**PS BUSINESS PARKS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010**

1. Organization and description of business

PS Business Parks, Inc. (PSB) was incorporated in the state of California in 1990. As of September 30, 2010, PSB owned 77.1% of the common partnership units of PS Business Parks, L.P. (the Operating Partnership). The remaining common partnership units are owned by Public Storage (PS). PSB, as the sole general partner of the Operating Partnership, has full, exclusive and complete responsibility and discretion in managing and controlling the Operating Partnership. PSB and the Operating Partnership are collectively referred to as the Company.

The Company is a fully-integrated, self-advised and self-managed real estate investment trust (REIT) that acquires, develops, owns and operates commercial properties, primarily multi-tenant flex, office and industrial space. As of September 30, 2010, the Company owned and operated 21.1 million rentable square feet of commercial space located in eight states. The Company also manages 1.4 million rentable square feet on behalf of PS and its affiliated entities.

References to the number of properties or square footage are unaudited and outside the scope of the Company's independent registered public accounting firm's review of the Company's financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States).

2. Summary of significant accounting policies

Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been included. Operating results for the three and nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ended December 31, 2010. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

The accompanying consolidated financial statements include the accounts of PSB and the Operating Partnership. All significant inter-company balances and transactions have been eliminated in the consolidated financial statements.

Noncontrolling Interests

The Company's noncontrolling interests are reported as a component of equity separate from the parent's equity. Purchases or sales of equity interests that do not result in a change in control are accounted for as equity transactions. In addition, net income attributable to the noncontrolling interest is included in consolidated net income on the face of the income statement and, upon a gain or loss of control, the interest purchased or sold, as well as any interest retained, is recorded at fair value with any gain or loss recognized in earnings.

Use of estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from these estimates.

Table of Contents

Allowance for doubtful accounts

The Company monitors the collectability of its receivable balances including the deferred rent receivable on an ongoing basis. Based on these reviews, the Company maintains an allowance for doubtful accounts for estimated losses resulting from the possible inability of tenants to make contractual rent payments to the Company. A provision for doubtful accounts is recorded during each period. The allowance for doubtful accounts, which represents the cumulative allowances less write-offs of uncollectible rent, is netted against tenant and other receivables on the consolidated balance sheets. Tenant receivables are net of an allowance for uncollectible accounts totaling \$400,000 at September 30, 2010 and December 31, 2009.

Financial instruments

The methods and assumptions used to estimate the fair value of financial instruments are described below. The Company has estimated the fair value of financial instruments using available market information and appropriate valuation methodologies. Considerable judgment is required in interpreting market data to develop estimates of market value. Accordingly, estimated fair values are not necessarily indicative of the amounts that could be realized in current market exchanges.

The Company considers all highly liquid investments with a remaining maturity of three months or less at the date of purchase to be cash equivalents. Due to the short period to maturity of the Company's cash and cash equivalents, accounts receivable, other assets and accrued and other liabilities, the carrying values as presented on the consolidated balance sheets are reasonable estimates of fair value. Based on borrowing rates currently available to the Company, the carrying amount of debt approximates fair value.

Financial assets that are exposed to credit risk consist primarily of cash and cash equivalents and receivables. Cash and cash equivalents, which consist primarily of money market investments, are only invested in entities with an investment grade rating. Receivables are comprised of balances due from a large number of customers. Balances that the Company expects to become uncollectible are reserved for or written off.

Real estate facilities

Real estate facilities are recorded at cost. Costs related to the renovation or improvement of the properties are capitalized. Expenditures for repairs and maintenance are expensed as incurred. Expenditures that are expected to benefit a period greater than two years and exceed \$2,000 are capitalized and depreciated over the estimated useful life. Buildings and equipment are depreciated on the straight-line method over the estimated useful lives, which are generally 30 and five years, respectively. Transaction costs in excess of \$1,000 for leases with terms greater than one year are capitalized and depreciated over their estimated useful lives. Transaction costs for leases of one year or less or less than \$1,000 are expensed as incurred.

Intangible assets/liabilities

Intangible assets and liabilities include above-market and below-market in-place lease values of acquired properties based on the present value (using an interest rate which reflects the risks associated with the leases acquired) of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The capitalized above-market and below-market lease values (included in other assets and accrued liabilities in the accompanying consolidated balance sheets) are amortized to rental income over the remaining non-cancelable terms of the respective leases. The Company recorded net amortization of \$235,000 and \$53,000 of intangible assets and liabilities resulting from the above-market and below-market lease values during the three months ended September 30, 2010 and 2009, respectively. Amortization was \$333,000 and \$214,000 for each of the nine months ended September 30, 2010 and 2009, respectively. As of September 30, 2010, the value of in-place leases resulted in a net intangible asset of \$5.2 million, net of \$1.7 million of accumulated amortization, and a net intangible liability of \$1.4 million, net of \$1.4 million of accumulated amortization. As of December 31, 2009, the value of in-place leases resulted in a net intangible asset of \$94,000, net of \$1.1 million of accumulated amortization, and a net intangible liability of \$247,000, net of \$1.1 million of accumulated amortization.

