Explanation of Responses:

(167)

\$

(170)

The decrease in Corporate s segment loss for the three months and nine months ended September 30, 2013 compared with the same periods in 2012 is primarily attributable to the absence of the costs associated with the HealthSpring acquisition treated as special items in 2012.

LIQUIDITY AND CAPITAL RESOURCES

Liquidit	y
The Company	y maintains liquidity at two levels: the subsidiary level and the parent company level.
Liquidity requ	uirements at the subsidiary level generally consist of:
• cla	aim and benefit payments to policyholders; and
• ope	perating expense requirements, primarily for employee compensation and benefits.
The Company	y s subsidiaries normally meet their operating requirements by:
• ma	aintaining appropriate levels of cash, cash equivalents and short-term investments;
• usi	ing cash flows from operating activities;
• sel	lling investments;
• ma	atching investment durations to those estimated for the related insurance and contractholder liabilities; and

borrowing from its parent company.

Liquidity requirements at the parent company level generally consist of:

- debt service and dividend payments to shareholders; and
- pension plan funding.

The parent company normally meets its liquidity requirements by:

- maintaining appropriate levels of cash, cash equivalents and short-term investments;
- collecting dividends from its subsidiaries;
- using proceeds from issuance of debt and equity securities; and
- borrowing from its subsidiaries.

Cash flows for the nine months ended September 30, were as follows:

(In millions)	2013	2012
Operating activities	\$ 107	\$ 1,557
Investing activities	\$ 740	\$ (3,864)
Financing activities	\$ (771)	\$ (150)

Cash flows from operating activities consist of cash receipts and disbursements for premiums and fees, mail order pharmacy, other revenues, investment income, taxes, benefits and expenses, and, prior to February 4, 2013, gains and losses recognized in connection with the Company s GMDB and GMIB equity hedge programs. Because certain income and expense transactions do not generate cash, and because cash transactions related to revenues and expenses may occur in periods different from when those revenues and expenses are recognized in shareholders net income, cash flows from operating activities can be significantly different from shareholders net income.

Cash flows from investing activities generally consist of net investment purchases or sales and net purchases of property and equipment including capitalized software, as well as cash used to acquire businesses.

Cash flows from financing activities are generally comprised of issuances and re-payment of debt at the parent company level, proceeds on the issuance of common stock resulting from stock option exercises, and stock repurchases. In addition, the subsidiaries report net deposits and withdrawals to and from investment contract liabilities (that include universal life insurance liabilities) because such liabilities are considered financing activities with policyholders.

Operating activities

Cash provided by operating activities included payments totaling \$2.2 billion to Berkshire in connection with the February 4, 2013 reinsurance transaction. Excluding those payments, cash flows from operating activities increased by \$746 million for the nine months

Table of Contents

ended September 30, 2013 compared with the same period in 2012 primarily due to the favorable effects of higher adjusted income from operations, business growth in the ongoing operating segments, lower VADBe hedge losses and lower tax payments.

Investing activities

Cash provided by investing activities was \$740 million for the nine months ended September 30, 2013. This consisted primarily of the proceeds from net investment sales of \$1.2 billion that were used largely to fund the reinsurance payments to Berkshire, partially offset by purchases of property and equipment of \$414 million.

Cash used in investing activities was \$3,864 million for the nine months ended September 30, 2012. This use of cash consisted primarily of the acquisition of HealthSpring of \$3.2 billion (net of cash acquired), the acquisition of Great American Supplemental Benefits of \$271 million (net of cash acquired), net purchases of investments of \$67 million and net purchases of property and equipment (primarily internal-use software) of \$329 million.

Financing activities

Cash used in financing activities for the nine months ended September 30, 2013 primarily reflected repurchases of common stock of \$836 million (net of unsettled purchases of \$27 million at September 30, 2013) and a decrease in short-term debt of \$100 million, primarily commercial paper that had been used to partially fund the reinsurance payment to Berkshire. Partially offsetting the effects of those activities were proceeds from the issuance of common stock of \$132 million and net deposits from contractholders of \$49 million.

