UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For Quarterly Period Ended March 31, 2012

Commission File No. 000-29640

COMMUNITY FIRST BANCORPORATION

(Exact name of registrant as specified in its charter)

South Carolina
(State or other jurisdiction of
incorporation or organization)

58-2322486
(IRS Employer Identification No.)

449 HIGHWAY 123 BYPASS
SENECA, SOUTH CAROLINA 29678

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

(Address of principal executive offices, zip code)

(864) 886-0206

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐

Accelerated filer ☐

Non-accelerated filer ☐
(Do not check if a smaller reporting company)

Smaller reporting company ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: **Common Stock, no par or stated value, 4,152,294 Shares Outstanding on May 18, 2012.**

Notes to Unaudited Consolidated Financial Statements

(Dollar amounts in thousands, except per share)

Accounting Policies A summary of significant accounting policies is included in Community First Bancorporation's (the Company, our, we, and similar references) Annual Report on Form 10-K for the year ended December 31, 2011 filed with the Securities and Exchange Commission.

Management Opinion In the opinion of management, the accompanying unaudited consolidated financial statements of Community First Bancorporation reflect all adjustments necessary for a fair presentation of the results of the periods presented. Such adjustments were of a normal, recurring nature.

Investment Securities The following table presents information about amortized cost, unrealized gains, unrealized losses, and estimated fair values of securities:

	Amortized Cost	March 31, 2012 Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value	Amortized Cost	December 31, 2011 Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value

Table of Contents

The amortized cost and estimated fair value of debt securities by contractual maturity are shown below:

	March 31, 2012	
	Amortized Cost	Estimated Fair Value
	(Dollars in thousands)	
Non-mortgage backed securities issued by GSEs and by state, county and municipal issuers		
Due within one year	\$ 150	\$ 150
Due after one through five years	433	435
Due after five through ten years	48,585	48,433
Due after ten years	23,330	23,226
	72,498	72,244
Mortgage-backed securities issued by:		
US Government agencies	34,169	34,822
GSEs	653	662
Total	\$ 107,320	\$ 107,728

The estimated fair values and gross unrealized losses of all of the Company's investment securities whose fair values were less than amortized cost as of March 31, 2012 and December 31, 2011 and which had not been determined to be other-than-temporarily impaired are presented below. The Company evaluates all available-for-sale securities and all held-to-maturity securities for impairment as of each balance sheet date. The securities have been segregated in the table by investment category and the length of time that individual securities have been in a continuous unrealized loss position.

Total	\$	\$	\$	\$	\$	\$

As of March 31, 2012, 39 securities had been continuously in an unrealized loss position for less than 12 months and no securities had been continuously in an unrealized loss position for 12 months or more. We do not consider these investments to be other-than-temporarily impaired because the unrealized losses involve primarily issuances of government-sponsored enterprises and state, county and municipal government issuers. We also believe that the impairments resulted from current credit market conditions. There have been no defaults or failures by any of the issuers to remit periodic interest payments as required, nor are we aware that any such issuer has given notice that it expects it will be unable to make any such future payment according to the terms of its bond agreement. Although we classify a majority of our investment securities as available-for-sale, management has not determined that any specific securities will be disposed of prior to maturity and believes that we have both the ability and the intent to hold those investments until a recovery of fair value, including until maturity. Furthermore, we do not believe that we will be required to sell any such securities prior to recovery of the unrealized losses. Substantially all of the state, county and municipal securities were rated at least investment grade by either S&P or Moody's, or both, as of March 31, 2012.

Our subsidiary bank is a member of the Federal Home Loan Bank of Atlanta (FHLB) and, accordingly, is required to own restricted stock in that institution in amounts that may vary from time to time. These securities are identified in a separate category in the Consolidated Balance Sheets. Because of the restrictions imposed, the stock may not be sold to other parties, but is redeemable by the FHLB at the same price as that at which it was acquired by the Company.

Table of Contents

subsidiary. We evaluate this security for impairment based on the probability of ultimate recovery of the acquisition cost. No impairment has been recognized based on this evaluation.

During the first three months of 2012, we sold sixty-seven available-for-sale debt securities and two available-for-sale equity securities for proceeds of \$42,335 and realized gains of \$1,528. In addition, seventeen securities were called for proceeds of \$20,100 and paydowns of mortgage-backed securities totaled \$4,451. We purchased twenty-seven debt securities for cash expenditures of \$46,529. There were there no transfers of available-for-sale securities to other categories.

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

Nonaccrual loans totaled \$7,993 and \$10,342 as of March 31, 2012 and December 31, 2011, respectively. Troubled debt restructurings, not including such loans that are included in nonaccrual loans, totaled \$8,075 as of March 31, 2012 and

Table of Contents

\$6,205 as of December 31, 2011. As of March 31, 2012 and December 31, 2011, we had loans past due 90 days or more and still accruing interest totaling \$0 and \$13, respectively.

