MAIN STREET RESTAURANT GROUP, INC.

Notes to Condensed Consolidated Financial Statements

September 27, 2004

(Unaudited)

1. Interim Financial Reporting

The accompanying condensed consolidated financial statements have been prepared without an independent audit pursuant to the rules and regulations of the Securities and Exchange Commission. The information furnished herein reflects all adjustments, consisting of normal recurring accruals and adjustments, which are, in our opinion, necessary to fairly state the operating results for the respective periods. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such rules and regulations, although we believe that the disclosures are adequate to make the information presented not misleading. For a complete description of the accounting policies, see our Annual Report on Form 10-K for the fiscal year ended December 29, 2003.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make a number of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Such estimates and assumptions affect the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe our estimates and assumptions are reasonable in the circumstances; however, actual results may differ from these estimates under different future conditions.

We operate on fiscal quarters of 13 weeks. The results of operations for the nine months ended September 27, 2004, are not necessarily indicative of the results to be expected for a full year.

2. Stock Based Compensation

In December 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 148, *Accounting for Stock-Based Compensation-Transition and Disclosure*. This statement amends prior statements to provide alternative methods of transition for an entity that voluntarily changes to the fair value-based method of accounting for stock-based employee compensation. We did not adopt the fair value recognition method of recording stock-based employee compensation under SFAS No. 123, as amended by SFAS No. 148, which adoption was and remains optional.

Had compensation cost for stock options awarded under these plans been determined consistent with SFAS No. 123, our net income (loss) and earnings (loss) per share would have reflected the following pro forma amounts (amounts in thousands except for per share data):

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

	Three Months Ended		Nine Months Ended	
	September 27, 2004	September 29, 2003	September 27, 2004	September 29, 2003
Net Income (Loss):				
As Reported	\$ 164	\$ 236	\$ 2,209	\$ 2,854
Deduct: Total stock-based employee compensation expense determined under fair value method for all awards	122	252	576	732
Pro forma	\$ 42	\$ (16)	\$ 1,633	\$ 2,122
Basic Earnings Per Share:				
As Reported	\$ 0.01	\$ 0.02	\$ 0.15	\$ 0.20
Pro forma	\$ 0.00	\$ 0.00	\$ 0.11	\$ 0.15
Diluted Earnings Per Share:				
As Reported	\$ 0.01	\$ 0.02	\$ 0.15	\$ 0.20
Pro forma	\$ 0.00	\$ 0.00	\$ 0.11	\$ 0.15
Weighted average shares used in computation:				
Basic	14,642	14,142	14,642	14,142
Diluted	14,643	14,169	14,687	14,142

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

For options granted during fiscal 2004 and 2003, the weighted average fair value at the date of grant for options granted was estimated using the Black-Scholes pricing model with the following assumptions:

Assumptions:	2004	2003
Weighted average risk-free interest rate	3.06%	3.15%
Weighted average volatility	48.41%	64.00%
Expected life	3 years	4 years
Dividends	None	None

3. Income Taxes

We did not record a federal income tax provision for the nine months ended September 27, 2004 or September 29, 2003 due to the utilization of net operating loss and tax credit carryforwards. We recorded approximately \$50,000 in Federal alternative minimum tax related to 2005 and approximately \$62,000 in state and local income tax expense.

4. Credit Facility

In December 2003, we entered into a \$2.5 million one-year revolving line of credit with a bank. At September 27, 2004, we had no outstanding amounts on this line. However, this bank has issued a letter of credit (LOC) in the amount of \$1.9 million to provide security under our 2004 worker's compensation insurance program. The amount available for borrowing under the line of credit is limited by the amount of the LOC.