Table of Contents

Evaluation of asset impairment

The Company evaluates its assets used in operations by identifying indicators of impairment and by comparing the sum of the estimated undiscounted future cash flows for each asset to the asset's carrying value. When indicators of impairment are present and the sum of the undiscounted future cash flows is less than the carrying value of such asset, an impairment loss is recorded equal to the difference between the asset's current carrying value and its value based on discounting its estimated future cash flows. In addition, the Company evaluates its assets held for disposition for impairment. Assets held for disposition are reported at the lower of their carrying value or fair value, less cost of disposition. At September 30, 2010, the Company did not consider any assets to be impaired.

Stock compensation

All share-based payments to employees, including grants of employee stock options, are recognized as stock compensation in the Company's income statement based on their fair values. See Note 11.

Revenue and expense recognition

The Company must meet four basic criteria before revenue can be recognized: persuasive evidence of an arrangement exists; the delivery has occurred or services rendered; the fee is fixed or determinable; and collectability is reasonably assured. All leases are classified as operating leases. Rental income is recognized on a straight-line basis over the terms of the leases. Straight-line rent is recognized for all tenants with contractual fixed increases in rent that are not included on the Company's credit watch list. Deferred rent receivable represents rental revenue recognized on a straight-line basis in excess of billed rents. Reimbursements from tenants for real estate taxes and other recoverable operating expenses are recognized as rental income in the period the applicable costs are incurred. Property management fees are recognized in the period earned.

Costs incurred in connection with leasing (primarily tenant improvements and lease commissions) are capitalized and amortized over the lease period.

Gains from sales of real estate facilities

The Company recognizes gains from sales of real estate facilities at the time of sale using the full accrual method, provided that various criteria related to the terms of the transactions and any subsequent involvement by the Company with the properties sold are met. If the criteria are not met, the Company defers the gains and recognizes them when the criteria are met or using the installment or cost recovery methods as appropriate under the circumstances.

General and administrative expenses

General and administrative expenses include executive and other compensation, office expense, professional fees, state income taxes and other such administrative items.

Income taxes

The Company has qualified and intends to continue to qualify as a REIT, as defined in Section 856 of the Internal Revenue Code. As a REIT, the Company is not subject to federal income tax to the extent that it distributes its REIT taxable income to its shareholders. A REIT must distribute at least 90% of its taxable income each year. In addition, REITs are subject to a number of organizational and operating requirements. If the Company fails to qualify as a REIT in any taxable year, the Company will be subject to federal income tax (including any applicable alternative minimum tax) based on its taxable income using corporate income tax rates. Even if the Company qualifies for taxation as a REIT, the Company may be subject to certain state and local taxes on its income and property and to federal income and excise taxes on its undistributed taxable income. The Company believes it met all organization and operating requirements to maintain its REIT status during 2009 and intends to continue to meet such requirements for 2010. Accordingly, no provision for income taxes has been made in the accompanying consolidated financial statements.

Table of Contents

The Company can recognize a tax benefit only if it is more likely than not that a particular tax position will be sustained upon examination or audit. To the extent that the more likely than not standard has been satisfied, the benefit associated with a position is measured as the largest amount that is greater than 50% likely of being recognized upon settlement. As of September 30, 2010, the Company did not recognize any tax benefit for uncertain tax positions.

Accounting for preferred equity issuance costs

The Company records issuance costs as a reduction to paid-in capital on its balance sheet at the time the preferred securities are issued and reflects the carrying value of the preferred equity at the stated value. The Company records issuance costs as non-cash preferred equity distributions at the time it notifies the holders of preferred stock or units of its intent to redeem such shares or units.

Table of Contents*Net income per common share*

Per share amounts are computed using the number of weighted average common shares outstanding. Diluted weighted average common shares outstanding includes the dilutive effect of stock options and restricted stock units under the treasury stock method. Basic weighted average common shares outstanding excludes such effect. The Company's restricted stock units are participating securities and included in the computation of basic and diluted weighted average common shares outstanding. The Company's allocation of net income to the restricted stock unit holders are paid non-forfeitable dividends in excess of the expense recorded which results in a reduction in net income allocable to common shareholders and unit holders. Earnings per share has been calculated as follows (in thousands, except per share amounts):

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2010	2009	2010	2009

Options to purchase 78,000 and 76,000 shares for the three months ended September 30, 2010 and 2009, respectively, were not included in the computation of diluted net income per share because such options were considered anti-dilutive. Options to purchase 78,000 and 144,000 shares for the nine months ended September 30, 2010 and 2009, respectively, were not included in the computation of diluted net income per share because such options were considered anti-dilutive.

In connection with the 2010 acquisitions, the Company incurred and expensed acquisition transaction costs of \$405,000 and \$2.3 million for the three and nine months ended September 30, 2010, respectively. The Company did not acquire any assets or assume any liabilities during the nine months ended September 30, 2009.

Land	\$ 23,707
Buildings and equipment	132,042
Above-market in-place lease value	5,687
Below-market in-place lease value	(1,410)
 Total purchase price	 160,026
Net operating assets acquired and liabilities assumed	(1,480)
 Total cash paid	 \$ 158,546

The purchase price of acquired properties is allocated to land, buildings and equipment and intangible assets and liabilities associated with in-place leases (including tenant improvements, unamortized lease commissions, value of above-market and below-market leases, acquired in-place lease values, and tenant relationships, if any) based on their respective estimated fair values. In addition, beginning January 1, 2009, acquisition-related costs are recognized separately and expensed as incurred.

