Report of First-Half Results (Consolidated)
For Fiscal Year Ending December 31, 2002

Company: Trend Micro Incorporated Tokyo Stock Exchange 1/st/ Section
Code: 4704 Location : Tokyo

(URL <http://www.trendmicro.co.jp/>)

Contact: Title Controller, Finance & Accounting Department
Name Ryo Masaki (Phone: 81-3-5334-3600)

Date of the board of directors meeting
authorizing the first-half results: July 30, 2002

US accounting standard is not adopted for preparing the consolidated financial statements for the first half of current fiscal year.

Notice Regarding Forward Looking Statements

The statements included in this report contain "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements regarding our expectations about our earnings for the third quarter ending September 30, 2002 and for the 2002 fiscal year. Many important factors could cause our actual results to differ materially from those expressed in our forward-looking statements. These factors include:

- . Customer acceptance of our new products and services
- . The impact of competing products and services
- . Difficulties in adapting our products and services to the Internet
- . Difficulties in addressing new virus and other computer security problems
- . The potential lack of attractive investment targets and difficulties in successfully executing our investment strategy
- . Declining prices for our products and services

We assume no obligation to update any forward-looking statements. For more

Edgar Filing: TREND MICRO INC - Form 6-K

details regarding risk factors relating to our future performance, please refer to our filings with the SEC including our annual report on Form 20-F which was filed on July 1, 2002.

1. Financial Highlights for the first half of FY 2002 January 1, 2002 through June 30, 2002

(1) Consolidated Results of Operations

(All figures except for per share information are rounded down to millions of yen.)

	Sales	Growth rate	Operating income	Growth rate	Ordinary income
	Millions of yen	%	Millions of yen	%	Millions
The first half of FY 2002	20,507	58.5	6,356	119.3	6,27
The first half of FY 2001	12,939	34.8	2,898	(3.9)	3,00
FY 2001 (annual)	31,326		9,481		9,54

	Net income	Growth rate	Net income per share (basic)	Net income per share
	Millions of yen	%	yen	
The first half of FY 2002	3,517	-	26.62	
The first half of FY 2001	(1,376)	-	(10.48)	
FY 2001 (annual)	2,421		18.40	

(Note)

- Gain/Loss on investment in affiliated companies: 2 million yen (-104 million yen in the first half of FY 2001, -129 million yen in FY 2001)
- The average number of stock: 132,153,432 stocks (131,339,944 stocks in the first half of FY 2001, 131,594,913 stocks in FY 2001)
- Change in accounting principle: None
- The percentage of sales, operating income, ordinary income and net income are comparison to the first half of prior fiscal year.

(2) Consolidated Financial Position

	Total assets	Shareholders' equity	Shareholders' equity ratio
As of	Millions of yen	Millions of yen	%

Edgar Filing: TREND MICRO INC - Form 6-K

June 30, 2002	69,667	34,729	49.8
June 30, 2001	53,413	26,914	50.4

December 31, 2001	65,317	30,901	47.3

(Note)

Number of the stocks issued : 132,419,856 stocks in the first half of current fiscal year (131,681,887 stocks in the first half of FY 2001, 132,043,182 stocks in the FY 2001)

1

(3) Consolidated Cash Flow Position

As of	Cash flows from operating activities Millions of yen	Cash flows from investing activities Millions of yen	Cash flows from financing activities Millions of yen
June 30, 2002	6,787	(1,415)	544
June 30, 2001	4,650	(1,363)	6,503

December 31, 2001	12,563	(2,918)	5,460

(4) Basis of consolidation and investments in affiliated companies:

The number of consolidated subsidiaries	15
The number of unconsolidated subsidiaries accounted by equity method	0
The number of affiliated companies	4

(5) Change in reporting entities:

The number of additional consolidated subsidiaries	0
The number of excluded consolidated subsidiaries	3
The number of additional consolidated affiliated companies	0
The number of excluded consolidated affiliated companies	0

Projected consolidated earnings

(1) Earning projections for the current fiscal year January 1, 2002 through December 31, 2002

	Sales Millions of yen	Ordinary income Millions of yen
For the year ending December 31, 2002	42,000	13,000

Edgar Filing: TREND MICRO INC - Form 6-K

(Note) Projected consolidated net income per share for the current fiscal year : 55.28 yen

(2) Projected earnings for the next quarter (July 1, 2002 through September 30, 2002)

	Sales	Ordinary income	Net income
	Millions of yen	Millions of yen	Millions of yen
3rd Qtr	9,800 to 10,300	2,250 to 2,550	1,250 to 1,400

(Note) Surrounding environment of Trend Micro Group may change significantly in a very short period of time. Therefore, the Company has decided to disclose projected earnings range in a quarterly basis, but the actual earnings may deviate from the projection.

