months ended June 30, 2008 to conform to the current presentation.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

The composition of our net revenues has varied over time as financial markets and the scope of our operations have changed. The composition of net revenues can also vary over the shorter term due to fluctuations in economic and market conditions. The following provides a summary of revenues by source for the three and six months ended June 30, 2009 and 2008:

	Three Months Ended			
	June 30, 2009		June 30, 2008	
(Dollars in Thousands)	Amount	% of Net Revenues	Amount	% of Net Revenues
Equities	$ 129,645	22%	$ 165,250	42%
Fixed income and commodities	276,616	47	72,763	19
High yield	60,907	10	31,218	8
Other	1,638			
Total	468,806	79	269,231	69
Investment banking	120,831	20	109,372	28
Asset management fees and investment income from managed funds:

Net revenues, less mandatorily redeemable preferred interest	$ 925,126		$ 605,227	

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Net Revenues

Net revenues, before interest on mandatorily redeemable preferred interests, for the second quarter of 2009 were a record $590.2 million, an increase of 51%, as compared to net revenues of $392.1 million for the second quarter of 2008. The considerable increase was primarily due to record quarterly fixed income and commodities revenues of $276.6 million, increased high yield and investment banking revenues as compared to the 2008 second quarter and a gain of $1.7 million recognized on extinguishment of a portion of our long-term debt, partially offset by a decrease in equities and asset management revenues for the second quarter of 2009 as compared to the similar 2008 quarter.

Net revenues, before interest on mandatorily redeemable preferred interests, for the first half of 2009 were $932.2 million, an increase of 57%, as compared to net revenues of $593.3 million for the second half of 2008. The increase in net revenues was due to significant increases in fixed income and commodities revenues of $480.0 million and high yield revenues of $53.6 million, smaller losses in our asset management businesses as compared to the 2008 second quarter and a gain of $7.7 million recognized on extinguishment of a portion of our long-term debt, partially offset by a decrease in equities revenues and investment banking revenues for the first half of 2009 as compared to the similar 2008 period.

Interest on mandatorily redeemable preferred interests represents the allocation of earnings and losses from our consolidated high yield business to third party noncontrolling interest holders invested in that business through mandatorily redeemable preferred securities. The change in the interest earnings and (loss) allocation for the three and six months ended June 30, 2009 from $9.0 million to $12.3 million and $(11.9) million to $7.0 million, respectively, is due to higher revenues from our high yield business in both the three and six month 2009 periods as compared to the comparable periods of 2008.

Equities Revenue

Equities revenue is comprised of equity commissions and principal transactions revenue, correspondent clearing and prime brokerage, and execution product revenues.

Total equities revenue was $129.6 million and $165.3 million, respectively, for the three months ended June 30, 2009 and 2008, representing a 22% decrease from the second quarter of 2008, primarily driven by declines in U.S. cash equities and equity derivatives revenues, securities lending revenues and net losses on certain proprietary strategic and alternative investments, partially offset by growth in our prime brokerage and electronic trading business and greater trading revenue contributions internationally with the expansion of our London equity sales and trading team. The decrease in equities revenues generated in our customer cash equities business is reflective of lower trading levels in the second quarter of 2009, particularly cash equity trading by hedge funds, and partly due to compressed commissions on lower average stock prices. Securities lending revenues for the second quarter of 2009 declined as compared to 2008 due to the lower interest rate environment, reduced dividends and the continuing decline in equity asset values. Second quarter 2009 principal trading revenues, including revenues from certain alternative investments and our investment in the Jefferies Finance joint venture, were more than offset by net inventory writedowns, including writedowns recognized on our auction rate securities portfolio during the quarter.

Total equities revenue was $232.5 million and $307.8 million, respectively, for the six months ended June 30, 2009 and 2008, representing a 24% decrease from the first half of 2008, primarily driven by declines in revenue from U.S. and international cash equities and equity derivatives, securities lending revenues and net losses on certain equity strategy positions, partially offset by growth in our prime brokerage and electronic trading business. The decrease in equities revenues generated in our customer cash equities business is reflective of lower trading levels in the first half of 2009, particularly cash equity trading by hedge funds, and compressed commissions on lower average stock prices. Securities lending revenues for the first half of 2009 declined as compared to 2008 due to the lower interest rate environment, reduced dividends and the continuing decline in equity asset values. Net losses were generated on certain equity trading strategies due to equity market volatility in the first half of 2009, partially offset by net revenues from certain alternative investments, including improved performance on our investment in the Jefferies Finance joint venture.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Fixed Income and Commodities Revenue

Fixed income and commodities revenue is primarily comprised of commissions, principal transactions and net interest revenue from investment grade corporate bonds, mortgage- and asset-backed securities, government and agency securities, municipal bonds, emerging markets debt, convertible securities, and commodities trading activities.

Fixed income and commodities revenue was $276.6 million, up 280% from revenue of $72.8 million for the second quarter of 2008. The overall significant increase in revenues in the second quarter of 2009 reflects the continued growth of our fixed income businesses, with strong contributions from our corporate bond, mortgage-backed securities, government and agencies, emerging markets, and convertible debt trading activities and the addition of municipal bond trading activities as a result of our acquisition of Depfa in March 2009. Revenue increases from these activities were nominally offset by a decline in commodities revenues. Corporate bond revenues were up substantially over the prior comparable period benefiting from increased volatility and volatile corporate spreads, as well as continued growth in market share along with record new corporate issuances enabling the business to further expand its volumes. This resulted in increased principal transactions trading revenues, predominantly arising from customer flow business. Significant increases in mortgage-backed securities revenues were driven by higher levels of customer trading volume and proprietary trading transactions, as well as net interest revenue contributions from the trading positions as funding rates have remained at low levels. Increases in revenues from government and agencies also were driven by greater volumes, attributed partially to the addition of professionals focused on government and agency product, and profiting from rising Treasury yields and increased new issuance volume. Emerging markets revenues included strong profits from its principal transactions activities as both volumes and market share grew. Commodities revenues for the second quarter of 2009 were down from the prior second quarter as the overall positions in the business have been reduced.

Fixed income and commodities revenue was $480.0 million, up from revenue of $113.1 million for the first half of 2008. The increased revenues in the first half of 2009 reflect the continued growth of our fixed income businesses across virtually all of our fixed income sales and trading activities, nominally offset by lower commodities revenues. Corporate bond, mortgage-backed securities, government and agencies, emerging markets and convertible debt revenues all benefited from increased trading volumes and greater market share. Mortgage-backed securities revenues also included an increase in net interest revenue over the prior comparable quarter in part due to the growth in its coupon-bearing portfolio.

High Yield Revenue

High yield revenue is primarily comprised of commissions, principal transactions and net interest revenue from secondary market trading activities in high yield and distressed securities and from bank loan trading activities.

High yield revenue was $60.9 million for the second quarter ended June 30, 2009, an increase of 95% over second quarter 2008 revenues of $31.2 million. The increase in revenues was attributed to an increase in sales activity generating higher commission revenue for the quarter as well as significant principal transaction gains given the improved markets. Bank loan trading revenues and net interest revenue on bank loan trading inventory contributed favorably to overall high yield revenue for the 2009 second quarter reflective of the strategic expansion of this platform. Principal trading net losses recognized during the quarter partially offset sales and trading revenues as compared to principal trading net gains in the second quarter of 2008.

For the six months ended June 30, 2009, high yield revenue was $53.6 million as compared to negative revenue of $21.8 million for the six months ended June 30, 2008. High yield revenues were up considerably for the six month 2009 period due to greater production and increased trading volumes and the substantial growth in our bank loan trading business, partially offset by net proprietary trading losses versus the comparable 2008 period.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Of the results recognized in Jefferies High Yield Holdings, LLC (our high yield and distressed securities trading and investment business), approximately 66% and 62% of such results for the quarters and six month periods ended June 30, 2009 and 2008, respectively, are allocated to the minority investors and are presented within interest on mandatorily redeemable preferred interests and net loss on noncontrolling interests in our Consolidated Statements of Earnings.