Loans that we grade Management Attention and Special Mention are not believed to represent more than a minimal likelihood of loss. Those grades indicate that a change in the borrowers' circumstances, or some other event, has occurred such that an elevated level of monitoring is warranted. Such loans are generally evaluated collectively for purposes of estimating the allowance for loan losses. Loans graded Substandard are believed to present a moderate likelihood of loss due to the presence of well-defined weakness in the borrowers' financial condition such as a change in their demonstrated repayment history, the effects of lower collateral values combined with other financial difficulties the borrowers may be experiencing, or deterioration of other indicators of the borrowers' ability to service the loan as agreed. Loans graded Doubtful are believed to present a high likelihood of loss due to severe deterioration of a borrowers' financial condition, severe past due status and/or substantial deterioration of collateral value, or other factors. Loans graded Substandard and Doubtful are evaluated individually for impairment. Management updates the loans in its internal risk grading system no less often than monthly. The following table provides information about how we grade loans internally.

	Management Attention	Internally Assigned Risk Grade			Total
		Special Mention	Substandard	Doubtful	
		(Dollars in thousands)

Impaired loans generally are nonaccrual loans, loans that are 90 days or more delinquent as to principal or interest payments, and other loans where, based on current information and events, it is probable that we will be unable to collect principal and interest payments according to the contractual terms of the loan agreements, including loans whose terms have been modified in a troubled debt restructuring. A loan is not considered to be impaired, however, if any periods of delay or shortfalls of amounts expected to be collected are insignificant or if we expect that we will be able to collect all amounts due including interest accrued at the contractual interest rate during the period of delay.

Following is a summary of our impaired loans, by class:

Table of Contents

	Recorded Investment	Unpaid Principal Balance	Related Allowance (Dollars in thousands)	Year-to-Date Average Recorded Investment	Year-to-Date Interest Income Recognized
As of March 31, 2012					
With no related allowance recorded:

Table of Contents

The following table provides information about how we evaluated loans for impairment, the amount of the allowance for loan losses estimated for loans subjected to each type of evaluation, and the related total amounts, by portfolio segment as of each date indicated:

	Secured by Real Estate	Other	Total
As of March 31, 2012			
Allowance for credit losses			
Ending balance	\$ 2,721	\$ 2,140	\$ 4,861
Ending balance - individually evaluated for impairment	\$ 554	\$ 337	\$ 891
Ending balance - collectively evaluated for impairment	\$ 2,167	\$ 1,803	\$ 3,970
Loans			
Ending balance	\$ 179,298	\$ 36,980	\$ 216,278
Ending balance - individually evaluated for impairment	\$ 17,299	\$ 1,527	\$ 18,826
Ending balance - collectively evaluated for impairment	\$ 161,999	\$ 35,453	\$ 197,452
As of December 31, 2011			
Allowance for credit losses			
Ending balance	\$ 2,437	\$ 1,922	\$ 4,359
Ending balance - individually evaluated for impairment	\$ 404	\$ 269	\$ 673
Ending balance - collectively evaluated for impairment	\$ 2,033	\$ 1,653	\$ 3,686
Loans			
Ending balance	\$ 186,057	\$ 38,599	\$ 224,656
Ending balance - individually evaluated for impairment	\$ 14,392	\$ 787	\$ 15,179
Ending balance - collectively evaluated for impairment	\$ 171,665	\$ 37,812	\$ 209,477
Ending balance - Loans acquired with deteriorated credit quality	\$ 1,402	\$ 58	\$ 1,460

Table of Contents

The following table presents information about loans that were modified in troubled debt restructurings during the first three months of 2012:

Troubled Debt Restructurings	Number of Contracts	As of March 31, 2012	
		Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Real estate - mortgage	1	\$ 116	\$ 116
Consumer installment	2	16	14

The following table presents information about loans that were modified in troubled debt restructuring during the twelve months ending March 31, 2012 and subsequently defaulted:

Troubled Debt Restructurings that Subsequently Defaulted	Number of Contracts	As of March 31, 2012	
		Recorded Investment	
Real estate - mortgage	1	\$ 230	

During the three months ended March 31, 2012, we continued to experience higher than normal (pre-recession) amounts of net charge-offs, and relatively high levels of past due and nonaccrual loans. These and other measures of credit quality, as well as continuing weakness in real estate prices, relatively low levels of activity in the real estate market and the continuing high unemployment in our market areas, indicate that our loan customers and collateral values remain under stress. Accordingly, we have recorded higher than normal provision and allowance for loan losses to recognize those conditions. We have not changed our accounting policy or the methodology used to estimate the allowance for loan losses since December 31, 2011. The following table provides information about activity in the allowance for loan losses by portfolio segment for the three months ended March 31, 2012:

	Secured by Real Estate	Other (Dollars in thousands)	Unallocated	Total
For the three months ended March 31, 2012				
Allowance for credit losses				
Balance, January 1, 2012	\$ 2,437	\$ 880	\$ 1,042	\$ 4,359
Provision charged to expense	441	342	152	935
Recoveries	26	10		36
Charge-offs	(296)	(173)		(469)
Balance at March 31, 2012	\$ 2,608	\$ 1,059	\$ 1,194	\$ 4,861

Earnings (Loss) Per Common Share Basic earnings (loss) per common share is computed by dividing net income (loss) applicable to common shares by the weighted average number of common shares outstanding. Diluted earnings (loss) per common share is computed by dividing applicable net income (loss) by the weighted average number of common shares outstanding and any dilutive potential common shares and dilutive stock options. It is assumed that all dilutive stock options are exercised at the beginning of each period and that the proceeds are used to purchase shares of the Company's common stock at the average market price during the period. Per share information for 2011 has been retroactively adjusted to give effect to a 5% stock dividend effective December 16, 2011. Net income (loss) per common share and net income (loss) per common share, assuming dilution, were computed as follows:

Table of Contents

	2012	Three Months Ended March 31, (Dollars in thousands, except per share amounts)	2011
Net income (loss) per common share, basic			
Numerator - net income (loss) available to common shareholders	\$	(719)	\$ 136

Net income (loss) per common share, assuming dilution	\$	(.17)	\$.03

Consolidated Statements of Comprehensive Income (Loss) In June 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update 2011-05 (ASU 2011-05) Comprehensive Income (Topic 220): Presentation of Comprehensive Income. The objective of ASU 2011-05 is to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in comprehensive income. ASU 2011-05 was effective as of January 31, 2012, and its provisions have been incorporated into our financial statements, including retrospective application to comparable periods of prior years.

Stock-Based Compensation Our 1998 stock option plan terminated on March 19, 2008 and no further options may be issued under the plan. A total of 226,273 unexpired and non-forfeited options outstanding under the plan remain exercisable until their expiration dates.

Income Taxes Net deferred tax assets totaled \$4,103 as of March 31, 2012. Based on taxable income generated during the first three months of 2012, we believe it is more likely than not that we will be able to realize \$520 of the related tax benefits. Consequently, we have provided a cumulative valuation allowance for potentially unrealizable net deferred tax assets of \$3,583 as of March 31, 2012.

Fair Value Measurements Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly fashion between market participants at the measurement date. A three-level hierarchy is used for fair value measurements based upon the transparency of the inputs to the valuation of an asset or liability as of the measurement date. In developing estimates of the fair values of assets and liabilities, no consideration of large position discounts for financial instruments quoted in active markets is allowed. However, an entity is required to consider its own creditworthiness when valuing its liabilities. For disclosure purposes, fair values for assets and liabilities are shown in the level of the hierarchy that correlates with the lowest level input that is significant to the fair value measurement in its entirety.

The three levels of the fair value input hierarchy are described as follows:

Level 1 inputs reflect quoted prices in active markets for identical assets or liabilities.

Level 2 inputs reflect observable inputs that may consist of quoted market prices for similar assets or liabilities, quoted prices that are not in an active market, or other inputs that are observable in the market and can be corroborated by observable market data for substantially the full term of the assets or liabilities being valued.

Level 3 inputs reflect the use of pricing models and/or discounted cash flow methodologies using other than contractual interest rates or methodologies that incorporate a significant amount of management judgment, use of the entity's own data, or other forms of unobservable data.

Table of Contents

The following is a summary of the measurement attributes applicable to assets and liabilities that are measured at fair value on a recurring basis:

Description	March 31, 2012	Fair Value Measurement at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(Dollars in thousands)		
Securities available-for-sale	\$	\$	103,391	\$

Description	December 31, 2011	Fair Value Measurement at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(Dollars in thousands)		
Securities available-for-sale	\$	\$	124,411	\$

Level 2 inputs for our securities available-for-sale are obtained from an independent third-party that uses a process that may incorporate current market prices, benchmark yields, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, other reference data and industry and economic events that a market participant would be expected to use in valuing the securities. Not all of the inputs listed apply to each individual security at each measurement date. The independent third party assigns specific securities into an asset class for the purpose of assigning the applicable level of the fair value hierarchy used to value the securities. At March 31, 2012 and December 31, 2011, all securities were valued using Level 2 inputs, as described above.

The following is a summary of the measurement attributes applicable to assets and liabilities measured at fair value on a non-recurring basis during the three month period ended March 31, 2012 and the twelve month period ended December 31, 2011 and which remained outstanding at the end of each period:

Description	March 31, 2012	Fair Value Measurement at Reporting Date Using			Total Losses	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		
		(Dollars in thousands)				
Collateral-dependent impaired loans	\$	\$	632	\$	\$	(305)
Foreclosed assets			1,011			(1,531)

Table of Contents

Description	December 31, 2011	Fair Value Measurement at Reporting Date Using			Total Losses
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
		(Dollars in thousands)			
Collateral-dependent impaired loans	\$	\$	15,137	\$	\$ (3,462)
Foreclosed assets			1,897		(751)

The fair value measurements shown above were made to reduce cost-based measurements to fair value measurements at initial recognition, or to adjust fair value based measurements subsequent to initial recognition, due to changes in the circumstances of individual assets during the period. For collateral-dependent impaired loans, the measurements reflect our belief that we will receive repayment solely from the liquidation of the underlying collateral. As a practical expedient, such loans may be valued by comparing the fair value of the collateral securing the loan with the loan's carrying value. If the carrying value exceeds the fair value of the collateral, the excess is charged to the allowance for loan losses. If the fair value of the collateral exceeds the loan's carrying amount, no adjustment is made, the loan continues to be carried at historical cost, and the loan is not included in the table.

