NOTE 1 -SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Organization

Atlas Mining Company, (“the Company”) was incorporated in the state of Idaho on March 4, 1924. The Company was formed for the purpose of exploring and developing the Atlas mine, a consolidation of several patented mining claims located in Coeur d’Alene Mining District near Mullan, Idaho. The Company eventually became inactive as a result of low silver prices.

In September 1997, the Company became active and purchased substantially all of the operating equipment and mining supplies from Fausett International, Inc., a related party. The purchase price totaled \$1,416,099, which consisted of \$50,000 cash, 875,000 shares of the Company’s common stock valued at \$350,000 and a note payable of \$1,016,094. After the purchase, the Company commenced contracting operations through the trade name, Atlas Fausett Contracting. Through Atlas Fausett Contracting, the Company provides shaft sinking, underground mine development and contracting primarily to companies in the mining and civil industries. The Company also pursues property acquisitions and resource development projects. In 2002, the Company settled out the debt to Fausett International and returned the majority of the unusable equipment; however the Company continues to pursue contracting activities.

In 1997 and 1998, the Company was to exchange 844,560 shares of its common stock for all of the outstanding shares of Sierra Silver Lead Mines, Inc. (Sierra), an Idaho corporation. As of March 31, 2007, 383,932 shares of the Company’s common stock had not been exchanged. The Company was unable to locate some of the shareholders of Sierra. Therefore, the Company agreed to transfer the stock to an Atlas Mining Company Trust account in trust for the unlocated shareholders of Sierra Silver. The acquisition of Sierra has been recorded as a purchase. The purchase price totaled \$276,157. All of the assets and liabilities of Sierra were transferred to the Company and Sierra ceased to exist.

In April 1999, the Company exchanged 741,816 shares of its common stock and paid cash of \$15,770 for all of the outstanding shares of Olympic Silver Resources, Inc. (Olympic), a Nevada corporation. Olympic holds the rights to the San Acacio Mine in Zacatecas, Mexico. The purchase price totaled \$228,566. The acquisition has been recorded as a purchase and all of the assets and liabilities were transferred to the Company. In 2001, the Company did not renew the rights to the property due to increased carrying costs.

In 1998 and 1999, the Company exchanged 71,238 shares of its common stock for 53% of the outstanding shares of Park Copper and Gold Mining, Ltd. (Park Copper), an Idaho corporation. The purchase price totaled \$72,825. The acquisition was recorded as a purchase.

NOTE 1 -SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In July 2001, Atlas Mining Company began leasing the Dragon Mine from Conjecture Silver Mines, Inc. in Spokane, Washington. Conjecture Mines has since been merged into Chester Mines, Inc. at the same location. We initially paid 400,000 shares of our common stock, valued at \$100,000, for a one-year lease. Under the terms of the lease agreement, we had the right to renew the lease annually in exchange for 100,000 additional shares of our common stock, or the option to purchase the property for \$500,000 if we had \$1,000,000 in sales from the mine in a 12-month period. We exercised the option to purchase the Dragon Mine on August 18, 2005 for \$500,000. The property consists of 38 patented mining claims on approximately 230 acres.

b. Interim Financial Reporting

The accompanying condensed financial statements of the Company have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. These condensed financial statements reflect all adjustments (consisting only of normal recurring adjustments) that, in the opinion of management, are necessary to present fairly the results of operations of the Company for the periods presented. These condensed financial statements should be read in conjunction with the financial statements and the notes thereto included in the Company's Form 10-KSB for the year ended December 31, 2006. The results of operations for the three months ended March 31, 2007, are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2007.

c. Earnings (Loss) Per Share

The computation of earnings (loss) per share of common stock is based on the weighted average number of shares outstanding at the date of the financial statements. The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the year plus the common stock equivalents which would arise from the exercise of stock options and warrants outstanding using the treasury stock method and the average market price per share during the year. Common stock equivalents at March 31, 2007 consisted of 3,773,333 in options. Common stock equivalents at March 31, 2006 consisted of 3,500,000 in options and 1,164,000 in warrants. Common stock equivalents at March 31, 2007 and 2006 were considered but were not included in the computation of loss per share at March 31, 2007 and 2006 because they would have been anti-dilutive.

