

INDEPENDENT BANK CORP

Form 10-Q

May 09, 2008

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2008
Commission File Number: 1-9047
Independent Bank Corp.
(Exact name of registrant as specified in its charter)

Massachusetts
(State or other jurisdiction of
incorporation or organization)

04-2870273
(I.R.S. Employer
Identification No.)

288 Union Street, Rockland, Massachusetts 02370
(Address of principal executive offices, including zip code)
(781) 878-6100

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of May 1, 2008, there were 16,268,126 shares of the issuer's common stock outstanding, par value \$0.01 per share.

CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 BASIS OF PRESENTATION

Independent Bank Corp. (the Company) is a state chartered, federally registered bank holding company headquartered in Rockland, Massachusetts, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company (Rockland Trust or the Bank), a Massachusetts trust company chartered in 1907. The Company was the sponsor of Delaware statutory trusts named Independent Capital Trust III (Trust III), Independent Capital Trust IV (Trust IV), and is currently the sponsor of Independent Capital Trust V (Trust V) a Delaware statutory trust and Slade's Ferry Statutory Trust I (Slade's Ferry Trust I) a Connecticut statutory trust, each of which were formed to issue trust preferred securities.

The proceeds which the Company derived from Trust V were used on December 31, 2006 and April 30, 2007 to redeem all of the outstanding trust preferred securities of Trust III and Trust IV, respectively. Trust III and Trust IV have been dissolved. Slade's Ferry Trust I was an existing statutory trust of Slade's Ferry Bancorp. (see Note 10, Acquisition hereof). Trust V and Slade's Ferry Trust I are not included in the Company's consolidated financial statements in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46R (FIN 46R).

As of March 31, 2008 the Bank had the following corporate subsidiaries, all of which were wholly-owned by the Bank and were included in the Company's consolidated financial statements:

Six Massachusetts security corporations, namely Rockland Borrowing Collateral Securities Corp., Rockland IMG Collateral Securities Corp., Rockland Deposit Collateral Securities Corp., Taunton Avenue Securities Corp., Slade's Ferry Securities Corporation, and Slade's Ferry Security Corporation II, which hold securities, industrial development bonds, and other qualifying assets;

Rockland Trust Community Development Corporation (the Parent CDE) which, in turn, has two wholly-owned corporate subsidiaries named Rockland Trust Community Development LLC (RTC CDE I) and Rockland Trust Community Development Corporation II (RTC CDE II). The Parent CDE, CDE I, and CDE II were all formed to qualify as community development entities under federal New Markets Tax Credit Program criteria.

Compass Exchange Advisors LLC (CEA LLC) which provides like-kind exchange services pursuant to section 1031 of the Internal Revenue Code; and

Slade's Ferry Realty Trust which was established to manage Slade's Ferry's land and buildings.

All material intercompany balances and transactions have been eliminated in consolidation. When necessary, certain amounts in prior periods' financial statements have been reclassified to conform to the current period presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended March 31, 2008 are not necessarily indicative of the results that may be expected for the year ended December 31, 2008 or any other interim period.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007 filed with the Securities and Exchange Commission.

NOTE 2 STOCK BASED COMPENSATION

On February 14, 2008 the Company awarded options to purchase 201,000 shares of common stock from the 2005 Employee Stock Plan to certain officers of the Company and/or the Bank. The expected volatility, expected life, expected dividend yield, and expected risk free interest rate for this grant used to determine their fair value were determined on February 14, 2008 and were 25%, 5 years, 2.44%, and 2.79%, respectively. The options have been determined to have a fair value of \$5.63 per share. The options vest over a five year period and have a contractual life of ten years from date of grant.

NOTE 3 RECENT ACCOUNTING DEVELOPMENTS

Accounting Pronouncements Adopted in 2008

Statement of Financial Accounting Standards No. 157 (SFAS 157), Fair Value Measurements In September 2006, the FASB issued SFAS 157. SFAS 157 was issued to provide consistency and comparability in determining fair value measurements and to provide for expanded disclosures about fair value measurements. The definition of fair value maintains the exchange price notion in earlier definitions of fair value but focuses on the exit price of the asset or liability. The exit price is the price that would be received to sell the asset or paid to transfer the liability adjusted for certain inherent risks and restrictions. Expanded disclosures are also required about the use of fair value to measure assets and liabilities. In February 2008, the FASB issued Staff Position (FSP) 157-2, Effective Date of FASB statement No. 157. The FSP delays the effective date of SFAS 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually). The effective date is for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company adopted SFAS 157 as of January 1, 2008. The Company has determined that the impact of the adoption of SFAS 157 on the Company's consolidated financial position was not material. See Note 4 for the Company's expanded disclosures on its fair value measurement policies and fair value measurements as of March 31, 2008,

SFAS No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities In February 2007, the FASB issued SFAS 159. SFAS 159 allows entities to choose to measure financial instruments and certain other items at fair value. By doing so, companies can mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting. The fair value option can be applied on an instrument by instrument basis (with some exceptions), is irrevocable unless a new election date occurs, and is applied only to entire instruments and not to portions of instruments. The effective date is as of the beginning of the first fiscal year beginning after November, 15, 2007. Early adoption is permissible as of the beginning of the fiscal year that begins before November 17, 2007 provided that SFAS No. 157, Fair Value Measurements, is adopted as well. The provisions of SFAS 159 were effective as of January 1, 2008. The Company has not elected the fair value option under SFAS 159 for any instrument, but may elect to do so in future periods.

Emerging Issues Task Force (EITF) 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements In September 2006, the FASB ratified the consensus reached by the EITF on EITF 06-4. EITF addresses accounting for split-dollar life insurance arrangements whereby the employer purchases a policy to insure the life of an employee or a director, and separately enters into an agreement to split the policy benefits between the employer and the employee/director. The EITF states that an obligation arises as a result of a substantive agreement with an employee or director to provide future postretirement benefits. Under EITF 06-4, the obligation is not settled upon entering into an insurance arrangement. Since the obligation is not settled, a liability should be recognized in accordance with applicable authoritative guidance. EITF 06-4 is effective for fiscal years beginning after December 15, 2007. In prior reporting periods EITF 06-4 was not applicable to the Company as it did not have any split dollar life insurance arrangements that fall under this guidance. However, upon acquiring Slade s Ferry Bancorp. (see Note 10, Acquisition, hereof) effective March 1, 2008, the Company now has such split dollar life insurance arrangements categorized as Bank Owned Life Insurance on its balance sheet and has a related liability of \$1.2 million at March 31, 2008.

EITF 06-10, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements In March 2007, the FASB ratified the consensus reached by the EITF on EITF 06-10. EITF 06-10 will require employers to recognize a liability for the postretirement benefit related to a collateral assignment split-dollar life insurance arrangement if the employer remains subject to the risks or rewards associated with the underlying insurance contract (in the postretirement period) that collateralizes the employer s asset. Additionally, an employer should recognize and measure an asset based on the nature and substance of the collateral assignment split-dollar life insurance arrangement by assessing what future cash flows the employer is entitled to, if any, as well as the employee s obligation and ability to repay the employer. The employer s asset should be limited to the amount of the cash surrender value of the insurance policy, unless the arrangement requires the employee (or retiree) to repay the employer irrespective of the amount of the cash surrender value of the insurance policy (and assuming the employee (or retiree) is an adequate credit risk), in which case the employer should recognize the value of the loan including accrued interest, if applicable. EITF 06-10 is effective for fiscal years beginning after December 15, 2007, with earlier application permitted. Entities should recognize the effects of applying EITF 06-10 through either a change in accounting principle

through a cumulative-effect adjustment to retained earnings in the statement of financial position as of the beginning of the year of adoption or through a change in accounting principle through retrospective application to all prior periods. The Company adopted EITF 06-10 as of January 1, 2008. The Company has determined there was no impact upon the adoption of EITF 06-10 on the Company's consolidated financial position.

EITF 06-11, Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards In June 2007, the FASB ratified the consensus reached by the EITF on EITF 06-11. EITF 06-11 requires that realized income tax benefits from dividends or dividend equivalents that are charged to retained earnings and are paid to employees for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options be recognized as an increase to additional paid-in capital. The amount recognized in additional paid-in capital for the realized income tax benefit from dividends on those awards should be included in the pool of excess tax benefits available to absorb tax deficiencies on share-based payment awards. EITF 06-11 should be applied prospectively to the income tax benefits that result from dividends on equity-classified employee share-based awards that are declared in fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. The Company adopted EITF 06-11 as of January 1, 2008. The impact of the adoption of EITF 06-11 on the Company's consolidated financial position was not material. It is possible that additional restricted stock awards, or other share based payment awards addressed by this EITF, would be granted in future periods and that the amount of dividends paid per share could change the impact of EITF 06-11 on the Company's consolidated statements of financial position.

Staff Accounting Bulletin No. 109 (SAB 109), Written Loan Commitments Recorded at Fair Value Through Earnings. In November 2007, the SEC issued SAB No. 109, Written Loan Commitments Recorded at Fair Value Through Earnings. SAB 109 supersedes SAB No. 105, Application of Accounting Principles to Loan Commitments, and indicates that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. The guidance in SAB 109 is applied on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The adoption of SAB 109 on January 1, 2008 did not have a material impact on the Company's consolidated financial statements.

New Accounting Pronouncements Not Yet Adopted

SFAS No. 141 (revised 2007) (SFAS 141R), Business Combinations In December 2007, the FASB issued SFAS 141R. SFAS 141R replaces FASB Statement No. 141 (SFAS 141), Business Combinations, but retains the fundamental requirements in SFAS 141 that the acquisition method of accounting (which SFAS 141 called the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. It also retains the guidance in SFAS 141 for identifying and recognizing intangible assets separately from goodwill. However, SFAS 141R's scope is broader than that of SFAS 141. SFAS 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. For any business combinations entered into by the Company subsequent to January 1, 2009, the Company will be required to apply the guidance in SFAS 141R.

SFAS No. 160 (SFAS 160), Noncontrolling Interests in Consolidated Financial Statements An Amendment of ARB No. 51 In December 2007, the FASB issued SFAS 160. SFAS 160 amends ARB 51, Consolidated Financial Statements, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 changes the way the consolidated income statement is presented. It requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. It also requires disclosure, on the face of the consolidated statement of income, of the amounts of consolidated net income attributable to the parent and to the noncontrolling interest. It establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation, and requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. The effective date is for fiscal years beginning on or after December 15, 2008, and interim periods within those fiscal years. Earlier adoption is prohibited. This Statement shall be applied prospectively as of the beginning of the fiscal year in which this Statement is initially applied, except for the presentation and disclosure requirements. The presentation and disclosure requirements shall be applied retrospectively for all periods presented. The Company has not yet determined the impact of the adoption of SFAS 160 to the Company's statement of financial position or results of operations.

SFAS No. 161 (SFAS 161), Disclosures about Derivative Instruments and Hedging Activities In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. This Statement amends SFAS No. 133, Derivative Instruments and Hedging Activities to require enhanced disclosures about an entity's derivative and hedging activities, thereby improving the transparency of financial reporting. This Statement is effective for fiscal years beginning on or after November 15, 2008. Earlier adoption is encouraged. The Company has not yet determined the impact of the adoption of SFAS 161 to the Company's statement of financial position or results of operations.

