ASX Announcement

Melbourne, Wednesday 3 November 2004

Changes and revisions to National s results format

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

The National wishes to advise changes to its Full Year Results announcement pack format and revisions to prior period numbers. Previously reported Group profit numbers have not changed.

A summary of revisions to prior period numbers are:

- 1) September 2003 and March 2004 non-accrual loan balances will be revised upward by \$254 million and \$263 million respectively. This amount relates to a single exposure within Corporate & Institutional Banking, which is adequately provided for. Previously accrued interest of \$38 million will be written-back during the September 2004 half year. The exposure had previously been classified as 90 days past due at 30 September 2003 and 31 March 2004.
- 2) The balance of loans reported as 90 days past due at 30 September 2003 and 31 March 2004 has been revised following the implementation of new processes. The revised balances are \$492 million at 30 September 2003 (previously \$360 million) and \$563 million at 31 March 2004 (previously \$434 million), after adjusting for the non-accrual exposure referred to above.
- 3) Risk-weighted assets at 30 September 2003 and 31 March 2004 have been revised upward by \$1,901 million to \$254,266 million and \$1,438 million to \$278,239 million respectively. The revision primarily relates to New Zealand and the reporting of unutilised limits in Corporate & Institutional Banking and to capture additional retail lending products. Certain categories of residential mortgages across risk-weightings were also reclassified.
- 4) Changes have been made to the classification of average interest-bearing liabilities between categories on the average balance sheet.
- 5) A change has been made to the classification of interest income/expense in relation to certificates of deposit, such that these amounts are now recorded on a net basis rather than gross.
- 6) The calculation of diluted earnings per share for the half year to March 2004 took account of the interest expense on the ExCaps after booking the tax benefit. Removing the tax benefit from the calculation increases the diluted cash earnings per share from 119.9 cents to 121.1 cents.

Further details on these revisions and additional disclosures are provided in the attached explanation and pro forma results template.

Changes from National Australia Bank's Half Year Results Announcement on 12 May 2004 to the Full Year Results Announcement on 10 November 2004

Additional Wealth Management-related disclosures

Management Discussion & Analysis Wealth Management (page 20)

Additional disclosures relating to the Wealth Management business will be provided as follows:

Reconciliation of movement in funds under management and administration

Reconciliation of movement in annual inforce premiums

Shareholders retained profits and capital from life business asset mix

Consolidation of Excess Capital and Group Funding results

Management Discussion & Analysis Other (incl. Group Funding & Corp. Centre) (page 29)

Previously within the Group's segment reporting the Other segment was broken out between Excess Capital, Group Funding and Corporate Centre within the Divisional Performance Analysis Management Discussion & Analysis section. Excess Capital has now been consolidated into Group Funding.

Additional net interest margin reconciliation

Note 2. Net Interest Margins & Spreads (page 37)

A reconciliation has been provided between the net interest margin for each of the operating divisions and the net interest margin for the Group has been included.

Reclassification of interest in relation to certificates of deposit

Note 2. Net Interest Income (page 35) and Note 4. Average Balance Sheet (page 39)

A change has been made to the classification of interest income/expense in relation to certificates of deposit, such that these amounts are now recorded on a net basis rather than gross. The amount of the misclassification in relation to the half year to March 2004 was \$109 million and the year to September 2003 was \$78 million.

There is no impact on / change to net profit, net interest income, net interest spread, net interest margin or average asset or average liability balances.

Reclassification of average balance sheet categories

Note 4. Average Balance Sheet (page 39)

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

A change has been made to the classification of average interest-bearing liabilities between categories on the average balance sheet. This has been undertaken to improve the consistency between the classification of categories between the Summary of Financial Position (spot) and the Average Balance Sheet.

The gross up of trading derivatives (non-Australian) in the average balance sheet has been revised, resulting in a change in total average assets, but no change in interest-earning assets.

Restatement of non-accrual loans

Note 11. Asset Quality (page 54)

At 30 September 2001 through to 31 March 2004, a certain Australian exposure was classified as performing, (although from 30 September 2003 to 31 March 2004 this exposure was classified as past due 90 days). However, the classification of this exposure as non-accrual during this period is now considered more appropriate, and comparative information for these years has been restated to include the balance of this exposure (including accrued interest) of \$263 million at 31 March 2004 and \$254 million at 30 September 2003.