d. Available for Sale Investments

The shares are evaluated quarterly using the specific identification method. Any unrealized holding gains or losses are reported as Other Comprehensive Income and as a separate component of stockholder's equity. Realized gains and losses are included in earnings. Marketable Securities-Available for Sale are as follows:

Balance, January 1, 2006	\$ 3,754
Marketable securities received	41,823
Net unrealized losses	(41,783)

Net unrealized losses	(48,483)
Balance, March 31, 2007	\$ 5,520

e. Property and Equipment

Property and equipment are carried at cost. Depreciation and amortization is computed on the straight-line method over the estimated useful lives of the assets as follows:

	Estimated Useful Life
Building	30 years
Mining equipment	2-8 years
Office and shop furniture and equipment	5-8 years
Vehicles	5 years

Atlas Mining Company and Subsidiary
Notes to the Consolidated Financial Statements
March 31, 2007

NOTE 1 -SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In accordance with Financial Accounting Standards Board Statement No. 144, the Company records impairment of long-lived assets to be held and used or to be disposed of when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount. At March 31, 2007 and December 31, 2006, no impairments were recognized. Depreciation expense for the quarters ended March 31, 2007 and 2006 totaled \$75,051 and \$25,154, respectively.

f. Stock Options and Warrants

The Company has stock option plans that provide for stock-based employee compensation, including the granting of stock options, to certain key employees. The plans are more fully described in Note 5. Prior to January 1, 2006, the Company applied APB Opinion No. 25, "Accounting for Stock Issued to Employees", and related Interpretations in accounting for awards made under the Company's stock-based compensation plans. Under this method, compensation expense was recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price.

During the periods presented in the accompanying financial statements, the Company has adopted the provisions of SFAS No. 123R using the modified-prospective transition method and the disclosures that follow are based on applying SFAS No. 123R. Under this transition method, compensation expense recognized during the three months ended March 31, 2007 included: (a) compensation expense for all share-based awards granted prior to, but not yet vested as of January 1, 2007, and (b) compensation expense for all share-based awards granted on or after January 1, 2007. Accordingly, compensation expense of \$188,395 and \$0 has been recognized for vesting of options to employees and directors in the accompanying statements of operations for the period ended March 31, 2007 and 2006, respectively.

g. Concentration of Risk

The Company maintains cash balances in two checking accounts at two separate financial institutions. At March 31, 2007 and December 31, 2006, total cash balances were \$1,818,272 and \$217,102, respectively. Such funds exceed Federal Deposit Insurance Corporation limits, and amounts exceeding \$100,000 are not insured.

NOTE 3 - STOCK OPTIONS AND WARRANTS TO PURCHASE COMMON STOCKStock Options

In 1998, the Company adopted a non-qualified stock option plan authorizing the granting to officers, directors, or employees options to purchase common stock. Options are granted by the Administrative Committee, which is elected by the Board of Directors. The number of options granted under this plan and any other plans active may not exceed 10% of the currently issued and outstanding shares of the Company's common stock. The term of each option granted is determined by the Committee, but cannot be for more than five years from the date the option is granted. The option price per share with each option granted will be fixed by the Administrative Committee on the date of grant.

Atlas Mining Company and Subsidiary
Notes to the Consolidated Financial Statements
March 31, 2007

NOTE 3 - STOCK OPTIONS AND WARRANTS TO PURCHASE COMMON STOCK (continued)

The Company adopted an incentive stock option plan in 1998. The stock option plan permits the Company to grant to key employees options to purchase shares of stock in the Company at the direction of the Committee. The price of shares purchased must be equal to or greater than fair market value of the common stock at the date. At March 31, 2007, no options have been granted under this plan.

