MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements
September 30, 2009
(unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Manhattan Associates, Inc. and its subsidiaries (the Company) have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of management, these condensed consolidated financial statements contain all normal recurring adjustments considered necessary for a fair presentation of the Company's financial position at September 30, 2009, the results of operations for the three and nine months ended September 30, 2009 and 2008 and cash flows for the nine months ended September 30, 2009 and 2008. The results for the three and nine months ended September 30, 2009 are not necessarily indicative of the results to be expected for the full year. These statements should be read in conjunction with the Company's audited consolidated financial statements and management's discussion and analysis included in the Company's annual report on Form 10-K for the year ended December 31, 2008.

2. Principles of Consolidation

The accompanying condensed consolidated financial statements include the Company's accounts and the accounts of its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

3. Revenue Recognition

The Company's revenue consists of revenues from the licensing and hosting of software, fees from implementation and training services (collectively, professional services), plus customer support and software enhancements, and sales of hardware and other revenues (other revenues consists of reimbursements of out-of-pocket expenses incurred in connection with its professional services). All revenue is recognized net of any related sales taxes.

The Company recognizes license revenue when the following criteria are met: (1) a signed contract is obtained; (2) delivery of the product has occurred; (3) the license fee is fixed or determinable; and (4) collection is probable. Revenue recognition for software with multiple-element arrangements requires recognition of revenue using the residual method when (a) there is vendor-specific objective evidence of the fair values of all undelivered elements in a multiple-element arrangement that is not accounted for using long-term contract accounting; (b) vendor-specific objective evidence of fair value does not exist for one or more of the delivered elements in the arrangement; and (c) all other applicable revenue-recognition criteria for software revenue recognition, other than the requirement for vendor-specific objective evidence of the fair value of each delivered element of the arrangement, are satisfied. For those contracts that contain significant customization or modifications, license revenue is recognized using contract accounting.

The accounting related to license revenue recognition in the software industry is complex and affected by interpretations of the rules which are subject to change. Judgment is required in assessing the probability of collection, which is generally based on evaluation of customer-specific information, historical collection experience and economic market conditions. If market conditions decline, or if the financial condition of our customers deteriorates, the Company may be unable to determine that collectibility is probable, and the Company could be required to defer the recognition of revenue until the Company receives customer payments.

The Company's services revenue consists of fees generated from professional services and customer support and software enhancements related to the Company's software products. Fees from professional services performed by the Company are generally billed on an hourly basis, and revenue is recognized as the services are performed. Professional services are sometimes rendered under agreements in which billings are limited to contractual maximums or based upon a fixed-fee for portions of or all of the engagement. Revenue related to fixed-fee based contracts is recognized on a proportional performance basis based on the hours incurred on discrete projects within an overall

services arrangement. Project losses are provided for in their entirety in the period in

6

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

which they become known. Revenue related to customer support services and software enhancement is generally paid in advance and recognized ratably over the term of the agreement, typically 12 months.

Hardware and other revenue is generated from the resale of a variety of hardware products, developed and manufactured by third parties, that are integrated with and complementary to the Company's software solutions. As part of a complete solution, the Company's customers periodically purchase hardware from the Company in conjunction with the licensing of software. These products include computer hardware, radio frequency terminal networks, radio frequency identification (RFID) chip readers, bar code printers and scanners and other peripherals. Hardware revenue is recognized upon shipment to the customer when title passes. The Company generally purchases hardware from the Company's vendors only after receiving an order from a customer. As a result, the Company does not maintain significant hardware inventory.

In accordance with the other presentation matters within the Revenue Recognition Topic of the Financial Accounting Standards Board's (FASB) Accounting Standards Codification, the Company recognizes amounts associated with reimbursements from customers for out-of-pocket expenses as revenue. Such amounts have been classified to hardware and other revenue. The total amount of expense reimbursement recorded to revenue was \$1.9 million and \$5.8 million for the three and nine months ended September 30, 2009, respectively and \$3.2 million and \$9.6 million for the three and nine months ended September 30, 2008, respectively.

4. Investments

The Company measures its investments based on a fair value hierarchy disclosure framework that prioritizes and ranks the level of market price observability used in measuring assets and liabilities at fair value. Market price observability is impacted by a number of factors, including the type of asset or liability and their characteristics. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 Quoted prices in active markets for identical instruments.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

The Company's investments in marketable securities consist principally of debt instruments of state and local government agencies and U.S. corporate commercial paper. These investments are categorized as available-for-sale securities and recorded at fair market value. Investments with maturities of 90 days or less from the date of purchase are classified as cash equivalents; investments with maturities of greater than 90 days from the date of purchase but less than one year are generally classified as short-term investments; and investments with maturities of greater than one year from the date of purchase are generally classified as long-term investments. Unrealized holding gains and losses are reflected as a net amount in a separate component of shareholders' equity until realized. For the purposes of computing realized gains and losses, cost is determined on a specific identification basis.

At September 30, 2009, the Company's cash balance was \$45.9 million and the Company's cash equivalent and investments balance totaled \$60.1 million. \$103.2 million of its total cash and cash equivalents is liquid. The remaining investments totaling \$2.8 million are invested in auction rate securities with original maturities ranging from 2025 to 2040. Previously, auctions were held for these securities that reset their yield every 7 to 35 days. During 2008 and the first nine months of 2009 however, auctions for these securities failed to attract sufficient buyers, resulting in the Company continuing to hold these securities. Accordingly, the Company began classifying these securities as long-term investments in marketable securities in the consolidated balance sheet due to uncertainty surrounding the timing of a market recovery. In determining the fair values of auction rate securities, the Company

considered the credit worthiness of the counterparty, estimates of interest rates, expected holding periods, and the timing and value of expected future cash flows. The \$2.8 million of auction rate securities held by the Company at September 30, 2009 were issued by state or regional educational loan authorities and are

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

collateralized by federally insured student loans. These investments have high credit ratings, and the Company intends and has the ability to hold these securities until maturity or until redeemed. However, due to liquidity concerns rather than creditworthiness, the Company has recorded an unrealized loss of \$0.2 million as of September 30, 2009 for the temporary decline in the fair value of these investments. The unrealized loss is included as a separate component of shareholders' equity and in total comprehensive income. The Company will continue to evaluate the fair value of its investments in auction rate securities each reporting period for a potential other-than-temporary impairment.

The Company uses quoted prices from active markets which are classified at level 1 as a highest level observable input in the disclosure hierarchy framework for all other available-for-sale securities.

The following table set forth the assets and liabilities carried at fair value measured on a recurring basis at September 30, 2009 (in thousands):

	Fair Value Measurements at September 30, 2009			
	Quoted Prices (Level 1)	Using Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Available-for-sale securities	\$ 57,273	\$	\$ 2,801	\$ 60,074
Total investments	\$ 57,273	\$	\$ 2,801	\$ 60,074

5. Stock-Based Compensation

During the three months ended September 30, 2009 and 2008, the Company granted options to purchase 17,500 shares and 22,600 shares of common stock, respectively. The Company recorded stock option expense of \$1.4 million during each of the three months ended September 30, 2009 and 2008. During the nine months ended September 30, 2009 and 2008, the Company granted options to purchase 590,575 shares and 643,936 shares of common stock, respectively. The Company recorded stock option expense of \$3.8 million and \$4.1 million during the nine months ended September 30, 2009 and 2008, respectively.

A summary of changes in outstanding options for the nine months ended September 30, 2009 is as follows:

	Number of Shares
Outstanding at December 31, 2008	6,010,909
Granted	590,575
Exercised	(72,875)
Forfeited and expired	(714,848)
Outstanding at September 30, 2009	5,813,761

The Company also granted 5,831 and 7,531 shares of restricted stock during the three months ended September 30, 2009 and 2008, respectively. The Company recorded restricted stock expense of \$0.9 million and \$0.8 million during the three months ended September 30, 2009 and 2008, respectively. The Company granted 195,083 and 206,102 shares of restricted stock during the nine months ended September 30, 2009 and 2008, respectively. The Company recorded restricted stock expense of \$2.5 million for each of the nine month period ended

September 30, 2009 and 2008.

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

A summary of changes in unvested shares of restricted stock for the nine month ended September 30, 2009 is as follows:

	Number of Shares
Outstanding at December 31, 2008	353,085
Granted	195,083
Vested	(115,338)
Forfeited and expired	(44,136)
Outstanding at September 30, 2009	388,694

6. Income Taxes

The Company's effective tax rate was 1.7% and 29.36% for the nine months ended September 30, 2009 and 2008, respectively. The effective tax rate in the first nine months of 2009 was favorably impacted by a net release of \$2.8 million of income tax reserves discussed below and related interest. The effective tax rate in the first nine months of 2008 included the release of income tax reserves resulting from expiring tax audit statutes of limitation for U.S. federal income tax returns filed for 2004 and prior, partially offset by \$0.6 million of tax expense on the repatriation of cash from a foreign subsidiary and asset impairment charges for which no tax benefit was recorded.

As of the quarter ended September 30, 2009, the Company's unrecognized tax benefits totaled \$2.2 million, all of which, if recognized, would affect the effective tax rate.