2

Attachment to the Report

1. Condition of corporate group

Overview of corporate group

Trend Micro Group consists of Trend Micro Inc., and its 15 subsidiaries which develop and sell anti-virus products and offer other related services and four affiliated companies are: NTT Data Security Corporation which offers total network securities, Soft Trend Capital Corporation which manages capital funds to be invested into Internet-related ventures, Japan JCN Co., Ltd which develops and offers the security system against unlawful access and NetSTAR Inc. which develops and offers the products of URL filtering.

The business related to anti-virus are described below:

The products related to anti-virus:

PC client products
 LAN server products
 Internet server products
 Other products

Trend Micro Inc develops and sells the products. Some parts of development activities are entrusted to Trend Micro Incorporated (U.S.A.), Trend Micro Deutschland GmbH (Germany), Trend Micro (Shanghai) Inc. (China). Trend Micro Incorporated (Taiwan) also handles the manufacturing and sales of the products, part of which are purchased from Trend Micro Inc (Japan), Trend Micro Inc. (U.S.A.), Trend Korea Inc (U.S.A.), Trend Micro Deutschland GmbH (Germany), Trend Micro Italy S.r.l., Trend Micro Australia Pty Ltd. (Australia), Trend Micro do Brasil Ltda. (Brazil), Trend Micro Hong Kong Limited, Trend Micro (UK) Limited, Trend Micro C.V (Mexico), Trend Micro (Shanghai) Inc. (China).

In addition, Trend Micro Inc (Japan) owns software copyrights and its overseas subsidiaries royalties based on the respective sales of such subsidiaries.

2. Management Policy and Business Results

Trend Micro Group's Basic Management Policy

Since its founding, Trend Micro has provided "peace of mind" to all users of computer networks and the Internet by offering anti-virus and Internet content security solutions. We currently have the strong impression that needs of the market to be met by Trend Micro has been changing into larger one in accordance with development of the Internet followed by rapid growth of the market scale of business. Such dramatic change tells us that we have to change

Edgar Filing: TREND MICRO INC - Form 6-K

our current corporate scheme to sell products through a single sales organization to new global corporate scheme to provide value-added services through the Internet and in addition, that even among the corporations to provide value-added services through the Internet while competing to a greater extent in the market, we should aim at provision of high value-added products and services which show high difficulty level for competitors to develop them to enter the market. In order to contribute to development of information society not only in Japan, but in the world, we would like to forge a safe and pleasant network environment by offering solutions to protect company networks and home PCs from invasion of directly-damaging computer viruses or Malicious Code (harmful programs created by the languages such as JAVA or Active X) as well as harmful content such as SPAM mail (unwanted e-mail) or Bad URLs (websites providing the information that offends public order and morals).

We wish to enhance our enterprise value through these network security operations, and, as the result, to contribute to all the shareholders in Trend Micro.

Basic Policy on the Distribution of Profits

Although Trend Micro has steadily increased its profits in the past few years, we believe that the Internet security market has begun its full-fledged expansion and that our market share has not stabilized in relation to our U.S. competitors. Our larger rivals may well concentrate their management resources to further enlarge their market share. Since our business areas are more concentrated on anti-virus solutions and Internet content security related solutions than other competitors with diversified Internet security solutions, we also face the possibility of larger profit fluctuations in the short term.

In this business environment the most critical management challenges are to strengthen our financial structure and management foundation and aggressively develop new business operations in order to maintain our competitiveness in the market. Our priority, therefore, is to accumulate reserves, which means withholding dividends for the time being. Regarding our accumulated reserves, we would like to ask all shareholders to accept our decision to appropriate them for investment in research and development division to be further strengthened in the future by Trend Micro and for activities to improve brand awareness and corporate image.

Basic Policy on the Trading Lots for Shares

We understand that it is our critical task to ensure the liquidity of the shares in Trend Micro. We do not believe, however, that all the shareholders in Trend Micro will benefit from the reduction of minimum trading lots for shares, because the current liquidity of the shares is being maintained apparently at a reasonable level and the reduction of minimum trading lots requires considerable expense.