NOTE 4 FAIR VALUE DISCLOSURE

SFAS No. 157, Fair Value Measurements, defines fair value, and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS No. 157 are described below:

Level 1 Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or Level 2 to Level 3.

Pursuant to FSP 157-2, the Company did not adopt SFAS 157 for nonfinancial assets or nonfinancial liabilities that are recorded or disclosed at fair value on a non-recurring basis. These include other real estate owned, goodwill, and other identifiable intangible assets. The Company is currently evaluating the impact of SFAS 157 on nonfinancial assets and liabilities.

Valuation Techniques

There have been no changes in the valuation techniques used during the current period.

Cash and Due from Banks

The Company's cash instruments are classified within Level 1 of the hierarchy because they are valued using quoted market prices or broker or dealer quotations.

Acquired Certificates of Deposit

Acquired certificates of deposits from Slades Ferry were valued using an average of quoted rates as of the date of acquisition. These deposits are categorized as Level 2.

Acquired Deposits - Other

Acquired deposits from Slades Ferry (other than certificates of deposit), including demand deposits, savings & interest checking, and money market deposits were valued based upon the lack of contractual maturity and the deposits being withdrawable on demand. These deposits are categorized as Level 2.

Trading Income Securities

These equity and fixed income securities are valued based on quoted prices from the market. These securities are categorized in Level 1 as they are actively traded and no valuation adjustments have been applied.

Collateralized Mortgage Obligations

The valuation model for these securities is volatility-driven and ratings based, and uses multi-dimensional spread tables. The inputs used include benchmark yields, recent reported trades, new issue data, broker and dealer quotes and collateral performance. These securities are categorized as Level 2.

Corporate Bonds

The fair value is estimated using market prices (to the extent they are available and observable), recently executed transactions, and bond spreads. Corporate bonds are categorized as Level 2.

Mortgage-backed Securities

The fair value is estimated using either a matrix or benchmarks. The inputs used include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. These securities are categorized as Level 2.

Municipal Bonds

The fair value is estimated using a valuation matrix with inputs including bond interest rate tables, recent transactions, and yield relationships. Municipal bonds are categorized as Level 2 within the fair value hierarchy.

Derivatives

Derivative Financial Instruments

The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The derivative financial instruments are categorized as Level 2 of the fair value hierarchy.

Residential Mortgage Loan Commitments and Forward Sales Agreements

The fair value of the commitments and agreements are estimated using the anticipated market price based on pricing indications provided from syndicate banks. These commitments and agreements are categorized as Level 2.

Acquired Loans

The fair value of the acquired loan portfolio from Slades Ferry was calculated using a discounted cash flow model as of the date of acquisition. The inputs varied for the different types of loans, and included market rates, the relevant SWAP curves, and industry standards for prepayment charges. For revolving lines the book value was assumed to be the market value. The acquired loans are categorized as Level 2.

Collateral Dependent Loans Impaired under SFAS 114

Loans that are deemed to be impaired in accordance with SFAS No. 114, Accounting by Creditors for Impairment of a Loan, are valued based upon the lower of cost or fair value of the underlying collateral. The inputs used in the appraisals of the collateral are observable, and therefore the loans are categorized in Level 2 of the fair value hierarchy.

Acquired Borrowings

The acquired borrowings of Slades Ferry were valued by adding a fair value adjustment, as well as additional costs to exit when applicable, to the principal as of the acquisition date. The fair value adjustment was calculated using market rates. The acquired borrowings are categorized as Level 2.

Assets and Liabilities Measured at Fair Value on a Recurring Basis as of March 31, 2008 are as follows:

Description	Fair Value Measurements at Reporting Date Using			
	Balance as of March 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1) (Dollars in Thousands)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

NOTE 5 EARNINGS PER SHARE

Basic earnings per share (EPS) are calculated by dividing net income by the weighted average number of common shares (excluding shares of unvested restricted stock) outstanding before any dilution during the period. Diluted earnings per share have been calculated in a manner similar to that of basic earnings per share except that the weighted average number of common shares outstanding is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares (such as those resulting from the exercise of stock options and unvested restricted stock awards) were issued during the period, computed using the treasury stock method.

Earnings per share consisted of the following components for the three months ended March 31, 2008 and 2007:

For the Three Months Ended March 31,

	Net Income	
	2008	2007
Net Income	\$ 6,308	\$ 6,626

	Weighted Average Shares	
	2008	2007
Basic EPS	14,386,845	14,466,489
Effect of dilutive securities	73,133	163,984
Diluted EPS	14,459,978	14,630,473

Net Income Per Share	
2008	2007

Edgar Filing: INDEPENDENT BANK CORP - Form 10-Q

Basic EPS	\$	0.44	\$	0.46
Effect of dilutive securities	\$	0.00	\$	0.01
Diluted EPS	\$	0.44	\$	0.45

For the three months ended March 31, 2008 and 2007, there were 694,253 and 221,600, respectively, options to purchase common stock excluded from the calculation of diluted earnings per share because they were anti-dilutive. For the three months ended March 31, 2008 and 2007, there were no shares of restricted stock excluded from the calculation of diluted earnings per share because they were anti-dilutive.

NOTE 6 COMMON STOCK REPURCHASE PROGRAM

On December 14, 2006, the Company's Board of Directors approved a common stock repurchase program. Under the program, which was effective immediately, the Company was authorized to repurchase up to 1,000,000 shares, or approximately 7%, of the Company's outstanding common stock. During the quarter ended September 30, 2007, the Company completed its repurchase plan with a total of 1,000,000 shares of common stock repurchased at a weighted average share price of \$30.70.

NOTE 7 EMPLOYEE BENEFITS

POST RETIREMENT BENEFITS, SUPPLEMENTAL EXECUTIVE RETIREMENT PLANS & DEFINED BENEFIT PENSION PLAN

As a result of the acquisition of Slades, effective March 1, 2008 (see Note 10 hereof), the Company currently supports a defined benefit pension plan (Slades pension plan) that covers substantially all of Slades' previous employees that met certain eligibility requirements and that were employed up to January 1, 1998 when the plan was frozen. No additional defined benefits were earned for future service upon freezing the plan. The benefits paid are based on 1.5% of total salary plus 0.5% of compensation in excess of the integration level per year of service. The integration level was the first \$750 of monthly compensation.

In addition to the aforementioned acquired Slades pension plan, the Company inherited a post retirement benefit plan and a supplemental executive retirement plan (SERP) resulting from the acquisition of Slades. The post retirement benefit plan entitles four former Slades employees to have 85% of their Medex health insurance plan covered by the Company. The SERP entitles certain former Slades' executive officers and directors to receive supplemental benefits commencing with their retirement.

The following table illustrates the status of the post-retirement benefit plans and SERPs:

Components of Net Periodic Benefit Cost

	Post Retirement Benefits		SERPs		Pension*
	2008	Three months ended March 31,			2008
		2007	2008	2007	
		<i>(Unaudited - Dollars in Thousands)</i>			
Service cost	\$ 21	\$ 23	\$ 49	\$ 104	\$ 2
Interest cost	24	18	55	43	4
Expected return on assets					(6)
Amortization of transition obligation	8	8			
Amortization of prior service cost	3	3	15	10	
Recognized net actuarial (gain)/loss	(2)		(1)	(1)	
Net periodic benefit cost	\$ 54	\$ 52	\$ 118	\$ 156	\$ 0

* Does not include the noncontributory defined benefit pension plan administered by Pentegra (as discussed below).

Included in the SERP net periodic benefit cost above is an additional \$60,000 accrued during the first quarter of 2007 associated with the early retirement of an executive. Only one month of activity from the newly acquired Slades benefit plans is included above in post retirement benefits, SERPs and the pension net periodic benefit cost as the Company became responsible for those benefit plans on March 1, 2008.

The Company previously disclosed in its financial statements for the fiscal year ended December 31, 2007 that it expected to contribute \$59,000 to its post retirement benefit plan and \$131,000 to its SERPs in 2008 and presently anticipates making these contributions, plus additional contributions of \$23,000 and \$30,000 for the acquired Slades post retirement benefit plan and SERP, respectively. For the three months ended March 31, 2008, \$8,000 and \$28,000 of contributions have been made to the post retirement benefit plans and the SERPs, respectively. The Company does not plan to make a contribution to the acquired Slades defined benefit pension plan.

Not included in the above summary are the components of net periodic benefit cost for the noncontributory defined benefit pension plan administered by Pentegra (the Fund). The Fund does not segregate the assets or liabilities of all participating employers and, accordingly, disclosure of accumulated vested and non-vested benefits is not possible. The pension plan year is July 1st through June 30th. Contributions for the 2007-2008 plan year were all paid in 2007. It has not yet been determined what pension expense is expected to be related to the 2008-2009 plan year. During the three months ended March 31, 2008, \$260,000 of pension expense for both pension plans has been recognized for the 2007-2008 plan year.

Also in connection with the acquisition of Slades, the Company acquired life insurance policies pertaining to certain of Slades former executives. Slades had entered into agreements with these executives whereby the Company will pay to the executives estates or beneficiaries a portion of the death benefit that the Company will receive as beneficiary of such policies. In accordance with EITF 06-4 Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements the Company has established a liability of \$1.2 million for future death benefits.

NOTE 8 REPURCHASE AGREEMENTS

Both wholesale and retail repurchase agreements are collateralized by mortgage-backed securities and U.S. Government Sponsored Enterprises. At March 31, 2008, the Company had \$50.0 million of repurchase agreements outstanding with third party brokers and \$88.6 million of customer repurchase agreements outstanding. The related securities are included in the securities available for sale portfolio.

NOTE 9 COMPREHENSIVE INCOME

Information on the Company's comprehensive income, presented net of taxes, is set forth below for the three months ended March 31, 2008 and 2007.

Comprehensive income (loss) is reported net of taxes, as follows:

(Dollars in Thousands)

	FOR THE THREE MONTHS ENDED MARCH 31,	
	2008	2007
Net Income	\$ 6,308	\$6,626
Other Comprehensive Income/(Loss), Net of Tax:		
Increase in fair value of securities available for sale, net of tax of \$1,288 and \$472 for the three months ended March 31, 2008 and 2007, respectively.	1,911	743
Less: reclassification adjustment for realized gains included in net income, net of tax of \$56 for the three months ended March 31, 2008.	(77)	
Net change in fair value of securities available for sale, net of tax of \$1,232 and \$472 for the three months ended March 31, 2008 and 2007, respectively.	1,834	743
Decrease in fair value of derivatives, net of tax of \$1,416 and \$313 for the three months ended March 31, 2008 and 2007, respectively.	(1,962)(a)	(433)
Less: reclassification of realized loss (gain) on derivatives, net of tax of \$9 and \$77 for the three months ended March 31, 2008 and 2007, respectively.	12	(106)
Net change in fair value of derivatives, net of tax of \$1,408 and \$390 for the three months ended March 31, 2008 and 2007, respectively.	(1,950)	(539)
Amortization of certain costs included in net periodic post retirement costs, net of tax of \$30 and \$20 for the three months ended March 31, 2008 and 2007, respectively.	42	27
Other Comprehensive (Loss) Income, Net of Tax:	(74)	231
Comprehensive Income	\$ 6,234	\$6,857

- (a) Includes \$663,000 of realized but unrecognized loss on the sale of an interest rate swap in March 2008.

The loss will be recognized in earnings through January 2010, the original maturity date of the interest rate swap.

