NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

March 31, 2005 and 2004

(unaudited)

1. Organization and Description of Business

Digital Realty Trust, Inc., through its controlling interest in Digital Realty Trust, L.P. (the Operating Partnership) and the subsidiaries of the Operating Partnership (collectively, the Company), is engaged in the business of owning, acquiring, repositioning and managing technology-related real estate. As of March 31, 2005, the Company's portfolio consisted of 26 properties; 25 are located throughout the United States and one is located in London, England. The Company's properties are located in a limited number of markets where technology tenants are concentrated, including the Atlanta, Boston, Dallas, Denver, London, Los Angeles, Miami, Minneapolis/St. Paul, New York, Philadelphia, Phoenix, Sacramento, San Francisco and Silicon Valley metropolitan areas. The portfolio consists of telecommunications infrastructure properties, information technology properties, technology manufacturing properties and regional or national headquarters of technology companies.

The Company completed its initial public offering of common stock (the IPO) on November 3, 2004 and commenced operations on that date. The IPO resulted in the sale of 20,000,000 shares of common stock at a price per share of \$12.00, generating gross proceeds to the Company of \$240.0 million. The aggregate proceeds to the Company, net of underwriters' discounts, commissions and financial advisory fees and other offering costs were approximately \$214.9 million. On November 30, 2004, an additional 1,421,300 shares of common stock were sold at \$12.00 per share as a result of the underwriters' exercising their over-allotment option. This resulted in additional net proceeds of approximately \$15.9 million to the Company.

On February 9, 2005, the Company completed the offering of 4.14 million shares of 8.50% Series A Cumulative Redeemable Preferred Stock (liquidation preference \$25.00 per share) for total net proceeds, after underwriting discounts and other offering costs, of \$99.3 million, including the proceeds from the exercise of the underwriters' over-allotment option. The net proceeds from this offering were used to reduce borrowings under the Company's unsecured credit facility, acquire two properties in March 2005 and for investment and general corporate purposes.

The Operating Partnership was formed on July 21, 2004 in anticipation of the IPO. Effective as of the completion of the IPO, including exercise of the underwriters' over-allotment option, and as of March 31, 2005, the Company, as sole general partner, owned a 40.5% common interest and a 100% preferred interest in the Operating Partnership and has control over major decisions of the Operating Partnership. The limited partners of the Operating Partnership do not have rights to replace the general partner or approve the sale or refinancing of the Operating Partnership's assets, although they do have certain protective rights.

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

The Company continues to operate and expand the business of its predecessor (the Company Predecessor). The Company Predecessor is not a legal entity; rather it is a combination of certain of the real estate subsidiaries of Global Innovation Partners, LLC, a Delaware limited liability company (GI Partners) contributed to the Company in connection with the IPO, along with an allocation of certain assets, liabilities, revenues and expenses of GI Partners related to the real estate by such subsidiaries.

The Company believes that it has operated in a manner that has enabled it to qualify and intends to elect to be treated, as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended (the Code) commencing with its taxable period ended December 31, 2004.

2. Summary of Significant Accounting Policies

(a) Principles of Consolidation and Combination and Basis of Presentation

The accompanying consolidated financial statements include all of the accounts of Digital Realty Trust, Inc., the Operating Partnership, the subsidiaries of the Operating Partnership and its consolidated joint venture(s), one as of March 31, 2005 and two as of December 31, 2004. Intercompany balances and transactions have been eliminated.

Property interests contributed to the Operating Partnership by GI Partners in exchange for limited partnership interests, also known as common units, in the Operating Partnership (common units) have been accounted for as a reorganization of entities under common control in a manner similar to a pooling of interests. Accordingly, the contributed assets and assumed

Table of Contents

**DIGITAL REALTY TRUST, INC. AND
DIGITAL REALTY TRUST, INC. PREDECESSOR**

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS (CONTINUED)

March 31, 2005 and 2004

(unaudited)

liabilities were recorded at the Company Predecessor's historical cost basis. Property interests acquired from third parties for cash or common units are accounted for using purchase accounting.

The accompanying combined financial statements of the Company Predecessor include the wholly owned real estate subsidiaries and two majority-owned real estate joint ventures that GI Partners contributed to the Operating Partnership in connection with the IPO. Intercompany balances and transactions have been eliminated. The interests of the joint venture partners, all of whom are third parties, are reflected in minority interests in the accompanying combined financial statements.

The accompanying combined financial statements of the Company Predecessor do not include the real estate subsidiaries for two properties owned by GI Partners that are subject to right of first offer agreements, whereby the Operating Partnership has the right to make the first offer to purchase these properties if GI Partners decides to sell them. The accompanying combined financial statements of the Company Predecessor also do not include any of GI Partners' investments in privately held companies, which GI Partners did not contribute to the Operating Partnership.

The accompanying interim financial statements are unaudited, but have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and in compliance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for a fair presentation of the financial statements for these interim periods have been included. The results of operations for the interim periods are not necessarily indicative of the results to be obtained for the full fiscal year. These financial statements should be read in conjunction with the audited consolidated and combined financial statements and the notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2004.

(b) Cash Equivalents

For purpose of the consolidated and combined statements of cash flows, the Company considers short-term investments with original maturities of 90 days or less when purchased to be cash equivalents. As of March 31, 2005 and December 31, 2004, cash equivalents consist of investments in money market funds.

(c) Stock Based Compensation

The Company accounts for stock based compensation, including stock options and fully vested long-term incentive units granted under the Company's 2004 Incentive Award Plan in connection with the IPO, using the fair value method of accounting under FASB Statement 123, *Accounting for Stock Based Compensation*. The estimated fair value of each of the long-term incentive units was equal to the IPO price of the Company's stock and such amount was recorded as an expense upon closing of the IPO since those long term incentive units were fully vested as of the grant date. The estimated fair value of the stock options granted by the Company is being amortized over the vesting period of the stock options.

(d) Income Taxes

The Company intends to elect to be taxed as a REIT under the Code, commencing with its taxable period ended December 31, 2004. The Company has been organized and has operated in a manner that management believes has allowed the Company to qualify for taxation as a REIT under the Code commencing with the Company's taxable period ended December 31, 2004, and the Company intends to continue to be organized and operate in this manner. As a REIT, the Company generally is not required to pay federal corporate income taxes on its taxable income to the extent it is currently distributed to the Company's stockholders.

However, qualification and taxation as a REIT depend upon the Company's ability to meet the various qualification tests imposed under the Code, including tests related to annual operating results, asset composition, distribution levels and diversity of stock ownership. Accordingly, no assurance can be given that the Company will be organized or be able to operate in a manner so as to qualify or remain qualified as a REIT. If the Company fails to qualify as a REIT in any taxable year, it will be subject to federal income tax (including any applicable alternative minimum tax) on its taxable income at regular corporate tax rates.

The Company has elected to treat two of the Operating Partnership's subsidiaries as taxable REIT subsidiaries (each, a TRS). In general, a TRS may perform non-customary services for tenants, hold assets that the Company cannot hold directly and generally may engage in any real estate or non-real estate related business (except for the operation or management of health care facilities or lodging facilities or the provision to any person, under a franchise, license or otherwise, rights to any brand name under which any lodging facility or health care facility is operated). A TRS is subject to corporate federal income taxes on its taxable income at regular corporate tax rates. There is no tax provision for either of the Company's TRS entities for the periods presented in the accompanying consolidated and combined statements of operations due to net operating

Table of Contents

**DIGITAL REALTY TRUST, INC. AND
DIGITAL REALTY TRUST, INC. PREDECESSOR**

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS (CONTINUED)

March 31, 2005 and 2004

(unaudited)

losses incurred. No tax benefits have been recorded since it is not considered more likely than not that the deferred tax asset related to the net operating loss carryforward will be utilized.

