Item 8.01 Other Events.

On October 31, 2018, Silver Bull Resources, Inc. (the “Company”) announced the release of a technical report (the “Report”) on the silver and zinc mineralization at the Sierra Mojada Project in accordance with Canadian National Instrument 43-101 prepared by Archer, Cathro & Associates (1981) Limited and the Company’s Chief Executive Officer, Timothy Barry. The Report supersedes the prior mineralized material estimate released by the Company in June 2015. The Report includes an update on the silver and zinc mineralization that was estimated from 1,336 diamond drill holes, 24 reverse circulation drill holes, 9,027 channel samples and 2,346 underground long holes. Using a net smelter return (“NSR”) economic cut-off, the Report indicates mineralized material in the optimized pit of 70.4 million tonnes at an average silver grade of 38.6 grams/tonne silver, an average zinc percentage of 3.4%, an average copper percentage of 0.04% and an average lead percentage of 0.3%. The Report used a \$13.50/tonne NSR cut-off grade and assumed a silver price of \$15.00/ounce and a zinc price of \$1.20/pound. Mineralized material estimates do not include any amounts categorized as inferred resources.

“Mineralized material” as used in this Current Report on Form 8-K, although permissible under the Securities and Exchange Commission’s (the “SEC’s”) Industry Guide 7, does not indicate “reserves” by SEC standards. The Company cannot be certain that any part of the Sierra Mojada Project will ever be confirmed or converted into SEC Industry Guide 7-compliant “reserves.” Investors are cautioned not to assume that all or any part of the mineralized material will ever be confirmed or converted into reserves or that mineralized material can be economically or legally extracted.
