Item 1A. RISK FACTORS

The following are certain risk factors that could affect our business, financial condition, results of operations, and cash flows. These risk factors should be considered in connection with evaluating the forward-looking statements contained in this Annual Report on Form 10-K because these factors could cause the actual results and conditions to differ materially from those projected in forward-looking statements. Before you invest in our publicly traded securities, you should know that making such an investment involves some risks, including the risks described below. If any of the risks actually occur, our business, financial condition or results of operations could be negatively affected. In that case, the trading price of our Class A common shares could decline, and you may lose all or part of your investment.

Risks Relating to Our Businesses

Currency exchange rate, commodity price and interest rate fluctuations may adversely affect our results.

We are exposed to a variety of market risks, including the effects of changes in non-U.S. currency exchange rates, commodity prices and interest rates. See Part II Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

More than 40% of our 2006 net revenues were derived outside the U.S., and we expect sales to non-U.S. customers to continue to represent a significant portion of our consolidated net revenues. Therefore, in the case where we manufacture our products in the U.S. and the U.S. dollar strengthens in relation to the currencies of the countries where we sell those products, such as the euro and Asian currencies, our U.S. dollar reported revenue and income will decrease. Although we enter into currency exchange contracts to reduce our risk related to currency exchange fluctuations, changes in the relative values of currencies occur from time to time and may, in some instances, have a significant effect on our results of operations. Furthermore, the reporting currency for our financial statements is the U.S. dollar. We have assets, liabilities, revenues and expenses denominated in currencies other than the U.S. dollar. To prepare our consolidated financial statements, we must translate those assets, liabilities, revenues and expenses into U.S. dollars at the applicable exchange rates. Consequently, increases and decreases in the value of the U.S. dollar versus other currencies will affect the amount of these items in our consolidated financial statements, even if their value has not changed in their original currency. Because we do not hedge against all of our currency exposure, our business will continue to be susceptible to currency fluctuations.

We are a large buyer of steel and non-ferrous metals, as well as other commodities required for the manufacture of our products. Volatility in the prices of these commodities could increase the costs of our products and services. We may not be able to pass on these costs to our customers and this could have a material adverse effect on our results of operations and cash flows. On a limited basis, we purchase commodity derivatives which reduce the volatility of the commodity prices for supplier contracts where fixed pricing is not available.

Material adverse legal judgments, fines, penalties or settlements could adversely affect our financial health.

We estimate that our available cash and our cash flow from operations will be adequate to fund our operations for the foreseeable future. In making this estimate, we have not assumed the need to make any material payments in connection with any pending litigation or investigations. As required by U.S. generally accepted accounting principles, we establish reserves based on our assessment of contingencies. Subsequent developments in legal proceedings, including current or future asbestos-related litigation, may affect our assessment and estimates of the loss contingency recorded as a reserve requiring us to make additional material payments, which could result in an adverse effect on our results of operations.

Such an outcome could have important consequences. For example, it could:

- increase our vulnerability to general adverse economic and industry conditions;
- limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate;
 - restrict our ability to exploit business opportunities; and
- make it more difficult for us to satisfy our payment obligations with respect to our outstanding indebtedness.

Significant shortages in the raw materials we use in our businesses could increase our operating costs.

We rely on suppliers to secure raw materials, particularly steel and non-ferrous metals, required for the manufacture of our products. A disruption in deliveries from our suppliers or decreased availability of raw materials or commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. We believe that available sources of supply will generally be sufficient for our needs for the foreseeable future. Nonetheless, the unavailability of some raw materials may have an adverse effect on our results of operations or financial condition.

Due to the instability of market prices, the Company is exposed to large fluctuations for the price of petroleum-based fuel. Higher energy costs increase our operating costs and the cost of shipping our products to customers around the world. Consequently, sharp price increases, the imposition of taxes or an interruption of supply, could cause the Company to lose the ability to effectively manage the risk of rising fuel prices and our operating income could be further affected.

Our global operations subject us to economic risks.

Our global operations are dependent upon products manufactured, purchased and sold in the U.S. and internationally, including China, Brazil, Africa and Eastern Europe. These activities are subject to risks that are inherent in operating globally, including the following:

- countries could change regulations or impose currency restrictions and other restraints;
 - in some countries, there is a risk that the government may expropriate assets;
 - some countries impose burdensome tariffs and quotas;
- national and international conflict, including terrorist acts, could significantly impact our financial condition and results of operations; and
- economic downturns, political instability and war or civil disturbances may disrupt production and distribution logistics or limit sales in individual markets.

Implementing our acquisition strategy involves risks and our failure to successfully implement this strategy could have a material adverse effect on our business.

One of our key strategies is to grow our business by selectively pursuing bolt-on acquisitions. Since 2000, we have completed approximately 65 acquisitions, and we are continuing to actively pursue additional bolt-on acquisition opportunities. Although we have been successful with this strategy in the past, we may not be able to grow our business in the future through acquisitions for a number of reasons, including:

- encountering difficulties identifying and executing acquisitions;
- increased competition for targets, which may increase acquisition costs;
- consolidation in our industries reducing the number of acquisition targets; and
- competition laws and regulations preventing us from making certain acquisitions.

In addition, there are potential risks associated with growing our business through acquisitions, including the failure to successfully integrate and realize the expected benefits of an acquisition. For example, with any past or future acquisition, there is the possibility that:

- the business culture of the acquired business may not match well with our culture;
- technological and product synergies, economies of scale and cost reductions may not occur as expected;
- management may be distracted from overseeing existing operations by the need to integrate acquired businesses;
 - we may acquire or assume unexpected liabilities;
 - unforeseen difficulties may arise in integrating operations and systems;
 - we may fail to retain and assimilate employees of the acquired business; and
- we may experience problems in retaining customers and integrating customer bases.

Failure to continue implementing our acquisition strategy, including successfully integrating acquired businesses, could have a material adverse effect on our business, financial condition and results of operations.

Our reputation and our ability to do business may be impaired by improper conduct by any of our employees or agents.

We do business in many parts of the world that have experienced governmental corruption. Our corporate policy requires strict compliance with the U.S. Foreign Corrupt Practices Act and with local laws prohibiting payments to government officials for the purpose of obtaining or keeping business or otherwise obtaining favorable treatment. Improper actions by our employees or agents could subject us to civil or criminal penalties, including substantial monetary fines, as well as disbarment, and could damage our reputation and, therefore, our ability to do business.

Risks Relating to Our Reorganization as a Bermuda Company

The reorganization exposed us or our shareholders to the risks described below. In addition, we cannot be assured that the anticipated benefits of the reorganization will be realized.

Changes in tax laws, adverse determinations by taxing authorities and changes in our status under U.S. tax laws could increase our tax burden and affect our operating results, as well as subject our shareholders to additional taxes.

While our U.S. operations are subject to U.S. tax, we believe that our non-U.S. operations are generally not subject to U.S. tax other than withholding taxes. The realization of this or any other tax benefit of the reorganization could be impacted by changes in tax laws, tax treaties or tax regulations or the interpretation or enforcement thereof by the Internal Revenue Service or any other tax authority. We believe that our risks have been diminished by the enactment of the American Jobs Creation Act of 2004. The American Jobs Creation Act includes a provision that denies tax benefits to companies that have reincorporated after March 4, 2003. We completed our reincorporation in Bermuda on December 31, 2001, and therefore our transaction is grandfathered by the American Jobs Creation Act. In addition, we believe that neither we nor IR-New Jersey will incur significant U.S. federal income or withholding taxes as a result of the transfer of the transferred shares. However, we cannot give any assurances that anticipated tax costs with respect to the transferred shares will ultimately be borne out and that the Internal Revenue Service will not contest our determination in the course of its audit. The inability to realize any of these benefits could have a material impact on our operating results.

A non-U.S. corporation, such as the Company, will constitute a "controlled foreign corporation" or "CFC" for U.S. federal income tax purposes if certain ownership criteria are met. Although we believe that we and our non-U.S. subsidiaries currently are not CFCs, the U.S. Internal Revenue Service or a court may not concur with our conclusions. If the IRS or a court determined that we were a CFC, then each of our U.S. shareholders who own (directly, indirectly, or constructively) 10% or more of the total combined voting power of all classes of our stock on the last day of our taxable year (a "10% U.S. Voting Shareholder") would be required to include in gross income for U.S. federal income tax purposes its pro rata share of our "subpart F income" (and the subpart F income of any our subsidiaries determined to be a CFC) for the period during which we (and our non-U.S. subsidiaries) were a CFC. In addition, gain on the sale of our shares realized by such a shareholder may be treated as ordinary income to the extent of the shareholder's proportionate share of our and our CFC subsidiaries' undistributed earnings and profits accumulated during the shareholder's holding period of the shares while we are a CFC.

Legislation regarding non-U.S. chartered companies could adversely affect us and our subsidiaries.

The U.S. federal government and various other states and municipalities have proposed or may propose legislation intended to deny government contracts to U.S. companies that reincorporate outside of the U.S. For instance, The Homeland Security Appropriations Act, signed into law October 18, 2004, includes a provision that prohibits reincorporated companies from entering into contracts with the Department of Homeland Security for funds available under the Homeland Security Appropriations Act. In addition, the State of California adopted legislation intended to limit the eligibility of certain Bermuda and other non-U.S. chartered companies to participate in certain state contracts and the State of North Carolina enacted a bill that provides a preference for North Carolina or U.S. products and services. Generally, these types of legislation relate to direct sales and distribution, while we typically sell our products through distributors. However, we are unable to predict with any level of certainty the likelihood or final form of these types of legislation, the nature of regulations that may be promulgated thereunder, or the impact such enactments and increased regulatory scrutiny may have on our business. We cannot provide any assurance that the impact on us of any adopted or proposed legislation in this area will not be materially adverse to our operations.

Bermuda law differs from the laws in effect in the United States and may afford less protection to holders of our securities.

We are organized under the laws of Bermuda. It may not be possible to enforce court judgments in Bermuda that are obtained in the U.S. against us or our directors or officers in Bermuda based on the civil liability provisions of the U.S. federal or state securities laws. We have been advised that the U.S. and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any U.S. federal or state court based on civil liability, whether or not based solely on U.S. federal or state securities laws, would not automatically be enforceable in Bermuda.

In addition, as a result of Bermuda law, it would be difficult for a holder of our securities to effect service of process within the United States. However, we have irrevocably agreed that we may be served with process with respect to actions based on offers and sales of securities made in the United States by having Ingersoll-Rand Company, 155 Chestnut Ridge Road, Montvale, New Jersey 07645, be our U.S. agent appointed for that purpose.

Bermuda companies are governed by the Companies Act 1981 of Bermuda, which differs in some material respects from laws generally applicable to U.S. corporations and shareholders, including, among others, differences relating to interested director and officer transactions, shareholder lawsuits and indemnification. Under Bermuda law, the duties of directors and officers of a Bermuda company are generally owed to the company only. Shareholders of Bermuda companies do not generally have rights to take action against directors or officers of the company, and may only do so in limited circumstances. Under Bermuda law, a company may also agree to indemnify directors and officers for any personal liability, not involving fraud or dishonesty, incurred in relation to the company. Thus, our shareholders may have more difficulty protecting their interests than would holders of securities of a corporation incorporated in a jurisdiction of the U.S.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

Manufacturing and assembly operations are conducted in 39 plants in the United States; 31 plants in Europe; 16 plants in Asia; 8 plants in Latin America; and 2 plants in Canada. The Company also maintains various warehouses, offices and repair centers throughout the world.

Substantially all plant facilities are owned by the Company and the remainder are under long-term lease arrangements. The Company believes that its plants and equipment have been well maintained and are generally in good condition.

Facilities under long-term lease arrangements are included below and are not significant to each operating segment's total number of plants or square footage.

13

Climate Control Technologies' manufacturing locations are as follows:

	Number of Plants	Approximate Square Footage
United States	10	3,874,000
Non - U.S.	15	2,513,000
Total	25	6,387,000

Compact Vehicle Technologies' manufacturing facilities are as follows:

	Number of Plants	Approximate Square Footage
United States	3	1,395,000
Non - U.S.	2	254,000
Total	5	1,649,000

Notes to Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

As used in these Notes, references to Key, we, our, us and similar terms refer to the consolidated entity of KeyBank National Association. KeyBank refers solely to the parent holding company, and KeyBank refers to KeyCorp's subsidiary, KeyBank National Association. We have provided the following list of acronyms and abbreviations as a tool for the reader. The acronyms and abbreviations are defined in the Notes to Consolidated Financial Statements (Unaudited) as well as Management's Discussion & Analysis of Financial Results.

AICPA: American Institute of Certified Public Accountants.

ALCO: Asset/Liability Management Committee.

A/LM: Asset/liability management.

AOCI: Accumulated other comprehensive income (loss).

Austin: Austin Capital Management, Ltd.

CMO: Collateralized mortgage obligation.

Common Shares: Common Shares, \$1 par value.

CPP: Capital Purchase Program of the U.S. Treasury.

DIF: Deposit Insurance Fund.

Dodd-Frank Act: Dodd-Frank Wall Street Reform and Consumer Protection Act

ERM: Enterprise risk management.

EVE: Economic value of equity.

FASB: Financial Accounting Standards Board.

FDIC: Federal Deposit Insurance Corporation.

Federal Reserve: Board of Governors of the Federal Reserve System.

FHLMC: Federal Home Loan Mortgage Corporation.

FNMA: Federal National Mortgage Association.

N/M: Not meaningful.

NOW: Negotiable Order of Withdrawal.

NYSE: New York Stock Exchange.

OCI: Other comprehensive income.

OREO: Other real estate owned.

OTTI: Other-than-temporary impairment.

QSPE: Qualifying special purpose vehicle.

PBO: Projected Benefit Obligation.

S&P: Standard and Poor's Rating Services, Inc.

SCAP: Supervisory Capital Assessment Program Reserve.

SEC: U.S. Securities & Exchange Commission.

Series A Preferred Stock: KeyBank National Association Convertible Preferred Stock, Series A.

Series B Preferred Stock: KeyBank National Association Preferred Stock, Series B issued to KeyBank National Association.

SILO: Sale in, lease out transaction.

GAAP: U.S. generally accepted accounting principles.
GNMA: Government National Mortgage Association.
Heartland: Heartland Payment Systems, Inc.
IRS: Internal Revenue Service.
ISDA: International Swaps and Derivatives Association.
KAHC: Key Affordable Housing Corporation.
LIBOR: London Interbank Offered Rate.
LIHTC: Low-income housing tax credit.
LILO: Lease in, lease out transaction.
Moody s: Moody s Investors Service, Inc.
N/A: Not applicable.
NASDAQ: National Association of Securities Dealers Automated Quotation System.

SPE: Special purpose entity.
TAG: Transaction Account Guar
TARP: Troubled Assets Relief P
TE: Taxable equivalent.
TLGP: Temporary Liquidity Gu
U.S. Treasury: United States De
VAR: Value at risk.
VEBA: Voluntary Employee Ben
VIE: Variable interest entity.
XBRL: eXtensible Business Rep

Table of Contents

The consolidated financial statements include the accounts of KeyCorp and its subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

The consolidated financial statements include any voting rights entities in which we have a controlling financial interest. In accordance with accounting guidance for consolidations, we also consolidate a VIE if we have: (i) a variable interest in the entity; (ii) the ability to most significantly impact the entity's economic performance; and (iii) the obligation to absorb losses of the entity that could potentially be significant to the VIE (i.e., we are considered to have a variable interest) or the right to receive benefits from the entity that could potentially be significant to the VIE (i.e., we are considered to have a variable interest). Interests can include equity interests, subordinated debt, derivative contracts, leases, service agreements, guarantees, and other contracts, agreements and financial instruments. See Note 7 (Variable Interest Entities) for information on variable interest entities. We use the equity method to account for unconsolidated investments in voting rights entities or VIEs if we have significant influence and financing decisions (usually defined as a voting or economic interest of 20% to 50%, but not controlling). Unconsolidated investments or VIEs in which we have a voting or economic interest of less than 20% generally are carried at cost. Investments in unconsolidated investment company subsidiaries (primarily principal investments) are carried at fair value.

Effective January 1, 2010, we prospectively adopted new accounting guidance which changes the way we account for variable interest entities, the concept of a QSPE and changing the requirements for derecognition of financial assets. In adopting this guidance, we have had a possible consolidation. As a result, we consolidated our education loan securitization trusts thereby adding \$2.8 billion to our balance sheet including \$2.6 billion of loans. Prior to January 1, 2010, QSPEs, including securitization trusts, established under the new guidance for transfers of financial assets were not consolidated. For additional information related to the consolidation, see the section entitled Accounting Standards Adopted in 2010 in this note and Note 16 (Discontinued Operations). We believe that the unaudited condensed consolidated interim financial statements reflect all adjustments of a normal nature necessary for a fair presentation of the results for the interim periods presented. Some previously reported amounts have been revised to conform to reporting practices.

The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full year. Financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in this report. In preparing these financial statements, subsequent events were evaluated through the time the financial statements were considered issued when they are widely distributed to all shareholders and other financial statement users, or filed with the appropriate accounting standards, all material subsequent events have been either recognized in the financial statements or disclosed.

Goodwill and Other Intangible Assets

In accordance with relevant accounting guidance, goodwill and certain other intangible assets are subject to impairment testing annually. We perform goodwill impairment testing in the fourth quarter of each year. Our reporting units for purposes of goodwill impairment testing are Community Banking and National Banking. Due to uncertainty regarding the strength of the economic recovery, we have identified indicators for goodwill and other intangible assets, and to evaluate the carrying amount of these assets as necessary. Based on our review of impairment indicators during the first and second quarters of 2010, we determined that further impairment testing of the Community Banking unit were necessary. These reviews indicated the estimated fair value of the Community Banking unit was less than its carrying amount.

Table of Contents

at both June 30, 2010 and March 31, 2010. No further impairment testing was required. There was no goodwill associated with the acquisition as of June 30, 2010 or March 31, 2010.

Offsetting Derivative Positions

In accordance with the applicable accounting guidance related to the offsetting of certain derivative contracts on the balance sheet, we have the impact of bilateral collateral and master netting agreements that allow us to settle all derivative contracts held with a counterparty to offset the net derivative position with the related collateral when recognizing derivative assets and liabilities. Additional information on offsetting is provided in Note 14 (Derivatives and Hedging Activities).

Accounting Guidance Adopted in 2010

Transfers of financial assets. In June 2009, the FASB issued new accounting guidance which changes the way entities recognize and measure eliminating the concept of a QSPE and changing the requirements for derecognition of financial assets. This guidance was effective at the start of an entity's first fiscal year beginning after November 15, 2009 (effective January 1, 2010, for us). We do not expect to have a material effect on our financial condition or results of operations.

Consolidation of variable interest entities. In June 2009, the FASB issued new accounting guidance which, in addition to changing how a company determines when an entity that is insufficiently capitalized or is not controlled through voting rights, changes changes how a company determines when an entity that is insufficiently capitalized or is not controlled through voting rights. The determination of whether a company is required to consolidate an entity is based on, among other things, the entity's ability to direct the activities that most significantly impact the entity's economic performance. This guidance was effective at the start of the year beginning after November 15, 2009 (effective January 1, 2010, for us).

In conjunction with our prospective adoption of this guidance on January 1, 2010, we consolidated our education loan receivables (and discontinued assets and liabilities), thereby adding \$2.8 billion in assets and liabilities to our balance sheet, of which \$2.8 billion was in discontinued assets and liabilities. In February 2010, the FASB deferred the application of this new guidance for certain investment entities and clarified the criteria for qualifying for this deferral will continue to apply the previously existing consolidation guidance.