In determining the fair value of the tangible assets of the acquired properties, management considers the value of the properties as if vacant as of the acquisition date. Management must make significant assumptions in determining the value of assets acquired and liabilities assumed. Using different assumptions in the allocation of the purchase cost of the acquired properties would affect the timing of recognition of the related revenue and expenses. Amounts allocated to land are derived from comparable sales of land within the same region. Amounts allocated to buildings and improvements, tenant improvements and unamortized lease commissions are based on current market replacement costs and other market information. The amount allocated to acquired in-place leases is determined based on management's assessment of current market conditions and the estimated lease-up periods for the respective spaces. During January, 2010, the Company completed the sale of a 131,000 square foot office building located in Houston, Texas, for a gross sales price of \$10.0 million, resulting in a net gain of \$5.2 million.

7. Noncontrolling interests

As described in Note 2, the Company reports noncontrolling interests within equity in the consolidated financial statements, but separate from the Company's shareholders' equity. In addition, net income allocable to noncontrolling interests is shown as a reduction from net income in calculating net income allocable to common shareholders.

Common partnership units

The Company presents the accounts of PSB and the Operating Partnership on a consolidated basis. Ownership interests in the Operating Partnership that can be redeemed for common stock, other than PSB's interest, are classified as noncontrolling interests common units in the consolidated financial statements. Net income allocable to noncontrolling interests common units consists of the common units share of the consolidated operating results after allocation to preferred units and shares. Beginning one year from the date of admission as a limited partner (common units) and subject to certain limitations described below, each limited partner other than PSB has the right to require the redemption of its partnership interest.

Table of Contents

A limited partner (common units) that exercises its redemption right will receive cash from the Operating Partnership in an amount equal to the market value (as defined in the Operating Partnership Agreement) of the partnership interests redeemed. In lieu of the Operating Partnership redeeming the partner for cash, PSB, as general partner, has the right to elect to acquire the partnership interest directly from a limited partner exercising its redemption right, in exchange for cash in the amount specified above or by issuance of one share of PSB common stock for each unit of limited partnership interest redeemed.

A limited partner (common units) cannot exercise its redemption right if delivery of shares of PSB common stock would be prohibited under the applicable articles of incorporation, or if the general partner believes that there is a risk that delivery of shares of common stock would cause the general partner to no longer qualify as a REIT, would cause a violation of the applicable securities laws, or would result in the Operating Partnership no longer being treated as a partnership for federal income tax purposes.

At September 30, 2010, there were 7,305,355 common units owned by PS, which are accounted for as noncontrolling interests. On a fully converted basis, assuming all 7,305,355 noncontrolling interests common units were converted into shares of common stock of PSB at September 30, 2010, the noncontrolling interests common units would convert into 22.9% of the common shares outstanding. Combined with PS's common stock ownership, on a fully converted basis, PS has a combined ownership of 41.1% of the Company's common equity. At the end of each reporting period, the Company determines the amount of equity (book value of net assets) which is allocable to the noncontrolling interest based upon the ownership interest, and an adjustment is made to the noncontrolling interest, with a corresponding adjustment to paid-in capital, to reflect the noncontrolling interests equity interest in the Company.

Preferred partnership units

Through the Operating Partnership, the Company had the following preferred units outstanding as of September 30, 2010 and December 31, 2009:

Table of Contents

The Operating Partnership has the right to redeem preferred units on or after the fifth anniversary of the applicable issuance date at the original capital contribution plus the cumulative priority return, as defined, to the redemption date to the extent not previously distributed. The preferred units are exchangeable for Cumulative Redeemable Preferred Stock of the respective series of PSB on or after the tenth anniversary of the date of issuance at the option of the Operating Partnership or a majority of the holders of the respective preferred units. The Cumulative Redeemable Preferred Stock will have the same distribution rate and par value as the corresponding preferred units and will otherwise have equivalent terms to the other series of preferred stock described in Note 9. In addition, the Operating Partnership assists and advises the property owners in establishing policies for the hire, discharge and supervision of employees for the operation of these facilities, including property managers and leasing, billing and maintenance personnel.

The property management contract with PS is for a seven-year term with the agreement automatically extending for an additional one-year period upon each one-year anniversary of its commencement (unless cancelled by either party). Overview

As of September 30, 2010, the Company owned and operated 21.1 million rentable square feet of multi-tenant flex, industrial and office properties located in eight states.

The Company focuses on increasing profitability and cash flow aimed at maximizing shareholder value. The Company strives to maintain high occupancy levels while increasing rental rates when market conditions allow, although the Company may decrease rental rates in markets where conditions require. The Company also acquires properties it believes will create long-term value, and from time to time disposes of properties which no longer fit within the Company's strategic objectives or in situations where the Company believes it can optimize cash proceeds. Operating results are driven by income from rental operations and are therefore substantially influenced by rental demand for space within our properties and rental rates.

During the first nine months of 2010, the Company leased or re-leased 4.3 million square feet of space while experiencing a decrease in rental rates. Total net operating income for the nine months ended September 30, 2010 increased \$1.2 million, or 0.9%, compared to the nine months ended September 30, 2009. See further discussion of operating results below.