We promise that we continue to review the minimum trading lots from the viewpoint of shareholders' benefits as well as the liquidity of the shares.

Medium and Long-Term Management Strategy

Impacted by deterioration of corporate sentiment in the U.S. and Europe and the lingering economic slump in Japan, corporate investment in information systems has shown signs of a slowdown. We know that the situation, represented by such reduction in cooperate investment into information systems, will not allow us to have any optimistic outlook for the business environment surrounding us.

On the other hand, many corporations are now increasingly reliant on computer networks represented by mail systems; the monetary damages for the

Edgar Filing: TREND MICRO INC - Form 6-K

opportunity losses caused by system down of company networks have come to far larger than several years ago. It is expected that network security including anti-virus solutions will take a more important role in the future, and that the market scale of the network security business will steadily expand in the long and medium terms. In response to such expansion of the market, we would like to promote recruiting and securing of the necessary human resources, strengthening of the management bases and increasing of business efficiency in a more positive way at Trend Micro and its overseas subsidiaries.

The technological innovations in our industry are constant and fast: as for the next generation Internet, for example, some people have raised the possibility that further development of open platforms such as broadband, mobile telecommunications and Linux may bring sweeping changes to the present network environment. In order to take and maintain competitive advantage against the major U.S. competitors, we need to respond to the external environment changes initiated by the technological

4

innovations on a timely basis.

Outbreak of new types of viruses, such as "NIMDA" of the last year, gave greater impact on anti-virus solutions. These viruses, which have compound infection approaches, not only rapidly enlarge the scale of the damages with their high infectious capacity, but repeat the infection, if even one single PC of a network remains infected. To respond to such new types of the viruses, we have to provide the better anti-virus solutions than the conventional ones, which were just to detect and clean viruses upon receipt of a virus patter file.

In order to protect corporate information assets from mixed-threat virus, we have set up "TM EPS (Trend Micro Enterprise Protection Strategy)", our new anti-virus strategy which enables us to reduce infection damages and anti-virus costs and provide businesses with a flexible architecture of services, products and centralized management.

Our products compliant with "TM EPS" newly feature a function to provide preventive measures against virus infection prior to receipt of the virus pattern file as well as a function to rummage out viruses throughout PCs and servers of the network once again and prevent reinfection by cleaning any remaining viruses promptly. These functions allow corporate users to respond to attacks of new viruses in shorter time than before as well as to cut time and cost requiring for recovery from the infection damages by rummaging and cleaning the viruses all at once in the network. Moreover, for enabling the network administrator to manage and operate these functions in an effective and easy manner, we will expand functions of the products that integrate and manage the Trend Micro products deployed in the network.

While network environments and information assets of corporations have become more significant than before, threats of viruses are rapidly changing. In such an environment, we would like to develop new ant-virus strategies and solutions always ahead of our competitors and offer products and services to meet users' needs, aiming to maintain our current competitive advantage in the market for corporate customers and to increase the market share further.

Summary of Consolidated Financial Results for the first half of FY2002

The six-months under review saw a slowdown in demand within the IT industry, primarily the result of declining corporate IT spending in Japan, Europe and the United States. The corporate spending cuts also put the damper on demand for network security solutions, which have been positioned as a high

Edgar Filing: TREND MICRO INC - Form 6-K

priority in IT investment.

We have no intention, however, to change our outlook showing that our industry will undergo steady transition in the long and medium terms in spite of short-term fluctuation, because there still exists an underlying tendency that many companies continue to expand investments into overhaul of mission-critical operation systems. Further, since many of recent harmful viruses are strong and have multiple infection routes, users are requesting vendors of network security products to provide more effective products and services than ever. The number of virus damage reports has increased constantly: while we received 25,644 reports of domestic virus damages over the past year, we have already received 28,938 reports over the first half of this year.

During the first half of FY2002, Trend Micro domestic operations significantly increased contracts for its Virus Buster Corporate Edition (Office Scan) and "ServerProtect," winning not only large companies but also medium and small companies. Sales of InterScan, our anti-virus software for Internet servers, rose steadily, in response to the more frequent virus infections spread via e-mail. In the retail market, the sales of "Virus Buster 2002" have been continuously favorable in the current fiscal year in succession to the previous year. Further, the numbers of customers are also rapidly increasing in the VirusWall E-Mail Service (formerly the Internet Outsourcing Service (IOS)) to offer anti-virus solutions in collaboration with ISP (Internet Service Provider).