The Company maintains a Rule 10b5-1 share repurchase program, authorized by the Board of Directors that permits the Company to repurchase shares at times when it otherwise might be precluded from doing so under insider trading laws or because of self-imposed trading black-out periods. The decision to repurchase shares depends on market conditions and alternate uses of capital. The Company may suspend activity under this program from time to time and may also remove such suspensions, generally without public announcement. Through October 31, 2013 the Company repurchased 13.6 million shares for approximately \$1.0 billion. The remaining share repurchase authority as of October 31, 2013 was \$312 million.

Cash used in financing activities for the nine months ended September 30, 2012 primarily reflected the repayment of debt assumed in the HealthSpring acquisition of \$326 million and repurchases of common stock for \$85 million, partially offset by the change in short-term debt of \$123 million primarily from the issuance of commercial paper, proceeds from the issuance of common stock from employee benefit plans of \$58 million and net deposits from contractholders of \$72 million.

Interest Expense

Interest expense on long-term debt, short-term debt and capital leases was as follows:

	Three Months Ended			Nine Months Ended			
	September 30,			September 30,			
(In millions)	2013		2012		2013		2012
Interest expense	\$ 68	\$	68	\$	203	\$	201

Capital Resources

The Company s capital resources (primarily retained earnings and the proceeds from the issuance of debt and equity securities) provide protection for policyholders, furnish the financial strength to underwrite insurance risks and facilitate continued business growth.

Management, guided by regulatory requirements and rating agency capital guidelines, determines the amount of capital resources that the Company maintains. Management allocates resources to new long-term business commitments when returns, considering the risks, look promising and when the resources available to support existing business are adequate.

Table of Contents

The Company prioritizes its use of capital resources to:
 provide the capital necessary to support growth and maintain or improve the financial strength ratings of subsidiaries including pension funding obligations;
consider acquisitions that are strategically and economically advantageous; and
return capital to investors through share repurchase.
The availability of capital resources will be impacted by equity and credit market conditions. Extreme volatility in credit or equity market conditions may reduce the Company s ability to issue debt or equity securities.
Liquidity and Capital Resources Outlook
The availability of resources at the parent company level is partially dependent on dividends from the Company s subsidiaries, most of which subject to regulatory restrictions and rating agency capital guidelines, and partially dependent on the availability of liquidity from the issuance debt or equity securities.
At September 30, 2013, there was approximately \$500 million in cash and short-term investments available at the parent company level. For the fourth quarter of 2013, the parent company has combined cash obligations of approximately \$185 million for commercial paper maturities, interest and pension contributions. The parent company expects, based on its current cash position and current projections for subsidiary dividends, to have sufficient liquidity to meet its obligations.
The Company s cash projections may not be realized and the demand for funds could exceed available cash if, for example:
ongoing businesses experience unexpected shortfalls in earnings;
• regulatory restrictions or rating agency capital guidelines reduce the amount of dividends available to be distributed to the parent company from the insurance and HMO subsidiaries;

 significant disruption or volatility in the capital and credit markets reduces the Company s ability to raise capital; or
• a substantial increase in funding over current projections is required for the Company s pension plan.
In those cases, the Company expects to have the flexibility to satisfy liquidity needs through a variety of measures, including intercompany borrowings and sales of liquid investments. The parent company may borrow up to \$1.2 billion from its principal insurance subsidiaries without state approval. As of September 30, 2013, the Company s insurance subsidiaries had \$203 million of net intercompany loan balances owed to the parent company.
In addition, the Company may use short-term borrowings, such as the commercial paper program, the committed revolving credit and letter of credit agreement of up to \$1.5 billion subject to the maximum debt leverage covenant in its line of credit agreement. As of September 30, 2013 the Company had \$1.5 billion of borrowing capacity under the credit agreement, reflecting \$39 million of letters of credit issued out of the credit facility. Within the maximum debt leverage covenant in the line of credit agreement, the Company has an additional \$5.7 billion of borrowing capacity in addition to the \$5.2 billion of debt outstanding.
In 2013 the Company effectively exited the run-off reinsurance business and paid the \$2.2 billion reinsurance premium due to Berkshire. This reinsurance premium was funded primarily from investment asset sales, parent company cash, commercial paper borrowings and securities repurchase agreements. All obligations related to the financing of the reinsurance premium were satisfied as of June 30, 2013.
The Company maintains a capital management strategy to permanently invest the earnings of certain of its foreign operations overseas. During the first quarter of 2012, the Company expanded this strategy to its China and Indonesia operations. Permanently invested earnings are generally deployed in these countries, and where possible, other foreign jurisdictions, in support of the liquidity and capital needs of the Company's foreign operations. As of September 30, 2013 permanently reinvested earnings were approximately \$862 million. Approximately \$400 million of cash and cash equivalents held in these countries would, if repatriated, be subject to a charge representing the difference between the U.S. and foreign tax rates. This strategy does not materially limit the Company's ability to meet its liquidity and capital needs in the United States. Cash and cash equivalents in foreign operations are held primarily to meet local liquidity and surplus needs with excess funds generally invested in longer duration high quality securities.
Though the Company believes it has adequate sources of liquidity, continued significant disruption or volatility in the capital and credit markets could affect the Company s ability to access those markets for additional borrowings or increase costs associated with borrowing funds.
69

