PROXY STATEMENT

For the 2014 Annual Meeting of Stockholders

General

The Board of Directors (the “Board”) of Merriman Holdings, Inc. (the “Company”), a Delaware corporation, is soliciting this proxy on behalf of the Company to be voted at the 2014 annual meeting of stockholders to be held on Friday, June 27, 2014, at 10:00 a.m., Pacific Time, or at any adjournment or postponement thereof. The 2014 annual meeting of stockholders will be held at Merriman Holdings, Inc. headquarters, 250 Montgomery Street, 16th Floor, San Francisco, California 94104.

Method of Proxy Solicitation

These proxy solicitation materials were mailed on or about [____], 2014, to all stockholders entitled to vote at the meeting. The Company will pay the cost of soliciting these proxies. These costs include the expenses of preparing and mailing proxy materials for the annual meeting and reimbursement paid to brokerage firms and others for their expenses incurred in forwarding the proxy materials. Directors, officers, and employees of the Company may also solicit proxies, in person, or by mail, telephone, facsimile or email, without additional compensation.

Voting of Proxies

Your shares will be voted as you direct on your signed proxy card. If you do not specify on your proxy card how you want to vote your shares, we will vote signed returned proxies:

- FOR the election of the Board’s seven nominees for director;
- FOR the ratification of the appointment of Marcum LLP as the Company’s independent auditors
- FOR the approval of the reverse stock split at a ratio of up to 1-for-30; and

- FOR the advisory, nonbinding vote on executive compensation.

We do not know of any other business that may be presented at the annual meeting. If a proposal other than those listed in the notice is presented at the annual meeting, your signed proxy card gives authority to the persons named in the proxy to vote your shares on such matters in their discretion.

Required Vote

Record holders of shares of the Company's common stock at the close of business on May 21, 2014, the voting record date, may vote at the meeting with respect to the election of seven directors, and the proposals described in this proxy statement. Each share of common stock outstanding on the record date has one vote. At the close of business May 21, 2014, there were _____ shares of common stock issued and outstanding.

The Company's bylaws and certificate of incorporation provide that a majority of the shares of the common stock entitled to vote, represented in person or by proxy, constitutes a quorum for transaction of business. Assuming the presence of a quorum at the annual meeting, the vote of the holders of at least a plurality of the stock having voting power present in person or represented by proxy is required to elect the seven directors. Cumulative voting is not permitted. Each director election vote is tabulated separately. The advisory vote on executive compensation is non-binding. The affirmative vote of at least a majority of the issued and outstanding common stock of the Company is required to amend the Company's Certificate of Incorporation to effect a reverse stock split of the outstanding common stock. Assuming the presence of a quorum at the annual meeting, the vote of the holders of at least a majority of the stock having voting power present in person or represented by proxy is required to pass the other proposals. The common stock shall vote together as a single class. Abstentions and broker non-votes are counted as present for purposes of establishing a quorum. Broker non-votes, however, will not be considered as part of the voting power present or represented at the annual meeting for purposes of any matter voted on at the meeting.

Revocability of Proxies

You may revoke your proxy by giving written notice to the Secretary of the Company or by delivering a later proxy to the Secretary, either of which must be received prior to the annual meeting, or by attending the meeting and voting in person.

PROPOSAL 1: ELECTION OF DIRECTORS

The Board has nominated seven directors for election at the 2014 annual meeting. If you elect them, they will hold office until the next annual meeting, until their respective successors are duly elected and qualified, or until their earlier resignation or removal.

Vote Required

The affirmative vote of the holders of at least a plurality of the stock having voting power present in person or represented by proxy is required to elect the seven nominees of the Board as directors. Cumulative voting is not permitted with respect to the election of directors. Unless you specify otherwise, your returned signed proxy will be voted in favor of each of the Board's nominees. In the event a nominee is unable to serve, your proxy may vote for another person nominated by the Board. The Board has no reason to believe that any of the nominees will be unavailable.