To the extent that any United Kingdom taxes are incurred by the subsidiary invested in real estate located in London, England, a provision is made for such taxes.

No provision has been made in the combined financial statements of the Company Predecessor for U.S. income taxes, as any such taxes are the responsibility of GI Partners' members, as GI Partners is a limited liability company.

(e) Management's Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates made.

3. Minority Interests in the Operating Partnership

Minority interests relate to the interests in the Operating Partnership that are not owned by the Company, which, at March 31, 2005, amounted to 59.5%. In conjunction with the formation of the Company, GI Partners received common units, in exchange for contributing ownership interests in the Company Predecessor's properties to the Operating Partnership. Also in connection with acquiring real estate interests owned by third parties, the Operating Partnership issued common units to those sellers. Limited partners who acquired common units in the formation transactions have the right, commencing on or after January 3, 2006, to require the Operating Partnership to redeem part or all of their common units for cash based upon the fair market value of an equivalent number of shares of the Company's common stock at the time of the redemption. Alternatively, the Company may elect to acquire those common units in exchange for shares of the Company's common stock on a one-for-one basis, subject to adjustment in the event of stock splits, stock dividends, issuance of stock rights, specified extraordinary distributions and similar events.

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

As of March 31, 2005, GI Partners owned 23,699,359 common units or 44.8% of all common units, third parties owned 6,331,511 common units or 11.9% of all common units and Company employees, non-employee directors and the Company's Executive Chairman together own 1,490,561 long term incentive units or 2.8% of all Units. Richard Magnuson, the Executive Chairman of the Company's board of directors, Michael Foust, the Company's Chief Executive Officer and a member of the Company's board of directors, and Scott Peterson, the Company's Senior Vice President, Acquisitions, are minority indirect investors in GI Partners.

4. Investments in Real Estate Acquired During the Three Months Ended March 31, 2005

As of December 31, 2004, the Company owned a 75% tenancy-in-common interest in eBay Data Center. On January 21, 2005, the Company purchased the remaining 25% interest in this property for \$4.1 million.

On March 14, 2005, the Company purchased 833 Chestnut Street located in downtown Philadelphia, Pennsylvania, for approximately \$59.0 million.

On March 17, 2005, the Company purchased MAPP Building located in St. Paul, Minnesota, for approximately \$15.6 million.

Stanford Place II Mortgage	5.14%	Jan. 10, 2009	26,000	26,000
Univision Tower Mortgage ⁽⁸⁾	6.04%	Nov. 6, 2009	57,769	57,943
Secured Term Debt ⁽⁹⁾	5.65%	Nov. 11, 2014	154,336	154,835
Unsecured Credit Facility ⁽¹⁰⁾	LIBOR + 1.625%	Nov. 3, 2007 ⁽⁶⁾	36,000	44,000
Total principal outstanding			514,763	519,498
Loan premium MAPP Building			938	
Total indebtedness			\$ 515,701	\$ 519,948

⁽¹⁾ The Company has entered into interest rate swap agreements as a cash flow hedge for these loans. The total variable debt subject to the swap agreements was \$139.6 million and \$140.2 million as of March 31, 2005 and December 31, 2004, respectively. See note 9 for further

information.

- (2) Two one-year extensions are available.
- (3) A 13-month extension and a one-year extension are available.
- (4) Based on the Company's hedged exchange rate of \$1.8472 to £1.00 as of March 31, 2005 and \$1.6083 to £1.00 as of December 31, 2004.
- (5) Subject to a 2.5% LIBOR floor.
- (6) A one-year extension option is available.
- (7) The anticipated repayment date is March 1, 2012. If the loan is not repaid by this date, the interest rate increases to the greater of 9.62% or the then treasury rate plus 2%.
- (8) The Univision Tower mortgage loan is also secured by a \$5.0 million letter of credit.
- (9) This amount represents six mortgage loans secured by the Company's interests in 36 Northeast Second Street, Brea Data Center, Converse Technology Building, Hudson Corporate Center, Siemens Building, and Webb at LBJ. Each of these loans are cross-collateralized by the six properties.
- (10) The interest rate under the Company's unsecured credit facility equals either (i) LIBOR plus a margin of between 1.375% and 1.750% or (ii) the greater of (x) the base rate announced by the lender and (y) the federal funds rate, plus a margin of between 0.375% - 0.750%. In each case, the margin is based on the Company's leverage ratio.

On May 11, 2005, the Company entered into an amendment to the Company's unsecured revolving credit facility pursuant to which the size of the facility may be expanded from \$200.0 million to \$350.0 million at the Company's request, subject to receipt of lender commitments and satisfaction of other conditions, and also added a \$100.0 million sub-facility for foreign exchange advances in Euros, British Sterling and Canadian Dollars. Approximately \$36.0 million was drawn under this facility as of March 31, 2005 and approximately \$84.9 million of this credit facility remained available pursuant to the terms of this facility as of March 31, 2005. The unsecured credit facility expires on November 3, 2007 and has a one-year extension option. The credit facility contains various restrictive covenants, including limitations on the Company's ability to incur additional indebtedness, make certain investments or merge with another company, limitations on restricted payments, and requirements to maintain financial coverage ratios and maintain a pool of unencumbered assets.

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS (CONTINUED)

March 31, 2005 and 2004

(unaudited)

The limitation on restricted payments, referred to above, provides that, except to enable the Company to maintain its status as a REIT for federal income tax purposes, the Company, will not during any four consecutive fiscal quarters make distributions with respect to common stock or other equity interests in an aggregate amount in excess of 95% of Funds From Operations, as defined, for such period, subject to certain other adjustments. As of March 31, 2005, the Company believes that it was in compliance with all the covenants.

Some of the loans impose penalties upon prepayment. The terms of the following loans do not permit prepayment of the loan prior to the dates listed below:

<u>Loan</u>	<u>Date</u>
Carrier Center Mortgage	October 2005
Ardenwood Corporate Park, NTT/Verio	October 2005
Premier Data Center, Var Tec Building Mortgage	
Ardenwood Corporate Park, NTT/Verio	October 2005
Premier Data Center, Var Tec Building Mezzanine	
Granite Tower Mortgage	January 2006
100 Technology Center Drive Mortgage	March 2006
Univision Tower Mortgage	August 2009
MAPP Building Mortgage	December 2011
Secured Term Debt	September 2014

6. Earnings per Share

The following is a summary of the elements used in calculating basic and diluted income per share (in thousands, except share and per share amounts):

	Three Months Ended
	<u>March 31, 2005</u>
Net income	\$ 2,739
Preferred dividends	(1,271)

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

Net income available to common stockholders	\$ 1,468
Weighted average shares outstanding basic	21,421,300
Potentially dilutive common shares:	
Stock options	114,185
Weighted average shares outstanding diluted	21,535,485
Earnings per share Basic:	
Net income per share available to common shareholders	\$ 0.07
Earnings per share Diluted:	
Net income per share available to common shareholders	\$ 0.07

For the three months ended March 31, 2005, 30,030,870 common units and 1,490,561 of long-term incentive units were excluded from the computation of diluted earnings per share as their effect would not be dilutive. For the three months ended March 31, 2005, options to purchase shares of the Company's common stock of 31,000 shares have been excluded from the computation of diluted earnings per share as their exercise prices were greater than the average market price of the Company's common stock of \$13.98 for the three months ended March 31, 2005.

(unaudited)

7. Stockholders' Equity

(a) Preferred Stock

Underwriting discounts and commissions and other offering costs totaling approximately \$4.2 million are reflected as a reduction to preferred stock in the accompanying consolidated balance sheet.