Improving disclosures about fair value measurements. In January 2010, the FASB issued accounting guidance which changes the aspects of an entity's fair value disclosures and clarifies existing fair value disclosure requirements. The new disclosures are required for interim and annual reporting periods beginning after December 15, 2009 (effective January 1, 2010, for us), except for issuances and settlements in the rollforward of activity in Level 3 fair value measurements, which are effective for interim periods beginning after December 15, 2010 (effective January 1, 2011, for us). Our policy is to recognize transfers between levels of the fair value hierarchy during the period. The required disclosures are provided in Note 15 (Fair Value Measurements).

Accounting Guidance Pending Adoption at June 30, 2010

Credit quality disclosures. In July 2010, the FASB issued new accounting guidance which requires additional disclosures for loans and receivables (i.e. loans) and the allowance for credit losses. Most of these additional disclosures will be required for interim periods beginning on or after December 15, 2010 (effective December 31, 2010, for us). Specific items regarding activity that occurred before December 15, 2010, such as the allowance rollforward and modification disclosures, will be required for periods beginning after December 15, 2010.

Table of Contents

Embedded credit derivatives. In March 2010, the FASB issued new accounting guidance that amends and clarifies how to account for derivatives embedded in beneficial interests in securitized financial assets. This accounting guidance eliminates the existing scope exception for derivatives embedded in beneficial interests in securitized financial assets. This guidance will be effective the first day of the fiscal year beginning in 2010 (effective July 1, 2010, for us) with early adoption permitted. We have no financial instruments that would be affected by this guidance.

2. Earnings Per Common Share

Our basic and diluted earnings per common share are calculated as follows:

<i>dollars in millions, except per share amounts</i>	Three months ended June 30, 2010	
EARNINGS		
Income (loss) from continuing operations	\$ 101	\$
Less: Net income (loss) attributable to noncontrolling interests	4	
Income (loss) from continuing operations attributable to Key common shareholders	97	
Less: Dividends on Series A Preferred Stock	6	
Noncash deemed dividend common shares exchanged for Series A Preferred Stock		
Cash dividends on Series B Preferred Stock	31	
Amortization of discount on Series B Preferred Stock	4	
Income (loss) from continuing operations attributable to Key common shareholders	56	
Income (loss) from discontinued operations, net of taxes ^(a)	(27)	
Net income (loss) attributable to Key common shareholders	\$ 29	\$
WEIGHTED-AVERAGE COMMON SHARES		
Weighted-average common shares outstanding (000)	874,664	57
Effect of dilutive convertible preferred stock, common stock options and other stock awards (000)		
Weighted-average common shares and potential common shares outstanding (000)	874,664	57
EARNINGS PER COMMON SHARE		
Income (loss) from continuing operations attributable to Key common shareholders	\$.06	\$
Income (loss) from discontinued operations, net of taxes ^(a)	(.03)	
Net income (loss) attributable to Key common shareholders	.03	
Income (loss) from continuing operations attributable to Key common shareholders assuming dilution	\$.06	\$
Income (loss) from discontinued operations, net of taxes ^(a)	(.03)	
Net income (loss) attributable to Key common shareholders assuming dilution	.03	

(a)

In September 2009, we decided to discontinue the education lending business conducted through Key Education Resources, the education payment and financing unit of KeyBank. In April 2009, we decided to wind down the operations of Austin, a subsidiary that specialized in managing hedge fund investments for institutional customers. As a result of these decisions, we have accounted for these businesses as discontinued operations. The loss from discontinued operations for the six-month period ended June 30, 2010, was primarily attributable to fair value adjustments related to the education lending securitization trusts. Included in the loss from discontinued operations for the six-month period

ended June 30,
2009, is a charge
for intangible
assets
impairment
related to Austin.

12

Table of Contents**3. Line of Business Results**

The specific lines of business that comprise each of the major business groups (operating segments) are described below. We have re-aligned our reporting structure for our business groups. Prior to 2010, Consumer Finance consisted mainly of portfolio management and were included in our National Banking segment. For all periods presented, we are reflecting the results of the re-organized portfolios. The automobile dealer floor-plan business, previously included in Consumer Finance, has been re-aligned with the Community Banking segment. Our tuition processing business was moved from Consumer Finance to Global Treasury Management, Capital and Corporate Banking Services. In addition, other previously identified exit portfolios included in the National Banking segment are now included in Other Segments.

Community Banking

Regional Banking provides individuals with branch-based deposit and investment products, personal finance services, home equity and various types of installment loans. This line of business also provides small businesses with deposit and business advisory services.

Regional Banking also offers financial, estate and retirement planning, and asset management services to assist high net worth individuals with portfolio management, insurance, charitable giving and related needs.

Commercial Banking provides midsize businesses with products and services that include commercial lending, cash management and employee benefit programs, succession planning, access to capital markets, derivatives and foreign exchange.

National Banking

Real Estate Capital and Corporate Banking Services consists of two business units, Real Estate Capital and Corporate Banking Services. Real Estate Capital is a national business that provides construction and interim lending, permanent debt placements, commercial banking, and other commercial banking products and services to developers, brokers and owner-investors. This unit focuses on properties (i.e., generally properties in which at least 50% of the debt service is provided by rental income from non-residential properties) and emphasizes providing clients with finance solutions through access to the capital markets.

Corporate Banking Services provides cash management, interest rate derivatives, and foreign exchange products and services to clients in the Banking and National Banking groups. Through its Public Sector and Financial Institutions businesses, Corporate Banking Services provides commercial banking products and services to government and not-for-profit entities and to community banks. A variety of services, including the processing of tuition payments for private schools, are provided through the Global Treasury Management unit.

Equipment Finance meets the equipment leasing needs of companies worldwide and provides equipment manufacturing and financing options for their clients. Lease financing receivables and related revenues are assigned to other lines of business (primarily Commercial Banking) if those businesses are principally responsible for maintaining the relationship with the client.

Institutional and Capital Markets, through its KeyBanc Capital Markets unit, provides commercial lending, treasury management, derivatives, foreign exchange, equity and debt

Table of Contents

underwriting and trading, and syndicated finance products and services to large corporations and middle-market companies. Institutional and Capital Markets, through its Victory Capital Management unit, also manages or offers advice regarding a diverse asset base, including corporations, labor unions, not-for-profit organizations, governments and individuals. These portfolios include common funds or the Victory family of mutual funds.

Other Segments

Other Segments consist of Corporate Treasury, our Principal Investing unit and various exit portfolios which were previously in the Banking segment. These exit portfolios were moved to Other Segments during the first quarter of 2010.

Reconciling Items

Total assets included under Reconciling Items primarily represent the unallocated portion of nonearning assets of the funding of these assets are part of net interest income and are allocated to the business segments through noninterest intercompany eliminations and certain items that are not allocated to the business segments because they do not reflect the economic substance. The table on the following pages shows selected financial data for each major business group for the three- and six-month periods. This table is accompanied by supplementary information for each of the lines of business that make up these groups. The internal financial reporting system that we use to monitor and manage our financial performance. GAAP guides financial reporting. Management accounting is the way we use our judgment and experience to make reporting decisions. Management report may not be comparable with line of business results presented by other companies.

The selected financial data are based on internal accounting policies designed to compile results on a consistent basis with the economics of the businesses. In accordance with our policies:

- ◆ Net interest income is determined by assigning a standard cost for funds used or a standard credit for funds provided. Prepayment and/or repricing characteristics. The net effect of this funds transfer pricing is charged to the lines of business based on the balances of each line.
- ◆ Indirect expenses, such as computer servicing costs and corporate overhead, are allocated based on assumptions that reflect how the line of business actually uses the services.
- ◆ The consolidated provision for loan losses is allocated among the lines of business primarily based on their actual loan growth and changes in risk profile. The amount of the consolidated provision is based on the methodology to determine the allowance for loan losses. This methodology is described in Note 1 (Summary of Significant Accounting Policies) - Loan Losses on page 82 in our 2009 Annual Report to Shareholders.
- ◆ Income taxes are allocated based on the statutory federal income tax rate of 35% (adjusted for tax-exempt interest, state income tax, insurance and tax credits associated with investments in low-income housing projects) and a blended state income tax rate (benefit) of 2.2%.
- ◆ Capital is assigned based on our assessment of economic risk factors (primarily credit, operating and market risk).

Table of Contents

Developing and applying the methodologies that we use to allocate items among our lines of business is a dynamic process that is revised periodically to reflect accounting enhancements, changes in the risk profile of a particular business or changes in the regulatory environment.

Table of Contents**4. Securities**

Securities available for sale. These are securities that we intend to hold for an indefinite period of time but that may be sold in response to changes in interest rates, prepayment risk, liquidity needs or other factors. Securities available for sale are reported at fair value. Unrealized gains and losses on equity securities deemed temporary are recorded in equity as a component of AOCI on the balance sheet. Unrealized losses on equity securities deemed other-than-temporary, and realized gains and losses resulting from sales of securities using the specific identification method are recorded on the income statement. Unrealized losses on debt securities deemed to be other-than-temporary are recorded on the income statement or AOCI in accordance with the applicable accounting guidance related to the recognition of OTT securities. Other securities held in the available-for-sale portfolio are primarily marketable equity securities that are traded on the NASDAQ.

Held-to-maturity securities. These are debt securities that we have the intent and ability to hold until maturity. Debt securities are amortized using the interest method. This method produces a constant rate of return. Other securities held in the held-to-maturity portfolio consist of foreign bonds, capital securities and preferred equity securities. The amortized cost, unrealized gains and losses, and approximate fair value of our securities available for sale and held-to-maturity are presented in the following tables. Gross unrealized gains and losses represent the difference between the amortized cost and the fair value of the securities at the dates indicated. Accordingly, the amount of these gains and losses may change in the future as market conditions

Other securities	10	1	\$ 2	\$
Total temporarily impaired securities	\$ 1,670	\$ 39	\$ 2	\$

The unrealized losses within each investment category are considered temporary since we expect to collect all contractual principal and interest. Accordingly, these investments have been reduced to their fair value through OCI, not earnings.

We regularly assess our securities portfolio for OTTI. The assessments are based on the nature of the securities, and the issuer, the extent and duration of the loss, our intent related to the individual securities, and the likelihood that we will receive an expected recovery.

Debt securities identified to have OTTI are written down to their current fair value. For those debt securities that we do not intend to sell, prior to the expected recovery of the amortized cost, the entire impairment (i.e., the difference between fair value and amortized cost) is recognized in earnings. For those debt securities that we do not intend to sell, or more-likely-than-not will not be required to sell, the credit portion of OTTI is recognized in earnings, while the remaining OTTI is recognized in equity as a component of other comprehensive income. In the following table, there was \$4 million in impairment losses recognized in earnings for the three months ended June 30, 2010.

Table of Contents

As a result of adopting new consolidation guidance on January 1, 2010, we have consolidated our education loan securities interests in these trusts. Prior to our consolidation of these trusts, we accounted for the residual interests associated with which we regularly assessed for impairment. These residual interests will no longer be assessed for impairment. The interests in these trusts are included in discontinued assets and discontinued liabilities on the balance sheet as a result of our consolidation. For more information about this discontinued operation, see Note 16 (Discontinued Operations).

Realized gains and losses related to securities available for sale were as follows:

Six months ended June 30, 2010

in millions

Realized gains	\$ 5
Realized losses	4
Net securities gains (losses)	\$ 1

At June 30, 2010, securities available for sale and held-to-maturity securities totaling \$12.1 billion were pledged to support credit agreements, public and trust deposits, to facilitate access to secured funding, and for other purposes required or permitted by law. The following table shows securities by remaining maturity. Collateralized mortgage obligations and other mortgage securities included in the securities available-for-sale portfolio are presented based on their expected average lives. The remaining securities in the held-to-maturity portfolio, are presented based on their remaining contractual maturity. Actual maturities may differ from contractual maturities because borrowers have the right to prepay obligations with or without prepayment penalties.

Balance at beginning of period	\$ 119	\$
Provision (credit) for losses on lending-related commitments	(10)	
Balance at end of period ^(a)	\$ 109	\$

(a) Included in accrued expense and other liabilities on the balance sheet.

6. Mortgage Servicing Assets

We originate and periodically sell commercial mortgage loans but continue to service those loans for the buyers. We also originate and periodically sell commercial mortgage loans for other lenders. A servicing asset is recorded if we purchase or retain the right to service commercial mortgage loans that would exceed the going market rate. Changes in the carrying amount of mortgage servicing assets are summarized as follows:

<i>in millions</i>	Six months ended June 30, 2010	
	2010	2009
Balance at beginning of period	\$ 221	\$ 242
Servicing retained from loan sales	3	4
Purchases	7	15
Amortization	(22)	(27)
Balance at end of period	\$ 209	\$ 234

Fair value at end of period	\$	307	\$	403
-----------------------------	----	------------	----	-----

The fair value of mortgage servicing assets is determined by calculating the present value of future cash flows associated with the assets. The calculation uses a number of assumptions that are based on current market conditions. Primary economic assumptions for mortgage servicing assets at June 30, 2010 and 2009, are:

w prepayment speed generally at an annual rate of 0.00% to 25.00%;

w expected credit losses at a static rate of 2.00% to 3.00%; and

w residual cash flows discount rate of 7.00% to 15.00%.

Changes in these assumptions could cause the fair value of mortgage servicing assets to change in the future. The volatility of interest rates and credit losses are critical to the valuation of servicing assets. At June 30, 2010, a 1.00% increase in the assumed default rate would result in a \$9 million decrease in the fair value of our mortgage servicing assets.

23

Table of Contents

Our involvement with VIEs is described below.

Consolidated VIEs

LIHTC guaranteed funds. KAHC formed limited partnerships, known as funds, which invested in LIHTC operating partnerships offered in syndication to qualified investors who paid a fee to KAHC for a guaranteed return. We also earned syndication and asset management fees. The funds' assets primarily are investments in LIHTC operating partnerships, which totaled \$1.1 billion. Investments are recorded in accrued income and other assets on the balance sheet and serve as collateral for the funds. We have not formed new funds or added LIHTC partnerships since October 2003. However, we continue to act as a guarantor for existing funds under a guarantee obligation. As a result of this guarantee obligation, we have determined that we should consolidate the funds. We recorded additional expenses of approximately \$2 million related to this guarantee obligation during the first six months of 2010. The return guarantee agreements with LIHTC investors is presented in Note 13 (Commitments, Contingent Liabilities and Guarantees). In accordance with the applicable accounting guidance for distinguishing liabilities from equity, third-party interests in the funds are considered mandatorily redeemable instruments and are recorded in accrued expense and other liabilities on the balance sheet. We indefinitely deferred the measurement and recognition provisions of this accounting guidance for mandatorily redeemable instruments of finite-lived subsidiaries, such as our LIHTC guaranteed funds. We adjust our financial statements each period for the changes in the profits and losses. At June 30, 2010, we estimated the settlement value of these third-party interests to be between \$100 million and \$150 million, including reserves, totaled \$143 million. The partnership agreement for each of our guaranteed funds requires us to provide a guarantee. ***Education loan securitization trusts.*** In September 2009, we decided to exit the government-guaranteed education lending business. We accounted for this business as a discontinued operation. As part of our education lending business model, we would originate loans as the transferor, retained a portion of the risk in the form of a residual interest and also retained the right to service the loans and collect fees.

As a result of adopting the new consolidation accounting guidance issued by the FASB in June 2009, we have consolidated the education loan securitization trusts as of January 1, 2010. We were required to consolidate these trusts because we hold the residual interest and the power to direct the activities that most significantly impact the economic performance of these trusts. We elected to consolidate assets held by these trusts can only be used to settle the obligations or securities issued by the trusts. We cannot sell the assets of the consolidated trusts. The security holders or beneficial interest holders do not have recourse to us. We do not have any other than the securities issued by the trusts. We have not securitized any education loans since 2006. Additional information is provided in Note 16 (Discontinued Operations) under the heading Education lending.

Table of Contents**Unconsolidated VIEs**

LIHTC nonguaranteed funds. Although we hold significant interests in certain nonguaranteed funds that we formed, we are not the primary beneficiary of those funds because we do not absorb the majority of the funds' expected losses and most significantly impact the economic performance of these entities. At June 30, 2010, assets of these unconsolidated nonguaranteed funds totaled approximately \$963 million. Our maximum exposure to loss in connection with these funds is minimal, and we do not have any liability recorded in connection with these funds since October 2003.

LIHTC investments. Through the Community Banking business group, we have made investments directly in LIHTC operating partnerships. As a limited partner in these operating partnerships, we are allocated tax credits and deductions associated with these investments. We have determined that we are not the primary beneficiary of these investments because the general partners have the power to direct the activities that most significantly impact their economic performance and have the obligation to absorb expected losses and the right to receive residual returns from the entity. At June 30, 2010, assets of these unconsolidated LIHTC operating partnerships totaled approximately \$963 million. At June 30, 2010, our maximum exposure to loss in connection with these partnerships is the unamortized investment balance of \$373 million plus \$78 million of tax credits and deductions associated with these investments. We do not have any liability recorded related to these investments because we believe the likelihood of any loss in connection with these investments is minimal. During the first six months of 2010, we did not obtain significant direct investments (either individually or in the aggregate). We have additional investments in unconsolidated LIHTC operating partnerships that are held by the consolidated LIHTC operating partnerships were approximately \$1.3 billion at June 30, 2010. The tax credits and deductions associated with these investments are allocated to investors based on their ownership percentages. We have determined that we are not the primary beneficiary of these investments because the general partners have the power to direct the activities that most significantly impact their economic performance and the obligation to absorb expected losses and the right to receive residual returns from the entity. Information regarding our exposure to loss in connection with these guaranteed funds is minimal. Return guarantee agreement with LIHTC investors.

Commercial and residential real estate investments and principal investments. Our Principal Investing unit and the Services line of business make equity and mezzanine investments, some of which are in VIEs. These investments are subject to the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies. We are not required to disclose these investments under the disclosure provisions in the applicable accounting guidance for consolidations to these investments, which remain unamortized. We have deferred the effective date of this guidance for such nonregistered investment companies.

Table of Contents**8. Nonperforming Assets and Past Due Loans from Continuing Operations**

Impaired loans totaled \$1.4 billion at June 30, 2010, compared to \$1.9 billion at December 31, 2009, and \$1.9 billion average balance of \$1.6 billion for the second quarter of 2010 and \$1.7 billion for the second quarter of 2009. At June 30, 2010, restructured loans (included in impaired loans) totaled \$213 million while at December 31, 2009, restructured loans totaled \$364 million. During the first six months of 2010, \$1.1 billion of restructured loans were added during the first six months of 2010, the decrease in restructured loans was primarily attributable to the transfer of restructured loans to performing status, and \$83 million in payments and charge-offs. Restructured loans were nominal at December 31, 2009. Our nonperforming assets and past due loans were as follows:

<i>in millions</i>	June 30, 2010
Impaired loans	\$ 1,430
Other nonperforming loans	26
Total nonperforming loans	1,700
Nonperforming loans held for sale	22
Other real estate owned (OREO)	20
Allowance for OREO losses	(6)
OREO, net of allowance	13
Other nonperforming assets	2
Total nonperforming assets	\$ 2,080
Impaired loans with a specifically allocated allowance	\$ 1,090
Specifically allocated allowance for impaired loans	15
Restructured loans included in nonaccrual loans ^(a)	\$ 16
Restructured loans with a specifically allocated allowance ^(b)	6
Specifically allocated allowance for restructured loans ^(c)	1
Accruing loans past due 90 days or more	\$ 24
Accruing loans past due 30 through 89 days	61

(a) Restructured loans (i.e. troubled debt restructurings) are those for which we, for reasons related to a borrower's financial difficulties, have granted a

concession to the borrower that we would not otherwise have considered. These concessions are made to improve the collectability of the loan and generally take the form of a reduction of the interest rate, extension of the maturity date or reduction in the principal balance.