Guarantees and Contractual Obligations

The Company, through its subsidiaries, is contingently liable for various contractual obligations entered into in the ordinary course of business. See Note 17 to the Consolidated Financial Statements for additional information.

There is no update to the contractual obligations previously provided in the Company s 2012 Form 10-K.

INVESTMENT ASSETS

During the nine months ended September 30, 2013, the Company s fixed maturities decreased approximately \$2.1 billion due primarily to asset sales to fund the reinsurance transaction with Berkshire and a decrease in net appreciation driven by an increase in market yields; however, the mix of investments and their primary characteristics have not materially changed since December 31, 2012. The Company s fixed maturity portfolio continues to be diversified by issuer and industry type and the Company s commercial mortgage loan portfolio remains diversified by property type, geographic location and borrower.

The Company s investment assets do not include separate account assets. Additional information regarding the Company s investment assets and related accounting policies is included in Notes 2, 8, 9, 10, 11 and 14 to the Consolidated Financial Statements. More detailed information about the fixed maturities portfolios by type of issuer, maturity dates, and, for mortgages, by debt service coverage and loan-to-value ratios is included in Note 9 to the Consolidated Financial Statements and Notes 2, 11, 12 and 18 to the Consolidated Financial Statements in the Company s 2012 Form 10-K.

Fixed Maturities

Investments in fixed maturities include publicly traded and privately placed debt securities, mortgage and other asset-backed securities, preferred stocks redeemable by the investor and hybrid and trading securities. The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. Internal pricing methods are performed by the Company s investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, fair value is estimated using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment that becomes significant with increasingly complex instruments or pricing models.

The Company is responsible for determining fair value, as well as the appropriate level within the fair value hierarchy as defined in Note 8 to the Consolidated Financial Statements, based on the significance of unobservable inputs. The Company reviews methodologies and processes of

third-party pricing services and compares prices on a test basis to those obtained from other external pricing sources or internal estimates. The Company performs ongoing analyses of both prices received from third-party pricing services and those developed internally to determine that they represent appropriate estimates of fair value. These analyses include reviewing to ensure that prices do not become stale and whether changes from prior valuations are reasonable or require additional review. The Company also performs sample testing of sales values to confirm the accuracy of prior fair value estimates. Exceptions identified during these processes indicate that adjustments to prices are infrequent and do not significantly impact valuations.

The following table reflects the Company s fixed maturity portfolio by type of issuer as of September 30, 2013 and December 31, 2012:

(In millions)	September 30, 2013	December 31, 2012
Federal government and agency	\$ 724	\$ 902
State and local government	2,196	2,437
Foreign government	1,177	1,322
Corporate	10,507	11,896
Federal agency mortgage-backed	83	122
Other mortgage-backed	67	89
Other asset-backed	891	937
Total	\$ 15,645	\$ 17,705

Table of Contents

As of September 30, 2013, \$13.8 billion, or 88%, of the fixed maturities in the Company s investment portfolio were investment grade (Baa and above, or equivalent), and the remaining \$1.8 billion were below investment grade. The majority of the bonds that are below investment grade are rated at the higher end of the non-investment grade spectrum. These quality characteristics have not materially changed during the year.

The net appreciation of the Company s fixed maturity portfolio decreased approximately \$874 million in the nine months ended September 30, 2013 driven by an increase in market yields and realized investment gains associated with asset sales. Although overall asset values are well in excess of amortized cost, there are specific securities with amortized cost in excess of fair value by \$85 million in aggregate as of September 30, 2013. See Note 9 to the Consolidated Financial Statements for further information.

