1. Business and Basis of Presentation

Business

Spectrum Pharmaceuticals, Inc. (Spectrum , the Company , we , our , or us) is a biotechnology company with integrated commercial and drug development operations, with a primary focus in both hematology and oncology. Our strategy is comprised of acquiring, developing and commercializing a broad and diverse pipeline of late-stage clinical and commercial products. We market two oncology drugs, ZEVALIN® and FUSILEV® and have two drugs, apaziquone and belinostat, in late stage development along with a diversified pipeline of novel drug candidates. We have assembled an integrated in-house scientific team, including formulation development, clinical development, medical research, regulatory affairs, biostatistics and data management, and have established a commercial infrastructure for the marketing of our drug products. We also leverage the expertise of our worldwide partners to assist in the execution of our strategy. Apaziquone is presently being studied in two large Phase 3 clinical trials for non-muscle invasive bladder cancer, or NMIBC, and is under strategic collaborations with Allergan, Inc., (Allergan), Nippon Kayaku Co. Ltd., (Nippon Kayaku), and Handok Pharmaceuticals Co. Ltd., (Handok). Belinostat, is being studied in multiple indications including a Phase 2 registrational trial for relapsed or refractory peripheral T-cell lymphoma, (PTCL), under a strategic collaboration with TopoTarget A/S (TopoTarget).

Basis of Presentation

We have prepared the accompanying unaudited condensed consolidated financial statements, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) for interim reporting. We have condensed or omitted certain information and footnote disclosures normally included in our annual financial statements prepared in accordance with generally accepted accounting principles (GAAP) pursuant to such rules and regulations. The unaudited condensed consolidated financial statements reflect all adjustments, which are normal and recurring, that are, in the opinion of management, necessary to fairly state the financial position as of September 30, 2011 and the results of operations and cash flows for the related interim periods ended September 30, 2011 and 2010. The results of operations for the three and nine months ended September 30, 2011 are not necessarily indicative of the results that may be expected for the year ending December 31, 2011 or for any other periods.

The condensed consolidated balance sheet at December 31, 2010 has been derived from the audited financial statements at that date but does not include all of the information and disclosures required by GAAP for complete financial statements.

Significant Accounting Policies

The accounting policies followed by us and other information are contained in the notes to our audited consolidated financial statements for the year ended December 31, 2010 included in our Annual Report on Form 10-K filed on March 10, 2011. We have not changed our significant accounting policies as of September 30, 2011. You should read this Quarterly Report on Form 10-Q in connection with the information contained in our Annual Report on Form 10-K filed on March 10, 2011.

Table of Contents

Segment and Geographic Information

We operate in one reportable segment: acquiring, developing and commercializing prescription drug products. Accordingly, we report the accompanying condensed consolidated financial statements in the aggregate, including all of our activities in one reportable segment. Foreign operations were not significant for any of the periods presented herein.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and disclosure of contingent obligations in the financial statements and accompanying notes. The estimation process requires assumptions to be made about future events and conditions, and as such, is inherently subjective and uncertain. Actual results could differ materially from our estimates.

Recent Accounting Pronouncements

In June 2011, the Financial Accounting Standards Board (FASB) issued an accounting standards update that eliminates the option to present components of other comprehensive income as part of the statement of changes in equity and requires an entity to present items of net income and other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This guidance also requires an entity to present on the face of the financial statements reclassification adjustments from other comprehensive income to net income. This guidance will be effective for fiscal years beginning after December 15, 2011, which will be our fiscal year 2012, with early adoption permitted. We do not expect the adoption of the guidance will have a material impact on our consolidated financial statements.

In May 2011, the FASB issued an accounting standards update that clarifies and amends the existing fair value measurement and disclosure requirements. This guidance will be effective prospectively for interim and annual periods beginning after December 15, 2011, which will be our fiscal year 2012, with early adoption prohibited. We do not expect the adoption of the guidance will have a material impact on our consolidated financial statements.

In December 2010, the FASB issued an accounting standards update that provides guidance on the recognition and classification of the annual fee imposed by the Patient Protection Act and Affordable Care Act as amended by the Health Care and Education Reconciliation Act on pharmaceutical companies that manufacture or import branded prescription drugs. Under this guidance, the annual fee should be estimated and recognized in full as a liability upon the first qualifying sale with a corresponding deferred cost that is amortized to operating expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year in which it is payable. The annual fee ranges from \$2.5 billion to \$4.1 billion for all affected entities in total, a portion of which will be allocated to us on the basis of the amount of our branded prescription drug sales for the preceding year as a percentage of the industry's branded prescription drug sales for the same period. The annual fee is not deductible for federal income tax purposes. This guidance became effective for calendar years beginning after December 31, 2010. We adopted the provisions of the guidance in the first quarter of 2011, and current estimates do not result in a material impact on our consolidated financial statements.

Table of Contents

In April 2010, the FASB issued an accounting standards update that provides guidance on the milestone method of revenue recognition for research and development arrangements. Under the milestone method contingent consideration received from the achievement of a substantive milestone is recognized in its entirety in the period in which the milestone is achieved, which we believe is more consistent with the substance of our performance under our various licensing and collaboration agreements. A milestone is defined as an event (i) that can only be achieved based in whole or in part on either the entity's performance or on the occurrence of a specific outcome resulting from the entity's performance, (ii) for which there is substantive uncertainty at the date the arrangement is entered into that the event will be achieved, and (iii) that would result in additional payments being due to the entity. A milestone is substantive if the consideration earned from the achievement of the milestone is consistent with our performance required to achieve the milestone or the increase in value to the collaboration resulting from our performance, relates solely to our past performance, and is reasonable relative to all of the other deliverables and payments within the arrangement. Our license and collaboration agreements with our partners provide for payments to us upon the achievement of development milestones, such as the completion of clinical trials or regulatory approval for drug candidates. As of September 30, 2011, our agreements with partners included potential future payments to us for development milestones totaling approximately \$323.0 million, including potential milestone payments totaling \$304.0 million and \$19.0 million from our agreements with Allergan and Handok Pharmaceuticals, respectively. Given the challenges inherent in developing and obtaining approval for pharmaceutical and biologic products, there was substantial uncertainty whether any such milestones would be achieved at the time these licensing and collaboration agreements were entered into. In addition, we evaluated whether the development milestones met the remaining criteria to be considered substantive. As a result of our analysis, we consider our development milestones to be substantive and, accordingly, we expect to recognize as revenue future payments received from such milestones as we achieve each milestone. The election to adopt the milestone method did not impact our financial position or results of operations as of and for the three month period ended September 30, 2011. However, this policy election may result in revenue recognition patterns for future milestones that are materially different from those recognized for milestones received prior to adoption.