In the phase of deployment of our business operations in North America and Europe, anti-virus products, such as "InterScan" series and "ScanMail" series, used in higher layers of hierarchy of the network mainly contributed to the steady growth in sales of the products for relatively large-sized corporate users. As a highly specialized anti-virus solutions provider, we have pioneered post-contract support services, called "Premium Support," introducing them before our major competitors in the industry. This service is in response to the trend among large corporate users to select a vendor based not only on the performance of its anti-virus software but also on the quality of support the vendor offers during the license period to swiftly alert customers to new viruses.

During the first half of FY2002, Trend Micro posted consolidated sales of (Yen) 20,507 million, an increase of 58.5 percent over the last year. Consolidated ordinary income increased 108.8 percent to (Yen) 6,271 million, while net income resulted (Yen) 3,517 million.

Sales in Japan posted an increase of 68.4 percent to (Yen) 12,696 million, while operating income from these sales rose to (Yen) 9,802 million, up 107.4 percent from the comparable period in FY2001. U.S. sales

5

increased 48.4 percent to (Yen) 7,271 million, with operating income totaling (Yen) 903 million, a 198.7 percent increase. In Europe, sales increased 67.8 percent to (Yen) 4,707 million, and operating loss resulted (Yen) 60 million. Asia Pacific sales increased 51.8 percent to (Yen) 3,525 million, and operating income resulted (Yen) 210 million. Other areas posted combined sales of (Yen) 603 million, a 43.2 percent increase, and operating income of (Yen) 42 million, down 65.0 percent.

Earning Projections for FY2002

We expect that we will have to face the severe economic environment continuously in FY 2002, because of the prospected continuing economic stagnation in Japan, U.S. and Europe, which is to restrain corporate investments

Edgar Filing: TREND MICRO INC - Form 6-K

into information systems.

In Japan, as a response to the severe economic environment, we aim to increase our share in the market for large companies by releasing the products compliant with "TM EPS" as well as to maintain or improve our growing rate in the market for medium and small companies, and retails by offering wider ranges of products and services.

In North America and Europe, we also aim to increase our share in the market for large companies by releasing the products compliant with "TM EPS". Moreover, we will conduct marketing activities to enhance our brand recognition, in order to expand our customer base not only on large companies, but also on medium and small companies, as well as to enter into the retail market.

Accordingly, we project our consolidated earnings in FY 2002 and in the 3rd Quarter as follows:

Projection for FY 2002 (From Jan. 1 to Dec. 31, 2002)

Consolidate Sales:	Yen 42,000 Million, up 34.1% from the same term la
Consolidated Ordinary Income:	Yen 13,000 Million, up 36.1 % from the same term l
Consolidated Net Income:	Yen 7,300 Million, up 201.5 % from the same term l

Projection for the 3/rd/ Quarter (Jul. 1 to Sep. 30, 2002)

Consolidate Sales:	Yen 9,800 Million to Yen 10,300 Million
Consolidated Ordinary Income:	Yen 2,250 Million to Yen 2,550 Million
Consolidated Net Income:	Yen 1,250 Million to Yen 1,450 Million

Earnings projections are calculated based on estimated major currency exchange rates of \$1 = (Yen) 115 and 1 EUR = (Yen)110.

Significant accounting policies and practices for preparing consolidated semi-annual financial statements.

1. Basis of consolidation	<p>All subsidiaries are consolidated. The subsidiaries are the following 15 companies</p> <p>Trend Micro Incorporated (Taiwan) Trend Micro Inc. (USA) Trend Korea Inc.(Korea) Trend Micro Italy S.r.l. (Italy) Trend Micro Deutschland GmbH(Germany) Trend Micro Australia Pty.Ltd.(Australia) Trend Micro do Brasil Ltda. (Brazil) Trend Micro France (France) Trend Micro Hong Kong Limited (Hong Kong) Trend Micro Incorporated Sdn.Bhd.(Malaysia) Trend Micro (UK) Limited (United Kingdom) Trend Micro Latinoamerica S.A. de C.V. (Mexico) Trend Micro (NZ) Limited (Newzealand) ipTrend Incorporated (Taiwan) Trend Micro (Shanghai) Inc. (China)</p> <p>Trend Micro Incorporated Sdn.Bhd.(Malaysia) and Incorporated (Taiwan) are on the process of the</p>
2. Basis of applying equity method	<p>Equity method is applied to investment in affiliated companies. The affiliated companies are the following 4 companies NTT Data Security Corporation (Japan) Soft Trend Capital Corporation (Japan) JCN Co., Ltd. (Japan) NetSTAR.Inc. (Japan) There is no unconsolidated subsidiary and affiliate, which equity method is not applied.</p>
3. Fiscal year of consolidated subsidiaries	<p>All financial statements included in a set of consolidated financial statements are prepared as of the same date</p>
4. Accounting policies and practices (1)Valuation of significant assets	<p>(1) Securities Available-for-sale:</p> <p>Available-for-sale with fair market value: The securities are stated at the market value at the end of the period (valuated at the value at the end of the period (valuated at the market value at the end of the period) recognized in equity directly, not to reflect the cost of selling is determined by the weighted average</p> <p>Available-for-sale without a market value: The securities are stated at the weighted average</p> <p>(2) The transaction of derivatives</p>