The value of other real estate obtained through loan foreclosure is adjusted, if needed, upon the acquisition of each property to the lower of the recorded investment in the loan or the fair value of the property as determined by a recently performed independent appraisal less the estimated costs to sell. Similarly, the fair value of repossessions is measured by reference to dealers' quotes or other market information believed to reliably reflect the value of the specific property held. Immaterial adjustments may be made by management to reflect property-specific factors such as age or condition. Losses recognized when loans are initially transferred to or otherwise included in any of the categories shown above are reported as loan losses. Subsequent to initial recognition, changes in fair value measurements of other real estate and repossessions are included in other income or other expenses, as applicable.

Accounting standards require disclosure of the estimated fair value of certain on-balance sheet and off-balance sheet financial instruments and the methods and assumptions used to estimate their fair values. A financial instrument is defined as cash, evidence of an ownership interest in an entity or a contract that creates a contractual obligation or right to deliver or receive cash or another financial instrument from a second entity on potentially favorable or unfavorable terms. Affected financial instruments that are not carried at fair value on the Consolidated Balance Sheets are discussed below. Accordingly, these fair value disclosures provide only a partial estimate of the Company's fair value.

For cash and due from banks, interest bearing deposits due from banks and federal funds sold, the carrying amount approximates fair value because these instruments generally mature in 90 days or less. The carrying amounts of accrued interest receivable or payable approximate fair values.

The fair value of held-to-maturity mortgage-backed securities issued by Government sponsored enterprises is estimated based on dealers' quotes for the same or similar securities.

The fair value of FHLB stock is estimated at its cost. The FHLB historically has redeemed its outstanding stock at that value.

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

Fair values are estimated for loans using discounted cash flow analyses, using interest rates currently offered for loans with similar terms and credit quality. We do not engage in originating, holding, guaranteeing, servicing or investing in loans where the terms of the loan product give rise to a concentration of credit risk.

The fair value of deposits with no stated maturity (noninterest bearing demand, interest bearing transaction accounts and savings) is estimated as the amount payable on demand, or carrying amount, as required by the ASC. The fair value of time deposits is estimated using a discounted cash flow calculation that applies rates currently offered to aggregate expected maturities.

The fair values of short-term borrowings, if any, approximate their carrying amounts.

Table of Contents

The fair values of fixed rate long-term debt instruments are estimated using discounted cash flow analyses, based on the borrowing rates currently in effect for similar borrowings. The fair values of variable rate long-term debt instruments are estimated at the carrying amount.

The following table presents the carrying amounts and fair values of our financial instruments:

	March 31, 2012		December 31, 2011	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(Dollars in thousands)			
Financial assets				
Cash and due from banks	\$ 1,747	\$ 1,747	\$ 3,355	\$ 3,355
Interest bearing deposits due from banks	143,585	143,585	121,555	122,057
Securities available-for-sale	103,391	103,391	124,411	124,411
Securities held-to-maturity	4,004	4,340	4,396	4,752
Federal Home Loan Bank stock	1,143	1,143	1,143	1,143
Loans - net	211,417	212,916	220,297	220,266
Accrued interest receivable	1,513	1,513	1,879	1,881
Financial liabilities				
Deposits	456,296	458,581	463,842	465,941
Accrued interest payable	1,056	1,056	1,154	1,154
Long-term debt	6,500	6,519	6,500	6,521

The estimated fair values of off-balance-sheet financial instruments such as loan commitments and standby letters of credit are generally based upon fees charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties creditworthiness. The vast majority of the banking subsidiary's loan commitments do not involve the charging of a fee, and fees associated with outstanding standby letters of credit are not material. For loan commitments and standby letters of credit, the committed interest rates are either variable or approximate current interest rates offered for similar commitments. Therefore, the estimated fair values of these off-balance-sheet financial instruments are nominal.

The following is a summary of the notional or contractual amounts and estimated fair values of our off-balance-sheet financial instruments:

	March 31, 2012		December 31, 2011	
	Notional/ Contract Amount	Estimated Fair Value	Notional/ Contract Amount	Estimated Fair Value
	(Dollars in thousands)			
Off-balance sheet commitments				
Loan commitments	\$ 24,210	\$	\$ 24,486	\$
Standby letters of credit	3,824		1,051	

Other Expenses Other expenses consisted of the following:

Three Months Ended March 31,
2012 **2011**
(Dollars in thousands)

Salaries and employee benefits	\$	1,192	\$	1,220

Directors' compensation		48		48
Data processing servicing fees		69		
Other		171		157
Total	\$	4,314	\$	2,558

New Accounting Pronouncements In April 2011, The Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*. ASU 2011-03 affects all entities that enter into agreements to transfer financial assets that both entitle and obligate the transferor to repurchase or redeem the financial assets before their maturity by removing from the assessment of effective control the criterion relating to the transferor's ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee. ASU 2011-03 also eliminates the requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets. The guidance is effective prospectively for new transactions or modifications of existing transactions as of the first interim or annual period beginning on or after December 15, 2011. ASU 2011-03 became effective for the Company on January 1, 2012 and its implementation had no effect on the Company's consolidated financial position, results of operations or cash flows.