Corporate fixed maturities includes private placement investments of \$4.6 billion that are generally less marketable than publicly-traded bonds. However, yields on these investments tend to be higher than yields on publicly-traded bonds with comparable credit risk. The Company performs a credit analysis of each issuer, diversifies investments by industry and issuer and requires financial and other covenants that allow the Company to monitor issuers for deteriorating financial strength and pursue remedial actions, if warranted. Also included in corporate fixed maturities are investments in companies that are domiciled or have significant business interests in European countries with significant political or economic concerns (Portugal, Italy, Ireland, Greece and Spain). Fixed maturity investments in these companies represent approximately \$388 million at September 30, 2013, have an average quality rating of Baa and are diversified by industry sector. Financial institutions comprised approximately 2% of investments in these companies.

The Company invests in high quality foreign government obligations, with an average quality rating of Aa as of September 30, 2013. These investments are primarily concentrated in Asia consistent with the geographic distribution of the international business operations, including government obligations of South Korea, Indonesia, Taiwan and Hong Kong. Foreign government obligations also include \$181 million of investments in European sovereign debt, none of which are in countries with significant political or economic concerns.

The Company s investment in state and local government securities is diversified by issuer and geography with no single exposure greater than \$32 million. The Company assesses each issuer s credit quality based on a fundamental analysis of underlying financial information and does not rely solely on statistical rating organizations or monoline insurer guarantees. As of September 30, 2013, 97% of the Company s investments in these securities were rated A3 or better excluding guarantees by monoline bond insurers, consistent with the prior year. As of September 30, 2013, approximately 63% or \$1,390 million of the Company s total investments in state and local government securities were guaranteed by monoline bond insurers, providing additional credit quality support. The quality ratings of these investments with and without this guaranteed support as of September 30, 2013 were as follows:

		As of September 30, 2013			
		Fair Value			
(In millions)	Quality Rating	With	n Guarantee	Without	Guarantee
State and local governments	Aaa	\$	130	\$	129
	Aa1-Aa3		923		903
	A1-A3		323		314
	Baa1-Baa3		14		18
	Ba1-Ba3		-		26
Total state and local governments		\$	1,390	\$	1,390

As of September 30, 2013, the Company s investments in other asset and mortgage-backed securities totaling \$1,041 million included \$469 million of private placement securities with an average quality rating of Baa- that are guaranteed by monoline bond insurers. Quality ratings without considering the guarantees for these other asset-backed securities were not available.

Table of Contents

As of September 30, 2013, the Company had no direct investments in monoline bond insurers. Guarantees provided by various monoline bond insurers for certain of the Company s investments in state and local governments and other asset-backed securities as of September 30, 2013 were:

(In millions) As of September 30, 2013

Guarantor	Indirect Exposure
National Public Finance Guarantee (formerly MBIA, Inc.)	\$ 1,130
Assured Guaranty Municipal Corp (formerly Financial Security Assurance)	533
AMBAC	162
Financial Guaranty Insurance Co.	34
Total	\$ 1,859

Commercial Mortgage Loans

The Company s commercial mortgage loans are fixed rate loans, diversified by property type, location and borrower. Loans are secured by high quality commercial properties and are generally made at less than 75% of the property s value at origination of the loan. Property value, debt service coverage, quality, building tenancy and stability of cash flows are all important financial underwriting considerations. The Company holds no direct residential mortgage loans and does not securitize or service mortgage loans.

The Company completed its annual in-depth review of its commercial mortgage loan portfolio during the second quarter of 2013. This review included an analysis of each property s year-end 2012 financial statements, rent rolls, operating plans and budgets for 2013, a physical inspection of the property and other pertinent factors. Based on property values and cash flows estimated as part of this review and subsequent fundings and repayments, the portfolio s average loan-to-value improved to 63% at September 30, 2013 from 65% at December 31, 2012, reflecting modest improvement in valuation for the majority of the underlying properties. These valuation changes varied by property type, with apartments demonstrating the greatest appreciation, office and retail properties showing modest improvement and hotel and industrial properties exhibiting slight value declines. The portfolio s average debt service coverage ratio was estimated to be 1.59 at September 30, 2013, a slight improvement from 1.56 as of December 31, 2012. The average debt service coverage ratio improved substantially for hotel properties, was relatively flat for apartments, office properties and retail properties and declined for industrial properties.