Acquisitions and Collaborations

For all in-licensed products, pursuant to authoritative guidance issued by the FASB, we perform an analysis to determine whether we hold a variable interest or interests that give us a controlling financial interest in a variable interest entity. On the basis of our interpretations and conclusions, we determine whether the acquisition falls under the purview of variable interest entity accounting and if so, consider the necessity to consolidate the acquisition.

We also perform an analysis to determine if the inputs and/or processes acquired in an acquisition qualify as a business. On the basis of our interpretations and conclusions, we determine if the in-licensed products qualify as a business and whether to account for such products as a business combination or an asset acquisition. The excess of the purchase price over the fair value of the net assets acquired can only be recognized as goodwill in a business combination.

Variable Interest Entity

Our Canadian affiliate, Spectrum Pharma Canada, is owned 50% by us and was organized in Quebec, Canada in January 2008. We fund 100% of the expenditures and, as a result we are the party with the controlling financial interest. We are the primary beneficiary of Spectrum Pharma Canada, which is determined to be a variable interest entity. As a result of this characterization, it is consolidated in our financial statements as though it is a wholly-owned subsidiary. We have eliminated all intercompany balances and transactions among our consolidated entities from the consolidated financial statements.

Table of Contents**Basic and Diluted Earnings per Share**

We calculate basic and diluted net income (loss) per share using the weighted average number of common shares outstanding during the periods presented, and adjust the amount of net income (loss) used in this calculation for preferred stock dividends (if any) declared during the period. In periods of a net loss position, basic and diluted weighted average shares are the same. For the diluted earnings per share calculation, we adjust the weighted average number of common shares outstanding to include dilutive stock options, warrants and other common stock equivalents outstanding during the periods.

(in thousands, except share and per share data)	Net Income	Weighted-Average Shares Outstanding (Denominator)	Earnings Per Share
Three Months Ended September 30, 2011

----------------------	--	--	---------	--

Table of Contents**2. Cash, Cash Equivalents and Marketable Securities**

As of September 30, 2011, we held substantially all of our cash, cash equivalents and marketable securities at major financial institutions, which must invest our funds in accordance with our investment policy with the principal objectives of such policy being preservation of capital, fulfillment of liquidity needs and above market returns commensurate with preservation of capital. Our investment policy also requires that investments in marketable securities be in only highly rated instruments, which are primarily US treasury bills or US treasury backed securities, with limitations on investing in securities of any single issuer. To a limited degree, the Federal Deposit Insurance Corporation and third party insure these investments. However, these investments are not insured against the possibility of a complete loss of earnings or principal and are inherently subject to the credit risk related to the continued credit worthiness of the underlying issuer and general credit market risks. We manage such risks on our portfolio by investing in highly liquid, highly rated instruments and not investing in long-term maturity instruments.

Cash, cash equivalents and investments in marketable securities, including long term bank certificates of deposits, totaled \$160.8 million and \$104.2 million as of September 30, 2011 and December 31, 2010, respectively. Long term bank certificates of deposit include a \$500,000 restricted certificate of deposit that collateralizes tenant improvement obligations to the lessor of our principal offices. The following is a summary of such investments (in thousands):

	Gross		Gross		Estimated	Marketable Security	
	Amortized	Unrealized	Unrealized		fair	Current	Long
	Cost	Gains	Losses		Value		Term
September 30, 2011							
Cash and cash equivalents	\$ 110,293	\$	\$		\$ 110,293	\$ 110,293	\$
Bank CDs (including restricted certificate of deposit of \$500)	27,115				27,115		11,880
Money market currency funds	23,369				23,369		23,369
Other securities (included in other assets)	190	23			213		213
Total investments	\$ 160,967	\$ 23	\$		\$ 160,990	\$ 110,293	\$ 38,604
December 31, 2010							
Cash and cash equivalents	\$ 53,557	\$	\$		\$ 53,557	\$ 53,557	\$
Bank CDs (including restricted certificate of deposit of \$500)	29,985				29,985		8,569
Money market currency funds	15,488				15,488		15,488
U.S. Government securities	2,909				2,909		2,909
Corporate debt securities	2,304				2,304		2,304
Other securities (included in other assets)	35		9		26		26
Total investments	\$ 104,278	\$	\$ 9		\$ 104,269	\$ 53,557	\$ 42,117

Table of Contents**3. Fair Value Measurements**

The carrying values of our cash and cash equivalents, marketable securities and other securities, carried at fair value as of September 30, 2011 are classified in the table below in one of the three categories of the fair value hierarchy described below:

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
2011				
Assets:				
Cash and cash equivalents	\$ 110,293	\$	\$	\$ 110,293
Bank CDs		27,115		27,115
Money market currency funds		23,369		23,369
Cash and cash equivalents and marketable securities	110,293	50,484		160,777
Other securities	213			213
	\$ 110,506	\$ 50,484	\$	\$ 160,990

We measure fair value based on the prices that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based on a three-tier hierarchy that prioritizes the inputs used to measure fair value. These tiers include the following:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Observable prices that are based on inputs not quoted on active markets, but corroborated by market data. These inputs include quoted prices for similar assets or liabilities; quoted market prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3: Unobservable inputs are used when little or no market data is available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, we utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible, as well as consider counterparty credit risk in the assessment of fair value. Cash equivalents consist of certificates of deposit and are valued at cost, which approximates fair value due to the short-term maturities of these instruments. Marketable securities consist of certificates of deposit, US Treasury bills, US Treasury-backed securities and corporate deposits, which are stated at carrying value as it approximates fair value due to the short term maturities of these instruments.

Table of Contents

The following summarizes the activity of Level 3 inputs measured on a recurring basis for the nine months ended September 30, 2011:

	Fair Value Measurements of Common Stock Warrants Using Significant Unobservable Inputs (Level 3) (\$ in 000 s)
Balance at December 31, 2010	\$ 3,904
Adjustments resulting from change in value of warrants recognized in earnings	3,488
Adjustments resulting from exercise of warrants recognized in equity	(7,392)
Balance at September 30, 2011	\$

During the nine months ended September 30, 2011, the fair value of common stock warrants decreased approximately \$3.9 million due to the exercise of 3,747,312 warrants on or before September 15, 2011, for a total aggregate exercise price of \$24.8 million

We did not elect the fair value option, as allowed, to account for financial assets and liabilities that were not previously carried at fair value. Therefore, material financial assets and liabilities that are not carried at fair value, such as trade accounts receivable and payable, are reported at their historical carrying values.

