FirstEnergy Corp., FirstEnergy Service Company and GPU Service, Inc.
(collectively "Applicants") hereby amend in its entirety Amendment No. 5
(Post-Effective Amendment No. 2) to Form U-1 filed by Applicants in docket No.
70-9793 on October 15, 2002 as follows:

ITEM 1. DESCRIPTION OF PROPOSED TRANSACTIONS.

A. Background. By Order dated October 29, 2001 in this proceeding

(Holding Co. Act Release No. 27459) (the "Merger Order"), as supplemented by
orders dated November 8, 2001 (Holding Company Act Release No. 27483) and

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

December 23, 2002 (Holding Company Act Release No. 27628), the Commission authorized the merger between FirstEnergy Corp. ("FirstEnergy"), an Ohio corporation, and GPU, Inc. ("GPU"), a Pennsylvania corporation. The merger became effective on November 7, 2001, with FirstEnergy as the surviving entity, and FirstEnergy registered under the Act as a holding company on the same day. As a result of the merger, FirstEnergy directly or indirectly owns all of the outstanding common stock of ten electric utility subsidiaries, Ohio Edison Company ("Ohio Edison"), The Cleveland Electric Illuminating Company ("Cleveland Electric"), The Toledo Edison Company ("Toledo Edison"), American Transmission Systems, Incorporated, Jersey Central Power & Light Company ("JCP&L"), Pennsylvania Electric Company ("Penelec"), Metropolitan Edison Company ("Met-Ed"), Pennsylvania Power Company ("Penn Power"), York Haven Power Company, and The Waverly Electric Power & Light Company, which together provide service to approximately 4,300,000 retail and wholesale electric customers in a 37,200 square-mile area in Ohio, New Jersey, New York and Pennsylvania; and one gas utility subsidiary, Northeast Ohio Natural Gas Corp. ("Northeast"), which provides gas distribution and transportation service to approximately 5,000 customers in central and northeast Ohio. FirstEnergy's electric and gas utility subsidiaries are referred to herein collectively as the "Utility Subsidiaries."

FirstEnergy also directly owns all of the issued and outstanding common stock of FirstEnergy Service Company ("ServeCo"), an Ohio corporation, which was organized in 2001 in order to become a new service company subsidiary of FirstEnergy, and GPU Service, Inc. ("GPU Service"), a Pennsylvania corporation, which was formerly a direct service company subsidiary of GPU. FirstEnergy also directly or indirectly holds investments in numerous non-utility subsidiaries that are engaged in a variety of energy-related, exempt, or otherwise functionally related non-utility businesses (collectively, the "Non-Utility Subsidiaries"), including FirstEnergy Generation Corp. ("GenCo") and FirstEnergy Nuclear Operating Company ("FENOC"). Reference is made to Appendix A to the Merger Order for a description of these Non-Utility Subsidiaries. The Utility and Non-Utility Subsidiaries of FirstEnergy are collectively referred to herein as the "Subsidiaries."

Under the Merger Order, the Commission granted FirstEnergy a temporary exemption under its rules in order to enable FirstEnergy to continue to provide to the pre-merger Subsidiaries of FirstEnergy certain common corporate services,¹ until such time as all of the

¹ These services include: energy supply management of the bulk power and natural gas supply, fuel procurement, coordination of gas and electric systems, maintenance, construction and engineering work; customer billing; materials management; facilities management; human resources; finance; accounting; internal auditing; information systems; corporate planning and research; public affairs; legal; environmental matters; and executive services.

service functions performed by FirstEnergy and GPU Service have been consolidated in ServeCo.² The Merger Order specified that ServeCo would begin at least minimal operations within 90 days following closing of the merger, and that all service functions of FirstEnergy and GPU Service would be transferred to ServeCo not later than February 1, 2003.² The Merger Order states that FirstEnergy will file a separate application with the Commission on or before September 1, 2002 (extended upon request to the Staff to October 15, 2002) to seek authorization for ServeCo to consolidate service company functions now performed by FirstEnergy and GPU Service, including a form of the proposed service agreement, policies and procedures and cost allocation methods to be used by ServeCo.. Employees of FirstEnergy were transferred to ServeCo by January 1, 2002 and FirstEnergy no longer has any employees and no longer

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

provides any services. Since January 1, 2002, GPU Service has continued to use the allocation methods and policies and procedures GPU Service ("GPU Methods") used prior to the Merger.