Restatement of past due 90 day loans

Note 11. Asset Quality (page 55)

90 day past due loans are well-secured loans that accrue interest, but are in arrears 90 days or more. These loans are not classified as impaired assets.

In addition to the above restatement of one large Australian exposure as non-accrual, the Group has revised its data collection procedures used to establish its 90 day past due exposures. This process now includes loans that are identified by the internal categories, watch or substandard, and are in arrears 90 days or more.

In summary, comparative information has been restated as follows:

90 days past due	31 Mar 2004 \$m	30 Sep 2003 \$m
Previously reported	434	360
Loan reclassified as non-accrual	(263)	(254)
Revised data	392	386
Restated comparative	563	492

Revision to risk-weighted assets

Note 15. Capital Adequacy (page 61)

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

The revision primarily relates to New Zealand and the reporting of unutilised limits in Corporate & Institutional Banking and to capture additional retail lending products. Certain categories of residential mortgages across risk-weightings were also reclassified.

As a result risk-weighted assets as at 30 September 2003 and 31 March 2004 have been restated/increased by \$1,901 million and \$1,438 million respectively.

Additional disclosures re: the treatment of the Wealth Management business for capital adequacy purposes

Note 15. Capital Adequacy (page 63)

Under guidelines issued by APRA, life insurance and funds management activities are excluded from the calculation of risk-weighted assets, and the controlled entities are deconsolidated for the purposes of calculating capital adequacy. Profits from Wealth Management only benefit the Group's regulatory capital position to the extent they are remitted to the Group by way of dividend. The total deduction from the Group's capital position in respect of Wealth Management entities at 31 March 2004 of \$5,905 million, 30 September 2003 of \$5,697 million.

A reconciliation between the market value of NAFiM subsidiaries and Wealth Management capital deduction has been provided in the Results Announcement.

Treatment of interest expense relating to the exchangeable capital units (ExCaps)

Note 16. Cash earnings per share (page 64)

From 1 October 2003 the Group elected not to book the tax benefit on the interest expense relating to ExCaps following the receipt of an ATO assessment.

The calculation of diluted earnings per share for the half year to March 2004 took account of the interest expense on the ExCaps after booking the tax benefit. Removing the tax benefit from the calculation increases the diluted cash earnings per share from 119.9 cents to 121.1 cents.

Detailed Financial Information - Note 4: Average Balance Sheet & Related Interest

4. AVERAGE BALANCE SHEET & RELATED INTEREST

The following tables set forth the major categories of interest-earning assets and interest-bearing liabilities, together with their respective interest rates earned or paid by the Group. Averages are predominantly daily averages. Interest income figures include interest income on non-accruing loans to the extent cash payments have been received. Amounts classified as Other International represent interest-earning assets or interest-bearing liabilities of the controlled entities and overseas branches, excluding Europe. Non-accrual loans are included with interest-earning assets within loans and advances.

(1) Interest income associated with NAB-issued certificates of deposit repurchased by the Group has been reclassified from marketable debt securities to term deposits and certificates of deposit. For the September 2003 year, an amount of \$78 million was reclassified.

(2) Includes non-accrual loans.

(3) Includes interest on derivatives and escrow deposits.

(4) The calculations for Australia, Europe and Other International include intragroup cross border loans/borrowings and associated interest.

(5) Included within investments relating to life insurance business are interest-earning debt securities. The interest earned from these securities is reported in life insurance income, and has therefore been treated as non-interest earning for the purposes of this note. The assets and liabilities held in the statutory funds of the Group's Australian life insurance business are subject to the restrictions of the Life Insurance Act 1995.

(6) To ensure consistent classification across notes to the financial statements, the gross up of trading derivatives for Europe and Other International has been revised. For the September 2003 year, these gross up amounts are \$9,934 million (Europe) and \$2,154 million (Other International) respectively.