The Company recognizes potential accrued interest and penalties to unrecognized tax benefits within its global operations in income tax expense. The Company's liability for the potential payment of interest and penalties totaled \$0.2 million at September 30, 2009.

The Company conducts business globally and, as a result, files income tax returns in the United States Federal jurisdiction and in many state and foreign jurisdictions. The Company is no longer subject to income tax examinations for the years before 2006 in U.S. Federal, substantially all state and local, or substantially all non-U.S. jurisdictions. The Company experienced a net decrease in unrecognized tax benefits of \$1.2 million during the quarter ended September 30, 2009. This resulted from a \$2.2 million benefit due to the expiration of statutes of limitation in multiple jurisdictions globally, offset by an additional reserve of \$1.0 million, primarily associated with the treatment of currency gains under the Company's transfer pricing policy with one of its foreign subsidiaries. Further, the Company anticipates it is reasonably possible that unrecognized tax benefits may decrease within twelve months by \$0.2 million related primarily to jurisdictional taxable income amounts due to the expiration of statutes of limitation.

7. Comprehensive Income

Comprehensive income includes net income, foreign currency translation adjustments and unrealized gains and losses on investments that are excluded from net income and reflected in shareholders' equity.

The following table sets forth the calculation of comprehensive income for the three and nine months ended September 30, 2009 (in thousands):

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

	For Three Months Ended September 30,		For Nine Months Ended September 30,	
	2009	2008	2009	2008
Net income	\$ 10,983	\$ 4,309	\$ 10,689	\$ 20,820
Other comprehensive income (loss), net of tax:				
Foreign currency translation adjustment	138	(2,229)	694	(4,023)
Unrealized gain (loss) on investments	8		(78)	(32)
Other comprehensive income (loss)	146	(2,229)	616	(4,055)
Comprehensive income	\$ 11,129	\$ 2,080	\$ 11,305	\$ 16,765

8. Net Earnings Per Share

Basic net earnings per share is computed using net income divided by the weighted average number of shares of common stock outstanding (Weighted Shares) for the period presented. Diluted net earnings per share is computed using net income divided by the sum of Weighted Shares and common equivalent shares (CESs) outstanding for each period presented using the treasury stock method.

The following is a reconciliation of the net income and share amounts used in the computation of basic and diluted net earnings per common share:

	For Three Months Ended September 30		For Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in thousands, except per share data)			
Net income	\$ 10,983	\$ 4,309	\$ 10,689	\$ 20,820
Earnings per share:				
Basic	\$ 0.50	\$ 0.18	\$ 0.48	\$ 0.86
Effect of CESs			(0.01)	(0.02)
Diluted	\$ 0.50	\$ 0.18	\$ 0.47	\$ 0.84
Weighted average number of shares:				
Basic	22,116	24,069	22,483	24,246
Effect of CESs	59	499	46	490
Diluted	22,175	24,568	22,529	24,736

Weighted average shares issuable upon the exercise of stock options that were not included in the calculation of diluted earnings per share were 5,243,976 shares and 3,814,462 shares for the three months ended September 30, 2009 and 2008, respectively, and 5,266,526 shares and 3,804,462 shares for the nine months ended September 30, 2009 and 2008, respectively. Such shares were not included because they were anti-dilutive.

9. Contingencies

From time to time, the Company may be involved in litigation relating to claims arising out of its ordinary course of business. Many of the Company's installations involve products that are critical to the operations of its clients' businesses. Any failure in a product could result in a claim for substantial damages against the Company, regardless of its responsibility for such failure. Although the Company attempts to limit contractually its liability for damages arising from product failures or negligent acts or omissions, there can be no assurance that the

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

limitations of liability set forth in the Company's contracts will be enforceable in all instances. The Company is not presently involved in any material litigation. However, it is involved in various legal proceedings. The Company believes that any liability that may arise as a result of these proceedings will not have a material adverse effect on its financial condition, results of operations or cash flows. The Company expenses legal costs associated with loss contingencies as such legal costs are incurred.

10. Operating Segments

The Company operates its business in three geographical segments: the Americas (North America and Latin America), Europe, Middle East and Africa (EMEA) and Asia Pacific (APAC). The information for the periods presented below reflects these segments. All segments derive revenue from the sale and implementation of the Company's supply chain execution and planning solutions. The individual products sold by the segments are similar in nature and are all designed to help companies manage the effectiveness and efficiency of their supply chain. The Company uses the same accounting policies for each operating segment. The Chief Executive Officer and Chief Financial Officer evaluate performance based on revenue and operating results for each region.

The Americas segment charges royalty fees to the EMEA and APAC segments based on software licenses sold by those operating segments. The royalties, which totaled approximately \$0.3 million and \$0.8 million for the three months ended September 30, 2009 and 2008, respectively, and \$1.0 million and \$3.0 million for the nine months ended September 30, 2009 and 2008, respectively, are included in cost of revenue in EMEA and APAC with a corresponding reduction in the Americas cost of revenue. The revenues represented below are from external customers only. The geographical-based costs consist of costs of personnel, direct sales and marketing expenses, and general and administrative costs to support the business. There are certain corporate expenses included in the Americas region that are not charged to the other segments, including research and development, certain marketing and general and administrative costs that support the global organization, and the amortization of acquired developed technology. Included in the Americas costs are all research and development costs including the costs associated with the Company's India operations.

The following table presents the revenues, expenses and operating (loss) income by reporting segment for the three and nine months ended September 30, 2009 and 2008 (in thousands):

	For the Three Months ended							
	September 30, 2009				September 30, 2008			
	Americas	EMEA	APAC	Total	Americas	EMEA	APAC	Total

License revenues related to the Company's warehouse and non-warehouse product groups for the three and nine months ended September 30, 2009 and 2008 are as follows (in thousands):

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Warehouse	\$ 6,799	\$ 7,656	\$ 12,649	\$ 27,334
Non-Warehouse	4,561	6,146	7,759	24,145
Total license revenue	\$ 11,360	\$ 13,802	\$ 20,408	\$ 51,479

11. Restructuring charge

In the second quarter of 2009, the Company committed to and initiated plans to reduce its workforce by approximately 140 positions along with other expense reduction initiatives to realign its capacity. This action was based on continued deterioration of the global macro-economic environment in the first quarter as reflected by downward revisions by most economists of global GDP growth rates, which resulted in lower than planned first quarter 2009 license revenue results and a revised revenue outlook for the remainder of 2009. As a result of this

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

initiative, the Company recorded a pre-tax restructuring charge of \$3.8 million (\$2.6 million after-tax or \$0.12 per fully diluted share) in the second quarter of 2009. The restructuring charge primarily consists of employee severance and outplacement services. In the first quarter of 2009, the Company recorded additional employee severance expense of \$63,000 pre-tax, or \$42,000 after-tax, related to the restructuring action taken in the fourth quarter of 2008. The restructuring charge is classified in Restructuring charge in the Company's Condensed Consolidated Statements of Operations. The Company estimates that the majority of related payments will be completed by the end of 2009.

The following table summarizes the segment activity in the restructuring accrual for the nine months ended September 30, 2009:

	Americas	EMEA	APAC	Consolidated
	(in thousands)			
Restructuring accrual balance at December 31, 2008	\$ 1,724	\$	\$ 63	\$ 1,787
Restructuring charge	3,019	20	853	3,892
Cash payments	(4,293)	(20)	(900)	(5,213)
Restructuring accrual balance at September 30, 2009	\$ 450	\$	\$ 16	\$ 466

The balance at September 30, 2009 is included in Accrued compensation and benefits and Accrued and other liabilities in the Company's Condensed Consolidated Balance Sheets. The majority of the remaining balance is expected to be paid during 2009.

12. New Accounting Pronouncements

In June 2009, the FASB issued the FASB Accounting Standards CodificationTM and a new Hierarchy of Generally Accepted Accounting Principles which establishes only two levels of U.S. generally accepted accounting principles (GAAP), authoritative and nonauthoritative. The FASB Accounting Standards Codification (the Codification) is now the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP, except for rules and interpretive releases of the SEC, which are additional sources of authoritative GAAP for SEC registrants. All other nongrandfathered, non-SEC accounting literature not included in the Codification will become nonauthoritative. The Codification is effective for financial statements for interim or annual reporting periods ending after September 15, 2009. The Company adopted the new guidelines and numbering system prescribed by the Codification when referring to GAAP in the third quarter of 2009. As the Codification is not intended to change or alter existing GAAP for public companies, it does not have any impact on the Company's consolidated financial statements.

In May 2009, the FASB issued authoritative guidance on subsequent events. This guidance is intended to establish general standards of accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, the subsequent events guidance sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This guidance is effective for fiscal years and interim periods ended after June 15, 2009. The Company adopted this standard effective June 15, 2009 and has evaluated any subsequent events through the date of this filing. The adoption of the subsequent events guidance did not have an impact on its consolidated results of operations or consolidated financial position.

