**For the quarterly period ended June 30, 2011**

**OR**

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

**For the transition period from \_\_\_\_\_ to \_\_\_\_\_.**

**Commission file number 0-15341**

**Donegal Group Inc.**

(Exact name of registrant as specified in its charter)

Delaware

23-2424711

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

1195 River Road, P.O. Box 302, Marietta, PA 17547  
(Address of principal executive offices) (Zip code)  
(717) 426-1931  
(Registrant's telephone number, including area code)

Not applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: 20,004,315 shares of Class A Common Stock, par value \$0.01 per share, and 5,576,775 shares of

Class B Common Stock, par value \$0.01 per share, outstanding on July 29, 2011.

**Table of Contents**

**DONEGAL GROUP INC. AND SUBSIDIARIES**  
**(Unaudited)**  
**Notes to Consolidated Financial Statements**

**1 Organization**

Donegal Mutual Insurance Company ( Donegal Mutual ) organized us as an insurance holding company on August 26, 1986. Our insurance subsidiaries, Atlantic States Insurance Company ( Atlantic States ), Southern Insurance Company of Virginia ( Southern ), Le Mars Insurance Company ( Le Mars ), the Peninsula Insurance Group ( Peninsula ), which consists of Peninsula Indemnity Company and The Peninsula Insurance Company, Sheboygan Falls Insurance Company ( Sheboygan ) and Michigan Insurance Company ( Michigan ), write personal and commercial lines of property and casualty coverages exclusively through a network of independent insurance agents in certain Mid-Atlantic, Midwestern, New England and Southern states. We acquired Michigan on December 1, 2010, and we have included Michigan's results of operations in our consolidated results of operations since that date. We have three operating segments: our investment function, our personal lines of insurance and our commercial lines of insurance. The personal lines products of our insurance subsidiaries consist primarily of homeowners and private passenger automobile policies. The commercial lines products of our insurance subsidiaries consist primarily of commercial automobile, commercial multi-peril and workers' compensation policies. We also own 48.2% of the outstanding stock of Donegal Financial Services Corporation ( DFSC ), a thrift holding company that owns Union Community Bank FSB ( UCB ). Donegal Mutual owns the remaining 51.8% of the outstanding stock of DFSC.

At June 30, 2011, Donegal Mutual held approximately 39% of our outstanding Class A common stock and approximately 75% of our outstanding Class B common stock. This ownership provides Donegal Mutual with 66% of the total voting power of our outstanding common stock. Our insurance subsidiaries and Donegal Mutual have interrelated operations. While each company maintains its separate corporate existence, our insurance subsidiaries and Donegal Mutual conduct business together as the Donegal Insurance Group. As such, Donegal Mutual and our insurance subsidiaries share the same business philosophy, the same management, the same employees and the same facilities and offer the same types of insurance products.

Atlantic States, our largest subsidiary, participates in a pooling agreement with Donegal Mutual. Under the pooling agreement, the two companies pool their insurance business, and each company receives an allocated percentage of the pooled business. Atlantic States has an 80% share of the results of the pooled business, and Donegal Mutual has a 20% share of the results of the pooled business.

On February 23, 2009, our board of directors authorized a share repurchase program pursuant to which we may purchase up to 300,000 shares of our Class A common stock at prices prevailing from time to time in the open market subject to the provisions of applicable SEC rules and in privately negotiated transactions. We purchased 50,058 shares of our Class A common stock under this program during the three months ended June 30, 2011. We purchased 50,058 and 9,702 shares of our Class A common stock under this program during the six months ended June 30, 2011 and 2010. We have purchased a total of 67,429 shares of our Class A common stock under this program from its inception through June 30, 2011.

In May 2011, DFSC and Union National Financial Corporation ( UNNF ) merged, with DFSC as the surviving company in the merger. Province Bank FSB and Union National Community Bank, which UNNF owned, also merged and now operate as UCB.

**2 Basis of Presentation**

Our financial information for the interim periods included in this Form 10-Q Report is unaudited; however, such information reflects all adjustments, consisting only of normal recurring adjustments that, in the opinion of our management, are necessary for a fair presentation of our financial position, results of operations and cash flows for those interim periods. Our results of operations for the six months ended June 30, 2011 are not necessarily indicative of the results of operations we expect for the year ending December 31, 2011.

You should read these interim financial statements in conjunction with the financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

**Table of Contents****3 Earnings Per Share**

We have two classes of common stock, which we refer to as our Class A common stock and our Class B common stock. Our certificate of incorporation provides that whenever our board of directors declares a dividend on our Class B common stock, our board of directors must also declare a dividend on our Class A common stock that is payable at the same time to holders as of the same record date at a rate that is at least 10% greater than the rate at which our board of directors declared a dividend on our Class B common stock. Accordingly, we use the two-class method to compute our earnings per common share. The two-class method is an earnings allocation formula that determines earnings per share separately for each class of common stock based on dividends we have declared and an allocation of our remaining undistributed earnings using a participation percentage that reflects the dividend rights of each class. The table below presents for the periods indicated a reconciliation of the numerators and denominators we used to compute basic and diluted net (loss) income per share for each class of our common stock:

**For the Three Months Ended June 30:**

	2011		2010	
	Class A	Class B	Class A	Class B
	(in thousands, except per share data)			
Basic and diluted net (loss) income per share:				
Numerator:				
Allocation of net (loss) income	\$ (1,344)	\$ (350)	\$ 1,396	\$ 343
Denominator:				
Weighted-average shares outstanding	20,026,238	5,576,775	19,953,539	5,576,775
Basic and diluted net (loss) income per share	\$ (0.07)	\$ (0.06)	\$ 0.07	\$ 0.06

**For the Six Months Ended June 30:**

	2011		2010	
	Class A	Class B	Class A	Class B
	(in thousands, except per share data)			
Basic and diluted net income per share:				
Numerator:				
Allocation of net income	\$ 417	\$ 95	\$ 1,584	\$ 390
Denominator:				
Weighted-average shares outstanding	20,019,481	5,576,775	19,942,153	5,576,775
Basic and diluted net income per share	\$ 0.02	\$ 0.02	\$ 0.08	\$ 0.07

We did not include outstanding options to purchase the following number of shares of Class A common stock in our computation of diluted earnings per share because the exercise price of the options was greater than the average market price of our Class A common stock during the period:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2011	2010	2011	2010
Number of shares excluded	4,021,667	3,290,099	4,021,667	3,290,099

**4 Reinsurance**

Atlantic States and Donegal Mutual have participated in a pooling agreement since 1986 under which each company places all of its direct written business into the pool, and Atlantic States and Donegal Mutual then share the underwriting results of the pool in accordance with the terms of the pooling agreement. Atlantic States has an 80% share of the results of the pool, and Donegal Mutual has a 20% share of the results of the pool.

**Table of Contents**

Our insurance subsidiaries and Donegal Mutual purchase certain third-party reinsurance on a combined basis. Le Mars, Michigan, Peninsula and Sheboygan also purchase separate third-party reinsurance that provides coverage that is commensurate with their relative size and risk exposures. Our insurance subsidiaries place reinsurance with various reinsurers, all of which, consistent with Donegal Insurance Group's requirements, have an A.M. Best rating of A- (Excellent) or better or, with respect to foreign reinsurers, have a financial condition that, in the opinion of our management, is equivalent to a company with at least an A- rating. The following information describes the external reinsurance our insurance subsidiaries have in place during 2011 and 2010:

excess of loss reinsurance, under which losses are automatically reinsured, through a series of reinsurance agreements, over a set retention (generally \$750,000), and

catastrophe reinsurance, under which Donegal Mutual, Atlantic States and Southern recover, through a series of reinsurance agreements, 100% of an accumulation of many losses resulting from a single event, including natural disasters, over a set retention (\$5.0 million for 2011 and \$3.0 million for 2010).