4. Intangible Assets

Intangible assets consist of the following:

	September 30, 2011	December 31, 2010
	(\$ in 000 s)	
Zevalin intangibles	\$ 41,900	\$ 41,900
Fusilev intangibles	16,778	
	58,678	41,900
Less: accumulated amortization	(15,600)	(12,295)
	\$ 43,078	\$ 29,605

During the three and nine months ended September 30, 2011, Zevalin intangible amortization of \$1.3 million and \$3.3 million, respectively, are included in amortization of purchased intangibles. In addition, during the three months ended September 30, 2011, \$515,000 is included in cost of goods sold related to Fusilev Targent milestones.

Table of Contents**5. Inventories**

Inventories, net of allowances consisted of the following:

	September 30, 2011	December 31, 2010
	(\$ in 000 s)	
Raw materials	\$ 1,320	\$ 962
Work-in-process	2,253	
Finished goods	6,712	3,272
	\$ 10,285	\$ 4,234

We continually review product inventories on hand, evaluating inventory levels relative to product demand, remaining shelf life, future marketing plans and other factors, and record reserves for obsolete and slow-moving inventories for amounts which we may not realize.

6. Accounts payable and accrued obligations

Accounts payable and other accrued obligations consisted of the following:

	September 30, 2011	December 31, 2010
	(\$ in 000 s)	
Trade payables	\$ 9,475	\$ 8,734
Allowance for rebates	9,754	14,474
Accrued product royalty	8,008	4,026
Accrued milestone	5,000	
Allowance for returns	3,500	2,000
Accrued data and distribution fees	4,049	1,874
Allowance for chargebacks	560	350
Accrued income taxes	669	
Other accrued obligations	9,039	7,246
	\$ 50,054	\$ 38,704

7. Income Taxes

On an interim basis, we estimate what the anticipated annual effective tax rate will be and record a quarterly income tax provision in accordance with this anticipated annual rate. The effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as the valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, expected utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where we conduct business.

Our provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for the expected future tax benefit to be derived from tax loss and credit carryforwards. Deferred tax assets and liabilities are determined using the enacted tax rates in effect for the years in which those tax assets are expected to be realized. A valuation allowance is established when it is more likely

than not the future realization of all or some of the deferred tax assets will not be achieved. The evaluation of the need for a valuation allowance is performed on a jurisdiction by jurisdiction basis, and includes a review of all available positive and negative evidence. As of September 30, 2011 and December 31, 2010, we maintained a valuation allowance against deferred tax assets that we concluded have not met the more likely than not threshold. The change in the valuation allowance was primarily due to a corresponding change in a deferred tax asset that we determined required a valuation allowance.

Table of Contents

We recognize excess tax benefits associated with share-based compensation to stockholders' equity only when realized. When assessing whether excess tax benefits relating to share-based compensation have been realized, we follow the with-and-without approach, excluding any indirect effects of the excess tax deductions. Under this approach, excess tax benefits related to share-based compensation are not deemed to be realized until after the utilization of all other tax benefits available to us.

We recognize the impact of a tax position in our financial statements only if that position is more likely than not of being sustained upon examination by taxing authorities, based on the technical merits of the position. Any interest and penalties related to uncertain tax positions will be reflected in income tax expense.

8. Commitments and Contingencies

Facility Lease

We sublease our principal executive office in Henderson, Nevada under a non cancelable operating lease expiring April 30, 2014. We also lease our research and development facility in Irvine, California under a non cancelable operating lease expiring June 30, 2016. The lease agreements contain certain scheduled rent increases which are accounted for on a straight-line basis.

As part of our Irvine facility lease renewal in 2009, the landlord agreed to contribute up to approximately \$1.5 million toward the cost of tenant improvements. The tenant improvements were completed in the second quarter of 2010 at an aggregate cost of approximately \$1.4 million, of which, \$451,000 is being financed. This landlord contribution is being amortized on a straight-line basis over the term of the lease as a reduction to rent expense.

Licensing Agreements

We are developing almost all of our drug candidates pursuant to license agreements that provide us with rights in certain territories, among other things, to develop, sublicense, manufacture and sell the drugs. We are generally required to use commercially reasonable efforts to develop the drugs, and are generally responsible for all development, patent filing and maintenance, sales and marketing and liability insurance costs, and are generally contingently obligated to make milestone payments to the licensors if we successfully reach development and regulatory milestones specified in the license agreements. In addition, we are obligated to pay royalties and, in some cases, milestone payments based on net sales, if any, after marketing approval is obtained from regulatory authorities. The potential contingent development and regulatory milestone obligations under all of our licensing agreements are generally tied to progress through the various regulatory authorities' approval process, which approval significantly depends on positive clinical trial results. The following items are typical of such milestone events: conclusion of Phase 2 or commencement of Phase 3 clinical trials; filing of new drug applications in each of the United States, Europe and Japan; and approvals from each of the regulatory agencies in those jurisdictions.

In October 2008, we signed an exclusive development and commercialization collaboration agreement with Allergan for apaziquone. Under the terms of the agreement, Allergan paid us an up-front non-refundable \$41.5 million at closing and will make additional payments of up to \$304 million based on the achievement of certain development, regulatory and commercialization milestones. In November 2009, we entered into a collaboration agreement with Handok Pharmaceuticals of Korea for the development and commercialization of apaziquone for the treatment of non-muscle invasive bladder cancer in North and South Korea. Under the terms of the Handok collaboration agreement, Handok paid us an up-front payment of \$1.0 million and is required to pay potential milestone payments of approximately \$19.0 million. The potential milestones will be based on the achievement of certain regulatory and commercialization milestones. In June 2011, we amended the agreement with Allergan to, among other things, revise the target indications of additional clinical trials, and extend certain milestone dates, and to modify certain payment obligations and expense allocation provisions.

Table of Contents

In March 2006, we entered into an Asset Purchase Agreement with Targent, Inc. As part of the consideration for the purchase of certain assets, we agreed to pay milestone payments to Targent upon the achievement of certain regulatory events as well as for certain sales levels for Fusilev within a calendar year. In connection with the achievement of the FDA approval milestone in April 2011, we issued an aggregate amount of 733,715 shares of common stock to certain of Targent's stockholders, as directed by Targent. We capitalized \$6.3 million associated with this milestone as intangible assets during the three months ended June 30, 2011 which is being amortized over the estimated useful life of 8.7 years.