Commercial real estate capital markets remain most active for well leased, quality commercial real estate located in strong institutional investment markets. The vast majority of properties securing the mortgages in the Company s mortgage portfolio possess these characteristics. While commercial real estate fundamentals continued to improve, the improvement has varied across geographies and property types.

The following table reflects the commercial mortgage loan portfolio as of September 30, 2013, summarized by loan-to-value ratio based primarily on the annual loan review completed during the second quarter of 2013.

Loan-to-Value Distribution

Loan-to-Value Ratios		Amortize	ed Cost		
(In millions)	Seni	or Subo	ordinated	Tota	al % of Mortgage Loans
Below 50%	\$ 3	08 \$	60	\$ 36	15%
50% to 59%	7	41	-	74	1 31%
60% to 69%	5	24	24	54	8 23%
70% to 79%	2	30	22	25	2 10%
80% to 89%	2	93	10	30	3 13%
90% to 99%	1	70	5	17	75 7%
100% or above		16	1	1	7 1%
Totals	\$ 2.2	82 \$	122	\$ 2.40	4 100%

As summarized above, \$122 million or 5% of the commercial mortgage loan portfolio is comprised of subordinated notes that were fully underwritten and originated by the Company using its standard underwriting procedures and are secured by first mortgage loans. Senior interests in these first mortgage loans were then sold to other institutional investors. This strategy allowed the Company to effectively utilize its origination capabilities to underwrite high quality loans, limit individual loan exposures, and achieve attractive

Table of Contents

risk adjusted yields. In the event of a default, the Company would pursue remedies up to and including foreclosure jointly with the holders of the senior interest, but would receive repayment only after satisfaction of the senior interest.

In the table above, the 100% or above category is comprised of two loans with carrying values equal to the value of the underlying properties.

Commercial mortgage loans are considered impaired when it is probable that the Company will not collect all amounts due according to the terms of the original loan agreement. The commercial mortgage portfolio consists of approximately 125 loans, including six impaired loans with a carrying value totaling \$113 million that are classified as problem or potential problem loans. Two of these loans totaling \$31 million are current based on restructured terms, three loans totaling \$81 million, net of \$8 million in reserves, are current, and one loan for \$1 million, net of \$3 million in reserves, is delinquent. See Note 9 to the Consolidated Financial Statements for additional information regarding impaired commercial mortgage loans. All of the remaining loans continue to perform under their contractual terms. The Company has \$254 million of loans maturing in the next twelve months. Given the quality and diversity of the underlying real estate, positive debt service coverage and significant borrower cash investment averaging 30%, the Company believes that the vast majority of borrowers will continue to perform as expected under their contract terms.

Other Long-term Investments

The Company s other long-term investments include \$1,167 million in security partnership and real estate funds, as well as direct investments in real estate joint ventures. The funds typically invest in mezzanine debt or equity of privately held companies (securities partnerships) and equity real estate. Given these investments subordinate position in the capital structure of these underlying entities, the Company assumes a higher level of risk for higher expected returns. To mitigate risk, investments are diversified across approximately 90 separate partnerships and approximately 55 general partners who manage one or more of these partnerships. Also, the funds underlying investments are diversified by industry sector or property type, and geographic region. No single partnership investment exceeds 7% of the Company s securities and real estate partnership portfolio.

Although the total fair values of these investments exceeded their carrying values as of September 30, 2013, the fair value of the Company s ownership interest in certain funds that are carried at cost was less than carrying value by \$39 million. The Company expects to recover its carrying value over the average remaining life of these investments of approximately 4 years. Given the current economic environment, future impairments are possible; however, the Company does not expect those losses to have a material effect on its results of operations, financial condition or liquidity.