Investment Banking Revenue

Our investment banking division provides a full range of financial advisory services to our clients across all industry sectors, as well as debt, equity and equity-linked capital raising services, and encompasses both U.S. and international capabilities. Capital markets revenues include underwriting revenues related to debt, equity and convertible financing services. Advisory revenues are generated from our business advisory services with respect to merger, acquisition and restructuring transactions and fund placement activities. The following table sets forth our investment banking revenues:

	Three Months Ended			Six Months Ended		
	June 30, 2009	June 30, 2008	% Change	June 30, 2009	June 30, 2008	% Change
(in thousands)						
Capital markets	$ 84,217	$ 24,507	244%	$ 98,789	$ 57,905	71%
Advisory	36,614	84,865	-57%	59,128	150,674	-61%
Total	$ 120,831	$ 109,372	10%	$ 157,917	$ 208,579	-24%

Capital markets revenues totaled $84.2 million for the three months ended June 30, 2009, compared to $24.5 million for the three months ended June 30, 2008, a 244% increase, reflective of an improved market environment for debt and equity underwritings, the contribution of our mortgage underwriting platform and the addition of our municipal securities underwriting capabilities during the 2009 second quarter. Revenues from our advisory business of $36.6 million for the second quarter of 2009 declined as compared to the second quarter of 2008 revenues of $84.9 million, reflective of the dampened general market for mergers and acquisitions, given currently less than attractive company valuations and more limited availability of acceptable financing.

Capital markets revenues totaled $98.8 million for the six months ended June 30, 2009, compared to $57.9 million for the six months ended June 30, 2008, an increase of 71% over the periods. Revenues from our advisory business of $59.1 million for the second quarter of 2009 declined 61% compared to the second quarter of 2008 revenues of $150.7 million, reflective of the overall decline in closed mergers and transaction volume for these comparative periods experienced by the investment banking advisory sector as a whole and the strong advisory revenue performance experienced in the earlier part of 2008.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Asset Management Fees and Investment (Loss) Earnings from Managed Funds

Asset management revenue includes revenues from management, administrative and performance fees from funds managed by us, revenues from asset management and performance fees from third-party managed funds and investment loss from our investments in these funds. The following summarizes revenues from asset management fees and investment loss for the three and six months ended June 30, 2009, and 2008 (in thousands of dollars):

	Three Months Ended		Six Months Ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
Asset management fees:				
Fixed Income	$ 1,223	$ 2,023	$ 2,944	$ 4,614
Equities	796	145	1,462	697
Convertibles	1,452	2,575	2,827	5,717
Commodities/Real Assets	243	15	243	15
	3,714	4,758	7,476	11,043
Investment (loss) earnings from managed funds(1)	(3,158)	8,721	(6,957)	(25,360)
Total	$ 556	$ 13,479	$ 519	$ (14,317)

(1) Of the total investment loss from managed funds, $(0.2) million and $(0.3) million is attributed to noncontrolling interest holders for the three and six months ended June 30, 2009, respectively, and $(0.2) million and $(1.0) million is attributed to noncontrolling interest holders for the three and six months ended June 30, 2008, respectively.

Asset management fees declined to $3.7 million for the three months ended June 30, 2009 as compared to asset management fees of $4.8 million for the three months ended June 30, 2008, primarily as a result of the closure of certain funds managed by us, as well as limited fee revenue generation from other managed funds due to declines in assets under management, partially offset by fee revenue generated by new commodity managed accounts opened during the second quarter of 2009. Investment loss from managed funds totaled $3.2 million for the second quarter of 2009 as compared to an investment income of $8.7 million for the second quarter of 2008 primarily due to declines in asset valuations, particularly within the technology sector and collateralized loan obligations, and due to the closure of several funds in 2008, partially offset by improved investment revenues generated from portfolio strategies in our managed financial services funds and convertible bond fund.

Asset management fees declined to $7.5 million for the six months ended June 30, 2009 as compared to asset management fees of $11.0 million for the six months ended June 30, 2008, primarily as a result of the closure or liquidation of certain funds managed by us, as well as limited fee revenue generation from other managed funds due to declines in assets under management, partially offset by fee revenue generated by new commodity managed accounts opened during the second quarter of 2009. Investment loss from managed funds totaled $7.0 million for the first half of 2009 as compared to an investment loss of $25.4 million for the first half of 2008 primarily due to the closure or liquidation of several of our managed funds and due to declines in the asset valuations of other managed funds, including our collateralized loan obligations, partially offset by investment revenues generated from portfolio strategies in our convertible bond fund.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Assets under Management

Period end assets under management (based on the fair value of the assets) by predominant asset strategy were as follows (in millions of dollars):

(in millions)	June 30, 2009	June 30, 2008
Assets under management (1):		
Fixed Income	$ 1,480	$ 1,620
Equities	73	68
Convertibles	1,479	2,473
	3,032	4,161
Assets under management by third parties (2):		
Private Equity	600	600
Total	$ 3,632	$ 4,761

(1) Assets under management include assets actively managed by us and third parties including hedge funds, collateralized loan obligations (CLOs), managed accounts and other private investment funds. Assets under management do not include the assets of funds that are consolidated due to the level or nature of our investment in such funds.

(2) Third party managed funds

in which we have a 50% or less interest in the entities that manage these assets or otherwise receive a portion of the management fees.

We manage certain portfolios as mandated by client arrangements and management fees are assessed based upon an agreed upon notional account value. Managed accounts based on this measure by predominant asset strategy were as follows (in millions of dollars):

(notional account value)	June 30, 2009	June 30, 2008
Managed Accounts:		
Equities	$ 40	$
Comodities	110	
	$ 150	$

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Change in Assets under Management

(in millions)	Three Months Ended June 30, 2009	Three Months Ended June 30, 2008	% Change	Six Months Ended June 30, 2009	Six Months Ended June 30, 2008	% Change
Balance, beginning of period	$ 3,242	$ 5,152	-37%	$ 3,475	$ 5,576	-38%
Net cash flow out	(9)	(420)		(388)	(741)	
Net market appreciation (depreciation)	399	29		545	(74)	
	390	(391)		157	(815)	
Balance, end of period	$ 3,632	$ 4,761	-24%	$ 3,632	$ 4,761	-24%

The net increase in assets under management of $390 million and $157 million during the three and six months ended June 30, 2009, respectively, is primarily attributable to market appreciation of the underlying assets in our global convertible bond funds and in our managed CLOs, partially offset by redemptions from our managed convertible bond funds in the first quarter of 2009. The net decline in assets under management for the three months ended June 30, 2008 is primarily due to customer redemptions from our global convertible bond funds. Net cash outflows during the first half of 2008 are primarily attributable by redemptions from our managed global convertible bonds funds and other equity funds, while net market depreciation for the six months ended June 30, 2008 is primarily attributable to declines in valuation of our managed CLOs and other fixed income funds due to the deteriorating credit market conditions experienced in the first half of 2008, partially offset by increased valuations in our global convertible bond funds.

Change in Managed Accounts

(notional account value) (in millions)	Three Months Ended June 30, 2009	Six Months Ended June 30, 2009
Balance, beginning of period	$	$
Net account additions	150	150
Balance, end of period	$ 150	$ 150

The change in the notional account value of managed accounts for the three months and six months ended June 30, 2009 is attributed to the additions of new accounts where the management fees are assessed on the agreed upon notional account value.

The following table presents our invested capital in managed funds at June 30, 2009 and December 31, 2008 (in thousands):

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES

	June 30, 2009	December 31, 2008
Unconsolidated funds (1)	$ 108,857	$ 95,728
Consolidated funds (2)	59,652	70,465
Total	$ 168,509	$ 166,193

(1) Our invested capital in unconsolidated funds is reported within Investments in managed funds on the Consolidated Statement of Financial Condition.

(2) Assets under management include assets actively managed by us and third parties including hedge funds, CLOs, managed accounts and other private investment funds. Due to the level or nature of our investment in such funds, certain funds are consolidated and the assets and liabilities of these funds are reflected in our consolidated financial statements

primarily within financial instruments owned or financial instruments sold, not yet purchased. We do not recognize asset management fees for funds that we have consolidated.