The market value method

13

(3) Inventories

Finished goods Raw materials Supplies

Finished goods, raw materials and supplies are stated at the weighted average cost.

In Trend Micro Incorporated (Taiwan) and Trend Micro (U.S.A), such inventories are stated at the cost determined by the first-in-first-out method.

Work in process

Work in process is stated at the cost being direct materials accumulated production and development cost for projects

(2) Depreciation and amortization method for fixed assets

(1) Property and equipment

Parent company -

Depreciation is computed by declining-balance method. Useful life and salvage value of the fixed assets are determined using the standard which is regulated by corporate tax law.

Building (excluding facilities and leasehold improvements) acquired after April 1, 1998 are depreciated using the straight-line method.

Foreign consolidated subsidiaries -

Depreciation is computed by a straight-line method

(2) Intangibles

Parent company

(Software for sale)

Straight-line method over the estimated useful life (mainly, for 12 months)

(Software for internal use)

Straight-line method over the estimated useful life (5 years).

(Other intangibles)

Straight-line method

Amortization years are determined using the standard which is regulated by corporate tax law.

Foreign consolidated subsidiaries

Straight-line method over the estimated economic useful lives.

(3) Long-term prepaid expense

Edgar Filing: TREND MICRO INC - Form 6-K

Amortization is computed by a straight-line method. Amortization years are determined using the statute of law which is regulated by corporate tax law.

(3) Accounting for significant deferred assets

Issuing costs of stocks and bonds are charged to expense as incurred.

(4) Accounting policies for significant provisions

(1) Allowance for bad debt

As contingency against losses from default of accounts receivable, the allowance for doubtful accounts is provided. The amount is determined using a percentage based on actual doubtful account loss against total of accounts receivable amount, which takes into consideration the possibility of recovering specific liabilities.

14

(2) Allowance for sales return

In order to reserve future losses from sales return subsequent to the fiscal year-end, allowance for sales return is provided based on the past experience in the sales return.

(3) Allowance for retirement benefits

In order to reserve future losses from retirement of employees, allowance for retirement benefits are provided based on retirement benefit liabilities and pension assets at the end of the period under reviewing.

Regarding actuarial gain and loss, they are all expensed in the following accounting period in parent company.

In consolidated subsidiaries, they are amortized by a straight-line method over the average employee job life and expensed in the accounting period of incurrence and thereafter.

Unrecognized prior service cost is booked in consolidated subsidiaries. It is amortized by a straight-line method over the average employee job life and expensed in the accounting period

Edgar Filing: TREND MICRO INC - Form 6-K

of incurrence and thereafter.

(5) Translation of major foreign-currency assets and liabilities into Yen.

Foreign-currency financial receivables and liabilities are translated into yen at the spot rate effective at the end of the period. Exchange differential is treated as a profit/loss.

Foreign-currency assets and liabilities held by overseas subsidiaries are translated into yen at the spot rate effective at the end of the period. Revenue and expenses of overseas subsidiaries are translated into yen at the average rate during the period. Exchange differential is included in "Cumulative translation adjustment" under Shareholders' equity.

(6) Accounting for leased assets

Finance leases without transfer of ownership of the leased assets are accounted for in the same manner as applied to operating leases.

(7) Consumption tax

Transactions subject to consumption tax are stated at the amount net of the related consumption tax.