ServeCo's authorized capitalization consists of 850 shares of common stock with no par value, of which one (1) share is issued and outstanding and held by FirstEnergy. ServeCo will derive substantially all of its needs for additional working capital from borrowings under FirstEnergy's non-utility money pool (as authorized in the Merger Order) and/or additional equity investments by FirstEnergy pursuant to Rule 45(b)(4) or Rule 52(b), as applicable.

B. Summary of Requested Action. In this Post-Effective Amendment,

FirstEnergy, ServeCo and GPU Service are requesting authorization to consolidate all common corporate services provided during the pre-merger period to associate companies in the FirstEnergy system by FirstEnergy and GPU Service in ServeCo.³ In addition, FirstEnergy asks for a delay of the original February 1, 2003 date for full compliance to June 1, 2003 in order to coincide with FirstEnergy's implementation of the SAP Enterprise IT Solution project.⁴ Filed herewith as Exhibit N-7 is the proposed form of Service Agreement, including cost allocation methods, which ServeCo proposes to enter into with FirstEnergy and each Subsidiary that requests services. In addition, FirstEnergy requests authorization for a separate Service Agreement in the form filed herewith as Exhibit N-8 among certain of its Ohio Utility Subsidiaries and Penn Power which will enable these Utility Subsidiaries to render certain

2 The Merger Order states that FirstEnergy will file a separate application with the Commission on or before September 1, 2002 (extended upon request to the Staff to October 15, 2002) to seek authorization for ServeCo to consolidate service company functions now performed by FirstEnergy and GPU Service, including a form of the proposed service agreement, policies and procedures and cost allocation methods to be used by ServeCo.

3 FirstEnergy may seek approval to form one or more additional service companies in the future including FirstEnergy Nuclear Operating Company and GPU Nuclear, Inc., which provide operating services to the FirstEnergy nuclear generating plants under the direction and supervision of the owners thereof.

4 SAP is an Enterprise Resource Planning (ERP) system that links and coordinates business processes. It will replace existing systems in Human Resources, Finance, Supply Chain, Distribution and Fossil/Nuclear areas, and will be used to manage work, share information, track customer accounts, and meet other business needs.

2

services to each other, all as further described below. Exhibit N-9 is ServeCo's Policies and Procedures Manual. On January 1, 2003, all personnel of GPU Service were transferred to and became employees of ServeCo. Thus, GPU Service no longer has any employees. By January 1, 2004, certain employees who provide service only to one Utility Subsidiary will be transferred from ServeCo to the appropriate Utility Subsidiary. Upon full implementation of this reorganization, it is expected that ServeCo will have approximately 3,580 employees in multiple locations organized in thirty departments. Applicants now seek a supplemental order authorizing ServeCo to operate using the GPU Methods through June 1, 2003. Applicants request that the Commission reserve jurisdiction over the proposed ServeCo allocation methods, policies and procedures and service agreements filed or to be filed on this docket.

C. Services to be rendered by ServeCo. Following the proposed

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

consolidation of service functions in ServeCo, ServeCo will enter into a Service Agreement with FirstEnergy, each of the Utility Subsidiaries, and each other associate company in the FirstEnergy system that requests services from ServeCo. The Service Agreement will be in the form attached hereto as Exhibit N-7. ServeCo will provide its associate companies with services in the following departments, which are described in fuller detail in Exhibit A to the Service Agreement: administrative services, business development, call center, claims, communications, controllers, corporate and shareholder services, corporate affairs and community involvement, credit management, energy delivery and customer service, economic development, enterprise risk management, FirstEnergy technologies, FirstEnergy telecom, governmental affairs, human resources, industrial relations, information services, insurance services, internal audit, investment management, investor relations, legal, performance planning, rates and regulatory affairs, real estate, supply chain, transmission & distribution technical services, treasury and workforce development.

Services rendered by ServeCo will be rendered at cost in accordance with Rules 90 and 91. The costs of services provided by ServeCo will be directly assigned, distributed or allocated by work order numbers (or equivalent cost collectors, collectively, "workorders")⁵ in accordance with the SEC's Uniform System of Accounts for Mutual Service Companies and Subsidiary Service Companies. The primary basis for charges to associate companies is the direct charge method. Other costs that are not directly assigned, including overheads and other general administrative costs which will include costs of operating ServeCo as a separate corporate entity, will be allocated to associate companies using one or a combination of the methods of allocation that are described in Exhibit "A" to the Service Agreement.