In addition, in the event that aggregate net sales of Fusilev, as defined in the agreement, exceed \$40 million and or \$100 million during any calendar year, we are to pay to Targent \$5 million in cash or the common stock equivalent thereof for each milestone. These milestone payments are in effect only with respect to the first calendar year in which aggregate net sales combined exceed such amount and not with respect to any subsequent calendar year in which aggregate net sales of the products combined exceed such amounts. In connection with the achievement of the first sales milestone of \$40 million in May 2011 we issued 577,367 shares of common stock to certain of Targent's stockholders, as directed by Targent. In September 2011, we achieved the second milestone of \$100 million and have capitalized an additional \$5 million for an aggregate with the first sales milestone of \$10.0 million associated with these milestones as intangible assets. The second milestone payment may be paid in cash or in shares of common stock at the Company's discretion within 45 days from September 30, 2011. In the event we determine to pay this milestone in stock, it will equate to 598,086 shares. These intangible assets are being amortized over the estimated useful life of 8.6 years. Included in cost of goods sold expense for the nine months ended September 30, 2011 is \$515,000 related to the amortization of these milestones.

Service Agreements

In connection with the research and development of our drug products, we have entered into contracts with numerous third party service providers, such as radio-pharmacies, distributors, clinical trial centers, clinical research organizations, data monitoring centers, and with drug formulation, development and testing laboratories. The financial terms of these contracts are varied and generally obligate us to pay in stages, depending on the occurrence of certain events specified in the contracts, such as contract execution, reservation of service or production capacity, actual performance of service, or the successful accrual and dosing of patients.

At each period end, we accrue for all costs of goods and services received, with such accruals based on factors such as estimates of work performed, patient enrollment, completion of patient studies and other events. Generally, we are in a position to accelerate, slow down or discontinue any or all of the projects that we are working on at any given point in time. Should we decide to discontinue and/or slow down the work on any project, the associated costs for those projects would be limited to the extent of the work completed. Generally, we are able to terminate these contracts due to the discontinuance of the related project(s) and can thus avoid paying for the services that have not yet been rendered and our future purchase obligations would reduce accordingly.

Employment Agreement

We have entered into an employment agreement with Dr. Rajesh C. Shrotriya, our President and Chief Executive Officer, which expires January 2, 2013. The employment agreement automatically renews for subsequent one-year calendar term unless either party gives written notice of such party's intent not to renew the agreement at least 90 days prior to the commencement of the new term. The employment agreement requires Dr. Shrotriya to devote his full working time and effort to our business and affairs during the term of the agreement. The employment agreement provides for a minimum annual base salary with annual increases, periodic bonuses and option grants as determined by the Compensation Committee of our Board of Directors.

Table of Contents**Litigation**

We are involved with various legal matters arising in the ordinary course of our business. Although the ultimate resolution of these various matters cannot be determined at this time, we do not believe that such matters, individually or in the aggregate, will have a material adverse effect on our consolidated results of operations, cash flows or financial condition.

9. Stockholder s Equity**Treasury Stock**

On June 13, 2011, our Board of Directors authorized the purchase of up to \$25 million of our outstanding common stock through the end of 2012. During the three months ended September 30, 2011, we purchased 353,055 shares of our common stock for an aggregate purchase price of \$2.8 million.

Repurchased shares have been recorded as treasury shares and will be held until the Company s Board of Directors designates that these shares be retired or used for other purposes.

Warrant Activity

We have issued warrants to purchase shares of our common stock to investors as part of financing transactions, or in connection with services rendered by consultants. Our outstanding warrants expire on varying dates through June 2015. Below is a summary of warrant activity during the nine months ended September 30, 2011:

	Common Stock Warrants	Weighted Average Exercise Price
Outstanding at December 31, 2010	4,192,312	\$ 6.45
Issued		
Exercised	(3,747,312)	6.62
Forfeited		
Expired		
Outstanding, at September 30, 2011	445,000	\$ 5.04
Exercisable, at September 30, 2011	420,000	\$ 5.11

Share-Based Compensation

We record share-based employee compensation expense for all equity-based programs, including stock options, restricted stock grants, management incentive plan, 401(k) plan matching and our employee stock purchase plan. Total expense recorded for the three and nine months periods ended September 30, is as shown below:

	Three Months Ended September 30,		Nine months Ended September 30,	
	2011	2010	2011	2010
	(\$ in 000 s)			
Research and development	\$ 280	\$ 253	\$ 1,179	\$ 2,111
Selling, general and administrative	4,056	1,803	14,037	4,156
Total share based compensation expense	\$ 4,336	\$ 2,056	\$ 15,216	\$ 6,267

Table of Contents**Stock Options**

During the three and nine month periods ended September 30, 2011, the Compensation Committee of our Board of Directors granted stock options at exercise prices equal to the closing price of our common stock on the trading day prior to the grant date. The weighted average grant date fair value of stock options granted during the nine months period ended September 30, 2011 and 2010 were estimated at approximately \$4.58 and \$2.53, respectively using the Black-Scholes option pricing model with the following assumptions:

	Nine-months ended September 30,	
	2011	2010
Divided yield	0.00%	0.00%
Expected volatility	70.04%	70.80%
Risk free interest rate	0.96%	2.06%
Expected life (years)	4.93	5.00

Share based compensation expense is recognized only for those awards that are ultimately expected to vest, and we have applied a forfeiture rate to unvested awards for the purpose of calculating the compensation cost. These estimates will be reversed in future periods if actual forfeitures differ from our estimates.

During the three and nine months ended September 30, 2011, our share-based charge in connection with the expensing of stock options was approximately \$1.5 million and \$7.0 million, respectively. During the three and nine months ended September 30, 2010, our share-based charge in connection with the expensing of stock options was approximately \$1.7 million and \$4.7 million, respectively.

As of September 30, 2011, there was approximately \$14.0 million of unrecognized stock-based compensation cost related to stock options which we expect to recognize over a weighted average period of approximately 2.36 years.

Restricted Stock

The fair value of restricted stock awards is the grant date closing market price of our common stock, and is charged to expense over the period of vesting. These awards are subject to forfeiture to the extent that the recipient's service is terminated prior to the shares becoming vested.