Compensation and Benefits

Compensation and benefits expense consists primarily of salaries, benefits, cash bonuses, commissions, accruals for annual share-based compensation awards and the amortization of certain share-based compensation to employees. Compensation and benefits totaled $348.2 million and $561.6 million for the three and six months ended June 30, 2009, respectively, compared to $277.5 million and $537.5 million for the comparable periods in 2008, an increase of 25% and 4%. Our ratio of compensation and benefits to net revenues for the second quarters of 2009 was 59% as compared to 71% for the second quarter of 2008 and 60% and 91% for the first half of 2009 and 2008, respectively. Employee headcount decreased to 2,307 total global employees at June 30, 2009 as compared to 2,451 employees at June 30, 2008.

The increase in compensation and benefits expense for the second quarter of 2009 as compared to the same 2008 period is commensurate with our revenue growth seen in the second quarter of 2009 as we have expanded our fixed income and international equity trading capabilities, partially offset by actions taken in 2008 to reduce our cost base as reflected in the decline in our compensation and benefits to net revenues ratio over the periods. For the six month period ended June 30, 2009, compensation and benefits increased as compared to the comparable 2008 period primarily due to added revenue from our expanding our fixed income and equity businesses. Compensation costs also increased due to staffing both domestically and internationally in connection with personnel investments associated with our strategic business growth, which has been offset by savings from reduction in force actions taken in December 2008. The first half of 2008 also includes additional compensation costs recognized in the first quarter of 2008 related to employee terminations in early 2008.

In December 2008, we approved an overall compensation strategy that modified the terms of all outstanding restricted stock and restricted stock unit (RSUs) awards of active employees and of future restricted stock and RSUs granted as part of year-end compensation programs, such that employees who terminate their employment or are terminated without cause may continue to vest, so long as the awards are not forfeited as a result of other forfeiture provisions of those awards. Accordingly, we accrue compensation costs associated with year-end share-based awards on a quarterly basis as the service period is attributed during the compensation year. Prior to this modification, restricted stock and RSUs awarded to employees as part of year-end compensation were generally subject to continued service and employment requirements with the grant date fair value of these awards amortized as compensation expense over the required service period, which was typically five years. Awards granted to new employees in connection with the commencement of employment with Jefferies may contain service conditions and be amortized over future periods, depending upon the terms of the granted awards.

Non-Compensation Expense

Non-compensation expenses were $107.3 million and $192.0 million for the three and six months ended June 30, 2009, respectively, versus $100.1 million and $194.6 million for the three and six months ended June 30, 2008, respectively, an increase of 7% and 1% decrease. The increase in non-compensation expenses for the second quarter

of 2009 as compared to the 2008 second quarter is primarily driven by an increase in floor brokerage and clearing fees as compared to 2008 due to the level of trading volumes, by an increase in technology and communications costs as the expansion of our personnel and business platforms has increased the demand for market data and technology connections, and by new SIPC assessment fees. The increase in floor brokerage and clearing fees and technology and communications expenses for the second quarter of 2009 is partially offset by a decline in occupancy and equipment costs due to a reduction in space usage and office reorganizations as a result of the structural changes made to our businesses in the latter part of 2008. For the second half of 2009 the net decline in non-compensation expenses is attributed to increases in brokerage and clearing expenses and technology and communications expenses due to business expansion, which were more than offset by declines in occupancy and equipment, business development and other expenses as a result of the cost-reduction initiatives enacted at the end of 2008.

Earnings / (Loss) before Income Taxes

Earnings before income taxes was $122.3 million for the second quarter of 2009 up from earnings before income taxes of $5.5 million for the second quarter of 2008. For the six months ended June 30, 2009, we recorded earnings before income taxes of $171.5 million as compared to a (loss) before income taxes of $(126.8) million for the six months ended June 30, 2008.

Income Taxes

The provision for income taxes totaled a tax expense of $48.3 million and $4.0 million for the three months ended June 30, 2009 and 2008, respectively. The provision for income taxes resulted in effective tax rates of 40% and 73%, respectively. The decrease in our effective tax rate for the three months ended June 30, 2009 as compared to the same period ended June 30, 2008 is attributable to greater net income for the 2009 second quarter as compared to the comparable 2008 period and due to the changes in the mix of our businesses that generated increased earnings over those periods.

The provision for income taxes totaled a tax expense/(benefit) of $65.1 million and $(53.9) million for the six months ended June 30, 2009 and 2008, respectively, and resulted in effective tax rates of 38% and 42%, respectively. The decrease in our effective tax rate for the six months ended June 30, 2009 as compared to the six months ended June 30, 2008 is primarily attributable to the difference in the mix of our businesses that generated earnings over the differing periods.

Earnings / (loss) per Common Share

Diluted earnings per common share was $0.30 for the second quarter of 2009 on 206,027,000 shares compared to diluted loss per common share of $(0.05) for the second quarter of 2008 on 165,694,000 shares. Diluted earnings per common share was $0.49 for the first half of 2009 on 202,505,000 shares compared to diluted loss per common share of $(0.47) for the first half of 2008 on 153,739,000 shares. Convertible preferred stock dividends were not included in the calculation of diluted earnings/ (loss) per common share for the six months ended June 30, 2009 and for the three and six months ended June 30, 2008 due to their anti-dilutive nature. Earnings (loss) per common share for the second quarter and six months ended June 30, 2009 and 2008 includes the effect of the adoption of FSP EITF 03-6-1. See Note 14, Earnings Per Share, in our consolidated financial statements for further information regarding the calculation of earnings/ (loss) per common share.

Mortgage and Lending Related Trading Exposures

We have exposure to residential mortgage-backed securities through our fixed income mortgage- and asset-backed sales and trading business and exposure to other credit products through our corporate lending and investing activities. The following table provides a summary of these exposures as of June 30, 2009 and December 31, 2008 (in millions):

JEFFERIES GROUP, INC. AND SUBSIDIARIES

	June 30, 2009	December 31, 2008
Residential mortgage-backed agency securities (1)	$ 2,051	$ 952
Government guaranteed mortgage loans and certificates	381	
TBA securities (2)	(2,201)	(534)
Net agency mortgage-backed security and government guaranteed mortgage loan exposure (2)	230	418
Prime mortgage-backed securities (3)	77	20
Alt-A mortgage-backed securities (4)	134	74
Subprime mortgage-backed securities (4)	13	30
Other mortgage- and asset-backed securities	66	3
Total nonagency mortgage- and asset-backed security exposure	290	127
Total net mortgage loan and mortgage- and asset-backed security exposure	$ 520	$ 545
Corporate loans (5)	$ 447	$ 95.2
Collateralized loan obligation (CLOs) certificates (6)	$ 2.6	$ 6.3

Additionally, we have executed interest rate derivatives to reduce certain interest rate risk exposure arising from the above instruments.

(1) Residential mortgage-backed agency securities are represented at fair value and classified within Financial Instruments Owned in our Consolidated Statements of Financial Condition and represent securities issued by government sponsored entities backed by mortgage loans with an implicit guarantee from

the U.S. government as to payment of principal and interest. These assets are classified primarily within Level 2 of the fair value hierarchy.

(2) Our exposure to government agency mortgage loans and mortgage-backed agency securities is reduced through the forward sale of such loans and securities as represented by the notional amount of outstanding TBA securities at June 30, 2009 and December 31, 2008. Such contracts are accounted for at a net fair value of $2.0 and $1.7 million at June 30, 2009 and December 31, 2008, respectively, which are included in Financial Instruments Owned and Financial Instruments Sold, Not Yet Purchased in our Consolidated Statements of Financial

Condition and are classified in Level 2 of the fair value hierarchy.

(3) Prime mortgage-backed securities are presented at fair value, are classified within Level 2 of the fair value hierarchy and included within Financial Instruments Owned in our Consolidated Statements of Financial Condition.

(4) Alt-A mortgage-backed securities are backed by mortgage loans which are categorized between prime mortgage loans and subprime mortgage loans due to certain underwriting and other loan characteristics. Subprime mortgage-backed securities are backed by mortgage loans secured by real property made to a borrower with diminished, impaired or limited credit history. Amounts at June 30, 2009 and

December 31, 2008 are presented at their fair value, are generally classified within Level 3 of the fair value hierarchy and included within Financial Instruments Owned in our Consolidated Statements of Financial Condition.