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The standards set forth in ASU 2011-04 supersede most of the accounting guidance formerly set forth in preceding GAAP. The amendments improve comparability of fair value measurements presented and disclosed in statements prepared in accordance with GAAP and those prepared in accordance with IFRSs and clarify the application of existing fair value measurement requirements. The clarification amendments include (1) that the application of the highest and best use and valuation premise concepts are relevant only with respect to fair value measurements of nonfinancial assets, (2) specifies that the fair value measurement of a financial instrument included in an entity's shareholders' equity should be from the perspective of a market participant that holds that instrument as an asset and (3) requirements that entities disclose quantitative information about the unobservable inputs used in a fair value measurement categorized within Level 3 of the fair value hierarchy. The ASU became effective for the Company on January 1, 2012 and did not have a material impact on the Company's consolidated financial positions, results of operations or cash flows.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. ASU 2011-05 amends prior GAAP to require that, in fiscal years and interim reporting periods beginning after December 15, 2011, an entity present all nonowner changes in stockholders' equity either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. This new guidance has been implemented in this report. In January 2012, the FASB issued additional guidance that indefinitely defers the effective date of requirements to present reclassification adjustments by component in both the statement where net income is presented and that statement where other comprehensive income is presented.

In December, 2011, The FASB issued ASU 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. The amendments in the Update affect all entities that have financial instruments and derivative instruments that

Table of Contents

are either (1) offset in accordance with either Accounting Standards Codification (ASC) Section 210-20-45 or ASC Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement. The ASU amends the disclosure requirements on offsetting in SASC Section 210-20-50. The new disclosure requirements are intended to enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments or derivative instruments within the Update's scope. The amendments are required to be applied for interim and annual reporting periods beginning on or after January 1, 2103 and the disclosures are required to be applied retrospectively for all comparative periods presented. The Company is evaluating the impact that adoption will have on its consolidated statements, if any.

CAUTIONARY NOTICE WITH RESPECT TO FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the securities laws. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements.

All statements that are not historical facts are statements that could be forward-looking statements. You can identify these forward-looking statements through the use of words such as may, will, should, could, would, expect, anticipate, assume, indicate, contemplate, predict, target, potential, believe, intend, estimate, project, continue, or other similar words. Forward-looking statements include, but are not limited to, statements regarding the Company's future business prospects, revenues, working capital, liquidity, capital needs, interest costs, income, business operations and proposed services.

These forward-looking statements are based on current expectations, estimates and projections about the banking industry, management's beliefs, and assumptions made by management. Such information includes, without limitation, discussions as to estimates, expectations, beliefs, plans, strategies, and objectives concerning future financial and operating performance. These statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially from those expressed or forecasted in such forward-looking statements. The risks and uncertainties include, but are not limited to:

- future economic and business conditions;
- lack of sustained growth and disruptions in the economies of the Company's market areas, including, but not limited to, declining real estate values and increasing levels of unemployment;
- government monetary and fiscal policies;
- the effects of changes in interest rates on the levels, composition and costs of deposits, loan demand, and the values of loan collateral, securities, and interest sensitive assets and liabilities;
- the effects of credit rating downgrades on the values of investment securities issued or guaranteed by various governments and governmental agencies, including the United States of America;
- the effects of competition from a wide variety of local, regional, national and other providers of financial, investment, and insurance services, as well as competitors that offer banking products and services by mail, telephone, computer and/or the Internet;

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

- credit risks;
- higher than anticipated levels of defaults on loans;
- perceptions by depositors about the safety of their deposits;
- capital adequacy;
- the failure of assumptions underlying the establishment of the allowance for loan losses and other estimates, including the value of collateral securing loans;
- ability to continue to weather the current economic downturn;
- ability to realize anticipated tax benefits;
- loss of consumer or investor confidence;
- availability of liquidity sources;
- the risks of opening new offices, including, without limitation, the related costs and time of building customer relationships and integrating operations as part of these endeavors and the failure to achieve expected gains, revenue growth and/or expense savings from such endeavors;
- the risks related to acquiring other financial institutions;
- changes in laws and regulations, including tax, banking and securities laws and regulations;
- changes in the requirements of regulatory authorities;
- changes in accounting policies, rules and practices;

Table of Contents

- cost and difficulty of implementing changes in technology and products;
- the effects of war or other conflicts, acts of terrorism or other catastrophic events that may affect general economic conditions and economic confidence; and
- other factors and information described in this report and in any of the other reports that we file with the Securities and Exchange Commission under the Securities Exchange Act of 1934.

All forward-looking statements are expressly qualified in their entirety by this cautionary notice. We have no obligation, and do not undertake, to update, revise or correct any of the forward-looking statements after the date of this report. We have expressed our expectations, beliefs and projections in good faith and believe they have a reasonable basis. However, there is no assurance that these expectations, beliefs or projections will result or be achieved or accomplished.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

(Dollar amounts, except per share data, are in thousands)

Recent Developments

On April 5, 2012, the President signed into law the Jumpstart Our Business Startups Act (the JOBS Act), which is generally intended to stimulate economic growth by helping smaller and emerging growth companies access the U.S. capital markets. The JOBS Act amends various provisions of, and adds new sections to, the Securities Act of 1933 and the Securities Exchange Act of 1934 (as amended by the JOBS Act, the Exchange Act), as well as provisions of the Sarbanes-Oxley Act of 2002. The JOBS Act directs the Securities and Exchange Commission to issue rules implementing certain of the JOBS Act amendments. Except as noted below, the Company is evaluating the effects that the provisions of the JOBS Act and the Securities and Exchange Commission rules adopted pursuant to the JOBS Act will have on the Company.