During the three and nine month periods ended September 30, 2011, the share-based charge in connection with the expensing of restricted stock awards was approximately \$260,000 and \$1.4 million, respectively. During the three and nine month periods ended September 30, 2010, the share-based charge in connection with the expensing of restricted stock awards was approximately \$121,000 and \$879,000, respectively.

As of September 30, 2011, there was approximately \$2.2 million of unrecognized share-based compensation cost related to non-vested restricted stock awards, which is expected to be recognized over a weighted average period of approximately 2.27 years.

401(k) Plan Matching Contribution

During the three and nine month periods ended September 30, 2011, we issued 16,683 and 53,307 shares of common stock, respectively, as our match of approximately \$145,000 and \$432,000, respectively, on the 401(k) contributions of our employees. During the three and nine month periods ended September 30, 2010, we issued 33,584 and 108,263 shares of common stock as our match of approximately \$134,000 and \$463,000, respectively, on the 401(k) contributions of our employees.

Table of Contents**Employee Stock Purchase Plan**

Effective July 2009, we adopted the 2009 Employee Stock Purchase Plan (Purchase Plan). The Purchase Plan provides our eligible employees with an incentive by providing a method whereby they may voluntarily purchase shares of our common stock upon terms described in the Purchase Plan. The Purchase Plan is designed to be operated on the basis of six consecutive month offering periods commencing January 1 and July 1 of each year. The Purchase Plan provides that eligible employees may authorize payroll deductions to purchase shares of our common stock at 85% of the fair market value of common stock on the first or last day of the applicable purchase period. A participant may purchase a maximum of 50,000 shares of common stock during a 6-month offering period, not to exceed \$25,000 worth of stock on the offering date during each plan year. The Purchase Plan terminates in 2019.

As of September 30, 2011, Purchase Plan participant contributions of \$132,818 are included in other accrued obligations in the accompanying condensed consolidated balance sheet. A total of 5,000,000 shares of common stock are authorized for issuance under the Purchase Plan, and as of September 30, 2011, 302,232 shares have been issued under the Purchase Plan.

Common Stock Reserved for Future Issuances

As of September 30, 2011, approximately 11.3 million shares of our common stock, when fully vested, were issuable upon conversion or exercise of rights granted under prior financing arrangements, stock options and warrants, as follows:

Conversion of Series E preferred shares	40,000
Exercise of stock options	10,788,934
Exercise of warrants	445,000
Total shares of common stock reserved for future issuances	11,273,934

10. Long-Term Retention and Management Incentive Plan

Effective April 22, 2011, our Board of Directors adopted a Long-Term Retention and Management Incentive Plan (the Incentive Plan) to provide equity and cash incentives for our principal executive officer, principal financial officer and certain other named executive officers. The Incentive Plan rewards long-term corporate performance, with a goal of helping to align the total compensation of the participants with the interests of our stockholders. The Incentive Plan provides that, upon the occurrence of certain events, defined as a \$750 million (the Initial Capitalization Target) and/or \$1 billion market capitalization target (the Subsequent Capitalization Target), each participant will be entitled to receive stock awards under our 2009 Incentive Award Plan, as amended, and cash awards upon a change in control. The Incentive Plan will terminate on April 22, 2016, the fifth anniversary of its effective date. The number of shares available for issuance under the Incentive Plan will not exceed 1,039,500 shares.

Table of Contents

The fair value of each stock award under the Incentive Plan was estimated on the date of the grant using the Monte Carlo valuation model and assumes that the Initial Capitalization Target will be achieved at 13 months and the Subsequent Capitalization Target will be achieved at 20 months (collectively referred to as the Service Life), from the effective date. The key inputs used to estimate the awards' fair value include the following:

Term of Incentive Plan	5 Years
Estimated trading days from grant to end of market condition period	1,260
Average stock price on date of grant	\$ 9.29
Number of common shares outstanding proximate to grant date	52,041,781
Maximum number of options expected to exercise during term	8,397,094
Expected annual stock volatility	65.0%
Expected return on common equity	15%

The fair value of these equity awards was determined to be approximately \$8.1 million and will be amortized over the respective Service Life. Included in selling, general and administrative expense was \$2.5 million and \$5.5 million, respectively, of compensation expense for the three and nine months ended September 30, 2011.

11. Deferred Compensation Plan

On September 2, 2011, the Board of Directors approved the Spectrum Pharmaceuticals, Inc. Deferred Compensation Plan (the Plan). The Plan is intended to comply with the requirements of Section 409A of the Internal Revenue Code of 1986, as amended. The Plan will be administered by the Compensation Committee of the board of directors, or a designee or designees of the Compensation Committee. The Plan is intended to be an unfunded plan which is maintained primarily to provide deferred compensation benefits for a select group of our employees including management, as selected by the Plan administrator (the Participants). Under the Plan, we will provide the Participants with the opportunity to make annual elections to defer up to a specified amount or percentage of their eligible cash compensation, as established by the Plan administrator, and we have the option to make discretionary contributions. At September 30, 2011, deferrals and contributions totaling \$95,236 are included in other accrued obligations in the accompanying condensed consolidated balance sheet.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, in reliance upon the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, statements regarding our future product development activities and costs, the revenue potential (licensing, royalty and sales) of our products and product candidates, the success, safety and efficacy of our drug products, revenues, development timelines, product acquisitions, liquidity and capital resources and trends, and other statements containing forward-looking words, such as, believes, may, could, will, expects, intends, estimates, anticipates, plans, seeks, continues, or variation thereon or similar terminology (although not all forward-looking statements contain these words). Such forward-looking statements are based on the reasonable beliefs of our management as well as assumptions made by and information currently available to our management. Readers should not put undue reliance on these forward-looking statements. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified; therefore, our actual results may differ materially from those described in any forward-looking statements. Factors that might cause such a difference include, but are not limited to, those discussed in our periodic reports filed with the Securities and Exchange Commission, or the SEC, including our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, as well as those discussed elsewhere in this Quarterly Report on Form 10-Q, and the following factors:

- our ability to successfully develop, obtain regulatory approval for and market our products;
 - our ability to continue to grow sales revenue of our marketed products;
 - risks associated with doing business internationally;
 - our ability to generate and maintain sufficient cash resources to fund our business;
 - our ability to enter into strategic alliances with partners for manufacturing, development and commercialization;
 - efforts of our development partners;
 - the ability of our manufacturing partners to meet our timelines;
 - the ability to timely deliver product supplies to our customers;
 - our ability to identify new product candidates and to successfully integrate those product candidates into our operations;
 - the timing and/or results of pending or future clinical trials, and our reliance on contract research organizations;
 - our ability to protect our intellectual property rights;
 - competition in the marketplace for our drugs;
- delay in approval of our products or new indications for our products by the U.S. Food and Drug Administration, or the FDA;
- actions by the FDA and other regulatory agencies, including international agencies;