Our insurance subsidiaries and Donegal Mutual also purchase facultative reinsurance to cover exposures from losses that exceed the limits provided by their reinsurance agreements with third parties.

In addition to the pooling agreement and third-party reinsurance, our insurance subsidiaries have various reinsurance agreements with Donegal Mutual.

Upon the recovery of losses under the terms of our insurance subsidiaries' catastrophe reinsurance agreements with third parties and Donegal Mutual, the agreements require our insurance subsidiaries to pay reinstatement premiums to reinstate coverage for additional events that may occur during the term of the agreements. Payment of a reinstatement premium entitles our insurance subsidiaries to the same amount of coverage under the same terms in place prior to their utilization of coverage. Our insurance subsidiaries recognize the cost of the original prepaid reinsurance premiums ratably over the term of the agreements and immediately recognize the cost of reinstatement premiums upon recovery of losses that give rise to an obligation to pay such reinstatement premiums. Our insurance subsidiaries recorded reinstatement premiums of \$3.2 million and \$1.2 million during the three months ended June 30, 2011 and 2010, respectively. Our insurance subsidiaries recorded reinstatement premiums of \$3.2 million and \$1.8 million during the six months ended June 30, 2011 and 2010, respectively.

Other than a change in the set retention under our catastrophe reinsurance we discuss above, we made no significant changes to our third-party reinsurance or the reinsurance agreements between our insurance subsidiaries and Donegal Mutual during the six months ended June 30, 2011.

Equity securities	314	35		
Totals	\$ 275,856	\$ 7,212	\$ 1,898	\$ 103

Of our total fixed maturity securities with an unrealized loss at June 30, 2011, we classified 115 securities with a fair value of \$120.4 million and an unrealized loss of \$1.9 million as available-for-sale and carried them at fair value on our balance sheet.

Of our total fixed maturity securities with an unrealized loss at December 31, 2010, we classified 301 securities with a fair value of \$277.4 million and an unrealized loss of \$7.3 million as available-for-sale and carried them at fair value on our balance sheet.

We have no direct exposure to sub-prime residential mortgage-backed securities and hold no collateralized debt obligations. Substantially all of the unrealized losses in our fixed maturity investment portfolio have resulted from general market conditions and the related impact on our fixed maturity investment valuations. We make estimates concerning the valuation of our investments and the recognition

**Table of Contents**

of other-than-temporary declines in the value of our investments. For equity securities, when we consider the decline in value of an individual investment to be other than temporary, we write the investment down to its fair value, and we reflect the amount of the write-down as a realized loss in our results of operations. We individually monitor all investments for other-than-temporary declines in value. Generally, if an individual equity security has depreciated in value by more than 20% of original cost, and has been in such an unrealized loss position for more than six months, we assume there has been an other-than-temporary decline in value. We held 11 equity securities that were in an unrealized loss position at June 30, 2011. Based upon our analysis of general market conditions and underlying factors impacting these equity securities, we consider these declines in value to be temporary. With respect to a debt security that is in an unrealized loss position, we first assess if we intend to sell the debt security. If we intend to sell the debt security, we recognize the impairment loss in our results of operations. If we do not intend to sell the debt security, we determine whether it is more likely than not that we will be required to sell the security prior to recovery. If it is more likely than not that we will be required to sell the debt security prior to recovery, we recognize an impairment loss in our results of operations. If it is more likely than not that we will not be required to sell the debt security prior to recovery, we then evaluate whether a credit loss has occurred. To determine whether a credit loss has occurred, we compare the amortized cost of the debt security to the present value of the cash flows we expect to collect. If we expect a cash flow shortfall, we consider a credit loss to have occurred. If we consider a credit loss to have occurred, we consider the impairment to be other than temporary. We then recognize the amount of the impairment loss related to the credit loss in our results of operations, and we recognize the remaining portion of the impairment loss in our other comprehensive income, net of applicable taxes. In addition, we may write down securities in an unrealized loss position based on a number of other factors, including the fair value of the investment being significantly below its cost, whether the financial condition of the issuer of the security has deteriorated, the occurrence of industry, company and geographic events that have negatively impacted the value of the security and rating agency downgrades. We determined that no investments with fair values below cost had declined on an other-than-temporary basis during the first six months of 2011 and 2010, respectively.

We amortize premiums and discounts on debt securities over the life of the security as an adjustment to yield using the effective interest method. We compute realized investment gains and losses using the specific identification method.

We amortize premiums and discounts for mortgage-backed debt securities using anticipated prepayments.

We account for investments in our affiliates using the equity method of accounting. Under this method, we record our investment at cost, with adjustments for our share of our affiliates' earnings and losses as well as changes in our affiliates' equity due to unrealized gains and losses. Our investments in affiliates include our 48.2% ownership interest in DFSC. We have compiled the following summary financial information for DFSC at June 30, 2011 and December 31, 2010 and for the three and six months ended June 30, 2011 and 2010, respectively, from the financial statements of DFSC.

**Table of Contents****7 Borrowings**

## Line of Credit

In June 2011, we renewed our existing credit agreement with Manufacturers and Traders Trust Company ( M&T ) relating to a \$60.0 million unsecured, revolving line of credit that expires in July 2014. We have the right to request a one-year extension of the credit agreement as of each anniversary date of the agreement. In December 2010 and March 2011, we borrowed \$35.0 million and \$3.5 million, respectively, in connection with our acquisition of Michigan. In May 2011, we borrowed \$19.0 million in connection with the merger of UNNF with and into DFSC. As of June 30, 2011, we had \$54.5 million in outstanding borrowings and had the ability to borrow an additional \$5.5 million at interest rates equal to M&T s current prime rate or the then current LIBOR rate plus between 1.75% and 2.25%, depending on our leverage ratio. We pay a fee of 0.2% per annum on the loan commitment amount regardless of usage. The credit agreement requires our compliance with certain covenants, which include minimum levels of our net worth, leverage ratio and statutory surplus and the A.M. Best ratings of our insurance subsidiaries. We complied with all requirements of the credit agreement during the six months ended June 30, 2011.

## Subordinated Debentures

On October 29, 2003, we received \$10.0 million in net proceeds from the issuance of subordinated debentures. The debentures mature on October 29, 2033 and are callable at our option, at par. The debentures carry an interest rate equal to the three-month LIBOR rate plus 4.10%, which is adjustable quarterly. At June 30, 2011, the interest rate on these debentures was 4.12% and was next subject to adjustment on July 29, 2011.

On May 24, 2004, we received \$5.0 million in net proceeds from the issuance of subordinated debentures. The debentures mature on May 24, 2034 and are callable at our option, at par. The debentures carry an interest rate equal to the three-month LIBOR rate plus 3.85%, which is adjustable quarterly. At June 30, 2011, the interest rate on these debentures was 4.11% and was next subject to adjustment on August 24, 2011.

In January 2002, West Bend Mutual Insurance Company ( West Bend ) purchased a surplus note from Michigan for \$5.0 million to increase Michigan s statutory surplus. On December 1, 2010, Donegal Mutual purchased the surplus note from West Bend at face value. The surplus note carries an interest rate of 5.00%, and any repayment of principal or interest requires prior insurance regulatory approval.