The Company is authorized to issue stock options under one existing stock option plan approved by stockholders. The fair value of each of the Company's stock option awards is estimated on the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the table below. Expected volatility is based on an average of historical volatility of the company's stock. The risk-free interest rate for periods within the contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury bond on the date the award is granted with a maturity equal to the expected term of the award. The Company uses historical data to estimate forfeitures within its valuation model.

The expected term of awards granted is derived from historical experience under the Company's stock-based compensation plans and represents the period of time that awards granted are expected to be outstanding.

During 2004, the company's board of directors approved an option to the Company's CEO to acquire up to 3.5 million shares of common stock over a five year period at \$0.18 per share under the non-qualified stock option plan. The options vested 43% on January 1, 2005, and 14% on January 1, 2006 -2009.

The significant weighted average assumptions relating to the valuation of the Company's CEO's Stock Options for the year ended December 31, 2006 were as follows:

	2006
Dividend Yield	0%
Expected Life	3 years
Expected Volatility	59%
Risk-Free Interest Rate	4.94%

During 2006, the Company's board of directors approved an option to the CEO of the Company's wholly owned subsidiary, Nano Clay and Technologies, Inc., to acquire up to one million shares of common stock over a two year period. The first 500,000 shares are exercisable at \$1.51 per share, and the remaining 500,000 shares are exercisable at 85% of the common stock price on given anniversary dates. These options were issued under the non-qualified stock option plan. The options vested 25% on July 14, 2006, and will continue to vest in 25% increments on January 14, 2007, July 14, 2007, and January 14, 2008.

NOTE 5 – SEGMENT REPORTING

The Company's Chief Operating Decision-maker, as defined in SFAS No. 131, is considered to be Atlas's CEO. The Chief Operating Decision-maker reviews separate financial information for the contract mining business segment, the mining production business segment and the timber business segment. Each of the Company's business segments offer and distribute distinct services to different customer segments. The contract mining segment provides mining services and specialized civil construction services in various locations for mine operators, exploration companies and the construction and natural resources industries. Other activities include site evaluation, feasibility studies, trouble-shooting and consultation prior to the undertaking of exploration and mine development. The mining production segment is located at the Dragon Mine in Juab County, Utah which contains a deposit of high quality halloysite clay. The Company is in the process of extracting this clay to sell to outside parties. The Company holds property with harvestable timber in Northern Idaho. Timber harvesting is contracted out to a qualified logger, who is able to negotiate with local timber mills on the price for the timber. The Company primarily uses the timber to generate revenues and cash flows for other operations. The Company therefore considers that it has three reportable segments under SFAS 131 during 2006 to 2007 as follows: (i) contract mining, (ii) mining production, and (iii) timber.

The Chief Operating Decision-maker evaluates performance and allocates resources based on revenues produced from operations. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. It is the Company's policy that trade between the segments is entered into at an arms-length basis.

NOTE 6 – SUBSEQUENT EVENTS

In April 2007, one Park Copper shareholder exchanged his Park Copper stock for 1,000 shares of restricted Atlas stock.

In April 2007, the Company entered into an agreement with SNS Silver Corp to provide diamond drilling services on the surface of the customer's property located in Big Creek, Idaho. Management estimates that the contract will continue through June 2010 and is estimated to exceed \$3 million in gross revenues over the life of the contract.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

We are a natural resources company engaged in the acquisition and exploration of our resource properties in the states of Idaho and Utah and in New Foundland, Canada. We also provide contract mining services and specialized civil construction services for mine operators, exploration companies and the construction and natural resource industries through our trade name "Atlas Fausett Contracting."

Our primary source of revenue is generated by our Atlas Fausett Contracting operations. However, we also have exploration targets and timber. As a result, we are providing Management's discussion on our plan of operation.

Contract Mining

Our contract mining generates more than 99% of our revenues. This may decrease as we are able to increase operations on our owned properties, and we will adjust our resources accordingly. At this time, we anticipate that our contracting will remain a significant portion of our business.