Number of Directors

Our Certificate of Incorporation, as amended, provides for a total of nine members of our Board of Directors. We currently have only seven members who are running for election, and this proxy statement names only seven members. Electing seven directors will leave two vacancies on the Board of Directors. The Nominating and Corporate governance Committee feels that it is desirable to leave two seats vacant, in order to streamline board meetings and voting. The proxies obtained in connection with this solicitation may not be voted for a greater number of persons than the number of nominees named.

THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS THAT

STOCKHOLDERS VOTE “FOR” EACH OF THE BOARD’S NOMINEES LISTED BELOW.

PROPOSAL 2

Approval of Amendment to Certificate of Incorporation to effect a Reverse Stock Split

The Board recommends that the stockholders approve the authority of the Board to amend the Company's Certificate of Incorporation to effect a reverse stock split of the outstanding common stock at a ratio of up to 1-for-30 shares. The Board unanimously adopted resolutions seeking stockholder approval to amend the Company's Certificate of Incorporation to effect a reverse stock split of the Company's common stock at a special meeting held on April 2, 2014.

If a reverse stock split is effected at the maximum ratio of 1-for-30, thirty (30) shares of outstanding common stock will be automatically converted into one (1) share of common stock, and the market price of the Company's common stock should increase proportionately. As of [____], 2014, the Company had approximately [____] shares of common stock issued and outstanding and the closing price of the Company's common stock as quoted on OTCQX was \$[____] per share.

The reverse stock split would only become effective upon filing a Certificate of Amendment to the Company's Certificate of Incorporation (the "Certificate of Amendment"). The form of Certificate of Amendment to effect the reverse stock split at the maximum ratio of 1-for-30 is attached to this Proxy Statement as Annex A and the following discussion is qualified in its entirety by the full text of the Certificate of Amendment.

Approval of this proposal by the Company's stockholders would give the Board authority to implement the reverse stock split at any time within two years of the stockholders' authorization of such action by this proposal. If the Board implements a reverse stock split, it may do so in a ratio that it determines in its sole discretion, provided that the ratio is not in excess of 1-for-30. In addition, notwithstanding approval of this proposal by the stockholders, the Board may, in its sole discretion, determine not to effect, and to abandon, the reverse stock split without further action by the Company's stockholders.

Purposes of the Reverse Stock Split

The Board believes that an increased stock price may encourage investor interest and improve the marketability of the Company's common stock to a broader range of investors, and thus improve liquidity. Because of the trading volatility often associated with low-priced stocks, many brokerage firms and institutional investors have internal policies and practices that either prohibit them from investing in low-priced stocks or tend to discourage individual brokers from recommending low-priced stocks to their customers. Some of those policies and practices may function to make the processing of trades in low-priced stocks economically unattractive to brokers. The Board believes that the anticipated higher market price resulting from a reverse stock split may reduce, to some extent, the negative effects on the marketability and liquidity of the common stock inherent in some of the policies and practices of institutional investors and brokerage firms described above.

Additionally, because brokers' commissions on low-priced stocks generally represent a higher percentage of the stock price than commissions on higher-priced stocks, the current average price per share of the Company's common stock can result in individual stockholders paying transaction costs representing a higher percentage of their total share value than would be the case if the share price were substantially higher.

A higher share price may give the Company the added flexibility to list its shares on a different stock exchange or quotation service, which could also increase liquidity and marketability of the Company's stock.

Potential Risks of the Reverse Stock Split

If the Board effects a reverse stock split, there can be no assurance that the price of the common stock will continue at a level in proportion to the reduction in the number of outstanding shares resulting from the reverse stock split. For example, based on the closing price on OTCQX of the Company's common stock on [____], 2014 of \$[____] per share, if the Board decided to implement a reverse stock split at a ratio of 1-for-30, there can be no assurance that the post-split market price of the Company's common stock would be \$[insert price 30x] or greater. Accordingly, the total market capitalization of the Company's common stock after the proposed reverse stock split may be lower than the total market capitalization before the proposed reverse stock split.