(b) Shares and Units

A common unit and a share of the Company's common stock have essentially the same economic characteristics as they share equally in the total net income or loss and distributions of the Operating Partnership. A common unit may be redeemed for cash, or, at the Company's option, exchanged for shares of common stock on a one-for-one basis after January 3, 2006. There were 21,421,300 shares of common stock, 30,030,870 common units and 1,490,561 long-term incentive units, which have achieved full parity outstanding as of March 31, 2005.

(c) Dividends and Distributions

On February 14, 2005, the Company declared a dividend on its series A preferred stock of \$0.30694 per share for the period from February 9, 2005 through March 31, 2005, payable on March 31, 2005 to the holders of record on March 15, 2005. The dividend, totaling approximately \$1.3 million, was paid on March 31, 2005. The dividend is equivalent to an annual rate of \$2.125 per preferred share.

On February 14, 2005, the Company also declared a dividend on its common stock and the Operating Partnership declared a distribution on common units and long-term incentive units of \$0.24375 per common share, common unit or long-term incentive unit, covering the period January 1, 2005 through March 31, 2005, payable to the holders of record on March 15, 2005. The dividend and distribution, totaling approximately \$12.9 million, was paid on March 31, 2005. The dividend and distribution was equivalent to an annual rate of \$0.975 per common share and common unit. Distributions to common and long-term incentive unitholders are recorded as a reduction to minority interests in operating partnership.

(d) Stock Options

The fair value of each option granted under the 2004 Incentive Award Plan is estimated on the date of the grant using the Black-Scholes option-pricing model with the weighted-average assumptions listed below for grants in 2005. The fair values are being expensed on a straight-line basis over the vesting period of the options, which is four years. The expense recorded for the three months ended March 31, 2005 was approximately \$52,000.

The following table sets forth the weighted-average assumptions used to calculate the fair value of the stock options granted during the three months ended March 31, 2005:

Dividend yield	6.88%
Expected life of option	120 months
Risk-free interest rate	4.13%
Expected stock price volatility	20.00%

A summary of the status of the Company's stock options under the 2004 Incentive Award Plan as of March 31, 2005 and for the three months then ended are presented below:

	Shares	Weighted-Average Exercise Price
Options outstanding, beginning of period	924,902	\$ 12.16
Granted	31,000	14.18
Exercised		
Cancelled	(40,407)	12.00
Options outstanding, end of period	915,495	12.27
Exercisable, end of period		
Weighted-average fair value of options granted during the period		\$ 1.10

As of March 31, 2005, we had 915,495 stock options outstanding, with exercise prices ranging from \$12.00 to \$14.50. The weighted-average remaining contractual life of these options at March 31, 2005 was 9.62 years.

Table of Contents

**DIGITAL REALTY TRUST, INC. AND
DIGITAL REALTY TRUST, INC. PREDECESSOR**

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS (CONTINUED)

March 31, 2005 and 2004

(unaudited)

(e) Distributions

Earnings and profits, which determine the taxability of distributions to stockholders, will differ from income reported for financial reporting purposes due to the differences for federal income tax purposes in the treatment of loss on extinguishment of debt, revenue recognition, compensation expense and in the basis of depreciable assets and estimated useful lives used to compute depreciation.

8. Incentive Plan

The Company's 2004 Incentive Award Plan provides for the grant of incentive awards to employees, directors and consultants. Awards issuable under the 2004 Incentive Award Plan include stock options, restricted stock, dividend equivalents, stock appreciation rights, long-term incentive units, cash performance bonuses and other incentive awards. Only employees are eligible to receive incentive stock options under the 2004 Incentive Award Plan. The Company has reserved a total of 4,474,102 shares of common stock for issuance pursuant to the 2004 Incentive Award Plan, subject to certain adjustments set forth in the 2004 Incentive Award Plan. As of March 31, 2005, 2,027,639 shares of common stock remained available for future issuance under the 2004 Incentive Award Plan. Each long-term incentive unit issued under the 2004 Incentive Award Plan will count as one share of common stock for purposes of calculating the limit on shares that may be issued under the 2004 Incentive Award Plan and the individual award limit discussed below.

Long-term incentive units may be issued to eligible participants for the performance of services to or for the benefit of the Operating Partnership. Long-term incentive units, whether vested or not, will receive the same quarterly per unit distributions as common units in the Operating Partnership. In connection with the IPO, an aggregate of 1,490,561 of fully vested long-term incentive units were issued, which are not transferable for a period of three years from the date the IPO was consummated, and compensation expense totaling \$17.9 million was recorded at the completion of the IPO. These long-term incentive units achieved parity with common units on February 9, 2005 upon completion of the series A preferred stock offering. Any long-term incentive units granted in the future will not, initially, have full parity with common units with respect to liquidating distributions. Upon the occurrence of specified events, those long-term incentive units may over time achieve full parity with common units in the Operating Partnership for all purposes, and therefore accrete to an economic value for participants equivalent to the Company's common stock on a one-for-one basis. If such parity is reached, vested long-term incentive units may be converted into an equal number of common units of the Operating Partnership at any time, and thereafter enjoy all the rights of common units of the Operating Partnership.

9. Derivative Instruments

The Company records all derivatives in the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and the resulting designation. Derivatives used to hedge the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives may also be designated as hedges of the foreign currency exposure of a net investment in a foreign operation.

Derivatives used to hedge the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. The Company's objective in using derivatives is to add stability to interest expense and to manage its exposure to interest rate movements or other identified risks. To accomplish this objective, the Company primarily uses interest rate swaps as part of its cash flow hedging strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts in exchange for fixed-rate payments over the life of the agreements without exchange of the underlying principal amount. Through March 31, 2005, the Company used such derivatives to hedge the variable cash flows associated with floating rate debt.

For derivatives designated as cash flow hedges, the effective portion of changes in the fair value of the derivative is initially reported in other comprehensive income (outside of earnings) and subsequently reclassified to earnings when the hedged transactions affect earnings, and the ineffective portion of changes in the fair value of the derivative is recognized directly in earnings. For derivatives designated as net investment hedges, changes in the fair value of the derivative are reported in other comprehensive income (outside of earnings) as part of the cumulative translation adjustment. As of March 31, 2005, no derivatives were designated as fair value hedges. Additionally, the Company does not use derivatives for trading or speculative purposes.

Table of Contents

DIGITAL REALTY TRUST, INC. AND
DIGITAL REALTY TRUST, INC. PREDECESSOR

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS (CONTINUED)

March 31, 2005 and 2004

(unaudited)

In November 2004, the Company entered into interest rate swaps to hedge variability in cash flows related to \$140.3 million of its floating-rate debt. The fair value of such derivatives was \$1.7 million and (\$27,000) at March 31, 2005 and December 31, 2004, respectively. For the three months ended March 31, 2005, the change in net unrealized gains for derivatives designated as cash flow hedges was \$1.7 million and is separately disclosed in the statement of comprehensive income, net of the amount allocated to minority interests.

The table below summarizes the terms of these interest rate swaps and their fair values as of March 31, 2005 (in thousands):

Current Notional	Strike	Effective	Expiration	Fair
Amount	Rate	Date	Date	Value
\$ 46,268	3.178%	Nov. 26, 2004	Jul. 1, 2006	\$ 344
43,000	3.250	Nov. 26, 2004	Sep. 15, 2006	396
21,510	3.754	Nov. 26, 2004	Jan. 1, 2009	429
20,000	3.824	Nov. 26, 2004	Apr. 1, 2009	431
8,775	3.331	Nov. 26, 2004	Dec. 1, 2006	93
\$139,553				\$ 1,693

The Company has two LIBOR interest rate caps that are not designated as hedges. The fair values of the caps were immaterial as of March 31, 2005 and December 31, 2004.