Critical Accounting Policies and Estimates:

Our accounting policies are described in Note 2 to the consolidated financial statements included in this Form 10-Q. We believe our most critical accounting policies relate to revenue recognition, property acquisitions, allowance for doubtful accounts, impairment of long-lived assets, depreciation, accruals of operating expenses and accruals for contingencies, each of which we discuss below.

Revenue Recognition: The Company must meet four basic criteria before revenue can be recognized: persuasive evidence of an arrangement exists; the delivery has occurred or services rendered; the fee is fixed or determinable; and collectability is reasonably assured. All leases are classified as operating leases. Rental income is recognized on a straight-line basis over the terms of the leases. Straight-line rent is recognized for all tenants with contractual fixed increases in rent that are not included on the Company's credit watch list. Deferred rent receivable represents rental revenue recognized on a straight-line basis in excess of billed rents. Reimbursements from tenants for real estate taxes and other recoverable operating expenses are recognized as rental income in the period the applicable costs are incurred. Property management fees are recognized in the period earned.

Table of Contents

Property Acquisitions: The Company allocates the purchase price of acquired properties to land, buildings and equipment and intangible assets and liabilities associated with in-place leases (including tenant improvements, unamortized lease commissions, value of above-market and below-market leases, acquired in-place lease values, and tenant relationships, if any) based on their respective estimated fair values. In addition, beginning January 1, 2009, acquisition-related costs are expensed as incurred.

In determining the fair value of the tangible assets of the acquired properties, management considers the value of the properties as if vacant as of the acquisition date. Management must make significant assumptions in determining the value of assets acquired and liabilities assumed. Using different assumptions in the allocation of the purchase cost of the acquired properties would affect the timing of recognition of the related revenue and expenses. Amounts allocated to land are derived from comparable sales of land within the same region. Amounts allocated to buildings and improvements, tenant improvements and unamortized lease commissions are based on current market replacement costs and other market rate information.

The value allocable to the above-market or below-market in-place lease values of acquired properties is determined based upon the present value (using a discount rate which reflects the risks associated with the acquired leases) of the difference between (i) the contractual rents to be paid pursuant to the in-place leases, and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The amounts allocated to above-market or below-market leases are included in other assets or other liabilities in the accompanying consolidated balance sheets and are amortized on a straight-line basis as an increase or reduction of rental income over the remaining non-cancelable term of the respective leases.

Allowance for Doubtful Accounts: Rental revenue from our tenants is our principal source of revenue. We monitor the collectability of our receivable balances including the deferred rent receivable on an ongoing basis. Based on these reviews, we maintain an allowance for doubtful accounts for estimated losses resulting from the possible inability of our tenants to make required rent payments to us. Tenant receivables and deferred rent receivables are carried net of the allowances for uncollectible tenant receivables and deferred rent. As discussed below, determination of the adequacy of these allowances requires significant judgments and estimates. Our estimate of the required allowance is subject to revision as the factors discussed below change and is sensitive to the effect of economic and market conditions on our tenants.

Tenant receivables consist primarily of amounts due for contractual lease payments, reimbursements of common area maintenance expenses, property taxes and other expenses recoverable from tenants. Determination of the adequacy of the allowance for uncollectible current tenant receivables is performed using a methodology that incorporates specific identification, aging analysis, an overall evaluation of the historical loss trends and the current economic and business environment. The specific identification methodology relies on factors such as the age and nature of the receivables, the payment history and financial condition of the tenant, the assessment of the tenant's ability to meet its lease obligations, and the status of negotiations of any disputes with the tenant. The allowance also includes a reserve based on historical loss trends not associated with any specific tenant. This reserve as well as the specific identification reserve is reevaluated quarterly based on economic conditions and the current business environment.

Deferred rent receivable represents the amount that the cumulative straight-line rental income recorded to date exceeds cash rents billed to date under the lease agreement. Given the long-term nature of these types of receivables, determination of the adequacy of the allowance for unbilled deferred rent receivable is based primarily on historical loss experience. Management evaluates the allowance for unbilled deferred rent receivable using a specific identification methodology for significant tenants designed to assess their financial condition and ability to meet their lease obligations.

Table of Contents

Impairment of Long-Lived Assets: The Company evaluates a property for potential impairment whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. On a quarterly basis, we evaluate our entire portfolio for impairment based on current operating information. In the event that these periodic assessments reflect that the carrying amount of a property exceeds the sum of the undiscounted cash flows (excluding interest) that are expected to result from the use and eventual disposition of the property, the Company would recognize an impairment loss to the extent the carrying amount exceeded the estimated fair value of the property. The estimation of expected future net cash flows is inherently uncertain and relies on subjective assumptions dependent upon future and current market conditions and events that affect the ultimate value of the property. Management must make assumptions related to the property such as future rental rates, tenant allowances, operating expenditures, property taxes, capital improvements, occupancy levels and the estimated proceeds generated from the future sale of the property. These assumptions could differ materially from actual results in future periods. Our intent to hold properties over the long-term directly decreases the likelihood of recording an impairment loss. If our strategy changes or if market conditions otherwise dictate an earlier sale date, an impairment loss could be recognized, and such loss could be material.