**8 Share Based Compensation**

We measure all share-based payments to employees, including grants of stock options, using a fair-value-based method and the recording of such expense in our consolidated statements of income. In determining the expense we record for stock options granted to directors and employees of our subsidiaries and affiliates other than Donegal Mutual, we estimate the fair value of each option award on the date of grant using the Black-Scholes option pricing model. The significant assumptions we utilize in applying the Black-Scholes option pricing model are the risk-free interest rate, expected term, dividend yield and expected volatility.

We charged compensation expense for our stock compensation plans against income before income taxes of \$29,104 and \$60,824 for the three months ended June 30, 2011 and 2010, respectively, with a corresponding income tax benefit of \$9,895 and \$20,680, respectively. We charged compensation expense for our stock compensation plans against income before income taxes of \$69,486 and \$120,985 for the six months ended June 30, 2011 and 2010, respectively, with a corresponding income tax benefit of \$23,625 and \$41,135, respectively. As of June 30, 2011, our total unrecognized compensation cost related to nonvested share-based compensation granted under our stock compensation plans was \$208,471. We expect to recognize this cost over a weighted average period of 4.1 years.

We account for share-based compensation to employees and directors of Donegal Mutual as share-based compensation to employees of a controlling entity. As such, we measure the fair value of the award at the grant date and recognize the fair value as a dividend to Donegal Mutual. This accounting applies to options we grant to employees and directors of Donegal Mutual, the employer of a majority of the employees that provide services to us. We recorded no implied dividends for the three months ended June 30, 2011 and 2010, respectively. We recorded implied dividends of \$34,574 and \$23,072 for the six months ended June 30, 2011 and 2010, respectively.

**Table of Contents**

We received no cash from option exercises under all stock option compensation plans for the six months ended June 30, 2011 and 2010. We realized no tax benefits for tax deductions from option exercises for the six months ended June 30, 2011 and 2010.

**9 Fair Value Measurements**

We account for financial assets using a framework that establishes a hierarchy that ranks the quality and reliability of inputs, or assumptions, used in the determination of fair value, and we classify financial assets and liabilities carried at fair value in one of the following three categories:

- Level 1 quoted prices in active markets for identical assets and liabilities;
- Level 2 directly or indirectly observable inputs other than Level 1 quoted prices; and
- Level 3 unobservable inputs not corroborated by market data.

For investments that have quoted market prices in active markets, we use the quoted market price as fair value and include these investments in Level 1 of the fair value hierarchy. We classify publicly traded equity securities as Level 1. When quoted market prices in active markets are not available, we base fair values on quoted market prices of comparable instruments or broker quotes we obtain from independent pricing services through a bank trustee. We classify our fixed maturity investments as Level 2. Our fixed maturity investments consist of U.S. Treasury securities and obligations of U.S. government corporations and agencies, obligations of states and political subdivisions, corporate securities and residential mortgage-backed securities. During the first six months of 2010, we classified one equity security as Level 3. The terms of an initial public offering included a restriction from selling that security for a specified period. During the six months ended June 30, 2011, the restriction period expired for a portion of our holdings, and we transferred this portion from Level 3 to Level 1. We utilized a fair value model that incorporated significant other unobservable inputs, such as estimated volatility, to estimate the fair value of the remaining portion of our holdings in this security that remain subject to the selling restriction. The fair value we determined as of June 30, 2011 reflects this restriction, and we continue to classify this portion of our holdings in this security as Level 3.

We present our investments in available-for-sale fixed maturity and equity securities at estimated fair value. The estimated fair value of a security may differ from the amount we could realize if we sold the security in a forced transaction. In addition, the valuation of fixed maturity investments is more subjective when markets are less liquid, increasing the potential that the estimated fair value does not reflect the price at which an actual transaction would occur. We utilize nationally recognized independent pricing services to estimate fair values for our fixed maturity and equity investments. The pricing services utilize market quotations for fixed maturity and equity securities that have quoted prices in active markets. For fixed maturity securities that generally do not trade on a daily basis, the pricing services prepare estimates of fair value measurements using proprietary pricing applications, which include available relevant market information, benchmark yields, sector curves and matrix pricing. The pricing services do not use broker quotes in determining the fair values of our investments. We review the estimates of fair value the pricing services provide to determine if the estimates we obtain are representative of fair values based upon our general knowledge of the market, our research findings related to unusual fluctuations in value and our comparison of such values to execution prices for similar securities. As of June 30, 2011 and December 31, 2010, we received one estimate per security from one of the pricing services, and we priced all but an insignificant amount of our Level 1 and Level 2 investments using those prices. In our review of the estimates the pricing services provided to us as of June 30, 2011 and December 31, 2010, we did not identify any discrepancies, and we did not make any adjustments to the estimates the pricing services provided to us.

We present our cash and short-term investments at estimated fair value. The carrying values in the balance sheet for premium receivables and reinsurance receivables and payables for premiums and paid losses and loss expenses approximate their fair values. The carrying amounts reported in the balance sheet for our subordinated debentures and borrowings under line of credit approximate their fair values.

We evaluate our assets and liabilities on a recurring basis to determine the appropriate level at which to classify them for each reporting period.

**Table of Contents**

The following table presents our fair value measurements for our investments in available-for-sale fixed maturity and equity securities as of June 30, 2011:

	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(in thousands)				
U.S. Treasury securities and obligations of U.S. government corporations and agencies	\$ 82,925	\$	\$ 82,925	\$

**Table of Contents****10 Income Taxes**

As of June 30, 2011 and December 31, 2010, respectively, we had no material unrecognized tax benefits or accrued interest and penalties. Tax years 2007 through 2010 remained open for examination as of June 30, 2011.

**11 Business Combinations**

In December 2010, we acquired Michigan, which had been a majority-owned subsidiary of West Bend. Michigan writes various lines of property and casualty insurance and had direct written premiums of \$105.4 million and net written premiums of \$27.1 million for the year ended December 31, 2010. Effective on December 1, 2010, Michigan entered into a 50% quota-share agreement with third-party reinsurers and a 25% quota-share reinsurance agreement with Donegal Mutual to replace the 75% quota-share reinsurance agreement Michigan maintained with West Bend through November 30, 2010. The final purchase price for the acquisition was \$42.3 million in cash.

During the first quarter of 2011, we completed our analysis of the estimated acquisition date fair value of the assets we acquired and the liabilities we assumed. Based on the finalized analysis of our valuation specialist, we decreased the fair value of other assets acquired by \$132,000 and recorded a corresponding increase to goodwill.

As part of our acquisition accounting for Michigan in 2010, we eliminated Michigan's deferred policy acquisition costs and unearned commission income and recorded Michigan's obligations and rights under unexpired insurance and reinsurance contracts at their estimated fair value. We estimated the fair value adjustments by applying a market ceding commission rate to Michigan's unearned premiums and prepaid reinsurance premiums that resulted in a net reduction of Michigan's obligations. We are amortizing the ceding commission component of the fair value adjustments over the estimated remaining term of Michigan's policies in force as of the acquisition date and recording the amortization as a reduction in net premiums earned. For the six months ended June 30 2011, we recorded a reduction in net premiums earned of \$2.8 million related to this amortization. We will amortize the remaining fair value adjustments of \$493,000 throughout the remainder of 2011.

**12 Impact of New Accounting Standards**

In January 2010, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) 2010-06, Improving Disclosures about Fair Value Measurements. ASU 2010-06 amends ASC subtopic 820-10 by requiring new, and clarifying existing, fair value disclosures. We have included herein the disclosures ASU 2010-06 requires for the first six months of 2011.