(5) Corporate loans represent primarily senior unsecured bank loans purchased or issued in connection with our trading and investing activities are presented at fair value as included within Financial Instruments Owned in our Consolidated Statements of Financial Condition and are primarily classified within Level 3 of the fair value hierarchy at June 30, 2009 and December 31, 2008.

(6) We own interests consisting of various classes of senior, mezzanine and subordinated notes in CLO vehicles which

are comprised of corporate senior secured loans, unsecured loans and high yield bonds, of which $2.1 million and $2.1 million are reported at fair value and included within Financial Instruments Owned in our Consolidated Statements of Financial Condition and classified within Level 3 of the fair value hierarchy at June 30, 2009 and December 31, 2008, respectively, and $0.5 million and $4.2 million are accounted for at fair value and included in Investments in Managed Funds in our Consolidated Statements of Financial Condition at June 30, 2009 and December 31, 2008, respectively.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Of our nonagency mortgage-backed securities and other asset-backed securities at June 30, 2009, the following table provides further information regarding the credit ratings of the securities and the issue date of the securities (in millions):

	Credit Ratings						
Vintage year	AAA	AA+ to AA-	A+ to A-	BBB+ to BBB-	Below Investment Grade	Private Placement	Fair Value
2009						7.1	7.1
2008		1.7					1.7
2007	0.2	9.9	0.2	0.1	21.6	0.4	32.4
2006	2.0	18.4	3.4	20.1	30.1	8.8	82.8
2005 and prior	0.1	29.4	31.2	49.7	53.6	1.5	165.5
Total	$ 2.3	$ 59.4	$ 34.8	$ 69.9	$ 105.3	$ 17.8	$ 289.5

Liquidity, Financial Condition and Capital Resources

Our Chief Financial Officer and Treasurer are responsible for developing and implementing our liquidity, funding and capital management strategies. These policies are determined by the nature of our day to day business operations, business growth possibilities, regulatory obligations, and liquidity requirements.

Market conditions, which had been volatile throughout 2008, began to stabilize in the second quarter of 2009, resulting in some tightening of credit spreads and improvements in market liquidity. The availability of financing sources has improved as 2009 as progressed. During the second quarter, we successfully accessed the public debt markets with the issuance of $400 million ten-year notes and were designated as a Primary Dealer by the New York Federal Reserve Bank. Our long-term borrowings have an average tenor of 13.8 years; and we have no scheduled debt maturities until 2012, nominal short-term borrowings and significant cash balances on hand. We continue to actively manage our liquidity profile and counterparty relationships to ensure ongoing access to both short and longer-term funding.

Our actual level of capital, total assets, and financial leverage are a function of a number of factors, including, asset composition, business initiatives, regulatory requirements and cost availability of both long term and short term funding. We have historically maintained a highly liquid balance sheet, with a substantial portion of our total assets consisting of cash, highly liquid marketable securities and short-term receivables, arising principally from traditional securities brokerage activity. The highly liquid nature of these assets provides us with flexibility in financing and managing our business.

Liquidity

The following are financial instruments that are cash and cash equivalents or are deemed by management to be generally readily convertible into cash, marginable or accessible for liquidity purposes within a relatively short period of time (in thousands of dollars):

	June 30, 2009	December 31, 2008
Cash and cash equivalents:		
Cash in banks	$ 164,576	$ 765,056
Money market investments	799,449	529,273
Total cash and cash equivalents	964,025	1,294,329

Cash and securities segregated (1)		1,050,331		1,151,522
	$	2,014,356	$	2,445,851

JEFFERIES GROUP, INC. AND SUBSIDIARIES

(1) Consists of deposits at exchanges and clearing organizations, as well as deposits in accordance with Rule 15c3-3 of the Securities Exchange Act of 1934, which subjects Jefferies, as a broker dealer carrying client accounts, to requirements related to maintaining cash or qualified securities in a segregated reserve account for the exclusive benefit of its clients.

A substantial portion of our assets are liquid, consisting of cash or assets readily convertible into cash. The majority of securities positions (both long and short) in our trading accounts are readily marketable and actively traded. In addition, receivables from brokers and dealers are primarily current open transactions, margin deposits or securities borrowed transactions, which are typically settled or closed out within a few days. Receivable from customers includes margin balances and amounts due on transactions in the process of settlement. Most of our receivables are secured by marketable securities.

Our assets are funded by equity capital, senior debt, mandatorily redeemable convertible preferred stock, mandatorily redeemable preferred interests, securities loaned, securities sold under agreements to repurchase, customer free credit balances, bank loans and other payables. Bank loans represent temporary (usually overnight) secured and unsecured short-term borrowings, which are generally payable on demand and generally bear interest at a spread over the federal funds rate. We had no outstanding secured bank loans as of June 30, 2009 and December 31, 2008. Unsecured bank loans are typically overnight loans used to finance financial instruments owned or clearing related balances. We had no outstanding unsecured bank loans as of June 30, 2009 and December 31, 2008. Average daily bank loans for the six months ended June 30, 2009 and the year ended December 31, 2008 were $75.3 million and $94.9 million, respectively. We have arrangements with various banks for financing of up to $1,055.3 million, including $975.0 million of bank loans and $80.3 million of letters of credit. Of the $1,055.3 million of uncommitted lines of credit, $255.3 million is unsecured and $800.0 million is secured. Secured amounts are collateralized by a combination of customer, non-customer and firm securities. Letters of credit are used in the normal course of business mostly to satisfy various collateral requirements in lieu of depositing cash or securities.

Liquidity Management Policies

The primary goal of our liquidity management activities is to ensure adequate funding over a range of market environments. The key objectives of the liquidity management framework are to support the successful execution of our business strategies while ensuring sufficient liquidity through the business cycle and during periods of financial distress. Our liquidity management policies are designed to mitigate the potential risk that we may be unable to access adequate financing to service our financial obligations without material franchise or business impact.

The principal elements of our liquidity management framework are the Funding Action Plan and the Cash Capital Policy.

Funding Action Plan. The Funding Action Plan models a potential liquidity contraction over a one-year time period. Our funding action plan model scenarios incorporate potential cash outflows during a liquidity stress event, including, but not limited to, the following: (a) repayment of all unsecured debt maturing within one year and no incremental unsecured debt issuance; (b) maturity roll-off of outstanding letters of credit with no further issuance and replacement with cash collateral; (c) higher margin requirements on or lower availability of secured funding; (d) client cash withdrawals; (e) the anticipated funding of outstanding investment commitments and (f) certain accrued expenses and other liabilities and fixed costs.

Cash Capital Policy. We maintain a cash capital model that measures long-term funding sources against requirements. Sources of cash capital include our equity, preferred stock and the non-current portion of long-term borrowings. Uses of cash capital include the following: (a) illiquid assets such as buildings, equipment, goodwill, net intangible assets, exchange memberships, deferred tax assets and certain investments; (b) a portion of securities inventory that is not expected to be financed on a secured basis in a credit-stressed environment (i.e., margin requirements) and (c) drawdowns of unfunded commitments. We seek to maintain a surplus cash capital position. Our equity capital of $2,433.0 million, mandatorily redeemable convertible preferred stock of $125.0 million, mandatorily redeemable preferred interest of consolidated subsidiaries of $287.9 million, and long-term borrowings (debt obligations scheduled to mature in more than 12 months) of $2,137.5 million comprise our total capital of $4,983.4 million as of June 30, 2009, which exceeded cash capital requirements.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Analysis of Financial Condition and Capital Resources

Financial Condition

As previously discussed, we have historically maintained a highly liquid balance sheet, with a substantial portion of our total assets consisting of cash, highly liquid marketable securities and short-term receivables, arising principally from traditional securities brokerage activity. Total assets increased to $26,263.5 million at June 30, 2009 or by 31%, from $19,978.7 million at December 31, 2008 primarily due to an increase in the level of our financial instruments owned inventory, growth in our securities lending and repurchase agreement activities and receivables associated with principal and agency transactions consistent with the increase in the level of our financial instruments owned inventory. Our financial instruments owned, including securities pledged to creditors, increased $3,666.1 million to $8,353.9 million at June 30, 2009, while our financial instruments sold, not yet purchased also increased by $2,041.3 million to $4,790.9 million at June 30, 2009. Our securities borrowed and securities purchased under agreements to resell increased by $1,923.7 million, or 19%, while our securities loaned and securities sold under agreements to repurchase increased $2,841.3 million, or 28%. On June 30, 2009, we issued 8.5% senior unsecured notes, maturing 2019, with an aggregate principal amount of $400 million and received net cash proceeds of $393.9 million.