(b) Included in impaired loans with a specifically allocated allowance.

(c) Included in specifically allocated allowance for impaired loans.

At June 30, 2010, we did not have any significant commitments to lend additional funds to borrowers with loans on We evaluate the collectability of our loans as described in Note 1 (Summary of Significant Accounting Policies) page 82 of our 2009 Annual Report to Shareholders.

Table of Contents

9. Capital Securities Issued by Unconsolidated Subsidiaries

We own the outstanding common stock of business trusts formed by us that issued corporation-obligated mandatorily redeemable capital securities. The trusts used the proceeds from the issuance of their capital securities and common stock to buy debentures issued by the trusts. The trusts own real estate assets; the interest payments from the debentures finance the distributions paid on the capital securities.

We unconditionally guarantee the following payments or distributions on behalf of the trusts:

w required distributions on the capital securities;

w the redemption price when a capital security is redeemed; and

w the amounts due if a trust is liquidated or terminated.

Our capital securities have historically provided an attractive source of funds: they currently constitute Tier 1 capital for the trusts and enjoy the same federal tax advantages as debt.

In 2005, the Federal Reserve adopted a rule that allows bank holding companies to continue to treat capital securities as Tier 1 capital subject to quantitative limits that were to take effect March 31, 2009. On March 17, 2009, in light of continued stress in the financial markets, the Federal Reserve announced the effective date of these new limits until March 31, 2011. We believe this new rule will not have any material effect on our capital securities. The enactment of the Dodd-Frank Act changes the regulatory capital standards that apply to bank holding companies' capital securities and cumulative preferred securities (excluding TARP CPP preferred stock issued to the United States or its territories) as Tier 1 eligible capital. This three year phase-out period, which commences January 1, 2013, and ends on October 4, 2010) as Tier 1 eligible capital. This three year phase-out period, which commences January 1, 2013, and ends on October 4, 2010) as Tier 2 capital. These changes in effect apply the same leverage and risk-based capital requirements to bank holding companies, savings and loan companies, and non-bank financial companies identified as systemically important. The FDIC has 180 days from the enactment of the Dodd-Frank Act to issue its regulations in this area. We anticipate that the FDIC should provide additional clarity to the regulatory capital guidelines applicable to bank holding companies such as KeyBank. As of June 30, 2010, the capital securities issued by the KeyCorp and Union State Bank capital trusts represent \$1.8

Table of Contents

The capital securities, common stock and related debentures are summarized as follows:

<i>dollars in millions</i>	Capital Securities, Net of Discount ^(a)	Common Stock	Principal Amount of Debentures, Net of Discount
June 30, 2010

December 31, 2009	\$ 1,872	\$ 26	\$ 1,906
Total			
June 30, 2009	\$ 2,449	\$ 29	\$ 2,485
Total			

(a) The capital securities must be redeemed when the related debentures mature, or earlier if provided in the governing indenture. Each issue of capital securities carries an interest rate identical to that of the related debenture. Certain

capital securities include basis adjustments related to fair value hedges totaling \$4 million at June 30, 2010, \$81 million at December 31, 2009, and \$158 million at June 30, 2009. See Note 14 (Derivatives and Hedging Activities) for an explanation of fair value hedges.

- (b) We have the right to redeem our debentures: (i) in whole or in part, on or after July 1, 2008 (for debentures owned by KeyCorp Capital I); March 18, 1999 (for debentures owned by KeyCorp Capital II); July 16, 1999 (for debentures owned by KeyCorp Capital III); July 21, 2008 (for debentures owned by KeyCorp Capital V); December 15, 2008 (for debentures owned by KeyCorp Capital VI); June 15, 2010 (for debentures owned by KeyCorp Capital VII); June 15, 2011 (for debentures owned

by KeyCorp Capital VIII); December 15, 2011 (for debentures owned by KeyCorp Capital IX); March 15, 2013 (for debentures owned by KeyCorp Capital X); February 1, 2007 (for debentures owned by Union State Capital I); July 31, 2006 (for debentures owned by Union State Statutory II); and April 7, 2009 (for debentures owned by Union State Statutory IV); and (ii) in whole at any time within 90 days after and during the continuation of a tax event, a capital treatment event, with respect to KeyCorp Capital V, VI, VII, VIII, IX and X only an investment company event with respect to KeyCorp Capital X only a rating agency event (as each is defined in the applicable indenture). If the debentures purchased by KeyCorp Capital I, KeyCorp Capital V, KeyCorp Capital

VI, KeyCorp
Capital VII,
KeyCorp Capital
VIII, KeyCorp
Capital IX, Union
State Capital I or
Union State
Statutory IV are
redeemed before
they mature, the
redemption price
will be the
principal amount,
plus any accrued
but unpaid
interest. If the
debentures
purchased by
KeyCorp Capital
II or KeyCorp
Capital III are
redeemed before
they mature, the
redemption price
will be the greater
of: (a) the
principal amount,
plus any accrued
but unpaid interest
or (b) the sum of
the present values
of principal and
interest payments
discounted at the
Treasury Rate (as
defined in the
applicable
indenture), plus
20 basis points
(25 basis points or
50 basis points in
the case of
redemption upon
either a tax event
or a capital
treatment event
for KeyCorp
Capital III), plus
any accrued but
unpaid interest. If
the debentures

purchased by Union State Statutory II are redeemed before July 31, 2011, the redemption price will be 101.50% of the principal amount, plus any accrued but unpaid interest. When debentures are; redeemed in response to tax or capital treatment events, the redemption price for KeyCorp Capital II and KeyCorp Capital III generally is slightly more favorable to us. The principal amount of debentures includes adjustments related to hedging with financial instruments totaling \$184 million at June 30, 2010, \$89 million at December 31, 2009, and \$165 million at June 30, 2009.

- (c) The interest rates for KeyCorp Capital II, KeyCorp Capital III, KeyCorp Capital V, KeyCorp Capital VI, KeyCorp Capital VII, KeyCorp Capital VIII, KeyCorp

Capital IX,
KeyCorp Capital
X and Union State
Capital I are
fixed. KeyCorp
Capital I has a
floating interest
rate equal to
three-month
LIBOR plus 74
basis points that
reprices quarterly.
Union State
Statutory II has a
floating interest
rate equal to
three-month
LIBOR plus 358
basis points that
reprices quarterly.
Union State
Statutory IV has a
floating interest
rate equal to
three-month
LIBOR plus 280
basis points that
reprices quarterly.
The total interest
rates are
weighted-average
rates.

Table of Contents**10. Shareholders Equity****Cumulative effect adjustment (after-tax)**

Effective January 1, 2010, we adopted new consolidation accounting guidance. As a result of adopting this new guidance, we reclassified securitization trusts (classified as discontinued assets and liabilities), thereby adding \$2.8 billion in assets and liabilities to our consolidated balance sheet. We also recorded a cumulative effect adjustment (after-tax) of \$45 million to beginning retained earnings on January 1, 2010. Additional information regarding consolidation guidance and the consolidation of these education loan securitization trusts is provided in Note 1 (Balance Sheet and Operations).

We did not undertake any new capital generating activities during the first six months of 2010. Note 15 (Shareholders Equity) in our Report to Shareholders provides information regarding our capital generating activities in 2009.

11. Employee Benefits**Pension Plans**

Effective December 31, 2009, we amended our pension plans to freeze all benefit accruals. We will continue to credit interest on the frozen benefits until they receive their plan benefits. The plans were closed to new employees as of December 31, 2009.

The components of net pension cost for all funded and unfunded plans are as follows:

<i>in millions</i>	Three months ended J 2010	
Service cost of benefits earned		\$
Interest cost on PBO	\$ 15	
Expected return on plan assets	(18)	
Amortization of losses	9	
Net pension cost	\$ 6	\$

Other Postretirement Benefit Plans

We sponsor a contributory postretirement healthcare plan that covers substantially all active and retired employees who meet certain criteria. Retirees' contributions are adjusted annually to reflect certain cost-sharing provisions and benefit limitations covering certain grandfathered employees; the plan is noncontributory. Separate VEBA trusts are used to fund the healthcare benefits. The components of net postretirement benefit cost for all funded and unfunded plans are as follows:

<i>in millions</i>	Three months ended J 2010	
Interest cost on APBO	\$ 1	\$
Expected return on plan assets	(1)	
Amortization of unrecognized prior service benefit	(1)	
Net postretirement (benefit) cost	\$ (1)	

The Patient Protection and Affordable Care Act and Education Reconciliation Act of 2010, which were signed into law in September 2010, respectively, changed the tax treatment of

Table of Contents

federal subsidies paid to sponsors of retiree health benefit plans that provide a benefit that is at least actuarially equivalent. As a result of these laws, these subsidy payments become taxable in tax years beginning after December 31, 2012. The new tax law requires the impact of a change in tax law to be immediately recognized in the period that includes the enactment of the Patient Protection and Affordable Care Act and Education Reconciliation Act of 2010. These laws did not impact us as a result of Medicare Part D subsidies received.

12. Income Taxes**Income Tax Provision**

In accordance with current accounting guidance, the principal method established for computing the provision for income taxes is to make our best estimate of the effective tax rate expected to be applicable for the full year. This estimated effective tax rate is applied to pre-tax operating income to determine the interim provision for income taxes. This method has been used to determine the provision for income taxes for the quarters ended March 31, 2010 and June 30, 2009.

However, the accounting guidance allows for an alternative method to computing the effective tax rate and, thus the taxpayer is unable to calculate a reliable estimate of the effective tax rate for the entire year. Due to the current economic conditions, the alternative method is more reliable in determining the provision for income taxes for the second quarter of 2010. The provision was calculated by applying the statutory federal income tax rate to the quarter's consolidated operating income before tax, then recognizing in the quarter which include income from corporate-owned life insurance and tax credits related to investments, and then adding state taxes.

Deferred Tax Asset

As of June 30, 2010, we had a net deferred tax asset from continuing operations of \$594 million compared to a net deferred tax liability of \$577 million as of December 31, 2009 included in accrued income and other assets on the balance sheet; prior to 2009 we had a net deferred tax liability position. To determine the amount of deferred tax assets that are more likely than not to be realized, we conduct a quarterly assessment of all available evidence. This evidence includes, but is not limited to, taxable income in prior periods, projected future reversals of deferred tax items. Based on these criteria, and in particular our projections for future taxable income, we are more likely than not that we will realize the net deferred tax asset in future periods.

Unrecognized Tax Benefits

As permitted under the applicable accounting guidance for income taxes, it is our policy to recognize interest and penalties related to income tax expense.

13. Commitments, Contingent Liabilities and Guarantees**Legal Proceedings**

Shareholder derivative matter. On July 6, 2010, certain current and former directors and executive officers of KeyCorp were named as defendants in *King, Jr. v. Henry L. Meyer III, et al.*, a shareholder derivative lawsuit filed in the Cuyahoga County Court of Common Pleas. The plaintiffs allege that KeyCorp defendants violated their fiduciary duties, including their duties of candor, good faith and loyalty, and are liable for unjust enrichment in connection with 2009 executive compensation decisions.

Table of Contents

The complaint seeks unspecified compensatory damages from the KeyCorp defendants, various forms of equitable and other professional fees and costs. KeyCorp was also named as a nominal defendant in the lawsuit, but no damages are sought against KeyCorp. KeyCorp's Board of Directors has appointed a special committee of non-management directors to assess its executive's response to the allegations made in the complaint. This committee has retained an independent law firm to assist in its investigation.

Taylor litigation. On August 11, 2008, a purported class action case was filed against KeyCorp, its directors and certain employees, *et al.*, in the United States District Court for the Northern District of Ohio. On September 16, 2008, a second and related case captioned *Wildes v. KeyCorp et al.* The plaintiffs in these cases seek to represent a class of all participants in our 401(k) plan. The defendants in the lawsuit breached fiduciary duties owed to them under ERISA. On January 7, 2009, the Court consolidated the two cases into a single action. Plaintiffs have since filed their consolidated complaint, which continues to name certain employees as defendants. We strongly disagree with the allegations asserted against us in these actions, and intend to vigorously defend ourselves.

Madoff-related claims. In December 2008, Austin, a subsidiary that specialized in managing hedge fund investment vehicles, announced that its funds had suffered investment losses of up to approximately \$186 million resulting from the crimes perpetrated by Bernard Madoff. The investment losses borne by Austin's clients stem from investments that Austin made in certain Madoff funds. Several lawsuits, including putative class actions and direct actions, and one arbitration proceeding were filed against Austin seeking recovery of its clients' losses from Madoff's crimes. The lawsuits and arbitration proceeding allege various claims, including negligence, fraud, breach of contract, securities laws and ERISA. In the event we were to incur any liability for this matter, we believe it would be covered by our general liability insurance policy, subject to a \$25 million self-insurance deductible and usual policy exceptions.

In April 2009, we decided to wind down Austin's operations and have determined that the related exit costs will not be reimbursed. Information regarding discontinued operations is included in Note 16 (Discontinued Operations).

Data Treasury matter. In February 2006, an action styled *DataTreasury Corporation v. Wells Fargo & Company, et al.* was filed in the District of Texas. The plaintiff alleges patent infringement and is seeking an unspecified amount of damages and treble damages. The court entered an order establishing three trial dates due to the number of defendants involved in the action, including an order of summary judgment in favor of the plaintiff. We strongly disagree with the allegations asserted against us, and have been vigorously defending ourselves. We have established appropriate reserves for the matter consistent with applicable accounting guidance.

Other litigation. In the ordinary course of business, we are subject to other legal actions that involve claims for substantial damages. At present, to the best of our knowledge, we do not believe there is any legal action to which we are a party, or involving any of our products, that would reasonably be expected to have a material adverse effect on our financial condition.

Guarantees

We are a guarantor in various agreements with third parties. The following table shows the types of guarantees that we have provided. Information pertaining to the basis for determining the liabilities recorded in connection with these guarantees is included in Note 14.

Table of Contents

Significant Accounting Policies) under the heading Guarantees on page 84 of our 2009 Annual Report to Shareholders.

June 30, 2010

in millions

Financial guarantees:
 Standby letters of credit
 Recourse agreement with FNMA
 Return guarantee agreement with LIHTC investors
 Written put options ^(a)
 Default guarantees

Total

- (a) The maximum potential undiscounted future payments represent notional amounts of derivatives qualifying as guarantees.

We determine the payment/performance risk associated with each type of guarantee described below based on the probability of payment. The maximum potential undiscounted future payments shown in the preceding table. We use a scale of low (0-30% probability of payment) or high (71-100% probability of payment) to assess the payment/performance risk, and have determined that the risk associated with each type of guarantee outstanding at June 30, 2010, is low.

Standby letters of credit. KeyBank issues standby letters of credit to address clients' financing needs. These instruments are issued when a client fails to repay an outstanding loan or debt instrument, or fails to perform some contractual nonfinancial obligation. Standby letters of credit are treated as loans to the client; they bear interest (generally at variable rates) and pose the same credit risk as loans. As of June 30, 2010, our standby letters of credit had a remaining weighted-average life of 1.6 years, with remaining actual lives ranging from less than ten years to ten years.

Recourse agreement with FNMA. We participate as a lender in the FNMA Delegated Underwriting and Servicing program, which involves originating, underwriting and servicing mortgages, and we assume a limited portion of the risk of loss during the term of the loan that we sell to FNMA. We maintain a reserve for such potential losses in an amount that we believe approximates the maximum potential loss. As of June 30, 2010, the outstanding commercial mortgage loans in this program had a weighted-average remaining term of 5.9 years. The outstanding of loans sold by us as a participant in this program was \$2.2 billion. As shown in the preceding table, the maximum potential future payments that we could be required to make under this program is equal to approximately one-third of the principal amount of the loans. As of June 30, 2010, if we are required to make a payment, we would have an interest in the collateral underlying the related loans. Any loss incurred could be offset by the amount of any recovery from the collateral.

Return guarantee agreement with LIHTC investors. KAHC, a subsidiary of KeyBank, offered limited partnership interests in properties formed by KAHC invested in low-income residential rental properties that qualify for federal low income housing tax credits under the Revenue Code. In certain partnerships, investors paid a fee to KAHC for a guaranteed return that is based on the financial performance of the property's confirmed LIHTC status throughout a fifteen-year compliance period. Typically, KAHC provides these guaranteed returns and deductions associated with the specific properties. If KAHC defaults on its obligation to provide the guaranteed return, investors

necessary payments to investors. No recourse or collateral is available to offset our guarantee obligation other than the properties and the residual value of the operating partnership interests.

Table of Contents

As shown in the previous table, KAHC maintained a reserve in the amount of \$62 million at June 30, 2010, which was for future obligations under the guarantees. The maximum exposure to loss reflected in the table represents undiscounted value less expected return on and of their investments.

These guarantees have expiration dates that extend through 2019, but there have been no new partnerships formed under the guarantees. Additional information regarding these partnerships is included in Note 7 (Variable Interest Entities).

Written put options. In the ordinary course of business, we write interest rate caps and floors for commercial loans and derivatives, respectively, with us and wish to mitigate their exposure to changes in interest rates. At June 30, 2010, our written put options were \$1.1 billion. These instruments are considered to be guarantees as we are required to make payments to the counterparty (the counterparty) if the underlying variable that is related to an asset, a liability or an equity security held by the guaranteed party. We are obligated to pay if the benchmark interest rate is above or below a specified level (known as the strike rate). These written put options are used to hedge positions which are further discussed in Note 14 (Derivatives and Hedging Activities). We typically mitigate our potential losses on these positions with third parties.

Written put options where the counterparty is a broker-dealer or bank are accounted for as derivatives at fair value, but the counterparty does not typically hold the underlying instruments. In addition, we are a purchaser and seller of credit derivatives. See Note 14.

Default guarantees. Some lines of business participate in guarantees that obligate us to perform if the debtor (typically a borrower) fails to meet its obligations to third parties. We generally undertake these guarantees for one of two possible reasons: either the risk of default on the investment return, or we are supporting our underlying investment. The terms of these default guarantees range from short-term to long-term. Some default guarantees do not have a contractual end date. Although no collateral is held, we would receive a pro rata share of the proceeds or all of the amounts due from the debtor.

Other Off-Balance Sheet Risk

Other off-balance sheet risk stems from financial instruments that do not meet the definition of a guarantee as specified in the accounting standards, guarantees, and from other relationships.

Liquidity facilities that support asset-backed commercial paper conduits. We provide liquidity facilities to several asset-backed commercial paper conduits. These facilities obligate us to provide funding in the event that a credit market disruption or other factors prevent the issuer from paying the paper. At June 30, 2010, we had one liquidity facility remaining, which will expire by May, 2011, obligating us to provide up to \$1.1 billion. The aggregate amount available to be drawn is based on the amount of current commitments to borrowers and totaled \$1.1 billion. We periodically evaluate our commitments to provide liquidity.

Indemnifications provided in the ordinary course of business. We provide certain indemnifications, primarily through loan sale contracts that we execute in the ordinary course of business in connection with loan sales and other ongoing activities. We also provide indemnifications in connection with the sales of businesses. We maintain reserves, when appropriate, with respect to liability that reasonably could arise in connection with these activities.

Intercompany guarantees. KeyCorp and certain of our affiliates are parties to various guarantees that facilitate the financing of our business. These business activities encompass debt issuance, certain lease and insurance obligations, the purchase or issuance of securities, and leasing transactions involving clients.