Additionally, the liquidity of the Company's common stock could be affected adversely by the reduced number of shares outstanding after the reverse stock split. Although the Board believes that a higher stock price may help generate investor interest, there can be no assurance that the reverse stock split will result in a per-share price that will attract institutional investors or investment funds or that such share price will satisfy the investing guidelines of institutional investors or investment funds. As a result, any decreased liquidity that may result from having fewer shares outstanding may not be offset by increased investor interest in the Company's common stock.

Other negative factors associated with a reverse stock split include: the negative perception of reverse stock splits held by some investors, analysts, and other stock market participants; the fact that the stock price of some companies that have effected reverse stock splits has subsequently declined back to pre-reverse stock split levels; and the costs associated with implementing a reverse stock split

Principal Effects of a Reverse Stock Split

If the Board effects a reverse stock split, the Company's outstanding shares of common stock will be reduced by the reverse stock split ratio of up to 1-for-30 and the market price of the Company's common stock on OTCQX should increase proportionately. Similarly, the number of shares that may be acquired upon the exercise of our outstanding options and warrants will decrease and the exercise price under these options and warrants will increase proportionately, in each case as described below.

Common Stock

The Company's common stock is currently registered under Section 12(g) of the Securities Exchange Act of 1934 (the "Exchange Act"), and the Company is subject to the periodic reporting and other requirements of the Exchange Act. The reverse stock split will not affect the registration of the Company's common stock under the Exchange Act. If the reverse stock split is implemented, the Company's common stock will continue to be listed on OTCQX under the symbol "MERR," although the Board expects that an additional letter will be temporarily appended to the Company's trading symbol after the reverse stock split to provide stockholders with notice of the action.

After the effective date of the reverse stock split, each stockholder will own fewer shares of the Company's common stock. However, the reverse stock split will affect all of the Company's stockholders uniformly and will not affect any stockholder's percentage ownership interests in the Company, except to the extent that the reverse stock split results in any of the Company's stockholders owning a fractional share, as described below. Proportionate voting rights and other rights of the holders of the Company's common stock will not be affected by the reverse stock split other than as a result of the payment of cash in lieu of fractional shares. A reverse stock split is likely to result in some stockholders owning "odd-lots" of fewer than 100 shares of common stock. Brokerage commissions and other costs of transactions in odd lots are generally somewhat higher than the costs of transactions on "round-lots" of even multiples of 100 shares.

The reverse stock split would not change the number of authorized shares of common stock designated by the Company's Certificate of Incorporation. Currently, the Company has authorized 300,000,000 shares of common stock. Thus, because the number of issued and outstanding shares of common stock would decrease, the number of shares remaining available for issuance under the Company's Certificate of Incorporation would increase. These additional shares of common stock would be available for issuance from time to time for corporate purposes such as raising additional capital, acquisitions of companies or assets, and sales of stock or securities convertible into or exercisable for common stock. The Board believes that the availability of the additional shares will provide the Company with the flexibility to meet business needs as they arise and to take advantage of attractive opportunities. If the Company issues additional shares for any of these purposes, the ownership interest of the Company's current stockholders would be diluted in the same manner as would result in any other share issuance.

This proposal has been prompted solely by the business considerations discussed in the preceding paragraphs. Nevertheless, the additional shares of common stock that would become available for issuance if a reverse stock split is effected could also be used by the Company's management to oppose a hostile takeover attempt or delay or prevent changes in control. Although the increased proportion of unissued authorized shares to issued shares could, under certain circumstances, have an anti-takeover effect, the reverse stock split is not being proposed in response to any effort of which the Board is aware to accumulate the shares of the Company's common stock or obtain control of the Company, nor is it part of a plan by the Company's management to recommend a series of similar amendments to the Board and stockholders. The Board is not aware of any pending takeover or other transactions that would result in a change in control of the Company.