In 2003, one of the Company Predecessor's subsidiaries entered into a foreign currency forward sale contract of approximately £7.9 million, with delivery date of January 24, 2005, to hedge an equity investment in Camperdown House, located in London, England. On January 24, 2005, the Company settled its obligations under this arrangement for a payment of approximately \$2.5 million and entered into a new forward contract of the same notional amount. On February 4, 2005, GI Partners reimbursed the Company for \$1.9 million of the \$2.5 million settlement since it was determined that the negative value associated with the forward contract assumed by the Company was not otherwise factored into the determination of the number of common units that were granted to GI Partners in exchange for its interests in Camperdown House.

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

The forward contracts had been designated as net investment hedges and the contract held at March 31, 2005 had a value of (\$0.2) million and (\$2.8) million on March 31, 2005 and December 31, 2004, respectively. The change in value of the derivative was recorded in other comprehensive income (loss) as a part of the cumulative translation adjustments. The \$1.9 million received from GI Partners was recorded as other comprehensive income during the three months ended March 31, 2005, when GI Partners agreed to pay such amount. The cumulative translation adjustment amounts included in other comprehensive income (loss) related to the net investment hedge will be reclassified to earnings when the hedged investment is sold or liquidated.

10. Commitments and Contingencies and Subsequent Events

On March 14, 2005, the Company executed a purchase and sale agreement to acquire Printers Square located in Chicago, Illinois for approximately \$37.5 million.

On March 15, 2005, the Company executed a purchase and sale agreement to acquire a property known as Lakeside Technology Center in Chicago, Illinois, for approximately \$142.6 million. The seller can earn an additional \$20.0 million by obtaining a change in the real estate tax classification prior to December 31, 2006.

In March 2005, the Company entered into an agreement to sublease office space in San Francisco, California for its headquarters under a seven-year lease with annual rent of approximately \$0.4 million.

On May 11, 2005, the Company amended its revolving credit agreement to permit for the expansion of the size of the facility to up to \$350.0 million at the Company's request, subject to receipt of lender commitments and satisfaction of other conditions, and also added a \$100.0 million sub-facility for foreign exchange advances in Euros, British Sterling and Canadian Dollars.

On May 6, 2005, the Company declared a dividend on its series A preferred stock of \$0.53125 per share for the period from April 1, 2005 through June 30, 2005, payable on June 30, 2005 to holders of record on June 15, 2005. The dividend is equivalent to an annual rate of \$2.125 per share of series A preferred stock. On May 6, 2005, the Company also declared a dividend on its common stock, and the Operating Partnership declared distributions on common units and long-term incentive units of \$0.24375 per share, payable on June 30, 2005 to holders of record on June 15, 2005. The dividend and distribution is equivalent to an annual rate of \$0.975 per common share and common unit.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report. This report contains forward-looking statements within the meaning of the federal securities laws. We caution investors that any forward-looking statements presented in this report, or which management may make orally or in writing from time to time, are based on management's beliefs and assumptions made by, and information currently available to, management. When used, the words anticipate, believe, expect, intend, may, might, plan, estimate, project, should, will, result and similar expressions, which do not relate solely to historical matters, are intended to identify forward-looking statements. Such statements are subject to risks, uncertainties and assumptions and are not guarantees of future performance, which may be affected by known and unknown risks, trends, uncertainties and factors that are beyond our control. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. We expressly disclaim any responsibility to update forward-looking statements, whether as a result of new information, future events or otherwise.

Some of the risks and uncertainties that may cause our actual results, performance or achievements to differ materially from those expressed or implied by forward-looking statements include, among others, the following: adverse economic or real estate developments in our markets or the technology industry; general and local economic conditions; defaults on or non-renewal of leases by tenants; increased interest rates and operating costs; our failure to obtain necessary outside financing; decreased rental rates or increased vacancy rates; difficulties in identifying properties to acquire and completing acquisitions; our failure to successfully operate acquired properties and operations; our failure to maintain our status as a REIT; possible adverse changes to tax law; environmental uncertainties and risks related to natural disasters; financial market fluctuations; changes in foreign currency exchange rates; and changes in real estate and zoning laws and increases in real property tax rates.

The risks included here are not exhaustive, and additional factors could adversely affect our business and financial performance, including factors and risks included in other sections of this report. In addition, we discussed a number of material risks in our annual report on Form 10-K for the year ended December 31, 2004. Those risks continue to be relevant to our performance and financial condition. Moreover, we operate in a very competitive and rapidly changing environment. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors, nor can it assess the impact of all such risk factors on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

Overview

The Company. We completed our initial public offering, or IPO, of common stock on November 3, 2004. We expect to qualify as a REIT for federal income tax purposes beginning with our initial taxable period ended December 31, 2004. The Company was formed on March 9, 2004. During the period from the Company's formation until we commenced operations in connection with the completion of our IPO, we did not have any corporate activity other than the issuance of shares of common stock in connection with the initial capitalization of the Company. Because we believe that a discussion of the results of the Company prior to the completion of our IPO would not be meaningful, we have set forth below a discussion of historical combined operations for the Company and the Company Predecessor and as such, any reference in the Management's Discussion and Analysis of Financial Condition and Results of Operations to our, we and us in this Item 2 includes the Company and the Company Predecessor. The Company Predecessor is comprised of the real estate activities and holdings of GI Partners related to the properties in our portfolio. The Company Predecessor's combined historical financial information includes:

the wholly owned real estate subsidiaries and majority-owned real estate joint ventures that GI Partners contributed to our operating partnership in connection with our initial public offering;

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

an allocation of GI Partners' line of credit to the extent that borrowings and related interest expense related to (1) borrowings to fund acquisitions of the properties in our portfolio and (2) borrowings to pay asset management fees paid by GI Partners that were allocated to the properties in our portfolio; and

an allocation of the asset management fees paid to a related party and incurred by GI Partners, along with an allocation of the liability for any such fees that were unpaid as of December 31, 2003 and an allocation of GI Partners' general and administrative expenses.

Business and strategy. Our primary business objectives are to maximize sustainable long-term growth in earnings, funds from operations and cash flows and maximize returns to our stockholders. We expect to achieve our objectives by focusing on our core business of investing in technology-related real estate. We target high quality, strategically located properties containing applications and operations critical to the day-to-day operations of corporate enterprise data center and technology industry tenants. We focus on regional, national and international tenants, which require technology real estate and that are leaders in their respective areas. Most of our properties contain fully redundant electrical supply systems, multiple power feeds, above-standard electrical HVAC systems, raised floor areas to accommodate computer cables and below-floor cooling systems, extensive in-building communications cabling and high-level security systems. We focus solely on technology-related real estate because we believe that the growth in corporate enterprise data center adoption and the technology industry generally will be superior to that of the overall economy.

Since the acquisition of our first property in 2002 and through March 31, 2005, we have acquired an aggregate of 26 technology-related real estate properties with 6.3 million net rentable square feet. From January 1, 2005 through March 31, 2005, we acquired two technology-related properties, with approximately 635,329 net rentable square feet and as of May 12,

Table of Contents

2005, are under contract to acquire an additional two properties with approximately 982,090 net rentable square feet. We have developed detailed, standardized procedures for evaluating acquisitions to ensure that they meet our financial and other criteria. We expect to continue to acquire additional assets as a key part of our growth strategy. We intend to aggressively manage and lease our assets to increase their cash flow.