Problem and Potential Problem Investments

Problem bonds and commercial mortgage loans are either delinquent by 60 days or more or have been restructured as to terms, including concessions by the Company for modification of interest rate, principal payment or maturity date. Potential problem bonds and commercial mortgage loans are considered current (no payment more than 59 days past due), but management believes they have certain characteristics that increase the likelihood that they may become problems. The characteristics management considers include, but are not limited to, the following:

•	request from the borrower for restructuring;
•	principal or interest payments past due by more than 30 but fewer than 60 days;
•	downgrade in credit rating;
•	collateral losses on asset-backed securities; and
• more.	for commercial mortgages, deterioration of debt service coverage below 1.0 or estimated loan-to-value ratios increasing to 100% or
the risk pr	pany recognizes interest income on problem bonds and commercial mortgage loans only when payment is actually received because of offile of the underlying investment. The additional amount that would have been reflected in net income if interest on non-accrual that had been recognized in accordance with the original terms was not significant for the nine months ended September 30, 2013 or
	73

Table of Contents

The following table shows problem and potential problem investments at amortized cost, net of valuation reserves and write-downs:

	September 30, 2013			December 31, 2012						
(In millions)		Gross		Reserve	Net		Gross		Reserve	Net
Problem bonds	\$	9	\$	(9)	\$ -	\$	35	\$	(17)	\$ 18
Problem commercial mortgage loans (1)		57		(18)	39		104		(16)	88
Foreclosed real estate		29		-	29		29		-	29
Total problem investments	\$	95	\$	(27)	\$ 68	\$	168	\$	(33)	\$ 135
Potential problem bonds	\$	30	\$	(9)	\$ 21	\$	30	\$	(9)	\$ 21
Potential problem commercial mortgage loans		136		(8)	128		162		(7)	155
Total potential problem investments	\$	166	\$	(17)	\$ 149	\$	192	\$	(16)	\$ 176

(1) At September 30, 2013, included \$7 million and at December 31, 2012, included \$29 million of restructured loans classified in Other long-term investments that were previously reported in commercial mortgage loans.

Net problem and potential problem investments representing approximately 1% of total investments, excluding policy loans at September 30, 2013, decreased by \$94 million from December 31, 2012, primarily reflecting payoff activity.

Included in after-tax realized investment results were changes in valuation reserves and asset write-downs related to commercial mortgage loans and investments in real estate entities and other-than-temporary impairments on fixed maturity securities as follows:

	Three Months Ended September 30,			Nine Months Ended September 30,				
(In millions)		2013	.01 00,	2012		2013	, ,	2012
Credit-related (1)	\$	-	\$	-	\$	(5)	\$	(9)
Other		(2)		-		(7)		(1)
Total	\$	(2)	\$	-	\$	(12)	\$	(10)

(1) Credit-related losses include other-than-temporary declines in fair value of fixed maturities and changes in valuation reserves and asset write-downs related to commercial mortgage loans and investments in real estate entities. There were no credit losses on fixed maturities for which a portion of the impairment was recognized in other comprehensive income.

Investment Outlook

Financial markets in the United States continued to stabilize during 2013; however, fixed income asset values declined during this period due to rising interest rates. Future realized and unrealized investment results will be driven largely by market conditions that exist when a transaction occurs or at the reporting date. These future conditions are not reasonably predictable. Management believes that the vast majority of the Company's fixed maturity investments will continue to perform under their contractual terms, and that declines in their fair values below carrying value are temporary. Based on the strategy to match the duration of invested assets to the duration of insurance and contractholder liabilities, the Company expects to hold a significant portion of these assets for the long term. The Company could experience losses related to investment impairments resulting from unfavorable credit deterioration and equity market and interest rate movements. These losses could adversely impact

the Company s consolidated results of operations and financial condition and liquidity by potentially reducing the capital of the Company s insurance subsidiaries and reducing their dividend-paying capabilities.

Management believes the commercial mortgage loan portfolio is positioned to perform well due to its solid aggregate loan-to-value ratio and strong debt service coverage. Although future impairments remain possible in the current economic environment, management does not expect those losses to have a material adverse effect on the Company s financial condition or liquidity.

MARKET RISK

Financial Instruments

The Company s assets and liabilities include financial instruments subject to the risk of potential losses from adverse changes in market rates and prices. The Company s primary market risk exposures are interest-rate risk, foreign currency exchange rate risk and equity price risk.

During the nine months ended September 30, 2013, the impact of asset sales (primarily to fund the February 4, 2013 reinsurance transaction) and an increase in market yields resulted in a decrease of fair values for certain of the Company s financial instruments, primarily fixed maturities, commercial mortgage loans and long-term debt. As a result, the effect of a hypothetical increase in interest rates of 100 basis points on the fair values of these financial instruments decreased from approximately \$685 million at December 31, 2012 to approximately \$535 million at September 30, 2013. Certain financial instruments, such as insurance-related assets and liabilities, are excluded from this hypothetical calculation.