Options and Warrants

All outstanding options and warrants to purchase shares of the Company's common stock, including those held by the Company's officers and directors, would be adjusted as a result of the reverse stock split. In particular, the number of shares issuable upon the exercise of each instrument would be reduced, and the exercise price per share, if applicable, would be increased, in accordance with the terms of each instrument and based on the ratio of the reverse stock split. For example, if an employee had an option under the Company's Stock Option and Incentive Plan to purchase 30,000 shares of common stock at \$1.00 per share, and if the Board effected a 1-for-30 reverse stock split, that option after the reverse stock split would represent the right to purchase 1,000 shares of common stock at a price of \$30.00 per share. Also, the number of shares reserved for issuance under the Company's existing stock option and incentive plan would be reduced proportionally based on the ratio of the reverse stock split.

Fractional Shares

No fractional share shall be issued in connection with the foregoing reverse stock split. All shares of common stock that are held by a stockholder will be aggregated and each fractional share resulting from such aggregation of common stock held by such stockholder shall be exchanged for a cash payment in U.S. dollars equal to such fraction multiplied by a factor equal to the ratio used in the reverse stock split times the average of the closing bid and asked price per share of Common Stock as quoted on the OTCQX Market for the five trading days immediately preceding the effective date of the reverse stock split. For example, if the Board effected a 1-for-30 reverse stock split, the stockholder would receive an amount equal to the fractional share multiplied by thirty times the average of the closing bid and asked price per share of Common Stock.

Procedure for Effecting a Reverse Stock Split and Exchange of Stock Certificates

If the Company's stockholders approve this proposal and the Board decides to effectuate a reverse stock split, the Company will file the Certificate of Amendment with the Delaware Division of Corporations. The reverse stock split will become effective at the time specified in the amendment, which the Board expects to be the next business day after the filing of the amendment, and which the Board refers to as the "Effective Date."

As of the Effective Date of the reverse stock split, each certificate representing shares of the Company's common stock before the reverse stock split would be deemed, for all corporate purposes, to evidence ownership of the reduced number of shares of the Company's common stock resulting from the reverse stock split, except that holders of unexchanged shares would not be entitled to receive any dividends or other distributions payable by the Company after the Effective Date until they surrender their old stock certificates for exchange. All shares underlying options and warrants and other securities would also be automatically adjusted on the Effective Date.

The Company's transfer agent, OTC Stock Transfer, Inc., is expected to act as the exchange agent for purposes of implementing the exchange of stock certificates. As soon as practicable after the Effective Date, stockholders and holders of securities exercisable for the Company's common stock would be notified of the effectiveness of the reverse stock split. Stockholders of record would receive a letter of transmittal requesting them to surrender their old stock certificates for new stock certificates reflecting the adjusted number of shares as a result of the reverse stock split. Beneficial holders (persons who hold their shares in brokerage accounts or "street name") would not be required to take any further actions to effect the exchange of their shares. No new certificates would be issued to a stockholder until such stockholder has surrendered any outstanding certificates together with the properly completed and executed letter of transmittal to the exchange agent. Until surrender, each certificate representing shares before the reverse stock split would continue to be valid and would represent the adjusted number of shares based on the ratio of the reverse stock split. ***Stockholders should not destroy any stock certificate and should not submit any certificates until they receive a letter of transmittal.***

Accounting Matters

The reverse stock split will not affect the par value of the Company's common stock or the stated capital on the Company's balance sheet attributable to the common stock. If the Company elects to pay the cost of fractional shares, instead of authorizing its transfer agent to accumulate fractional shares and sell the corresponding whole shares into the market for such purposes, such costs will be deducted from the common stock account on the balance sheet. The per share net income or loss and per share net book value of the common stock will be increased as a result of the reverse stock split, because there will be fewer shares of common stock outstanding. In addition, all per-share income and loss numbers for prior years will be restated to reflect the reverse stock split.

No Dissenters Rights

In connection with the approval of the reverse stock split, stockholders of the Company will not have a right to dissent and obtain payment for their shares under Delaware law or the Company's Certificate of Incorporation or bylaws.