5. Comprehensive Income (Loss)

Our comprehensive income (loss) consists of net income and adjustments to derivative financial instruments. The components of other comprehensive income (loss) are as follows (in thousands):

	Nine Months Ended	
	September 27, 2004	September 29, 2003
Net income	\$ 2,209	\$ 2,854
Change in fair value of interest rate swaps	(49)	225
Comprehensive income	\$ 2,160	\$ 3,079

6. Earnings per Share

The following table sets forth basic and diluted earnings per share, or EPS, computations for the three and nine months ended September 27, 2004, and September 29, 2003 (in thousands, except per share amounts):

	September 27, 2004			Three Months Ended			September 29, 2003	
	Net Income	Shares	Per Share Amount	Net Income	Shares	Per Share Amount	Net Income	Per Share Amount
Basic	\$ 164	14,642	\$ 0.01	\$ 236	14,142	\$ 0.02		
Effect of stock options and warrants		1			27			
Diluted	\$ 164	14,643	\$ 0.01	\$ 236	14,169	\$ 0.02		

	September 27, 2004			Nine Months Ended			September 29, 2003	
	Net Income	Shares	Per Share Amount	Net Income	Shares	Per Share Amount	Net Income	Per Share Amount
Basic	\$ 2,209	14,642	\$ 0.15	\$ 2,854	14,142	\$ 0.20		
Effect of stock options and warrants		45						
Diluted	\$ 2,209	14,687	\$ 0.15	\$ 2,854	14,142	\$ 0.20		

For the three and nine months ended September 27, 2004, approximately 3,617,000 and 2,581,000, respectively, of our outstanding stock options were excluded from the calculation of diluted earnings per share as their effect would have been anti-dilutive. For the three and nine months ended September 29, 2003, approximately 3,243,000 and 3,773,000, respectively, of our outstanding stock options and warrants were excluded from the calculation of diluted earnings per share as their effect would have been anti-dilutive. All of our outstanding warrants (231,277 shares) expired in March 2004.

7. Commitments and Contingencies

We have been served with two lawsuits filed on behalf of current employees, seeking damages, under California law, for both missed breaks and missed meal breaks the employees allege they did not receive. These lawsuits seek to establish a class action relating to our California operations. We are vigorously defending these lawsuits, both on the merits of the employees' case and the issues relating to class action status. We are unable to predict the outcome of these matters and, therefore, the financial statements do not reflect any adjustments for the impact of an unfavorable outcome.

The state of California has an ongoing sales tax audit of our restaurants and determined that the 15% gratuity added to checks for parties of eight or more is a mandatory charge and should have been subject to sales tax, and as such, had initially assessed taxes, interest and related penalties of approximately \$900,000. In September 2004, we were notified by the California State Board of Equalization that our assessment (including interest and penalties) was reduced to \$484,000 as a result of additional information. We have vigorously contested this assessment on the basis that the charge is an optional gratuity and is given to the server. The first of various appeal conferences was held on November 13, 2003. In February 2004, we were notified that our appeal was denied by the appeals officer. We are in the process of preparing a second appeal to the full slate of California Franchise Tax Board. We are unable to predict the outcome of this proceeding and, therefore, the accompanying condensed consolidated financial statements do not reflect any adjustment for the impact of an unfavorable outcome.

We are engaged in preliminary discussions regarding the cancellation of leases and restaurant closures of two Bamboo Club locations and the cancellation of a lease commitment where we have not yet built a restaurant. These discussions may result in future additional liability or asset impairments related to these three locations. We are unable to predict, at this time, the outcome of these discussions or the amount of additional write-offs, if any, to be recorded.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains forward-looking statements, including statements regarding our business strategies, our business, and the industry in which we operate. These forward-looking statements are based primarily on our expectations and are subject to a number of risks and uncertainties, some of which are beyond our control. These forward-looking statements include those regarding anticipated restaurant openings, anticipated costs and sizes of future restaurants, and the adequacy of anticipated sources of cash to fund our future capital requirements. Actual results could differ materially from the forward-looking statements as a result of numerous factors, including those set forth in our Form 10-K for the year ended December 29, 2003, as filed with the Securities and Exchange Commission. Words such as believes, anticipates, expects, intends, plans and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements.

Overview

On September 27, 2004, we owned and managed 53 T.G.I. Friday's restaurants (although we closed one T.G.I. Friday's in October 2004), owned 13 Bamboo Club-Asian Bistro restaurants, and owned four Redfish Seafood Grill and Bar restaurants. In addition, we own and operate one Alice Cooper's restaurant in Cleveland, Ohio, pursuant to a license agreement we entered into with Celebrity Restaurants, L.L.C., the owner of the exclusive rights to operate Alice Cooper's restaurants and which operates one such restaurant in Phoenix, Arizona.