Table of Contents

securing positive reimbursement for our products;
the impact of any product liability, or other litigation to which we are, or may become a party;
the impact of legislative or regulatory reform of the healthcare industry and the impact of recently enacted healthcare reform legislation;
the availability and price of acceptable raw materials and components from third-party suppliers, and their ability to meet our demands;
our ability, and that of our suppliers, development partners, and manufacturing partners, to comply with laws, regulations and standards, and the application and interpretation of those laws, regulations and standards, that govern or affect the pharmaceutical and biotechnology industries, the non-compliance with which may delay or prevent the development, manufacturing, regulatory approvals and sale of our products;
defending against claims relating to improper handling, storage or disposal of hazardous chemical, radioactive or biological materials could be time consuming and expensive;
our ability to maintain the services of our key executives and technical and sales and marketing personnel;
the difficulty in predicting the timing or outcome of product development efforts and regulatory approvals;
and
demand and market acceptance for our approved products.

We do not plan to update any such forward-looking statements and expressly disclaim any duty to update the information contained in this report except as required by law.

You should read the following discussion of our financial condition and results of our operations in conjunction with the condensed consolidated financial statements and the notes to those financial statements included in Item 1 of Part I of this quarterly report and our audited consolidated financial statements and related notes for the year ended December 31, 2010 included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Business Outlook

We are a biotechnology company with fully integrated commercial and drug development operations with a primary focus in both hematology and oncology. Our strategy is comprised of acquiring, developing and commercializing a broad and diverse pipeline of late-stage clinical and commercial products. We market two oncology drugs, ZEVALIN® and FUSILEV® and have two drugs, apaziquone and belinostat, in late stage development along with a diversified pipeline of novel drug candidates. We have assembled an integrated in-house scientific team, including formulation development, clinical development, medical research, regulatory affairs, biostatistics and data management, and have established a commercial infrastructure for the marketing of our drug products. We also leverage the expertise of our worldwide partners to assist in the execution of our strategy. Apaziquone is presently being studied in two large Phase 3 clinical trials for non-muscle invasive bladder cancer, or NMIBC, under strategic collaborations with Allergan, Inc., (Allergan), Nippon Kayaku Co. Ltd., (Nippon Kayaku), and Handok Pharmaceuticals Co. Ltd., (Handok). Belinostat, is being studied in multiple indications including a Phase 2 registrational trial for relapsed or refractory peripheral T-cell lymphoma, or PTCL, under a strategic collaboration with TopoTarget A/S TopoTarget .

Table of Contents

The following is an update of our business strategy for 2011, as described in our Annual Report on Form 10-K for the year ended December 31, 2010 filed with the SEC.

Maximizing the growth potential of our marketed drugs, Zevalin and Fusilev. Our near-term outlook largely depends on sales and marketing successes for our two marketed drugs. For Zevalin, we stabilized sales in 2009, increased sales in 2010 and continue to work on growing the Zevalin brand. For Fusilev, which we launched in August 2008, we were able to benefit from broad utilization in community clinics and hospitals and recognized a dramatic increase in sales beginning in the second half of 2010 due to a shortage of generic leucovorin. While generic leucovorin supplies and utilization have been negatively impacted by this shortage, we cannot predict how long the shortage may continue or the extent the shortage may ultimately have on Fusilev utilization. Our focus had previously been to obtain approval for Fusilev in advanced metastatic colorectal cancer, which we received on April 29, 2011. We are now actively engaged in marketing Fusilev for use in advanced metastatic colorectal cancer and have engaged a focused commercial sales organization to work with our commercial group to support efforts to grow Fusilev sales.

For both Zevalin and Fusilev, we initiated and continue to stage appropriate infrastructure expansions and additional initiatives to facilitate broad customer reach and to address other market requirements, as appropriate. We have formed a dedicated commercial organization comprised of highly experienced and motivated sales representatives, account managers, and a complement of other support marketing personnel to manage the sales and marketing of these drugs. In addition our scientific department supports field activities through various MDs, PhDs and other medical science liaison personnel.

Optimizing our development portfolio and maximizing the asset values of its components. While over the recent few years, we have evolved from a development-stage to a commercial-stage pharmaceutical company, we have maintained a highly focused development portfolio. Our strategy with regard to our development portfolio is to focus on late-stage drugs and to develop them rapidly to the point of regulatory approval. We plan to develop some of these drugs ourselves or with our subsidiaries and affiliates, or secure collaborations with third parties such that we are able to suitably monetize these assets.

We have assembled a drug development infrastructure that is comprised of highly experienced and motivated MDs, PhDs, clinical research associates and a complement of other support personnel to rapidly develop these drugs. During 2009, this team achieved our goal of completing enrollment in the two Phase 3 apaziquone trials (with more than 1,600 patients enrolled), expect to finish evaluation of the last patient in 2011 and file a NDA in 2012. We expect to continue to maximize the value of apaziquone through further developmental efforts and additional trials.

With regard to our anti-cancer drug belinostat, a novel HDAC inhibitor, we have to date opened more than 100 sites. We completed enrollment in September 2011, and expect to file a NDA in 2012. Belinostat has received Fast Track designation from FDA, which means, if the FDA agrees, we can start filing a rolling new-drug application even before the clinical package is ready, beginning with the filing of pre-clinical data and Chemistry Manufacturing and Control. We have several other exciting compounds in earlier stages of development in our portfolio. Based upon a criteria-based portfolio review, we are in the process of streamlining our pipeline drugs, allowing for greater focus and integration of our development and commercial goals.

Expanding our pipeline of late stage and commercial drugs through licensing and business development.