Table of Contents

Heartland Payment Systems matter. Under an agreement between KeyBank and Heartland Payment Systems, Inc. (membership in the Visa and MasterCard networks to provide merchant payment processing services for Visa and MasterCard), Heartland publicly announced its discovery of an alleged criminal breach of its credit card payment processing system reportedly occurred during 2008 and allegedly involved the malicious collection of in-transit, unencrypted payment information. Heartland's 2008 Form 10-K filed with the SEC on March 10, 2009, (Heartland's 2008 Form 10-K) reported that MasterCard, asserted claims seeking to impose fines, penalties, and/or other assessments against Heartland and/or certain KeyBank branches as a result of the alleged potential breach of the respective card brand rules and regulations, and the alleged criminal intrusion into the systems environment.

KeyBank has received letters from both Visa and MasterCard imposing fines, penalties or assessments related to the intrusion. Heartland, KeyBank has certain rights of indemnification from Heartland for costs assessed against it by Visa and MasterCard. KeyBank has notified Heartland of its indemnification rights. In the event that Heartland is unable to fulfill its indemnification obligations, charges (net of any indemnification) could be significant, although it is not possible to quantify them at this time. Accordingly, we have not established any reserve.

In Heartland's Form 10-K filed with the SEC on March 10, 2010 (Heartland's 2009 Form 10-K), Heartland disclosed a reported settlement among Heartland, Visa U.S.A. Inc., Visa International Service Association, and Visa Inc., and the Heartland Bank.

In Heartland's Form 8-K filed with the SEC on May 19, 2010, Heartland disclosed that it had entered into a settlement agreement with Visa U.S.A. Inc., Visa International Service Association, and Visa Inc. incorporated to resolve potential claims and other disputes among Heartland, the Acquiring Banks, including KeyBank, MasterCard and certain MasterCard Issuers, on the other hand, with respect to potential rights of MasterCard issuers and MasterCard and MasterCard Issuers related to the Intrusion. The maximum potential aggregate amounts payable to the Acquiring Banks under the Settlement Agreement will not exceed \$41.4 million, including MasterCard's credit of \$6.6 million of the non-compensated amounts. The Settlement Agreement contains mutual releases between Heartland and the Acquiring Bank, on the one hand, and Issuers who accept the recovery offers, on the other hand, of claims relating to the Intrusion. Consummation of the settlement is subject to a termination period. At March 31, 2010, Heartland carried a \$42.8 million reserve for the Intrusion (before adjustments for the settlement). For further information on Heartland and the Intrusion, see Heartland's 2009 Form 10-K, Heartland's 2008 Form 10-K, Heartland's Form 8-K on May 11, 2009, August 7, 2009, and May 7, 2010, Heartland's Form 8-K filed with the SEC on August 4, 2009, November 19, 2009, February 18, 2010, February 24, 2010, and May 19, 2010.

Table of Contents**14. Derivatives and Hedging Activities**

We are a party to various derivative instruments, mainly through our subsidiary, KeyBank. Derivative instruments have a notional amount and an underlying variable, require no net investment and allow for the net settlement of positions as the basis for the payment provision of the contract, and takes the form of units, such as shares or dollars. A derivative instrument's value is determined by the underlying variable, such as interest rate, security price, commodity price, foreign exchange rate, index or other variable. The interaction between the underlying variable and the derivative instrument determines the number of units to be exchanged between the parties and influences the fair value of the derivative instrument. The primary derivatives that we use are interest rate swaps, caps, floors and futures; foreign exchange contracts; and other derivatives. Generally, these instruments help us manage exposure to interest rate risk, mitigate the credit risk inherent in our investments, hedge changes in foreign currency exchange rates, and meet client financing and hedging needs. Interest rate risk represents the risk that our equity or net interest income will be adversely affected by fluctuations in interest rates. Credit risk is the risk of loss due to a counterparty's failure to meet contractual payment or performance terms. Foreign exchange risk is the risk that an exchange rate will adversely affect the value of an instrument.

Derivative assets and liabilities are recorded at fair value on the balance sheet, after taking into account the effects of bilateral collateral and master netting agreements. These bilateral collateral and master netting agreements allow us to settle all derivative contracts held with a single counterparty and offset net derivative positions with related collateral, where applicable. As a result, we could have derivative contracts with positive fair values included in derivative liabilities.

At June 30, 2010, after taking into account the effects of bilateral collateral and master netting agreements, we had \$872 million of derivative assets and \$244 million of derivative liabilities that relate to contracts entered into for hedging purposes. As of the same date, after taking into account collateral and master netting agreements, and a reserve for potential future losses, we had derivative assets of \$872 million and derivative liabilities that were not designated as hedging instruments.

The recently enacted Dodd-Frank Act may limit the types of derivatives activities conducted by KeyBank and other financial institutions. It is possible that our continued use of one or more of the types of derivatives noted above could be affected.

Additional information regarding our accounting policies for derivatives is provided in Note 1 (Basis of Presentation) of our 2009 Annual Report to Shareholders.

Derivatives Designated in Hedge Relationships

Changes in interest rates and differences in the repricing and maturity characteristics of interest-earning assets and liabilities can result in fluctuations in net interest income and the economic value of equity. To minimize the volatility of net interest income, we manage interest rate risk in accordance with policy limits established by the Enterprise Risk Management Committee. We use derivatives as part of a hedge relationship in accordance with the applicable accounting guidance for derivatives and hedging to manage interest rate risk. Derivative instruments used to manage interest rate risk are interest rate swaps, which modify the interest rate characteristics of assets and liabilities. Interest rate swap instruments are used to convert the contractual interest rate index of agreed-upon amounts of assets and liabilities (i.e., fixed-rate assets and liabilities) to a floating-rate index.

We designate certain receive fixed/pay variable interest rate swaps as fair value hedges. These swaps are used primarily to hedge interest rate risk. These contracts convert certain fixed-rate long-

Table of Contents

term debt into variable-rate obligations. As a result, we receive fixed-rate interest payments in exchange for making contracts without exchanging the notional amounts.

Similarly, we designate certain receive fixed/pay variable interest rate swaps as cash flow hedges. These contracts are converted into fixed-rate loans to reduce the potential adverse effect of interest rate decreases on future interest income. These contracts are converted into variable-rate payments in exchange for making fixed-rate payments over the lives of the contracts without exchanging the notional amounts. We also use interest rate swaps to hedge the floating-rate debt that funds fixed-rate leases entered into by our Equipment Finance Group. These swaps are designated as cash flow hedges to mitigate the interest rate mismatch between the fixed-rate lease cash flows and the floating-rate debt. The derivatives used for managing foreign currency exchange risk are cross currency swaps. We have several outstanding notes that are denominated in foreign currencies. The notes are subject to translation risk, which represents the possibility that the value of the foreign-denominated debt will occur based on movement of the underlying foreign currency spot rate. It is our practice to hedge these changes caused by changes in foreign currency exchange rates and interest rates. The hedge converts the notes to a variable rate which is designated as a fair value hedge of foreign currency exchange risk.

Derivatives Not Designated in Hedge Relationships

On occasion, we enter into interest rate swap contracts to manage economic risks but do not designate the instruments as hedges. A significant amount in interest rate swap contracts entered into to manage economic risks at June 30, 2010.

Like other financial services institutions, we originate loans and extend credit, both of which expose us to credit risk in our loan portfolio and the associated credit risk in a manner consistent with asset quality objectives. This process entails the use of credit default swaps ³/₄ to mitigate our credit risk. Credit default swaps enable us to transfer to a third party a portion of the credit risk associated with the extension of credit, and to manage portfolio concentration and correlation risks. Occasionally, we also provide credit risk protection through the use of credit default swaps. In most instances, this objective is accomplished through the use of an investment-grade dividend-paying stock. For management purposes, they are not treated as hedging instruments as defined by the applicable accounting guidance. We also enter into derivative contracts to meet customer needs and for proprietary purposes that consist of the following:

- w energy swap and options contracts entered into to accommodate the needs of clients;
 - w interest rate swaps and foreign exchange contracts used for proprietary trading purposes;
 - w positions with third parties that are intended to offset or mitigate the interest rate or market risk related to client portfolios;
 - w foreign exchange forward contracts entered into to accommodate the needs of clients.
- These contracts are not designated as part of hedge relationships.

Table of Contents**Fair Values, Volume of Activity and Gain/Loss Information Related to Derivative Instruments**

The following table summarizes the fair values of our derivative instruments on a gross basis as of June 30, 2010, and the volume of our derivative transaction activity during the first half of 2010 is represented by the change in the notional amount from December 31, 2009 to June 30, 2010. The notional amounts are not affected by bilateral collateral and master netting agreements and are included in derivative assets or derivative liabilities on the balance sheet, as indicated in the following table.

<i>in millions</i>	June 30, 2010			December 31, 2009

Fair value hedges. Instruments designated as fair value hedges are recorded at fair value and included in derivative sheet. The effective portion of a change in the fair value of a hedging instrument designated as a fair value hedge is a change in fair value of the hedged item, resulting in no effect on net income. The ineffective portion of a change in the fair value of the hedging instrument is recorded in other income on the income statement with no corresponding offset. During the six-month period ended June 30, 2010, the ineffective portion of these hedging instruments from the assessment of hedge effectiveness. While some ineffectiveness is present, all fair value hedges remained highly effective as of June 30, 2010.

Table of Contents

The following table summarizes the pre-tax net gains (losses) on our fair value hedges for the six-month periods ended June 30, 2014 and June 30, 2013. All gains and losses are recorded on the income statement.

<i>in millions</i>	Income Statement Location of Net Gains (Losses) on Derivative	Six months ended June 30, 2014	
		Net Gains (Losses) on Derivative	Hedged Item
Interest rate	Other income	\$ 184	Long-term debt

Total		\$ (247)		

(a) Net gains (losses) on hedged items represent the change in fair value caused by fluctuations in interest rates.

(b) Net losses on hedged items represent the change in fair value caused by fluctuations in foreign currency exchange rates.

Cash flow hedges. Instruments designated as cash flow hedges are recorded at fair value and included in derivative sheet. The effective portion of a gain or loss on a cash flow hedge is initially recorded as a component of AOCI on the balance sheet and reclassified into income when the hedged transaction impacts earnings (e.g. when we pay variable-rate interest on debt, receive variable-rate interest on debt, or sell commercial real estate loans). The ineffective portion of cash flow hedging transactions is included in other income (loss) on the income statement. For the six-month period ended June 30, 2010, we did not exclude any portion of these hedging instruments from the assessment of hedge effectiveness. As of June 30, 2010, hedge ineffectiveness is present in our hedging relationships, all of our cash flow hedges remained highly effective as of June 30, 2010. The following table summarizes the pre-tax net gains (losses) on our cash flow hedges for the six-month periods ended June 30, 2010 and 2009. Net gains (losses) are recorded on the income statement. The table includes the effective portion of net gains (losses) recognized in OCI, net gains (losses) reclassified from OCI into income during the current period and the portion of net gains (losses) reclassified from OCI into income during the current period less the amount of hedge ineffectiveness.

Six months ended June 30,

Table of Contents

The after-tax change in AOCI resulting from cash flow hedges is as follows:

<i>in millions</i>	December 31, 2009	2009	Hedg Acti
Accumulated other comprehensive income resulting from cash flow hedges	\$	114	\$

Considering the interest rates, yield curves and notional amounts as of June 30, 2010, we would expect to reclassify derivative instruments from AOCI to income during the next twelve months. In addition, we expect to reclassify appreciated terminated cash flow hedges from AOCI to income during the next 12 months. The maximum length of time over which we expect to reclassify these instruments is 18 years.

Nonhedging instruments. Our derivatives that are not designated as hedging instruments are recorded at fair value in the balance sheet. Adjustments to the fair values of these instruments, as well as any premium paid or received, are included in other income (loss) on the income statement.

The following table summarizes the pre-tax net gains (losses) on our derivatives that are not designated as hedging instruments for the six months ended June 30, 2010 and 2009, and where they are recorded on the income statement.

Counterparty Credit Risk

Like other financial instruments, derivatives contain an element of credit risk. This risk is measured as the expected credit loss. We use several means to mitigate and manage exposure to credit risk on derivative contracts. We generally enter into derivative contracts with counterparties that are highly rated and we generally use standard forms published by ISDA. These agreements provide for the net settlement of all contracts in the event of default. Additionally, we monitor counterparty credit risk exposure on each contract to determine appropriate limits and collateral requirements. We review our collateral positions on a daily basis and exchange collateral with our counterparties in accordance with the terms of the contracts. We generally hold collateral in the form of cash and highly rated securities issued by the U.S. Treasury, government

collateral netted against derivative assets on the balance sheet totaled \$469 million at June 30, 2010, \$381 million at June 30, 2009. The collateral netted against derivative liabilities totaled \$2 million at June 30, 2010, less than \$1 million at June 30, 2009.

Table of Contents

Derivative assets before collateral	1,62
Less: Related collateral	46
Total derivative assets	\$ 1,15

We enter into derivative transactions with two primary groups: broker-dealers and banks, and clients. Since these groups are different, we have different methods for managing counterparty credit exposure and credit risk.

We enter into transactions with broker-dealers and banks for various risk management purposes and proprietary trading. These transactions generally are high dollar volume. We generally enter into bilateral collateral and master netting agreements with these counterparties. Taking into account the effects of bilateral collateral and master netting agreements, we had gross exposure of \$1.1 billion at June 30, 2010. Our net exposure of \$314 million after the application of master netting agreements and collateral; our net exposure to broker-dealers and banks was reduced to \$84 million with the \$230 million of additional collateral held in the form of securities.

We enter into transactions with clients to accommodate their business needs. These types of transactions generally are not covered by master netting agreements with these counterparties. In addition, we mitigate our overall portfolio exposure and manage our credit risk with broker-dealers and other banks. Due to the smaller size and magnitude of the individual contracts with clients, we do not have a reserve in connection with these derivative transactions. To address the risk of default associated with the uncollateralized contracts, we have established a default reserve (included in derivative assets) in the amount of \$80 million at June 30, 2010, which we estimate to be the potential loss to us from our counterparties in the event of default. At June 30, 2009 and December 31, 2009 the default reserve was \$52 million. At June 30, 2010, after taking into account the effects of master netting agreements, we had gross exposure of \$958 million to clients. Our net exposure of \$841 million on our derivatives with clients after the application of master netting agreements, collateral and the related

Table of Contents**Credit Derivatives**

We are both a buyer and seller of credit protection through the credit derivative market. We purchase credit derivatives specific commercial lending and swap obligations. We also sell credit derivatives, mainly index credit default swaps loan portfolio.

The following table summarizes the fair value of our credit derivatives purchased and sold by type. The fair value of take into account the effects of bilateral collateral or master netting agreements.

<i>in millions</i>	June 30, 2010			December 31, 2009		
	Purchased	Sold	Net	Purchased	Sold	Net
Single name credit default swaps	\$ 12	\$ (4)	\$ 8	\$ 5	\$ (3)	\$ 2
Traded credit default swap indices	1	(2)	(1)	2		2
Total credit derivatives Other	5	(2)	3	(1)	4	3
Total credit derivatives	\$ 18	\$ (8)	\$ 10	\$ 6	\$ 1	\$ 7

Single name credit default swaps are bilateral contracts whereby the seller agrees, for a premium, to provide protection in connection with a specific debt obligation. The protected credit risk is related to adverse credit events, such as bankruptcy, acceleration or restructuring of obligations, specified in the credit derivative contract using standard documentation. In a single name credit derivative, we would be required to pay the purchaser the difference between the par value and the fair value (cash settlement) or receive the specified referenced asset in exchange for payment of the par value (physical settlement) in the event that a predefined credit event occurs. For a single name credit derivative, the notional amount represents the maximum amount that we would be required to pay should a credit event occur. If a credit event occurs and we receive our portion of the related debt obligation, we will join other credit default swap holders to result in the recovery of a portion of the amount paid under the credit default swap contract. We also may purchase credit default swap protection on reference entities from third parties that will permit us to recover the amount we pay should a credit event occur.

A traded credit default swap index represents a position on a basket or portfolio of reference entities. As a seller of protection, we would be required to pay the purchaser if one or more of the entities in the index had a credit event. For a credit default swap index, the notional amount represents the maximum amount that a seller could be required to pay. Upon a credit event, the amount payable is based on the credit ratings of the entities in the index and is allocated to the specific defaulting entity.

The majority of transactions represented by the other category shown in the above table are risk participation agreements. A lead participant has a swap agreement with a customer. The lead participant (purchaser of protection) then enters into a risk participation agreement with a counterparty (seller of protection), under which the counterparty receives a fee to accept a portion of the lead participant's credit risk. Under the swap contract, the counterparty to the risk participation agreement must reimburse the lead participant for the cost of the customer swap as of the default date. If the customer swap has a negative fair value, the counterparty has a liability to the lead participant. The notional amount represents the maximum amount that the seller could be required to pay. In the case of customer default, the counterparty to the risk participation agreement has a claim against the customer under the terms of the initial swap agreement between the lead participant and the customer. The following table provides information on the types of credit derivatives sold by us and held on the balance sheet as of June 30, 2009. The payment/performance risk assessment is based on the default probabilities for the underlying reference entities based on the credit ratings matrix provided by Moody's, specifically Moody's Idealized Cumulative Default Rates, except as otherwise noted. The table represents a weighted-average of

Table of Contents

the default probabilities for all reference entities in the respective portfolios. These default probabilities are directly to make a payment under the credit derivative contracts.

<i>dollars in millions</i>	June 30, 2010			December 31, 2009		
	Notional Amount	Average Term (Years)	Payment / Performance Risk	Notional Amount	Average Term (Years)	Payment / Performance Risk
Single name credit default swaps	\$ 1,102	2.45	4.10 %	\$ 1,140	2.57	4.88 %
Traded credit default swap indices	344	4.00	8.08	733	2.71	13.29
Other	46	3.09	7.70	44	1.94	5.41
Total credit derivatives sold	\$ 1,492			\$ 1,917		

- (a) The other credit derivatives were not referenced to an entity's debt obligation. We determined the payment/performance risk based on the probability that we could be required to pay the maximum amount under the credit derivatives. We have determined that the payment/performance risk associated with the other credit derivatives was low (i.e., less than or equal to 30% probability of payment).

Credit Risk Contingent Features

We have entered into certain derivative contracts that require us to post collateral to the counterparties when these contracts require an amount of collateral to be posted is based on the amount of the net liability and thresholds generally related to our lowest Moody's and S&P. Collateral requirements are also based on minimum transfer amounts, which are specific to each ISDA Master Agreement that we have signed with the counterparties. In a limited number of instances, counterparties to our ISDA Master Agreements with us if our ratings fall below a certain level, usually investment-grade level (i.e., Baa3 for Moody's and A- for S&P). KeyBank's ratings with Moody's and S&P were A2 and A-, respectively, and KeyCorp's ratings with Moody's and S&P were a downgrade of our ratings, we could be required to post additional collateral under those ISDA Master Agreements. As of June 30, 2010, the aggregate fair value of all derivative contracts with credit risk contingent features (i.e., those

provisions based on our ratings) held by KeyBank that were in a net liability position totaled \$1.1 billion, which included \$1.9 billion in derivative liabilities. We had \$1.1 billion in cash and securities collateral posted to cover those positions. The following table summarizes the additional cash and securities collateral that KeyBank would have been required to post if features been triggered for the derivative contracts in a net liability position as of June 30, 2010, December 31, 2009. The amounts were calculated based on scenarios under which KeyBank's ratings are downgraded one, two or three ratings below all collateral already posted. At June 30, 2010, KeyCorp did not have any derivatives in a net liability position that could be

<i>in millions</i>	June 30, 2010		December 31, 2009	
	Moody's	S&P	Moody's	
KeyBank's long-term senior unsecured credit ratings	A2	A-	A2	
One rating downgrade	\$ 28	\$ 22	\$ 34	\$
Two rating downgrades	51	25	56	
Three rating downgrades	59	30	65	

If KeyBank's ratings had been downgraded below investment grade as of June 30, 2010, payments of up to \$81 million would be required to terminate the contracts or post additional collateral for those contracts in a net liability position, taking into account the collateral already posted. If KeyBank's ratings had been downgraded below investment grade, KeyBank's long-term senior unsecured credit rating would need to be downgraded by S&P.