Common stockholders equity increased to $2,139.9 million at June 30, 2009 from $2,121.3 million at December 31, 2008. The increase in our stockholders equity is principally attributed to net earnings to common shareholders of $100.2 million for the first half of 2009 and currency translation adjustments for foreign subsidiaries as the British pound strengthened against the US dollar, partially offset by the repurchase of approximately 6.2 million shares of our common stock during the first quarter of 2009, which increased our treasury stock by $78.8 million, and the impact of a tax deficiency on the deductibility of employee share-based awards upon distribution of the awards to employees, which occurred in the first quarter of 2009.

The following table sets forth book value, pro forma book value, tangible book value and pro forma tangible book value per share (dollars in thousands, except per share data):

	June 30, 2009	December 31, 2008
Common stockholders equity	$ 2,139,909	$ 2,121,271
Less: Goodwill	(355,058)	(358,837)
Tangible common stockholders equity	$ 1,784,851	$ 1,762,434
Shares outstanding	171,927,175	163,216,038
Outstanding restricted stock units (5)	27,274,490	34,260,077
Adjusted shares outstanding	199,201,665	197,476,115
Common book value per share (1)	$ 12.45	$ 13.00
Pro forma common book value per share (2)	$ 10.74	$ 10.74
Tangible common book value per share (3)	$ 10.38	$ 10.80
Pro forma tangible common book value per share (4)	$ 8.96	$ 8.92

(1) Common book value per share equals common stockholders equity divided by common shares outstanding.

(2) Pro forma common book value per share equals common stockholders equity divided by common shares outstanding adjusted for outstanding restricted stock units.

(3) Tangible common book value per share equals tangible common stockholders equity divided by common shares outstanding.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

(4) Pro forma common tangible book value per share equals tangible common stockholders equity divided by common shares outstanding adjusted for outstanding restricted stock units.

(5) Outstanding restricted stock units, which give the recipient the right to receive common shares at the end of a specified deferral period, are granted in connection with our share-based employee incentive plans and include both awards that contain future service requirements and awards for which the future service requirements have been met.

Tangible common stockholders equity, tangible common book value per share, pro forma common book value per share and pro forma tangible common book value per share are non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of financial performance that includes adjustments to the most directly comparable measure calculated and presented in accordance with GAAP, or for which there is no specific GAAP guidance. We calculate tangible common stockholders equity as common stockholders equity less intangible assets, specifically goodwill. Goodwill is subtracted from common stockholders equity in determining tangible common

stockholders equity as we believe that goodwill does not constitute an operating asset, which can be deployed in a liquid manner. We calculate tangible common book value per share by dividing tangible common stockholders equity by common stock outstanding. We calculate pro forma common book value per share as common stockholders equity divided by common shares outstanding adjusted for outstanding restricted stock units. We calculate pro forma tangible common book value per share by dividing tangible common stockholders equity by common shares outstanding adjusted for outstanding restricted stock units. We believe the adjustment to shares outstanding for outstanding restricted stock units reflects potential economic claims on our net assets enabling shareholders to better assess their standing with respect to our financial condition. Valuations of financial companies are often measured as a multiple of tangible common stockholders equity, inclusive of any dilutive effects, making these ratios, and changes in these ratios, a meaningful measurement for investors.

On December 30, 2008 we granted 5,138,821 shares of restricted stock as part of year-end compensation. The closing price of our common stock was $13.80 on December 30, 2008. Approximately, 4.5 million of these shares of restricted stock were issued during the first half of 2009, which increased shares outstanding at June 30 2009, which was offset by the repurchase of approximately 6.2 million shares at an average price of $12.77 per share and approximately 72,000 shares at an average price of $20.29 per share during the first quarter and second quarter of 2009, respectively.

At June 30, 2009, we have $125.0 million of Series A convertible preferred stock outstanding, which is convertible into 4,105,138 shares of our common stock at an effective conversion price of approximately $30.45 per share.

Leverage Ratios

The following table presents total assets, adjusted assets, total stockholders equity and tangible stockholders equity with the resulting leverage ratios as of June 30, 2009 and December 31, 2008:

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES

	June 30, 2009	December 31, 2008
Total assets	$ 26,263,510	$ 19,978,685
Deduct: Securities borrowed	(8,874,080)	(9,011,903)
Securities purchased under agreements to resell	(3,308,548)	(1,247,002)
Add: Financial instruments sold, not yet purchased	4,790,854	2,749,567
Less derivative liabilities	(188,019)	(220,738)
Subtotal	4,602,835	2,528,829
Deduct: Cash and securities segregated and on deposit for regulatory purposes or deposited with clearing and depository organizations	(1,050,331)	(1,151,522)
Goodwill	(355,058)	(358,837)
Adjusted assets	$ 17,278,328	$ 10,738,250
Total stockholders equity	$ 2,432,976	$ 2,409,076
Deduct: Goodwill	(355,058)	(358,837)
Tangible stockholders equity	$ 2,077,918	$ 2,050,239
Leverage ratio (1)	10.8	8.3
Adjusted leverage ratio (2)	8.3	5.2

(1) Leverage ratio equals total assets divided by total stockholders equity.

(2) Adjusted leverage ratio equals adjusted assets divided by tangible stockholders equity.

Adjusted assets exclude certain assets that are considered self-funded and, therefore, of lower risk, which are generally financed by customer liabilities through our securities lending activities. We view the resulting measure of adjusted leverage as a more relevant measure of financial risk when comparing financial services companies.

Capital Resources

We had total long-term capital of $5.0 billion and $4.6 billion resulting in a long-term debt to equity capital ratio of 105% and 90%, at June 30, 2009 and December 31, 2008, respectively. Our total capital base as of June 30, 2009 and December 31, 2008 was as follows (in thousands):

	June 30, 2009	December 31, 2008
Long-Term Debt	$ 2,137,483	$ 1,764,274
Mandatorily Redeemable Convertible Preferred Stock	125,000	125,000
Mandatorily Redeemable Preferred Interest of Consolidated Subsidiaries	287,947	280,923
Total Stockholders Equity	2,432,976	2,409,076
Total Capital	$ 4,983,406	$ 4,579,273

Our ability to support increases in total assets is largely a function of our ability to obtain short-term secured and unsecured funding, primarily through securities lending, and through our $1,055.3 million of uncommitted secured and unsecured bank lines. Our ability is further enhanced by the cash proceeds from our $600 million senior unsecured debt issuance in June 2007 and our $400 million senior unsecured debt issuance in June 2009 and the sale of 26,585,310 shares of our common stock to Leucadia National Corporation in April 2008 (see Note 1, Organization and Summary of Significant Accounting Policies, to the consolidated financial statements for additional discussion). We had no outstanding bank loans as of June 30, 2009 and December 31, 2008. We did not declare dividends to be paid during the third or fourth quarter of 2008 or during 2009.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

At June 30, 2009, our senior long-term debt, net of unamortized discount, consisted of contractual principal payments (adjusted for amortization) of $492.5 million, $346.4 million, $393.9 million, $348.8 million, $248.7 million and $307.3 million due in 2036, 2027, 2019, 2016, 2014 and 2012, respectively. At June 30, 2009, contractual interest payment obligations related to our senior long-term debt are $130.2 million for 2009, $145.4 million for 2010 and 2011, $126.7 million for 2012, $121.8 million for 2013, and $1,229.6 million for all of the remaining periods after 2013.