T.G.I. Friday's restaurants are full-service, casual dining establishments featuring a wide selection of freshly prepared, popular foods and beverages served by well-trained, friendly employees in relaxed settings. Bamboo Club-Asian Bistro restaurants are full-service, casual plus restaurants that feature an extensive and diverse menu of innovative and

tantalizing Pacific Rim cuisine. Redfish Seafood Grill and Bar restaurants are full-service, casual dining restaurants that feature a broad selection of New Orleans style fresh seafood, Creole and seafood cuisine, and traditional southern dishes, as well as a Voodoo style lounge, all under one roof. Alice Cooper stown restaurants are rock and roll and sports themed restaurants and feature a connection to the music celebrity Alice Cooper.

Our strategy is to capitalize on the brand-name recognition and goodwill associated with T.G.I. Friday s restaurants and expand our restaurant operations through development of additional T.G.I. Friday s restaurants in our existing development territories and the development of additional Bamboo Club-Asian Bistro restaurants in major metropolitan areas throughout the United States.

During the period ended September 27, 2004, we opened one new Bamboo Club-Asian Bistro in Fairfax, Virginia. We have one additional lease covering a Bamboo Club location not yet built. We are currently engaged in negotiations to cancel or modify this lease. No amounts have been recorded in connection with the possible lease cancellation for this location.

We will begin construction of one new T.G.I. Friday s during the fourth quarter 2004, scheduled for opening in early 2005, and plan to construct and open two or three additional T.G.I. Friday s during 2005. Of these four new T.G.I. Friday s locations, two leases have been signed and two are in the process of being negotiated. On October 25, 2004 we closed one T.G.I. Friday s restaurant located in Oakland, California.

Critical Accounting Policies

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make a number of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Such estimates and assumptions affect the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe our estimates and assumptions are reasonable in these circumstances; however, actual results may differ from these estimates under different future conditions.

We believe that the estimates and assumptions that are most important to the portrayal of our financial condition and results of operations, in that they require us to make our most difficult, subjective, or complex judgments, form the basis for the accounting policies deemed to be most critical to our operations. These critical accounting policies relate to the valuation and amortizable lives of long-lived assets, asset write-offs or asset impairments, goodwill, and other identifiable intangible assets, valuation of deferred tax assets, reserves related to self-insurance for workers compensation and general liability (included in Other Liabilities on the Balance Sheet), and recognition of stock-based employee compensation. For further information, refer to the consolidated financial statements and notes thereto for the fiscal year ended December 29, 2003, included in our Annual Report on Form 10-K. These policies are summarized as follows:

(1) We periodically perform asset impairment analysis of long-lived assets related to our restaurant locations, goodwill, and other identifiable intangible assets. We perform these tests whenever we experience a triggering event, such as a decision to close a location, a major change in the location s operating environment, or another event that might impact our ability to recover our asset investment.

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

(2) Periodically we record (or reduce) the valuation allowance against our deferred tax assets to the amount that is more likely than not to be realized, based upon recent past financial performance, tax reporting positions, and expectations of future taxable income.

(3) We use an actuarial-based methodology utilizing our historical experience factors to periodically adjust self-insurance reserves for workers compensation and general liability claims and settlements. Estimated costs are accrued on a monthly basis and progress against this estimate is reevaluated based upon actual claim data received each quarter.

(4) We use the intrinsic value method of accounting for employee stock options allowed under APB Opinion 25 and have adopted the disclosure provisions of SFAS No. 123, as amended by SFAS No. 148, which require pro forma disclosure of the impact of using the fair value at date of grant method of recording stock-based employee compensation.

We believe our estimates and assumptions related to these critical accounting policies are appropriate under the circumstances; however, should future events or occurrences result in unanticipated consequences, there could be a material impact on our future financial condition or results of operations.