(8) Accounting treatment for stock warrants and stock options granted to directors and certain employees under the Company's incentive plan

The parent company and its subsidiaries have adopted incentive plans pursuant to which warrants to purchase parent company shares were granted to directors and certain employees. Under these plans, the parent company issued bonds with detachable warrants and immediately repurchased all of the warrants for distribution to grantees.

In addition, our U.S. subsidiary adopted an incentive plan in which parent company shares, that were transferred to a special purpose company by certain large shareholders, and from the previous fiscal year, based on the unrevised Japanese Commercial Code, the compensation plan of stock option (subscription right method) for directors and certain employees of the company and subsidiaries that is provided as specific related entrepreneur on the Industrial Revitalization Special Measures Law, were granted to certain directors and employees

Edgar Filing: TREND MICRO INC - Form 6-K

(these three plans are hereinafter referred to as the "stock option plan").

The total compensation cost under the stock option plan is measured by differences between the quoted market price of the parent company shares at the measurement date (the first date on which both the number of shares an individual employee is entitled to receive and the exercise price are known (normally the grant date)) and the exercise price and is recognized as expense over the exercisable period.

The warrant portion of the bonds with detachable warrants issued under the stock option plan is recorded as "warrant account" in current liability upon issuance of the bonds and eliminated upon repurchasing the warrants.

The accounting policy on compensation cost is the same as that of our U.S. subsidiary. For the purpose of unification of accounting policies to disclose financial position and results of operation as a group more accurately, financial statements before consolidation of parent company and its subsidiaries (other than the U.S. subsidiary) have been adjusted through consolidation.

The adjustment of the parent company's financial statements, which was made on the process of consolidation, resulted in an increase in operating income, ordinary income and income before taxes of 113,206 thousand yen each, and an increase in net income after tax of 65,603 thousand yen. In addition, the balance of consolidated retained earnings at the end of first half of current consolidated fiscal year is increased by 647,912 thousand yen.

(9) Revenue recognition method for

Basically, the product license

Edgar Filing: TREND MICRO INC - Form 6-K

Post Contract Customer Support Service (PCS)

agreement contracted with the end-user states the article for PCS (customer support and upgrading of products and its pattern files).

Parent company and its subsidiaries adopt the following revenue recognition method for the portion of PCS. Portion of PCS revenue is recognized separately from total revenue and it is deferred as deferred revenues under current liabilities and non-current liabilities based on contracted period. Deferred revenue is finally recognized for the contracted period evenly.

5. Definition of cash and cash equivalent in the consolidated cash flow statement for the first half of current fisical year

Cash and cash equivalents in the consolidated statement of cash flows are composed of cash in hand, bank deposits able to be withdrawn on demand and short-term investments with an original maturity of three months or less and which represent a minor risk of fluctuations in value.

16

*4 Treasury bonds
 In order for the warrants to be granted or transferred to the directors and certain employees of the Company and the directors and certain employees of the affiliated company, parent company issued unsecured bonds with detachable warrants. Undersection 341-8-4 of Japanese Commercial Code, the redemption and retirement of these bonds are restricted when total amount of bonds is less than the total amount of issue price of the stocks from unexecuted warrants. To reduce interest costs, parent company repurchased a part of the issued bonds after warrants were detached. For this reason, the company intends to hold the treasury bonds until they can be retired legally and it is same as the redemption substantially.

4. Segment Information

1. Industry segment information

The company and its subsidiaries had operated principally in two industry segments: "Security software business" and "Internet infrastructure-related products/service business". However, ip Trend Incorporated (Tokyo Shibuya-ku) and ip Trend Incorporated (Tokyo Chuo-ku) which have operated "Internet-related product/service business" was liquidated in the previous fiscal year and ip Trend Incorporated (Taiwan) has been processed to liquidate. Thus, from the current fiscal year, the

Edgar Filing: TREND MICRO INC - Form 6-K

company and its subsidiaries are specialized in "Security software business". Also, industry segment information was not disclosed in the first-half of the previous fiscal year since more than 90% of sales and operating income in all segments were from the "security software business" in accordance with Ordinance on Consolidated Financial Statements.