We rely upon our cash holdings and external sources to finance a significant portion of our day-to-day operations. Access to these external sources, as well as the cost of that financing, is dependent upon various factors, including our debt ratings. Our current debt ratings are dependent upon many factors, including industry dynamics, operating and economic environment, operating results, operating margins, earnings trend and volatility, balance sheet composition, liquidity and liquidity management, our capital structure, our overall risk management, business diversification and our market share and competitive position in the markets in which we operate. Deteriorations in any of these factors could impact our credit ratings thereby increasing the cost of obtaining funding and impacting certain trading revenues, particularly where collateral agreements are referenced to our external credit ratings. On June 17, 2009, Fitch Ratings affirmed our long-term and short-term ratings at BBB and F2, respectively, and retained its outlook of negative for all ratings. On July 7, 2009, Standard and Poor s affirmed our long-term debt ratings at BBB and retained its outlook of negative. Our long-term debt ratings are as follows:

	Rating
Moody s Investors Services	Baa2
Standard and Poor s	BBB
Fitch Ratings	BBB

Table of Contents

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Net Capital

Jefferies, Jefferies Execution and Jefferies High Yield Trading are subject to the net capital requirements of the SEC and other regulators, which are designed to measure the general financial soundness and liquidity of broker-dealers. Jefferies, Jefferies Execution and Jefferies High Yield Trading use the alternative method of calculation.

As of June 30, 2009, Jefferies, Jefferies Execution and Jefferies High Yield Trading s net capital and excess net capital were as follows (in thousands of dollars):

	Net Capital	Excess Net Capital
Jefferies	$690,799	$648,090
Jefferies Execution	$ 7,774	$ 7,524
Jefferies High Yield Trading	$497,853	$497,603

Contractual Obligations and Commitments

The tables below provide information about our commitments related to debt obligations and guarantees as of June 30, 2009. For debt obligations, leases and investments, the table presents principal cash flows with expected maturity dates.

		Expected Maturity Date				
	Notional / Maximum Payout	**2009**	**2010**	**2011 and 2012**	**2013 and 2014**	**2015 and Later**
			(Dollars in Millions)			
Debt obligations:						
Senior notes	$2,137.5			$307.3	$248.7	$1,581.5
Mandatorily redeemable convertible preferred stock	$ 125.0					$ 125.0
Bank credit	$ 36.0		$ 18.0	$ 18.0		
Equity commitments	$ 418.2	$ 0.1	$250.0	$ 0.9	$ 22.4	$ 144.8
Loan commitments	$ 165.3	$150.0	$ 15.1		$ 0.2	
Derivative contracts- non credit	$1,527.1	$974.2	$540.8	$ 9.2	$ 2.9	
Derivative contracts- credit related	$ 15.0			$ 5.0		$ 10.0

In accordance with FIN No. 45 (FIN 45), *Guarantor s Accounting and Disclosure Requirements or Guarantees, Including Indirect Guarantees of Indebtedness of Others*, certain derivative contracts meet the definition of a guarantee under FIN 45 and are therefore included in the above table. For additional information on these commitments, see Note 16, Commitments, Contingencies and Guarantees, to the consolidated financial statements.

In the normal course of business we engage in other off-balance sheet arrangements, including derivative contracts. Neither derivatives notional amounts nor underlying instrument values are reflected as assets or liabilities in on our consolidated Statements of Financial Condition. Rather, the fair value of derivative contracts are reported in the consolidated Statements of Financial Condition as Financial instruments owned derivative contracts or Financial instruments sold, not yet purchased derivative contracts as applicable. Derivative contracts are reflected net of cash paid or received pursuant to credit support agreements and are reported on a net-by-counterparty basis when a legal right of offset exists under an enforceable master netting agreement. For additional information about our accounting policies and our derivative activities see Note 1, Organization and Summary of Significant Accounting Policies, and Note 3, Financial Instruments, to the consolidated financial statements.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

Due to the uncertainty regarding the timing and amounts that will ultimately be paid, our liability for unrecognized tax benefits has been excluded from the above contractual obligations table. See Note 13 to the consolidated financial statements for further information on FIN 48.

Risk Management

Risk is an inherent part of our business and activities. The extent to which we properly and effectively identify, assess, monitor and manage each of the various types of risk involved in our activities is critical to our financial soundness and profitability. We seek to identify, assess, monitor and manage the following principal risks involved in our business activities: market, credit, operational, legal and compliance, new business, reputational and other. Risk management is a multi-faceted process that requires communication, judgment and knowledge of financial products and markets. Senior management takes an active role in the risk management process and requires specific administrative and business functions to assist in the identification, assessment and control of various risks. Our risk management policies, procedures and methodologies are fluid in nature and are subject to ongoing review and modification.

Market Risk. The potential for changes in the value of financial instruments is referred to as market risk. Our market risk generally represents the risk of loss that may result from a change in the value of a financial instrument as a result of fluctuations in interest rates, credit spreads, equity prices, commodity prices and foreign exchange rates, along with the level of volatility. Interest rate risks result primarily from exposure to changes in the yield curve, the volatility of interest rates, and credit spreads. Equity price risks result from exposure to changes in prices and volatilities of individual equities, equity baskets and equity indices. Commodity price risks result from exposure to the changes in prices and volatilities of individual commodities, commodity baskets and commodity indices. We make dealer markets in equity securities, debt securities and commodities. We attempt to hedge our exposure to market risk by managing our net long or short positions. Due to imperfections in correlations, gains and losses can occur even for positions that are hedged. Position limits in trading and inventory accounts are established and monitored on an ongoing basis. Each day, consolidated position and exposure reports are prepared and distributed to various levels of management, which enable management to monitor inventory levels and results of the trading groups.

Credit Risk. Credit risk represents the loss that we would incur if a client, counterparty or issuer of financial instruments, such as securities and derivatives, held by us fails to perform its contractual obligations. We follow industry practices to reduce credit risk related to various trading, investing and financing activities by obtaining and maintaining collateral. We adjust margin requirements if we believe the risk exposure is not appropriate based on market conditions. Liabilities to other brokers and dealers related to unsettled transactions (i.e., securities failed-to-receive) are recorded at the amount for which the securities were purchased, and are paid upon receipt of the securities from other brokers or dealers. In the case of aged securities failed-to-receive, we may purchase the underlying security in the market and seek reimbursement for losses from the counterparty in accordance with standard industry practices.

Operational Risk. Operational risk generally refers to the risk of loss resulting from our operations, including, but not limited to, improper or unauthorized execution and processing of transactions, deficiencies in our operating systems, business disruptions and inadequacies or breaches in our internal control processes. Our businesses are highly dependent on our ability to process, on a daily basis, a large number of transactions across numerous and diverse markets in many currencies. In addition, the transactions we process have become increasingly complex. If any of our financial, accounting or other data processing systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes, people or systems, we could suffer an impairment to our liquidity, financial loss, a disruption of our businesses, liability to clients, regulatory intervention or reputational damage. These systems may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services or our inability to occupy one or more of our buildings. The inability of our systems to accommodate an increasing volume of transactions could also constrain our ability to expand our businesses.

We also face the risk of operational failure or termination of any of the clearing agents, exchanges, clearing houses or other financial intermediaries we use to facilitate our securities transactions. Any such failure or termination could

adversely affect our ability to effect transactions and manage our exposure to risk.

JEFFERIES GROUP, INC. AND SUBSIDIARIES

In addition, despite the contingency plans we have in place, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the communities in which they are located. This may include a disruption involving electrical, communications, transportation or other services used by us or third parties with which we conduct business.

Our operations rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Although we take protective measures and endeavor to modify them as circumstances warrant, our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code, and other events that could have a security impact. If one or more of such events occur, this potentially could jeopardize our or our clients or counterparties confidential and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our, our clients , our counterparties or third parties operations. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us.

Legal and Compliance Risk. Legal and compliance risk includes the risk of non-compliance with applicable legal and regulatory requirements. We are subject to extensive regulation in the different jurisdictions in which we conduct our business. We have various procedures addressing issues such as regulatory capital requirements, sales and trading practices, use of and safekeeping of customer funds, credit granting, collection activities, anti-money laundering and record keeping. We also maintain an anonymous hotline for employees or others to report suspected inappropriate actions by us or by our employees or agents.