No Appraisal Rights

Under the Delaware General Corporation Law, stockholders will not be entitled to exercise appraisal rights in connection with the reverse stock split, and the Company will not independently provide stockholders with any such right.

Tax Consequences for Common Stockholders

The following discussion sets forth the material United States federal income tax consequences that management believes will apply with respect to the Company and the stockholders of the Company who are United States holders at the effective time of the reverse stock split. This discussion does not address the tax consequences of transactions effectuated prior to or after the reverse stock split, including, without limitation, the tax consequences of the exercise of options, warrants, or similar rights to purchase stock. Furthermore, no foreign, state, or local tax considerations are addressed herein. For this purpose, a United States holder is a stockholder that is: (i) a citizen or resident of the United States, (ii) a domestic corporation, (iii) an estate whose income is subject to United States federal income tax regardless of its source, or (iv) a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

No gain or loss should be recognized by a stockholder upon his or her exchange of pre-reverse stock split shares for post-reverse stock split shares. The aggregate tax basis of the post-reverse stock split shares received in the reverse stock split will be the same as the stockholder's aggregate tax basis in the pre-reverse stock split shares exchanged therefor. The stockholder's holding period for the post-reverse stock split shares will include the period during which the stockholder held the pre-reverse stock split shares surrendered in the reverse stock split.

Tax Consequences for the Company

We should not recognize any gain or loss as a result of the reverse stock split.

Required Vote

The affirmative vote of the holders of at least a majority of the issues and outstanding shares of common stock, voting together as a single class, is required to authorize the Board to amend the Company's Certificate of Incorporation to

effect a reverse stock split of the outstanding common stock at a ratio not to exceed 1-for-30 shares.

THE BOARD OF DIRECTORS RECOMMENDS THAT STOCKHOLDERS VOTE “FOR” THE APPROVAL OF THE AMENDMENTS TO THE AMENDED CERTIFICATE OF INCORPORATION TO EFFECT A REVERSE STOCK SPLIT.

PROPOSAL 3

**THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS THAT

PROPOSAL 4

ADVISORY, NONBINDING VOTE ON EXECUTIVE COMPENSATION

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“the Dodd-Frank Act”) and Section 14A of the Exchange Act enables our stockholders, and requires that we provide our stockholders with the opportunity, to vote to approve, on an advisory, nonbinding basis, the compensation of our named executive officers as disclosed in this Proxy Statement in accordance with the SEC’s compensation disclosure rules. The frequency of such advisory, nonbinding vote is the subject of Proposal 4 at the Annual Meeting, but we currently anticipate that such votes will be taken every three years.

Our executive compensation programs are described in detail under the heading “Executive Compensation.” We are asking our stockholders to indicate their support for our named executive officer compensation as described in this Proxy Statement. This proposal, commonly known as a “say-on-pay” proposal, gives our stockholders the opportunity to indicate whether they approve of our named executive officers’ compensation. This vote is not intended to address any specific item of compensation, but rather the overall compensation of our named executive officers and the philosophy, policies and practices described in this Proxy Statement in accordance with the SEC’s compensation disclosure rules. Accordingly, we will ask our stockholders to vote “FOR” the following resolution at the Annual Meeting:

“RESOLVED, that the Company’s stockholders approve, on an advisory basis, the compensation of the named executive officers, as disclosed in the Company’s Proxy Statement for the 2014 Annual Meeting of Stockholders pursuant to the compensation disclosure rules of the Securities and Exchange Commission.”

The say-on-pay vote is advisory, and therefore not binding on the Company, the Compensation Committee or our Board of Directors. Our Board of Directors and our Compensation Committee value the opinions of our stockholders and to the extent there is any significant vote against the named executive officer compensation as disclosed in this Proxy Statement, we will consider our stockholders’ concerns and the Compensation Committee will evaluate whether any actions are necessary to address those concerns.

THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS A VOTE “FOR” THE APPROVAL OF THE COMPENSATION OF OUR NAMED EXECUTIVE OFFICERS, AS DISCLOSED IN THIS PROXY STATEMENT PURSUANT TO THE COMPENSATION DISCLOSURE RULES OF THE SEC.

Principal amount and accrued interest were paid in full on January 23, 2014.

Convertible Secured Promissory Notes

On February 22, 2013 and December 28, 2012, the Co-Chairman of the Board of Directors loaned \$600,000 and \$500,000 to the Company in two convertible secured promissory notes (the "Convertible Notes") maturing on November 22, 2013 and September 28, 2013, respectively, bearing interest rates at eight percent (8%) per annum payable at maturity. Each Convertible Note is secured pursuant to a certain Stock Pledge Agreement dated December 13, 2012 and includes a conversion feature which provides for the note to automatically convert into the Company's common shares upon the consummation of a "Qualified Financing," defined as an equity investment in one or a series of related transactions resulting in not less than \$2,000,000, including the amount converted under the Convertible Notes. The number of common shares issued will be equal to the Convertible Notes' principal divided by the price per share paid by the investors in the Qualified Financing. (See Note 5)

Convertible Unsecured Promissory Note

On November 1, 2013, the Company's C.E.O. loaned \$30,000 to the Company in a convertible unsecured promissory note (the "Convertible Note") maturing on April 1, 2014 bearing interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at \$0.06 per share.

As of December 31, 2013, the Convertible Note remains outstanding and is included in notes payable to related parties in the Company's consolidated statements of financial condition. The Convertible Note is currently under negotiation

for further extension.

Debt Conversion

a. Conversion of Convertible Secured Promissory Notes

The March 28, 2013 sale of common stock (see Note 6) was the catalyst to the Qualified Financing specified in the Convertible Notes, triggering an automatic conversion of the Convertible Notes into the Company's common shares at \$0.03 per share. For each common share purchased by means of surrender of the Convertible Notes, the holder received a warrant to purchase 0.50 share of common stock at \$0.04 per share, for a term of five years. A total of 36,666,666 common shares and 18,333,333 warrants were issued.

The Company accounted for this transaction in accordance with ASC 470, *Debt*, as an extinguishment of debt, whereby a gain or loss was calculated as the difference between the reacquisition price and net carrying value of the debt. The reacquisition price was determined as the sum of the fair value of the common stock and new warrants. The warrants were valued using the Black-Scholes fair value model.

For the year ended December 31, 2013, a loss of approximately \$267,000 was recorded on the transaction based on a reacquisition price of approximately \$1,367,000 and fair value of the debt exchanged of approximately \$1,100,000.

b. Conversion of Subordinated Notes Payable

On March 28, 2013, certain subordinated notes payable holders, all of whom are directors and officers of the Company, agreed to convert \$110,000 subordinated notes payable into the Company's common shares at \$0.03 per share. For each common share purchased by means of surrender of the subordinated notes payable, the holders received a warrant to purchase 0.25 share of common stock at \$0.04 per share, for a term of five years. A total of 3,666,665 common shares and 916,665 warrants were issued.

The Company accounted for this transaction in accordance with ASC 470, *Debt*, as an extinguishment of debt, whereby a gain or loss was calculated as the difference between the reacquisition price and net carrying value of the debt. The reacquisition price was determined as the sum of the fair value of the common stock and new warrants. The warrants were valued using the Black-Scholes fair value model.

For the year ended December 31, 2013, a loss of approximately \$26,000 was recorded on the transaction based on a reacquisition price of approximately \$136,000 and fair value of the debt exchanged of approximately \$106,000.

Software Platform Purchase

In December 2013, the Company purchased a software platform called Digital Capital Network ("DCN"), an online capital marketplace, from an entity owned by an advisory board member. The purchase price consisted of \$160,000 cash and 2,644,929 shares of the Company's common stock valued at \$0.06 per share at the time of issuance, plus a \$20,500 ongoing monthly payment.