For bank holding companies, the JOBS Act increases the statutory threshold for deregistration under the Securities Exchange Act of 1934 from 300 shareholders to 1,200 shareholders of record. The Company currently has 760 shareholders of record. Therefore, on May 14, 2012, the Company filed a Form 15 with the Securities and Exchange Commission to deregister the Company's common stock under Section 12(g)(4) of the Exchange Act. The Section 12(g) deregistration will become effective in 90 days or such shorter period as may be determined by the Securities and Exchange Commission. Based on the filing date of the Form 15, the Company does not expect to have any further reporting obligations under the Exchange Act after August 12, 2012. The Company expects the deregistration will provide significant cost savings in the form of reduced audit, legal and filing expenses and other costs related to complying with the Exchange Act.

Changes in Financial Condition

During the first three months of 2012, we sold approximately 34% of our portfolio of securities available-for-sale, and realized gains of \$1,528 on sales proceeds of \$42,335. These transactions were undertaken to take advantage of bond prices that were believed to represent selling

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

opportunities and, in the case of sales of securities issued by state, county and municipal issuers, to allow us to reinvest those proceeds into securities or other earning assets yielding taxable income which might improve our ability to realize deferred future income tax benefits. In addition, calls and paydowns of securities totaled \$24,551. We purchased approximately \$46,529 of securities available-for-sale during the period. As a result of these transactions, the yield and maturity structure of our securities portfolios changed significantly and substantially all of the net unrealized gains and related deferred income taxes on securities available-for-sale that existed at December 31, 2011 were reclassified into net income from other comprehensive income during the 2012 three-month period.

Loans outstanding continue to decrease due to reduced demand for loan origination activity, the application of payments received, charge-offs of loans and transfers from loans to foreclosed assets.

We continue to actively market for sale the properties that we have acquired through foreclosure and repossession. Despite those efforts, the amount of such properties we currently hold is 60% more than the amount we held as of March 31, 2011 and approximately three times the amount we held as of March 31, 2010. Holding the properties is expensive due to property taxes and other amounts that may be assessed against the properties and expenditures needed to keep the properties insured and in marketable condition. We may be required to provide for decreases in value that arise during the time that we hold these properties and we may realize further losses when we sell the properties. During the first three months of 2012, we sold four other real estate properties and five repossessions for proceeds of \$944 and realized net gains

Table of Contents

of \$12 on those sales. During the first three months of 2012, we acquired properties totaling \$2,796 and provided \$1,531 for estimated valuation decreases subsequent to acquisition.

During the first quarter of 2012, demand deposits and savings deposits decreased significantly due to the normal disbursement of county property taxes that were originally deposited with the Bank primarily during the fourth quarter of 2011.

Results of Operations

We recorded a consolidated net loss of \$680 for the first three months of 2012 compared with net income of \$175 for the first three months of 2011. After deducting \$39 in each period applicable to preferred stock dividends and not available to common shareholders, net (loss) or net income per common share was \$(.17) for the first three months of 2012 compared with \$.03 per common share for the first quarter of 2011. Net income per common share amounts for 2011 have been retroactively adjusted to reflect a five percent stock dividend effective December 16, 2011.

Summary Income Statement (Dollars in thousands)				
	2012	2011	Dollar Change	Percentage Change
For the Three Months Ended March 31,				
Interest income	\$ 4,369	\$ 4,954	\$ (585)	-11.8%
Interest expense	1,078	1,496	(418)	-27.9%
Net interest income	3,291	3,458	(167)	-4.8%
Provision for loan losses	935	1,250	(315)	-25.2%
Noninterest income	2,112	559	1,553	277.8%
Noninterest expenses	4,314	2,558	1,756	68.6%
Income tax expense	834	34	800	2352.9%
Net income (loss)	(680)	175	(855)	-488.6%
Preferred stock dividends declared or accumulated	(39)	(39)		0.0%
Net income (loss) available to common shareholders	\$ (719)	\$ 136	\$ (855)	-628.7%

Net Interest Income

Net interest income is the principal source of our earnings. For the first quarter of 2012, net interest income totaled \$3,291, a decrease of \$167 or 4.8% lower than the amount for the same period of 2011. The yield on interest earning assets decreased to 3.70% for the 2012 period, compared with 4.17% for the 2011 period, and the average rates paid for interest bearing liabilities were 1.06% and 1.45%, respectively. The restructuring that occurred in our securities available-for-sale portfolio resulted in a lower yield on the portfolio. The average interest rate spread for the 2012 period was 8 basis points lower than for the 2011 period and net yield on earning assets decreased to 2.79% in the 2012 period from 2.91% for the 2011 period.

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

Average loans in the 2012 period were \$219,872, a decrease of \$32,315, or 12.8%, from the amount for the same period of 2011. The effect of this volume decrease, which was partially offset by a 33 basis point increase in the yield earned on loans, resulted in a \$254 decrease in interest and fees on loans for the 2012 period from \$3,623 for the 2011 period.