Table of Contents**15. Fair Value Measurements****Fair Value Determination**

As defined in the applicable accounting guidance for fair value measurements and disclosures, fair value is the price of an orderly transaction between market participants in our principal market. We have established and documented our policies for assets and liabilities, where applicable. Fair value is based on quoted market prices, when available, for identical or similar assets and liabilities. If quoted market prices are not available, we determine the fair value of our assets and liabilities using valuation models or third-party prices. On market-based parameters when available, such as interest rate yield curves, option volatilities and credit spreads, our valuations may be based on our judgment, assumptions and estimates related to credit quality, liquidity, interest rates and other factors. Valuation adjustments, such as those pertaining to counterparty and our own credit quality and liquidity, may be necessary to record assets and liabilities at fair value. Credit valuation adjustments are made when market pricing is not indicative of the counterparty's creditworthiness. When we are unable to observe recent market transactions for identical or similar instruments, we make liquidity valuation adjustments to reflect the uncertainty in the pricing and trading of the instrument. Liquidity valuation adjustments are based on the following factors:

- the amount of time since the last relevant valuation;
- whether there is an actual trade or relevant external quote available at the measurement date; and
- volatility associated with the primary pricing components.

We ensure that our fair value measurements are accurate and appropriate by relying upon various controls, including:

- an independent review and approval of valuation models;
- a detailed review of profit and loss conducted on a regular basis; and
- a validation of valuation model components against benchmark data and similar products, where possible.

We review any changes to valuation methodologies to ensure they are appropriate and justified, and refine valuation models as more market data becomes available.

Additional information regarding our accounting policies for the determination of fair value is provided in Note 1 (Financial Instruments) under the heading "Fair Value Measurements" on page 84 of our 2009 Annual Report to Shareholders.

Qualitative Disclosures of Valuation Techniques

Loans. Loans recorded as trading account assets are valued using an internal cash flow model because the market for these loans is not active. The most significant inputs to our internal model are actual and projected financial results for the individual loans. Loans are classified as Level 3 assets. As of June 30, 2010, there was one loan that was actively traded. This loan was valued based on its market price and, therefore, classified as Level 2 since the fair value recorded is based on observable market data.

Table of Contents

Securities (trading and available for sale). Securities are classified as Level 1 when quoted market prices are available for securities. Level 1 instruments include exchange-traded equity securities. If quoted prices for identical securities are not available, we use pricing models or quoted prices of similar securities. These instruments, classified as Level 2 assets, include municipal bonds, government, corporate bonds, certain mortgage-backed securities, securities issued by the U.S. Treasury and certain obligations. Inputs to the pricing models include actual trade data (i.e., spreads, credit ratings and interest rates) for Level 2 securities, high-grade scales, option-adjusted spreads and standard inputs, such as yields, broker/dealer quotes, bids and offers. For a particular instrument, we use internal models based on certain assumptions to determine fair value. Such instruments include certain commercial mortgage-backed securities and certain commercial paper. Inputs for the Level 3 internal models include underlying loans, which take into account expected default and recovery percentages, market research and discount rates and other conditions.

Private equity and mezzanine investments. Private equity and mezzanine investments consist of investments in debt and equity of the Capital line of business. They include direct investments made in a property, as well as indirect investments made in the form of the purpose of investing in properties. There is not an active market in which to value these investments. The direct investments are valued at transaction price. The carrying amount is then adjusted based upon the estimated future cash flows associated with the investment. The future cash flows include the cost of build-out, future selling prices, current market outlook and operating performance. Indirect investments are valued using a methodology that is consistent with accounting guidance that allows us to use the fair value of the net asset value per share. A primary input used in estimating fair value is the most recent value of the capital account of the investment investee funds. Private equity and mezzanine investments are classified as Level 3 assets since our judgment impacts the fair value. Within private equity and mezzanine investments, we have investments in real estate private equity funds. The main focus of our portfolio of real estate investments that provides attractive risk-adjusted returns and current income for investors. Certain investments have determinable fair values and represent our ownership interest in an entity that follows measurement principles under ASC 820. The following table presents the fair value of the funds and related unfunded commitments at June 30, 2010:

June 30, 2010

in millions

INVESTMENT TYPE

Passive funds ^(a)

Co-managed funds ^(b)

Total

- (a) We invest in passive funds, which are multi-investor private equity funds. These investments can never be redeemed. Instead, distributions are received through the liquidation of the underlying investments in

the funds. Some funds have no restrictions on sale, while others require investors to remain in the fund until maturity. The funds will be liquidated over a period of one to six years.

- (b) We are a manager or co-manager of these funds. These investments can never be redeemed. Instead, distributions are received through the liquidation of the underlying investments in the funds. In addition, we receive management fees. A sale or transfer of our interest in the funds can only occur through written consent of a majority of the fund's investors. In one instance, the other co-manager of the fund must consent to the sale or transfer of our interest in the fund. The funds will

mature over a
period of four to
seven years.

45

liquidated over a period of one to ten years.

- (b) Consists of investee funds invested in long and short positions of stressed and distressed fixed income-oriented securities with the goal of producing attractive risk-adjusted returns. The investments can be redeemed quarterly with 45 days notice. However, the general partners may impose quarterly redemption limits that may delay receipt of requested redemptions.

Derivatives. Exchange-traded derivatives are valued using quoted prices and, therefore, are classified as Level 1 instruments. Non-exchange-traded derivatives are exchange-traded, so the majority of our derivative positions are valued using internally developed models based on observable market inputs, such as interest rate curves, yield curves, the LIBOR discount rates and curves, index price volatility surfaces. These derivative contracts, which are classified as Level 2 instruments, include interest rate swaps and credit default swaps. In addition, we have a few customized derivative instruments and risk participations that are classified as Level 3 instruments. Our derivative positions are valued using internally developed models. Inputs to the models consist of available market data as well as our assumptions, such as loss probabilities and proxy prices.

Market convention implies a credit rating of AA equivalent in the pricing of derivative contracts, which assumes counterparty creditworthiness. To reflect the actual exposure on our derivative contracts related to both counterparty and our own credit risk, we make an adjustment in the form of a default reserve. The credit component is valued on a counterparty-by-counterparty basis and considers master netting and collateral agreements. The default reserve is considered to be a Level 3 input.

Table of Contents

Other assets and liabilities. The value of our repurchase and reverse repurchase agreements, trade date receivables and the valuation of the underlying securities. The underlying securities may include equity securities, which are valued at market for identical securities, resulting in a Level 1 classification. If quoted prices for identical securities are not available, we use pricing models or quoted prices of similar securities, resulting in a Level 2 classification. Inputs include spreads, credit spreads, and interest rate-driven products. Inputs include actual trade data for comparable assets, and bids and offers for the credit-driven assets. Inputs include corporate bonds and mortgage-backed securities, while interest rate-driven securities include government bonds, U.S. Treasury securities, and securities guaranteed by the U.S. government.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Certain assets and liabilities are measured at fair value on a recurring basis in accordance with GAAP. These assets and liabilities are measured on a regular basis. The following tables present our assets and liabilities measured at fair value on a recurring basis at June 30, 2014.

47

Table of Contents**June 30, 2010***in millions*

	Level 1	Level 2	Level 3
ASSETS MEASURED ON A RECURRING BASIS			
Short term investments:			
Securities purchased under resale agreements		\$ 416	
Trading account assets:			
U.S. Treasury, agencies and corporations		7	
Other mortgage-backed securities			\$

Commercial loans		2	
Total trading account assets	59	919	3
Securities available for sale:			
U.S. Treasury, agencies and corporations		8	
States and political subdivisions		78	
Collateralized mortgage obligations		18,290	
Other mortgage-backed securities		1,283	

Guarantees

As part of its reorganization in 2001, the Company has fully and unconditionally guaranteed payment of all of the interest on the debt of its subsidiaries. No other subsidiary of the Company guarantees these securities.

IR-New Jersey has unconditionally guaranteed payment of the principal, premium, if any, and interest on the Company's debt with an aggregate principal amount of \$300 million. The guarantee is unsecured and provided on an unsubordinated basis. The guarantee is in full payment with all of the existing and future unsecured and unsubordinated debt of IR-New Jersey.

Critical Accounting Policies

The notes to the financial statements include a summary of significant accounting policies and methods used in the preparation of the financial statements and the following summarizes what the Company believes are the critical accounting policies and methods used in the preparation of the financial statements:

- Allowance for doubtful accounts - The Company has provided an allowance for doubtful accounts receivable using its judgment and knowledge of its end markets, customer base and products.

In the first quarter of 2006, the Company changed its estimate of the allowance for doubtful accounts in light of various factors, including a significant change in its business portfolio and historical and expected write-off experience. In addition, the Company has limited its bad debt exposure. As a result, the Company reduced its allowance by \$20.5 million, or \$17.1 million diluted earnings per share by \$0.05.

- Goodwill and other intangible assets - The Company has significant goodwill and other intangible assets on its balance sheet. The valuation and classification of these assets and the assignment of amortization lives involves significant judgment. The determination of impairment of intangibles under established accounting guidelines for impairment also requires significant use of judgment and the determination of fair market value. The Company's goodwill and other intangible assets are tested and reviewed annually or more frequently if a significant change in circumstances. The Company believes that its use of estimates and assumptions are reasonable.

accounting principles. Changes in business conditions could potentially require future adjustments to these valuations.

37

- Long-lived assets - Long-lived assets are reviewed for impairment whenever events or changes in circumstances may not be recoverable. Assets are grouped with other assets and liabilities at the lowest level for which impairment in the carrying value of an asset would be recognized whenever anticipated future undiscounted cash value. The impairment is measured as the amount by which the carrying value exceeds the fair value of the asset cash flows.
- Loss contingencies - Liabilities are recorded for various contingencies arising in the normal course of business proceedings, environmental and asbestos matters and product liability, product warranty, worker's compensation reserves in the financial statements related to these matters, which are developed using input derived from actual experience data depending on the nature of the reserve, and in certain instances with consultation of legal counsel and engineers. Subject to the uncertainties inherent in estimating future costs for these types of liabilities, the Company is reasonable and does not believe the final determination of the liabilities with respect to these matters would have a material effect on the results of operations, liquidity or cash flows of the Company for any year.
- Revenue Recognition - Revenue is generally recognized and earned when all of the following criteria are met: (a) a contract arrangement exists; (b) price is fixed or determinable; (c) collectibility is reasonably assured; and (d) delivery has occurred. Delivery generally occurs when the title and the risks and rewards of ownership have substantially transferred to the customer. Revenue on contracts or extended warranties is recognized on a straight-line basis over the life of the contract, unless another method is more appropriate. The Company enters into agreements that contain multiple elements, such as equipment, installation and service arrangements, the Company recognizes revenue for delivered elements when the delivered item has stand-alone value and undelivered elements are known, customer acceptance has occurred, and there are only customary refund or return provisions.
- Income taxes - Deferred tax assets and liabilities are determined based on temporary differences between book and tax liabilities, applying enacted tax rates expected to be in effect for the year in which the differences are expected to be realized. Benefits, such as net operating losses and non-U.S. tax credits, to the extent that realizing these benefits is considered more likely than not. The Company regularly reviews the recoverability of its deferred tax assets considering its historic profitability, the reversal of existing temporary differences and the feasibility of its tax planning strategies. Where appropriate, the Company records a valuation allowance with respect to a future tax benefit.

The provision for income taxes involves a significant amount of management judgment regarding interpretation of applicable laws in the jurisdictions in which the Company operates. Future changes in applicable laws, projected levels of taxable income, and tax planning strategies may affect the provision for income taxes recorded by the Company. In addition, U.S. and non-U.S. tax authorities periodically review income tax returns filed by the Company on issues regarding its filing positions, timing and amount of income or deductions, and the allocation of income among the entities in which the Company operates. A significant period of time may elapse between the filing of an income tax return and the ultimate resolution of any issues with respect to that return. The Company believes that it has adequately provided for any reasonably foreseeable adjustments to its estimate if significant events so dictate. To the extent that the ultimate results differ from the original estimate, the adjustments will be recorded in the provision for income taxes in the period that the matter is finally resolved.

- Employee benefit plans - The Company provides a range of benefits to eligible employees and retired employees, including postemployment health-care benefits. Determining the cost associated with such benefits is dependent on various assumptions, including rates, expected return on plan assets, compensation increases, employee mortality and turnover rates, and health care costs. The Company performs the required calculations to determine expense in accordance with U.S. generally accepted accounting principles and actuarial assumptions and are generally accumulated and amortized into earnings over future periods. Effective December 31, 2006, the Company recognized in shareholders' equity on an annual basis, due to the adoption of SFAS 158. The Company reviews the assumptions used on a regular date and makes modifications to the assumptions based on current rates and trends, if appropriate. The discount rate used to determine the expected long-term rates of return on plan assets are determined as of the measurement date. The discount rate reflects the expected return on assets effectively settled. It is established and based primarily on the yields of high-quality fixed-income investments available at the end of the life of the plans, a study based on the Citigroup Pension Liability index, and a review of the current yields reported by the Company. The expected compensation increase is dependent on expected future compensation levels. The expected long-term rates of return on plan assets to be earned over the period until the benefits are paid, which should reflect the rates of return on present investments. The expected long-term rate of return on plan assets is based on what is achievable given the plan's investment policy. The Company's return trends for the larger plans are reviewed over fifteen, ten and five-year periods. The actual rates of return on plan assets for the periods have exceeded the expected rates of return used. The Company believes that the assumptions utilized in the financial statements are reasonable based on input from its actuaries, outside investment advisors, and information as to assumptions used.

Changes in any of the assumptions can have an impact on the net periodic pension cost or postretirement cost. Estimated changes in net periodic pension cost of a 0.25% rate decrease in the three basic assumptions are as follows: the discount rate would increase expense by approximately \$4.7 million, the expected compensation increase would decrease expense by approximately \$4.7 million, and the estimated return on plan assets would decrease expense by approximately \$6.9 million. A 0.25% rate decrease in the discount rate for postretirement benefits would increase net periodic pension cost by approximately \$0.5 million and a 1.0% increase in the health care cost trend rate would increase the cost by approximately \$6.3 million.

In 2006, the Company adopted SFAS 158, which requires the Company to record the funded status of its pension plans on the balance sheet effective December 31, 2006. Refer to Notes 8 and 9 in the Company's financial statements and the Liquidity and Capital Resources section for details of the impact of SFAS 158.

The preparation of all financial statements includes the use of estimates and assumptions that affect a number of items reported in the financial statements. If actual amounts are ultimately different from previous estimates, the revisions are included in the current period's financial statements when actual amounts become known. Historically, the aggregate differences, if any, between the Company's estimates and actual amounts have had no significant impact on the consolidated financial statements.

New Accounting Standards

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108, "Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB 108). SAB 108 provides that the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The standard requires that a company should quantify errors using both a balance sheet and an income statement approach and evaluate whether either error, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 is effective for the fiscal year beginning on January 1, 2007. SAB 108 did not have a material impact on the Company's financial statements.

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement of Financial Accounting Standards No. 109" (FIN 48), which prescribes a recognition threshold and measurement process for recording in the financial statements uncertain tax positions. Additionally, FIN 48 provides guidance on the derecognition, classification, accounting in interim financial statements, and disclosure of uncertain tax positions. The provisions of FIN 48 are effective for the Company for the fiscal year beginning on January 1, 2007. The Company is currently evaluating the impact of FIN 48 on its consolidated financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standard No. 157, "Fair Value Measurements" (SFAS 157), which provides a framework for measuring fair value that is based on the assumptions market participants would use when pricing an asset or liability. SFAS 157 establishes a hierarchy that prioritizes the information to develop those assumptions. Additionally, the standard expands the disclosure requirements to include disclosing the fair value measurements of assets or liabilities within each level of the fair value hierarchy. SFAS 157 is effective for the Company starting on January 1, 2008. The Company is currently evaluating the impact on its financial statements of adopting SFAS 157.

In February 2007, the FASB issued Statement of Financial Accounting Standard No. 159, "The Fair Value Option" (SFAS 159). SFAS 159 permits companies the option, at specified election dates, to measure financial assets and liabilities at fair value and recognize corresponding changes in fair value from period to period recognized in the income statement. Additionally, SFAS 159 includes disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes. SFAS 159 is effective for the Company starting on January 1, 2008. The Company is currently evaluating the impact on its financial statements of adopting SFAS 159.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The Company is exposed to fluctuations in the price of major raw materials used in the manufacturing process, currency exchange rates, and interest rates. From time to time, the Company enters into agreements to reduce its raw material, currency and interest rate risk. In the event of a significant non-performance, those agreements are made only through major financial institutions with significant experience in

The Company experiences currency exposures in the normal course of business. To mitigate the risk from currency, the Company generally enters into forward currency exchange contracts for the purchase or sale of a currency to hedge this exposure.

The Company evaluates its exposure to changes in currency exchange rates using a sensitivity analysis. The sensitivity analysis measures the potential loss in fair value based on a percentage increase or decrease in exchange rates against the U.S. dollar. Based on the financial instruments in place at December 31, 2006, a hypothetical change in fair value of those financial instruments assuming a 10% increase in the U.S. dollar would result in an unrealized loss of approximately \$32.5 million, as compared with \$16.0 million at December 31, 2005, offset by changes in the fair value of underlying currency transactions.

The Company entered into two total return swaps (the Swaps) which are derivative instruments used to hedge the Company's share-based compensation expense. The Swaps are benchmarked to the Company's Class A common share price and the market price of our Class A common shares. Assuming a 10% decrease in our share price at December 31, 2006, the Swaps would result in an unrealized gain of approximately \$3.3 million. This amount would be offset by changes in the fair value of underlying share-based compensation.

From time to time the Company participates in the debt markets through the issuance of commercial paper, which, like other debt securities, is subject to interest rate risk. In managing its portfolio the Company issues and reissues commercial paper, thus exposing it to interest rate risk in the form of changes in the fair value of the commercial paper.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

(a) The following consolidated financial statements and the report thereon of PricewaterhouseCoopers LLP dated March 1, 2007, are included in this Annual Report on Form 10-K.

Consolidated Financial Statements:

Report of independent registered public accounting firm
Consolidated balance sheets at December 31, 2006 and 2005
For the years ended December 31, 2006, 2005 and 2004:
Consolidated statements of income
Consolidated statements of shareholders' equity
Consolidated statements of cash flows
Notes to consolidated financial statements

Financial Statement Schedule:

Consolidated schedule for the years ended December 31, 2006, 2005 and 2004:
Schedule II — Valuation and Qualifying Accounts

(b) The unaudited quarterly financial data for the two years ended December 31, is as follows:

In millions, except per share amounts

	Net revenues	Cost of goods sold	Operating income	Net earnings
2006				
First quarter	\$ 2,711.0	\$ 1,998.0	\$ 341.1	\$ 100.0
Second quarter	3,041.9	2,215.4	416.5	100.0
Third quarter	2,765.9	2,043.8	357.7	100.0
Fourth quarter	2,890.5	2,167.0	325.5	100.0
Year 2006	\$ 11,409.3	\$ 8,424.2	\$ 1,440.8	\$ 100.0
2005				
First quarter	\$ 2,458.8	\$ 1,810.6	\$ 297.0	\$ 100.0
Second quarter	2,759.5	2,019.1	379.1	100.0
Third quarter	2,615.3	1,920.7	340.0	100.0
Fourth quarter	2,713.3	1,993.7	345.7	100.0
Year 2005	\$ 10,546.9	\$ 7,744.1	\$ 1,361.8	\$ 100.0

*The amounts have been restated to reflect a two-for-one stock split that occurred in August 2005.