In December 2007, the FASB issued authoritative guidance on business combinations. This guidance will significantly change the accounting for business combinations. Under the business combination guidance, an

acquiring entity will be required to recognize all the assets acquired and liabilities assumed in a transaction at the

Table of Contents

MANHATTAN ASSOCIATES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (continued)
September 30, 2009
(unaudited)

acquisition-date fair value with limited exceptions. This guidance will change the accounting treatment for certain specific acquisition-related items, including by requiring the expensing of acquisition-related costs as incurred and expensing of restructuring costs associated with an acquired business. This guidance also includes a substantial number of new disclosure requirements to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The business combination guidance is to be applied prospectively to business combinations for which the acquisition date is on or after January 1, 2009. The Company expects that this guidance will have an impact on its accounting for future business combinations, but the extent of the impact is dependent upon the number, size, and complexity of acquisitions that the Company makes in the future.

In September 2006, the FASB issued authoritative guidance on fair value measurements, which establishes a framework for reporting fair value and expands disclosures required for fair value measurements. The fair value measurement guidance applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this guidance does not require any new fair value measurements. This guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. However, in February 2008, the FASB delayed for one year the applicability of fair-value measurements to non-financial assets and liabilities recognized or disclosed at fair value on a non-recurring basis. The Company partially adopted the fair value measurement on January 1, 2008 related to all financial assets and liabilities and non-financial assets and liabilities recognized or disclosed at fair value on a recurring basis. The Company has adopted fair value measurement for non-financial assets and liabilities measured at fair value on a nonrecurring basis at January 1, 2009 and will continue to apply its provisions prospectively from January 1, 2009. The application of fair value measurement for non-financial assets and liabilities did not have a significant impact on the Company's earnings nor its financial position in the first nine months of 2009.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.
Forward-Looking Statements

Certain statements contained in this filing are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to statements related to plans for future business development activities, anticipated costs of revenues, product mix and service revenues, research and development and selling, general and administrative activities, and liquidity and capital needs and resources. When used in this report, the words expect, anticipate, intend, plan, believe, seek, estimate, and similar expressions are generally intended to identify forward-looking statements. You should not place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this quarterly report. Such forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. For further information about these and other factors that could affect our future results, please see Risk Factors in Item 1A of our annual report on Form 10-K for the year ended December 31, 2008. Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. The following discussion should be read in conjunction with the condensed consolidated financial statements for the three and nine months ended September 30, 2009 and 2008, including the notes to those statements, included elsewhere in this quarterly report (the Condensed Consolidated Financial Statements). We also recommend the following discussion be read in conjunction with management's discussion and analysis and consolidated financial statements included in our annual report on Form 10-K for the year ended December 31, 2008. References in this filing to the Company, Manhattan, Manhattan Associates, we, our, and to Manhattan Associates, Inc., our predecessors, and our wholly-owned and consolidated subsidiaries.

Table of Contents**Business Overview**

We are a leading developer and implementer of supply chain software solutions that help organizations optimize their supply chain operations from planning through execution. We call our portfolio of supply chain software solutions Manhattan SCOPE™ (Supply Chain Optimization from Planning through Execution). Built on a common Supply Chain Process Platform, SCOPE combines Planning and Forecasting, Inventory Optimization, Order Lifecycle Management, Transportation Lifecycle Management and Distribution Management to enable full-range supply chain optimization. Our business model is singularly focused on the development and implementation of complex supply chain software solutions that are designed to optimize supply chain effectiveness and efficiency for our customers. We have three principal sources of revenue:

license revenue generated from the sales of our supply chain software;

professional services derived from implementing our solutions along with customer support services and software enhancements (services), and

hardware sales and other revenue.

We manage our business based on three geographic regions: Americas (North America and Latin America), EMEA (Europe, Middle East and Africa), and APAC (Asia Pacific). Geographic revenue is based on the location of the sale. Our international revenue was approximately \$16.2 million and \$20.3 million for the quarters ended September 30, 2009 and 2008, respectively, which represents approximately 25% of our total revenue for both quarters. Our international revenue was approximately \$45.1 million and \$64.5 million for the nine months ended September 30, 2009 and 2008, respectively, which represents approximately 24% and 25% of our total revenue for the first nine months 2009 and 2008, respectively. International revenue includes all revenue derived from sales to customers outside the United States.

At September 30, 2009, we employed approximately 1,850 employees worldwide, of which approximately 950 employees are based outside the United States. Of the 950 international employees, approximately 75%, or nearly 750 employees, are located in our India Development Center. We have offices in Australia, China, France, India, Japan, the Netherlands, Singapore and the United Kingdom, as well as representatives in Mexico and reseller partnerships in Latin America.

Global Economic Trends and Industry Factors

Global macro economic trends, technology spending and supply chain management market growth are important barometers for our business. Historically, about 75% of our total revenue is generated in the United States and 25% from our International operation. In addition, industry analysts estimate that approximately two-thirds of every supply chain software solutions dollar invested is spent in the United States; consequently, the health of the U.S. economy has a meaningful impact on our financial results.

In October 2009, the International Monetary Fund (IMF) provided a World Economic Outlook (WEO) update revising its growth projections for 2009 and 2010 upward modestly from its July 2009 WEO update stating after a deep global recession, economic growth has turned positive, as wide ranging public intervention has supported demand and lowered uncertainty and systemic risk in financial markets. Nonetheless, the recovery is expected to be slow, as financial systems remain impaired, support from public policies will gradually have to be withdrawn, and households in economies that suffered asset price busts will continue to rebuild savings. Risks to the outlook remain on the downside. The world economy is now projected to shrink 1.0% in 2009 and grow 3.0% in 2010. Advanced economies are projected to expand sluggishly through much of 2010, with unemployment expected to peak at over 10% with annual growth of about 1.25%, following a contraction of 3.5% in 2009. Consumption will be particularly weak in advanced economies, especially those that experienced credit booms, housing bubbles, and large current account deficits, such as the United States and the United Kingdom. The U.S. economy is now projected to contract 2.7% in 2009 and grow 1.5% in 2010.

In July 2009, leading Supply Chain Industry Analyst, AMR Research (AMR), published its Global Enterprise Application Market Sizing Report, 2008 – 2013. For the Supply Chain Management Market in 2009, AMR is forecasting negative growth of 6% and is expecting positive, albeit conservative growth in 2010. For

Table of Contents

software application markets in general, AMR is forecasting a 2% to 6% decline in 2009 based on budget lockdowns and general reluctance by corporations to spend.

Given the current global economic recession, we believe companies are seeking to protect their balance sheets by reducing debt and hoarding cash, which in turn constrains capital spending such as information technology spending. Consequently, our timing of closing software transactions has been significantly impacted as evidenced in our license revenue trends since the second half of 2008, which in turn affects our revenue and earnings per share. For the nine months ended September 30, 2009, our license revenues declined 60% compared to the nine months ended September 30, 2008, as demand was well below our plans.

We sell technology-based solutions with total pricing, including software and services, in many cases exceeding \$1.0 million. Reductions in capital budgets of our customers and prospective customers have had an adverse impact on our ability to sell our solutions, largely we believe as a result of the global economic recession. The deterioration in the current business climate within the United States and geographic regions in which we operate continues to affect customers and prospects decisions regarding timing of capital spending. Timing of deals closed can have a material adverse impact on our business and is likely to further intensify competition in our already highly competitive markets.

Revenue

License revenue. License revenue, a leading indicator of our business, is primarily derived from software license fees that customers pay for supply chain solutions. In the three and nine months ended September 30, 2009, license revenue totaled \$11.4 million, or 17% of total revenue, with gross margins of 89.8% and \$20.4 million, or 11% of total revenue, with gross margins of 82.3%, respectively. Our typical license revenue percentage mix of new to existing customers is approximately 50/50. However, due to lower license revenue for the quarter ended September 30, 2009, the percentage mix was approximately 25/75 of new to existing customers.

License revenue growth is influenced by the strength of general economic and business conditions and the competitive position of our software products. Our license revenue generally has long sales cycles of which the timing of the closing of a few large license transactions can have a material impact on our quarterly license revenues, operating profit and earnings per share. For example, \$1.0 million of license revenue in 2009 equates to approximately \$0.03 of diluted earnings per share impact.

Our software solutions are singularly focused on the supply chain planning and execution markets, which are intensely competitive, rapidly consolidating and characterized by rapid technological change. We are a market leader in the supply chain management software solutions market as defined by industry analysts such as AMR, ARC and Gartner. Our goal is to extend our position as a leading global supply chain solutions provider by growing our license revenues faster than our competitors. We do anticipate facing increased competition in the future from ERP and SCM applications vendors and business application software vendors that may broaden their solution offerings by internally developing or by acquiring or partnering with independent developers of supply chain planning and execution software. Increased competition could result in price reductions, fewer customer orders, reduced gross margins and loss of market share.

Services revenue. Our services business consists of professional services (consulting and training) and customer support services and software enhancements. In the third quarter of 2009, our services revenue totaled \$46.9 million, or 72% of total revenue, with gross margins of 58.0%. For the nine months ended September 30, 2009, our services revenue totaled \$147.2 million, or 80% of total revenue, with gross margins of 56.4%. Professional services accounted for approximately 60% of total services revenue in the third quarter and the first nine months of 2009 and approximately 40% and 50% of total revenue in the third quarter and the first nine months of 2009. When comparing our operating margins to other technology companies, our operating margin profile can be lower due to our large services revenue mix as a percentage of total revenue. While we believe our services margins are very strong, they do lower our overall operating margin as services margins are lower than license revenue margins.