5 There are four cost collectors which are equivalent to work orders: "orders", "cost centers", "networks" and "work breakdown structures" ("WBSs"). Orders include work orders, sales orders, internal orders and service orders. Each employee will be assigned to a cost center which will be responsible for collecting routine costs. WBSs are analogous to work orders and can be used for projects exceeding certain dollar thresholds or durations, or which involve investing in capital assets. To ensure proper recordkeeping, each employee will be required to charge time against a designated order, network, WBS or cost center number.

3

ServeCo will maintain its accounts, cost-accounting procedures and other records in accordance with the requirements of the Commission's Uniform System of Accounts for Mutual Service Companies and Subsidiary Service Companies. ServeCo will file an annual report on Form U-13-60 in accordance with Rule 94.

As provided in the Merger Order, and for so long as FirstEnergy remains a "registered holding company" under PUHCA, no change in the organization of ServeCo, the type and character of the companies to be serviced, the methods of allocating costs to associate companies, or in the scope or character of the services to be rendered subject to Section 13 of the Act, or any rule, regulation or order thereunder, shall be made unless and until ServeCo shall first have given the Commission written notice of the proposed change not less than 60 days prior to the proposed effectiveness of any such change. If, upon the receipt of any such notice, the Commission shall notify ServeCo within the 60-day period that a question exists as to whether the proposed change is consistent with the provisions of Section 13 of the Act, or of any rule, regulation or order thereunder, then the proposed change shall not become

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

effective unless and until the ServeCo shall have filed with the Commission an appropriate declaration regarding such proposed change and the Commission shall have permitted such declaration to become effective.

1. Cost Allocation Methodology

ServeCo categorizes costs of services provided to affiliates into three primary categories. Directly Assignable costs represents expenses incurred for activities and services exclusively for the benefit of one affiliate, and in many respects, are captured through individual department workorder systems for specific project billing purposes. Directly Attributable costs represent expenses incurred for activities and services that benefit more than one affiliate and which can be assigned using direct measures of costs causation. The majority of costs incurred by ServeCo fall into the above two categories.

By the very nature of a service corporation, a portion of ServeCo's expenses will not be directly related to specific current operations or functions of individual Subsidiaries. Nor are these costs amenable to many of the cost accounting procedures, which frequently concentrate upon identification of variable, fixed and semi-fixed costs. Accordingly, it is necessary to develop formulae that recognize the overall contribution of ServeCo to both the current and future operations of the FirstEnergy system. After all direct charges have been made, the remaining costs (Indirect Costs) in each department in ServeCo must be fairly and equitably allocated among FirstEnergy and the Subsidiaries.

As a registered public utility holding company, FirstEnergy's primary business is that of owning and operating electric public utilities. As the electric industry moves through restructuring to permit competition in business areas once the sole province of historical monopolies, FirstEnergy has begun to enter competitive energy and energy services businesses to the extent permitted by state and federal restrictions. Codes of conduct govern the relationship between the Utility Subsidiaries and their affiliated competitive businesses, namely, the Non-

4

Utility Subsidiaries. As a public utility holding company, FirstEnergy has invested capital for infrastructure over many years in the Utility Subsidiaries so that they may develop the support services necessary to serve their customers. The costs associated with these infrastructure investments (e.g., accounting and human resources systems, telephone circuits and other communications equipment, mainframe CPU, printers and data storage development tools and client servers and storage not dedicated to the competitive unit) were originally incurred, and would continue to be incurred, regardless of whether or not the Non-Utility Subsidiaries were part of FirstEnergy. These Indirect Costs will be allocated using a multi-variable formula, which gives weight to more than one measure of the size of the various Subsidiaries' operations within the FirstEnergy system, and is particularly relevant under these circumstances.