In October 2010, the FASB issued updated guidance to address the diversity in practice for the accounting for costs associated with acquiring or renewing insurance contracts. This guidance modifies the definition of acquisition costs to specify that a cost must relate directly to the successful acquisition of a new or renewal insurance contract to qualify for deferral. If application of this guidance would result in the capitalization of acquisition costs that a reporting entity had not previously capitalized, the entity may elect not to capitalize those costs. The updated guidance is effective for periods ending after December 15, 2011. We do not expect the adoption of this guidance to have a material impact on our financial position or results of operations.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

You should read the following information in conjunction with the historical financial information and the notes thereto we include in this Quarterly Report on Form 10-Q. You should also read Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

**Critical Accounting Policies and Estimates**

We combine our financial statements with those of our insurance subsidiaries and present our financial statements on a consolidated basis in accordance with GAAP.

Our insurance subsidiaries make estimates and assumptions that can have a significant effect on amounts and disclosures that we report in our financial statements. The most significant estimates relate to our insurance subsidiaries' reserves for property and casualty insurance unpaid losses and loss expenses,

**Table of Contents**

valuation of investments and determination of other-than-temporary impairment in the value of investments and policy acquisition costs. While we believe our estimates and the estimates of our insurance subsidiaries are appropriate, the ultimate amounts may differ from the amounts we and our insurance subsidiaries estimate. We regularly review these estimates and reflect any adjustment we consider necessary in our current results of operations.

**Liability for Unpaid Losses and Loss Expenses**

Liabilities for unpaid losses and loss expenses are estimates at a given point in time of the amounts an insurer expects to pay with respect to policyholder claims based on facts and circumstances the insurer knows at the time. At the time an insurer establishes its estimates, it recognizes that its ultimate liability for unpaid losses and loss expenses will exceed or be less than those estimates. Our insurance subsidiaries base their estimates of liabilities for unpaid losses and loss expenses on assumptions as to future loss trends and expected claims severity, judicial theories of liability and other factors, including prevailing economic conditions. However, during the loss adjustment period, our insurance subsidiaries may learn additional facts regarding individual claims, and, consequently, it often becomes necessary for our insurance subsidiaries to adjust their estimates of liability. Our insurance subsidiaries reflect any adjustments to their liabilities for unpaid losses and loss expenses in their results of operations for the period in which our insurance subsidiaries change their estimates.

Our insurance subsidiaries maintain liabilities for the payment of unpaid losses and loss expenses with respect to both reported and unreported claims. The intent of our insurance subsidiaries is that their liabilities for loss expenses will cover the ultimate costs of settling all losses, including investigation and litigation costs from those losses. Our insurance subsidiaries base the amount of their liabilities for reported losses primarily upon a case-by-case evaluation of the type of risk involved, knowledge of the circumstances surrounding each claim and the provisions of our insurance policies relating to the type of loss. Our insurance subsidiaries determine the amount of their liabilities for unreported claims and loss expenses on the basis of historical information by line of insurance. Our insurance subsidiaries account for inflation in the reserving function through analysis of costs and trends and reviews of historical reserving results. Our insurance subsidiaries closely monitor their liabilities and recompute them periodically using new information on reported claims and a variety of statistical techniques. Our insurance subsidiaries do not discount their liabilities for unpaid losses and loss expenses.

Reserve estimates can change over time because of unexpected changes in assumptions related to our insurance subsidiaries' external environment and, to a lesser extent, assumptions as to our insurance subsidiaries' internal operations. For example, our insurance subsidiaries have experienced a decrease in claims frequency on workers compensation claims during the past several years while claims severity has gradually increased. These trend changes give rise to greater uncertainty as to the pattern of future loss settlements on workers' compensation claims. Related uncertainties regarding future trends include the cost of medical technologies and procedures and changes in the utilization of medical procedures. Assumptions related to our insurance subsidiaries' external environment include the absence of significant changes in tort law and the legal environment that increase liability exposure, consistency in judicial interpretations of insurance coverage and policy provisions and the rate of loss cost inflation. Internal assumptions include consistency in the recording of premium and loss statistics, consistency in the recording of claims, payment and case reserving methodology, accurate measurement of the impact of rate changes and changes in policy provisions, consistency in the quality and characteristics of business written within a given line of business and consistency in reinsurance coverage and the collectibility of reinsured losses, among other items. To the extent our insurance subsidiaries determine that the factors underlying their assumptions have changed, our insurance subsidiaries attempt to make appropriate adjustments for such changes in their reserves. Accordingly, our insurance subsidiaries' ultimate liability for unpaid losses and loss expenses will likely differ from the amount recorded at June 30, 2011. For every 1% change in our estimate of our insurance subsidiaries' liability for unpaid losses and loss expenses, net of reinsurance recoverable, the effect on our pre-tax results of operations would be approximately \$2.2 million.

The establishment of appropriate liabilities is an inherently uncertain process. There can be no assurance that the ultimate liability of our insurance subsidiaries will not exceed our insurance subsidiaries' unpaid loss and loss expense reserves and have an adverse effect on our results of operations and financial condition. Furthermore, we cannot predict the timing, frequency and extent of adjustments to our insurance subsidiaries' estimated future liabilities,

because the historical conditions and events that serve as a basis for our insurance subsidiaries' estimates of ultimate claim costs may change. As is the case for substantially all property and casualty insurance companies, our insurance subsidiaries have found it necessary in the past to increase their estimated future liabilities for unpaid losses and loss expenses in certain periods, and

**Table of Contents**

in other periods their estimates have exceeded their actual liabilities. Changes in our insurance subsidiaries' estimate of their liabilities for unpaid losses and loss expenses generally reflect actual payments and the evaluation of information they have received since the prior reporting date.

Excluding the impact of periodic catastrophic weather events in recent years, our insurance subsidiaries have generally noted stable amounts in the number of claims incurred and a slight downward trend in the number of claims outstanding at period ends relative to their premium base. However, the amount of the average claim outstanding has increased gradually over the past several years. We attribute this increase to increased litigation trends and economic conditions that have extended the estimated length of disabilities and contributed to increased medical loss costs and a general slowing of settlement rates in litigated claims. Our insurance subsidiaries could make further adjustments to their estimates for liabilities in the future based on the factors we describe above. However, on the basis of our insurance subsidiaries' internal procedures, which analyze, among other things, their prior assumptions, their experience with similar cases and historical trends such as reserving patterns, loss payments, pending levels of unpaid claims and product mix, as well as court decisions, economic conditions and public attitudes, we believe that our insurance subsidiaries have made adequate provision for their liability for losses and loss expenses as of June 30, 2011.

Atlantic States' participation in the pool with Donegal Mutual exposes Atlantic States to adverse loss development on the business of Donegal Mutual included in the pool. However, pooled business represents the predominant percentage of the net underwriting activity of both companies, and Donegal Mutual and Atlantic States share any adverse risk development of the pooled business according to their respective participation in the pool. The business in the pool is homogeneous, and the pooling agreement provides that each company has a percentage share of the entire pool. Since Atlantic States and Donegal Mutual pool substantially all their business and each company shares the results according to its respective participation under the terms of the pooling agreement, the intent of the underwriting pool is to produce a more uniform and stable underwriting result from year to year for each company than they might experience individually and to spread the risk of loss between Atlantic States and Donegal Mutual.

The risk profiles of the business Atlantic States and Donegal Mutual write have historically been substantially similar and we expect this similarity to continue. The same executive management and underwriting personnel administer the products, classes of business underwritten, pricing practices and underwriting standards of Donegal Mutual and our insurance subsidiaries.