Depreciation: We compute depreciation on our buildings and equipment using the straight-line method based on estimated useful lives of generally 30 and five years, respectively. A significant portion of the acquisition cost of each property is allocated to building and building components. The allocation of the acquisition cost to building and building components, as well as the determination of their useful lives, are based on estimates. If we do not appropriately allocate to these components or we incorrectly estimate the useful lives of these components, our computation of depreciation expense may not appropriately reflect the actual impact of these costs over future periods, which will affect net income. In addition, the net book value of real estate assets could be overstated or understated. The statement of cash flows, however, would not be affected.

Accruals of Operating Expenses: The Company accrues for property tax expenses, performance bonuses and other operating expenses each quarter based on historical trends and anticipated disbursements. If these estimates are incorrect, the timing and amount of expense recognized will be affected.

Accruals for Contingencies: The Company is exposed to business and legal liability risks with respect to events that may have occurred, but in accordance with U.S. generally accepted accounting principles (GAAP) has not accrued for such potential liabilities because the loss is either not probable or not estimable. Future events and the result of pending litigation could result in such potential losses becoming probable and estimable, which could have a material adverse impact on our financial condition or results of operations.

Effect of Economic Conditions on the Company's Operations:

During the first nine months of 2010, the impact of the recession and weak economic conditions continued to affect commercial real estate negatively as the Company experienced a decrease in new rental rates over expiring rental rates on executed leases. Although it is uncertain what impact economic conditions will have on the Company's future ability to maintain existing occupancy levels and rental rates, management expects that the decrease in rental rates on new and renewal transactions will result in a decrease in rental income for 2010 when compared to 2009. The current economic conditions may have a significant impact on the Company, potentially resulting in further reductions in occupancy and rental rates.

While the Company historically has experienced a low level of write-offs due to bankruptcy, there is inherent uncertainty in a tenant's ability to continue paying rent when in bankruptcy. As of October 31, 2010, the Company had 17,000 square feet of leased space occupied by tenants that are protected by Chapter 11 of the U.S. Bankruptcy Code. In addition, the Company had tenants occupying 453,000 square feet who vacated their space during the nine months ended September 30, 2010 prior to their scheduled lease expiration as a result of business failures. As of September 30, 2010, 237,000 square feet of the 453,000 vacated square feet, or approximately 52.3%, has been re-leased. During the nine months ended September 30, 2010 and 2009, write-offs of unpaid rents were \$1.1 million and \$833,000, respectively. During the nine months ended September 30, 2010, we also recorded \$2.5 million of accelerated depreciation expense related to unamortized tenant improvements and lease commissions for leases terminated prior to their scheduled expiration. A number of other tenants have contacted us, requesting early termination of their lease, a reduction in space under lease, or rent deferment or abatement. At this time, the Company cannot anticipate what

impact, if any, the ultimate outcome of these discussions will have on our future operating results.

Growth of the Company's Operations and Acquisitions and Dispositions of Properties:

The Company is focused on maximizing cash flow from its existing portfolio of properties by looking for opportunities to expand its presence in existing and new markets through strategic acquisitions. The Company may from time to time dispose of non-strategic assets that do not meet this criterion. In connection with the purchase, the Company received a \$1.6 million credit for committed tenant improvements and leasing commissions.

Scheduled Lease Expirations:

In addition to the 2.1 million square feet, or 10.1%, of space available in our total portfolio as of September 30, 2010, leases representing 5.3% of the leased square footage of our total portfolio are scheduled to expire during the remainder of 2010. Our ability to re-lease available space depends upon the market conditions in the specific submarkets in which our properties are located. As a result, we cannot predict with certainty the rate at which expiring leases will be re-leased.

Impact of Inflation:

Although inflation has not been significant in recent years, it remains a potential factor in our economy, and the Company continues to seek ways to mitigate its potential impact. A substantial portion of the Company's leases require tenants to pay operating expenses, including real estate taxes, utilities, and insurance, as well as increases in common area expenses, partially reducing the Company's exposure to inflation.

Table of Contents**Concentration of Portfolio by Region:**

Rental income, cost of operations and rental income less cost of operations, excluding depreciation and amortization, or net operating income (defined as NOI for purposes of the following tables) are summarized for the three and nine months ended September 30, 2010 by major geographic region. The Company uses NOI and its components as a measurement of the performance of its commercial real estate. Management believes that these financial measures provide them, as well as the investor, the most consistent measurement on a comparative basis of the performance of the commercial real estate and its contribution to the value of the Company. Depreciation and amortization have been excluded from NOI as they are generally not used in determining the value of commercial real estate by management or the investment community. Depreciation and amortization are generally not used in determining value as they consider the historical costs of an asset compared to its current value; therefore, to understand the effect of the assets historical cost on the Company's results, investors should look at GAAP financial measures, such as total operating costs including depreciation and amortization. The Company's calculation of NOI may not be comparable to those of other companies and should not be used as an alternative to measures of performance calculated in accordance with GAAP. The tables below reflect rental income, operating expenses and NOI from continuing operations for the three and nine months ended September 30, 2010 based on geographical concentration. The total of all regions is equal to the amount of rental income and cost of operations recorded by the Company in accordance with GAAP. As part of the tables below, we have reconciled total NOI to income from continuing operations, which we consider the most directly comparable financial measure calculated in accordance with GAAP. The percent of total by region reflects the actual contribution to rental income, cost of operations and NOI during the period (in thousands):