(Notes)

- Classification of countries and regions is based on geographical proximity.
- Classification of countries and regions into each geographic segment.
 - North America : U.S.A.
 - Europe : Italy, Germany, France, UK
 - Asia Pacific : Taiwan, Korea, Australia, Hong Kong, Malaysia, New Zealand, China
 - Others : Brazil, Mexico
- Unallocable operating expenses for the current semi-annual period in the operating expense (JPY 5,531 millions) is included in "Eliminations or Corporate". Major components are expenses for the administrative department in parent company and research and development costs for our products.
- Unallocable operating expenses for the previous semi-annual period in the operating expense (JPY 2,565 millions) is included in "Eliminations or Corporate". Major components are expenses for the administrative department in parent company and research and development costs for our products.
- Unallocable operating expenses for the previous annual period in the operating expense (JPY 6,310 millions) is included in "Eliminations or Corporate". Major components are expenses for the administrative department in parent company and research and development costs for our products.
- Unallocable operating expenses are included in "Elimination or Corporate" due to the difficulty in recognizing their contribution to each segments' profit and loss.
- Taiwan had been disclosed separately. However, the sales volume in Taiwan

Edgar Filing: TREND MICRO INC - Form 6-K

have been decreasing and it is expected to decline more. In addition, strictly considering geographical proximity, it is rational to disclose Taiwan together with Korea, Australia, Hong Kong, Malaysia, New Zealand and China. Therefore, from the first half of the current fiscal year, they are disclosed as "Asia Pacific". Segment information for the first half of the previous fiscal year and previous fiscal year in the current way of classification and allocation are as follows.

	For the first-half of the previous fiscal year					(From January To June 30,
	Japan	North America	Europe	Asia Pacific	Others

7. Contract or Notional amount, FMV and Valuation gain(loss) of Derivatives

Basic policies for derivative transactions

A corporate policy of Trend Micro Group does not engage in derivative transactions. However, the interest cap trading and the interest rate swap had been made by ipTrend Incorporated (Tokyo, Chuo-ku, liquidated in the previous fiscal year), before the company acquisition. (Due to business

Edgar Filing: TREND MICRO INC - Form 6-K

transfer to Trend Micro in the previous fiscal year, Trend Micro Inc. has been transferred the interest cap trading and the interest rate swap.) Trend Micro Group has no intention of changing, so there will no newly derivative transactions in future. These transactions had been made to avoid risks for interest rate fluctuation. The borrowing applied to the hedge was paid completely, when ipTrend Incorporated became a consolidated subsidiary.

The contractor for the interest cap trading and the interest rate swap is the financial institution, which is trustworthy institution. No expectation is required for future losses because of any defaults. In addition, these transactions have a risk related to rate changing, but there is no significant effect for the company business.

The contract amount of "Fair market value of the derivative transaction" doesn't show the amount of risks on the derivative market.

Fair market value of the derivative transaction

Contract or notional amount, fair market value and appraisal gain (loss)								
Classification	Type	At the end of the first half of the current fiscal year As of June 30, 2002			At the end of the first half of the previous fiscal year As of June 30, 2001

32

Significant accounting policies and practices for preparing non-consolidated semi-annual financial statements.

1. Accounting for evaluation of securities

(1) Securities

Investments in affiliates and in subsidiaries
Moving average cost method

Available-for-sale
Available-for-sale with fair market value

The securities are stated at the market value based on the value at the end of the period. Differences are recognized in equity differences reflect to net earnings and cost of sales determined by the weighted average method.

Available-for-sale without a market value

The securities are stated at the weighted average cost method.

(2) The transaction of derivatives

The market value method

(3) Inventories

Finished goods Raw materials Supplies
Moving average cost method

Work in process

Work in process is stated at the cost based on the cost by accumulated production and development of individual projects.

Edgar Filing: TREND MICRO INC - Form 6-K

-
2. Depreciation and amortization method for fixed assets
- (1) Property and equipment
 - Declining-balance method
 - Useful life and salvage value of the fixed assets determined using the standard which is prescribed by corporate tax law.

 - Building (excluding facilities and leasehold improvements) acquired after April 1, 1981, are depreciated by a straight-line method.
 - (2) Intangibles
 - (Software for mass sale)
 - Straight-line method over the estimated useful life.

 - (Software for internal use)
 - Straight-line method over the estimated useful life.

 - (Other intangibles)
 - Straight-line method
 - Depreciation years are determined using the standard which is regulated by corporate tax law.
 - (3) Long-term prepaid expense
 - Amortization is computed by a straight-line method.
 - Amortization years are determined using the standard which is regulated by corporate tax law.