Results of Operations

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

The following table sets forth, for the periods indicated, the percentages that certain items of income and expense bear to total revenue:

	Three Months Ended		Nine Months Ended	
	September 27, 2004	September 29, 2003	September 27, 2004	September 29, 2003
Revenue	100.0%	100.0%	100.0%	100.0%
Restaurant Operating Expenses:				
Cost of sales	25.9	26.5	26.2	26.8
Payroll and benefits	30.7	31.8	31.0	31.2
Depreciation and amortization	4.0	3.8	3.8	3.7
Other operating expenses	32.3	32.6	31.5	30.7
Total restaurant operating expenses	92.9	94.7	92.5	92.4
Other Operating Expenses:				
Depreciation and amortization of intangible assets	0.3	0.3	0.3	0.3
General and administrative expenses	4.1	4.1	4.1	3.8
Pre-opening expenses	0.4	0.2	0.1	0.4
New manager training expenses	0.1			0.1
Impairment charges and other		5.2		1.7
Operating income (loss)	2.2	(4.5)	3.0	1.3
Gain from sale of assets		(7.0)		(2.3)
Interest expense and other, net	1.8	2.1	1.6	1.9
Net income before income taxes	0.4	0.4	1.4	1.7
Income taxes	0.1		0.1	
Net income	0.3%	0.4%	1.3%	1.3%

Three and nine months ended September 27, 2004 compared with three and nine months ended September 29, 2003

Revenues are exclusively derived from the sales of food and beverages at our restaurants. Revenues for the three months ended September 27, 2004, increased by 1.1% to \$54.8 million compared to \$54.2 million for the comparable quarter in 2003. Revenues for the nine months ended September 27, 2004, decreased by 0.7% to \$170.5 million compared to \$171.9 million for the comparable quarter in 2003. Although we experienced revenue increases from the three new restaurants opened since the period ended September 29, 2003, these increases were somewhat offset by lost revenue from our Florida locations as a result of the disruption caused by the four hurricanes during September 2004. Same-store sales increased 1.3% for the quarter ended September 27, 2004 compared to an increase of 2.3% for the comparable quarter in 2003. For the nine months ended September 27, 2004, we had a same-store sales increase of 1.7% compared to an increase of 0.9% in the comparable period in 2003. The same-store sales increase for the nine-month periods primarily related to a 1%-2% price increase implemented at the beginning of each year.

Cost of sales includes the cost of food and beverages and as a percentage of revenue decreased to 25.9% for the three months ended September 27, 2004, from 26.5% for the comparable quarter in 2003. For the nine months ended

September 27, 2004, cost of sales as a percentage of revenue decreased to 26.2% from 26.8% for the comparable period in 2003. The decrease in cost of sales from the comparable periods in 2003 was primarily the result of stronger supply chain buying efforts and negotiated contracting, and decreases in commodity prices for seafood. Our current contracts generally run through the end of the year and renewals are currently under discussion. These decreases were also attributable to promotional driven product mix changes in effect during the three and nine months ended September 27, 2004, compared to the same periods in 2003. Additionally, during the quarter ended September 27, 2004, we recognized approximately \$93,000 in additional earned incentives related to our new five-year contract with our soft drink beverage supplier.

Payroll and benefit costs consist of restaurant management salaries, hourly payroll expenses, and other payroll related benefits, including employee healthcare. Payroll and benefits expenses decreased as a percentage of revenue to 30.7% for the three months ended September 27, 2004, from 31.8% for the comparable quarter in 2003. For the nine months ended September 27, 2004, payroll and benefits expenses decreased as a percentage of revenue to 31.0% from 31.2% for the comparable period in 2003. During the periods ended September 27, 2004, we experienced increases in benefit costs related to a substantial increase in California's State Unemployment rate during 2004 (which was an across the board increase and was not related to our claims experience). Additionally, we experienced increases in labor costs related to the recently opened Bamboo Club- Asian Bistro in Fairfax, Virginia (labor costs of new restaurants are higher during the initial four to six months of operation). However, these increases were more than offset by a reduction in group health costs related to a policy change in effect since the third quarter of 2003.

Depreciation and amortization expense included in income from restaurant operations is comprised of depreciation of restaurant property and equipment and amortization of franchise fees and liquor licenses. Depreciation and amortization expense as a percentage of revenue increased to 4.0% for the three months ended September 27, 2004 from 3.8% for the comparable quarter in 2003. For the nine months ended September 27, 2004, depreciation and amortization expense increased to 3.8% from 3.7% for the comparable period in 2003. The increases were the result of regular asset acquisitions combined with accelerated depreciation related to a T.G.I. Friday's that was closed in October 2004. These increases were partially offset by a reduction in depreciation related to asset impairments recorded since the period ended September 29, 2003.