In accordance with Rule 90(b), ServeCo will direct charge its associate companies for all costs of products and services where possible. The costs of products and services provided by ServeCo that cannot be charged directly to the Subsidiary or Subsidiaries receiving the product or service will be allocated among all Subsidiaries (and FirstEnergy, where applicable) by utilizing one of the methods described below. The key determinants in assigning the allocation methods were the business operations of the Subsidiary or Subsidiaries receiving the benefit of the product and service, and the associated cost driver for each product and service. FirstEnergy has developed sixteen (16) methods of allocation for charging a share of the Indirect Costs to the Subsidiaries benefiting from the particular product or service being

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

provided:

a. "Multiple Factor - All" - For the Indirect Costs for products or services benefiting the entire FirstEnergy system, FirstEnergy and all Subsidiaries will bear a fair and equitable portion of such costs. FirstEnergy will bear 5% of these Indirect Allocations. The remaining Indirect Allocations will be allocated among the Utility Subsidiaries and the Non-Utility Subsidiaries based on FirstEnergy's equity investment in the respective groups. A subsequent allocation step will then occur. Among the Utility Subsidiaries, allocations will be based upon the "Multiple Factor - Utility" method. Among the Non-Utility Subsidiaries, allocations will be based upon the "Multiple Factor - Non-Utility" method.

b. "Multiple Factor - Utility" - For the Indirect Costs for a product or service solely benefiting one or more of the Utility Subsidiaries, each such Utility Subsidiary will be charged a portion of the Indirect Costs based on the sum of the weighted averages of the following factors:

1. Gross transmission and/or distribution plant
2. Operating and maintenance expense excluding purchase power and fuel costs
3. Transmission and/or distribution revenues, excluding transactions with affiliates

These three (3) factors have been determined to be the most appropriate for the Utility Subsidiaries in the FirstEnergy system. Each factor will be weighted equally so that no one facet of the electric utility operations inordinately influences the distribution of Indirect Costs.

5

c. "Multiple Factor - Non-Utility" - For the Indirect Costs for products or services solely benefiting the Non-Utility Subsidiaries, each Non-Utility Subsidiary receiving the product or service will be charged a proportion of the Indirect Costs based upon the total assets of each Non-Utility Subsidiary, including the generating assets under operating leases from the Utility Subsidiaries.

d. "Multiple Factor - Utility and Non-Utility" - For the Indirect Costs for a product or service benefiting one or more of the Utility and Non-Utility Subsidiaries, each such Subsidiary is first assigned a distribution ratio that is in proportion to the Indirect Costs based on FirstEnergy's equity investment in such Subsidiaries. Following this distribution, a subsequent allocation step will then occur. Among the Utility Subsidiaries, allocations will be based upon the "Multiple Factor-Utility." Among the Non-Utility Subsidiaries, allocations will be based upon "Multiple Factor - Non-Utility".

e. "Direct Charge Ratio" - The ratio of direct charges for a particular product or service to an individual Subsidiary as a percentage of the total direct charges for a particular product or service to all Subsidiaries. Indirect Costs are then allocated to each Subsidiary based on the calculated ratios.

f. "Enterprise Distribution - For the Indirect Costs for products and services that benefit the entire FirstEnergy system, FirstEnergy and all Subsidiaries will bear a fair and equitable portion of such costs. FirstEnergy will bear 5% of these Indirect Costs. The remaining Indirect Costs will be allocated among the Utility Subsidiaries and Non-Utility

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

Subsidiaries based on FirstEnergy's equity investment in the respective groups.

g. "Number of Customers Ratio" - For costs of products and services driven by the number of Utility customers, the allocation method that will be used will be the number of Utility customers for the respective Utility Subsidiary receiving the product or service divided by the total number of Utility customers.

h. "Number of Shopping Customers" - A "shopping customer" is defined as a Utility customer who has selected a competitive electric generation supplier. For costs of products and services driven by the number of shopping customers, the allocation method that will be used will be the number of shopping customers for the respective Utility Subsidiary receiving the product or service divided by the total number of shopping customers.

i. "Number of Participating Employees - General" - For costs of products and services driven by all participating employees within the FirstEnergy system, the allocation method that will be used will be the number of participating employees for the respective Subsidiary receiving the product or service divided by the total number of participating employees.