NOTE 10 ACQUISITION

Effective March 1, 2008, the Company completed its acquisition of Slades Ferry Bancorp. (Slades), parent of Slades Ferry Trust Company doing business as Slades Bank. In accordance with SFAS No. 141 Business Combinations, the acquisition was accounted for under the purchase method of accounting and, as such, was included in the Company's results of operations from the date of acquisition. The terms of the agreement called for 75% of the outstanding shares of Slades to be converted to 0.818 shares of Independent Bank Corp. for each share of Slades common stock and for 25% of the outstanding Slades shares to be purchased for \$25.50 in cash for each share of Slades common stock. The Company issued 2,492,195 shares of common stock valued at \$76.2 million, or \$30.59 per share. The \$30.59 was determined based on the average of the closing prices of the Company's shares over a five day trading period beginning two trading days prior to the date of the announcement of the acquisition and ending two trading days following the date of the announcement of the acquisition. The cash payment totaled \$25.9 million equating to a total purchase price of approximately \$102 million. The acquisition of Slades will allow the Company to expand its geographical footprint. The following table summarizes the estimated fair value of the assets acquired and liabilities assumed at the date of acquisition.

(Dollars in Thousands)

Assets:

Cash acquired, net of cash paid	(\$13,428)
Investments	106,700
Loans, net	465,720
Premises and Equipment	11,502
Goodwill	58,083
Core Deposit & Other Intangible	8,961
Other Assets	25,109

Fair Value of Assets Acquired	\$ 662,647
-------------------------------	------------

Liabilities:

Deposits	\$ 410,769
Borrowings	161,974
Other Liabilities	13,676

Fair Value of Liabilities Assumed	\$ 586,419
-----------------------------------	------------

Net Assets Acquired	\$ 76,228
---------------------	-----------

A core deposit intangible of \$8.8 million was recorded with an expected life of ten years. There was an additional \$200,000 of other intangibles recorded related to non-compete agreements with a life of one year.

The following summarizes the unaudited proforma results of operations as if the Company acquired Slades on January 1, 2008.

	Three months ended March 31,	
	2008	2007
Net Interest Income	\$28,810	\$28,170
Net (Loss) Income	5,593	7,499
Earnings Per Share- Basic	\$ 0.35	\$ 0.42
Earnings Per Share- Diluted	\$ 0.35	\$ 0.42

Excluded from the pro forma results of operations for the three months ended March 31, 2008 are merger costs net of tax of \$8.4 million, or \$0.52 per diluted share, primarily made up of the acceleration of certain compensation and benefit cost arising due to the change in control and other merger expenses.

NOTE 11 GOODWILL AND IDENTIFIABLE INTANGIBLE ASSETS

Goodwill and identifiable intangible assets as of March 31, 2008 and December 31, 2007 were \$127.4 million and \$60.4 million, respectively. During the first quarter of 2008 the Company acquired Slade s Ferry Bancorp. resulting in additional goodwill of \$58.1 million and core deposit and other identifiable intangible assets of \$9.0 million. Additional goodwill of \$0.2 million was recorded in the first quarter of 2008 related to acquisitions made in 2007.

The changes in goodwill and identifiable intangible assets for the period ended March 31, 2008 is shown in the table below.

Carrying Amount of Goodwill and Intangibles

(Dollars in Thousands)

	Goodwill	Core Deposit Intangibles	Other Identifiable Intangible Assets	Total
Balance at December 31, 2007	\$ 58,296	\$ 1,134	\$ 981	\$ 60,411
Recorded during the year	58,270	8,760	200	67,230
Amortization Expense		(200)	(50)	(250)
Balance at March 31, 2008	\$ 116,566	\$ 9,694	\$ 1,131	\$ 127,391

The following table sets forth the estimated annual amortization expense of the identifiable assets.

Remaining Estimated Annual Amortization Expense

(Dollars in Thousands)

	2008	2009	2010	2011	2012	2013 -2018	Total
Core Deposit Intangibles	\$ 1,327	\$ 1,403	\$ 1,120	\$ 954	\$ 793	\$ 4,097	\$ 9,694
Other Intangible Assets	\$ 226	\$ 134	\$ 101	\$ 101	\$ 100	\$ 469	\$ 1,131
Total Identifiable Intangible Assets	\$ 1,553	\$ 1,537	\$ 1,221	\$ 1,055	\$ 893	\$ 4,566	\$ 10,825

NOTE 12 SUBSEQUENT EVENT

Subsequent to the end of the first quarter of 2008, Rockland Trust entered into a transaction to sell and simultaneously lease back 17 pieces of real estate owned by Rockland Trust. The transaction was accomplished pursuant to a Purchase and Sale Agreement that became effective as of April 24, 2008 between American Realty Capital, LLC, and Rockland Trust. When the transaction closed on May 2, 2008, Rockland Trust sold the real estate to American Realty Capital, LLC for an aggregate price of \$32.2 million and simultaneously entered into leases that are 10 or 15 years in length for each location. The Company anticipates an approximate deferred gain of \$13 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements, notes and tables included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2007, filed with the Securities and Exchange Commission.

Cautionary Statement Regarding Forward-Looking Statements

A number of the presentations and disclosures in this Form 10-Q, including, without limitation, statements regarding the level of allowance for loan losses, the rate of delinquencies, amounts of charge-offs, the rates of loan growth, and any statements preceded by, followed by, or which include the words may, could, should, will, would, hope, might, believe, expect, anticipate, estimate, intend, plan, assume or similar expressions constitute forward-looking statements.

These forward-looking statements, implicitly and explicitly, include the assumptions underlying the statements and other information with respect to the Company's beliefs, plans, objectives, goals, expectations, anticipations, estimates, intentions, financial condition, results of operations, future performance and business, including the Company's expectations and estimates with respect to the Company's revenues, expenses, earnings, return on equity, return on assets, efficiency ratio, asset quality and other financial data and capital and performance ratios.

Although the Company believes that the expectations reflected in the Company's forward-looking statements are reasonable, these statements involve risks and uncertainties that are subject to change based on various important factors (some of which are beyond the Company's control). The following factors, among others, could cause the Company's financial performance to differ materially from the Company's goals, plans, objectives, intentions, expectations and other forward-looking statements:

a weakening of United States economy in general and in the regional and local economies within the New England region and Massachusetts could result in a

deterioration of credit quality, a change in the allowance for loan losses, or a reduced demand for the Company's credit or fee-based products and services;
adverse changes in the local real estate market, as most of the Company's loans are concentrated in southeastern Massachusetts and Cape Cod and a substantial portion of these loans have real estate as collateral, could result in a deterioration of credit quality and an increase in the allowance for loan losses;

the effects of and changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System, could affect the Company's business environment or affect the Company's operations;

the effects of, any changes in, and any failure by the Company to comply with, tax laws generally and requirements of the federal New Markets Tax Credit program in particular could adversely affect the Company's tax provision and its financial results;

inflation, interest rate, market and monetary fluctuations could reduce net interest income and could increase credit losses;

adverse changes in asset quality could result in increasing credit risk-related losses and expenses;

competitive pressures, including those pressures resulting from continued industry consolidation and the increase in non-banks providing financial services, could intensify and affect the Company's profitability;

a deterioration in the conditions of the securities markets could adversely affect the value or credit quality of the Company's assets, the availability and terms of funding necessary to meet the Company's liquidity needs, and the Company's ability to originate loans;

rapid changes in information technology could adversely impact the Company's operations and require increased capital spending;

changes in consumer spending and savings habits could negatively impact the Company's financial results;

completed acquisitions may not result in cost savings revenue enhancements that were anticipated; and

acquisitions may not produce results at levels or within time frames originally anticipated and may result in unforeseen integration issues.

If one or more of the factors affecting the Company's forward-looking information and statements proves incorrect, then the Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, forward-looking information and statements contained in this Form 10-Q. Therefore, the Company cautions you not to place undue reliance on the Company's forward-looking information and statements.

The Company does not intend to update the Company's forward-looking information and statements, whether written or oral, to reflect change. All forward-looking statements attributable to the Company are expressly qualified by these cautionary statements.

EXECUTIVE LEVEL OVERVIEW

The Company's results of operations are largely dependent on net interest income, which is the difference between the interest earned on loans and securities and the interest paid on deposits and borrowings. The results of operations are also affected by the level of income/fees from loans, deposits, mortgage banking, and wealth management activities, as well as operating expenses, the provision for loan losses, the impact of federal and state income taxes, and the relative levels of interest rates and economic activity.

Effective March 1, 2008, the Company completed its acquisition of Slade's Ferry Bancorp. (Slades), parent of Slades Bank. In accordance with SFAS No. 141 Business Combinations, the acquisition was accounted for under the purchase method of accounting and, as such, was included in the Company's results of operations from the date of acquisition. The terms of the agreement called for 75% of the outstanding shares of Slades to be converted to 0.818 shares of Independent Bank Corp. for each share of Slades common stock and for 25% of the outstanding Slades shares to be purchased for \$25.50 in cash for each share of Slades common stock. The Company issued 2,492,195 shares of common stock valued at \$76.2 million, or \$30.59 per share. The \$30.59 was determined based on the average of the closing prices of the Company's shares over a five day trading period beginning two trading days prior to the date of the announcement of the acquisition and ending two trading days following the date of the announcement of the acquisition. The cash payment totaled \$25.9 million equating to a total purchase price of approximately \$102 million. The acquisition of Slades will allow the Company to expand its geographical footprint. This acquisition may have a significant impact on comparative period results and will be discussed throughout the document as it applies (see Note 10 in the Consolidated Notes to Unaudited Consolidated Financial Statements above).

During the first quarter of 2008 management continued to implement its strategy to alter the overall composition of the Company's earning assets in order to focus resources in higher return segments. The Company reported diluted earnings per share of \$0.44 for the first quarter ending March 31, 2008, representing a decrease of 2.2% from the same period in the prior year. The Company recorded a net loss on the sale of securities, merger integration expenses and a recovery on a previously recorded loss on a WorldCom Bond during the first quarter of 2008 and executive early retirement costs recorded in the same period in 2007. Excluding these non-core items, diluted earnings per share on an operating basis was \$0.48 for the quarter ended March 31, 2008, representing an increase of 2.1% from the same period in 2007.

The Company reported net income of \$6.3 million for the quarter ending March 31, 2008, down 4.8% as compared to the same period in 2007. Excluding the non-core items mentioned above, net operating earnings were \$6.9 million for the quarter ending March 31, 2008, up 0.4%, from the same period in the prior year.

The following table summarizes the impact of non-core items recorded for the time periods indicated below:

RECONCILIATION TABLE NON-GAAP FINANCIAL INFORMATION
Year to Date Ending March 31,

	Pretax Earnings		Net Income		Diluted Earnings Per Share	
	2008	2007	2008	2007	2008	2007
	<i>(Dollars in Thousands, except per share amounts)</i>					
AS REPORTED (GAAP)	\$ 8,629	\$ 9,438	\$ 6,308	\$ 6,626	\$ 0.44	\$ 0.45
	IMPACT OF NON-CORE ITEMS					
Non-Interest Income Components						
Net Loss on Sale of Securities	609		396		0.03	
Non-Interest Expense Components						
Executive Early Retirement Costs		406		264		0.02
WorldCom Bond Loss Recovery	(418)		(272)		(0.02)	
Merger & Acquisition Expenses	744		484		0.03	
TOTAL IMPACT OF NON-CORE ITEMS	935	406	609	264	0.04	0.02
AS ADJUSTED (NON-GAAP)	\$ 9,564	\$ 9,844	\$ 6,916	\$ 6,890	\$ 0.48	\$ 0.47

Certain non-core items are included in the computation of earnings in accordance with generally accepted accounting principles (GAAP) in the United States of America in both 2008 and 2007 as indicated by the table above. In an effort to provide investors information regarding the Company s results, the Company has disclosed in the table above certain non-GAAP information, which management believes provides useful information to the investor. This information should not be viewed as a substitute for operating results determined in accordance with GAAP, nor is it necessarily comparable to non-GAAP information which may be presented by other companies.