Comparative Analysis of the Three and Nine Months Ended September 30, 2010 to the Three and Nine Months Ended September 30, 2009

Results of Operations: In order to evaluate the performance of the Company's overall portfolio over two comparable periods, management analyzes the operating performance of a consistent group of properties owned and operated throughout both periods (herein referred to as "Same Park"). Operating properties that the Company acquired subsequent to January 1, 2009 are referred to as "Non-Same Park." For the three and nine months ended September 30, 2010 and 2009, the Same Park facilities constitute 19.4 million rentable square feet, which includes all assets in continuing operations that the Company owned from January 1, 2009 through September 30, 2010, representing 92.3% of the total square footage of the Company's portfolio as of September 30, 2010.

Table of Contents

Rental Income: Rental income increased \$3.3 million from \$66.9 million to \$70.2 million for the three months ended September 30, 2010 over the same period in 2009 as a result of rental income from acquired properties of \$5.3 million partially offset by a decrease in Same Park rental income of \$2.0 million. Rental income increased \$3.8 million from \$203.4 million to \$207.2 million for the nine months ended September 30, 2010 over the same period in 2009 as a result of rental income from acquired properties of \$9.1 million partially offset by a decrease in Same Park rental income of \$5.3 million. The three and nine month decrease in Same Park rental income was due to a reduction in rental rates partially offset by an increase in occupancy.

Facility Management Fees: Facility management fees account for a small portion of the Company's net income. During the three months ended September 30, 2010, \$165,000 of revenue was recognized from facility management fees compared to \$172,000 for the same period in 2009. During the nine months ended September 30, 2010, \$501,000 in revenue was recognized from facility management fees compared to \$522,000 for the same period in 2009.

Cost of Operations: Cost of operations increased \$1.6 million from \$21.3 million to \$22.9 million for the three months ended September 30, 2010 over the same period in 2009 as a result of cost of operations from acquired properties of \$1.9 million partially offset by a \$295,000 decrease in Same Park costs of operations. The decrease in Same Park cost of operations for the three months ended September 30, 2010 compared to the same period in 2009 was primarily due to decreases in property insurance of \$208,000 and payroll and benefits of \$168,000. Cost of operations increased \$2.6 million from \$65.0 million to \$67.6 million for the nine months ended September 30, 2010 over the same period in 2009 as a result of cost of operations from acquired properties of \$3.2 million partially offset by a \$570,000 decrease in Same Park costs of operations. The decrease in Same Park cost of operations for the nine months ended September 30, 2010 compared to the same period in 2009 was primarily due to decreases in payroll and benefits of \$652,000, property taxes of \$308,000 and utility costs of \$97,000 partially offset by an increase in repairs and maintenance costs of \$428,000.

Depreciation and Amortization Expense: Depreciation and amortization expense for the three months ended September 30, 2010 was \$21.2 million compared to \$20.3 million for the same period in 2009. The increase for the comparative three months was primarily due to the acquisition of 1.6 million square feet during 2010. Depreciation and amortization expense for the nine months ended September 30, 2010 was \$58.1 million compared to \$64.9 million for the same period in 2009. The decrease for the comparative nine months was primarily due to a number of capital improvements that became fully depreciated partially offset with 2010 acquisitions.

For the three and nine months ended September 30, 2010, general and administrative expenses have increased \$418,000, or 29.6%, and \$2.1 million, or 41.7%, respectively, over the same periods in 2009. The increase in general and administrative expenses was primarily due to \$405,000 and \$2.3 million of acquisition transaction costs related to 2010 property acquisitions for the three and nine months ended September 30, 2010, respectively. The increase in professional fees and investor services for the comparative nine months was due to an increase in legal fees during 2010. The increase in general and administrative expenses for the comparative nine months was partially offset by a decrease in payroll and benefits primarily due to lower stock compensation expense resulting from the completion of a four year long-term incentive plan for senior management in March, 2009.

Interest and Other Income: Interest and other income reflect earnings on cash balances in addition to miscellaneous income items. Interest income was \$27,000 for the three months ended September 30, 2010 compared to \$108,000 for the same period in 2009. Interest income was \$171,000 and \$304,000 for the nine months ended September 30, 2010 and 2009, respectively. The decrease for the three months ended September 30, 2010 compared to the same period in 2009 was primarily attributable to higher average cash balances as a result of issuance of common stock during the third quarter of 2009. The decrease for the nine months ended September 30, 2010 compared to the same period in 2009 was primarily attributable to lower effective interest rates partially offset by higher average cash balances in 2010. Average cash balances and effective interest rates for the nine months ended September 30, 2010 were \$128.8 million and 0.2%, respectively, compared to \$75.2 million and 0.5%, respectively, for the same period in 2009.

Interest Expense: Interest expense was \$875,000 for the three months ended September 30, 2010 and 2009. Interest expense was \$2.6 million and \$2.7 million for the nine months ended September 30, 2010 and 2009, respectively. The decrease was primarily attributable to the repayment of a mortgage note of \$5.1 million during the first quarter of 2009.