6

j. "Number of Participating Employees - Utility and Non-Utility" - For costs of products and services driven by participating employees who work for the Utility and Non-Utility Subsidiaries, the Subsidiaries receiving the product or service are first assigned a distribution ratio that is in proportion to the Indirect Costs based on FirstEnergy's equity investment in the respective groups. Costs are further allocated by using the number of participating employees for the respective Subsidiary divided by the total number of participating FirstEnergy employees.

k. "Square Footage Used Ratio" - Amount of square footage occupied by a Subsidiary receiving the product or service divided by the total amount of square footage occupied by all FirstEnergy system companies applicable to that respective product or service.

l. "Gigabytes Used Ratio" - Number of gigabytes utilized by a Subsidiary receiving the product or service divided by the total number of gigabytes used by the FirstEnergy system companies applicable to that respective product or service.

m. "Number of Computer Workstations Ratio" - Number of computer workstations utilized by a Subsidiary receiving the product or service divided by the total number of computer workstations in use by the FirstEnergy system companies applicable to that respective product or service.

n. "Number of Billing Inserts Ratio" - Number of billing inserts performed for a Subsidiary receiving the product or service divided by the total number of billing inserts performed for the FirstEnergy system companies applicable to that respective product or service.

o. "Number of Invoices Ratio" - Number of invoices processed for a Subsidiary receiving the product or service divided by the total number of invoices processed for the FirstEnergy system companies applicable to that

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

respective product or service.

p. "Number of Payments Ratio" - Number of monthly payments processed for a Subsidiary divided by the total monthly number of payments processed for the FirstEnergy system companies applicable to that respective product or service.

D. Services to be rendered by certain Utility Subsidiaries to each other. FirstEnergy organizes and conducts its Utility Subsidiary operations on a regional basis.⁶

⁶ There are nine regions in three states: Western Region - Ohio; Northern Region - Ohio; Central Region - Ohio; Southern Region - Ohio; Eastern Region - Ohio; Western Region - Pennsylvania; Eastern Region - Pennsylvania; Northern Region - New Jersey; and Central Region - New Jersey. Each region has a "Regional President", as well as a management and support team that reports to the Regional President. For the most part, each region is entirely within a particular Utility Subsidiary's service territory. However, two regions - Western Region - Ohio and Eastern Region - Ohio -- include parts of several Utility Subsidiaries. Western Region - Ohio, includes all of Toledo Edison and 990 square miles of Ohio Edison's service territory in Sandusky, Ohio. The Eastern Region - Ohio covers the eastern 2,517 square miles of Ohio Edison, 661 square miles of Cleveland Electric and all 1,112 square miles of Penn Power.

7

These regions operate and are managed as separate business units. The regional structure focuses on moving accountability and decision making closer to customers with an emphasis on decentralized operations and providing cost effective, high-quality service to customers.

Because of this decentralized, regional approach, certain regional support services (such as Human Resources, Workforce Development and Business Services) will be accounted for in the appropriate Utility Subsidiary. In the case of Western Region - Ohio and Eastern Region - Ohio, the employees who must provide service to more than one legal entity will continue to charge their time in a fair and equitable manner to all Utility Subsidiaries within that region, rather than be accounted for in the ServeCo.⁷ In addition, from time to time, one Utility Subsidiary may request other services from another Utility Subsidiary. These services will be provided at cost in accordance with Rules 90 and 91 and billed to the receiving Utility Subsidiary(ies), at cost as set forth in accordance with a Utility-to-Utility Service Agreement, the form of which is filed herewith as Exhibit N-8.8 This will allow the regional management to operate regions as separate units, and provide the most effective service possible to the customers of the Utility Subsidiaries.

ITEM 2. FEES, COMMISSIONS AND EXPENSES.

FirstEnergy estimates that the additional fees, commissions and expenses incurred or to be incurred in connection with the proposed transaction will not exceed \$25,000.

ITEM 3. APPLICABLE STATUTORY PROVISIONS.

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

Section 13(b) of the Act and Rule 88 thereunder are applicable to the proposed transaction. FirstEnergy believes that ServeCo has been organized so as to comply with Section 13(b) of the Act and the Commission's rules and regulations thereunder. In this regard, Rule 88 provides that "[a] finding by the Commission that a subsidiary company of a registered holding

7 Of the approximately 5,500 employees in nine Regions, less than 200 employees provide the "regional" support services discussed herein.

8 The Commission has previously authorized utility companies in a holding company system to render service to each other. See e.g., Ameren Corporation,

Holding Co. Act Release No. 26809 (Dec.30, 1997); CP&L Energy, Holding Co. Act

Release No. 27284 (Nov.27, 2000).