Net interest margin strength and stability continued during the first quarter of 2008, as the net interest margin for the period was 3.90%, as compared to a net interest margin of 3.84% for the first quarter of 2007 and 3.94% for the fourth quarter of 2007. The net interest margin is expected to be maintained in line with first quarter levels during 2008.

The following graph shows the trend in the Company s net interest margin versus the Federal Funds Rate for nine quarters beginning with the quarter ended March 31, 2006 and ending with the quarter ended March 31, 2008:

* The Q4 2006 Net Interest Margin is normalized for the impact of the write-off of \$995,000 of issuance costs in interest expense associated with the refinancing of higher rate trust preferred securities during the fourth quarter of 2006.

** The Q2 2007 Net Interest Margin is normalized for the impact of the write-off of \$907,000 of issuance costs in interest expense associated with the refinancing of higher rate trust preferred securities during the second quarter of 2007.

While changes in the prevailing interest rate environment (see Historical U.S. Treasury Yield Curve graph below) have and will continue to have an impact on the Company's earnings, management strives to mitigate volatility in net interest income resulting from changes in benchmark interest rates through adjustable rate asset generation, effective liability management, and utilization of off-balance sheet interest rate derivatives. (For a discussion of interest rate derivatives and interest rate sensitivity see the Asset/Liability Management section, Table 10 Derivative Positions, and Market Risk section, Table 12 Interest Rate Sensitivity within the Management's Discussion and Analysis of Financial Condition and Results of Operations hereof.)

Below is a graph showing the historical U.S. Treasury yield curve for the past four years for periods ending March 31. As the graph illustrates, the shape of the yield curve has changed dramatically over the past four years from a normal upward sloping yield curve into a downward sloping or inverted yield curve and back to a more normal upward sloping curve.

A yield curve is a graphic line chart that shows interest rates at a specific point for all securities having equal risk, but different maturity dates. ¹ A flat yield curve is one in which there is little difference between short-term and long-term rates for bonds of the same credit quality. When short- and long-term bonds are offering equivalent yields, there is usually little benefit in holding the longer-term instruments that is, the investor does not gain any excess compensation for the risks associated with holding longer-term securities. For example, a flat yield curve on U.S. Treasury Securities would be one in which the yield on a two-year bond is 5% and the yield on a 30-year bond is 5.1%. ²

¹ The Free Dictionary.com

² Investopedia.com

The Company's return on average assets and return on average equity were 0.87% and 10.01%, respectively, for the three month period ending March 31, 2008. The Company's return on average assets and return on average equity were 0.96% and 11.73%, respectively, for the three month period ending March 31, 2007.

Non interest income grew by 5.7% for the quarter ending March 31, 2008 as compared to the same period in 2007. Excluding the losses on the sale of securities recognized during 2008, non-interest income grew by \$1.1 million, or 13.5%, in the three month period ended March 31, 2008, when compared to 2007. See the table below for a reconciliation of non-interest income as adjusted.

	Three Months Ended March 31,		\$ Variance	% Variance
	2008	2007		
	(Dollars in Thousands)			
Non-Interest Income GAAP	\$8,238	\$7,792	\$ 446	5.72%
Add Net Loss on Sale of Securities	609		\$ 609	n/a
Non-Interest Income as Adjusted	\$8,847	\$7,792	\$ 1,055	13.54%

Leading the growth in non interest income is the Company's Wealth Management product set, the aggregate revenues of which have grown by 47.5% for the three month period ending March 31, 2008 as compared to the same period in 2007. Assets under management have grown to \$1.3 billion, compared to the \$847.8 million of assets under management at

March 31, 2007. The Company acquired assets from O'Connell Investment Services, Inc. on November 1, 2007, which added approximately \$200 million to assets under management.

Non interest expense has grown by 12.0% for the three month period ended March 31, 2008, compared to the same period in the prior year. Excluding executive early retirement costs in the first quarter 2007, merger & acquisition expenses and a recovery on a WorldCom Bond loss in the first quarter of 2008, non-interest expense increased \$2.5 million, or 11.4%, for the three months ended March 31, 2008, as compared to the same period in 2007. *See the table below for a reconciliation of non-interest expense as adjusted.*

	Three Months Ended March 31,		\$ Variance	% Variance
	2008	2007		
	(Dollars in Thousands)			
Non-Interest Expense GAAP	\$24,032	\$21,452	\$ 2,580	12.03%
Add - Merger & Acquisition Expense	\$ 744		\$ 744	n/a
Add - Executive Early Retirement Costs		\$ 406	\$ (406)	n/a
Less - WorldCom Bond Loss Recovery	(\$418)		(418)	n/a
Non-Interest Expense as Adjusted	\$24,358	\$21,858	\$ 2,500	11.44%

The increase in expenses is partially attributable to the Slades acquisition recorded in the first quarter of 2008 and the O'Connell acquisition in the fourth quarter of 2007.

Management now feels that the Company is nearing the completion of the balance sheet repositioning that it has been focusing on over the past two years. Emphasis has been placed on growing the commercial and home equity lending segments of the loan portfolio while de-emphasizing the securities portfolio, indirect automobile lending, and residential real estate loan portfolio.

As the interest rate environment has not been conducive to maintaining or increasing the securities portfolio, the Company has permitted the securities portfolio to run-off causing it to decrease on both a relative basis (as a percent of earning assets) and an actual basis. During the first quarter there was a decrease in the securities portfolio as the Company sold \$50.0 million in agency securities resulting in a gain on sale of \$133,000 during January 2008. In addition, associated with the Slades acquisition, the Company sold the majority of Slades' investment securities portfolio incurring a loss of \$742,000.

The following graph shows the decline in the Company's securities portfolio on both an actual and relative basis from March 2005 through March 2008:

Total deposits of \$2.5 billion at March 31, 2008 increased \$430.3 million, or 21.2%, compared to December 31, 2007. Of the increases, \$410.8 million is a result of the Slades acquisition. The Company remains committed to deposit generation, with careful management of deposit pricing and selective deposit promotion, in an effort to control the Company's cost of funds. In the current interest rate environment the Company is focused on pricing deposits for customer retention as well as core deposit growth.

While net loan charge-offs were higher in the first quarter of 2008 than in the same period in 2007, they amounted to an annualized rate of 20 basis points of average loans. The allowance for loan losses as a percentage of total loans was 1.29% compared to 1.31% at December 31, 2007, maintaining the allowance for loan losses at a level that management considers adequate to provide for probable loan losses based upon evaluation of known and inherent risks in the loan portfolio. Nonperforming assets were 0.36% of assets at March 31, 2008, and 0.30% of assets at December 31, 2007. See Table 3 of Nonperforming Assets/ Loans for detail on nonperforming assets.

The following graph depicts the Company's non-performing assets to total assets at the periods indicated:

28

Some of the Company's other highlights for the three months ended March 31, 2008 included:

- o Effective March 1, 2008, the Company completed the acquisition of Slades, parent of Slade's Ferry Trust Company doing business as Slades Bank. Slades Bank had 9 branches located in the south coast of Massachusetts and along the Rhode Island border and \$663 million in total assets of which \$466 million are attributable to the loan portfolio and \$67 million is attributable to goodwill and other intangibles. The transaction was valued at approximately \$102 million. Management expects the transaction to be immediately accretive, before one time acquisition charges.
- o The Company made a \$6.8 million capital contribution during the first quarter of 2008 into Rockland Trust Community Development Corporation II (RTC CDE II) to complete the implementation of the \$45 million in tax credit allocation authority awarded under the New Markets Tax Credit Program.
- o The Company increased the quarterly dividend effective in the first quarter of 2008 by 5.9% to \$0.18 per share.
- o Subsequent to the end of the first quarter of 2008, Rockland Trust has entered into a transaction to sell and simultaneously lease back 17 pieces of real estate owned by Rockland Trust. The transaction was accomplished pursuant to a Purchase and Sale Agreement that became effective as of April 24, 2008 between American Realty Capital LLC and Rockland Trust. When the transaction closed on May 1, 2008 Rockland Trust sold the real estate to American Realty Capital LLC for an aggregate price of \$32.2 million and simultaneously entered into leases that are 10 or 15 years in length for each location. The Company anticipates an approximate deferred gain of \$13 million.

FINANCIAL POSITION

Loan Portfolio Total loans grew by \$481.0 million, or 23.5%, in the first quarter of 2008 as compared to the year ended December 31, 2007. The acquisition of Slade s Ferry Bancorp. added \$471.2 million in growth, as shown in the table below.

Table 1 Effect of Slade s Ferry Bancorp. Acquisition on Loans

	March 31, 2008	December 31, 2007	Slade s Acquisition	Organic Growth
	(Dollars in Thousands)			
Loans				
Commercial & Commercial Real Estate Loans	\$ 1,453,300	\$ 1,121,310	\$ 316,081	\$ 15,909
Business Banking	73,853	69,977		3,876
Residential Real Estate	449,873	341,090	114,432	(5,649)
Consumer Home Equity	355,367	308,744	38,723	7,900
Consumer Other	191,549	201,831	2,009	(12,291)
Total Loans	\$ 2,523,942	\$ 2,042,952	\$ 471,245	\$ 9,745

Excluding the Slades acquisition, organic loan growth achieved amounted to \$9.7 million, or 1.9% on an annualized basis and was concentrated in the commercial, business and home equity lending categories while the residential real estate and consumer (primarily indirect automobile lending) categories were reduced. Total commercial loans (including business banking) following the Slades acquisition now represent 60.5% of the total loan portfolio.

The Bank s commercial real estate portfolio, the Bank s largest portfolio, is diversified with loans secured by a variety of property types, such as owner-occupied and non-owner-occupied commercial, retail, office, industrial, warehouse and other special purpose properties, such as hotels, motels, restaurants, and golf courses. Commercial real estate also includes loans secured by certain residential-related property types including multi-family apartment buildings, residential development tracts and, to a lesser extent, condominiums. The following pie chart shows the diversification of the commercial real estate portfolio as of March 31, 2008.

**Commercial Real Estate Portfolio by Property Type
as of 3/31/08**

The Bank considers a concentration of credit to a particular industry to exist when the aggregate credit exposure to a borrower, an affiliated group of borrowers or a non-affiliated group of borrowers engaged in one industry exceeds 10% of the Bank's loan portfolio which includes direct, indirect or contingent obligations. As of March 31, 2008, loans made by the Company to the industry concentration of lessors of non-residential buildings constituted 13.3% of the Company's total loan portfolio. Two of these loans totaling \$1.0 million were non-performing at March 31, 2008.

The Bank does not originate sub-prime loans as a line of business.

Asset Quality Rockland Trust actively manages all delinquent loans in accordance with formally drafted policies and established procedures. In addition, Rockland Trust's Board of Directors reviews delinquency statistics, by loan type, on a monthly basis.