Gain on Sale of Land and Real Estate Facility: Included in total discontinued operations is the gain on the sale of a 131,000 square foot office building located in Houston, Texas, for a gross sales price of \$10.0 million, resulting in a net gain of \$5.2 million during January, 2010.

During May, 2009, the Company sold 3.4 acres of land held for development in Portland, Oregon, for a gross sales price of \$2.7 million, resulting in a net gain of \$1.5 million.

Net Income Allocable to Noncontrolling Interests: Net income allocable to noncontrolling interests reflects the net income allocable to equity interests in the Operating Partnership that are not owned by the Company. Net income allocable to noncontrolling interests was \$3.8 million of allocated income (\$984,000 allocated to preferred unit holders and \$2.9 million allocated to common unit holders) for the three months ended September 30, 2010 compared to \$4.1 million of allocated income (\$1.4 million allocated to preferred unit holders and \$2.7 million of income allocated to common unit holders) for the same period in 2009. The decrease in net income allocable to non-controlling interests for the three months ended September 30, 2010 was primarily due to a decrease in cash distributions as a result of the preferred equity redemptions in 2010. Net income allocable to noncontrolling interests was \$13.2 million of allocated income (\$4.1 million allocated to preferred unit holders and \$9.1 million allocated to common unit holders) for the nine months ended September 30, 2010 compared to \$13.1 million (\$4.0 million loss allocated to preferred unit holders and \$17.0 million of income allocated to common unit holders) for the same period in 2009. The increase in net income allocable to non-controlling interests for the nine months ended September 30, 2010 was primarily due to non-cash distributions associated with the preferred equity redemptions partially offset by a decrease in cash distributions as a result of the redemptions.

Liquidity and Capital Resources

Cash and cash equivalents decreased \$188.9 million from \$208.2 million at December 31, 2009 to \$19.3 million at September 30, 2010. The decrease was primarily the result of acquisitions of properties of \$158.5 million located in Maryland, Texas and Virginia and the redemptions of preferred equity of \$74.1 million during the first nine months of 2010 partially offset with retained cash from operations.

Table of Contents

Net cash provided by operating activities for the nine months ended September 30, 2010 and 2009 was \$135.1 million and \$138.3 million, respectively. Management believes that the Company's internally generated net cash provided by operating activities will be sufficient to enable it to meet its operating expenses, capital improvements, debt service requirements and distributions to shareholders.

Net cash used in investing activities was \$177.8 million and \$16.9 million for the nine months ended September 30, 2010 and 2009, respectively. The change of \$160.9 million was primarily due to cash paid for acquisitions in Maryland, Texas and Virginia of \$158.5 million during the first nine months of 2010 combined with an increase in capital improvements of \$9.0 million. The decrease was partially offset by an increase in proceeds from the sale of real estate of \$6.6 million. No properties were acquired during the first nine months of 2009.

Net cash used in financing activities was \$146.2 million for the nine months ended September 30, 2010 compared to net cash provided by financing activities of \$26.8 million for the nine months ended September 30, 2009. The change of \$173.0 million was primarily due to net proceeds received from the sale of common stock of \$171.2 million during the third quarter of 2009, an increase in cash paid for preferred equity redemption/repurchase of \$11.6 million and an increase in cash distributions to common shareholders of \$3.6 million as a result of issuance of common stock partially offset by an increase in proceeds received from exercise of stock options of \$5.7 million and the repayment of a mortgage note payable of \$5.1 million during the first quarter of 2009.

The Company's preferred equity outstanding decreased to 25.2% of its market capitalization as of September 30, 2010 due to the redemptions of preferred equity. The Company's capital structure is characterized by a low level of leverage. As of September 30, 2010, the Company had five fixed-rate mortgages totaling \$51.9 million, which represented 2.1% of its total market capitalization. The Company calculates market capitalization by adding (1) the liquidation preference of the Company's outstanding preferred equity, (2) principal value of the Company's outstanding mortgages and (3) the total number of common shares and common units outstanding at September 30, 2010 multiplied by the closing price of the stock on that date. The weighted average interest rate for the mortgages is 5.8% per annum. The Company had 6.5% of its properties, in terms of net book value, encumbered at September 30, 2010.

On October 15, 2010, the Company issued 3,000,000 depository shares, each representing 1/1,000 of a share of the 6.875% Cumulative Preferred Stock, Series R, at \$25.00 per depository share for gross proceeds of \$75.0 million. Proceeds from this issuance will be used to redeem the Company's 7.60% Series L Cumulative Preferred Stock at its par value of \$48.4 million on November 8, 2010 and for general corporate purposes.

On August 14, 2009, the Company sold of 3,450,000 shares of common stock in a public offering and concurrently sold 383,333 shares of common stock to PS. The aggregate net proceeds were \$171.2 million.

The Company focuses on retaining cash for reinvestment as we believe that this provides the greatest level of financial flexibility. While operating performance has been down recently due to the economic recession, it is possible that when the economy recovers and operating fundamentals improve, additional increases in distributions to the Company's common shareholders may be required. Going forward, the Company will continue to monitor its taxable income and the corresponding dividend requirements.