**Table of Contents**

In addition, Donegal Mutual and our insurance subsidiaries, operating together as the Donegal Insurance Group, share a combined business plan to achieve market penetration and underwriting profitability objectives. The products our insurance subsidiaries and Donegal Mutual offer are generally complementary, thereby allowing Donegal Insurance Group to offer a broader range of products to a given market and to expand Donegal Insurance Group's ability to service an entire personal lines or commercial lines account. Distinctions within the products of Donegal Mutual and our insurance subsidiaries generally relate to specific risk profiles targeted within similar classes of business, such as preferred tier products compared to standard tier products, but we do not allocate all of the standard risk gradients to one company. Therefore, the underwriting profitability of the business the individual companies write directly will vary. However, because the pool homogenizes the risk characteristics of all business Donegal Mutual and Atlantic States write directly and each company shares the results according to each company's participation percentage, each company realizes its percentage share of the underwriting results of the pool. Our insurance subsidiaries' unpaid liability for losses and loss expenses by major line of business as of June 30, 2011 and December 31, 2010 consisted of the following:

	June 30, 2011	December 31, 2010
	(in thousands)	
Commercial lines:		
Automobile	\$ 23,599	\$ 22,790
Workers' compensation	55,473	54,902
Commercial multi-peril	36,555	32,961
Other	4,100	3,875
Total commercial lines	119,727	114,528
Personal lines:		
Automobile	82,037	83,042
Homeowners	15,980	18,695
Other	2,514	1,632
Total personal lines	100,531	103,369
Total commercial and personal lines	220,258	217,897
Plus reinsurance recoverable	182,484	165,422
Total liability for unpaid losses and loss expenses	\$ 402,742	\$ 383,319

**Table of Contents****Statutory Combined Ratios**

We evaluate our insurance operations by monitoring certain key measures of growth and profitability. In addition to using GAAP-based performance measurements, we also utilize certain non-GAAP financial measures that we believe are valuable in managing our business and for comparison to our peers. These non-GAAP measures are underwriting (loss) income, combined ratio and net premiums written. An insurance company's statutory combined ratio is a standard measure of underwriting profitability. This ratio is the sum of the ratio of calendar-year incurred losses and loss expenses to premiums earned; the ratio of expenses incurred for commissions, premium taxes and underwriting expenses to net premiums written and the ratio of dividends to policyholders to premiums earned. The combined ratio does not reflect investment income, federal income taxes or other non-operating income or expense. A ratio of less than 100 percent generally indicates underwriting profitability. The statutory combined ratio differs from the GAAP combined ratio. In calculating the GAAP combined ratio, we do not deduct installment payment fees from incurred expenses, we base the expense ratio on premiums earned instead of premiums written and we adjust GAAP premiums earned to reflect acquisition accounting adjustments. The following table sets forth our insurance subsidiaries' statutory combined ratios by major line of business for the three and six months ended June 30, 2011 and 2010:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Commercial lines:				
Automobile	95.9%	83.4%	93.7%	90.0%
Workers' compensation	81.7	84.8	88.3	95.1
Commercial multi-peril	107.8	99.8	105.1	109.4
Other	52.9	39.2	46.8	29.8
Total commercial lines	93.9	88.9	94.1	97.1
Personal lines:				
Automobile	103.0	103.6	102.4	100.1
Homeowners	147.4	123.0	125.4	122.1
Other	115.6	119.5	98.6	104.4
Total personal lines	116.7	110.5	109.1	107.0
Total commercial and personal lines	108.7	103.7	103.9	103.9

**Investments**

We make estimates concerning the value of our investments and the recognition of other-than-temporary declines in the value of our investments. For equity securities, when we consider a decline in the value of an individual investment to be other than temporary, we write down the investment to its fair value, and we reflect the amount of the write-down as a realized loss in our results of operations. We individually monitor all investments for other-than-temporary declines in value. Generally, if an individual equity security has depreciated in value by more than 20% of its original cost, and has been in such an unrealized loss position for more than six months, we assume there has been an other-than-temporary decline in its value. We held 11 equity securities that were in an unrealized loss position at June 30, 2011. Based upon our analysis of general market conditions and underlying factors impacting these equity securities, we consider these declines in value to be temporary. With respect to a debt security that is in an unrealized loss position, we first assess if we intend to sell the debt security. If we intend to sell the debt security, we recognize the impairment loss in our results of operations. If we do not intend to sell the debt security, we determine whether it is more likely than not that we will be required to sell the security prior to recovery. If it is more likely than not that we will be required to sell the debt security prior to recovery, we recognize an impairment loss in our results of operations. If it is more likely than not that we will not be required to sell the debt security prior to recovery, we then evaluate whether a credit loss has occurred. To determine whether a credit loss has occurred, we

compare the amortized cost of the debt security to the present value of the cash flows we expect to collect. If we expect we will incur a cash flow shortfall, we consider a credit loss to have occurred. If we consider that a credit loss has occurred, we consider the impairment to be other than temporary. We then recognize the amount of the impairment loss related to the credit loss in our results of

**Table of Contents**

operations, and we recognize the remaining portion of the impairment loss in our other comprehensive income, net of applicable taxes. In addition, we may write down securities in an unrealized loss position based on a number of other factors, including the fair value of the investment being significantly below its cost, whether the financial condition of the issuer of a security is deteriorating, the occurrence of industry, company and geographic events that have negatively impacted the value of a security and rating agency downgrades. We determined that no investments with a fair value below cost had declined on an other-than-temporary basis during the first six months of 2011 and 2010, respectively.

We present our investments in available-for-sale fixed maturity and equity securities at estimated fair value. The estimated fair value of a security may differ from the amount that could be realized if the security was sold in a forced transaction. In addition, the valuation of fixed maturity investments is more subjective when markets are less liquid, increasing the potential that the estimated fair value does not reflect the price at which an actual transaction would occur. We utilize nationally recognized independent pricing services to estimate fair values for our fixed maturity and equity investments. The pricing services utilize market quotations for fixed maturity and equity securities that have quoted prices in active markets. For fixed maturity securities that generally do not trade on a daily basis, the pricing services prepare estimates of fair value measurements using proprietary pricing applications, which include available relevant market information, benchmark yields, sector curves and matrix pricing. The pricing services do not use broker quotes in determining the fair values of our investments. We review the estimates of fair value the pricing services provide to determine if the estimates we obtain are representative of market prices based upon our general knowledge of the market, our research findings related to unusual fluctuations in value and our comparison of such values to execution prices for similar securities. As of June 30, 2011 and December 31, 2010, we received one estimate per security from one of the pricing services, and we priced all but an insignificant amount of our Level 1 and Level 2 investments using those prices. In our review of the estimates the pricing services provided to us as of June 30, 2011 and December 31, 2010, we did not identify any discrepancies, and we did not make any adjustments to the fair value estimates the pricing services provided to us. We classified one equity security as Level 3 as of June 30, 2011, which we describe in Note 9 Fair Value Measurements. We utilized a fair value model that incorporated significant other unobservable inputs, including estimated volatility, to estimate the equity security's fair value. Pursuant to terms of an initial public offering by the issuer of that equity security, we may not sell this security for a specified period, and the fair value we determined as of June 30, 2011 reflects this restriction.

**Policy Acquisition Costs**

Our insurance subsidiaries defer their policy acquisition costs, consisting primarily of commissions, premium taxes and certain other underwriting costs that vary with and relate primarily to the production of business. We amortize these costs over the period in which our insurance subsidiaries earn the related premiums. The method we follow in computing deferred policy acquisition costs limits the amount of such deferred costs to their estimated realizable value. This method gives effect to the premiums to be earned, related investment income, losses and loss expenses and certain other costs we expect to incur as our insurance subsidiaries earn the premiums.