-
3. Accounting for deferred assets
- Issuing costs of stocks and bonds are charged to expense as incurred.
-

33

-
4. Accounting policies for provisions
- (1) Allowance for bad debt
 - As contingency against losses from default on accounts receivable, the allowance for doubtful accounts is provided. The amount is determined using a percentage based on own actual doubtful accounts against total of debts and an amount, which is determined in consideration the possibility of recovering on doubtful accounts liabilities.
 - (2) Allowance for sales return
 - In order to reserve future losses from sales returns subsequent to the fiscal year end, allowance for sales return is provided based on the past experience of sales return.
 - (3) Allowance for retirement benefits
 - In order to reserve future losses arising from

Edgar Filing: TREND MICRO INC - Form 6-K

retirement of employees, allowance for retirement benefits is provided based on retirement benefits liabilities at the end of the period under

Actuarial gain and loss are all expensed in the following accounting period.

5. Translation of major foreign-currency assets and liabilities into Yen.

Foreign-currency financial receivables and liabilities are translated into yen at the spot rate effective at the end of the period. Exchange differential is recorded as a profit/loss.

6. Revenue recognition policy

Revenue recognition method for Post Contract Support Service

Basically, the product license agreement concluded with the end-user states the article for Post Contract support and upgrading of products and its products (files).

The company adopts the following revenue recognition method for the portion of PCS. Portion of PCS is recognized separately from total revenue and deferred as deferred revenues under current and non-current liabilities based on contracted period. Deferred revenue is finally recognized for the contracted period evenly.

7. Accounting for leased assets

Finance leases without transfer of ownership of leased assets are accounted for in the same manner as applied for operating leases.

34

8. Other important matters for preparing semi-annual financial statements

(1) Consumption tax

Transactions subject to consumption tax are stated at the amount net of the related consumption tax.

(2) Accounting for stock warrants that was granted to some officers and employees.

The Company has adopted incentive plans where warrants to purchase parent company's shares are granted to directors and certain employees after parent company issues bonds with detachable warrants and immediately repurchases all of the warrants. Compensation costs are measured at

Edgar Filing: TREND MICRO INC - Form 6-K

repurchase costs of warrant securities at the point of grant because that is only one of the compensation scheme which grants warrants to directors and employees. Warrant portion of the bonds is recorded as "warrant account" upon issuance and then transferred to "additional paid-in capital" upon exercise.

*5 Treasury bonds

In order for the warrants to be granted or transferred to the directors and certain employees of the Company and the directors and certain employees of the affiliated company, the Company issued unsecured bonds with detachable warrants. Under section 341-8-4 of Japanese Commercial Code, the redemption and retirement of these bonds are restricted when total amount of bonds is less than the total amount of issue price of the stocks from unexecuted warrants. To reduce interest costs, the Company repurchased a part of the issued bonds after warrants were detached. This repurchase is same as the redemption substantially.

Thus, bonds and treasury bonds are disclosed in net amount in the balance sheet as follows. The difference between the repurchased price and book value of the treasury bonds at the time of transaction are booked as loss on repurchase of treasury bonds in the unusual loss section.

Brief Information For The Interim Consolidated Financial Report

Pro Forma Compensation Cost For The Stock Options (Unaudited)

Our company and subsidiaries have adopted incentive plans for the directors and employees of our company and subsidiaries: an incentive plan pursuant to which warrants to purchase parent company shares were granted to directors and employees (Under this plan, our company issued bond with detachable warrants and immediately repurchased all of the warrants for distribution to grantees); and an incentive plan based on the stock option (subscription right method) in accordance with the Article 280 Section 19-2 of the former Commercial Code of Japan. In addition, our U.S. subsidiary has adopted a stock option incentive plan granting our company's shares invested in kind by major shareholders to a special purpose company.

Regarding to these incentive plans, we have estimated the compensation cost pursuant to SFAS No. 123 of U.S. Generally Accepted Accounting Principles

Edgar Filing: TREND MICRO INC - Form 6-K

for compensation costs on stock options. Each stock option value on the date of grant is calculated on Black-Scholes option pricing model with assumption described below. Then the value is prorated over the period of execution to recognize the cost. The resulting pro forma compensation cost (consolidated, before tax) for the stock option plans for the first half of FY2002 is 426 million yen.

	Volatility	Estimated Duration of The Option	Estimated Dividend	R
Incentive Plan for 1999	25.80 %	3 years	0	
Incentive Plan for 2000	17.03 %	3 years	0	
Incentive Plan for 2001	14.98 - 15.00 %	3 years	0	0.
Incentive Plan for 2002	18.00 %	4 years	0