On July 28, 2010, the Company extended the term of its line of credit (the Credit Facility) with Wells Fargo Bank to August 1, 2012. The Credit Facility has a borrowing limit of \$100.0 million. Interest on outstanding borrowings is payable monthly. The rate of interest charged is equal to a rate ranging from the London Interbank Offered Rate (LIBOR) plus 1.60% to LIBOR plus 2.60% depending on the Company's credit ratings and coverage ratios, as defined (currently LIBOR plus 2.00%). In addition, the Company is required to pay an annual commitment fee ranging from 0.15% to 0.40% of the borrowing limit (currently 0.25%). The Company had no balance outstanding on its Credit Facility at September 30, 2010 or December 31, 2009.

Non-GAAP Supplemental Disclosure Measure: Funds from Operations: Management believes that Funds from Operations (FFO) is a useful supplemental measure of the Company's operating performance. The Company computes FFO in accordance with the White Paper on FFO approved by the Board of Governors of the National Association of Real Estate Investment Trusts (NAREIT). The White Paper defines FFO as net income, computed in accordance with GAAP, before depreciation, amortization, gains or losses on asset dispositions, net income allocable to noncontrolling interests common units, net income allocable to

Table of Contents

restricted stock unit holders and nonrecurring items. Management believes that FFO provides a useful measure of the Company's operating performance and when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities, general and administrative expenses and interest costs, providing a perspective not immediately apparent from net income.

FFO should be analyzed in conjunction with net income. However, FFO should not be viewed as a substitute for net income as a measure of operating performance or liquidity as it does not reflect depreciation and amortization costs or the level of capital expenditure and leasing costs necessary to maintain the operating performance of the Company's properties, which are significant economic costs and could materially affect the Company's results of operations.

Management believes FFO provides useful information to the investment community about the Company's operating performance when compared to the performance of other real estate companies as FFO is generally recognized as the industry standard for reporting operations of REITs. Other REITs may use different methods for calculating FFO and, accordingly, our FFO may not be comparable to other real estate companies.

FFO for the Company is computed as follows (in thousands):

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2010	2009	2010	2009
Net income allocable to common shareholders	\$ 9,608	\$ 8,327	\$ 30,583	\$ 49,323

⁽¹⁾ Includes depreciation from discontinued operations.

FFO allocable to common and dilutive shares for the three months ended September 30, 2010 increased \$2.2 million compared to the same periods in 2009. The increase in FFO per common and dilutive share for the three months ended September 30, 2010 over the same period in 2009 was primarily due to net operating income from acquired properties and a decrease in preferred equity cash distributions as a result of the preferred equity redemptions during the second quarter of 2010. FFO allocable to common and dilutive shares for the nine months ended September 30, 2010 decreased \$37.7 million compared to the same periods in 2009. The decrease in FFO per common and dilutive share for the nine months ended September 30, 2010 over the same period in 2009 was primarily due to the net gain of \$35.6 million on the repurchase of preferred equity during the first quarter of 2009, non-cash distributions associated with preferred equity redemptions and an increase in general and administrative expenses partially offset by a decrease in preferred equity cash distributions. The increase in general and administrative expenses over the prior periods was due to \$405,000 and \$2.3 million of acquisition transaction costs related to 2010 property acquisitions for the three and nine months ended September 30, 2010, respectively.

Total capital expenditures	\$ 28,386	\$ 19,424

Property renovations and other capital expenditures increased \$8.7 million from \$371,000 to \$9.1 million for the nine months ended September 30, 2010 compared to the same period in 2009 as a result of the development at Miami International Commerce Center in Miami, Florida, combined with other property renovations.

In connection with these redemptions, the Company reported the excess of the redemption amount over the carrying amount of \$2.4 million, equal to the original issuance costs, as a reduction of net income allocable to common shareholders for the nine months ended September 30, 2010.

Repurchase of Preferred Equity: During March, 2009, the Company paid \$50.2 million to repurchase 3,208,174 various depositary shares, each representing 1/1,000 of a share of Cumulative Redeemable Preferred Stock and \$12.3 million to repurchase 853,300 units of various series of Cumulative Redeemable Preferred Units for a weighted average purchase price of \$15.40 per share/unit. ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

To limit the Company's exposure to market risk, the Company principally finances its operations and growth with permanent equity capital consisting of either common or preferred stock. At September 30, 2010, the Company's debt as a percentage of equity was 3.7%.

The Company's market risk sensitive instruments at September 30, 2010 include mortgage notes payable of \$51.9 million and the Company's Credit Facility. All of the Company's mortgage notes payable bear interest at fixed rates. At September 30, 2010, the Company had no borrowings outstanding under its Credit Facility. See Notes 5 and 6 to the consolidated financial statements for terms, valuations and approximate principal maturities of the mortgage notes payable and line of credit as of September 30, 2010. Based on borrowing rates currently available to the Company, combined with the amount of fixed-rate debt financing, the difference between the carrying amount of debt and its fair value is insignificant.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's chief executive officer and chief financial officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of September 30, 2010. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of the Company's disclosure controls and procedures as of September 30, 2010, the Company's chief executive officer and chief financial officer concluded that, as of such date, the Company's disclosure controls and procedures were effective at the reasonable assurance level. No change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