We may acquire properties subject to existing mortgage financing and other indebtedness or to new indebtedness, which may be incurred in connection with acquiring or refinancing these investments. Debt service on such indebtedness will have a priority over any dividends with respect to our common stock and our series A preferred stock. We intend to limit our indebtedness to 60% of our total market capitalization and, based on the closing price of our common stock on March 31, 2005 of \$14.37, our ratio of debt to total market capitalization was approximately 37.4% as of March 31, 2005. Our total market capitalization is defined as the sum of the market value of our outstanding common stock and preferred stock (which may decrease, thereby increasing our debt to total market capitalization ratio), excluding options issued under our incentive award plan, plus the aggregate value of the common and long-term incentive units not held by us, plus the book value of our total consolidated indebtedness. Total market capitalization as of March 31, 2005 includes 4,140,000 shares of preferred stock, 21,421,300 shares of our common stock and 31,521,431 common units and long-term incentive units, plus the book value of our total consolidated indebtedness.

Revenue Base. As of March 31, 2005, we owned 26 properties through our operating partnership. These properties are located throughout the U.S., with one property located in London, England, and contain a total of approximately 6.3 million net rentable square feet. We acquired our first portfolio property in January 2002, an additional four properties through December 31, 2002, eight properties during the year ended December 31, 2003, eleven properties during the year ended December 31, 2004 and two properties during the three months ended March 31, 2005. Excluding space held for redevelopment, as of March 31, 2005, the properties in our portfolio were approximately 88.9% leased at an average annualized rent per leased square foot of \$19.22. Since our tenants generally fund capital improvements, our lease terms are generally longer than standard commercial leases. At March 31, 2005, our average lease term was 12.4 years, with an average of 7.1 years remaining. Our lease expirations through 2007 are only 6.3% of net rentable square feet or 6.1% of aggregate annualized rent as of March 31, 2005.

Operating expenses. Our operating expenses generally consist of utilities, property and ad valorem taxes, insurance and site maintenance costs, as well as rental expenses on our ground lease. For the Company Predecessor, a significant portion of the general and administrative type expenses have been reflected in the asset management fees that were paid to GI Partners' related-party asset manager. The asset management fees were based on a fixed percentage of capital commitments made by the investors in GI Partners, a portion of which were allocated to the Company Predecessor. Since the consummation of our IPO, our asset management function has been internalized and we are incurring the majority of our general and administrative expenses directly. We have entered into a transition services agreement with CB Richard Ellis Investors with respect to transitional accounting and other services. In addition, as a public company, we are incurring significant legal, accounting and other expenses related to corporate governance, Securities and Exchange Commission reporting and compliance with the various provisions of Sarbanes-Oxley Act of 2002. In addition, we rely on third-party property managers for most of our properties. As of March 31, 2005, 14 of our properties were managed by CB Richard Ellis, an affiliate of GI Partners.

Formation Transactions. In connection with the completion of our IPO, our operating partnership received contributions from GI Partners and third parties of direct and indirect interests in the majority of the properties in our portfolio in exchange for consideration that included cash, assumption of debt, and common units in our operating partnership.

We accounted for the ownership interests contributed to us by GI Partners in exchange for common units in our operating partnership as a reorganization of entities under common control in a manner similar to a pooling of interests. Accordingly, the assets and liabilities contributed by GI Partners are accounted for by our operating partnership at GI Partners' historical cost. We utilized purchase accounting to account for the acquisition of ownership interests in 200 Paul Avenue and 1100 Space Park Drive, which were contributed to us by third parties in exchange for interests in our operating partnership, cash and the assumption of debt and for the acquisition of the 10% minority ownership interest in Univision Tower, which was contributed to us by our joint venture partner in exchange for an interest in our operating partnership and the repayment of debt. Accordingly, the purchase price for these interests, which are equal to the value of the common units that we issued in exchange plus cash paid and debt assumed, were allocated to the assets acquired and liabilities assumed based on the fair value of the assets and liabilities.

Factors Which May Influence Future Results of Operations

Rental income. The amount of net rental income generated by the properties in our portfolio depends principally on our ability to maintain the occupancy rates of currently leased space and to lease currently available space and space available from lease terminations. Excluding space held for redevelopment, as of March 31, 2005, the occupancy rate in the properties in our portfolio was approximately 88.9% of our net rentable square feet. The amount of rental income generated by us also depends on our ability to maintain or increase rental rates at our properties. In addition, one of our strategies is to convert approximately 213,523 net rentable square feet of data center space with extensive tenant improvements. That space is, or shortly will be, available for lease for multi-tenant colocation use, allowing us to lease small spaces at rates that are

Table of Contents

significantly higher than prevailing market rates for other uses. Negative trends in one or more of these factors could adversely affect our rental income in future periods. Future economic downturns or regional downturns affecting our submarkets or downturns in the technology industry that impair our ability to renew or re-lease space and the ability of our tenants to fulfill their lease commitments, as in the case of tenant bankruptcies, could adversely affect our ability to maintain or increase rental rates at our properties. In addition, growth in rental income will also partially depend on our ability to acquire additional technology-related real estate that meets our investment criteria. One of our tenants, VarTec Telecom, Inc. filed for Chapter 11 bankruptcy protection on November 1, 2004. VarTec Telecom, Inc. occupies 135,000 rentable square feet at our Carrollton, Texas property and 8,632 rentable square feet at our Univision Tower property in Dallas, Texas. We are closely monitoring their status and we believe our properties provide a favorable opportunity for consolidation of their operations. On August 3, 2004, prior to our acquisition of 200 Paul Avenue, Universal Access Inc. filed for Chapter 11 bankruptcy protection. Both tenants are current on their rental obligations.

Scheduled lease expirations. Our ability to re-lease expiring space will impact our results of operations. In addition to approximately 703,000 square feet of available space in our portfolio as of March 31, 2005, leases representing approximately 0.9% and 1.7% of the square footage of our portfolio are scheduled to expire during the nine months ending December 31, 2005 and the year ending December 31, 2006, respectively. The leases scheduled to expire in the years ending December 31, 2005 and 2006 represent approximately 0.7% and 1.8%, respectively, of our total annualized base rent.

Conditions in significant markets. As of March 31, 2005, our portfolio was geographically concentrated in the Boston, Dallas, Los Angeles, New York, Philadelphia, San Francisco and Silicon Valley metropolitan markets; these markets provided 9.0%, 17.7%, 9.3%, 6.4%, 6.6%, 10.1%, and 26.1%, respectively, of the annualized rent of the properties in our portfolio. As of March 31, 2005, we were under contract to acquire two properties in Chicago that will account for significant portions of our future annualized rent. Positive or negative changes in conditions in our significant markets will impact our overall performance. The Dallas, San Francisco and Silicon Valley metropolitan real estate markets were adversely affected by the downturn in the technology industry, and continue to stabilize as the technology industry and broader economy rebound. The majority of the 2.6% of net rentable square feet of our portfolio as of March 31, 2005, that is subject to expiration in the 21 months ending December 31, 2006 is in Denver. The Denver metropolitan real estate market was also adversely affected by the downturn in the technology industry. We believe that the Denver leasing market appears to be stabilizing, with recent positive absorption of space.

Operating expenses. Our operating expenses generally consist of utilities, property and ad valorem taxes, insurance and site maintenance costs, as well as rental expenses on our ground lease. We are also incurring general and administrative expenses, including expenses relating to the internalization of our asset management function, as well as significant legal, accounting and other expenses related to corporate governance, Securities and Exchange Commission reporting and compliance with the various provisions of the Sarbanes-Oxley Act of 2002. Increases or decreases in such operating expenses will impact our overall performance. As a newly public company, we are incurring additional operating expenses as we internalize our asset management function and begin to incur the majority of our expenses directly.