Other operating expenses include various restaurant-level costs such as occupancy costs (rent, taxes and CAM), utilities, marketing costs and general liability and workers' compensation costs. Other operating expenses decreased as a percentage of revenue to 32.3% for the three months ended September 27, 2004, from 32.6% for the comparable quarter in 2003. For the nine months ended September 27, 2004, other operating expenses increased to 31.5% from 30.8% for the comparable period in 2003. The increased costs were principally due to higher marketing fees, which were 3.5% of sales in 2004 versus 3.2% of sales in 2003, paid to Carlson's Restaurants Worldwide for the national T.G.I. Friday's advertising campaign, offset in the three months ended September 27, 2004 by slightly lower utilities and workers' compensation costs as a result of improved claims experience.

Depreciation and amortization of intangibles is comprised of depreciation of corporate property and equipment and amortization of bank financing fees and purchased franchise territories, as applicable. For the both the three- and nine-month periods ended September 27, 2004 and September 29, 2003, depreciation and amortization remained constant at 0.3% of revenue.

General and administrative expenses are costs associated with corporate and administrative functions that support new restaurant development and restaurant operations, and provide administrative infrastructure. These costs consist primarily of management and staff salaries, employee benefits, travel, legal and professional fees, and technology support. For the three months ended September 27, 2004, general and administrative expenses remained constant with last year's quarter at 4.1% of revenue. For the nine months ended September 27, 2004, general and administrative expenses increased as a percentage of revenue to 4.1% from 3.8% for the comparable period in 2003. The increases for the nine-month period were primarily related to increases in travel, training and education, legal expenses and technology related support costs over the prior year. During the third quarter ended September 27, 2004, we recorded approximately \$250,000 in severance and outplacement services charges in connection with our corporate restructuring where approximately 10 employees were terminated. The impact of these reductions in salaries and benefits related to the terminations was offset by the severance expense recorded during the quarter ended September 27, 2004.

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

Additionally, we have incurred higher costs related to compliance with the Sarbanes-Oxley Act and related new SEC regulations during the period ended September 27, 2004, and anticipate additional expense during the fourth quarter and into 2005.

Preopening expenses are costs incurred prior to opening a new restaurant and consist primarily of manager salaries and relocation and training costs. Historically, we have experienced variability in the amount and percentage of revenues attributable to preopening expenses. We typically incur the most significant portion of preopening expenses associated with a given restaurant in the two months immediately preceding opening and in the month the restaurant opens. Preopening expenses as a percentage of revenue increased to 0.4% for the three months ended September 27, 2004, from 0.2% for the comparable quarter in 2003. For the nine months ended September 27, 2004, preopening expenses decreased to 0.1% of revenue from 0.4% for the comparable period in 2003. These changes were the result of the timing and number of restaurant openings in 2004 compared to 2003.

New manager training expenses are those costs incurred in training newly hired or promoted managers for new restaurants. Changes over last year were the result of the timing and number of restaurant openings in 2004 compared to 2003.

Interest expense decreased by \$179,000 to 1.8% of revenue for the three months ended September 27, 2004, from 2.1% for the comparable quarter in 2003. For the nine months ended September 27, 2004, interest expense decreased as a percentage of revenue to 1.6% from 1.9% for the comparable period in 2003. The interest expense decrease was attributable to slightly lower overall interest rates and a lower level of debt. The decrease for the nine-month period was also attributable to a gain recorded as a reduction in interest expense of \$178,000 during the second quarter of 2004 related to the termination of one of our interest rate swaps.

We did not record a Federal income tax provision during the period ended September 27, 2004 or the comparable quarter in 2003 due to the utilization of operating loss and tax credit carryforwards. We recorded approximately \$50,000 Federal alternative minimum tax related to 2005 and approximately \$62,000 in state and local income tax expense.