Delinquency The Bank's philosophy toward managing its loan portfolios is predicated upon careful monitoring which stresses early detection and response to delinquent and default situations. The Bank seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time. Generally, the Bank requires that a delinquency notice be mailed to a borrower upon expiration of a grace period (typically no longer than 15 days beyond the due date). Reminder notices and telephone calls may be issued prior to the expiration of the grace period. If the delinquent status is not resolved within a reasonable time following the mailing of a delinquency notice, the Bank personnel charged with managing its loan portfolios contacts the borrower to determine the reasons for delinquency and the prospects for payment. Any subsequent actions taken to resolve the delinquency will depend upon the nature of the loan and the length of time that the loan has been delinquent. The borrower's needs are considered as much as reasonably possible without jeopardizing the Bank's position. A late charge is usually assessed on loans upon expiration of the grace period.

On loans secured by one-to-four family owner-occupied properties, the Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure

action. If such efforts do not result in a satisfactory arrangement, the loan is referred to legal counsel to initiate foreclosure proceedings. At any time prior to a sale of the property at foreclosure, the Bank may and will terminate foreclosure proceedings if the borrower is able to work out a satisfactory payment plan. On loans secured by commercial real estate or other business assets, the Bank similarly seeks to reach a satisfactory payment plan so as to avoid foreclosure or liquidation.

The following table sets forth a summary of certain delinquency information as of the dates indicated:

Table 2 Summary of Delinquency Information

	At March 31, 2008				At December 31, 2007			
	60-89 days		90 days or more		60-89 days		90 days or more	
	Number of Loans	Principal Balance	Number of Loans	Principal Balance	Number of Loans	Principal Balance	Number of Loans	Principal Balance
	<i>(Unaudited - Dollars in Thousands)</i>				<i>(Dollars in Thousands)</i>			
Commercial and Industrial	3	\$ 101	9	\$ 423	5	\$ 191	5	\$ 280
Commercial Real Estate	4	1,098	9	2,511	5	1,218	9	1,761
Commercial Construction								
Business Banking	10	352	22	433	9	212	15	332
Residential Real Estate	6	1,043	9	2,448	3	574	5	1,199
Residential Construction								
Consumer Home Equity	2	139	16	1,197	7	379	9	786
Consumer Auto	77	866	86	720	55	530	78	676
Consumer Other	37	281	43	271	51	272	31	126
Total	139	\$ 3,880	194	\$ 8,003	135	\$ 3,376	152	\$ 5,160

The Company's total loan delinquency was 1.04% of total loans outstanding at March 31, 2008 and 0.93% at December 31, 2007. Increases shown above in the 90 day category are contained primarily in the commercial real estate and residential real estate categories.

Nonaccrual Loans As permitted by banking regulations, consumer loans past due 90 days or more may continue to accrue interest. In addition, certain commercial, business banking, or real estate loans, including consumer home equity loans, that are generally more than 90 days past due may be kept on an accruing status if the loan is well secured and in the process of collection. As a general rule, commercial, business banking, or real estate loans, including consumer home equity loans, more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. Income accruals are suspended on all nonaccrual loans and all previously accrued and uncollected interest is reversed against current income. Generally, a loan remains on nonaccrual status until it becomes current with respect to principal and interest (and in certain instances remains current for up to three months), when the loan is liquidated, or when the loan is determined to be uncollectible and it is charged-off against the allowance for loan losses.

Nonperforming Assets Nonperforming assets are comprised of nonperforming loans, nonperforming securities and Other Real Estate Owned (OREO). Nonperforming loans consist of loans that are more than 90 days past due, but still accruing interest, and nonaccrual loans. OREO includes properties held by the Bank as a result of foreclosure or by

acceptance of a deed in lieu of foreclosure. The overall increase in nonperforming assets is attributable mainly to increases in nonperforming loans shown in the residential mortgage loan category and in the commercial real estate category, in addition to the overall increase in the size of the loan portfolio due to the Slades acquisition. Nonperforming assets represented 0.36% and 0.30% of total assets at March 31, 2008 and December 31, 2007, respectively. The Bank had

five properties held as OREO totaling \$1.0 million and no nonperforming securities for the period ending March 31, 2008.

Reposessed automobile loan balances continue to be classified as nonperforming loans and not as other assets, because the borrower has the potential to satisfy the obligation within twenty days from the date of repossession (before the Bank can schedule disposal of the collateral). The borrower can redeem the property by payment in full at any time prior to the property's disposal by the Bank. Repossessed automobile loan balances amounted to \$574,000 as of March 31, 2008, \$455,000 at December 31, 2007 and \$347,000 at March 31, 2007.

The following table sets forth information regarding nonperforming assets held by the Company at the dates indicated.

Table 3 Nonperforming Assets / Loans
(Unaudited Dollars in Thousands)

Nonperforming assets as a percent of total assets	0.36%	0.30%	0.27%
---	-------	-------	-------

(1) There were no restructured nonaccruing loans at March 31, 2008, December 31, 2007, and March 31, 2007.

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain commercial and real estate loans. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status which is referred to as a trouble debt restructuring. It is the Bank's policy to maintain restructured loans on

nonaccrual status for approximately six months before management considers a restructured loan's return to accrual status. At March 31, 2008, December 31, 2007 and March 31, 2007 the Bank had no restructured loans.

Potential problem loans are any loans, which are not categorized as nonaccrual or non-performing loans and which are not considered troubled debt restructures, where known information about possible credit problems of the borrower(s) causes management to have concerns as to the ability of such borrower(s) to comply with present loan repayment terms. At March 31, 2008, the Bank had 24 potential problem loan relationships and at December 31, 2007 the Bank had fifteen potential problem loan relationships, which are not included in nonperforming loans. Outstanding balances on these loans totaled \$39.7 million and \$21.9 million at March 31, 2008 and December 31, 2007, respectively. At March 31, 2008, these problem loans continued to perform and the Company's management actively monitors these loans and strives to minimize any possible adverse impact to the Bank.

Real estate acquired by the Bank through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as OREO. When property is acquired, it is recorded at the lesser of the loan's remaining principal balance or the estimated fair value of the property acquired, less estimated costs to sell. Any loan balance in excess of the estimated fair value less estimated cost to sell on the date of transfer is charged to the allowance for loan losses on that date. All costs incurred thereafter in maintaining the property, as well as subsequent declines in fair value are charged to non-interest expense.

Interest income that would have been recognized for the three months ended March 31, 2008, and March 31, 2007, if nonperforming loans at the respective dates had been performing in accordance with their original terms, approximated \$475,000 and \$244,000, respectively. The actual amount of interest that was collected on these nonaccrual loans during the three months ended March 31, 2008 and March 31, 2007 and included in interest income was approximately \$19,000 and \$64,000, respectively.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impairment is measured on a loan by loan basis for commercial, commercial real estate and construction, and selectively, for certain consumer, residential or home equity loans, by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of homogeneous loans are collectively evaluated for impairment. As such, the Bank does not typically identify individual loans within these groupings for impairment evaluation and disclosure.

At March 31, 2008, impaired loans include all commercial real estate loans and commercial and industrial loans on nonaccrual status and other loans that have been categorized as impaired. Total impaired loans at March 31, 2008 and December 31, 2007 were \$4.8 million and \$3.9 million, respectively. The March 31, 2008 balance included \$1.5 million in impaired loans from the former Slades Bank portfolio.

Allowance For Loan Losses While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on increases in nonperforming loans, changes in economic conditions, or for other reasons. Various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses.

The allowance for loan losses is maintained at a level that management considers adequate to provide for probable loan losses based upon evaluation of known and inherent risks in the loan portfolio. The allowance is increased by provisions for loan losses and by recoveries of loans previously charged-off and is reduced by loans charged-off.

As of March 31, 2008, the allowance for loan losses totaled \$32.6 million, or 1.29%, of total loans as compared to \$26.8 million, or 1.31%, of total loans at December 31, 2007. The increase in allowance was primarily the result of the acquisition of Slades, which added \$5.5 million to the allowance of the Company. Based on management's analysis, management believes that the level of the allowance for loan losses at March 31, 2008 is adequate.

The following table summarizes changes in the allowance for loan losses and other selected loan data for the periods presented:

Table 4 Summary of Changes in the Allowance for Loan Losses

	March 31, 2008	Quarter to Date			March 31, 2007
		December 31, 2007	September 30, 2007	June 30, 2007

The allowance for loan losses is allocated to various loan categories as part of the Bank's process of evaluating the adequacy of the allowance for loan losses. The allowance amounts increased by approximately \$5.8 million to \$32.6 million at March 31, 2008. This increase includes the addition of \$5.5 million in allowance for loan losses resulting from the Slades acquisition. Commencing in 2007, management has allocated certain amounts of the allowance to the various loan categories representing inherent qualitative risk factors, which may not be fully captured in its quantitative estimation of loan losses due to the imprecise nature of loan loss estimation techniques. In prior periods, such amounts were not allocated to

specific loan categories. Prior to 2007, these amounts were maintained as a separate, non-specific allowance item identified as the imprecision allowance .

The factors supporting the allowance for loan losses do not diminish the fact that the entire allowance for loan losses are available to absorb losses in the loan portfolio and related commitment portfolio, respectively.

The following table sets forth the allocation of the allowance for loan losses by loan category at the dates indicated. The allocation is made for analytical purposes and is not necessarily indicative of the categories in which actual losses may occur. The total allowance is available to absorb losses from any segment of the loan portfolio.

Table 5 Summary of Allocation of the Allowance for Loan Losses

(Unaudited Dollars In Thousands)

	AT MARCH 31, 2008		AT DECEMBER 31, 2007	
	Allowance Amount	Percent of Loans In Category To Total Loans	Allowance Amount	Percent of Loans In Category To Total Loans

Consumer Other	647	1.8%	693	2.3%
Total Allowance for Loan Losses	\$ 32,609	100.0%	\$ 26,831	100.0%

Allocated amounts of allowance for loan losses are determined using both a formula-based approach applied to groups of loans and an analysis of certain individual loans for impairment.

The formula-based approach evaluates groups of loans to determine the allocation appropriate within each portfolio section. Individual loans within the commercial and industrial, commercial real estate and real estate construction loan portfolio sections are assigned internal risk ratings to group them with other loans possessing similar risk characteristics. The level of allowance allocable to each group of risk-rated loans is then determined by applying a loss factor that estimates the amount of probable loss inherent within each category. The assigned loss factor for each risk rating is a formula-based assessment of historical loss data, portfolio characteristics, economic trends, overall market conditions, past experience and management's analysis of considerations of probable loan loss based on these factors.

Allocations for business banking, residential real estate and other consumer loan categories are principally determined by applying loss factors that represent management's estimate of probable or expected losses inherent in those categories. In each section, inherent losses are estimated, based on a formula-based assessment of historical loss data, portfolio

characteristics, economic trends, overall market conditions, past loan loss experience and management's considerations of probable loan loss based on these factors.