Stock Market Performance

The performance of equity markets can have a significant effect on the Company s pension liabilities since equity securities comprise a significant portion of the assets of the Company s employee pension plans.

CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Cigna Corporation and its subsidiaries (the Company) and its representatives may from time to time make written and oral forward-looking statements, including statements contained in press releases, in the Company s filings with the Securities and Exchange Commission, in its reports to shareholders and in meetings with analysts and investors. Forward-looking statements may contain information about financial prospects, economic conditions, trends and other uncertainties. These forward-looking statements are based on management s beliefs and assumptions and on information available to management at the time the statements are or were made. Forward-looking statements include, but are not limited to, the information concerning possible or assumed future business strategies, financing plans, competitive position, potential growth opportunities, potential operating performance improvements, trends and, in particular, the Company s strategic initiatives, litigation and other legal matters, operational improvement initiatives in the Company s health care operations, and the Company s outlook for full year 2013 and beyond results. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words believe, expect, plan, intend, anticipate, estimate, predict, potential, may, shou expressions.

By their nature, forward-looking statements: (i) speak only as of the date they are made, (ii) are not guarantees of future performance or results and (iii) are subject to risks, uncertainties and assumptions that are difficult to predict or quantify. Therefore, actual results could differ materially and adversely from those forward-looking statements as a result of a variety of factors. Some factors that could cause actual results to differ materially from the forward-looking statements include:

- 1. health care reform legislation, as well as additional changes in state or federal regulation, that could, among other items, affect the way the Company does business, increase costs, limit the ability to effectively estimate, price for and manage medical costs, and affect the Company s products, services, market segments, technology and processes;
- 2. adverse changes in state, federal and international laws and regulations, including increased medical, administrative, technology or other costs resulting from new legislative and regulatory requirements imposed on the Company s businesses;
- 3. risks associated with pending and potential state and federal class action lawsuits, disputes regarding reinsurance arrangements, other litigation and regulatory actions challenging the Company s businesses, including disputes related to payments to health care professionals, government investigations and proceedings, tax audits and related litigation, and regulatory market conduct and other reviews, audits and investigations, including the possibility that the Cigna-HealthSpring business may be adversely affected by potential changes in risk adjustment data validation audit and payment adjustment methodology;
- 4. challenges and risks associated with implementing improvement initiatives and strategic actions in the ongoing operations of the businesses, including those related to: (i) growth in targeted geographies, product lines, buying segments and distribution channels, (ii) offering products that meet emerging market needs, (iii) strengthening underwriting and pricing effectiveness, (iv) strengthening medical cost results and a growing medical customer base, (v) delivering quality service to members and health care professionals using effective technology solutions, and (vi) lowering administrative costs;
- 5. the unique political, legal, operational, regulatory and other challenges associated with expanding our business globally;
- 6. challenges and risks associated with the successful management of the Company s outsourcing projects or key vendors;
- 7. the ability of the Company to execute its growth plans by successfully leveraging capabilities and integrating acquired businesses, including the Cigna-HealthSpring business by, among other things, operating Medicare Advantage plans and Cigna-HealthSpring s prescription drug plan, retaining and growing the customer base, realizing revenue, expense and other synergies, renewing contracts on

competitive terms or maintaining performance under Medicare contracts, successfully leveraging the information technology platform of the acquired businesses, and retaining key personnel;

- 8. risks associated with security or interruption of information systems, that could, among other things, cause operational disruption;
- 9. risks associated with the Company s information technology strategy, including that the failure to make effective investments or execute improvements may impede the Company s ability to deliver services efficiently;
- 10. the failure to maintain effective prevention, detection and control systems for regulatory compliance and detection of fraud and abuse;
- 11. risks associated with the pharmacy benefits management agreement with Catamaran Corporation, including without limitation, those related to the ability to transition and implement successfully the agreement in a timely, cost-efficient manner without an adverse impact on service to clients and customers, and the failure to achieve projected operating efficiencies, estimated earnings per share accretion and estimated financial contribution to the Company s results;
- 12. risks associated with the Company s mail order pharmacy business that, among other things, includes any potential operational deficiencies or service issues as well as loss or suspension of state pharmacy licenses;
- 13. liability associated with the Company s operations of onsite clinics and medical facilities, including the health care centers operated by the Cigna-HealthSpring business;
- 14. heightened competition, particularly price competition, that could reduce product margins and constrain growth in the Company s