Item 9. CHANGES IN AND DISAGREEMENTS WITH INDEPENDENT ACCOUNTANTS ON ACCOUNT

None.

Item 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of December 31, 2006, that the disclosure controls and procedures are effective in ensuring that all material information required to be disclosed in the Company's Annual Report on Form 10-K has been recorded, processed, summarized and reported when required and the information is not being withheld or delayed in order to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as required by the Securities Exchange Act Rules 13a-15(f) and 15d-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance of the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Changes in conditions or the effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the policies and procedures may deteriorate.

Management has assessed the effectiveness of internal control over financial reporting as of December 31, 2006, and utilized the criteria set forth by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Management concluded that based on its assessment, the Company's internal control over financial reporting as of December 31, 2006, was effective. Management's assessment of the effectiveness of internal control over financial reporting as of December 31, 2006, was audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report.

Changes in Internal Control Over Financial Reporting

There has been no change in the Company's internal controls over financial reporting during the quarter ended December 31, 2006, which is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. OTHER INFORMATION

None.

43

PART III

The information called for by Part III (Items 10, 11, 12, and 13) of Form 10-K will be included in the Company's Proxy Statement for its 2005 General Meeting of Shareholders, which the Company intends to file within 120 days after the close of its fiscal year 2005. The information incorporated by reference to such Proxy Statement, except that the information as to the Company's executive office on Form 10-K, is incorporated by reference into Items 10 and 12, respectively, of this Report.

Item 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is incorporated herein by reference to the information contained under the caption "Principal Accountant Fees and Services" in the Company's 2005 Proxy Statement.

In early 2005, our registered public accounting firm, PricewaterhouseCoopers LLP (PwC), informed the Securities and Exchange Commission, the Company Accounting Oversight Board and our Audit Committee that certain non-audit work that PwC previously performed for us raised questions regarding PwC's independence with respect to its performance of audit services for us.

During the fiscal years 2004, 2003, 2002 and 2001, certain PwC affiliates, in connection with the preparation of tax returns for the authorities with respect to individual employee tax liabilities. As a result, PwC's non-U.S. affiliates had temporary office space and funds. The fees we paid to PwC's non-U.S. affiliates in China and Taiwan for the preparation of these tax returns, were \$433, \$14,765, \$24,849 and \$18,767 for the years 2004, 2003, 2002 and 2001, respectively. These services were discontinued in 2005.

Our Audit Committee has reviewed the facts surrounding these services provided by PwC. PwC has informed the Audit Committee that the performance of the tax services described above has impaired PwC's independence. In light of the de minimis nature of the actions performed and the fact that the services have been discontinued, neither our Audit Committee nor PwC believe that the performance of these services was impaired.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Ingersoll-Rand Company Limited:

We have completed integrated audits of Ingersoll-Rand Company Limited's (successor company to Ingersoll-Rand) and of its internal control over financial reporting as of December 31, 2006, in accordance with the standards of the (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements and financial statement schedule

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly of Ingersoll-Rand Company Limited and its subsidiaries at December 31, 2006 and 2005, and the results of their operations for the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in the United States. In our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2), presents fairly, in all material respects, therein when read in conjunction with the related consolidated financial statements. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Standards Board. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures, assessing the accounting principles used and significant estimates made by management, and evaluating the overall presentation of the financial statements that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards Board *Payment*, as of January 1, 2006, using the modified prospective method.

As discussed in Note 1 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards Board *Accounting for Defined Benefit Pension and Other Postretirement Plans - an Amendment to FASB Statements No. 41*, effective January 1, 2006.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in Management's Report on Internal Control Over Financial Reporting, that the Company maintained effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly presented in all material respects. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. The Company's management is responsible for establishing and maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Standards Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control over financial reporting procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as required by generally accepted accounting principles, and that receipts and expenditures of the company are made in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance that unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements is not permitted.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of the effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the policies or procedures may deteriorate.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of significant accounting policies used in the preparation of the accompanying financial statements follows.

Basis of Presentation: The consolidated financial statements of Ingersoll-Rand Company Limited, a Bermuda company, were prepared in accordance with generally accepted accounting principles in the United States. IR-Limited is the successor corporation (IR-New Jersey), following a corporate reorganization (the reorganization) that became effective on 1/1/04, accomplished through a merger of a newly formed merger subsidiary of IR-Limited. IR-Limited and its subsidiaries are the same as those conducted by IR-New Jersey and its subsidiaries. The reorganization has been accounted for as a reorganization of IR-Limited and, accordingly, did not result in any changes to the consolidated amounts of assets, liabilities and shareholders' equity.

The results for Hussmann International, Inc. and its majority-owned affiliates had been on a 15-day lag for U.S. operations, since its acquisition in 2000. During the first quarter of 2004, these lags were eliminated, and the financial statements were restated. The result of this action was a net loss of \$16.5 million, which was recorded directly to retained earnings on the Consolidated Statement of Cash Flows. The outflow of \$23.8 million, which was shown as a separate line item on the Consolidated Statement of Cash Flows.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 8 (SFAS 8) Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 8 and 15, which requires an entity to recognize in its balance sheet the funded status of its defined benefit pension and postretirement plans. SFAS 8 requires an entity to recognize changes in the funded status within accumulated other comprehensive income, net of tax, to the extent of the periodic net benefit cost. At December 31, 2006, the Company adopted the provisions of SFAS 158. The adoption of SFAS 158 resulted in a decrease of total assets of \$476.0 million and shareholders' equity of \$472.8 million, and an increase of total liabilities of \$265.0 million. Refer to Note 8 and 9 for further details of the impact of SFAS 158.

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004) (SFAS 123(R)) using the modified prospective method of adoption. SFAS 123(R) requires companies to recognize compensation expense for the share-based payment issued. Under the modified prospective method, financial statement amounts for prior periods are calculated using the fair value method of recognizing compensation cost relating to stock options. Refer to Note 11 for further details of the impact of SFAS 123(R).

Use of Estimates: In conformity with generally accepted accounting principles, management has used estimates and assumptions in the preparation of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Some of the more significant estimates include doubtful accounts, useful lives of property, plant and equipment and intangible assets, purchase price allocation of acquisitions, including goodwill and other intangible assets, product warranties, sales allowances, taxes, environmental, product liability and other contingencies. Actual results could differ from those estimates.

Principles of Consolidation: The Company's consolidated financial statements include all wholly owned and major affiliates are accounted for under the equity method. The Company is also required to consolidate variable interest to the entities' potential losses or stands to gain from a majority of the entities' expected returns. Intercompany trans

Cash and Cash Equivalents: The Company considers all highly liquid investments, consisting primarily of time of three months or less when purchased, to be cash equivalents.

Marketable Securities: The Company invests in marketable securities and classifies the securities as available-for-sale. Certain Investments in Debt and Equity Securities." In accordance with SFAS 115, available-for-sale marketable securities the unrealized gain or loss, less applicable deferred income taxes, recorded within accumulated other comprehensive

Inventories: Inventories are stated at the lower of cost or market. Most U.S. manufactured inventories, excluding those valued using the last-in, first-out (LIFO) method. All other inventories are valued using the first-in, first-out (FIFO) inventories on LIFO were approximately 40% of the company's total inventory.

Allowance for Doubtful Accounts: The Company has provided an allowance for doubtful accounts receivable derived from its knowledge of its end markets, customer base and products.

In the first quarter of 2006, the Company changed its estimate of the allowance for doubtful accounts in light of various a significant change in its business portfolio and historical and expected write-off experience. In addition, the Company limits its bad debt exposure. As a result, the Company reduced its allowance by \$20.5 million, or \$17.1 million diluted earnings per share by \$0.05.

Property, Plant and Equipment: Property, plant and equipment are stated at cost, less accumulated depreciation. As of 31, 1994, the Company principally uses accelerated depreciation methods. Assets placed in service subsequent to are depreciated using the straight-line method over the estimated useful life of the asset. Leasehold improvements economic useful life or their lease term. Useful lives range from 10 to 50 years for buildings and improvements equipment.

Repair and maintenance costs that do not extend the useful life of the asset are charged against earnings as incurred improvements are capitalized.

The Company assesses the recoverability of the carrying value of its property, plant and equipment whenever event carrying amount of the asset may not be recoverable. Recoverability is measured by a comparison of the carrying amount undiscounted cash flows expected to be generated by the asset. If the undiscounted cash flows are less than the carrying recognized for the amount by which the carrying value of the asset exceeds the fair value of the assets.

Goodwill and Intangible Assets: The Company records goodwill as the excess of the purchase price over the fair value of an acquired business.

Goodwill and other intangible assets with indefinite useful lives are not amortized, but instead are tested for impairment. Changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The Company tests for impairment at the end of each fiscal year using September 30th balances. Recoverability of goodwill is measured at the reporting unit level and a step 1 test compares the carrying amount of the reporting unit to its estimated fair value. The fair value of each reporting unit is determined based on discounted cash flows. To the extent that the carrying value of the reporting unit exceeds its estimated fair value, the reporting units carrying value of goodwill is compared to its implied fair value of goodwill. To the extent that the carrying value of goodwill exceeds its implied fair value, an impairment exists and an impairment loss must be recognized.

Recoverability of other intangible assets with indefinite useful lives is measured by a comparison of the carrying amount of the respective intangible assets. Any excess of the carrying value over the fair value is recognized as an impairment loss. Patents, customer-related intangible assets and other intangible assets with finite lives are amortized on a straight-line basis. Recoverability of intangible assets with finite lives is assessed in the same manner as for property, plant and equipment.

Income Taxes: Deferred taxes are provided on temporary differences between assets and liabilities for financial reporting purposes and the enacted tax rates expected to apply when temporary differences are settled or realized. A valuation allowance is provided if the realization of deferred tax assets is not likely.

Product Warranties: Warranty accruals are recorded at the time of sale and are estimated based upon product warranty claims. Accruals are adjusted for known or anticipated warranty claims as new information becomes available.

Treasury Stock: The Company repurchases its Class A common shares from time to time in the open market and in private transactions at market conditions and the discretion of management. These long-term repurchase programs are authorized by the Board of Directors and are subject to the dilution from the Company's incentive stock plan. These acquired Class A common shares owned by a subsidiary of the Company amounted to \$2,215.8 million and \$1,119.5 million at December 31, 2006 and 2005, respectively.

Revenue Recognition: Revenue is generally recognized and earned when all of the following criteria are satisfied: (a) the contract exists; (b) price is fixed or determinable; (c) collectibility is reasonably assured; and (d) delivery has occurred or is expected to occur when the title and the risks and rewards of ownership have substantially transferred to the customer. Revenue from product warranties is recognized on a straight-line basis over the life of the contract, unless another method is more representative of the pattern in which the benefits of the warranties are realized. For multiple-element arrangements, revenue is recognized for delivered elements when the delivered item has stand-alone value to the customer, fair value can be determined, acceptance has occurred, and there are only customary refund or return rights related to the delivered elements.

Environmental Costs: Environmental expenditures relating to current operations are expensed or capitalized as conditions caused by past operations, which do not contribute to current or future revenues, are expensed. Costs for feasibility studies are accrued when the Company commits to perform them. Liabilities for remediation costs are recorded when they are estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. The Company's calculation, based on existing technology, does not reflect any offset for possible recoveries from insurance companies.

Research and Development Costs: Research and development expenditures, including qualifying engineering costs, were \$175.5 million, \$162.4 million and \$149.2 million in 2006, 2005 and 2004, respectively. The Company also includes certain other research and development expenditures.

Software Costs: The Company follows the guidance outlined in Statement of Position 98-1, "Accounting for Intangible Assets Obtained for Internal Use" for all software developed or obtained for internal use, which requires companies to capitalize software costs if specific criteria are met and subsequently amortize these costs over the software's useful life, which ranges from 3 to 5 years.

In the fourth quarter of 2006, the Company adjusted its estimated useful life of certain of its capitalized software from 3 to 5 years. The Company expects to utilize these software platforms. The impact in the fourth quarter of 2006 for this adjustment was \$1.8 million.

Employee Benefit Plans: The Company provides a range of benefits to eligible employees and retired employees, including post-employment health-care benefits. Determining the cost associated with such benefits is dependent on various assumptions, including expected return on plan assets, compensation increases, employee mortality and turnover rates, and health-care cost trends. The Company's required calculations to determine expense in accordance with U.S. generally accepted accounting principles are based on these assumptions and are generally accumulated and amortized into earnings over future periods. Effective December 31, 2005, the Company recognized into shareholders' equity on an annual basis, due to the adoption of SFAS 158. The Company reviews its assumptions as of the date, which is November 30 for its plans, and makes modifications to the assumptions based on current rates and trends.

Loss Contingencies: Liabilities are recorded for various contingencies arising in the normal course of business, including legal proceedings, environmental matters, product liability, product warranty, worker's compensation and other claims. The Company's financial statements related to these matters, which are developed using input derived from actuarial estimates and legal opinions, depending on the nature of the reserve, and in certain instances with consultation of legal counsel, internal and external legal counsel. Due to the uncertainties inherent in estimating future costs for these types of liabilities, the Company believes its estimated reserves are reasonable. The final determination of the liabilities with respect to these matters would have a material effect on the financial condition and cash flows of the Company for any year.

Derivative Financial Instruments: The Company periodically enters into cash flow and other hedge transactions to manage risks related to interest rates, foreign exchange rates and securities pricing. The Company recognizes all derivatives at fair value as either assets or liabilities. For cash flow designated hedges, the effective portion of the changes in fair value is recorded in other comprehensive income, net of taxes, and are recognized in the income statement at the time earnings are affected. For other transactions, the changes in the fair value of the derivative contract are recognized in the income statement.

Currency Translation: For the Company's entities where the functional currency is other than the U.S. dollar, the year-end exchange rates, and income and expenses translated using average exchange rates for the respective period. Translating an entity's financial statements into the U.S. dollar have been recorded in accumulated other comprehensive income only upon sale or liquidation of the underlying investment.

Transactions that are denominated in a currency other than an entity's functional currency are subject to changes in exchange rates and losses recorded within net earnings. Net currency transaction gains (losses) which the Company records within net earnings were \$1.2 million and \$(9.6) million in 2006, 2005 and 2004, respectively.

Reclassifications: Certain prior year amounts have been reclassified to conform to the current year presentation. The Company has reclassified its consolidated statement of cash flows to separately disclose the effects of discontinued operations by cash flow activity and to disclose these amounts on a combined basis. The Company also reclassified its presentation of capitalized software on its balance sheet from intangible assets to property, plant and equipment to better depict the nature and intent of the investment. The Company also reclassified its consolidated statement of cash flow for the years ended December 31, 2005 and 2004 in order to show capitalized software as an investing activity rather than an operating activity to be consistent with the Company's balance sheet presentation.

New Accounting Standards: In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) 108, "Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB 108) on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying current year misstatements. The SEC believes that registrants should quantify errors using both a balance sheet and an income statement approach and that the effect of quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 is effective for the fiscal year ended December 31, 2006. SAB 108 did not have a material impact on the Company's financial statements.

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement of Financial Accounting Standards No. 109" (FIN 48), which prescribes a recognition threshold and measurement process for recording in the financial statements uncertain tax positions in a tax return. Additionally, FIN 48 provides guidance on the derecognition, classification, accounting in interim periods and the effect of uncertain tax positions. The provisions of FIN 48 are effective for the Company's fiscal year beginning January 1, 2006. The effect of FIN 48 on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 establishes a fair value measurement based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy to develop those assumptions. Additionally, the standard expands the disclosures about fair value measurements to include all assets or liabilities within each level of the fair value hierarchy. SFAS 157 is effective for the Company starting on January 1, 2008. The Company is currently evaluating the impact on its financial statements of adopting SFAS 157.

In February 2007, the FASB issued Statement of Financial Accounting Standard No. 159, "The Fair Value Option" (SFAS 159). SFAS 159 permits companies the option, at specified election dates, to measure financial assets and liabilities at fair value and recognizing corresponding changes in fair value from period to period recognized in the income statement. Additionally, SFAS 159 includes requirements designed to facilitate comparisons between companies that choose different measurement attributes. SFAS 159 is effective for the Company starting on January 1, 2008. The Company is currently evaluating the impact on its financial statements of adopting SFAS 159.

NOTE 2 - MARKETABLE SECURITIES

At December 31, marketable securities were as follows:

<i>In millions</i>	Amortized cost or cost	2006 Unrealized losses	Fair value	Amortized cost or cost
Short-term marketable securities:				
Equity securities	\$ 0.7	\$ -	\$ 0.7	\$ -

Municipal bonds	-	-	-	151
Total	\$ 0.7	\$ -	\$ 0.7	\$ 156
Long-term marketable securities:				
Equity securities	\$ 18.7	\$ (4.4)	\$ 14.3	\$ 20
Total	\$ 18.7	\$ (4.4)	\$ 14.3	\$ 20

Long-term marketable securities are included within Other assets on the Consolidated Balance Sheet.

NOTE 3 - INVENTORIES

At December 31, inventories were as follows:

<i>In millions</i>	
Raw materials and supplies	\$ -
Work-in-process	-
Finished goods	-
Less - LIFO reserve	-
Total	\$ -

NOTE 4 - PROPERTY, PLANT AND EQUIPMENT

At December 31, property, plant and equipment were as follows:

In millions

Land	\$
Buildings	
Machinery and equipment	
Software	
Accumulated depreciation	
Total	\$

Depreciation expense for 2006, 2005 and 2004 was \$163.5 million, 164.2 million and \$159.2 million, which included \$28.5 million, \$28.5 million and \$25.0 million, respectively. Capitalized interest on construction and other capital projects was \$2.2 million in 2006, 2005 and 2004, respectively.

NOTE 5 - GOODWILL AND OTHER INTANGIBLE ASSETS

The changes in the carrying amount of goodwill are as follows:

<i>In millions</i>	Climate Control Technologies	Compact Vehicle Technologies	Construction Technologies	Industrial Technologies
Balance at December 31, 2004	\$ 2,618.7	\$ 801.4	\$ 101.3	\$
Acquisitions and adjustments*	(35.7)	(3.6)	10.8	
Dispositions	(0.3)	-	-	
Translation	(68.5)	(3.3)	(0.4)	
Balance at December 31, 2005	2,514.2	794.5	111.7	
Acquisitions and adjustments*	(22.2)	(1.0)	40.9	
Dispositions	-	-	-	
Translation	53.1	4.4	1.1	
Balance at December 31, 2006	\$ 2,545.1	\$ 797.9	\$ 153.7	\$

* Includes current year adjustments related to final purchase price allocation adjustments.

The Company initially records as goodwill the excess of the purchase price over the preliminary fair value of the net assets acquired. If, after the purchase price allocation has been performed for each acquisition, there may be adjustments recorded to goodwill.

During 2006, the Company made several bolt-on acquisitions for an aggregate purchase price of approximately \$75.3 million. In January 2005, the Company completed the acquisition of the remaining 70% interest in a business for \$267 million in cash and the assumption of approximately \$244 million of debt. The Company also made several other acquisitions. The Company recorded approximately \$405 million of goodwill associated with these businesses acquired during 2005.