**Results of Operations Three Months Ended June 30, 2011 Compared to Three Months Ended June 30, 2010**

*Net Premiums Written.* Our insurance subsidiaries' net premiums written for the three months ended June 30, 2011 were \$117.9 million, an increase of \$15.6 million, or 15.2%, from the \$102.4 million of net premiums written for the comparable period of 2010. We primarily attribute the increase to net premiums written of \$12.2 million related to our acquisition of Michigan. Personal lines net premiums written increased \$5.7 million, or 8.2%, for the second quarter of 2011 compared to the comparable period of 2010. We attribute the increase to our acquisition of Michigan, as increased reinsurance reinstatement premiums fully offset growth from premium price increases. Commercial lines net premiums written increased \$9.9 million, or 30.1%, for the second quarter of 2011 compared to the comparable period of 2010. The increase included \$6.5 million from Michigan, with the remainder attributable to increased writings of new accounts in the commercial automobile, commercial multi-peril and workers' compensation lines of business.

*Net Premiums Earned.* Our insurance subsidiaries' net premiums earned for the second quarter of 2011 were \$105.0 million, an increase of \$12.0 million, or 12.9%, compared to \$93.0 million for the comparable period of 2010, reflecting increases in net premiums written during 2010 and 2011 that were partially offset by a \$1.0 million

amortization adjustment related to the Michigan acquisition. As of the acquisition date, we eliminated Michigan's deferred acquisition costs and unearned commission income and recorded Michigan's obligations and rights under unexpired insurance and reinsurance contracts at their

**Table of Contents**

estimated fair value. We estimated the fair value adjustments by applying a market ceding commission rate to Michigan's unearned premiums and prepaid reinsurance premiums that resulted in a net reduction of Michigan's obligations. We are amortizing the ceding commission component of the fair value adjustments over the estimated remaining term of Michigan's policies in force as of the acquisition date and recording the amortization as a reduction in net premiums earned. Our insurance subsidiaries earn premiums and recognize them as revenue over the terms of their policies, which are one year or less in duration. Therefore, increases or decreases in net premiums earned generally reflect increases or decreases in net premiums written in the preceding 12-month period compared to the comparable period one year earlier.

*Investment Income.* Our net investment income increased to \$5.4 million for the second quarter of 2011, compared to \$5.0 million for the second quarter of 2010. We attribute this increase primarily to an increase in our average invested assets from \$664.9 million for the second quarter of 2010 to \$749.7 million for the second quarter of 2011. The increase in our average invested assets reflects the additional invested assets we received as part of the Michigan acquisition.

*Net Realized Investment Gains.* We had net realized investment gains for the second quarter of 2011 of \$4.3 million, compared to \$2.0 million for the second quarter of 2010. The net realized investment gains for the second quarter of 2011 resulted primarily from the previously planned periodic sales of a portion of our holdings of an equity security that we obtained in an initial public offering and for which a selling restriction expired in April 2011. The net realized investment gains in 2010 resulted from normal turnover within our investment portfolio. We did not recognize any impairment losses during the comparable period of 2011 or 2010.

*Losses and Loss Expenses.* Our insurance subsidiaries' loss ratio, which is the ratio of incurred losses and loss expenses to premiums earned, for the second quarter of 2011 was 80.2%, an increase from our insurance subsidiaries' 73.7% loss ratio for the second quarter of 2010. Our insurance subsidiaries incurred increased weather-related losses during the second quarter of 2011 compared to the second quarter of 2010. Our insurance subsidiaries incurred \$13.1 million of losses, after reinsurance, from 11 catastrophic weather events throughout our operating regions and an additional \$7.4 million of weather-related losses from other storm systems that hit our insurance subsidiaries' operating regions. Our insurance subsidiaries experienced favorable prior-accident-year loss reserve development of approximately \$1.5 million and \$500,000 in the second quarter of 2011 and 2010, respectively. Our insurance subsidiaries' commercial lines loss ratio increased to 67.0% for the second quarter of 2011 compared to 61.1% for the second quarter of 2010, primarily due to increases in their commercial automobile and commercial multi-peril loss ratios. The personal lines loss ratio increased to 86.7% for the second quarter of 2011, compared to 79.6% for the second quarter of 2010, primarily due to an increase in the homeowners loss ratio.

*Underwriting Expenses.* Our insurance subsidiaries' expense ratio, which is the ratio of policy acquisition costs and other underwriting expenses to premiums earned, for the second quarters of 2011 and 2010 was 32.1% and 32.6%, respectively. Our underwriting expenses include non-deferrable costs related to the acquisition of Michigan of approximately \$450,000 for which we will recognize offsetting ceding commissions over the terms of the policies to which the expenses related. Our GAAP expense ratio for the comparable period of 2011 reflects this additional expense.

*Combined Ratio.* Our insurance subsidiaries' combined ratio was 112.4% and 106.4% for the three months ended June 30, 2011 and 2010, respectively. The combined ratio represents the sum of the loss ratio, expense ratio and dividend ratio, which is the ratio of workers' compensation policy dividends incurred to premiums earned. We attribute the increase in the combined ratio to an increase in the loss ratio that was primarily weather-related.

*Interest Expense.* Interest expense for the second quarter of 2011 was \$558,842, compared to \$168,935 for the second quarter of 2010. The higher interest expense in the 2011 period reflects an increase in our borrowings under our line of credit.

*Income Taxes.* Income tax (benefit) expense was (\$377,610) for the second quarter of 2011, representing an effective tax rate of 18.2%, compared to \$131,148 for the second quarter of 2010, representing an effective tax rate of 7.0%. Effective tax rates in both periods represented estimates based on projected annual taxable income.

*Net (Loss) Income and Earnings Per Share.* Our net loss for the second quarter of 2011 was (\$1.7) million, or (\$.07) per share of Class A common stock and (\$.06) per share of Class B common stock, compared to net income of

\$1.7 million, or \$.07 per share of Class A common stock and \$.06 per share of Class B common stock, for the second quarter of 2010. We had 20.0 million and 19.9 million shares of our Class A shares outstanding for the second quarters of 2011 and 2010, respectively. We had 5.6 million

**Table of Contents**

Class B shares outstanding for both periods.

**Results of Operations Six Months Ended June 30, 2011 Compared to Six Months Ended June 30, 2010**

*Net Premiums Written.* Our insurance subsidiaries' net premiums written for the six months ended June 30, 2011 were \$230.1 million, an increase of \$34.8 million, or 17.8%, from the \$195.3 million of net premiums written for the comparable period of 2010. We primarily attribute the increase to net premiums written of \$24.5 million related to our acquisition of Michigan. Personal lines net premiums written increased \$13.9 million, or 10.7%, for the first half of 2011 compared to the first half of 2010. The increase included \$11.0 million from Michigan, with the remainder primarily attributable to pricing increases in the personal automobile and homeowners lines of business. Commercial lines net premiums written increased \$20.9 million, or 32.1%, for the first half of 2011 compared to the comparable period of 2010. The increase included \$13.4 million from Michigan, with the remainder attributable to increased writings of new accounts in the commercial automobile, commercial multi-peril and workers' compensation lines of business.