At September 30, 2009, our consulting services business totaled approximately 900 employees, nearly 50% of our total employees worldwide. Our professional services organization provides our customers with expertise

Table of Contents

and assistance in planning and implementing our solutions. To ensure a successful product implementation, consultants assist customers with the initial installation of a system, the conversion and transfer of the customer's historical data onto our system, and ongoing training, education and system upgrades. We believe our professional services enable customers to implement our software rapidly, ensure the customer's success with our solution, strengthen our customer relationships, and add to our industry-specific knowledge base for use in future implementations and product innovations.

Although our consulting services are optional, the majority of our customers use at least some portion of these services for the implementation and ongoing support of our software solutions. Consulting services are typically rendered under time and materials-based contracts with services typically billed on an hourly basis. Professional services are sometimes rendered under fixed-fee based contracts with payments due on specific dates or milestones.

Typically, our consulting services lag license revenue by several quarters, as implementation services are performed after the purchase of the software. Services revenue growth is contingent upon: 1) license revenue growth, which is influenced by the strength of general economic and business conditions and the competitive position of our software products, 2) customer multiple site implementation timelines and upgrades, which are influenced by the strength of general economic and business conditions specifically impacting our customers, 3) competitive exposure to offshore providers and other consulting companies, 4) price pressure due to competition and general economic and business conditions, and 5) fluctuations in currency rates. All of these factors potentially create the risk of pricing pressure, fewer customer orders, reduced gross margins and loss of market share.

For customer support services and software enhancements (CSSE), we offer a comprehensive program that provides our customers with software upgrades, when and if available, that offer additional or improved functionality and technological advances incorporating emerging supply chain and industry initiatives. We offer 24 hour customer support every day of the year plus software upgrades for an annual fee that is paid in advance.

Our CSSE revenues totaled \$19.7 million and \$56.9 million in the three and nine months ended September 30, 2009, respectively. CSSE represents approximately 40% of services revenue and approximately 30% of total revenue in the third quarter and the first nine months of 2009. The growth of CSSE revenues is influenced by: 1) new license revenue growth, 2) annual renewal of support contracts, 3) increase in customers through acquisitions, and 4) fluctuations in currency rates. Substantially all of our customers renew their annual support contracts. Over the last three years, our annual renewal rate of customers subscribing to comprehensive support and enhancements has been greater than 90%. CSSE revenue is generally paid in advance and recognized ratably over the term of the agreement, typically 12 months. CSSE renewal revenue is not recognized unless payment is received from the customer.

Hardware and other revenue. Our hardware and other revenues totaled \$7.0 million representing 11% of total revenue with gross margins of 16.7%, and \$16.9 million representing 9% of total revenue with gross margin of 16.5%, in the three and nine months ended September 30, 2009, respectively. In conjunction with the licensing of our software, and as a convenience for our customers, we resell a variety of hardware products developed and manufactured by third parties. These products include computer hardware, radio frequency terminal networks, RFID chip readers, bar code printers and scanners, and other peripherals. We resell all third-party hardware products pursuant to agreements with manufacturers or through distributor-authorized reseller agreements pursuant to which we are entitled to purchase hardware products at discount prices and to receive technical support in connection with product installations and any subsequent product malfunctions. We generally purchase hardware from our vendors only after receiving an order from a customer. As a result, we do not maintain significant hardware inventory.

Product Development

We intend to continue to invest significantly in research and development (R&D), which historically has averaged about \$0.14 of every revenue dollar, to provide market leading solutions that help global manufacturers, wholesalers, distributors, retailers and logistics providers successfully manage accelerating and fluctuating demands as well as the increasing complexity and volatility of their local and global supply chains. Our research and development expenses for the three and nine months ended September 30, 2009 were \$8.8 million and \$28.2

Table of Contents

million, respectively, and for the three and nine months ended September 30, 2008 were \$12.5 million and \$36.9 million, respectively. At September 30, 2009, our R&D organization totaled approximately 660 employees, located in the U.S. and India, representing about 35% of our total employees worldwide.

We will continue to focus our R&D resources on the development and enhancement of supply chain software solutions. We offer what we believe to be the broadest solution portfolio in the supply chain solutions marketplace, to address all aspects of planning and forecasting, inventory optimization, order lifecycle management, transportation lifecycle management and distribution management. The underpinning of our product portfolio is the services-based Supply Chain Process Platform, which provides the foundation for ensuring that all our solutions reside on a common architecture, leverage common master and transaction data and utilize the same business services to accomplish tasks common to multiple solutions, enabling our customers to lower their total cost of ownership while optimizing their supply chain effectiveness and efficiency.

We also plan to continue to provide enhancements to existing solutions and to introduce new solutions to address evolving industry standards and market needs. We identify further enhancements to existing solutions and opportunities for new solutions through our customer support organization, as well as through ongoing customer consulting engagements and implementations, interactions with our user groups, association with leading industry analysts and market research firms, and participation on industry standards and research committees. Our solutions address the needs of customers in various vertical markets, including retail, consumer goods, food and grocery, logistics service providers, industrial and wholesale, high technology and electronics, life sciences and government.

Cash Flow and Financial Condition

For the nine months ended September 30, 2009 and 2008, we generated cash flow from operating activities of \$38.9 million and \$45.5 million, respectively. Our cash and investments at September 30, 2009 totaled \$106.0 million, with no debt on our balance sheet. We currently have no credit facilities. During the past three years, our primary uses of cash have been funding of R&D investment, operations to drive earnings growth and repurchases of common stock.

At September 30, 2009, we had approximately \$15.0 million remaining in share repurchase authority. In 2009, we anticipate that our priorities for the use of cash will be similar to prior years, with our first priority being continued investment in product development and profitably growing our business to extend our market leadership. We will continue to evaluate acquisition opportunities that are complementary to our product footprint and technology direction. We will also continue to weigh our share repurchase options against cash for acquisitions and investing in the business. We do not anticipate any borrowing requirements in 2009 for general corporate purposes.

Table of Contents**Results of Operations**

The following table summarizes our consolidated results for the three and nine months ended September 30, 2009 and 2008.

	Three Months Ended September 30,		Nine Months Ended September 30,

We manage our business based on three geographic regions: the Americas, EMEA, and APAC. Geographic revenue information is based on the location of sale. The revenues represented below are from external customers only. The geographical-based costs consist of costs of personnel, direct sales and marketing expenses, and general and administrative costs to support the business. There are certain corporate expenses included in the Americas region that are not charged to the other segments including research and development, certain marketing and general and administrative costs that support the global organization and the amortization of acquired developed technology. Included in the Americas costs are all research and development costs including the costs associated with the Company's India operations. During the three and nine months ended September 30, 2009 and 2008, we derived the majority of our revenues from sales to customers within our Americas region. The following table summarizes revenue and operating profit by region:

Financial Summary of Third Quarter 2009 Condensed Consolidated Financial Results

Consolidated revenue for the third quarter of 2009 was \$65.3 million, compared to \$82.7 million in the third quarter of 2008. License revenue was \$11.4 million in the third quarter of 2009, compared to \$13.8 million in the third quarter of 2008;

Operating income for the third quarter of 2009 was \$11.1 million compared to \$3.2 million in the third quarter of 2008. Third quarter 2008 results include \$5.2 million in asset write-downs for a technology company investment and an auction-rate security investment;

We reported record diluted earnings per share of \$0.50 in the third quarter of 2009, including the release of tax contingency reserves associated with expiring tax audit statutes of limitation for 2005, compared to \$0.18 in the third quarter of 2008. Results for the third quarter of 2008 include the impact of the asset write-downs described above and the release of tax contingency reserves associated with expiring tax audit statutes for 2004 and prior;

Cash flow from operations was \$15.4 million in the third quarter of 2009, compared to \$18.4 million in the third quarter of 2008; and

Cash and investments on-hand at September 30, 2009 was \$106.0 million compared to \$90.8 million at June 30, 2009 and \$88.7 million at December 31, 2008.

Table of Contents**Three Months Ended September 30, 2009 Compared to Three Months Ended September 30, 2008**

The results of our operations for the third quarter of 2009 and 2008 are discussed below.

Revenue

	Three Months Ended September 30,				
	2009	2008	% Change 2009 to 2008	% of Total Revenue	
	(in thousands)			2009	2008
License	\$ 11,360	\$ 13,802	-18%	17%	17%
Services	46,917	60,023	-22%	72%	72%
Hardware and other	7,017	8,911	-21%	11%	11%
Total revenue	\$ 65,294	\$ 82,736	-21%	100%	100%

Our revenue consists of fees generated from the licensing and hosting of software, fees from professional services and customer support and software enhancements, and sales of computer equipment.

License revenue. License revenue decreased \$2.4 million, or 18%, in the quarter ended September 30, 2009 over the same period in the prior year primarily driven by the current global economic recession which has decreased sales and lengthened sales cycles in the global market in 2009. Our Americas, EMEA and APAC license revenues decreased \$0.4 million, \$0.9 million and \$1.1 million, respectively, compared to the same period in the prior year.