It is our goal to identify new strategic opportunities that will create strong synergies with our currently marketed drugs and identify and pursue partnerships for out-licensing certain of our drugs in development. To this end, we will continue to explore strategic collaborations as these relate to drugs that are either in advanced clinical trials or are currently on the market. We believe that such opportunistic collaborations will provide synergies with respect to how we deploy our internal resources. In this regard, we intend to identify and secure drugs that have significant growth potential either through enhanced marketing and sales efforts or through pursuit of additional clinical development. In January 2011, we signed a letter of agreement with Viropro, Inc., for the development of a biosimilar version of the monoclonal antibody drug rituximab. Biosimilars, or follow-on biologics, are terms used to describe officially-approved subsequent versions of innovator biopharmaceutical products made by a different sponsor following patent and exclusivity expiry. Under the agreement, we paid a nominal upfront payment and are required to make additional payments

based on certain development and regulatory milestones should we elect to continue development efforts. We believe our in-licensing of belinostat, a novel histone deacetylase, or HDAC, inhibitor, is also demonstrative of such licensing and business development efforts outlined above.

Table of Contents

Managing our financial resources effectively. We remain committed to fiscal discipline, a policy which has allowed us to become well capitalized among our peers, despite a very challenging capital markets environment during 2009, 2010 and continuing in 2011. This policy includes the pursuit of non-dilutive funding options, prudent expense management, and the achievement of critical synergies within our operations in order to maintain a reasonable burn rate. Even with the continued build-up in operational infrastructure to facilitate the marketing of our two commercial drugs, we intend to be fiscally prudent in any expansion we undertake. In terms of revenue generation, we plan to become more reliant on sales from currently marketed drugs and intend to pursue out-licensing of select pipeline drugs in select territories, as discussed above. When appropriate, we may pursue other sources of financing, including non-dilutive financing alternatives. While we are currently focused on advancing our key drug development programs, we anticipate that we will make regular determinations as to which other programs, if any, to pursue and how much funding to direct to each program on an ongoing basis, based on clinical success and commercial potential, including termination of our existing development programs, especially if we do not expect value being driven from continued development.

Further enhancing the organizational structure to meet our corporate objectives. We have highly experienced staff in pharmaceutical operations, clinical development, regulatory and commercial functions who previously held positions at both small to mid-size biotech companies, as well as large pharmaceutical companies. We have strengthened the ranks of our management team, and will continue to pursue talent on an opportunistic basis. Finally, we remain committed to running a lean and efficient organization, while effectively leveraging our critical resources.

Financial Condition

Liquidity and Capital Resources

Our cumulative losses, since inception in 1987 through September 30, 2011, are approximately \$270.2 million. We may incur additional losses for at least the next few years, as we implement our growth strategy of commercializing marketed drugs, while continuing to develop our portfolio of late-stage drug products. Our long-term strategy is to generate profits from the sale and licensing of our drug products. Accordingly, in the next several years, we expect to supplement our cash position with sales of Zevalin and Fusilev and generate licensing revenue from out-licensing our other drug products.

We believe that the approximately \$160.8 million in cash, cash equivalents and investments, which includes long term marketable securities, we had available on September 30, 2011 will allow us to fund our current planned operations for at least the next twelve to eighteen months. However, we may seek to obtain additional capital through the sale of debt or equity securities, if necessary, especially in conjunction with opportunistic acquisitions or license of drugs. We may be unable to obtain such additional capital when needed, or on terms favorable to us or our stockholders, if at all. If we raise additional funds by issuing equity securities, the percentage ownership of our stockholders will be reduced, stockholders may experience additional dilution or such equity securities may provide for rights, preferences or privileges senior to those of the holders of our common stock. If we raise additional funds through the issuance of debt securities, the terms of such securities may place restrictions on our ability to operate our business. If and when appropriate, just as we have done in the past, we may pursue non-dilutive financing alternatives as well.

Table of Contents

Zevalin sales growth is largely dependent on the adoption of Zevalin for use as part of first-line therapy for follicular non-Hodgkin's lymphoma, or NHL and continued use in its initial indication. As discussed earlier, during 2010 and through September 30, 2011, our sales of Fusilev grew considerably over prior years because of a shortage of generic leucovorin. We are unable to predict how long this current shortage may last. On April 29, 2011 we received approval from the U.S. Food and Drug Administration (FDA) for the use of FUSILEV® (levoleucovorin) in combination with 5-fluorouracil in the palliative treatment of patients with advanced metastatic colorectal cancer. This new, expanded indication supplements the original 2008 FDA approval of FUSILEV. This approval now allows us to actively market Fusilev for use in the treatment of colorectal cancer.

With regard to estimated future development expenditures, our drug development efforts are subject to the considerable uncertainty inherent in any new drug development. Due to the uncertainties involved in progressing through clinical trials, and the time and cost involved in obtaining regulatory approval and in establishing collaborative arrangements, among other factors, we cannot reasonably estimate the timing, completion dates, and ultimate aggregate cost of developing each of our drug product candidates. Accordingly, the following discussion of our current assessment of expenditures may prove inadequate and our assessment of the need for cash to fund our operations may prove too optimistic.

Our expenditures for research and development consist of direct product specific costs, including, but not limited to, upfront license fees, milestone payments, active pharmaceutical ingredients, clinical trials, patent related costs, and non-product specific, or indirect, costs. During the nine-month period ended September 30, 2011, our total research and development expenditure, including indirect expenditures, was approximately \$20.9 million (net of \$5.8 million received from Allergan).

Our primary focus areas for the foreseeable future, and the programs that we expect to represent a significant part of our research and development are the on-going registrational clinical trials of apaziquone and belinostat and additional clinical studies in supporting the expanded utilization of our FDA approved products (ZEVALIN and FUSILEV). While we are currently focused on advancing these key product development programs, we continually evaluate our research and development programs with respect to other pipeline products in response to the scientific and clinical successes of each product candidate, as well as an ongoing assessment as to the product candidate's commercial potential. Our anticipated net use of cash for research and development in the fiscal year ending December 31, 2011, excluding the cost of in-licensing or acquisitions of additional drugs, if any, is expected to range between approximately \$25 and \$30 million.

Further, while we do not receive any funding from third parties for research and development that we conduct, co-development and out-licensing agreements with other companies for any of our drug products may reduce our expenses. In this regard, we entered into a collaboration agreement with Allergan whereby, commencing January 1, 2009, Allergan has borne 65% of the development costs of apaziquone. Additionally, we entered into a collaboration agreement with TopoTarget, whereby, commencing February 2, 2010, TopoTarget bears, for belinostat, 100% of the CUP trial costs and 30% of other development costs unrelated to the PTCL study.

In addition to our present portfolio of drug product candidates, we continually evaluate proprietary products for acquisition. If we are successful in acquiring rights to additional products, we may pay up-front licensing fees in cash and/or common stock and our research and development expenditures would likely increase.