*Net Premiums Earned.* Our insurance subsidiaries' net premiums earned were \$208.8 million, an increase of \$24.4 million, or 13.2%, compared to \$184.4 million for the first half of 2010, reflecting increases in net premiums written during 2010 and 2011 that were partially offset by a \$2.8 million amortization adjustment related to the Michigan acquisition. As of the acquisition date, we eliminated Michigan's deferred acquisition costs and unearned commission income and recorded Michigan's obligations and rights under unexpired insurance and reinsurance contracts at their estimated fair value. We estimated the fair value adjustments by applying a market ceding commission rate to Michigan's unearned premiums and prepaid reinsurance premiums that resulted in a net reduction of Michigan's obligations. We are amortizing the ceding commission component of the fair value adjustments over the estimated remaining term of Michigan's policies in force as of the acquisition date and recording the amortization as a reduction in net premiums earned. Our insurance subsidiaries earn premiums and recognize them as revenue over the terms of their policies, which are one year or less in duration. Therefore, increases or decreases in net premiums earned generally reflect increases or decreases in net premiums written in the preceding 12 month period compared to the comparable period one year earlier.

*Investment Income.* Our net investment income increased to \$10.7 million for the first six months of 2011, compared to \$9.9 million for the comparable period of 2010. We attribute the increase primarily to an increase in our average invested assets from \$669.5 million for the first half of 2010 to \$750.0 million for the first half of 2011. The increase in our average invested assets reflects the additional invested assets we received as part of the Michigan acquisition.

*Net Realized Investment Gains.* Net realized investment gains for the first half of 2011 were \$4.7 million compared to \$2.0 million for the comparable period of 2010. The net realized investment gains for 2011 resulted primarily from the previously planned periodic sales of a portion of our holdings of an equity security that we obtained in an initial public offering and for which a selling restriction expired in April 2011. The net realized investment gains in 2010 resulted from normal turnover within our investment portfolio. We did not recognize any impairment losses during the first half of 2011 or 2010.

*Losses and Loss Expenses.* Our insurance subsidiaries' loss ratio, which is the ratio of incurred losses and loss expenses to premiums earned, for the first half of 2011 was 75.3%, an increase from our 74.0% loss ratio for the first half of 2010. Our insurance subsidiaries incurred increased weather-related losses during the first half of 2011 compared to the first half of 2010. Our insurance subsidiaries' commercial lines loss ratio decreased to 66.6% for the first half of 2011 compared to 69.5% for the first half of 2010, primarily due to decreases in the commercial multi-peril and workers' compensation loss ratios. The personal lines loss ratio increased to 78.8% for the first half of 2011, compared to 76.3% for the first half of 2010, primarily due to an increase in the homeowners loss ratio.

*Underwriting Expenses.* Our insurance subsidiaries' expense ratio, which is the ratio of policy acquisition costs and other underwriting expenses to premiums earned, for the first half of 2011 and 2010 was 32.7% and 32.0%, respectively. Our underwriting expenses include non-deferrable costs of Michigan in the amount of approximately \$1.2 million for which we will recognize offsetting ceding commissions over the terms of the policies to which the expenses related. Our GAAP expense ratio for the first half of 2011 reflects this additional expense.

*Combined Ratio.* Our insurance subsidiaries' combined ratio for the first half of 2011 and 2010 was 108.1% and 106.2%, respectively. The combined ratio represents the sum of the loss ratio, expense ratio

**Table of Contents**

and dividend ratio, which is the ratio of workers' compensation policy dividends incurred to premiums earned.

*Interest Expense.* Our interest expense for the first half of 2011 was \$1.0 million, compared to \$353,693 for the first half of 2010. The higher interest expense in the 2011 period reflects an increase in our borrowings under our line of credit.

*Income Taxes.* Our income tax expense was \$12,589 for the first half of 2011, representing an effective tax rate of 2.4%, compared to \$171,928 for the first half of 2010, representing an effective tax rate of 14.7%. Effective tax rates in both periods represented estimates based on our projected annual taxable income.

*Net Income and Earnings Per Share.* Our net income for the first half of 2011 was \$511,947, or \$.02 per share of Class A common stock and \$.02 per share of Class B common stock, compared to net income of \$2.0 million, or \$.08 per share of Class A common stock and \$.07 per share of Class B common stock, for the first half of 2010. We had 20.0 million and 19.9 million shares of our Class A shares outstanding for the first half of 2011 and 2010, respectively. We had 5.6 million Class B shares outstanding for both periods.

**Liquidity and Capital Resources**

Liquidity is a measure of an entity's ability to secure enough cash to meet its contractual obligations and operating needs as they arise. Our major sources of funds from operations are the net cash flows generated from our insurance subsidiaries' underwriting results, investment income and maturing investments.

We have historically generated sufficient net positive cash flow from our operations to fund our commitments and add to our investment portfolio, thereby increasing future investment returns. The impact of the pooling agreement between Donegal Mutual and Atlantic States has historically been cash flow positive because of the consistent underwriting profitability of the pool. We settle the pool monthly, thereby resulting in cash flows substantially similar to cash flows that would result from the underwriting of direct business. We have not experienced any unusual variations in the timing of claim payments associated with the loss reserves of our insurance subsidiaries. We maintain significant liquidity in our investment portfolio in the form of readily marketable fixed maturities, equity securities and short-term investments. We structure our fixed-maturity investment portfolio following a "laddering" approach, so that projected cash flows from investment income and principal maturities are evenly distributed from a timing perspective, thereby providing an additional measure of liquidity to meet our obligations should an unexpected variation occur in the future. Net cash flows provided by operating activities in the first six months of 2011 and 2010 were \$9.5 million and \$4.3 million, respectively, with the change in cash flows due primarily to decreased claim payments during the first six months of 2011.

As of June 30, 2011, we had \$54.5 million in outstanding borrowings under our line of credit and had the ability to borrow \$5.5 million at interest rates equal to M&T's current prime rate or the then current LIBOR rate plus between 1.75% and 2.25%, depending on our leverage ratio.

The following table shows our expected payments for significant contractual obligations as of June 30, 2011.

	Total	Less than 1 year	1-3 years (in thousands)	4-5 years	After 5 years
Net liability for unpaid losses and loss expenses of our insurance subsidiaries	\$220,258	\$99,192	\$100,016	\$9,395	\$11,655
Subordinated debentures	20,465				20,465
Borrowings under line of credit	54,500		54,500		
Total contractual obligations	\$295,223	\$99,192	\$154,516	\$9,395	\$32,120

We estimate the date of payment for the net liability for unpaid losses and loss expenses of our insurance subsidiaries based on historical experience and expectations of future payment patterns. We show the liability net of reinsurance recoverable on unpaid losses and loss expenses to reflect expected

**Table of Contents**

future cash flows related to such liability. Amounts Atlantic States assumes pursuant to the pooling agreement with Donegal Mutual represent a substantial portion of our insurance subsidiaries' gross liability for unpaid losses and loss expenses, and amounts Atlantic States cedes pursuant to the pooling agreement represent a substantial portion of our insurance subsidiaries' reinsurance recoverable on unpaid losses and loss expenses. We include cash settlement of Atlantic States' assumed liability from the pool in monthly settlements of pooled activity, as we net amounts ceded to and assumed from the pool. Although Donegal Mutual and we do not anticipate any changes in the pool participation levels in the foreseeable future, any such change would be prospective in nature and therefore would not impact the timing of expected payments by Atlantic States for its percentage share of pooled losses occurring in periods prior to the effective date of such change.

We estimate the timing of the amounts for the borrowings under our line of credit based on their contractual maturities we discuss in Note 7 – Borrowings. Our borrowings under our line of credit carry interest rates that vary as we discuss in Note 7 – Borrowings. Based upon the interest rates in effect as of June 30, 2011, our annual interest cost associated with our borrowings under our line of credit is approximately \$1.2 million. For every 1% change in the interest rate associated with our borrowings under our line of credit, the effect on our annual interest cost would be approximately \$545,000.

