Supplemental Information to the Schedule of Investments

Fair Value Measurements:

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (level 3 measurements). The guidance establishes three levels of the fair value hierarchy as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other significant observable inputs (including, but not limited to quoted prices for similar securities, interest rates, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund s own assumptions used in determining the fair value of investments).

A financial instrument s level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes observable requires significant judgment by the Investment Manager. The Investment Manager considers observable data to be market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the inputs used to value the Fund s net assets as of September 30, 2010, is as follows:

		Fair Value at Reporting Date Using Significant

Financial Derivative Instruments:

Effective January 1, 2009, the Fund adopted amendments to authoritative guidance on disclosures about derivative instruments and hedging activities which require that the Fund disclose a) how and why an entity uses derivative instruments, b) how derivative instruments and related hedged items are accounted for, and c) how derivative instruments and related hedged items affect an entity s financial position, financial performance and cash flows. The adoption of the additional disclosure requirements did not materially impact the Fund s financial statements. At September 30, 2010, the Fund held no derivative instruments.