Liquidity and Capital Resources

Our current liabilities exceed our current assets due in part to cash expended on our development requirements and because the restaurant business receives substantially immediate payment for sales, while payables related to inventories and other current liabilities normally carry longer payment terms, usually 15 to 30 days. At September 27, 2004, we had a working capital deficit of approximately \$18,399,000 and a cash balance of \$4,139,000 compared to a working capital deficit of \$16,973,000 and a cash balance of \$4,600,000 at December 29, 2003. We believe our cash flow is sufficient to pay our obligations as they come due in the ordinary course.

Net cash flows from operating activities were \$9,700,000 for the nine months ended September 27, 2004, compared with \$4,256,000 for the comparable period in 2003.

We use cash primarily to fund operations, pay debt principal and interest, and develop and construct new restaurants. Net cash used in investing activities, which we used primarily to fund property and equipment purchases for new restaurant development, and to fund our technology initiative as well as our maintenance capital (monies invested to improve, upgrade, or replace restaurant equipment and facilities), was \$6,892,000 for the nine months ended September 27, 2004, compared with \$6,173,000 for the comparable period in 2003. We opened one new Bamboo Club-Asian Bistro during the period ended September 27, 2004 and will start construction of one new T.G.I. Friday's in Arizona during the fourth quarter, both of which are being funded from operating cash flow.

Edgar Filing: MAIN STREET RESTAURANT GROUP, INC. - Form 10-Q

Net cash used in financing activities was \$3,269,000 for the nine months ended September 27, 2004, compared with net cash used in financing activities of \$2,742,000 for the comparable period in 2003. Financing activities for the nine months ended September 27, 2004 and for the comparable quarter in 2003 consisted primarily of the normal repayment of debt principal.

As of September 27, 2004, we had long-term debt of \$47,737,000, including a current portion of \$3,914,000.

In December 2003, we entered into a \$2.5 million, one-year revolving line of credit with a bank. At September 27, 2004, we had no outstanding amounts on this line. However, we have issued a letter of credit (LOC) in the amount of \$1.9 million to provide security under our 2004 worker's compensation insurance program. The amount available for borrowing under the line of credit is limited by the amount of the LOC.

All of our loan agreements contain various financial covenants that are measured at the end of each quarter. Primarily, there are two key covenants we must meet. Several loan agreements incorporate a fixed charge coverage test, which requires us to produce a level of earnings before interest, taxes, depreciation, and amortization and other unusual gains or losses (EBITDA) in excess of principal and interest under our debt obligations during rolling twelve-month periods. Other loan agreements modify this covenant to include rent expense. Many of our loan documents also limit the amount of long-term debt we can borrow based on trailing levels of EBITDA. At September 27, 2004, we met all of the financial covenants for all debt agreements.

From time to time, we may enter into interest rate swap agreements with certain financial institutions for the purpose of adjusting our ratio of fixed rate debt over a certain period of time at varying notional amounts. At September 27, 2004, there were \$20.4 million in net notional amounts of interest rate swap agreements outstanding that carried a weighted average interest rate of 6.0%. The effective amount of interest we pay on the notional amounts of these swap agreements is calculated using the interest rate of the swap against the notional amount of each swap. These swaps effectively adjust the ratio of fixed rate debt to 82% of total outstanding debt.

Based on limitations as a result of our debt covenants at September 27, 2004, we had no significant borrowing capabilities under any of our debt agreements. We believe, however, that our current cash resources, our line of credit, expected cash flows from operations, and cash received from the sale of assets, if any, will be sufficient to fund our planned development during the remainder of 2004. We may need to obtain capital to fund additional growth beyond 2004. Potential sources of such capital include bank financing, strategic alliances, sales of certain assets, and additional offerings of our equity or debt securities. We cannot provide assurance that such capital will be available from these or other potential sources.

We lease all of our restaurants with terms ranging from 10 to 20 years, with various renewal options of 10-20 years. Our future debt, lease, and purchase obligations are summarized by year as follows (in thousands):

Contractual Obligations and Commitments:

	Total	Less than one year	One to three years	Three to five years	Greater than five years
Debt Maturities	\$ 47,737	\$ 3,914	\$ 8,365	\$ 9,847	\$ 25,611
Minimum Lease Commitments	129,505	12,172	23,555	21,914	71,864
Purchase Commitments					
Total	\$ 177,242	\$ 16,086	\$ 31,920	\$ 31,761	\$ 97,475

Minimum lease commitments represent operating leases on our restaurant locations. We have no other off-balance sheet financings. A default under a lease agreement could result in damages or the acceleration of amounts due under the lease.