The license sales percentage mix across our product suite in the quarter ended September 30, 2009 was approximately 60/40 of warehouse management solutions to non-warehouse management solutions, respectively. Our warehouse management solutions decreased \$0.9 million, or 11%, in the third quarter of 2009 compared to the same quarter in the prior year and non-warehouse management solutions decreased \$1.6 million, or 26%, compared to the same quarter in the prior year.

Services revenue. Services revenue decreased \$13.1 million, or 22%, in the third quarter of 2009 compared to the same quarter in the prior year due to a \$13.5 million decrease in revenue from professional services partially offset by \$0.4 million increase in customer support and software enhancements. The decline in services revenue is primarily due to decreased license sales over the past four quarters. Services revenue for the Americas, EMEA and APAC segments decreased \$10.3 million, \$2.4 million and \$0.4 million, respectively, in the third quarter of 2009 compared to the third quarter of 2008.

Over the last four quarters, our services revenue decline has primarily been impacted by declining license revenues and delayed or suspended multiple site implementations and/or upgrades, which we believe is due to the global economic recession, which in turn has severely impacted our customer's capital investment levels, prioritization and timing. Additionally, over the past several years, our services revenue growth and margins have been affected by some pricing pressures. We believe that the pricing pressures are attributable to global macroeconomic conditions and competition.

Hardware and other. Hardware sales decreased by \$0.7 million, or 12% to \$5.1 million in the third quarter of 2009 compared to \$5.8 million in the third quarter of 2008. Sales of hardware are largely dependent upon customer-specific desires, which fluctuate from quarter to quarter. Reimbursements for out-of-pocket expenses are required to be classified as revenue and are included in hardware and other revenue. Reimbursements by customers for out-of-pocket expenses were approximately \$1.9 million and \$3.1 million for the quarters ended September 30, 2009 and 2008, respectively.

Table of ContentsCost of Revenue

	Three Months Ended September 30,		% Change
	2009	2008	2009 to
	(in thousands)		2008
Cost of license	\$ 1,162	\$ 1,528	-24%
Cost of services	19,697	29,376	-33%
Cost of hardware and other	5,846	7,036	-17%
Total cost of revenue	\$ 26,705	\$ 37,940	-30%

Cost of license. Cost of license consists of the costs associated with software reproduction; hosting services; funded development; media, packaging and delivery, documentation and other related costs; and royalties on third-party software sold with or as part of our products. Cost of license decreased by \$0.4 million, or 24%, in the third quarter of 2009 compared to the same quarter of 2008.

Cost of services. Cost of services consists primarily of salaries and other personnel-related expenses of employees dedicated to professional and technical services and customer support services. The \$9.7 million, or 33%, decrease in cost of services in the quarter ended September 30, 2009 was principally due to (i) a \$7.4 million decrease in employee-related costs such as salary, benefits and payroll taxes resulting from a decrease in the number of personnel dedicated to the delivery of professional services, (ii) a \$0.8 million decrease in bonus expense due to headcount reductions as well as lower achievement of performance based compensation, and (iii) a \$0.9 million decrease in travel expenses due to fewer service projects.

Services gross margin increased 6.9 percentage points to 58.0% in the third quarter of 2009 from 51.1% in the third quarter of 2008. The increase in margin is primarily attributable to the decrease in professional services costs in the third quarter of 2009 driven by our actions to lower headcount to align capacity with demand.

Cost of hardware and other. Cost of hardware remained level at approximately \$4.0 million in the third quarters of 2009 and 2008. Cost of hardware and other includes out-of-pocket expenses to be reimbursed by customers of approximately \$1.9 million and \$3.1 million for the quarters ended September 30, 2009 and 2008, respectively.

Operating Expenses

	Three Months Ended September 30,		% Change
	2009	2008	2009 to
	(in thousands)		2008
Research and development	\$ 8,781	\$ 12,546	-30%
Sales and marketing	8,626	11,579	-26%
General and administrative	7,462	9,099	-18%
Depreciation and amortization	2,665	3,125	-15%
Asset impairment charges		5,205	-100%
Operating expenses	\$ 27,534	\$ 41,554	-34%

Research and development. Research and development expenses primarily consist of salaries and other personnel-related costs for personnel involved in our research and development activities. Research and development expenses for the quarter ended September 30, 2009 decreased \$3.8 million, or 30%, compared to the same quarter of

the prior year. This decrease was mainly attributable to the decrease of \$2.7 million in employee-related costs such as salary, benefits and payroll taxes resulting from lower headcount. The balance of the decrease was due to lower operating expenses and performance based bonus expense.

Table of Contents

Our principal research and development activities have focused on the expansion and integration of new products acquired and new product releases and expanding the product footprint of our supply chain optimization solutions called Supply Chain Optimization from Planning through Execution. The Manhattan SCOPE Platform provides not only a sophisticated service-oriented architecture-based application framework, but a platform that facilitates integration with Enterprise Resource Planning (ERP) and other supply chain solutions. For the quarters ended September 30, 2009 and 2008, we did not capitalize any research and development costs.

Sales and marketing. Sales and marketing expenses include salaries, commissions, travel and other personnel-related costs and the costs of our marketing and alliance programs and related activities. Sales and marketing expenses decreased by \$3.0 million, or 26% in the third quarter of 2009 compared to the same quarter of the prior year. This decrease was mainly attributable to lower headcount accounting for (i) a \$2.2 million decrease in employee-related costs such as salary, benefits, and payroll taxes, and (ii) a \$0.5 million decrease in travel expense.

General and administrative. General and administrative expenses consist primarily of salaries and other personnel-related costs of executive, financial, human resources, information technology and administrative personnel, as well as facilities, legal, insurance, accounting and other administrative expenses. The \$1.6 million, or 18% decrease in general and administrative expenses during the quarter ended September 30, 2009 was primarily attributable to a decrease of \$1.2 million of employee-related expenses such as salary benefits and payroll taxes.

Depreciation and amortization. Depreciation expense amounted to \$1.9 million and \$2.4 million for the quarters ended September 30, 2009 and 2008, respectively. Amortization of intangibles associated with various acquisitions totaled \$0.7 million and \$0.8 million for the quarters ended September 30, 2009 and 2008, respectively.

Asset impairment charges. Asset impairment charges of \$5.2 million during the quarter ended September 30, 2008 consist of a \$3.5 million impairment on an investment in an auction-rate security and a \$1.7 million impairment on an investment in an RFID technology company. We reduced the carrying value of the auction-rate security investment to zero due to a combination of credit downgrades of the underlying issuer and the bond insurer as well as increased publicly reported exposure to bankruptcy risk by the issuer and continued significant deterioration in the credit markets limiting the issuer's ability to re-finance the underlying bond. We wrote down the remaining balance of our \$2.0 million investment in an RFID technology company due to a combination of continued negative financial results reported by this company in a very competitive sector and a down round of financing in which our preferred share ownership was converted into common stock, eliminating our preference rights associated with liquidation, thereby substantially impairing our ability to recoup our investment.

Operating Income

Operating income for the third quarter of 2009 of \$11.1 million increased by \$7.8 million as compared to operating income of \$3.2 million in the third quarter of 2008. Operating margins improved to 16.9% for the third quarter of 2009 up from 3.9% for the third quarter of 2008. Operating income and margins increased primarily due to an increase in license revenue in the third quarter of 2009 combined with lower operating expenses. The third quarter of 2008 operating margins included \$5.2 million in asset write-downs.

Other Income and Taxes

	Three Months Ended September 30,		
			% Change
	2009	2008	2009 to
	(in thousands)		
			2008
Other income, net	\$255	\$ 927	-72%
Income tax provision (benefit)	327	(140)	-334%

Table of Contents

Other income, net. Other income, net principally includes interest income, foreign currency gains and losses and other non-operating expense. Other income, net decreased \$0.7 million in the third quarter of 2009 compared to the third quarter of 2008 due to the fluctuation of the U.S. dollar relative to foreign currencies and the decrease in interest income. We recorded a net foreign currency gain of \$0.3 million and \$0.5 million during the three months ended September 30, 2009 and 2008, respectively. The foreign currency gains and losses principally resulted from gains or losses on intercompany balances with subsidiaries and foreign-denominated accounts receivable due to the fluctuation of the U.S. dollar relative to other foreign currencies, principally the Indian Rupee, the British Pound, and the Chinese Yuan. Interest income decreased \$0.3 million for the third quarter of 2009 from \$0.4 million for the third quarter of 2008 due to the lower average interest rate earned in the third quarter of 2009. The weighted-average interest rate earned on cash and investment securities during the three month periods ended September 30, 2009 and 2008 was less than 1% in both periods.

Income tax provision (benefit). Our effective income tax rate was a provision of 2.9% for the quarter ended September 30, 2009 and a benefit of 3.4% for the quarter ended September 30, 2008. The effective tax rate in the third quarter of 2009 included the release of income tax reserves resulting from expiration of tax audit statutes for U.S. federal income tax returns filed for 2005 partially offset by the establishment of \$0.8 million in tax reserves associated with the treatment of currency gains under our transfer pricing policy with one of our foreign subsidiaries. The effective tax benefit in the third quarter of 2008 included the release of income tax reserves resulting from expiring tax audit statutes for U.S. federal income tax returns filed for 2004 and prior partially offset by \$0.6 million tax expense on the repatriation of cash from a foreign subsidiary and the asset impairment charges for which no tax benefit was recorded.