Net Cash Provided by Operating Activities

Net cash provided by operating activities was \$32.3 million for the nine months ended September 30, 2011. The principal components of such cash provided by operations was net income in the period of \$40.2 million plus net non-cash credits of \$13.7 million, offset primarily by a \$26.9 million increase in accounts receivable as a result of increased product sales.

Table of Contents***Net Cash Used in Investing Activities***

Net cash used in investing activities was \$356,000 during the nine months ended September 30, 2011, which was primarily due to acquisitions of property and equipment of \$380,000 and purchases of available for sale securities of \$164,000.

Net Cash Provided by Financing Activities

Net cash provided by financing activities was \$24.8 million for the nine months ended September 30, 2011, primarily relates to \$24.8 million in proceeds from the issuance of common stock as a result of the exercise of approximately 3.7 million warrants and \$2.8 million related to the exercise of stock options and purchases of shares under our Employee Stock Purchase Plan. These proceeds were partially offset by a payment of \$2.8 million to repurchase stock under our stock repurchase program.

Results of Operations***Three months ended September 30, 2011 and 2010***

Revenues. Revenues increased \$34.3 million, or 205%, to \$51.0 million in the three months ended September 30, 2011 from \$16.7 million in the three months ended September 30, 2010. We recognized \$47.9 million from product sales, of which \$41.0 million related to sales of FUSILEV and \$6.9 million related to sales of ZEVALIN (each net of estimates for promotional, price and other adjustments, including adjustment of the allowance for product returns). Product revenues recorded in the three months ended September 30, 2010 were \$13.7 million, of which \$6.0 million related to sales of FUSILEV and \$7.7 million related to sales of ZEVALIN. Revenues from the sales of FUSILEV have increased due to FDA approval of FUSILEV for use in the treatment of advanced metastatic colorectal cancer received on April 29, 2011 and a supply disruption of generic leucovorin. Sales of FUSILEV grew significantly in the third and fourth quarter of 2010 and have continued through September 2011. We are unable to determine how long the current disruption in supplies of generic leucovorin will last. During each of the three months ended September 30, 2011 and 2010, we also recognized \$3.1 million of licensing revenues from the amortization of a \$41.5 million upfront payment we received from Allergan in 2008, and a \$16.0 million upfront payment we received from Nippon Kayaku and Handok in the first quarter of 2010.

Cost of Product Sales. Cost of product sales increased \$5.1 million to \$8.8 million in the three months ended September 30, 2011 from \$3.8 million in the three months ended September 30, 2010. The increase in total cost of product sales relates to an increase in product revenues, start up costs incurred for new suppliers and an increase of \$344,000 for the amortization of certain milestones.

Selling, General and Administrative. Selling, general and administrative expenses increased \$4.4 million, or 39%, to \$15.8 million, in the three months ended September 30, 2011 from \$11.4 million in the three months ended September 30, 2010. The increase is primarily due to an increase of approximately \$2.3 million in stock compensation expense relating to the long-term retention and management incentive plan adopted during the second quarter of 2011 and a \$1.5 million increase in compensation and associated benefits attributable to the expansion of our sales force. We expect that expenses associated with sales and marketing activities will increase as we invest in additional commercial resources to increase market expansion of FUSILEV for its recently approved indication in colorectal cancer.

Research and Development. Research and development expenses decreased \$97,000, or 1%, to \$7.4 million, in the three months ended September 30, 2011 from \$7.5 million in the three months ended September 30, 2010. The decrease is primarily due to a one-time charge of \$1.7 million for an asset acquisition of in process research and development in July 2010 which was partially offset by an increase in on-going clinical trial expense incurred in 2011. We expect research and development expenses to range between approximately \$25 and \$30 million for the year ending December 31, 2011, excluding the cost of in-licensing or acquisitions of additional drugs, if any.

Table of Contents

Amortization of Purchased Intangibles. We incurred a non-cash charge of \$930,000 for each of the three months ended September 30, 2011 and 2010 due to the amortization of intangibles from the acquisition of ZEVALIN.

Change in Fair Value of Common Stock Warrant Liability. We recorded income of \$3.0 million for the change in the fair value of the warrant obligations during the three month period ended September 30, 2011 compared to income of \$1.6 million in the same period of 2010. The change in fair value of the common stock warrant liability was due to the exercise of approximately 3.7 million of the then outstanding warrants.

Other Net Income (loss). The principal components of other net income (loss) of \$(144,000) and \$578,000 during the three month periods ended September 30, 2011 and 2010, respectively, consisted of currency gains and losses and net interest income. In the current economic environment, our principal investment objective is preservation of capital. Accordingly, for the foreseeable future we expect to earn minimal interest yields on our investments, until such time as the credit markets recover.

Provision for Income Taxes. We recorded a provision for income taxes of \$650,000 during the three months ended September 30, 2011 as compared to a \$79,000 refund in 2010.

Nine months ended September 30, 2011 and 2010

Revenues. Revenues increased \$99.8 million, or 249%, to \$140.0 million in the nine months ended September 30, 2011 from \$40.2 million in the nine months ended September 30, 2010. We recognized \$130.8 million from product sales, of which \$109.6 million related to sales of FUSILEV and \$21.2 million related to sales of ZEVALIN (each net of estimates for promotional, price and other adjustments, including adjustment of the allowance for product returns). Product revenues recorded in the nine months ended September 30, 2010 were \$30.1 million, of which \$9.0 million related to sales of FUSILEV and \$21.1 million related to sales of ZEVALIN. Revenues from the sales of FUSILEV have increased due to FDA approval of FUSILEV for use in the treatment of advanced metastatic colorectal cancer received on April 29, 2011 and a supply disruption of generic leucovorin. Sales of FUSILEV grew significantly in the third and fourth quarter of 2010 which have continued through September 2011. We are unable to determine how long the current disruption in supplies of generic leucovorin will last. During the nine months ended September 30, 2011 and 2010, we also recognized \$9.2 million and \$10.1 million, respectively, of licensing revenues from the amortization of a \$41.5 million upfront payment we received from Allergan in 2008, and a \$16.0 million upfront payment we received from Nippon Kayaku and Handok in the first quarter of 2010.

Cost of Product Sales. Cost of product sales increased \$12.9 million to \$23.6 million in the nine months ended September 30, 2011 from \$10.6 million in the nine months ended September 30, 2010. The increase in total cost of product sales relates to an increase in product revenues, start up costs incurred for new suppliers and an i