Property Exploration

We intend to continue our exploration activities for halloysite clay and other minerals, and intend to acquire commercially feasible properties that can be put into production with minimal environmental problems and with limited financial resources. We do not intend to seek out and acquire other properties unless they fit into the parameters we have set. Further, we will limit our acquisitions based on our ability to conduct our feasibility surveys and other exploration work on these properties, and until we have been able to bring our existing acquisitions into a income generating stage.

In August 2001, we acquired the Dragon Mine in Juab, Utah and began our clay exploration. Our exploration and development expenses for the period ending March 31, 2007 and 2006 were \$481,868 and \$610,767 respectively on the halloysite clay project.

The halloysite clay is considered a non-toxic material, and we feel we can produce a sellable product with minimal environmental consequences using proper containment and processing techniques. The intended processing will be the crushing, drying, and packaging of the product for shipment. In 2003 and 2006 we completed diamond drilling programs to verify location of clay beds at the Dragon Mine. With that information we have been able to formulate development and mining plans. During 2005 we worked to develop and bring the Dragon Mine into the production stage.

Our halloysite clay marketing efforts include contacting potential customers and distributors, which we have done. Each buyer may have a different use for the product and the price and quantity will vary as a result. The sale of product cannot be formalized until we have verified our ability to provide the quality and quantities as required by the potential buyers. From results of the product samples distributed we have numerous potential buyers. In March 2006 we activated Nano Clay and Technologies, Inc., a wholly owned subsidiary, and hired Dr. Ron Price as its President and Chief Executive Officer, to pursue these activities.

Until the Dragon mine is producing in a profitable manner we are not aggressively trying to develop other properties. However it is our intent to look for other properties that can be acquired, developed and mined with minimal costs, and environmental problems.

We have a mining plan and reclamation bond approved by the proper state authorities, have filed and received Mine Safety and Health Administration (MSHA) registration, and County permitting where applicable. In the future, we may pursue additional acquisitions and exploration of other properties for metals and industrial minerals, development of which will require submission of new mining and reclamation plans to the proper state and federal authorities.

Timber

We will continue to harvest timber on our property. Timber harvesting will be dependent upon lumber prices and weather. We normally do not log much in the winter months.

RESULTS OF OPERATIONS

Revenues for the three month period ending March 31, 2007 were \$2,002,270 and \$334,710 for the same period ending March 31, 2006, or an increase of 498%. The difference was caused by the increase in contracting revenues of \$1,667,560 for this period compared to the previous year.

Gross profit (loss) for the three month period ending March 31, 2007 was \$910,267 compared to \$160,429 for the same period ending March 31, 2006, a difference of \$749,838. This was due to increased contracting revenues for the three month period ending March 31, 2007 over the same period ended March 31, 2006.

Total operating expenses for the three month period ending March 31, 2007 was \$999,427 compared to \$1,096,389 for the same period ending March 31, 2006 or a decrease of 9%. Although the company recognized less administrative costs and exploration and development costs in the period ended March 31, 2007 compared to the same period ended March 31, 2006, more mining production costs were incurred.

Our net profit (loss) for the three month period ending March 31, 2007 was \$(65,612) compared to \$(928,603) for the same period ending March 31, 2006, or a decrease of 93%. As previously mentioned, the company experienced significant increases in contracting revenues during the first quarter ended March 31, 2007 as compared to the same period ending March 31, 2006.

LIQUIDITY AND CAPITAL RESOURCES

To date our activities have been financed primarily through the sale of equity securities, borrowings, and revenues from Atlas Fausett Contracting. We intend to continue pursuing contract mining work and logging of our timber properties to help pay for our operations. For the three month periods ended March 31, 2007 and March 31, 2006 contract mining accounted for 100% of the revenue. Our current asset and debt structure is explained below.

Our total assets as of March 31, 2007 were \$6,673,536 compared to \$4,309,881 as of December 31, 2006, or an increase of \$2,363,655. For the three month period ended March 31, 2007 the company has increased its current assets by \$1,951,396, and its fixed assets by \$442,468 through acquisitions of additional equipment for mining and milling operations.