The following table sets forth the gross amount and accumulated amortization of the Company's intangible assets at

<i>In millions</i>	2006	
	Gross amount	Accumulated amortization
Customer relationships	\$ 510.6	\$ 73.0
Trademarks	105.0	10.0
Patents	38.4	25.9
Other	50.6	24.3
Total amortizable intangible assets	704.6	133.2
Indefinite-lived intangible assets	164.8	-
Total	\$ 869.4	\$ 133.2

Intangible asset amortization expense for 2006, 2005 and 2004 was \$25.9 million, \$30.1 million and \$14.5 million, on existing intangible assets is approximately \$20 million for each of the next five fiscal years.

NOTE 6 - DEBT AND CREDIT FACILITIES

At December 31, loans payable and the current maturities of long-term debt consisted of the following:

<i>In millions</i>	
Current maturities of long-term debt	\$
Other short-term borrowings	
Total	\$

The weighted-average interest rate for total short-term debt at December 31, 2006 and 2005, was 6.3% and 6.8%, respectively.

As of December 31, 2006, the Company had \$378.0 million outstanding under its commercial paper program, which is detailed above.

At December 31, long-term debt consisted of:

In millions

6.57% Medium-term Note Due 2007	\$
6.75% Senior Notes Due 2008	
4.75% Senior Notes Due 2015

6.48% Debentures Due 2025	
6.44% Debentures Due 2027	
Medium-term Notes Due 2023, at an average rate of 8.22%	
Other loans and notes, at end-of-year average interest rates of 4.73% in 2006 and 3.06% in 2005, maturing in various amounts to 2016	
Total	\$

The fair value of long-term debt, including current maturities of long-term debt, at December 31, 2006 and 2005 respectively. The fair value of long-term debt was based upon quoted market values.

Long-term debt retirements are as follows: \$626.8 million in 2007, \$138.0 million in 2008, \$10.5 million in 2009, and \$735.8 million thereafter. Long-term debt retirements for 2007 include \$549.1 million which only requires r options are not exercised, the final maturity dates of these instruments would range between 2027 and 2028. Dur issued \$300 million aggregate principal amount of its 4.75% Senior Notes due in 2015. The notes are unconditionally

The Company's public debt has no financial covenants and its \$2.0 billion revolving credit lines have a debt-to-total 2006, the Company's debt-to-total capital ratio was significantly beneath this limit.

At December 31, 2006, the Company's committed revolving credit lines consisted of two five-year lines totaling June 2009 and \$1.25 billion expires in August 2010. These lines were unused and provide support for the Compar provide support for other financing instruments, such as letters of credit and comfort letters, as required in th compensates banks for unused lines with fees equal to a weighted average of .0775% per annum. Available non-U.S \$612.0 million were unused at December 31, 2006. These lines provide support for bank guarantees, letters of credit

Interest income, included in Other income, net, was \$16.3 million, \$29.6 million and \$12.3 million for 2006, 2005 and

NOTE 7 - FINANCIAL INSTRUMENTS

In the normal course of business, the Company from time to time uses various financial instruments, including der associated with interest rate, currency, commodity price and share-based compensation exposures. Derivative instr purposes. On the date a derivative contract is entered into, the Company designates the derivative instrument as eit flow hedge) or a hedge of recognized asset or liability (a cash flow or undesignated hedge). The Company formally identification of the derivative instruments and the hedged items, as well as its risk management objectives and str This process includes linking derivative instruments that are designated as hedges to specific assets, liabilities or for

The Company also assesses both at the inception and at least quarterly thereafter, whether the derivatives used in offsetting the changes in the cash flows of the hedged item. Any ineffective portion of a derivative instrument's change in income, net, in the period of change. There were no material adjustments as a result of ineffectiveness to the results for 2006, 2005 and 2004. If the hedging relationship ceases to be highly effective, or it becomes probable that a failure will occur, the hedging relationship will be undesignated and any future gains and losses on the derivative instrument will be recorded in earnings.

The fair market value of derivative financial instruments is determined through market-based valuations and market-based losses that will be recorded when these instruments mature due to future fluctuations in the markets in which they are traded.

Currency and Commodity Hedging Instruments

The estimated fair value of currency hedges outstanding at December 31, 2006 and 2005, was a projected loss of \$1.1 million and \$3.4 million, respectively. The notional amount of the currency hedges was \$559.2 million and \$252.1 million at December 31, 2006 and 2005, \$1.1 million and \$3.4 million, net of tax, respectively, was included in accumulated other comprehensive income for currency hedges. The amount expected to be reclassified to earnings over the next twelve months is \$1.1 million. The amount of earnings may vary from this amount as a result of changes in market conditions. At December 31, 2006, the maximum term of the hedges was 12 months.

During 2006, the Company did not purchase any commodity derivatives. However, it has used fixed-priced supply contracts and matured commodity forward contracts. The estimated fair value of outstanding commodity contracts at December 31, 2006 and the outstanding commodity contracts was \$0.7 million at December 31, 2005.

Other Hedging Instruments

In August 2006, the Company entered into two total return swaps (the Swaps) which are derivative instruments used to hedge the Company's share-based compensation expense. The aggregate notional amount of the Swaps is approximately \$52.6 million and \$2.1 million as of December 31, 2006, which was recorded within Selling and administrative expenses.

In March 2005, the Company entered into interest rate locks for the forecasted issuance of \$300 million of Senior Notes. The criteria to be accounted for as cash flow hedges of a forecasted transaction. Consequently, the changes in fair value of the debt are recorded in accumulated other comprehensive income and will be recognized into interest expense over the life of the debt. At December 31, 2006, a projected loss of \$0.9 million was included in accumulated other comprehensive income related to the interest rate locks and \$0.9 million is expected to be recognized in earnings over the next twelve months.

Concentration of Credit Risk

The counterparties to the Company's forward contracts consist of a number of highly rated major international firms exposed to losses in the event of nonperformance by the counterparties. However, credit ratings and concentrations are monitored on a continuous basis and present no significant credit risk to the Company.

Fair Value of Financial Instruments

The carrying value of cash and cash equivalents, accounts receivable, short-term borrowings and accounts payable are determined based on the short-term nature of these instruments.

NOTE 8 - POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

The Company sponsors several postretirement plans that cover certain eligible employees. These plans provide for health and dental insurance benefits. Postretirement health plans generally are contributory and contributions are adjusted annually. Dental plans are noncontributory. The Company funds the postretirement benefit costs principally on a pay-as-you-go basis.

The following table details information regarding the Company's postretirement plans at December 31:

In millions

Change in benefit obligations:

Benefit obligation at beginning of year	\$
Service cost	
Interest cost	
Plan participants' contributions	
Actuarial losses	
Benefits paid, net of Medicare Part D subsidy *	
Other	
Benefit obligations at end of year	\$
* Amounts are net of Medicare Part D subsidy of \$7.1 million in 2006	

Funded status:

Plan assets less than benefit obligations	\$
---	----

Unrecognized:

Prior service gains	
Plan net actuarial losses	
Net amount recognized	\$

Amounts included in the balance sheet:

Accrued compensation and benefits	\$
Postemployment and other benefit liabilities	
Net amount recognized	\$

As explained further in Note 1, in 2006, the Company adopted SFAS 158, which requires the Company to record the change in its balance sheet effective December 31, 2006. The adoption of SFAS 158 for the Company's postretirement plans resulted in total liabilities of \$300.4 million and a decrease of shareholders' equity of \$135.7 million (net of tax of \$164.7 million).

The pretax amounts recognized in accumulated other comprehensive loss were as follows:

In millions

Prior service gains	\$
Plan net actuarial losses	
Total	\$

The amounts expected to be recognized in net periodic postretirement benefits cost in 2007 for prior service gains and \$19.8 million, respectively.

The components of net periodic postretirement benefit cost for the years ended December 31, were as follows:

<i>In millions</i>	2006		
Service cost	\$	11.8	\$
Interest cost		55.0	
Net amortization of prior service gains		(4.2)	
Net amortization of net actuarial losses		16.6

* Amounts represent the impact of recording additional minimum liabilities (AMLs). Upon the adoption of SFAS 158, the status of the pension plans is recorded on the balance sheet.

As explained further in Note 1, the Company adopted SFAS 158, which requires the Company to record the funded status of the pension plans effective December 31, 2006. The adoption of SFAS 158 resulted in a decrease of total assets of \$476.0 million and a decrease of shareholders' equity of \$337.1 million (net of tax of \$103.5 million).

The pretax amounts recognized in accumulated other comprehensive loss were as follows:

In millions

Net transition asset \$

Prior service costs

Plan net actuarial losses

Total \$

Weighted-average assumptions used:

Benefit obligations at December 31,

Discount rate:

U.S. plans

Non-U.S. plans

Rate of compensation increase:

U.S. plans

Non-U.S. plans

73

The amounts expected to be recognized in net periodic pension cost during the year ended 2007 for the net actuarial losses are \$0.9 million, \$9.5 million and \$18.4 million, respectively. The Company does not expect to receive

The accumulated benefit obligation for all defined benefit pension plans was \$3,005.3 million and \$2,868.6 million. The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for pension plans with plan assets were \$1,198.4 million, \$1,101.5 million and \$861.9 million respectively, as of December 31, 2006 and \$1,198.4 million respectively, as of December 31, 2005.

Pension benefit payments, are expected to be paid as follows: \$192.1 million in 2007, \$192.0 million in 2008, \$204.4 million in 2011 and \$1,089.7 million for the years 2012 to 2016.

The components of the Company's pension related costs for the years ended December 31, include the following:

<i>In millions</i>	2006		
Service cost	\$	54.6	\$
Interest cost		161.3	
Expected return on plan assets		(218.9)	
Net amortization of:			
Prior service costs		9.4	
Transition amount		0.9	
Plan net actual losses		25.4	
Net periodic pension cost		32.7	
Curtailment/settlement losses		-	
Net periodic pension cost after curtailments/settlements	\$	32.7	\$

* The curtailment and settlement losses in 2004 are associated primarily with the sale of Dresser-Rand and Drilling

Pension expense for 2007 is projected to be approximately \$21.7 million, utilizing the assumptions for calculating 2006.

Weighted-average assumptions used:

Net periodic pension cost for the year ended December 31,	2006
Discount rate:	
U.S. plans	5.50%
Non-U.S. plans	5.00%
Rate of compensation increase:	
U.S. plans	4.00%
Non-U.S. plans	4.00%
Expected return on plan assets:	
U.S. plans	8.50%
Non-U.S. plans	7.25%

The expected long-term rates of return on plan assets are determined as of the measurement date. The expected long-term rates of return to be earned over the period until the benefits are paid. Accordingly, the long-term rates of return on investments, expected contributions to be received during the current year and on reinvestments over the period. The rates of return during the periods for which the payment of benefits is deferred. The expected long-term rate is achievable given the plan's investment policy and the types of assets held. Historical asset return trends for the last five-year periods. The actual rate of return for plan assets over the last ten- and fifteen-year periods has exceeded the reviews each plan and its historical returns and asset allocations to determine the appropriate expected long-term rate.

The Company's pension plans weighted-average asset allocations at December 31, 2006 and 2005, by asset category

Asset category

Equity securities

Debt securities

Real estate

Other (including cash)

Total

The Company's investment objectives in managing its defined benefit plan assets are to ensure that present and future beneficiaries are met as they become due; to provide a total return that, over the long term, minimizes the present value of liabilities at appropriate levels of risk; and meet any statutory requirements, laws and local regulatory agencies' requirements. Key factors regularly are asset allocations, investment manager performance, investment advisors and trustees or custodians. As a result, as the basis for global asset allocation decisions and updated approximately every five years or as required. As of December 31, 2006, the global asset allocation for its pension plans was 60% in equity securities and 40% in debt securities and cash. The allocation is plus or minus 5%. The asset allocations are reviewed at least quarterly and any appropriate adjustments are made. The Company in 2007 has begun to adjust its strategic global asset allocation for its plans to be approximately 40% in equity securities, real estate and cash.

The Company made contributions to its pension plans of \$31.7 million in 2006, \$119.4 million in 2005, and \$170.0 million in 2004. The Company currently projects that it will be required to contribute approximately \$24 million to its plans worldwide in 2007. This amount, which could be in excess of the pension cost expensed, subject to the limitations imposed by current tax regulations.

The Company anticipates funding the plans in 2007 in accordance with contributions required by funding regulations.

Most of the Company's U.S. employees are covered by savings and other defined contribution plans. Employer contributions are specific to the individual plans and amounted to approximately \$48.6 million, \$46.8 million and \$52.6 million in 2006, 2005 and 2004, respectively. The Company's contributions relating to non-U.S. defined contribution plans and other non-U.S. benefit plans were \$10.0 million, \$10.0 million and \$10.0 million in 2006, 2005 and 2004, respectively.

75

NOTE 10 - SHAREHOLDERS' EQUITY*Common Stock*

On August 3, 2005, the Company's Board of Directors declared a two-for-one stock split, effected in the form of a stock split. The Company retained the current par value of \$1.00 per share for all common shares. All references in the financial statements to the number of shares outstanding, per share amounts, and stock option data of the Company's common shares were restated in 2005 to reflect the stock split. The equity reflects the stock split by reclassifying from "retained earnings" to "Class A common shares" an amount equal to the amount of common shares from the split as of the distribution date.

Also in August 2005, the Board of Directors of the Company expanded the Company's existing share repurchase program to include the repurchase of \$2 billion worth of Class A common shares. The plan was established on August 4, 2004, and initially authorized the repurchase of 20 million Class A common shares. During 2006, the Company repurchased 27.7 million Class A common shares at a total cost of \$2 billion. The Company's share repurchases under the \$2 billion plan. In December 2006, the Board of Directors authorized a new share repurchase program of up to \$2 billion worth of Class A common shares. No amounts were purchased under the December 2006 authorization as of December 31, 2006.

Effective December 31, 2001, IR-Limited became the successor to IR-New Jersey, following the reorganization. The reorganization consisted of the merger of a newly formed merger subsidiary into IR-New Jersey. Upon consummation of the merger the shares of the merger subsidiary became IR-Limited Class A common shares. As part of the reorganization, IR-New Jersey and certain of its subsidiaries transferred shares of certain IR-New Jersey subsidiaries and issued certain debt in exchange for which IR-Limited received cash. The Class B common shares are non-voting and pay comparable dividends to the Class A common shares. The total number of shares outstanding is \$1,175,010,000, consisting of (1) 1,175,000,000 common shares, par value \$1.00 per share, which common shares consist of (a) 1,175,000,000 Class A common shares and (b) 575,000,000 Class B common shares, and (2) 10,000,000 preference shares, par value \$0.001 per share (which preference shares have preference share purchase rights) were issued to holders of IR-New Jersey common stock in the merger. No preference shares were issued in 2006 or 2005.

The Company has adopted a shareholder rights plan to protect shareholders from attempts to acquire control of the Company. The rights plan expires on December 22, 2008, unless redeemed or exchanged earlier by the Company, as provided in the rights plan agreement. One share of Class A common share purchase right was distributed for each Class A common share. As a result of the two-for-one stock split in September 2005, one issued share of Class A common share now has associated with it one-half of a right. The rights only become exercisable if a person or group acquires Class A common shares, 10 days after the first public announcement that any person or group has acquired at least 15% of the outstanding Class A common shares or on the 10th day following the commencement or the announcement of an intention to commence a tender offer for the Class A common shares or a group acquiring a beneficial ownership of at least 15% of the outstanding Class A common shares. Each right entitles the holder to purchase one share of Series A preferred stock at an exercise price of \$200.

If any person or group acquires 15% or more of the Company's Class A common shares, the rights not held by the purchase the Company's Class A common shares at a 50% discount. The plan provides that, at any time after a period prior to the acquisition by that person or group of 50% or more of the outstanding Class A common shares, the B rights held by the acquiring person, which will have become void), at an exchange ratio of one Class A common share to redeem the rights at \$0.01 per right.

Accumulated Other Comprehensive (Loss) Income

The components of accumulated comprehensive loss are as follows:

In millions

Foreign currency translation adjustment	\$
Fair value of derivatives qualifying as cash flow hedges, net of tax	
Unrealized gain (loss) on marketable securities, net of tax	
Pension and postretirement obligation adjustments, net of tax	
Accumulated other comprehensive loss	\$

NOTE 11 - SHARE-BASED COMPENSATION

Effective January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), "Share-Based Payment," (SFAS 123R) adoption. SFAS 123(R) requires companies to recognize compensation expense for an amount equal to the fair value of the modified prospective method, financial statement amounts for prior periods have not been restated to reflect the fair value cost relating to stock options.

Prior to the adoption, the Company had accounted for stock option plans under the recognition and measurement provisions of APB 25 "Accounting for Stock Issued to Employees" (APB 25). Compensation expense was not recognized for employee stock options with strike prices that were not less than the fair market value of the Company's stock on the date of the grant. Compensation expense for share-based payments primarily including stock appreciation rights (SARs), performance shares, deferred compensation, and restricted stock. The Company's Incentive Stock Plans authorize the Company to issue stock options and other share-based payments to its shareholders was 60.0 million (after adjustment for the 2005 stock split), of which 17.2 million remained available as of December 31, 2006.

Stock Options

On December 7, 2005, the Compensation Committee of the Company's board of directors approved the acceleration of vesting of stock options under the Company's stock plan for active employees, effective December 31, 2005. As a result of the acceleration, the stock options became exercisable, with exercise prices ranging from \$19.53 to \$39.85, and a weighted-average exercise price of \$34.95. On that date, the terms and conditions of the stock option agreements governing the stock options were changed to prohibit the exercise of these accelerated options until the earlier of (i) the original vesting date of the option or (ii) termination of employment. The charge associated with the acceleration of vesting was approximately \$1 million, which was recorded in the four-quarter period ending December 31, 2005. The stock options generally vest ratably over a three-year period from their date of grant and expire at the end of 10 years.

The average fair value of stock options granted during the year ended December 31, 2006, was \$10.42, using the following assumptions at the grant date:

Dividend yield

Volatility

Risk-free rate of return

Expected life

The fair value of each of the Company's stock option awards is expensed on a straight-line basis over the required vesting period of the options. For options granted to retirement eligible employees, the Company recognized expense at the grant date. Expected volatility is based on the implied historical volatility from traded options on the Company's stock. The contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury bond on equal to the expected term of the award. The Company uses historical data to estimate forfeitures within its valuation of stock option awards is derived from historical experience and represents the period of time that awards are expected to be exercised.

Changes in options outstanding under the plans for the years 2004, 2005 and 2006 are as follows:

	Shares subject to option	Weighted- average exercise price	Value
December 31, 2003	21,296,994	\$ 21.77	
Granted	6,555,680	32.24	
Exercised	(7,847,656)	21.85	
Cancelled	(1,151,544)	25.38	
December 31, 2004	18,853,474	25.19	
Granted	6,091,600	38.70	
Exercised	(3,921,949)	23.10	
Cancelled	(1,140,649)	33.77	
December 31, 2005	19,882,476	29.26	
Granted	3,305,190	39.33	
Exercised	(3,707,839)	25.77	
Cancelled	(314,885)	38.82	
Outstanding December 31, 2006	19,164,942	\$ 31.53	\$
Exercisable December 31, 2006	16,109,612	\$ 30.03	\$

78

The following table summarizes information concerning currently outstanding and exercisable options:

	Range of exercise price		Options outstanding				Number exercisable at December 31, 2006
			Number outstanding at December 31, 2006	Weighted-average remaining life	Weighted-average exercise price	Weighted-average exercise price	
\$ 15.00	-	\$ 20.00	2,069,652	5.5	\$ 19.50	2,069,652	
20.01	-	25.00	3,009,224	3.8	21.54	3,009,224	
25.01	-	30.00	1,597,081	2.4	26.16	1,597,081	
30.01	-	35.00	4,401,706	6.1	32.26	4,401,706	
35.01	-	40.00	8,059,279	8.1	38.97	5,031,949	
40.01	-	45.00	28,000	9.4	41.80	-	
\$ 16.83	-	\$ 43.16	19,164,942	6.2	\$ 31.53	16,109,612	

At December 31, 2006, there was \$15.3 million of total unrecognized compensation cost from stock option arrangements to unvested shares of non-retirement eligible employees. This compensation will be recognized over the required service vesting period. The aggregate intrinsic value of options exercised during the year ended December 31, 2006 and 2005, respectively.