8

company . . . is so organized and conducted, or to be conducted, as to meet the requirements of Section 13(b) of the Act with respect to reasonable assurance of efficient and economical performance of services or construction or sale of goods for the benefit of associate companies, at cost fairly and equitably allocated among them (or as permitted by Rule 90), will be made only pursuant to a declaration filed with the Commission on Form U-13-1, as specified" in the instructions for that form, by such company or the persons proposing to organize it. Notwithstanding the foregoing language, the Commission has on several recent occasions made findings under Section 13(b) based on information set forth in an Application/Declaration on Form U-1, without requiring the formal filing of a Form U-13-1. See SCANA Corp., Holding Co. Act Release No. 27133 (Feb. 9, 2000);

New Century Energies, Holding Co. Act Release No. 26748 (Aug. 1, 1997); CINergy

Corp., Holding Co. Act Release No. 26146 (Oct. 21, 1994); UNITIL Corp., Holding

Co. Act Release No. 25524 (April 24, 1992). In this Post-Effective Amendment, FirstEnergy has submitted substantially the same information for ServeCo as would have been submitted in a Form U-13-1. Accordingly, it is submitted that it is appropriate to find that ServeCo is so organized and its business will be so conducted as to meet the requirements of Section 13(b), and that the filing of a Form U-13-1 is unnecessary, or, alternatively, that this Post-Effective Amendment should be deemed to constitute a filing on Form U-13-1 for purposes of Rule 88.

The proposed transaction is also subject to the requirements of Rule 54. Rule 54 provides that in determining whether to approve an application by a registered holding company which does not relate to any exempt wholesale generator ("EWG") or "foreign utility company" ("FUCO"), the Commission shall not consider the effect of the capitalization or earnings of any subsidiary which is an EWG or a FUCO upon the registered holding company if paragraphs (a), (b) and (c) of Rule 53 are satisfied.

FirstEnergy currently meets all of the conditions of Rule 53(a), except for clause (1). In the Merger Order, the Commission, among other things, authorized FirstEnergy to invest in EWGs and FUCOs so that FirstEnergy's "aggregate investment," as defined in Rule 53(a)(1), in EWGs and FUCOs does not exceed \$5 billion, which \$5 billion amount is greater than the amount which would be permitted by clause (1) of Rule 53(a) which, based on FirstEnergy's consolidated retained earning of \$1.85 billion as of September 30, 2002, would be \$926 million. The Merger Order also specifies that this \$5 billion amount may

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

include amounts invested in EWGs and FUCOs by FirstEnergy and GPU at the time of the Merger Order ("Current Investments") and amounts relating to possible transfers to EWGs of certain generating facilities owned by certain of FirstEnergy's operating utilities ("GenCo Investments"). FirstEnergy has made the commitment that through June 30, 2003, its aggregate investment in EWGs and FUCOs other than the Current Investments and GenCo Investments ("Other Investments") will not exceed \$1.5 billion. The Commission has reserved jurisdiction over investments that exceed such amount.

9

As of September 30, 2002, and on the same basis as set forth in the Merger Order, FirstEnergy's aggregate investment in EWGs and FUCOs was approximately \$1.27 billion,⁹ an amount significantly below the \$5 billion amount authorized in the Merger Order. Additionally, as of September 30, 2002, consolidated retained earnings were \$1.85 billion. By way of comparison, FirstEnergy's consolidated retained earnings as of December 31, 2001 were \$1.52 billion.

In any event, even taking into account the capitalization of and earnings from EWGs and FUCOs in which FirstEnergy currently has an interest, there would be no basis for the Commission to withhold approval of the transactions proposed herein. With respect to capitalization, since the date of the Merger Order, there has been no material adverse impact on FirstEnergy's consolidated capitalization resulting from FirstEnergy's investments in EWGs and FUCOs. As of September 30, 2002, FirstEnergy's consolidated capitalization consisted of 34.8% common equity, 1.7% cumulative preferred stock, 1.8% subsidiary - obligated mandatorily redeemable preferred securities, 56.1% long-term debt and 5.6% notes payable. As of December 31, 2001, those ratios were as follows: 30.3% common equity, 3.1% cumulative preferred stock, 2.2% subsidiary-obligated mandatorily redeemable preferred securities, 60.9% long term debt and 3.5% notes payable. Additionally, the proposed transactions will not have any material impact on FirstEnergy's capitalization. Further, since the date of the Merger Order, and, after taking into account the effects of the Merger, there has been no material change in FirstEnergy's level of earnings from EWGs and FUCOs.