Critical Accounting Policies

Our discussion and analysis of financial condition and results of operations are based upon our consolidated and combined financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles (GAAP). The preparation of these financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses in the reporting period. Our actual results may differ from these estimates. We have provided a summary of our significant accounting policies in Note 2 to our financial statements included elsewhere in this report and in our December 31, 2004 annual report on Form 10-K. We describe below those accounting policies that require material subjective or complex judgments and that have the most significant impact on our financial condition and results of operations. Our management evaluates these estimates on an ongoing basis, based upon information currently available and on various assumptions management believes are reasonable as of the date on the front cover of this report.

Investments in Real Estate

Acquisition of real estate. The price that we pay to acquire a property is impacted by many factors, including the condition of the buildings and improvements, the occupancy of the building, the existence of above and below market tenant leases, the creditworthiness of the tenants, favorable or unfavorable financing and above or below market ground leases. Accordingly, we are required to make subjective assessments to allocate the purchase price paid to acquire investments in real estate among the assets acquired and liabilities assumed based on our estimate of the fair values of such assets and liabilities. This includes determining the value of the buildings and improvements, land, any ground leases, tenant improvements, in-place tenant leases, tenant relationships, the value (or negative value) of above (or below) market leases and any debt assumed from the seller or loans made by the seller to us. Each of these estimates requires a great deal of judgment and some of the estimates involve complex calculations. Our allocation methodology is summarized in Note 2 to our consolidated and combined financial statements included in our December 31, 2004 annual report on Form 10-K. These allocation assessments have a direct impact on our results of operations. For example, if we were to allocate more value to land, there would be no depreciation with respect to such amount. If we were to allocate more value to the buildings as opposed to tenant leases, this amount would be recognized as an expense over a much longer period of time. This potential

Table of Contents

effect occurs because the amounts allocated to buildings are depreciated over the estimated lives of the buildings whereas amounts allocated to tenant leases are amortized over the terms of the leases. Additionally, the amortization of value (or negative value) assigned to above or below market rate leases is recorded as an adjustment to rental revenue as compared to amortization of the value of in-place leases and tenant relationships, which is included in depreciation and amortization in our combined statements of operations.

Useful lives of assets. We are required to make subjective assessments as to the useful lives of our properties for purposes of determining the amount of depreciation to record on an annual basis with respect to our investments in real estate. These assessments have a direct impact on our net income because if we were to shorten the expected useful lives of our investments in real estate we would depreciate such investments over fewer years, resulting in more depreciation expense and lower net income on an annual basis.

Asset impairment valuation. We review the carrying value of our properties when circumstances, such as adverse market conditions, indicate potential impairment may exist. We base our review on an estimate of the future cash flows (excluding interest charges) expected to result from the real estate investment's use and eventual disposition. We consider factors such as future operating income, trends and prospects, as well as the effects of leasing demand, competition and other factors. If our evaluation indicates that we may be unable to recover the carrying value of a real estate investment, an impairment loss is recorded to the extent that the carrying value exceeds the estimated fair value of the property. These losses have a direct impact on our net income because recording an impairment loss results in an immediate negative adjustment to net income. The evaluation of anticipated cash flows is highly subjective and is based in part on assumptions regarding future occupancy, rental rates and capital requirements that could differ materially from actual results in future periods. Since cash flows on properties considered to be long-lived assets to be held and used are considered on an undiscounted basis to determine whether an asset has been impaired, our strategy of holding properties over the long-term directly decreases the likelihood of recording an impairment loss. If our strategy changes or market conditions otherwise dictate an earlier sale date, an impairment loss may be recognized and such loss could be material. If we determine that impairment has occurred, the affected assets must be reduced to their fair value. No such impairment losses have been recognized to date.

We estimate the fair value of rental properties utilizing a discounted cash flow analysis that includes projections of future revenues, expenses and capital improvement costs, and is similar to the income approach that is commonly utilized by appraisers.

Revenue Recognition

Rental income is recognized using the straight-line method over the terms of the tenant leases. Deferred rent included in our balance sheets represent the aggregate excess of rental revenue recognized on a straight-line basis over the rental revenue that would be recognized under the terms of the leases. Our leases generally contain provisions under which the tenants reimburse us for a portion of property operating expenses and real estate taxes incurred by us. Such reimbursements are recognized in the period that the expenses are incurred. Lease termination fees are recognized when the related leases are canceled and we have no continuing obligation to provide services to such former tenants. As discussed above, we recognize amortization of the value of acquired above or below market tenant leases as a reduction of rental income in the case of above market leases or an increase to rental revenue in the case of below market leases.

We must make subjective estimates as to when our revenue is earned and the collectibility of our accounts receivable related to minimum rent, deferred rent, expense reimbursements, lease termination fees and other income. We specifically analyze accounts receivable and historical bad debts, tenant concentrations, tenant creditworthiness, and current economic trends when evaluating the adequacy of the allowance for bad debts. These estimates have a direct impact on our net income because a higher bad debt allowance would result in lower net income, and recognizing rental revenue as earned in one period versus another would result in higher or lower net income for a particular period.

Table of Contents**Results of Operations**

The discussion below relates to our financial condition and results of operations for the three months ended March 31, 2005 and 2004.

The following table identifies each of the properties in our portfolio acquired through March 31, 2005. Our property portfolio has experienced consistent and significant growth since the first property acquisition in January 2002. As a result of such growth, a period-to-period comparison of our financial performance focuses primarily on the impact on our revenues and expenses resulting from the new property additions to our portfolio. On a same store property basis, our revenues and expenses have remained substantially stable as a result of the generally consistent occupancy rates at our properties.

Table of Contents

Comparison of the Three Months Ended March 31, 2005 to the Three Months Ended March 31, 2004

As of March 31, 2005, our portfolio consisted of 26 properties with an aggregate of 6.3 million net rentable square feet compared to a portfolio consisting of 14 properties with an aggregate of 3.0 million net rentable square feet as of March 31, 2004. The increase in our portfolio reflects the acquisition of twelve properties with an aggregate of approximately 3.3 million net rentable square feet for the twelve months ended March 31, 2005.

Total revenues increased \$20.8 million, or 110.6%, to \$39.6 million for the three months ended March 31, 2005 compared to \$18.8 million for the three months ended March 31, 2004. Rental revenue increased \$16.7 million, or 104.4%, to \$32.7 million for the three months ended March 31, 2005 compared to \$16.0 million for the three months ended March 31, 2004. Revenues from tenant reimbursements increased \$3.8 million, or 140.7%, to \$6.5 million for the three months ended March 31, 2005 compared to \$2.7 million for the three months ended March 31, 2004. The increase in rental and tenant reimbursements revenue was primarily due to the twelve properties added to our portfolio during the twelve months ended March 31, 2005 along with a full three months of revenue earned in 2005 attributed to our acquisitions made during the three months ended March 31, 2004.

The increase in other revenue of \$0.4 million for the three months ended March 31, 2005 compared to the three months ended March 31, 2004 was primarily due to an increase in early lease termination fees.

Total expenses increased \$19.4 million, or 126.8%, to \$34.7 million for the three months ended March 31, 2005 compared to \$15.3 million for the three months ended March 31, 2004. The increase in total expenses was primarily due to twelve properties being added to our portfolio during the twelve months ended March 31, 2005 along with a full three months of expenses incurred in 2005 for our acquisitions made during the three months ended March 31, 2004, resulting in increases in rental property operating and maintenance expense, property taxes, insurance, interest expense, depreciation and amortization expense and general and administrative expense. The increase in total expenses was also due to expenses incurred in connection with being a public company after the completion of our IPO in November 2004.