Average taxable securities for the 2012 quarter were \$43,823 less than for the same period of 2011. The yield earned on such securities in the 2012 period was 25 basis points lower than the yield during the same 2011 period.

Interest rates paid for interest-bearing deposits decreased to 1.02% for the 2012 period, compared with 1.41% for the 2011 period. The majority of our time deposit accounts are issued with original maturities of 12 months or less. Consequently, the rates we pay for such deposits generally follow the trends of overall market rates. Recently, due to low demand for loans and because other earning assets are not priced attractively, we have not sought to retain maturing time deposits through interest rate incentives. Some of those deposits have been retained as interest bearing transaction accounts at much lower interest rates.

(1) Yields and rates are annualized.

(2) Yields on tax exempt instruments have not been adjusted to a tax-equivalent basis.

(3) Nonaccruing loans are included in the loan balance and income from such loans is recognized on a cash basis.

(4) Includes immaterial amounts of loan fees.

Table of Contents**Provision and Allowance for Loan Losses**

We provided \$935 and \$1,250 for loan losses in the first quarters of 2012 and 2011, respectively. As of March 31, 2012, the allowance for loan losses was 2.25% of loans compared with 1.94% of loans at December 31, 2011 and 2.36% as of March 31, 2011. During the 2012 three month period, net charge-offs totaled \$433, compared with \$1,167 in net charge offs during the same period of 2011. As of March 31, 2012, nonaccrual loans totaled \$7,993 and there were no loans 90 days or more past due and still accruing interest. Approximately 95% of those nonaccrual loans were secured by real estate. As of March 31, 2011, nonaccrual loans totaled \$20,588 and there were no loans 90 days or more past due and still accruing interest. The activity in the allowance for loan losses is summarized in the table below:

	Three Months Ended March 31, 2012	Year Ended December 31, 2011	Three Months Ended March 31, 2011
	(Dollars in thousands)		
Allowance at beginning of period	\$ 4,359	\$ 5,756	\$ 5,756
Provision for loan losses	935	7,375	1,250
Net charge-offs	(433)	(8,772)	(1,167)
Allowance at end of period	\$ 4,861	\$ 4,359	\$ 5,839
Allowance as a percentage of loans outstanding at period end	2.25%	1.94%	2.36%
Loans at end of period	\$ 216,423	\$ 224,656	\$ 247,640

Table of Contents

Impaired and Potential Problem Loans

As of March 31, 2012, we had troubled debt restructurings (TDRs) totaling \$8,075 that are not included in the amounts of nonaccrual loans or loans 90 days past due and still accruing in the table above. Approximately 83% of the amount of those TDRs have collateral consisting of real estate. TDRs are considered to be impaired loans.

Potential problem loans include loans, other than impaired loans, that management has identified as having possible credit problems sufficient to cast doubt upon the abilities of the borrowers to comply with the current repayment terms. Such loans are generally included in the amounts of Management Attention and Special Mention loans included in the table captioned Internally Assigned Risk Grade included in the section captioned Loans in the Notes to Consolidated Financial Statements.

South Carolina's unemployment rate was 8.9% as of March 2012 compared with 10.4% (revised) for March 2011. The unemployment rates for Oconee and Anderson Counties were 8.4% each for March 2011 compared with 9.5% for Anderson County and 10.0% for Oconee County as of March 2011 (2011 statistics are revised from amounts reported previously). The lower unemployment rate in both cases resulted primarily from fewer members of the labor force, rather than from higher numbers of employed workers. Worsening of this condition or a continuation of the existing prolonged period of elevated levels, significant increases in prices for fuel and food, continuing declines in the values of homes and other real properties, declining demand for products manufactured locally, and other events could continue to have adverse effects on those areas and potentially lead to further deterioration of the abilities of our loan customers to repay their debts. These events could lead to higher amounts of nonaccrual, past due and potential problem loans and higher loan losses, all of which could result in higher provisions for loan losses.

Noninterest Income

Noninterest income was \$2,112 for the first quarter of 2012, compared with \$559 for the first quarter of 2011. During the first quarter of 2012, we sold substantially all of the securities available-for-sale that were in unrealized gain positions as of December 31, 2011 and realized gains of \$1,528 on those sales. We sold approximately 70% of our December 31, 2011 holdings of securities issued by states, counties and municipalities. The income on such securities is generally not taxable for federal income tax purposes. In order for us to realize the potential tax benefits associated with our recent taxable losses, we must generate larger amounts of federally taxable income. A portion of the sales proceeds was reinvested into new taxable securities positions, but the interest rates associated with those investments are generally lower than the rates associated with the securities that were sold, even though the maturity structure of the portfolio was lengthened. Accordingly, we expect that, unless we can invest other funds at higher rates in the future, our yield on securities will be lower, which could adversely affect income.

Noninterest Expenses

Noninterest expenses were \$4,314 for the first quarter of 2012, compared with \$2,558 for the first quarter of 2011, representing an increase of \$1,756 or 68.6%. The increase resulted primarily from \$1,531 provided for valuation decreases associated with our holdings of foreclosed assets and an increase of \$80 in other expenses related to foreclosed assets.

We expect that expenses of foreclosed assets will remain at elevated levels until increased sales of the properties can be consummated.