We estimate the timing of the amounts for the subordinated debentures based on their contractual maturities. We may redeem the debentures at our option, at par, on dates we discuss in Note 7 – Borrowings. We pay interest on our subordinated debentures at interest rates that vary as we discuss in Note 7 – Borrowings. Based upon the interest rates in effect as of June 30, 2011, our annual interest cost associated with our subordinated debentures is approximately \$868,000. For every 1% change in the three-month LIBOR rate, the effect on our annual interest cost would be approximately \$200,000.

On February 23, 2009, our board of directors authorized a share repurchase program pursuant to which we may purchase up to 300,000 shares of our Class A common stock at prices prevailing from time to time in the open market subject to the provisions of applicable SEC rules and in privately negotiated transactions. We purchased 50,058 and no shares of our Class A common stock under this program during the three months ended June 30, 2011 and 2010, respectively. We purchased 50,058 and 9,702 shares of our Class A common stock under this program during the six months ended June 30, 2011 and 2010, respectively. We have purchased a total of 67,429 shares of our Class A common stock under this program from its inception through June 30, 2011.

On July 21, 2011, our board of directors declared quarterly cash dividends of 12 cents per share for our Class A common stock and 10.75 cents per share for our Class B common stock, payable on August 15, 2011 to stockholders of record as of the close of business on August 1, 2011. We are not subject to any restrictions on our payment of dividends to our stockholders, although there are state law restrictions on the payment of annual dividends greater than 10% of statutory surplus by our insurance subsidiaries to us. Our insurance subsidiaries are required by law to maintain certain minimum surplus on a statutory basis and require prior approval of the applicable domiciliary insurance regulatory authorities for dividends in excess of 10% of statutory surplus. Our insurance subsidiaries are subject to risk-based capital ( RBC ) requirements. At December 31, 2010, our insurance subsidiaries' capital levels were each substantially above the applicable RBC requirements. At January 1, 2011, amounts available for distribution as dividends to us from our insurance subsidiaries without prior approval of their domiciliary insurance regulatory authorities were \$19.2 million from Atlantic States, \$0 from Southern, \$2.6 million from Le Mars, \$4.2 million from Peninsula, \$0 from Sheboygan and \$3.7 million from Michigan, all of which remained available at June 30, 2011.

As of June 30, 2011, we had no material commitments for capital expenditures.

**Equity Price Risk**

Our portfolio of marketable equity securities, which we carry on our consolidated balance sheets at estimated fair value, has exposure to the risk of loss resulting from an adverse change in prices. We manage this risk by performing an analysis of prospective investments and through regular reviews of our portfolio by our investment staff.

**Credit Risk**

Our portfolio of fixed-maturity securities and, to a lesser extent, our portfolio of short-term investments is subject to credit risk, which we define as the potential loss in market value resulting from

**Table of Contents**

adverse changes in the borrower's ability to repay its debt. We manage this risk by performing an analysis of prospective investments and through regular reviews of our portfolio by our investment staff. We also limit the percentage and amount of our total investment portfolio that we invest in the securities of any one issuer.

Our insurance subsidiaries provide property and casualty insurance coverages through independent insurance agencies. We bill the majority of this business directly to the insured, although we bill a portion of our commercial business through licensed insurance agents to whom our insurance subsidiaries extend credit in the normal course of business.

Because the pooling agreement does not relieve Atlantic States of primary liability as the originating insurer, Atlantic States is subject to a concentration of credit risk arising from business ceded to Donegal Mutual. Our insurance subsidiaries maintain reinsurance agreements with Donegal Mutual and with a number of other major unaffiliated authorized reinsurers.

**Impact of Inflation**

We establish property and casualty insurance premium rates before we know the amount of unpaid losses and loss expenses or the extent to which inflation may impact such expenses. Consequently, our insurance subsidiaries attempt, in establishing rates, to anticipate the potential impact of inflation.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

Our market risk generally represents the risk of gain or loss that may result from the potential change in the fair value of the securities we hold in our investment portfolio as a result of fluctuations in prices and interest rates and, to a lesser extent, our debt obligations. We manage our interest rate risk by maintaining an appropriate relationship between the average duration of our investment portfolio and the approximate duration of our liabilities, i.e., policy claims of our insurance subsidiaries and debt obligations.

Our investment mix shifted slightly due to a shift from lower-yielding short-term investments to fixed maturity investments during the first half of 2011. We have maintained approximately the same duration of our investment portfolio to our liabilities from December 31, 2010 to June 30, 2011.

There have been no material changes to our quantitative or qualitative market risk exposure from December 31, 2010 through June 30, 2011.

**Item 4. Controls and Procedures.**

**Evaluation of Disclosure Controls and Procedures**

We conducted an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to SEC Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we, including our consolidated subsidiaries, are required to disclose in our periodic filings with the SEC is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

**Table of Contents**

**Changes in Internal Control Over Financial Reporting**

There has been no change in our internal control over financial reporting during the quarter covered by this report that has materially affected, or is reasonably likely to affect materially, our internal control over financial reporting.

**Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995**

We base all statements contained in this report that are not historic facts on current expectations. Such statements are forward-looking in nature (as defined in the Private Securities Litigation Reform Act of 1995) and necessarily involve risks and uncertainties. Actual results could vary materially. The factors that could cause our actual results to vary materially from forward-looking statements we have previously made, include, but are not limited to, our ability to maintain profitable operations, the adequacy of the loss and loss expense reserves of our insurance subsidiaries, business and economic conditions in the areas in which we operate, interest rates, competition from various insurance and other financial businesses, terrorism, the availability and cost of reinsurance, legal and judicial developments, changes in regulatory requirements, our ability to integrate and manage successfully the companies we may acquire from time to time and other risks that we describe from time to time in our filings with the SEC. We disclaim any obligation to update such statements or to announce publicly the results of any revisions that we may make to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

**Item 4T. Controls and Procedures.**

Not applicable.

**Table of Contents****Part II. Other Information****Item 1. Legal Proceedings.**

None.

**Item 1A. Risk Factors.**

Our business, results of operations and financial condition, and, therefore, the value of our Class A common stock and Class B common stock, are subject to a number of risks. For a description of certain risks, we refer to Risk Factors in our 2010 Annual Report on Form 10-K filed with the SEC on March 14, 2011. There have been no material changes in the risk factors disclosed in that Form 10-K Report during the six months ended June 30, 2011.

**Item 2. Changes in Securities, Use of Proceeds and Issuer Purchases of Equity Securities.**

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
Month #1 April 1-30, 2011	Class A None Class B None	Class A None Class B None	Class A None Class B None	
Month #2 May 1-31, 2011	Class A 23,443 Class B 300	Class A \$13.49 Class B \$17.49	Class A 23,443 Class B 300	(1) (2)

Total	Class B 400	\$17.20	Class B 400	

(1) We purchased these shares pursuant to our announcement on February 23, 2009 that we will purchase up to 300,000 shares of our Class A common stock at market prices prevailing from time to time in the open market subject to the provisions of SEC Rule 10b-18 and in privately negotiated transactions. We may purchase up to 232,571 additional shares of our Class A common stock under this stock repurchase program.

(2)

Donegal Mutual purchased these shares pursuant to its announcement on August 17, 2004 that it will, at its discretion, purchase shares of our Class A common stock and Class B common stock at market prices prevailing from time to time in the open market subject to the provisions of SEC Rule 10b-18 and in privately negotiated transactions. Such announcement did not stipulate a maximum number of shares that may be purchased under this program.