Financial Summary for the first nine months of 2009 Condensed Consolidated Financial Results

Consolidated revenue for the nine months ended September 30, 2009 was \$184.5 million compared to \$261.6 million for the nine months ended September 30, 2008. License revenue was \$20.4 million for the nine months ended September 30, 2009, compared to \$51.5 million for the nine months ended September 30, 2008; Operating income was \$11.3 million for the nine months ended September 30, 2009, which included a restructuring charge of \$3.9 million, compared to \$25.6 million for the nine months ended September 30, 2008, which included asset write-downs of \$5.2 million;

Diluted earnings per share for the nine months ended September 30, 2009 was \$0.47 compared to \$0.84 for the nine months ended September 30, 2008. Results for the first nine months of 2009 include pre-tax restructuring charges of \$3.9 million, or \$0.12 per share, and the release of tax contingency reserves associated with expiring tax audit statutes for 2005. Results for the first nine months of 2008 include pre-tax impairment charges of \$5.2 million, or \$0.21 per share, and the release of tax contingency reserves associated with expiring tax audit statutes for 2004 and prior; and

For the nine months ended September 30, 2009, the Company repurchased approximately 1.3 million common shares at an average share price of \$15.93 for a total investment of \$20.0 million.

Table of Contents**Nine Months Ended September 30, 2009 Compared to Nine Months Ended September 30, 2008**

The results of our operations for the nine months ended September 30, 2009 and 2008 are discussed below.

Revenue

	Nine Months Ended September 30,			% of Total Revenue	
	2009	2008	% Change 2009 to 2008	2009	2008
	(in thousands)				
License	\$ 20,408	\$ 51,479	-60%	11%	20%
Services	147,182	182,149	-19%	80%	69%
Hardware and other	16,938	27,922	-39%	9%	11%
Total revenue	\$ 184,528	\$ 261,550	-29%	100%	100%

License revenue. License revenue decreased \$31.1 million, or 60%, to \$20.4 million in the nine months ended September 30, 2009 over the same period in the prior year, primarily driven by the current global economic recession, which has decreased sales and lengthened sales cycles in the global market in 2009 as customers and prospects have constrained capital spending. Our Americas, EMEA and APAC license revenue decreased \$22.9 million, \$5.4 million, and \$2.7 million, respectively, compared to the same period in the prior year.

The license sales percentage mix across our product suite in the nine months ended September 30, 2009 was approximately 60/40 of warehouse management solutions to non-warehouse management solutions, respectively. Our warehouse management solutions decreased \$14.7 million, or 54%, in the first nine months of 2009 compared to the same period in the prior year and non-warehouse management solutions decreased \$16.4 million, or 68%, compared to the same period in the prior year.

Services revenue. Services revenue decreased \$35.0 million, or 19%, in the first nine months of 2009 compared to the same period in the prior year principally due to a \$35.0 million, or 28%, decrease in professional services revenue due to decreased license sales. The Americas, EMEA and APAC segments decreased \$27.1 million, \$6.6 million, and \$1.3 million, respectively, for the first three quarters of 2009 compared to the first three quarters of 2008.

Hardware and other. Hardware sales decreased by \$7.2 million, or 39%, to \$11.1 million in the first nine months of 2009 compared to \$18.3 million in the first nine months of 2008. Sales of hardware are largely dependent upon customer-specific desires, which fluctuate from year to year. Reimbursements for out-of-pocket expenses are required to be classified as revenue and are included in hardware and other revenue. For the nine months ended September 30, 2009 and 2008, reimbursements by customers for out-of-pocket expenses were approximately \$5.8 million and \$9.6 million, respectively.

Cost of Revenue

	Nine Months Ended September 30,		
	2009	2008	% Change 2009 to 2008
	(in thousands)		
Cost of license	\$ 3,621	\$ 4,313	-16%
Cost of services	64,173	90,512	-29%
Cost of hardware and other	14,144	22,619	-37%
Total cost of revenue	\$ 81,938	\$ 117,444	-30%

Cost of license. Cost of license consists of the costs associated with software reproduction; hosting services; funded development; media, packaging and delivery, documentation and other related costs; and royalties on third-party software sold with or as part of our products. Cost of license decreased \$0.7 million, or 16%, in the first nine months of 2009 compared to the first nine months of 2008, primarily due to a 60% decrease in license revenue.

Table of Contents

Cost of services. Cost of services consists primarily of salaries and other personnel-related expenses of employees dedicated to professional and technical services and customer support services. Cost of services decreased \$26.3 million, or 29%, in the nine months ended September 30, 2009 compared to the same period in the prior year principally due to (i) a \$18.2 million decrease in employee-related costs such as salary, benefits and payroll taxes resulting from a decrease in the number of professional services personnel due to headcount reduction initiatives in the fourth quarter of 2008 and the second quarter of 2009 to align capacity with demand, (ii) a \$4.4 million decrease in bonus expense caused by headcount reductions as well as lower achievement of performance based compensation, and (iii) a \$2.9 million decrease in travel expenses due to fewer services projects.

Services gross margin increased 6.1 percentage points to 56.4% in the first nine months of 2009 from 50.3% in the first nine months of 2008. The increase in services margin is attributable to the decrease in professional services costs in the current year driven by our actions to lower headcount to align capacity with demand.

Cost of hardware and other. Cost of hardware decreased \$4.9 million to approximately \$8.4 million in the first nine months of 2009 from approximately \$13.3 million in the first nine months of 2008. Cost of hardware and other includes out-of-pocket expenses to be reimbursed by customers of approximately \$5.7 million and \$9.3 million for the nine months ended September 30, 2009 and 2008, respectively.

Operating Expenses

	Nine Months Ended September 30,		
			% Change
	2009	2008	2009 to
	(in thousands)		2008
Research and development	\$ 28,196	\$ 36,911	-24%
Sales and marketing	27,731	39,827	-30%
General and administrative	22,675	27,037	-16%
Depreciation and amortization	8,840	9,531	-7%
Asset impairment charges		5,205	-100%
Restructuring charge	3,892		100%
Operating expenses	\$ 91,334	\$ 118,511	-23%

Research and development. Research and development expenses primarily consist of salaries and other personnel-related costs for personnel involved in our research and development activities. The decrease of \$8.7 million, or 24%, in research and development expenses for the first nine months of 2009 compared to the same period of the prior year was mainly attributable to (i) a decrease in employee-related costs such as salary, benefits and payroll taxes of \$5.4 million resulting from lower headcount and other expense reduction initiatives, (ii) a decrease in bonus expense of \$1.8 million caused by the decline in total revenue and earnings per share, and (iii) reduction in travel expense of \$0.7 million.

Sales and marketing. Sales and marketing expenses include salaries, commissions, travel and other personnel-related costs and the costs of our marketing and alliance programs and related activities. The \$12.1 million, or 30%, decrease in sales and marketing expenses in the nine months ended September 30, 2009 compared to the same period of 2008 was attributable to lower headcount and license revenue which resulted in: (i) a \$6.3 million decrease in employee-related costs such as salary, benefits, payroll taxes and stock compensation expense, (ii) a \$4.0 million decrease in bonus and commission expense, and (iii) a \$2.1 million decrease in travel expenses. These decreases were partially off-set by an increase of \$0.8 million in marketing programs.

General and administrative. General and administrative expenses consist primarily of salaries and other personnel-related costs of executive, financial, human resources, information technology and administrative personnel, as well as facilities, legal, insurance, accounting and other administrative expenses. The net decrease of \$4.4 million, or 16%, in general and administrative expenses during the nine months ended September 30, 2009

compared to the nine months ended September 30, 2008 was primarily attributable to a \$2.0 million decrease in
26

Table of Contents

employee-related expense such as salary, benefits, payroll taxes and a \$1.0 million reduction in bonus expense due to the decline in total revenue and earnings per share.

Depreciation and amortization. Depreciation expense amounted to \$6.6 million and \$7.0 million for the nine months ended September 30, 2009 and 2008, respectively. Amortization of intangibles associated with various acquisitions totaled \$2.2 million and \$2.5 million for the nine months ended June 30, 2009 and 2008, respectively.

Restructuring charge. During the second quarter of 2009, we committed to and initiated plans to reduce our workforce by approximately 140 positions to realign our capacity with demand forecasts. As a result of this action, we recorded employee severance expense and outplacement service fees of \$3.8 million related to the restructuring action taken in the second quarter of 2009. We also recorded additional employee severance expense of \$63,000 in the first quarter of 2009 related to the restructuring action taken in the fourth quarter of 2008.

Asset impairment charges. Asset impairment charges of \$5.2 million during the first nine months ended September 30, 2008 consisted of a \$3.5 million impairment charge on an investment in an auction-rate security and a \$1.7 million impairment charge on an investment in an RFID technology company. We reduced the carrying value of the auction-rate security investment to zero due to a combination of credit downgrades of the underlying issuer and the bond insurer as well as increased publicly reported exposure to bankruptcy risk by the issuer and continued significant deterioration in the credit markets limiting the issuer's ability to re-finance the underlying bond. We wrote down the remaining balance of our \$2.0 million investment in an RFID technology company due to a combination of continued negative financial results reported by this company in a very competitive sector and a down round of financing in which our preferred share ownership was converted into common stock, eliminating our preference rights associated with liquidation, thereby substantially impairing our ability to recoup our investment. These write-downs occurred in the quarter ended September 30, 2008.