Total liabilities were \$1,045,874 as of March 31, 2007, compared to \$907,376 as of December 31, 2006. The following debts are still outstanding;

- We have a note payable to a leasing company for a piece of equipment with a \$26,233 balance with payments of \$2,135 per month at 9.75% interest and maturing in March 2008.
- We have a note payable to a leasing company for equipment with a \$40,718 balance with monthly installments of \$1,605 at 5.41% interest and maturing in May 2009.
- We have a note payable to a leasing company for the acquisition of equipment with a \$10,073 balance and monthly payments of \$676 at 1.35% interest, maturing in June 2008.
- We have a note payable to a leasing company for the acquisition of equipment with a \$61,225 balance and monthly payments of \$15,573 at 5% interest and maturing in August 11.
- We have a note payable to a lending company for the acquisition of equipment with a \$14,383 balance and monthly payments of \$479 at 0% interest and maturing in December 2008.
- We have a note payable to a lending company for the acquisition of equipment with a \$22,146 balance and monthly payments of \$688 at 7.59% interest and maturing in March 2010.
- We have a note payable to a private party with a \$100,677 balance due in annual installments of between \$15,000 to \$54,000 with an interest rate of 0%. The note matures in April 2009.

Edgar Filing: ATLAS MINING CO - Form 10QSB

- We have a note payable to a company with a \$124,526 balance due in monthly installments of \$3,518 at 22.66% interest and maturing in February 2012.
- We have a note payable to a company with a \$38,713 balance due in monthly installments of \$1,075 at 0% interest and maturing in March 2010.
- We have a note payable to an insurance company with a \$35,115 balance due in monthly installments of \$12,767 at 8.85% interest and maturing in July 2007.

Accounts payable and accrued expenses due as of March 31, 2007 were \$448,404 and are the result of daily operations and accrued taxes. We also carry a liability of \$52,289 to the minority interest in a subsidiary.

If we do not reduce our debts, we would be obligated to pay an average of \$60,386 per month or \$672,348 for the next fiscal year.

Our principal sources of cash flow during the first quarter 2007 was from contracting activities which provided an average of \$667,423 per month for the three month period ended March 31, 2007, and averaged \$111,570 per month for the same period in 2006. In addition, we rely on our credit facilities and any public or private sales of equity for additional cash flow.

Cash flow from financing activities for the three month period ended March 31, 2007 was \$2,200,480 compared to \$93,258 for the same period in 2006, a difference of \$2,107,222. The major factor for the difference was receipt of proceeds from issuance of common stock in 2007.

The Company used \$537,094 from investing activities for the three month period ended March 31, 2007, compared to using \$210,321 in the same period in 2006, a difference of \$326,773. This was attributed to purchases of more equipment in the period ended March 31, 2007 compared to the same period in 2006.

Cash flow used by operating activities for the three month period ended March 31, 2007, was (\$62,216) compared to (\$902,913) for the same period in 2006, a difference of \$840,697. In the three month period in 2007 net losses was markedly lower than the same period in 2006.

ITEM 3. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures.

The Company's Chief Executive Officer and its Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a 14(c) and 15d 14(c) as of a date within 90 days of the filing date of this quarterly report on Form 10-QSB (the "Evaluation Date"), have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were adequate and effective to ensure that material information relating to it would be made known to it by others within the Company, particularly during the period in which this quarterly report on Form 10-QSB was being prepared.

(b) Changes in Internal Controls.

The company has begun to implement changes in the procedures for recording accounting events to its financial program. The changes have been made as there has been an addition to the accounting staff and segregation of duties and reassignment of accounting functions has taken place. These changes in internal controls are viewed to have a positive impact to the disclosure controls present in the company and, thus, creating a stronger control environment. As of the Evaluation Date, there has not been any observation and/or documentation of any significant deficiencies or material weaknesses in such disclosure controls, nor any procedures requiring corrective actions.