We are engaged in preliminary discussions regarding the cancellation of leases and restaurant closures of two Bamboo Club locations and the cancellation of a lease commitment where we have not yet built a restaurant. These discussions may result in future additional liability or asset impairments related to these three locations. We are unable to predict, at this time, the outcome of these discussions or the amount of additional write-offs, if any, to be recorded.

We believe that our current resources and expected cash flows from operations will be sufficient to fund our capital needs and debt maturities during the next 12 months.

We are self insured for three major business risks with stop loss and other insurance elements for our workers' compensation, general liability and health care. We record our expenses based upon our estimated cost for the year derived from past experience and actuarial data. Amounts are paid as claims are adjudicated. We believe our estimated

liabilities are adequately recorded and that sufficient cash flow will be available to pay these claims when they become due.

Not included in the above amounts are new restaurant development capital commitments to build 16 new T.G.I. Friday's restaurants through 2009. Although the cost to build can vary greatly depending on many factors and financing scenarios, at an estimated \$2.5 million for each new location our future capital commitments under our development agreements are estimated as follows:

2004	\$ 2.5 million
2005	\$ 5.0 million
2006	\$ 7.5 million
2007	\$ 7.5 million
2008	\$ 7.5 million
2009	\$ 10.0 million

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of September 27, 2004, we were participating in two derivative financial instruments for which fair value disclosure is required under Statement of Financial Accounting Standards No. 133. The fair value liability of the interest rate swap agreements increased to \$2,101,562 using hedge accounting per SFAS No. 133.

Our market risk exposure is limited to interest rate risk associated with our credit instruments. We incur interest on loans made at variable interest rates in the range of 2.75% to 3.35% over 30-Day LIBOR rates. On September 27, 2004, we had outstanding borrowings on these loans of approximately \$29,130,000. Our net interest expense for the three- and nine-month periods ended September 27, 2004 was \$973,000 and \$2,747,000, respectively. A one percent variation in any of the variable rates would have increased or decreased our total interest expense by approximately \$72,000 and \$215,000, respectively, for the three- and nine-month periods ended September 27, 2004.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer have reviewed and evaluated the effectiveness of our disclosure controls and procedures, which included inquiries made to certain other of our employees. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have each concluded that our disclosure controls and procedures are effective and sufficient to ensure that we record, process, summarize, and report information required to be disclosed by us in our periodic reports filed under the Securities Exchange Act within the time periods specified by the Securities and Exchange Commission's rules and forms.

During the fiscal quarter covered by this report, there have not been any changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We have been served with two lawsuits filed on behalf of current employees, seeking damages, under California law, for both missed breaks and missed meal breaks the employees allege they did not receive. These lawsuits seek to establish a class action relating to our California operations. We are vigorously defending these lawsuits, both on the merits of the employees' case and the issues relating to class action status. We are unable to predict the outcome of these matters, and the amounts, if any, that would be recorded upon settlement.

The state of California has an ongoing sales tax audit of our restaurants and determined that the 15% gratuity added to checks for parties of eight or more is a mandatory charge and should have been subject to sales tax, and as such, had initially assessed taxes, interest and related penalties of approximately \$900,000. In September 2004, we were notified by the California State Board of Equalization that our assessment (including interest and penalties) was reduced to \$484,000 as a result of additional information. We have vigorously contested this assessment on the basis that the

charge is an optional gratuity and is given to the server. The first of various appeal conferences was held on November 13, 2003. In February 2004, we were notified that our appeal was denied by the appeals officer. We are in the process of preparing a second appeal to the full slate of California Franchise Tax Board. We are unable to predict the outcome of this proceeding and, therefore, the accompanying condensed consolidated financial statements do not reflect any adjustment for the impact of an unfavorable outcome.

We are engaged in preliminary discussions regarding the cancellation of leases and restaurant closures of two Bamboo Club locations and the cancellation of a lease commitment where we have not yet built a restaurant. These discussions may result in future additional liability or asset impairments related to these three locations. We are unable to predict, at this time, the outcome of these discussions or the amount of additional write-offs, if any, to be recorded.