Table of Contents

businesses, primarily the Global Health Care business;

- 15. significant stock market declines, that could, among other things, impact the Company s pension plans in future periods as well as the recognition of additional pension obligations;
- 16. significant changes in market interest rates or sustained deterioration in the commercial real estate markets that could reduce the value of the Company s investment assets;
- 17. downgrades in the financial strength ratings of the Company s insurance subsidiaries, that could, among other things, adversely affect new sales and retention of current business or limit the subsidiaries ability to dividend capital to the parent company, resulting in changes in statutory reserve or capital requirements or other financial constraints;
- 18. significant deterioration in global market economic conditions and market volatility, that could have an adverse effect on the Company s investments, liquidity and access to capital markets;
- 19. unfavorable developments in economic conditions, that could, among other things, have an adverse effect on the impact on the businesses of our customers (including the amount and type of health care services provided to their workforce, loss in workforce and ability to pay their obligations), the businesses of hospitals and other providers (including increased medical costs) or state and federal budgets for programs, such as Medicare or social security, resulting in a negative impact to the Company s revenues or results of operations;
- 20. risks associated with the Company s reinsurance arrangements for the run-off retirement benefits, life insurance and annuity business, variable annuity death benefits and guaranteed minimum income benefits businesses, including but not limited to, failure by the reinsurer to meet its reinsurance obligations or that the reinsurance does not otherwise provide adequate protection; or
- 21. potential public health epidemics, pandemics, natural disasters and bio-terrorist activity, that could, among other things, cause the Company s covered medical and disability expenses, pharmacy costs and mortality experience to rise significantly, and cause operational disruption, depending on the severity of the event and number of individuals affected.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information responsive to this item is contained under the caption Market Risk in Item 2 above, Management s Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. CONTROLS AND PROCEDURES

Based on an evaluation of the effectiveness of Cigna s disclosure controls and procedures conducted under the supervision and with the participation of Cigna s management, Cigna s Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, Cigna s disclosure controls and procedures are effective to ensure that information required to be disclosed by Cigna in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission s rules and forms and is accumulated and communicated to Cigna s management, including Cigna s Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

During the period covered by this report, there have been no changes in Cigna s internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, Cigna s internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

The information contained under Litigation Matters in Note 17 to the Consolidated Financial Statements is incorporated herein by reference.

Item 1A. RISK FACTORS

Cigna s Annual Report on Form 10-K for the year ended December 31, 2012 includes a detailed description of its risk factors.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table provides information about Cigna s share repurchase activity for the quarter ended September 30, 2013:

Issuer Purchases of Equity Securities

	T 4 1 # 6 1				Approximate dolla	r value of shares
	Total # of shares	Average p	rice paid	Total # of shares purchased as part	that may yet be po	urchased as part
Period	purchased (1)	p	er share	of publicly announced program	of publicly announ	ced program (3)
July 1-31, 2013	2,591,224	\$	75.82	2,589,761	\$	814,711,171
August 1-31, 2013	2,429,597	\$	78.27	2,306,568	\$	634,016,118
September 1-30, 2013	2,267,262	\$	80.35	2,265,310	\$	452,004,337
Total	7,288,083	\$	78.05	7,161,639		N/A

- (1) Includes shares tendered by employees as payment of taxes withheld on the exercise of stock options and the vesting of restricted stock granted under the Company s equity compensation plans. Employees tendered 1,463 shares in July, 123,029 shares in August and 1,952 shares in September 2013.
- (2) Cigna has had a repurchase program for many years, and has had varying levels of repurchase authority and activity under this program. The program has no expiration date. Cigna suspends activity under this program from time to time and also removes such suspensions, generally without public announcement. Remaining authorization under the program was approximately \$452 million as of September 30, 2013. Remaining authorization under the program was approximately \$312 million as of October 31, 2013.
- (3) Approximate dollar value of shares is as of the last date of the applicable month.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

Item 6. EXHIBITS