Income Taxes

Income tax expense for the first quarter of 2012 increased by \$800 from the amount for the same period of 2011. This increase resulted from the need to provide an additional valuation allowance for deferred income tax assets that are not supported by current estimates of future taxable income. The sale of securities that resulted in gains of \$1,528 also resulted in the elimination of deferred tax liabilities totaling \$548 on the formerly unrealized gains. Valuation decreases related to our remaining holdings of securities available-for-sale resulted in a further decrease in the related deferred tax liability of \$286. The provision of \$1,531 for valuation allowances related to foreclosed assets increased net deferred tax assets by approximately \$510.

As of March 31, 2012, we have net deferred tax assets of \$4,103. Based on federal taxable income recorded in the first quarter of 2012, we provided additional valuation allowances for net deferred tax assets totaling \$836 for the first three months of 2012. Such valuation allowances now total \$3,583 and net deferred tax assets supported by taxable income for the first quarter of 2012 totaling \$520 are included in other assets as of March 31, 2012.

Table of Contents

Liquidity

Liquidity is the ability to meet current and future obligations through the liquidation or maturity of existing assets or the acquisition of additional liabilities. We manage both assets and liabilities to achieve appropriate levels of liquidity. Cash and short-term investments are our primary sources of asset liquidity. These funds provide a cushion against short-term fluctuations in cash flow from both deposits and loans. Securities available-for-sale provide our principal source of secondary asset liquidity. However, the availability of this source is influenced by market conditions to a significant extent. Individual and commercial deposits are the primary sources of funds for our credit activities. We also have significant amounts of credit availability under our FHLB lines of credit.

As of March 31, 2012, the ratio of loans to total deposits was 47.4%, compared with 48.4% as of December 31, 2011. Total deposits as of March 31, 2011 were \$456,296, a decrease of \$7,546 or 1.6% from the amount as of December 31, 2011. Management believes that we have liquidity sources sufficient to meet our operating needs.

Capital Resources

Our capital base decreased by \$2,209 since December 31, 2011 as the result of net loss of \$680 for the first three months of 2012, minus a \$1,490 decrease in net unrealized gains on available-for-sale securities, net of deferred income tax effects, and minus \$39 cash dividends declared on our preferred stock.

The Company and its banking subsidiary (the Bank) are subject to regulatory risk-based capital adequacy standards. Under these standards, bank holding companies and banks are required to maintain certain minimum ratios of capital to risk-weighted assets and average total assets. Under the provisions of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), federal bank regulatory authorities are required to implement prescribed prompt corrective actions upon the deterioration of the capital position of a bank. If the capital position of an affected institution were to fall below certain levels, increasingly stringent regulatory corrective actions are mandated.

The March 31, 2012 risk based capital ratios for the Company and the Bank are presented in the following table, compared with the well capitalized (Bank only) and minimum ratios under the regulatory definitions and guidelines:

	Tier 1	Total Capital	Leverage
Community First Bancorporation	15.7%	17.0%	8.0%
Community First Bank	14.2%	15.4%	7.1%
Minimum well-capitalized requirement	6.0%	10.0%	5.0%
Minimum requirement	4.0%	8.0%	4.0%

Off-Balance-Sheet Arrangements

Edgar Filing: COMMUNITY FIRST BANCORP - Form 10-Q

In the normal course of business, the Bank is a party to financial instruments with off-balance-sheet risk including commitments to extend credit and standby letters of credit. Such instruments have elements of credit risk in excess of the amount recognized in the balance sheet. The exposure to credit loss in the event of nonperformance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. Generally, the same credit policies used for on-balance-sheet instruments, such as loans, are used in extending loan commitments and standby letters of credit.

Following are the off-balance-sheet financial instruments whose contract amounts represent credit risk:

	March 31, 2012 (Dollars in thousands)	
Loan commitments	\$	24,210
Standby letters of credit		3,824

Loan commitments involve agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and some involve payment of a fee. Many of the commitments are expected to expire without being fully drawn; therefore, the total amount of loan commitments does not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if any, upon extension of credit is based on management's credit

Table of Contents

evaluation of the borrower. Collateral held varies but may include commercial and residential real properties, accounts receivable, inventory and equipment.

Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. The credit risk involved in issuing standby letters of credit is the same as that involved in making loan commitments to customers. Many letters of credit will expire without being drawn upon and do not necessarily represent future cash requirements. The Bank receives fees for loan commitments and standby letters of credit. The amount of such fees was not material for the three months ended March 31, 2012.

As described under Liquidity, management believes that its various sources of liquidity provide the resources necessary for the Bank to fund the loan commitments and to perform under standby letters of credit, if the need arises. Neither the Company nor the Bank is involved in other off-balance sheet contractual relationships or transactions that could result in liquidity needs or other commitments or significantly impact earnings.

Item 4. Controls and Procedures

Based on the evaluation required by 17 C.F.R. Section 240.13a-15(b) or 240.15d-15(b) of the issuer's disclosure controls and procedures (as defined in 17 C.F.R. Sections 240.13a-15(e) and 240.15d-15(e)), the issuer's chief executive officer and chief financial officer concluded such controls and procedures, as of the end of the period covered by this report, were effective.

There has been no change in the Company's internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