Operating Income

Income from Operations. Operating income for the nine months ended September 30, 2009 of \$11.3 million decreased by \$14.3 million as compared to operating income of \$25.6 million for the nine months ended September 30, 2008. The decrease was based on a consolidated revenue decline of 29%. Operating margins were 6.1% and 9.8% for the first nine months of 2009 and 2008, respectively. Operating income in the Americas, EMEA and APAC segments for the nine months ended September 30, 2009 decreased by \$8.7 million \$3.7 million and \$1.9 million, respectively. Operating income and margins declined primarily due to lower license revenues and the restructuring charge of \$3.8 million in the second quarter of 2009.

Other (Expense) Income and Taxes

	Nine Months Ended September 30,		% Change
	2009	2008	2009 to
	(in thousands)		2008
Other (expense) income, net	\$(382)	\$3,878	-110%
Income tax provision	185	8,653	-98%

Other (expense) income, net. Other (expense) income, net principally includes interest income, foreign currency gains and losses, and other non-operating expenses. Other expense for the nine months ended September 30, 2009 was \$0.4 million compared to other income of \$3.9 million for the same period in the prior year, which is principally attributable to fluctuation of the U.S. dollar relative to other foreign currencies and the decrease in interest income. We recorded a net foreign currency loss of \$0.6 million and a net foreign currency gain of \$2.5 million during the nine months ended September 30, 2009 and 2008, respectively. The foreign currency gains and losses resulted from gains or losses on intercompany balances with subsidiaries and foreign-denominated accounts receivable due to the fluctuation of the U.S. dollar relative to other foreign currencies, primarily the Indian Rupee,

Table of Contents

the British Pound and the Euro. Interest income decreased \$1.1 million to \$0.3 million for the nine months ended September 30, 2009 from \$1.4 million for the nine months ended September 30, 2008 based on lower average investment balances and low interest rate in the first nine months of 2009. The weighted-average interest rate earned on cash and investment securities during the nine month periods ended September 30, 2009 and 2008 was approximately 30 basis points and 185 basis points, respectively.

Income tax provision. Our effective income tax rates were 1.7% and 29.4% in the nine months ended September 30, 2009 and 2008, respectively. The effective tax rate in the first nine months of 2009 included the release of income tax reserves resulting from expiration of tax audit statutes for U.S. federal income tax returns filed for 2005 partially offset by the establishment of \$0.8 million in tax reserves associated with the treatment of currency gains under our transfer pricing policy with one of our foreign subsidiaries. The effective tax rate in the first nine months of 2008 included the release of income tax reserves resulting from expiring tax audit statutes for U.S. federal income tax returns filed for 2004 and prior partially offset by \$0.6 million tax expense on the repatriation of cash from a foreign subsidiary and the asset impairment charges for which no tax benefit was recorded.

Liquidity and Capital Resources

As of September 30, 2009, we had approximately \$106.0 million in cash, cash equivalents and investments, as compared to \$90.8 million at June 30, 2009 and \$88.7 million at December 31, 2008. Our main source of operating cash flows is cash collections from our customers, which we use to fund our operations. Our primary use of cash is to support continuing operations and capital expenditure requirements and to repurchase our common stock in the open market.

Our operating activities generated cash flow of approximately \$38.9 million and \$45.5 million for the nine months ended September 30, 2009 and 2008, respectively. The decrease in cash flow from operations was attributable to lower revenue partially offset by strong accounts receivable collections. Days sales outstanding (DSO) were 59 days at September 30, 2009 and 78 days at December 31, 2008.

Our investing activities used cash of approximately \$1.6 million for the nine months ended September 30, 2009 and provided cash of \$14.7 million for the nine months ended September 30, 2008. The use of cash for investing activities for the nine months ended September 30, 2009 was for capital expenditures of approximately \$1.7 million. The sources of cash provided by investing activities for the nine months ended September 30, 2008 was net maturities of investments of approximately \$21.6 million offset by capital expenditures of approximately \$6.8 million.

Our financing activities used cash of approximately \$20.0 million and \$22.0 million for the nine months ended September 30, 2009 and 2008, respectively. The principal use of cash for financing activities for the nine months ended September 30, 2009 was to purchase approximately \$20.6 million of our common stock including \$0.6 million for shares withheld for taxes due upon vesting of restricted stock, partially offset by proceeds generated from options exercised of \$0.6 million. The principal use of cash for financing activities for the nine months ended September 30, 2008 was to purchase approximately \$25.1 million of our common stock, partially offset by proceeds generated from options exercised of \$3.0 million.

Periodically, opportunities may arise to grow our business through the acquisition of complementary and synergistic companies, products and technologies. Any material acquisition could result in a decrease to our working capital depending on the amount, timing and nature of the consideration to be paid. We believe that existing balances of cash and investments will be sufficient to meet our working capital and capital expenditure needs at least for the next twelve months, although there can be no assurance that this will be the case.

Critical Accounting Policies and Estimates

The SEC defines critical accounting policies as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

Table of Contents

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying consolidated financial statements and related footnotes. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions were made. To the extent there are material differences between those estimates, judgments or assumptions and actual results, our financial statements will be affected. The accounting policies that we believe reflect our more significant estimates, judgments and assumptions, which we have identified as our critical accounting policies are: Revenue Recognition, Allowance for Doubtful Accounts, Valuation of Goodwill, Accounting for Income Taxes, Stock-based Compensation, and Business Combinations.

Revenue Recognition

Our revenue consists of revenues from the licensing and hosting of software, fees from implementation and training services (collectively, professional services), plus customer support and software enhancements, and sales of hardware and other revenues (other revenues consists of reimbursements of out-of-pocket expenses incurred by professional services). All revenue is recognized net of any related sales taxes.

We recognize license revenue when the following criteria are met: (1) a signed contract is obtained; (2) delivery of the product has occurred; (3) the license fee is fixed or determinable; and (4) collectibility is probable. Revenue recognition for software with multiple-element arrangement requires recognition of revenue using the residual method when (a) there is vendor-specific objective evidence of the fair values of all undelivered elements in a multiple-element arrangement that is not accounted for using long-term contract accounting; (b) vendor-specific objective evidence of fair value does not exist for one or more of the delivered elements in the arrangement; and (c) all other applicable revenue-recognition criteria for software revenue recognition, other than the requirement for vendor-specific objective evidence of the fair value of each delivered element of the arrangement are satisfied. For those contracts that contain significant customization or modifications, license revenue is recognized using contract accounting.

The accounting related to license revenue recognition in the software industry is complex and affected by interpretations of the rules which are subject to change. Our judgment is required in assessing the probability of collection, which is generally based on evaluation of customer-specific information, historical collection experience and economic market conditions. If market conditions decline, or if the financial condition of our customers deteriorates, we may be unable to determine that collectibility is probable, and we could be required to defer the recognition of revenue until we receive customer payments.

Our services revenue consists of fees generated from professional services, customer support services and software enhancements related to our software products. Fees from professional services performed by us are generally billed on an hourly basis, and revenue is recognized as the services are performed. Professional services are sometimes rendered under agreements in which billings are limited to contractual maximums or based upon a fixed-fee for portions of or all of the engagement. Revenue related to fixed-fee based contracts is recognized on a proportional performance basis based on the hours incurred on discrete projects within an overall services arrangement. Project losses are provided for in their entirety in the period in which they become known. Revenue related to customer support services and software enhancements is generally paid in advance and recognized ratably over the term of the agreement, typically 12 months.

Hardware and other revenue is generated from the resale of a variety of hardware products, developed and manufactured by third parties that are integrated with and complementary to our software solutions. As part of a complete solution, our customers periodically purchase hardware from us in conjunction with the licensing of software. These products include computer hardware, radio frequency terminal networks, radio frequency identification (RFID) chip readers, bar code printers and scanners and other peripherals. Hardware revenue is recognized upon shipment to the customer when title passes. We generally purchase hardware from our vendors only after receiving an order from a customer. As a result, we do not maintain significant hardware inventory.

In accordance with the other presentation matters within Revenue Recognition Topic of the FASB Accounting Standards Codification, we recognize amounts associated with reimbursements from customers for out-of-pocket expenses as revenue. Such amounts have been included in hardware and other revenue.

Table of Contents**Allowance for Doubtful Accounts**

We continuously monitor collections and payments from our customers and maintain an allowance for estimated credits based upon our historical experience and any specific customer collection issues that we have identified. Additions to the allowance for doubtful accounts generally represent a sales allowance on services revenue, which are recorded to operations as a reduction to services revenue. While such credit losses have historically been within our expectations and the provisions established, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past.