SARs

SARs generally vest ratably over a three-year period from the date of grant and expire at the end of ten years. Efforts are made to settle with the Company's Class A common shares. Previously, exercised SARs were paid in cash. The following table summarizes outstanding SARs:

	Shares subject to exercise	Weighted-average exercise price	Value
December 31, 2003	1,779,804	\$ 21.72	
Granted	627,340	32.22	
Exercised	(671,256)	22.50	
Cancelled	(126,090)	26.12	
December 31, 2004	1,609,798	25.12	
Granted	617,700	38.69	
Exercised	(345,556)	23.15	
Cancelled	(112,808)	29.95	
December 31, 2005	1,769,134	30.05	
Granted	395,020	39.12	
Exercised	(327,717)	24.49	
Cancelled	(142,683)	32.18	
Outstanding December 31, 2006	1,693,754	\$ 33.11	\$
Exercisable December 31, 2006	834,304	\$ 28.17	\$

Performance Shares

The Company has a performance share program for key employees. The program provides annual awards for the strategic initiatives and annual financial performance of the Company. The annual target award level is expressed as shares and the award is paid in cash.

Deferred Compensation

The Company allows key employees and non-employee directors to defer a portion of their eligible compensation in Class A common share equivalents. The portion deferred into Class A common share equivalents is currently the Company's share price. Effective August 2, 2006, the Compensation Committee eliminated the provision in the plan that made participants eligible to receive a 20% supplemental amount on deferrals invested for five years in the Company's Class A common shares. Effective August 2, 2006, the Compensation Committee vested the previously awarded, but unvested, portions of the deferred compensation plans. The Company reversed \$0.4 million of expense in the third quarter of 2006 for the deferred compensation plans.

Other Plans

The Company maintains a shareholder-approved Management Incentive Unit Award Plan. Under the plan, participants receive phantom units. When dividends are paid on Class A common shares, phantom dividends are awarded to unit holders, one-half of which is credited to the participants' account in the form of Class A common share equivalents. The value of the phantom units is based on the fair value of the Company's Class A common shares, and only the fair value of accumulated common share equivalents is paid in cash upon the participant's termination. The fair value of accumulated common share equivalents credited to participants' accounts at December 31, 2006 is 271,040.

Stock grants were issued prior to February 2000 as an incentive plan for certain key employees, with varying vesting periods. As of December 31, 2006, there were 272,678 stock grants outstanding, all of which were vested. Effective August 2, 2006, all remaining stock grants were converted to common shares.

Compensation Expense

Share-based compensation expense is included in Selling and administrative expenses. The following table summarizes the components of share-based compensation expense for 2006:

<i>In millions</i>	2006		
Stock options	\$	16.2	\$
SARs		5.6	
Performance shares		11.2	
Deferred compensation		(0.4)	
Other		-	
Pre-tax expense		32.6	
Tax benefit		12.5	
After tax expense	\$	20.1	\$

Compensation expense was recognized during the year ended December 31, 2006, for all share-based option awards granted during the year. The Company determined the grant date fair value in accordance with the provisions of SFAS 123(R). The Company recorded additional stock-based compensation expense associated with the adoption of SFAS 123(R).

The following table illustrates the effect on net earnings and earnings per share had the Company applied the fair value method of accounting for stock-based compensation, as required by SFAS 123(R), for the year ended December 31, 2005 and 2004:

In millions, except per share amounts

Net earnings, as reported	\$
Add (Deduct): Stock-based employee compensation (income) expense included in reported net income, net of tax	
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of tax	
Pro forma net earnings	\$
Basic earnings per share:	
As reported	\$
Pro forma	
Diluted earnings per share:	
As reported	\$
Pro forma	

The average fair value of stock options granted during the years ended December 31, 2005 and 2004 was \$12.67 and the option-pricing model, with the following assumptions at the grant date:

Dividend yield

Volatility

Risk-free rate of return

Expected life

NOTE 12 - INCOME TAXES

Earnings before income taxes for the years ended December 31, were taxed within the following jurisdictions:

<i>In millions</i>	2006		
United States	\$	303.9	\$
Non-U.S.		996.1	
Total	\$	1,300.0	\$

The provision was as follows:

<i>In millions</i>	2006		
Current tax expense:			
United States	\$	161.8	\$
Non-U.S.		129.2	
Total current		291.0	
Deferred tax (benefit) expense:			
United States		(111.7)	
Non-U.S.		52.4	
Total deferred		(59.3)	
Total provision for income taxes	\$	231.7	\$

82

The provision for income taxes differs from the amount of income taxes determined by applying the applicable U.S. rate as a result of the following differences:

	2006	Percent of
Statutory U.S. rate	35.0%	
Increase (decrease) in rates resulting from:		
Non-U.S. operations	(19.3)	
Manufacturing exemption / Extraterritorial income	(0.3)	
State and local income taxes, net of U.S. tax	0.4	
Puerto Rico - Sec 936 Credit	-	
Other	2.0	
Effective tax rate	17.8%	

At December 31, a summary of the deferred tax accounts follows:

In millions

Current deferred assets and (liabilities)	
Difference between book and tax bases of inventories and receivables	\$
Difference between book and tax expense for other employee-related benefits and allowances	
Other reserves and valuation allowances in excess of tax deductions	
Other differences between tax and financial statement values	
Gross current deferred net tax assets	
Noncurrent deferred assets and (liabilities)	
Postretirement and postemployment benefits other than pensions in excess of tax deductions	
Tax benefit of operating losses and credit carryforwards	
Other reserves in excess of tax expense	
Tax depreciation / amortization in excess of book depreciation / amortization	
Pension contributions in excess of book expense	
Gross noncurrent deferred net tax assets	
Less: deferred tax valuation allowances	
Total net deferred tax assets	\$

Included in Accrued expenses and other current liabilities on the Consolidated Balance Sheet are \$389.0 million payable at December 31, 2006 and 2005, respectively. Included in Prepaid expenses and deferred income taxes are \$309.3 million and \$309.3 million of current deferred tax assets at December 31, 2006 and 2005, respectively.

At December 31, 2006, net U.S and non-U.S. federal operating loss carryforwards of \$1,232.8 million are available. U.S. federal carryforwards will begin to expire in 2022, while a significant portion of the non-U.S. net operating periods. The net operating loss carryforwards were incurred in various jurisdictions, predominantly the United States and Switzerland. State net operating loss carryforwards at December 31, 2006 of \$6,089.4 million are available to offset future taxable income. State carryforwards will expire in future years generally through 2026. A valuation allowance of \$184.9 million has been established for state carryforwards, which will likely not be realized. The change in the valuation allowance is predominantly attributable to state carryforwards and other foreign deferred tax assets. Approximately \$11 million of the valuation allowance was established for state transactions and any tax benefit, when realized, will reduce goodwill rather than the income tax provision.

At December 31, 2006, no deferred taxes have been provided for any portion of the \$5.4 billion of undistributed earnings that have been, and under current plans will continue to be, permanently reinvested in these subsidiaries, and for any other additional taxes which may be payable upon distribution.

Tax incentives, in the form of tax holidays, have been granted in certain jurisdictions to encourage industrial development and varies by country. The most significant tax holidays relate to the Company's locations in China, which have generally received a 3-year 50% exemption, and the Company's qualifying locations in Ireland, which were granted a 10% tax rate through 2006. The American Jobs Creation Act (the AJCA) provided for a 30% tax credit for U.S. manufacturing income from U.S. domestic manufacturing income. This provision of the AJCA did not have a material impact on the Company's tax expense.

On October 6, 2006, the Company received a notice from the Internal Revenue Service (IRS) containing proposed adjustments in connection with an audit of the 1998 through 2000 tax years. The principal proposed adjustments consist of the disallowance of the Company's tax returns in 1999 and 2000. The disallowance would result in additional taxes and penalties of approximately \$62 million as of October 6, 2006. The Company disputes the IRS's position and intends to contest the disallowance of approximately \$27 million (\$0.08 per dilutive share) to its previously established reserves, as a charge in the third quarter of 2006. In the event of losses and imposition of penalties and interest, it would result in a cash outflow of approximately \$155 million, plus interest. The amounts raised in the notice are not related to the Company's reorganization in Bermuda, which was effective December 31, 2001.

As part of the audit of the tax years 2000-2002, the Company is actively engaged in discussion with the Internal Revenue Service regarding the reincorporation in Bermuda in 2001. The Company has provided for reasonably foreseeable resolution of all tax disputes in the event so dictate. In the event that the ultimate resolution of an issue differs materially from the original or adjusted provision recorded in the provision for income taxes in the period that the matter is finally resolved.

NOTE 13 - DISCONTINUED OPERATIONS

The Company has continued its transition to become a more diversified company with strong growth prospects by its various businesses. The components of discontinued operations for 2006, 2005 and 2004 are as follows:

<i>In millions</i>	2006	
Net revenues	\$	- \$
Retained (costs) income, net of tax	\$	(36.5) \$
Net gain on disposals, net of tax		0.7
Total discontinued operations, net of tax	\$	(35.8) \$

2006

Retained costs for discontinued operations mainly include costs related to postretirement benefits and product liability costs from previously sold businesses. Net gain on disposals represents additional gains from previously sold businesses.

2005

Discontinued operations for the year ended December 31, 2005, amounted to income of \$1.1 million, net of tax benefits of \$1.1 million and after tax gains of \$35.2 million, mainly due to divested businesses, primarily Ingersoll-Dresser Pump Company (\$12.2 million) and Waterjet (\$12.2 million), primarily from the resolution of tax matters regarding these divestitures. Total discontinued operations amounted to \$34.1 million. These costs mainly include costs related to postretirement benefits and asbestos-related costs from previously sold businesses.

2004

Discontinued operations for the year ended December 31, 2004, amounted to income of \$388.9 million, net of tax benefits of \$388.9 million and net after tax gains on disposals of \$334.9 million, primarily comprised of gains from the sales of Dresser-Rand (\$334.9 million). After-tax income from discontinued operations amounted to \$54.0 million. This income includes gains from Dresser-Rand (\$45.0 million) and Engineered Solutions (\$20.9 million), which includes an antidumping subsidy of \$14.9 million, partially offset by retained costs related to IDP (\$14.9 million), which mostly include product liability costs and employee benefit costs.

85

NOTE 14 - EARNINGS PER SHARE

Basic earnings per share is computed by dividing net earnings by the weighted-average number of Class A common shares. Earnings per diluted share is based on the weighted-average number of Class A common shares outstanding, as well as potentially dilutive shares. The following table details the weighted-average number of shares outstanding for basic and diluted earnings per share calculations at December 31:

<i>In millions</i>	2006
Weighted-average number of basic shares	319.9
Shares issuable under incentive stock plans	3.2
Weighted-average number of diluted shares	323.1
Anti-dilutive shares	3.2

NOTE 15 - COMMITMENTS AND CONTINGENCIES

The Company is involved in various litigations, claims and administrative proceedings, including environmental and asbestos-related claims. For identified contingent liabilities are estimates, which are reviewed periodically and adjusted to reflect additional information. Subject to the uncertainties inherent in estimating future costs for contingent liabilities, management believes that the resolution of these matters would not have a material adverse effect on the financial condition, results of operations, liquidity or cash flows.

Environmental remediation costs are determined on a site-by-site basis and accruals are made when it is probable that a liability has been incurred and the amount can be reasonably estimated. The Company estimates the amount of recurring and non-recurring costs at each site using internal and external estimates. The following factors are considered: the type of contaminant, the stage of the clean-up, applicable law and existing precedents. Accruals, are reviewed and updated quarterly to reflect changes in facts and law. The Company does not discount liabilities when environmental liabilities are recorded.

Certain wholly owned subsidiaries of the Company are named as defendants in asbestos-related lawsuits in state and federal courts. A large number of other companies have also been named as defendants. The vast majority of those claims have been filed for personal injury caused by exposure to asbestos contained in certain of IR-New Jersey's products. Although IR-New Jersey has not manufactured asbestos, some of its formerly manufactured products utilized asbestos-containing components, such as gaskets and seals.

All asbestos-related claims resolved to date have been dismissed or settled. For the years ended December 31, 2006, 2005 and 2004, the net defense of asbestos claims after insurance recoveries and net of tax were approximately \$31.6 million, \$16.8 million and \$16.8 million, respectively. The increase in asbestos-related costs in 2006 compared with 2005 and 2004 is primarily attributable to revised estimates from the Company's insurance carriers, as well as declining levels of insurance coverage available for cost recoveries. When the Company performs a thorough analysis, updated periodically, of its actual and anticipated future asbestos liabilities, upon such analysis, the Company believes that its reserves and insurance are adequate to cover its asbestos liabilities. The resolution of these matters is not likely to have a material adverse effect on its financial position, results of operations, liquidity or cash flows.

Legislation recently under consideration in Congress concerns pending and future asbestos-related personal injury claims. If such legislation become law, and the final provisions of such legislation, are unknown. Consequently, the Company cannot predict the effect, if any, such legislation would have upon the Company's financial position, results of operations or cash flows.

The Company sells products on a continuous basis under various arrangements through institutions that provide lease and wholesale customers. Under these arrangements, the Company is contingently liable for loan guarantees and related obligations totaling \$18.8 million, including consideration of ultimate net loss provisions. The risk of loss to the Company is minimal. No losses have been incurred relating to these arrangements since the fair value of the underlying equipment that serves as collateral exceeds the liability. Management believes these guarantees will not adversely affect the consolidated financial statements.

The Company has remained contingently liable for approximately \$13.8 million relating to performance bonds and other obligations which the Company divested in 2000. The acquirer of IDP is the primary obligor under these performance bonds and other obligations. In these arrangements the Company would be required to satisfy these financial obligations. The Company estimates that the obligations will be paid during 2007. The remainder extends through 2008.

The Company is contingently liable for customs duties in certain non-U.S. countries which totaled \$5.8 million and will be accrued as the Company intends on exporting the product to another country for final sale.

In connection with the disposition of certain businesses and facilities, the Company has indemnified the purchaser for environmental contamination, if any, existing on the date of disposition. Such expected costs are accrued when the remediation efforts are probable and the costs can be reasonably estimated.

The following represents the changes in the Company's product warranty liability for 2006 and 2005:

In millions

Balance at beginning of year	\$
Reductions for payments	
Accruals for warranties issued during the current period	
Changes for accruals related to preexisting warranties	
Acquisitions	
Translation	
Balance at end of the year	\$

Certain office and warehouse facilities, transportation vehicles and data processing equipment are leased. Total rental expense was \$62.7 million in 2005 and \$62.7 million in 2004. Minimum lease payments required under non-cancelable operating lease agreements with terms of five years and thereafter, are as follows: \$57.7 million in 2007, \$43.7 million in 2008, \$31.3 million in 2009, \$18.6 million in 2010, and \$20.6 million thereafter.

NOTE 16 - BUSINESS SEGMENT INFORMATION

The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies. The operating segments' results are prepared on a management basis that is consistent with the manner in which the Company determines its operating results for review and decision making. The Company evaluates performance based on operating income and operating margin. Other measures are considered immaterial.

The Company has divested various businesses over the past few years as it moves to being a leading global diversified Company sold its Drilling Solutions and Dresser-Rand businesses. The results of these divested businesses have been reported in separate segments for business segment reporting and has been shown separately in “Discontinued operations, net of tax” in the financial statements.

During the first quarter of 2005, the Company realigned its internal organization and operating segments to reflect the transparency of results. The former Infrastructure segment was disaggregated into two segments - the Compact Vehicle Technologies segment and the Construction Technologies segment. The 2004 segment results have been restated to conform to this change.

Each reportable segment is based primarily on the types of products it generates. The operating segments have been determined based on qualitative and quantitative thresholds as required by SFAS No. 131, “Disclosures About Segments of an Enterprise and Related Information.” The description of each reportable segment is as follows:

Climate Control Technologies provides solutions to transport, preserve, store and display temperature-sensitive products. The segment includes the sale and service of transport temperature control units, HVAC systems, refrigerated display merchandisers, beverage storage coolers and freezers. The segment includes the Thermo King and Hussmann brands.

The Compact Vehicle Technologies segment is engaged in the design, manufacture, sale and service of skid-steer loaders, compact excavators, attachments, golf vehicles and utility vehicles. The segment includes the Bobcat and Case brands.

Construction Technologies is engaged in the design, manufacture, sale and service of road construction and general-purpose construction equipment, attachments and portable light towers and compressors. The segment includes the Development and Attachments businesses.

Industrial Technologies is focused on providing solutions to enhance customers’ industrial and energy efficiency, maintenance and sale and service of compressed air systems, tools, fluid and material handling and energy generation systems. The segment includes the Productivity Solutions businesses.

Security Technologies is engaged in the design, manufacture, sale and service of mechanical and electronic security systems and security and scheduling software. The segment includes the Schlage, LCN, Von Duprin and CISA brands.

A summary of operations by reportable segments for the years ended December 31, were as follows:

<i>Dollar amounts in millions</i>	2006	
Climate Control Technologies		
Revenues	\$	3,171.0 \$
Operating income		356.0
Operating income as a percentage of revenues		11.2%
Depreciation and amortization		52.1
Capital expenditures		25.6
Compact Vehicle Technologies		
Revenues		2,641.2
Operating income		358.0
Operating income as a percentage of revenues		13.6%

NOTE 17 - IR-NEW JERSEY

As part of the reorganization, IR-Limited guaranteed all of the issued public debt securities of IR-New Jersey. The securities are owned by the parent, IR-Limited, the guarantees are full and unconditional, and no other subsidiary of the Company. The condensed consolidated financial information for IR-Limited, IR-New Jersey, and all their other subsidiaries is included in the condensed consolidated financial statements. The IR-New Jersey are not required to be filed with the U.S. Securities and Exchange Commission.

As part of the reorganization of December 31, 2001, IR-Limited issued Class B common shares to IR-New Jersey in certain IR-New Jersey subsidiaries. The note, which is due in 2011, has a fixed rate of interest of 11% per annum and contains restrictive covenants upon IR-New Jersey. The Class B common shares are non-voting and pay dividends comparable to the Class A common shares. IR-Limited contributed the note to a wholly owned subsidiary, which subsequently transferred portions of the note to subsidiaries included in the "Other Subsidiaries" below. Accordingly, the subsidiaries of IR-Limited remain creditors of IR-New Jersey.

IR-New Jersey has unconditionally guaranteed payment of the principal, premium, if any, and interest on the Company's aggregate principal amount of \$300 million. The guarantee is unsecured and provided on an unsubordinated basis. The guarantee is enforceable with payment with all of the existing and future unsecured and unsubordinated debt of IR-New Jersey.

The condensed consolidating financial statements present IR-Limited and IR-New Jersey investments in their subsidiaries. Intercompany investments in the non-voting Class B common shares are accounted for on the cost method and in accordance with generally accepted accounting principles, the amounts related to the issuance of the Class B shares are reflected in Shareholders' Equity since the Class B issuance on December 31, 2001. The notes payable continue to be reflected in IR-New Jersey and are enforceable in accordance with their terms.