Rental property operating and maintenance expense increased \$4.1 million, or 136.7%, to \$7.1 million for the three months ended March 31, 2005 compared to \$3.0 million for the three months ended March 31, 2004. Rental property operating and maintenance expenses included \$0.4 million and \$0.2 million for the three months ended March 31, 2005 and 2004, respectively, paid to affiliates of CB Richard Ellis Investors for property management and other fees. The increase is primarily due to the twelve properties added to our portfolio during the twelve months ended March 31, 2005 along with a full three months of expenses incurred in 2005 attributed to our acquisition made during the three months ended March 31, 2004.

Interest expense increased \$4.3 million, or 113.2%, to \$8.1 million for the three months ended March 31, 2005 compared to \$3.8 million for the three months ended March 31, 2004. The increase was associated with new mortgage debt incurred primarily in connection with the properties added to our portfolio. The increase in interest related to property acquisitions was partially offset by a reduction in interest related to loans repaid or refinanced in connection with the completion of our IPO.

Depreciation and amortization expense increased \$6.6 million, or 120.0%, to \$12.1 million for the three months ended March 31, 2005 compared to \$5.5 million for the three months ended March 31, 2004. The increase is primarily due to the twelve properties added to our portfolio during the twelve months ended March 31, 2005 along with a full three months of depreciation and amortization in 2005 attributed to our acquisition made during the three months ended March 31, 2004.

General and administrative expense increased \$2.3 million to \$2.4 million for the three months ended March 31, 2005 compared to \$0.1 million for the three months ended March 31, 2004. Prior to the completion of our IPO, general and administrative expenses were incurred by the Company Predecessor's related party asset manager and the Company Predecessor incurred an asset management fee, which is included separately in our combined statement of operations. Additionally, as a public company, we are incurring significant legal, accounting and other costs related to corporate governance, Securities and Exchange Commission reporting and other public company overhead. We expect to continue to incur significant general and administrative expenses as we internalize our accounting functions, partially related to increased headcount.

Other expenses are primarily comprised of write-offs of the carrying amounts for deferred rent, tenant improvements, acquired in place lease value and acquired above and below market lease values as a result of the early termination of tenant leases. Other expenses increased \$0.4 million for the three months ended March 31, 2005 compared to the three months ended March 31, 2004, primarily due to no early lease terminations experienced during the three months ended March 31, 2004.

Table of Contents

For the three months ended March 31, 2004, the monthly asset management fees to a related party were based on a fixed percentage of capital commitments by the investors in GI Partners, a portion of which was allocated to the Company Predecessor. Effective as of the completion of our IPO, no such fees are allocated to us.

Liquidity and Capital Resources

Analysis of Liquidity and Capital Resources

As of March 31, 2005, we had \$2.9 million of cash and cash equivalents, excluding \$13.8 million of restricted cash. Restricted cash primarily consists of interest bearing cash deposits required by the terms of several of our mortgage loans for a variety of purposes, including real estate taxes, insurance, anticipated or contractually obligated tenant improvements and leasing reserves.

Our short term liquidity requirements primarily consist of operating expenses and other expenditures associated with our properties, dividend payments on our series A preferred stock, which was issued on February 9, 2005, dividend payments to our stockholders and distributions to our unitholders in the operating partnership required to maintain our REIT status, capital expenditures and, potentially, acquisitions. We expect to meet our short-term liquidity requirements through net cash provided by operations, restricted cash accounts established for certain future payments and by drawing upon our unsecured credit facility.

Our properties require periodic investments of capital for tenant-related capital expenditures and for general capital improvements. As of March 31, 2005, we had commitments under leases in effect for \$2.4 million of tenant improvement costs and leasing commissions, including \$2.2 million for the remainder of 2005 and \$0.2 million in 2006. We also expect to incur costs of recurring capital improvements for our properties. Our nonrecurring capital expenditures are discretionary and vary substantially from period to period. 833 Chestnut Street, which we acquired in March 2005, contains 107,563 square feet of vacant space in shell condition. Lakeside Technology Center, which we are under contract to acquire, contains approximately 275,000 square feet of additional vacant space in shell condition. Depending on demand in these buildings, we may incur significant tenant improvement costs to build out these spaces.

As of March 31, 2005, we owned approximately 213,523 net rentable square feet of data center space with extensive installed tenant improvements that we may convert to multi-tenant colocation use during the next two years rather than lease such space to large single tenants. We estimate that the cost to convert this space will be approximately \$10 \$15 per square foot, on average. We may also spend additional amounts in the next two years related to the build-out of unimproved space for colocation use, depending on tenant demand; however, we currently have no commitments to do so. The cost to build out such unimproved space will vary based on the size and condition of the space.

In connection with the consummation of our IPO on November 3, 2004, our operating partnership entered into a new \$200.0 million unsecured revolving credit facility. Borrowings under the facility currently bear interest at a rate based on LIBOR plus a premium ranging from 1.375% to 1.750%, depending on our operating partnership's overall leverage, which premium was 1.625% as of March 31, 2005. The facility matures in November 2007, subject to a one-year extension option. On May 11, 2005, we amended our revolving credit agreement to permit for the expansion of the size of the facility to up to \$350.0 million at our request, subject to receipt of lender commitments and satisfaction of other conditions, and also added a \$100.0 million sub-facility for foreign exchange advances in Euros, British Sterling and Canadian Dollars. We intend to use available borrowings under the amended unsecured credit facility to, among other things, finance the acquisition of future properties (including, potentially, the right of first offer properties), to fund tenant improvements and capital expenditures, and to provide for working capital and other corporate purposes.

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

In February 2005, we completed the offering of 4.14 million shares of our 8.50% series A preferred stock for total net proceeds, after underwriting discounts and estimated expenses, of \$99.3 million, including the proceeds from the exercise of the underwriters' over-allotment option. We used the net proceeds from this offering to reduce borrowings under our unsecured credit facility, acquire two properties in March 2005 as described below and for investment and general corporate purposes.

In March 2005, we completed the acquisition of two properties, 833 Chestnut Street in Philadelphia, Pennsylvania and MAPP Building in Minneapolis, Minnesota. The aggregate purchase price for these properties was approximately \$74.6 million, which was paid from the proceeds of our offering of series A preferred stock described above along with the assumption of a \$9.7 million mortgage loan on the MAPP Building.

In March 2005, we entered into a purchase and sale agreement to acquire Lakeside Technology Center for an aggregate purchase price of approximately \$142.6 million. The seller can earn an additional \$20.0 million by obtaining a change in the real estate tax classification prior to December 31, 2006. We also entered into a separate purchase and sale agreement to acquire Printers' Square in Chicago, Illinois for an aggregate purchase price of approximately \$37.5 million. We initially

Table of Contents

intend to fund the purchase prices and the contingent fee, if applicable, with borrowings under our unsecured credit facility, or a combination of borrowings under the credit facility and secured long-term debt.

We expect to meet our long-term liquidity requirements to pay for scheduled debt maturities and to fund property acquisitions and non-recurring capital improvements with net cash from operations, future long-term secured and unsecured indebtedness and the issuance of equity and debt securities. We also may fund future property acquisitions and non-recurring capital improvements using our unsecured credit facility pending permanent financing. On May 12, 2005, we amended our revolving credit agreement to permit for an expansion of the size of the facility of up to \$350.0 million and also add a \$100.0 million sub-facility for foreign exchange advances in Euros, British Sterling and Canadian Dollars.

