Funds from Operations (“FFO”) Reconciliation

FFO, as defined by the National Association of Real Estate Investment Trusts (“NAREIT”), is generally considered by industry analysts as an appropriate measure of performance of an equity REIT. Generally, FFO adjusts the net income of equity REITs for charges such as depreciation and amortization of rental properties, impairment charges, gains/losses on sales of real estate and extraordinary items. Management considers FFO and Core FFO which excludes acquisition costs and items that are non-routine or not related to the Company’s core business activities, which is referred to as Core FFO, to be useful financial performance measurements of an equity REIT because, together with net income and cash flows, FFO and Core FFO provide investors with an additional basis to evaluate the operating performance and ability of a REIT to incur and service debt and to fund acquisitions and other capital expenditures and the ability to pay dividends.

FFO does not represent net income or cash flows from operations as defined by U.S. generally accepted accounting principles (“GAAP”) and is not intended to indicate whether cash flows will be sufficient to fund cash needs. It should not be considered as an alternative to net income as an indicator of the REIT’s operating performance or to cash flows as a measure of liquidity. FFO does not measure whether cash flow is sufficient to fund all cash needs including principal amortization, capital improvements and distributions to shareholders. FFO also does not represent cash flows generated from operating, investing or financing activities as defined under GAAP. Management has consistently

applied the NAREIT definition of FFO to all periods presented. However, there is judgment involved and other REITs' calculation of FFO may vary from the NAREIT definition for this measure, and thus their disclosures of FFO may not be comparable to Essex's calculation.