The other method used to allocate allowances for loan losses entails the assignment of allowance amounts to individual loans on the basis of loan impairment. Certain loans are evaluated individually and are judged to be impaired when management believes it is probable that the Bank will not collect all of the contractual interest and principal payments as scheduled in the loan agreement. Under this method, loans are selected for evaluation based upon a change in internal risk rating, occurrence of delinquency, loan classification or non-accrual status. A specific allowance amount is allocated to an individual loan when such loan has been deemed impaired and when the amount of a probable loss is able to be estimated on the basis of: (a) the present value of anticipated future cash flows or on the loan's observable fair market value, or (b) the fair value of collateral, if the loan is collateral dependent. Loans evaluated individually for impairment and the amount of specific allowance assigned to such loans totaled \$4.8 million and \$74,000, respectively, at March 31, 2008 and \$3.9 million and \$14,000, respectively, at December 31, 2007.

Portions of the allowance for loan loss are maintained as an addition to the amount of allowance determined to be required using the quantitative estimation techniques described herein. These amounts are maintained for two primary reasons: (a.) there exists an inherent subjectivity and imprecision to the analytical processes employed, and (b.) the prevailing business environment, as it is affected by changing economic conditions and various external factors, may impact the portfolio in ways currently unforeseen. Moreover, management has identified certain qualitative risk factors which could impact the degree of loss sustained within the portfolio. These include: (a.) market risk factors, such as the effects of economic variability on the entire portfolio, and (b.) unique portfolio risk factors that are inherent characteristics of the Bank's loan portfolio. Market risk factors may consist of changes to general economic and business conditions that may impact the Bank's loan portfolio customer base in terms of ability to repay and that may result in changes in value of underlying collateral. Unique portfolio risk factors may include industry concentration or covariant industry concentrations, geographic concentrations or trends that may exacerbate losses resulting from economic events which the Bank may not be able to fully diversify out of its portfolios.

Due to the imprecise nature of the loan loss estimation process and ever changing conditions, these qualitative risk attributes may not be adequately captured in data related to the formula-based loan loss components used to determine allocations in the Bank's quantitative analysis of the adequacy of the allowance for loan losses. Management, therefore, has established and maintains amounts of the allowance which reflect, among other things, the uncertainty of future economic conditions within the Bank's market area. Commencing in 2007, management has allocated amounts of the allowance attributable to these qualitative risk factors to the various loan categories. In prior periods, such amounts were not allocated to specific loan categories. Rather, these amounts were maintained as a separate, non-specific allowance item identified as the imprecision allowance.

Regional and local general economic conditions, as measured in terms of employment levels, gross state product and current and leading indicators of economic confidence for Massachusetts were relatively stable for the first quarter of 2008 and outperformed the national economy during the same period. Growth in knowledge-based industries including technology, science, and the health sector helped offset declines in housing and certain consumer-related sectors. Clearly defined, continuing negative trends show signs of a further weakening of

market fundamentals in residential real estate markets throughout the region. This observation, when combined with financial market fallout from the sub prime mortgage crisis and potential inflationary pressure, primarily driven by higher energy, food, commodity, and health care costs, has raised concern that, moving forward through the remainder of 2008, general economic conditions may weaken.

At March 31, 2008 and December 31, 2007, the allowance for loan losses totaled \$32.6 million and \$26.8 million, respectively. Based on the analyses described above, management believes that the level of the allowance for loan losses at March 31, 2008 is adequate.

Goodwill and Core Deposit Intangibles Goodwill and Core Deposit Intangibles (CDI) increased \$67.0 million, or 110.9%, to \$127.4 million at March 31, 2008 from December 31, 2007. The amount of goodwill and core deposit and other intangible assets that were due to the Slades acquisition was \$58.1 million and \$9.0 million, respectively.

Securities Securities decreased by \$20.7 million, or 4.1%, during the three months ended March 31, 2008, due to the sale of \$50.0 million in agency securities resulting in a gain of \$133,000 during January 2008. In addition, associated with Slades acquisition, the Company sold the majority of Slades investments incurring a loss of \$742,000. The ratio of securities to total assets as of March 31, 2008 was 14.6%, as compared to 18.3% at December 31, 2007.

Deposits Total deposits of \$2.5 billion increased 21.2% at March 31, 2008 compared to \$2.0 billion at December 31, 2007. Of the increase \$410.8 million is a result of the Slades acquisition. Excluding the impact of the acquisition, deposits grew at an annualized rate of 3.9%. See the table below for the deposits that transferred from Slades acquisition.

Table 6 Effect of Slades Ferry Bancorp. Acquisition on Deposits

	March 31, 2008	December 31, 2007	Slades Acquisition	Organic Growth
	(Dollars in Thousands)			
Deposits				
Demand Deposits	\$ 549,581	\$ 471,164	\$ 74,584	\$ 3,833
Savings and Interest Checking Accounts	686,808	587,474	119,908	(20,574)
Money Market	484,634	435,792	38,668	10,174
Time Certificates of Deposit	735,922	532,180	177,609	26,133
Total Deposits	\$ 2,456,945	\$ 2,026,610	\$ 410,769	\$ 19,566

The Company experienced an increase in core deposits of \$226.6 million, or 15.2%, and an increase in time deposits of \$203.7 million, or 38.3%.

Borrowings Total borrowings increased \$38.8 million, or 7.7%, from December 31, 2007 to \$543.1 million at March 31, 2008, due to retaining a portion of the borrowings acquired from Slades, \$10.3 million of which are junior subordinated debentures.

Stockholders Equity Stockholders equity as of March 31, 2008 totaled \$300.7 million, as compared to \$220.5 million at December 31, 2007. Equity increased mainly due to common stock issued for the acquisition of \$76.2 million, net income of \$6.3 million, and the net change in the unrealized losses on securities of \$1.8 million offset by dividends declared of \$2.9 million and the change in fair value of derivatives of \$2.0 million.

Equity to Assets Ratio The ratio of equity to assets was 9.0% and 8.0% at March 31, 2008 and at December 31, 2007, respectively.

RESULTS OF OPERATIONS

Summary of Results of Operations The Company's results of operations are largely dependent on net interest income, which is the difference between the interest earned on loans and securities and the interest paid on deposits and borrowings. The results of operations are also affected by the level of income/fees from loans, deposits, mortgage banking, and wealth management activities, as well as operating expenses, the provision for loan losses, the impact of federal and state income taxes, and the relative levels of interest rates and economic activity.

The Company reported net income of \$6.3 million, a \$318,000, or a 4.8% decrease, for the first quarter of 2008 as compared to the first quarter of 2007. Diluted earnings per share were \$0.44 for the three months ended March 31, 2008, compared to \$0.45 for the three months ended March 31, 2007.

Effective March 1, 2008 the Company completed the acquisition of Slades. This acquisition may have a significant impact on comparative period results and will be discussed throughout the document as it applies.

Net Interest Income The amount of net interest income is affected by changes in interest rates and by the volume and mix of interest earning assets and interest bearing liabilities.

On a fully tax equivalent basis, net interest income for the first quarter of 2008 increased \$1.7 million, or 7.1%, to \$26.1 million, as compared to the first quarter of 2007. The Company's net interest margin was 3.90% for the quarter ended March 31, 2008 as compared to 3.84% for the quarter ended March 31, 2007. The Company's interest rate spread (the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities) was 3.37% for the first quarter of 2008, a 16 basis point increase when compared to the same period in the prior year.

The yield on earning assets was 6.19% for the quarter ending March 31, 2008, compared with 6.38% in the same quarter ending in 2007. The average balance of securities has decreased by \$31.6 million, or 6.3%, as compared with the prior year. The average balance of loans increased by \$204.1 million, or 10.2%, and the yield on loans decreased by 36 basis points to 6.39% for the first quarter of 2008 compared to 6.75% for the first quarter in 2007. This decrease in the yield on earning assets is largely attributable to variable rate loans re-pricing lower with decreases in the underlying rate index (e.g. LIBOR, Prime) with the increase in outstanding loans driven largely by the Slades acquisition (see Note 10 above).

For the first quarter of 2008, as compared to the same period in 2007, the average balance of interest-bearing liabilities increased by \$132.7 million, or 6.5%, driven largely by the

Slades acquisition (see Note 10 above). The average cost of these interest bearing liabilities decreased to 2.82% as compared to 3.17% in 2007. Attributing toward the decrease in the cost of interest bearing liabilities was the additional cost incurred in the second quarter of 2007 associated with the interest expense on an additional \$25.7 million at 8.375% of trust preferred securities outstanding pending refinancing in April of 2007.

The following tables present the Company's daily average balances, net interest income, interest rate spread, and net interest margin for the three months ending March 31, 2008 and March 31, 2007. For purposes of the table and the following discussion, income from interest-earning assets and net interest income are presented on a fully-taxable equivalent basis by adjusting income and yields earned on tax-exempt interest received on loans to qualifying borrowers and on certain of the Company's securities to make them equivalent to income and yields on fully-taxable investments, assuming a federal income tax rate of 35%.

(1) Investment Securities are at average fair value.

(2) The total amount of adjustment to present interest income and yield on a fully tax-equivalent basis is \$374 and \$420 for the three months ended March 31, 2008 and 2007, respectively. Also, non-accrual loans have been included in the average loan category; however, unpaid interest on non-accrual loans has not been included

for purposes of determining interest income.

- (3) Average nonaccruing loans are included in loans.
- (4) Interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities. Net interest margin represents annualized net interest income as a percent of average interest-earning assets.

The following table presents certain information on a fully tax-equivalent basis regarding changes in the Company's interest income and interest expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to: (1) changes in rate (change in rate multiplied by old volume), (2) changes in volume (change in volume multiplied by old rate), and (3) changes in volume/rate (change in volume multiplied by change in rate).

(1) The total amount of adjustment to present income and yield on a fully tax-equivalent basis is \$374 and \$420 for the three months ended March 31, 2008 and 2007, respectively.

(2) Loans include portfolio loans, loans held for sale and nonperforming loans; however unpaid interest on nonaccrual loans has not been included for purposes of determining interest income.

Provision For Loan Losses The provision for loan losses represents the charge to expense that is required to maintain an adequate level of allowance for loan losses. Management's periodic evaluation of the adequacy of the allowance considers past loan loss experience, known and inherent risks in the loan portfolio, adverse situations which may affect the borrowers' ability to repay, the estimated value of the underlying collateral, if any, and current economic conditions. Substantial portions of the Bank's loans are secured by real estate in Massachusetts. Accordingly, the ultimate collectibility of a substantial portion of the Bank's loan portfolio is susceptible to changes in property values within the state.

The provision for loan losses increased to \$1.3 million for the three months ended March 31, 2008, compared with the \$891,000 reported in the comparable year-ago period. The provision for loan loss has increased primarily due to increased levels of charge-offs and nonperforming loans as well as signs of overall softening in the economy.

The ratio of the allowance for loan losses to total loans was 1.29%, 1.31% and 1.34% at March 31, 2008, December 31, 2007 and March 31, 2007, respectively. The allowance for loan losses at March 31, 2008 was 299.22% of nonperforming loans, as compared to 351.01% at December 31, 2007 and 364.65% at March 31, 2007.

The provision for loan losses is based upon management's evaluation of the level of the allowance for loan losses in relation to the estimate of loss exposure in the loan portfolio. An analysis of individual loans and the overall risk characteristics and size of the different loan portfolios is conducted on an ongoing basis and is reviewed periodically by an independent third-party loan review consultant. As adjustments are identified, they are reported in the earnings of the period in which they become known.

Non-Interest Income Non-interest income increased by \$446,000, or 5.7%, during the three months ended March 31, 2008, respectively, as compared to the same period in the prior year.