FirstEnergy's operating subsidiaries are financially sound companies as indicated by their investment grade ratings from the nationally recognized rating agencies for their senior unsecured debt. The following chart includes a breakdown of the senior, unsecured credit ratings for FirstEnergy's operating utility subsidiaries.

Subsidiary	Standard & Poors ¹⁰	Moody's ¹¹	Fitch ¹²
Ohio Edison	BBB-	Baa2	---
Cleveland Electric	BBB-	Baa3	---
Toledo Edison	BBB-	Baa3	BB
Penn Power	BBB-	Baa2	---
JCP&L	BBB	---	---
Met-Ed	BBB	---	---
Penelec	BBB	A2	BBB+

FirstEnergy satisfies all of the other conditions of paragraphs (a) and (b) of Rule 53. With respect to Rule 53(a)(2), FirstEnergy maintains books and records in conformity with, and otherwise adheres to, the requirements thereof. With respect to Rule 53(a)(3), no more than

⁹ This \$1.27 billion amount represents Current Investments only. As of

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

September 30, 2002, FirstEnergy had no Genco Investments.
10 Standard & Poor's Rating Services
11 Moody's Investors Service, Inc.
12 Fitch, Inc.

10

2% of the employees of FirstEnergy's domestic public utility companies render services, at any one time, directly or indirectly, to EWGs or FUCOs in which FirstEnergy directly or indirectly holds an interest. With respect to Rule 53(a)(4), FirstEnergy will continue to provide a copy of each application and certificate relating to EWGs and FUCOs and relevant portions of its Form U5S to each regulator referred to therein, and will otherwise comply with the requirements thereof concerning the furnishing of information. With respect to Rule 53(b), none of the circumstances enumerated in subparagraphs (1), (2) and (3) thereunder have occurred. FirstEnergy states that the transactions contemplated herein will have no impact on its consolidated capitalization.

ITEM 4. REGULATORY APPROVALS.

The New Jersey Board of Public Utilities ("NJBPU") and the Pennsylvania Public Utility Commission ("PPUC") have jurisdiction under their respective state affiliate interests statutes over the proposed Service Agreement, as it relates to the Utility Subsidiaries that are subject to regulation by those commissions. No other State commission, and no Federal commission, other than this Commission has jurisdiction over the proposed transaction.

ITEM 5. PROCEDURE.

FirstEnergy requests that the Commission issue a supplemental order approving the proposed extension not later than February 1, 2003 and that the Commission issue a further supplemental order approving all other matters as to which jurisdiction will be reserved at the earliest practicable date so that FirstEnergy can implement the new service company structure on or before June 1, 2003. It is further requested that: (i) there not be a recommended decision by an Administrative Law Judge or other responsible officer of the Commission, (ii) the Division of Investment Management be permitted to assist in the preparation of the Commission's decision and (iii) there be no waiting period between the issuance of the Commission's order and the date on which it is to become effective.

ITEM 6. EXHIBITS AND FINANCIAL STATEMENTS.

(a) Exhibits:

D-12 - Application of JCP&L to NJBPU for Approval of Service Agreement.

D-13 - NJBPU Order -- to be filed by amendment.

11

D-14 - Application of Penn Power, Penelec and Met-Ed to PPUC for Approval of Service Agreement -- to be filed by amendment.

Edgar Filing: FIRSTENERGY CORP - Form POS AMC

- D-15 - PPUC Order -- to be filed by amendment.
- N-7 - Form of Service Agreement (including Allocation Methods) -- previously filed.
- N-8 - Utility-to-Utility Service Agreement -- to be filed by Amendment.
- N-9 - Policies and Procedures Manual -- to be filed by amendment (in paper copy only)

(b) Financial Statements:

Omitted as not relevant to the proposed transaction.

ITEM 7. INFORMATION AS TO ENVIRONMENTAL EFFECTS.

(a) The proposed transaction does not involve a major Federal action significantly affecting the quality of the human environment.

(b) No federal agency has prepared or is preparing an environmental impact statement with respect to the proposed transaction.

12

SIGNATURES