New Business Risk. New business risk refers to the risks of entering into a new line of business or offering a new product. By entering a new line of business or offering a new product, we may face risks that we are unaccustomed to dealing with and may increase the magnitude of the risks we currently face. We review proposals for new businesses and new products to determine if we are prepared to handle the additional or increased risks associated with entering into such activities.

Reputational Risk. We recognize that maintaining our reputation among clients, investors, regulators and the general public is an important aspect of minimizing legal and operational risks. Maintaining our reputation depends on a large number of factors, including the selection of our clients and the conduct of our business activities. We seek to maintain our reputation by screening potential clients and by conducting our business activities in accordance with high ethical standards.

Other Risk. Other risks encountered by us include political, regulatory and tax risks. These risks reflect the potential impact that changes in local and international laws and tax statutes have on the economics and viability of current or future transactions. In an effort to mitigate these risks, we continuously review new and pending regulations and legislation and participate in various industry interest groups.

Accounting and Developments

FASB 141R. In December 2007, the FASB issued FASB 141 (revised 2007), *Business Combinations* (FASB 141R). Under FASB 141R, an entity is required to recognize the assets acquired, liabilities assumed, contractual contingencies and contingent consideration measured at their fair value at the acquisition date for any business combination consummated after the effective date. It further requires that acquisition-related costs are to be recognized separately from the acquisition and expensed as incurred. This statement is effective for financial statements issued for fiscal years beginning after December 15, 2008. Accordingly, we apply the provisions of FASB 141R to business combinations occurring after January 1, 2009. Adoption of FASB 141R did not affect our financial condition, results of operations or cash flows, but may have an effect on accounting for future business combinations.

FASB 160. In December 2007, the FASB issued FASB 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (FASB 160). FASB 160 requires an entity to clearly identify and

JEFFERIES GROUP, INC. AND SUBSIDIARIES

present ownership interests in subsidiaries held by parties other than the entity in the consolidated financial statements within the equity section but separate from the entity s equity. It also requires the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income; changes in ownership interest be accounted for similarly, as equity transactions; and when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary and the gain or loss on the deconsolidation of the subsidiary be measured at fair value. We adopted FASB 160 on January 1, 2009. Refer to Note 10 for further discussion on the adoption of FASB 160.

FSP FAS 140-3. In February 2008, the FASB issued FSP FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* (FSP FAS 140-3). FSP FAS 140-3 requires an initial transfer of a financial asset and a repurchase financing that was entered into contemporaneously or in contemplation of the initial transfer to be evaluated as a linked transaction under FASB 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (FASB No. 140) unless certain criteria are met. FSP FAS 140-3 is effective for fiscal years beginning after November 15, 2008. FSP FAS 140-3 is to be applied prospectively for new transactions entered into after the adoption date. The adoption of FSP FAS 140-3 did not have a material effect on financial condition, cash flows or results of operations.

FASB 161. In March 2008, the FASB issued FASB 161, *Disclosures about Derivative Instruments and Hedging Activities* (FASB 161). FASB 161 amends and expands the disclosure requirements of FASB 133, *Accounting for Derivative Instruments and Hedging Activities*, and requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair values and amounts of gains and losses on derivative contracts and disclosures about credit-risk-related contingent features in derivative agreements. FASB 161 is effective for the fiscal years and interim periods beginning after November 15, 2008. Accordingly, we adopted FASB 161 effective January 1, 2009. Since FASB 161 requires only additional disclosures concerning derivatives and hedging activities, adoption of FASB 161 did not affect our financial condition, results of operations or cash flows.

FSP APB 14-1. In May 2008, the FASB issued FSP APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP APB 14-1). FSP APB 14-1 clarifies that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) are not addressed by APB 14, *Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants* and specifies that issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity s nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. FSP APB 14-1 is effective for fiscal years and interim periods beginning after December 31, 2008. The adoption of FSP APB 14-1 did not affect our financial condition, results of operations or cash flows.

FSP EITF 03-6-1. In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share under the two-class method described in FASB 128, *Earnings per Share*. Under FSP EITF 03-6-1, unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of EPS pursuant to the two-class method. FSP EITF 03-6-1 is effective for fiscal years and interim periods beginning after December 31, 2008. Accordingly, we adopted FSP EITF 03-6-1 on January 1, 2009. All prior-period EPS data presented has been adjusted to comply with the provisions of FSP EITF 03-6-1. The adoption of FSP EITF 03-6-1 reduced previously reported Basic and Diluted EPS from a loss of $0.03 to a loss of $0.05 for the three months ended June 30, 2008 and reduced previously reported Basic and Diluted EPS from a loss of $0.42 to a loss of $0.47 for the six months ended June 30, 2008.

FSP FAS 133-1 and FIN 45-4. In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161* (FSP FAS 133-1 and FIN 45-4). FSP FAS 133-1 and FIN 45-4 require enhanced disclosures by sellers of credit derivatives, including credit

JEFFERIES GROUP, INC. AND SUBSIDIARIES

derivatives embedded in a hybrid instrument, and require additional disclosure about the current status of the payment/performance risk of a guarantee. We adopted FSP FAS 133-1 and FIN 45-4 for our year end consolidated financial statements as of December 31, 2008. Since FSP FAS 133-1 and FIN 45-4 require only additional disclosures, the adoption did not have an effect on our financial condition, results of operations or cash flows.

FSP FAS 157-4. In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4). FSP FAS 157-4 provides additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. FSP FAS 157-4 also includes guidance on identifying circumstances that indicate a transaction is not orderly. We adopted FSP FAS 157-4 as of April 1, 2009. The adoption of FSP FAS 157-4 did not have a material effect on our financial condition, results of operations and cash flows.

FASB 165. In May 2009, the FASB issued FASB 165, *Subsequent Events* (FASB 165). FASB 165 requires that management evaluate events and transactions that may occur for potential recognition or disclosure in the financial statements after the balance sheet date through the date the financial statements are issued and determines the circumstances under which such events or transactions must be recognized in the financial statements. We adopted FASB 165 as of our financial period ended June 30, 2009. The adoption of FASB 165 did not have an effect on our financial condition, results of operations or cash flows.

FASB 166. In June 2009, the FASB issued FASB 166, *Accounting for Transfers of Financial Assets* (FASB 166). FASB 166 amends FASB 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. FASB 166 eliminates the concept of a qualifying special purpose entity, requires that a transferor consider all arrangements made contemporaneously with, or in contemplation of, a transfer of assets when determining whether derecognition of a financial asset is appropriate, clarifies the requirement that a transferred financial asset be legally isolated from the transferor and any of its consolidated affiliates, stipulates that constraints on a transferee s ability to freely pledge or exchange transferred assets causes the transfer to fail sale accounting, and defines participating interests and provides guidance on derecognizing participating interests. We will adopt FASB 166 as of January 1, 2010. We are currently evaluating the impact of FASB 166 on our consolidated financial statements.

FASB 167. In June 2009, the FASB issued FASB 167, *Amendments to FASB Interpretation No. 46(R)* (FASB 167). FASB 167 amends certain requirements of FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities,* and requires that the party who has the power to direct the activities of a variable interest entity that most significantly impact the entity s economic performance and who has an obligation to absorb losses of the entity or a right to receive benefits from the entity that could potentially be significant to the entity consolidate the variable interest entity. FASB 167 eliminates the quantitative approach previously applied to assessing the consolidation of a variable interest entity and requires ongoing reassessments for consolidation. We will adopt FASB 167 as of January 1, 2010. We are currently evaluating the impact of FASB 167 on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We use a number of quantitative tools to manage our exposure to market risk. These tools include:

inventory position and exposure limits, on a gross and net basis;

scenario analyses, stress tests and other analytical tools that measure the potential effects on our trading net revenues of various market events, including, but not limited to, a large widening of credit spreads, a substantial decline in equities markets and significant moves in selected emerging markets; and

risk limits based on a summary measure of risk exposure referred to as Value-at-Risk.