Service charges on deposit accounts increased by \$226,000, or 6.6%, for the three months ended March 31, 2008, as compared to the same period in 2007, primarily due to increased overdraft fees.

Wealth management revenue increased by \$862,000, or 47.5%, for the three months ended March 31, 2008, as compared to the same period in 2007. Investment management revenue increased by \$942,000, or 60.9%, for the three months ended March 31, 2008. Assets under management at March 31, 2008 were \$1.3 billion, an increase of \$448.9 million, or 53.0%, as compared to March 31, 2007. On November 1, 2007 Rockland Trust completed its acquisition of assets from the Lincoln, Rhode Island-based O'Connell Investment Services, Inc. The closing of this transaction added approximately \$200 million to the assets under management. Retail wealth management revenue decreased by \$80,000, or 30.0%, for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007.

Mortgage banking income increased by \$340,000, or 43.9%, for the three months ended March 31, 2008, as compared to the same period in 2007. The balance of the mortgage servicing asset was \$2.0 million and loans serviced amounted to \$265.6 million as of March 31, 2008, as compared to a mortgage servicing asset balance of \$2.3 million and loans serviced amounting to \$281.7 million at March 31, 2007.

There was a net loss on the sale of securities of \$609,000 during the first quarter of 2008. Of this loss, \$742,000 is associated with the sale of the majority of the Slade's Ferry Bancorp. securities portfolio, which was offset by gains on agency securities reported earlier in the quarter. There were no gains or losses on the sale of securities during the first quarter of 2007.

Other non-interest income decreased by \$405,000, or 31.0%, and for the three months ended March 31, 2008, as compared to the same period in 2007. The majority of decreases are in the following categories: 1031 exchange income decreased by \$294,000, due to the slowdown in national commercial real estate markets and trading asset losses of \$68,000.

Non-Interest Expense Non-interest expense increased by \$2.6 million, or 12.0%, for the three months ended March 31, 2008, respectively, as compared to the same period in 2007.

Salaries and employee benefits increased by \$1.0 million, or 7.5%, for the three months ended March 31, 2008, as compared to the same periods in 2007. The increase in salaries and benefits is attributable to the Slades acquisition, annual merit increases, incentive programs, and the O'Connell Investment Services, Inc. acquisition in the fourth quarter of 2007.

Occupancy and equipment expense increased by \$349,000, or 13.7%, for the three-month period ending March 31, 2008, as compared to the same period in 2007 mainly due to increases in rent expense of \$136,000 due to new locations, \$78,000 for snow removal and sanding, and the effects of the Slade's Ferry Bancorp. acquisition.

Data processing and facilities management expense increased by \$196,000, or 18.0%, for the three-month period ending March 31, 2008, as compared to the same period in 2007. The increase is partially a result of new functionality as well as an increase in volume.

Due to the Slade's Ferry Bancorp. acquisition there was \$744,000 of merger and acquisition related expenses in the first quarter of 2008.

During the three months ending March 31, 2008 the Company recognized a recovery on WorldCom bond loss of \$418,000. The loss was previously recorded as of the period ended June 30, 2002.

Other non-interest expense increased by \$718,000, or 15.4%, for the three-month period ending March 31, 2008, as compared to the same period in 2007. The increase in the three-month period is primarily attributable to advertising expenses of \$208,000, consulting fees of \$197,000, intangible amortization of \$170,000 and contribution expense of \$97,000.

Income Taxes For the quarters ending March 31, 2008 and March 31, 2007, the Company recorded combined federal and state income tax provisions of \$2.3 million and \$2.8 million, respectively. These provisions reflect effective income tax rates of 26.9% and 29.8% for the quarters ending March 31, 2008 and March 31, 2007, respectively. The impact of the Company's New Markets Tax Credit program (NMTC) was the primary contributor to the reduction in the effective tax rate.

The tax effects of all income and expense transactions are recognized by the Company in each year's consolidated statements of income regardless of the year in which the transactions are reported for income tax purposes.

During the second quarter of 2004, the Company announced that one of its subsidiaries (a Community Development Entity, or CDE, described above as Rockland Trust Community Development LLC (RTC CDE I), had been awarded \$30.0 million in tax credit allocation authority under the NMTC program of the United States Department of Treasury. During 2006, the Company, through another of its CDE subsidiaries described above as Rockland Trust Community Development Corporation II (RTC CDE II), was awarded an additional \$45.0 million in tax credit allocation authority under the New Markets Tax Credit program.

In both 2004 and 2005, the Bank invested \$15.0 million during each year from the first \$30.0 million award into RTC CDE I. During 2007 the Bank invested \$38.2 million into RTC CDE II. During 2008 the Bank invested \$6.8 million into RTC CDE II to provide it with the capital necessary to begin assisting qualified businesses in low-income communities throughout its market area. Based upon the Bank's total \$75.0 million investment in RTC CDE I and RTC CDE II, it is eligible to receive tax credits over a seven year period totaling 39.0% of its investment, or \$29.3 million. The Company recognized a \$1.0 million benefit from these tax credits for the three months ending March 31, 2008. A \$663,000 tax credit benefit was recognized for the three months ending March 31, 2007. The following table details the remaining expected tax credit recognition by year based upon the two \$15.0 million investments made in 2004 and 2005, the investment of \$38.2 million in 2007, and the remaining \$6.8 million made during 2008.

Table 9 New Markets Tax Credit Recognition Schedule
(Dollars in Thousands)

										Total
	Investment	2004 - 2007	2008	2009	2010	2011	2012	2013	2014	Credits

2005	\$ 15M	\$ 2,250	\$ 900	\$ 900	\$ 900	\$ 900	\$	\$	\$	\$ 5,850
2007	\$38.2M	\$ 1,910	\$ 1,910	\$ 1,910	\$ 2,292	\$ 2,292	\$ 2,292	\$ 2,292	\$	\$ 14,898
2008	\$ 6.8M	\$	\$ 340	\$ 340	\$ 340	\$ 408	\$ 408	\$ 408	\$ 408	\$ 2,652
Total	\$ 75M	\$ 7,310	\$ 4,050	\$ 4,050	\$ 4,432	\$ 3,600	\$ 2,700	\$ 2,700	\$ 408	\$ 29,250

Return on Average Assets and Equity The annualized consolidated returns on average equity and average assets for the three months ended March 31, 2008 were 10.01% and 0.87%, respectively, compared to 11.73% and 0.96% reported for the same period last year.

Asset/Liability Management

The Bank's asset/liability management process monitors and manages, among other things, the interest rate sensitivity of the balance sheet, the composition of the securities portfolio, funding needs and sources, and the liquidity position. All of these factors, as well as projected asset growth, current and potential pricing actions, competitive influences, national monetary and fiscal policy, and the regional economic environment are considered in the asset/liability management process.

The Asset/Liability Management Committee (ALCO), whose members are comprised of the Bank's senior management, develops procedures consistent with policies established by the Board of Directors, which monitor and coordinate the Bank's interest rate sensitivity and the sources, uses, and pricing of funds. Interest rate sensitivity refers to the Bank's exposure to fluctuations in interest rates and its effect on earnings. If assets and liabilities do not re-price simultaneously and in equal volume, the potential for interest rate exposure exists. It is management's objective to maintain stability in the growth of net interest income through the maintenance of an appropriate mix of interest-earning assets and interest-bearing liabilities and, when necessary, within prudent limits, through the use of off-balance sheet hedging instruments such as interest rate swaps, floors and caps. The Committee employs simulation analyses in an attempt to quantify, evaluate, and manage the impact of changes in interest

rates on the Bank's net interest income. In addition, the Bank engages an independent consultant to render advice with respect to asset and liability management strategy.

The Bank is careful to increase deposits without adversely impacting the weighted average cost of those funds. Accordingly, management has implemented funding strategies that include Federal Home Loan Bank (FHLB) advances and repurchase agreement lines. These non-deposit funds are also viewed as a contingent source of liquidity and, when profitable lending and investment opportunities exist, access to such funds provides a means to leverage the balance sheet.

From time to time, the Bank has utilized interest rate swap agreements and interest rates caps and floors as hedging instruments against interest rate risk. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount for a predetermined period of time from a second party. Interest rate caps and floors are agreements whereby one party agrees to pay a floating rate of interest on a notional principal amount for a predetermined period of time to a second party if certain market interest rate thresholds are realized. The amounts relating to the notional principal amount are not actually exchanged.

At March 31, 2008 and December 31, 2007 the Company had interest rate swaps and at December 31, 2007 the Company had interest rate caps designated as cash flow hedges. The interest rate cap matured during the first quarter of 2008. The purpose of these swaps is to hedge the variability in the cash outflows of LIBOR-based borrowings attributable to changes in interest rates. The table below shows interest rate derivatives the Company held as of March 31, 2008 and December 31, 2007:

Table 10 Derivative Positions**Asset-Liability Management Positions**

Receive fixed, pay variable					\$6,330	\$6,330	(\$ 81)
Pay fixed, receive variable					\$6,330	\$6,330	\$ 81

In March 2008 the Company exited a \$35.0 million notional value LIBOR based interest rate swap hedging 3 month revolving FHLB advances with Bear Stearns and replaced it with a \$35.0 million notional value LIBOR based interest rate swap hedging 3 month revolving FHLB advances with Citigroup Financial. Upon exiting the swap, a \$1.2 million loss remained in other comprehensive income net of tax and will be amortized into interest expense on borrowings over the original maturity of the swap (until January 2010.) Associated amortization of \$21,000 was recognized in interest expense on borrowings in the first quarter of 2008.

Customer-Related Positions Interest rate derivatives, primarily interest-rate swaps, offered to commercial borrowers through our hedging program are designated as speculative under SFAS No. 133. However, we believe that our exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an identical dealer transaction. The commercial customer hedging program allows us to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap. For the quarter ended March 31, 2008, we recorded a total notional amount of \$6.3 million of interest rate swap agreements with commercial borrowers and an equal notional amount of dealer transactions. It is anticipated that over time customer interest rate derivatives will reduce the interest rate risk inherent in our longer-term, fixed-rate commercial business and real estate loans. The customer-related positions summarized in Table 10 include both the customer and offsetting dealer transactions.

Additionally, the Company enters into commitments to fund residential mortgage loans with the intention of selling them in the secondary markets. The Company also enters into forward sales agreements for certain funded loans and loan commitments to protect against changes in interest rates. The Company records unfunded commitments and forward sales agreements at fair value with changes in fair value as a component of Mortgage Banking Income.

The following table set forth the fair value of residential mortgage loan commitments and forward sales agreements at the periods indicated:

Table 11 Fair Value of Residential Mortgage Loan Commitments and Forward Sales Agreements

	March 31, 2008	Fair Value At December 31, 2007	March 31, 2007
	(Dollars in Thousands)		
Residential Mortgage Loan Commitments	\$389	\$ 286	\$243
Forward Sales Agreements	\$ 52	\$ 5	\$ 81
		Change for the Three Months Ended March 31,	
		2008	2007
Residential Mortgage Loan Commitments		\$ 103	\$ 150
Forward Sales Agreements		\$ 47	\$ 21
Total Change in Fair Value		\$ 150	\$ 171

Changes in these fair values are recorded as a component of mortgage banking income.