(7) To ensure consistent classification across notes to the financial statements, some amounts were reclassified within categories of deposits and other borrowings. For the September 2003 year, an amount of \$12,238 million was reclassified from term deposits and certificates of deposit to savings (short-term) deposits \$908 million, other demand deposits \$5,110 million and short-term borrowings \$6,220 million. Associated interest expense was also reclassified.

(8) The sum of term deposits and certificates of deposit equate to time deposits.

Detailed Financial Information - Note 15: Capital Adequacy**15. CAPITAL ADEQUACY****Regulatory capital position**

Under guidelines issued by APRA, life insurance and funds management activities are excluded from the calculation of risk-weighted assets, and the related controlled entities are deconsolidated for the purposes of calculating capital adequacy. The intangible component of the investment in these controlled entities (the difference between the appraisal value and the embedded value) is deducted from Tier 1 capital, and the embedded value is deducted from the total of eligible Tier 1 and Tier 2 capital. Additionally, any profits from these activities included in the Group's results are excluded from the determination of Tier 1 capital to the extent that they have not been remitted to the Company in the form of dividends. A reconciliation of capital under the different bases is provided.

(1) *APRA requires any excess FITB (excluding FITB impact on the general provision for doubtful debts) over the provision for deferred income tax liabilities be deducted from Tier 1 capital.*

(2) *Represents investment in non-consolidated controlled entities, net of intangible component deducted from Tier 1 (Mar 04: \$2,922 million, Sep 03: \$2,959 million).*

(3) *Risk-weighted assets for prior periods have been restated. The revision primarily relates to New Zealand and the reporting of unutilised limits in Corporate & Institutional Banking and to capture additional retail lending products. Certain categories of residential mortgages across risk-weightings were also reclassified. As a result, risk-weighted assets as at 30 September 2003 and 31 March 2004 have been increased by \$1,901 million and \$1,438 million respectively.*

(4) *From 31 March 2004, risk-weighted assets - market risk is calculated based on the Standard Method. Prior periods were based on the Internal Model Approach.*

Detailed Financial Information - Note 17: Risk Management**17. RISK MANAGEMENT****Market risk**

The management of market risk will be discussed in detail in the Group's annual financial report 2004, at Risk Management and Note 45 Derivative Financial Instruments. Please refer to that report for detailed information regarding the management of risk.

Trading risk

The following table shows the Group's Value at Risk (VaR) for the Group's trading portfolios, including both physical and derivative positions. The figures reflect the potential losses across products and regions in which the Group operates.

Value at risk at 99% confidence level	Average value Year to		Minimum value Year to (1)		Maximum value Year to (1)	
	Sep 04 \$m	Sep 03 \$m	Sep 04 \$m	Sep 03 \$m	Sep 04 \$m	Sep 03 \$m
Foreign exchange risk		7		2		20
Interest rate risk		17		9		25
Volatility risk		4		2		7
Commodities risk		1				1
Diversification benefit		(7)		n/a		n/a
Total		22		14		35

Value at risk at 99% confidence level	Average value Half Year to		Minimum value Half Year to (1)		Maximum value Half Year to (1)	
	Sep 04 \$m	Mar 04 \$m	Sep 04 \$m	Mar 04 \$m	Sep 04 \$m	Mar 04 \$m
Foreign exchange risk		11		1		39
Interest rate risk		15		9		21
Volatility risk		8		3		20
Commodities risk		1		1		2
Diversification benefit		(8)		n/a		n/a
Total		27		12		55

(1) Value at risk is measured individually according to foreign exchange risk, interest rate risk, volatility risk and commodities risk. The individual risk categories do not sum up to the total risk number due to portfolio effect. Risk limits are applied in these categories separately, and against the total risk position.

VaR measures the adverse changes in the trading portfolio value brought about by daily changes in market rates at a 99% confidence level.

Detailed Financial Information - Note 17: Risk Management**Balance sheet risk****a) Structural interest rate risk**

The table below presents a summary of the aggregated structural earnings at risk relating to non-trading assets and liabilities. Based on the structural interest rate risk position at balance date, the table shows the possible impact on net income for the year ending September 30, 2005 of an immediate 1% parallel movement in interest rates across the whole yield curve.