Value-at Risk

Jefferies estimates Value-at-Risk (VaR) using a model that simulates revenue and loss distributions on all financial instruments by applying historical market changes to the current portfolio. Using the results of this simulation, VaR measures potential loss of trading revenues at a given confidence level over a specified time horizon. We calculate VaR over a one day holding period measured at a 95% confidence level which implies that, on average, we expect to realize a loss of daily trading revenue at least as large as the VaR amount on one out of every twenty trading days.

VaR is one measurement of potential loss in trading revenues that may result from adverse market movements over a specified period of time with a selected likelihood of occurrence. As with all measures of VaR, our estimate has substantial limitations due to our reliance on historical performance, which is not necessarily a predictor of the future. Consequently, this VaR estimate is only one of a number of tools we use in our daily risk management activities. VaR is a model that predicts the future risk based on historical data. We could incur losses greater than the reported VaR because the historical market prices and rates changes may not be an accurate measure of future market events and conditions. In addition, the VaR model measures the risk of a current static position over a one-day horizon and might not predict the future position. When comparing our VaR numbers to those of other firms, it is important to remember that different methodologies could produce significantly different results

The VaR numbers below are shown separately for interest rate, equity, currency and commodity products, as well as for our overall trading positions, excluding corporate investments in asset management positions, using a historical simulation approach. The aggregated VaR presented here is less than the sum of the individual components (i.e., interest rate risk, foreign exchange rate risk, equity risk and commodity price risk) due to the benefit of diversification among the risk categories. Diversification benefit equals the difference between aggregated VaR and the sum of VaRs for the four risk categories. The following table illustrates the VaR for each component of market risk.

Daily VaR[(1)]
(In Millions)
Value-at-Risk in trading portfolios

	VaR at			**Average VaR 3 Months Ended**		
Risk Categories	**6/30/09**	**3/31/09**	**12/31/08**	**6/30/09**	**3/31/09**	**12/31/08**
Interest Rates	$5.95	$2.99	$3.70	$5.64	$3.96	$3.48
Equity Prices	$2.61	$3.59	$2.31	$3.20	$2.28	$4.18
Currency Rates	$1.09	$0.20	$0.15	$0.32	$0.24	$0.27
Commodity Prices	$1.16	$0.87	$0.55	$0.95	$0.68	$0.44
Diversification Effect[2]	$4.40	$3.31	$2.55	$3.94	$2.71	$3.62
Firmwide	$6.41	$4.34	$4.16	$6.17	$4.45	$4.75

Daily VaR [(1)]
(In Millions)

	Value-at-Risk Highs and Lows for Three Months Ended					
	6/30/09		**3/31/09**		**12/31/08**	
Risk Categories	High	Low	High	Low	High	Low
Interest Rates	$7.68	$4.00	$5.79	$2.51	$4.58	$2.50
Equity Prices	$7.54	$1.71	$5.20	$1.13	$8.62	$2.16
Currency Rates	$1.09	$0.06	$0.46	$0.06	$0.58	$0.09
Commodity Prices	$1.68	$0.40	$1.36	$0.29	$0.76	$0.23
Firmwide	$8.26	$4.15	$6.43	$3.48	$7.82	$3.31

(1) VaR is the potential loss in value of our trading positions due to adverse market movements over a defined time horizon with a specific confidence level. For the VaR numbers reported above, a one-day time horizon and 95% confidence level were used.

(2) Equals the difference between firmwide VaR and the sum of the VaRs by risk categories. This effect is due to the market categories not being perfectly correlated.

Average VaR of $6.17 million during the second quarter of 2009 increased from the $4.45 million average during the first quarter of 2009 due mainly to an increase in exposure to Interest Rates due mainly to an increase in fixed income exposures associated with larger inventories.

The following table presents our daily VaR over the last four quarters:

Daily VaR Trend

VaR levels were elevated for a period of time in 2008 after the purchase of common shares of Leucadia National Corporation in April 2008.

VaR Back-Testing

The comparison of daily actual revenue fluctuations with the daily VaR estimate is the primary method used to test the efficacy of the VaR model. Back testing is performed at various levels of the trading portfolio, from the holding company level down to specific business lines. A back-testing exception occurs when the daily loss exceeds the daily VaR estimate. Results of the process at the aggregate level demonstrated no outliers when comparing the 95% one-day VaR with the back-testing profit and loss in the second quarter of 2009. A 95% confidence one-day VaR model usually should not have more than twelve (1 out of 20 days) back-testing exceptions on an annual basis. Back-testing profit and loss is a subset of actual trading revenue, excluding fees, commissions, and certain provisions. We compare the trading revenue with VaR for back-testing purposes because VaR assesses only the potential change in position value due to overnight movements in financial market variables such as prices, interest rates and volatilities under

Item 4. Controls and Procedures

We , with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2009. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of June 30, 2009 are functioning effectively to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

No change in our internal control over financial reporting occurred during the quarter ended June 30, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Many aspects of our business involve substantial risks of legal liability. In the normal course of business, we have been named as defendants or co-defendants in lawsuits involving primarily claims for damages. We are also involved in a number of judicial and regulatory matters arising out of the conduct of our business. Based on currently available information, we do not believe that any matter will have a material adverse effect on our financial condition, although, depending on our results for a particular period, an adverse determination could be material for a particular period.

Prior to February 2008, we bought and sold auction rate securities (ARS) for PCS clients and institutional customers that used our cash management desk. We did not underwrite or act as an auction agent for any issuer of auction rate securities. A number of firms that underwrote ARS have entered into settlements with various regulators to, among other measures, purchase at par ARS sold to retail customers. We have provided information on our ARS transactions to the New York Attorney General, SEC and FINRA. FINRA is currently conducting an investigation of our activities relating to ARS.

Item 1A. Risk Factors

Information regarding our risk factors appears in Part I, Item 1A. of our annual report on Form 10-K for the fiscal year ended December 31, 2008 filed with the SEC on February 27, 2009. These risk factors describe some of the assumptions, risks, uncertainties and other factors that could adversely affect our business or that could otherwise result in changes that differ materially from our expectations. There have been no material changes from the risk factors previously disclosed in our annual report on Form 10-K.

JEFFERIES GROUP, INC. AND SUBSIDIARIES
Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(2)(3)	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 April 30, 2009				10,461,304
May 1 May 31, 2009	3,590	$19.72		10,461,304
June 1 June 30, 2009	68,328	$20.32		10,461,304
Total	71,918			

(1) We repurchased an aggregate of 71,918 shares other than as part of a publicly announced plan or program. We repurchased these securities in connection with our share-based compensation plans which allow participants to use shares to pay the exercise price of options exercised and to use shares to satisfy tax liabilities arising from the exercise of options or the vesting of

restricted stock. The number above does not include unvested shares forfeited back to us pursuant to the terms of our share-based compensation plans.

(2) On July 26, 2005, we issued a press release announcing the authorization by our Board of Directors to repurchase, from time to time, up to an aggregate of 3,000,000 shares of our common stock. After giving effect to the 2-for-1 stock split effected as a stock dividend on May 15, 2006, this authorization increased to 6,000,000 shares.

(3) On January 23, 2008, we issued a press release announcing the authorization by our Board of Directors to repurchase, from time to time, up to an additional 15,000,000 shares of our

common stock

Item 4. Submission of Matters to a Vote of Security Holders

We held our annual shareholders meeting on May 18, 2009.

The following individuals were elected to serve as Directors by the votes set forth below:

Director	For Votes	Withheld Votes
Richard B. Handler	144,485,870	6,770,158
Brian P. Friedman	144,005,428	7,250,600
W. Patrick Campbell	144,757,096	6,498,932
Ian Cumming	115,745,621	35,510,407
Richard G. Dooley	140,319,474	10,936,554
Robert E. Joyal	140,335,257	10,920,771
Michael T. O Kane	144,634,150	6,621,878
Joseph Steinberg	137,934,462	13,321,566

The ratification of the appointment of KPMG LLP as our independent registered public accounting firm was approved by the votes set forth below.