Market Risk Market risk is the sensitivity of income to changes in interest rates, foreign exchange rates, commodity prices and other market-driven rates or prices. The Company has no trading operations, with the exception of funds managed by the Company's investment management group and that are held within a trust to fund non-qualified executive retirement obligations and a \$1.2 million equities portfolio acquired as part of the Slade's Ferry Bancorp. acquisition that the Company plans on liquidating in the second quarter of 2008, and thus is only primarily exposed to non-trading market risk.

Interest-rate risk is the most significant non-credit risk to which the Company is exposed. Interest-rate risk is the sensitivity of income to changes in interest rates. Changes in interest rates, as well as fluctuations in the level and duration of assets and liabilities, affect net interest income, the Company's primary source of revenue. Interest-rate risk arises directly from the Company's core banking activities. In addition to directly impacting net interest income, changes in the level of interest rates can also affect the amount of loans originated, the timing of cash flows on loans and securities and the fair value of securities and derivatives as well as other affects.

The primary goal of interest-rate risk management is to control this risk within limits approved by the Board. These limits reflect the Company's tolerance for interest-rate risk over both short-term and long-term horizons. The Company attempts to control interest-rate risk by identifying, quantifying and, where appropriate, hedging its exposure. The Company manages

its interest-rate exposure using a combination of on and off-balance sheet instruments, primarily fixed rate portfolio securities, and interest rate swaps.

The Company quantifies its interest-rate exposures using net interest income simulation models, as well as simpler gap analysis, and Economic Value of Equity (EVE) analysis. Key assumptions in these simulation analyses relate to behavior of interest rates and behavior of the Company's deposit and loan customers. The most material assumptions relate to the prepayment of mortgage assets (including mortgage loans and mortgage-backed securities) and the life and sensitivity of nonmaturity deposits (e.g. DDA, NOW, savings and money market). The risk of prepayment tends to increase when interest rates fall. Since future prepayment behavior of loan customers is uncertain, the resultant interest rate sensitivity of loan assets cannot be determined exactly.

To mitigate these uncertainties, the Company gives careful attention to its assumptions. In the case of prepayment of mortgage assets, assumptions are derived from published dealer median prepayment estimates for comparable mortgage loans.

The Company manages the interest-rate risk inherent in its mortgage banking operations by entering into forward sales contracts. An increase in market interest rates between the time the Company commits to terms on a loan and the time the Company ultimately sells the loan in the secondary market will have the effect of reducing the gain (or increasing the loss) the Company records on the sale. The Company attempts to mitigate this risk by entering into forward sales commitments in amounts sufficient to cover all closed loans and a majority of rate-locked loan commitments.

The Company's policy on interest-rate risk simulation specifies that if interest rates were to shift gradually up or down 200 basis points, estimated net interest income for the subsequent 12 months should decline by less than 6.0%.

The following table sets forth the estimated effects on the Company's net interest income over a 12-month period following the indicated dates in the event of the indicated increases or decreases in market interest rates:

Table 12 Interest Rate Sensitivity

	200 Basis Point Rate Increase	200 Basis Point Rate Decrease
March 31, 2008	(2.9%)	0.6%
March 31, 2007	(1.9%)	(0.3%)

The results implied in the above table indicate estimated changes in simulated net interest income for the subsequent 12 months assuming a gradual shift up or down in market rates of 200 basis points across the entire yield curve. It should be emphasized, however, that the results are dependent on material assumptions such as those discussed above. For instance, asymmetrical rate behavior can have a material impact on the simulation results. If competition for deposits forced the Company to raise rates on those liabilities quicker than is assumed in the simulation analysis without a corresponding increase in asset yields, net interest income may be negatively impacted. Alternatively, if the Company is able to lag

increases in deposit rates as loans re-price upward, net interest income would be positively impacted.

The most significant factors affecting market risk exposure of the Company's net interest income during the first quarter of 2008 were (i) the shape of the U.S. Government securities and interest rate swap yield curve, (ii) the level of U.S. prime interest rate and LIBOR rates, and (iii) the level of rates paid on deposit accounts.

The Company's earnings are not directly and materially impacted by movements in foreign currency rates or commodity prices. Movements in equity prices may have an indirect but modest impact on earnings by affecting the volume of activity or the amount of fees from investment-related business lines, and directly by affecting the value at the Company's trading portfolio.

Liquidity Liquidity, as it pertains to the Company, is the ability to generate adequate amounts of cash in the most economical way for the institution to meet its ongoing obligations to pay deposit withdrawals and to fund loan commitments. The Company's primary sources of funds are deposits, borrowings, and the amortization, prepayment and maturities of loans and securities.

The Bank utilizes its extensive branch network to access retail customers who provide a stable base of in-market core deposits. These funds are principally comprised of demand deposits, interest checking accounts, savings accounts, and money market accounts. Deposit levels are greatly influenced by interest rates, economic conditions, and competitive factors. The Bank has also established repurchase agreements with major brokerage firms as potential sources of liquidity. At March 31, 2008, the Company had \$50.0 million outstanding in repurchase agreements. In addition to agreements with brokers, the Bank also had customer repurchase agreements outstanding amounting to \$88.6 million at March 31, 2008. As a member of the FHLB, the Bank has access to approximately \$270.1 million of borrowing capacity. On March 31, 2008, the Bank had \$332.1 million outstanding in FHLB borrowings.

The Company, as a separately incorporated bank holding company, has no significant operations other than serving as the sole stockholder of the Bank. Its commitments and debt service requirement at March 31, 2008 consist of \$61.8 million junior subordinated debentures, including accrued interest, of which \$51.5 million was issued to an unconsolidated subsidiary Independent Capital Trust V, in connection with the issuance of variable rate (LIBOR plus 1.48%) Capital Securities due in 2037, for which the Company has locked in a fixed rate of interest of 6.52% for 10 years through an interest rate swap. The remaining \$10.3 million is issued to Slade's Ferry Statutory Trust I an unconsolidated subsidiary acquired as part of the Slades acquisition. These debentures are due in 2034, are callable in March 2009 and have a floating rate of interest of LIBOR plus 2.79% at March 31, 2008. The Company called the junior subordinated debentures issued to Independent Capital Trust IV in April 2007. The Company's only obligations relate to its reporting obligations under the Securities and Exchange Act of 1934, as amended (the Exchange Act), and related expenses as a publicly traded company. The Company funds virtually all expenses through dividends paid by the Bank.

The Company actively manages its liquidity position under the direction of the Asset/Liability Management Committee. Periodic review under prescribed policies and

procedures is intended to ensure that the Company will maintain adequate levels of available funds. At March 31, 2008, the Company's liquidity position was well above policy guidelines. Management believes that the Bank has adequate liquidity available to respond to current and anticipated liquidity demands.

As of March 31, 2008, the Company has certain financial assets and liabilities recorded at fair value. The Company adopted the provisions of Statement of Financial Accounting Standards No. 157, *Fair Value Measurement*, (SFAS 157), as of January 1, 2008. In accordance with SFAS 157, the Company has classified its financial assets and liabilities within the appropriate level of the fair value hierarchy based upon the significance of the inputs to the valuation techniques. Fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. Fair values determined by Level 2 inputs utilize data points that are observable, directly or indirectly, such as quoted prices, interest rates and yield curves. Fair values determined by Level 3 inputs are unobservable data points for the asset or liability, and includes situations where there is little, if any, market activity for the asset or liability.

As noted in Note 4, Fair Value Disclosure, a majority of the Company's financial assets and liabilities have been classified as Level 2. These assets and liabilities have been initially valued at the transaction price and subsequently valued using market data including reportable trades, benchmark yields, broker/dealer quotes, bids, offers, and other industry and economic events. When necessary, the Company validates its valuation techniques by understanding the models used by pricing sources, obtaining market values from other pricing sources and challenging pricing data received from others. There have been no changes in the valuation techniques used during the current period.

Excluding cash equivalents, the Company's financial instruments may be sensitive to changes in economic factors such as interest rates or credit spreads. These risks are further described in Part II, Item 1A, Risk Factors of this Form 10-Q.

Capital Resources and Dividends The Federal Reserve Board, the Federal Deposit Insurance Corporation, and other regulatory agencies have established capital guidelines for banks and bank holding companies. Risk-based capital guidelines issued by the federal regulatory agencies require banks to meet a minimum Tier 1 risk-based capital ratio of 4.0% and a total risk-based capital ratio of 8.0%. At March 31, 2008, the Company had a Tier 1 risk-based capital ratio of 9.45% and a total risk-based capital ratio of 10.70%. The Bank had a Tier 1 risk-based capital ratio of 9.39% and a total risk-based capital ratio of 10.64% as of the same date.

A minimum requirement of 4.0% Tier 1 leverage capital is also mandated. On March 31, 2008, the Company and the Bank had Tier 1 leverage capital ratios of 8.55% and 8.60%, respectively.

On March 20, 2008 the Company's Board of Directors declared a cash dividend of \$0.18 per share, a 5.9% increase from December 2007, to stockholders of record as of the close of business on March 31, 2008. This dividend was paid on April 11, 2008. On an annualized basis, the dividend payout ratio amounted to 41.77% of the trailing four quarters earnings.

Contractual Obligations, Commitments, Contingencies, and Off-Balance Sheet Financial Instruments There have been no material changes in contractual obligations, commitments, contingencies, and off-balance sheet financial instruments during the first quarter of 2008. Please refer to the 2007 Form 10-K for a complete table of contractual obligations, commitments, contingencies, and off-balance sheet financial instruments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information required by this Item 3 is included in Item 2 of Part I of this Form 10-Q, entitled Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures. The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

Changes in Internal Controls over Financial Reporting. There were no changes in our internal control over financial reporting that occurred during the first quarter of 2008 that have materially affected or are reasonably likely to materially affect the Company's internal controls over financial reporting.

Item 4T. Controls and Procedures N/A

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Rockland is the plaintiff in the federal court case commonly known as Rockland Trust Company v. Computer Associates International, Inc., United States District Court for the District of Massachusetts Civil Action No. 95-11683-DPW (the CA Case). On August 31, 2007 the judge in the CA Case issued a Memorandum and Order (the Decision) which directed the Clerk to enter judgment for Computer Associates in the amount of \$1,089,113.73 together with prejudgment interest in the amount of \$272,278 for a total of \$1,361,392. On Wednesday, September 5, 2007, Rockland paid the amount due to Computer Associates in accordance with the Decision from the accrual established on June 30, 2007. The Decision also states that: . . . Computer Associates asserts in a recent filing that it has incurred \$1,160,586.81 in attorney fees and costs. . . The propriety of the award of attorney fees and costs is disputed by Rockland Trust . . . Computer Associates may choose to pursue attorney fees and costs through, for example, a motion to amend or make additional findings.

In September 2007 Computer Associates filed a motion requesting an award of attorney fees and costs. Rockland believes that it has meritorious defenses and has opposed that motion. Rockland has not established a reserve for the attorney fees and costs claim, and the court has not yet rendered its decision with respect to the motion.

In addition to the foregoing, the Company is involved in routine legal proceedings occurring in the ordinary course of business which in the aggregate are believed by us to be immaterial to our financial condition and results of operations.

Item 1A. Risk Factors

As of the date of this report, there have been no material changes with regard to the Risk Factors disclosed in Item 1A of our 2007 Annual Report on Form 10-K, which are incorporated herein by reference.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) - (c) Not applicable.

Item 3. Defaults Upon Senior Securities None

Item 4. Submission of Matters to a Vote of Security Holders None

Item 5. Other Information None