Valuation of Goodwill

In accordance with Intangibles-Goodwill and Other Topic of the FASB Accounting Standards Codification, we do not amortize goodwill and other intangible assets with indefinite lives. Our goodwill is subject to an annual impairment test, which requires us to estimate the fair value of our business compared to the carrying value. The impairment reviews require an analysis of future projections and assumptions about our operating performance. Should such review indicate the assets are impaired, we would record an expense for the impaired assets.

Annual tests or other future events could cause us to conclude that impairment indicators exist and that our goodwill is impaired. For example, if we had reason to believe that our recorded goodwill had become impaired due to decreases in the fair market value of the underlying business, we would have to take a charge to income for that portion of goodwill that we believed was impaired. Any resulting impairment loss could have a material adverse impact on our financial position and results of operations.

Accounting for Income Taxes

We provide for the effect of income taxes on our financial position and results of operations in accordance with the Income Taxes Topic of the FASB Accounting Standards Codification. Under this accounting pronouncement, income tax expense is recognized for the amount of income taxes payable or refundable for the current year and for the change in net deferred tax assets or liabilities resulting from events that are recorded for financial reporting purposes in a different reporting period than recorded in the tax return. Management must make significant assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against our net deferred tax asset.

Our judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws, allowable deductions, projected tax credits and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. We do not recognize a tax benefit unless we conclude that it is more likely than not that the benefit will be sustained on audit by the taxing authority based solely on the technical merits of the associated tax position. If the recognition threshold is met, we recognize a tax benefit measured at the largest amount of the tax benefit that, in our judgment, is greater than 50 percent likely to be realized. Changes in tax law or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our financial position and results of operations. Our assumptions, judgments and estimates relative to the value of our net deferred tax asset take into account predictions of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate, thus materially impacting our financial position and results of operations.

Stock-Based Compensation

We estimate the fair value of options granted on the date of grant using the Black-Scholes option pricing model. We base our estimate of fair value on certain assumptions, including the expected term of the option, the expected volatility of the price of the underlying share for the expected term of the option, the expected dividends on the underlying share for the expected term, and the risk-free interest rate for the expected term of the option. We base our expected volatilities on a combination of the historical volatility of our stock and the implied volatility of our publicly traded stock options. Due to the limited trading volume of our publicly traded options, we place a greater emphasis on historical volatility. We also use historical data to estimate the term that options are expected to

Table of Contents

be outstanding and the forfeiture rate of options granted. We base the risk-free interest rate on the rate for U.S. Treasury zero-coupon issues with a term approximating the expected term of the option.

We recognize compensation cost for awards with graded vesting using the straight-line attribution method, with the amount of compensation cost recognized at any date at least equal to the portion of the grant-date value of the award that is vested at that date. Compensation cost recognized in any period is affected by the number of stock options granted and the vesting period (which generally is four years), as well as the underlying assumptions used in estimating the fair value on the date of grant. This estimate is dependent upon a number of variables such as the number of options awarded, cancelled or exercised and fluctuations in our share price during the year.

Business Combinations

In accordance with business combination accounting, we allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets.

Management makes estimates of fair value based upon assumptions believed to be reasonable. These estimates are based on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Critical estimates in valuing certain of the intangible assets include but are not limited to future expected cash flows from customer contracts and acquired developed technologies; the acquired company's brand awareness and market position, as well as assumptions about the period of time the acquired brand will continue to be used in the combined company's product portfolio; and discount rates. Unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results.

In connection with purchase price allocations, we estimate the fair value of the support obligations assumed in connection with acquisitions. The estimated fair value of the support obligations is determined utilizing a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The estimated costs to fulfill the support obligations are based on the historical direct costs related to providing the support services and to correcting any errors in the software products acquired. We do not include any costs associated with selling efforts, available upgrades, or research and development or the related fulfillment margins on these costs. Profit associated with selling effort is excluded because the acquired entities would have concluded the selling effort on the support contracts prior to the acquisition date. The estimated research and development costs are not included in the fair value determination, as these costs are not deemed to represent a legal obligation at the time of acquisition. The sum of the costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume the support obligation.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.**Foreign Business**

Our international business is subject to risks typical of an international business, including, but not limited to: differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Our international operations currently include business activity out of offices in the United Kingdom, the Netherlands, Germany, France, Australia, Japan, China, Singapore and India. When the U.S. dollar strengthens against a foreign currency, the value of our sales and expenses in that currency converted to U.S. dollars decreases. When the U.S. dollar weakens, the value of our sales and expenses in that currency converted to U.S. dollars increases. We recorded a foreign exchange loss of \$0.6 million and a foreign exchange gain of \$2.5 million for the nine months ended September 30, 2009 and 2008, respectively. Foreign exchange rate transaction gains and losses are classified in Other income (expense), net in our Condensed Consolidated Statements of Operations. A fluctuation of 10% in the period end exchange rates at September 30, 2009 relative to the U.S. dollar would result in approximately a \$0.2 million change in the reported foreign currency loss for the nine months ended September 30, 2009.

Table of Contents**Interest Rates**

We invest our cash in a variety of financial instruments, including taxable and tax-advantaged floating rate and fixed rate obligations of corporations, municipalities, and local, state and national governmental entities and agencies. These investments are denominated in U.S. dollars. Cash balances in foreign currencies overseas are derived from operations. At September 30, 2009, our cash and investments balance totaled \$106.0 million, of which \$103.2 million is 100% liquid. The remaining investments totaling \$2.8 million are invested in auction rate securities.

Our investments in marketable securities consist principally of debt instruments of state and local government agencies and U.S. corporate commercial paper. These investments are categorized as available-for-sale securities and recorded at fair market value. At September 30, 2009, we held \$6.5 million of investments in auction rate securities, which had original maturities greater than one year, but which had auctions to reset the yield every 7 to 35 days. The fair values of these auction rate securities considered the credit worthiness of the counterparty, estimates of interest rates, expected holding periods, and the timing and value of expected future cash flows. Changes in the assumptions of our valuation could have a significant impact on the value of these securities, which may cause losses and affect our liquidity specifically for these securities potentially requiring us to record an impairment charge on these investments in the future. Certain auctions failed during 2008 and the underlying securities were not called by the issuer. During 2008, we recorded an other-than-temporary impairment charge of \$3.5 million on one of these investments. During 2009 and 2008, we also recorded temporary impairment charges of \$0.2 million on these investments, resulting in \$2.8 million in total auction rate securities investments on the balance sheet at September 30, 2009. We reduced the carrying value to zero due to credit downgrades of the underlying issuer and the bond insurer as well as increasing publicly reported exposure to bankruptcy risk by the issuer. The remaining \$2.8 million of auction rate securities held by us at September 30, 2009 were issued by state or regional educational loan authorities and are collateralized by federally insured student loans. These investments have high credit ratings, and we intend and have the ability to hold these securities until maturity or until called. We will continue to evaluate the fair value of our investments in auction rate securities each reporting period for a potential other-than-temporary impairment.

Investments in both fixed rate and floating rate interest-earning instruments carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates, or we may suffer losses in principal if forced to sell securities that have seen a decline in market value due to changes in interest rates. The weighted-average interest rate of return on cash and investment securities was less than 1% for the three and nine months ended September 30, 2009 as compared to less than 1% and 2% for the three and nine months ended September 30, 2008, respectively. The fair value of cash equivalents and investments held at September 30, 2009 was \$60.1 million. Based on the average investments outstanding during the three months ended September 30, 2009, an increase or decrease of 25 basis points would result in an approximately \$0.2 million increase or decrease to interest income.

Item 4. Controls and Procedures.**Disclosure Controls and Procedures**

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures. Based on the evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective to provide reasonable assurance that the objectives of disclosure controls and procedures are met.

Table of Contents**Changes in Internal Control over Financial Reporting**

During the nine months ended September 30, 2009, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, including any corrective actions with regard to material weaknesses.

PART II
OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we are party to various legal proceedings arising in the ordinary course of business. The Company is not currently a party to any other legal proceeding the result of which it believes could have a material adverse impact upon its business, financial position or results of operations.

Many of our installations involve products that are critical to the operations of our clients' businesses. Any failure in our products could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to limit contractually our liability for damages arising from product failures or negligent acts or omissions, there can be no assurance the limitations of liability set forth in our contracts will be enforceable in all instances.

Item 1A. Risk Factors.

In addition to the other information set forth in this report, you should carefully consider the risk factors disclosed in Item 1A, Risk Factors, of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information regarding our common stock repurchases under our publicly-announced repurchase program and shares withheld for taxes due upon vesting of restricted stock for the quarter ended September 30, 2009. All repurchases related to the repurchase program were made on the open market.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that August Yet Be Purchased Under the Plans or Programs
July 1 - July 30, 2009	2,717	\$ 16.53		\$ 14,985,564
August 1 - August 31, 2009				14,985,564
September 1 - September 30, 2009	299	18.29		14,985,564
Total	3,016	\$ 16.70		\$ 14,985,564

All shares repurchased during the quarter ended September 30, 2009 are shares withheld for taxes due upon vesting of restricted stock

Item 3. Defaults Upon Senior Securities.

No events occurred during the quarter covered by the report that would require a response to this item.

Item 4. Submission of Matters to a Vote of Security Holders.

No events occurred during the quarter covered by the report that would require a response to this item.