Distributions

We are required to distribute 90% of our REIT taxable income (excluding capital gains) on an annual basis in order to qualify as a REIT for federal income tax purposes. Accordingly, we intend to make, but are not contractually bound to make, regular quarterly distributions to preferred stockholders, common stockholders and unit holders from cash flow from operating activities. All such distributions are at the discretion of our board of directors. We may be required to use borrowings under the credit facility, if necessary, to meet REIT distribution requirements and maintain our REIT status. We consider market factors and our performance in addition to REIT requirements in determining distribution levels. Amounts accumulated for distribution to stockholders are invested primarily in interest-bearing accounts and short-term interest-bearing securities, which are consistent with our intention to maintain our status as a REIT.

On February 14, 2005, we declared a dividend on our series A preferred stock of \$0.30694 per share for the period from February 9, 2005 through March 31, 2005, which was paid on March 31, 2005 to the holders of record on March 15, 2005. The dividend is equivalent to an annual rate of \$2.125 per preferred share.

On February 14, 2005, we also declared a dividend on our common stock, and caused our operating partnership to declare a distribution on its common units and long-term incentive units, of \$0.24375 per share, covering the period from January 1, 2005 through March 31, 2005, which was paid on March 31, 2005. The dividend is equivalent to an annual rate of \$0.975 per common share and common and long-term incentive unit.

Commitments and Contingencies

The following table summarizes our contractual obligations as of March 31, 2005, including the maturities and scheduled principal on our secured debt and unsecured credit facility debt, and provides information about the commitments due in connection with our ground lease, tenant improvement and leasing commissions (in thousands):

Obligation	Remainder of				
	Total	2005	2006-2007	2008-2009	Thereafter
Long-term debt principal payments ⁽¹⁾	\$ 514,763	\$ 6,006	\$ 209,044	\$ 146,458	\$ 153,255

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

Ground lease ⁽²⁾	10,726	181	482	482	9,581
Tenant improvements and leasing commissions	2,437	2,215	222		
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total	\$ 527,926	\$ 8,402	\$ 209,748	\$ 146,940	\$ 162,836
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>

⁽¹⁾ Includes \$36.0 million of borrowings under our unsecured credit facility, which matures in November 2007.

⁽²⁾ After February 2036, rent for the remaining term of the ASM Lithography Facility ground lease will be determined based on a fair market value appraisal of the asset and, as a result, is excluded from the above information.

We are party to interest rate swap agreements with KeyBank National Association and Bank of America for approximately \$139.6 million of our variable rate debt that was outstanding as of March 31, 2005. Under these swaps, we receive variable-rate amounts in exchange for fixed-rate payments over the life of the agreements without exchange of the underlying principal amounts. See Item 3 Quantitative and Qualitative Disclosures about Market Risk.

Outstanding Consolidated Indebtedness

At March 31, 2005, we had approximately \$514.8 million of principal outstanding under long-term debt as set forth in the table below. Our ratio of debt to total market capitalization was approximately 37.4% (based on the closing price of our common stock on March 31, 2005 of \$14.37). As of March 31, 2005 approximately \$241.4 million of our outstanding long-term debt is variable rate debt; however, we have interest rate swap agreements for approximately \$139.6 million of our

Table of Contents

variable rate debt leaving \$101.8 million as unhedged variable debt. As a result, approximately 80.2% of our total indebtedness was subject to fixed interest rates and 19.8% to variable interest rates as of March 31, 2005.

The table below summarizes our debt, at March 31, 2005 (in millions):

Debt Summary:	
Fixed rate	\$ 273.4
Variable rate hedged by interest rate swaps	139.6
	<hr/>
Total fixed rate	413.0
Variable rate unhedged	101.8
	<hr/>
Total	\$ 514.8
	<hr/>
Percent of Total Debt:	
Fixed rate	80.2%
Variable rate	19.8%
	<hr/>
Total	100.0%
	<hr/>
Effective Interest Rate at End of Year	
Fixed rate	5.73%
Variable rate unhedged	6.16%
Effective interest rate	5.82%

The variable rate debt shown above bears interest at an interest rate based on 1-month, 3-month and 6-month LIBOR rates, depending on the agreement governing the debt. The debt secured by our properties at March 31, 2005 had a weighted- average term to initial maturity of approximately 5.3 years (approximately 6.0 years assuming exercise of extension options).

The following table sets forth information with respect to our indebtedness as of March 31, 2005, but does not give effect to the approximately \$139.6 million of principal subject to interest rate swap agreements (in thousands):

Properties	Interest Rate	Annual		Maturity Date	Balance at Maturity ⁽²⁾
		Principal Amount	Debt Service ⁽¹⁾

⁽¹⁾ Annual debt service for floating rate loans is calculated based on the 1-month, 3-month and 6-month LIBOR rates at March 31, 2005, which were 2.87%, 3.12% and 3.40%, respectively.

⁽²⁾ Assuming no unscheduled payments have been made on the principal in advance of its due date.

⁽³⁾ Two one-year extensions are available.

⁽⁴⁾ A 13-month extension and a one-year extension are available.

Table of Contents

- (5) Based on our hedged exchange rate of \$1.8472 to £1.00.
- (6) Subject to a 2.5% LIBOR floor.
- (7) A one-year extension option is available.
- (8) The anticipated repayment date is March 1, 2012. If the loan is not repaid by this date, the interest rate increases to the greater of 9.62% or the then treasury rate plus 2%.
- (9) The Univision Tower loan is also secured by a \$5.0 million letter of credit.
- (10) This amount represents six mortgage loans secured by our interests in 36 Northeast Second Street, Brea Data Center, Comverse Technology Building, Hudson Corporate Center, Siemens Building, and Webb at LBJ. Each of these loans are cross-collateralized by the six properties.
- (11) The interest rate under our unsecured credit facility equals either (i) LIBOR plus a margin of between 1.375% and 1.750% or (ii) the greater of (x) the base rate announced by the lender and (y) the federal funds rate, plus a margin of between 0.375% 0.750%. In each case, the margin is based on our leverage ratio.

Unsecured Credit Facility. In November 2004, we entered into a three-year, \$200.0 million unsecured revolving credit facility that expires November 3, 2007. On May 11, 2005, we amended our revolving credit agreement to permit for the expansion of the size of the facility to up to \$350.0 million at our request, subject to receipt of lender commitments and satisfaction of other conditions, and also added a \$100.0 million sub-facility for foreign exchange advances in Euros, British Sterling and Canadian Dollars. Our credit facility has a borrowing limit based upon a percentage of the value of the unsecured properties included in the facility's borrowing base. Approximately \$36.0 million was drawn under this facility and \$5.0 million was subject to an outstanding letter of credit as of March 31, 2005 and approximately \$84.9 million of this credit facility remained available pursuant to the terms of this facility at that date. We intend to fund the purchase prices of Lakeside Technology Center and Printers Square with borrowings under the credit facility or a combination of borrowings under the credit facility and secured debt. We may be required to include Lakeside Technology Center and/or Printers Square in the unsecured borrowing base in order to borrow sufficient funds under the revolving credit facility. In May 2005, we added two properties to the unsecured borrowing base increasing our availability for future borrowings to \$129.2 million as of May 13, 2005. The unsecured credit facility has a one-year extension option. The credit facility contains covenants including limitations on our and our subsidiaries' ability to incur additional indebtedness, make certain investments or merge with another company, limitations on our ability to make distributions to our stockholders and other restricted payments, and requirements for us to maintain financial coverage ratios and maintain a pool of unencumbered assets.

Off-Balance Sheet Arrangements

Our off-balance sheet arrangements consist of interest rate cap agreements in connection with certain of our indebtedness, a currency fluctuation hedge arrangement in connection with our ownership of the Camperdown House property in London, England and interest rate swap agreements with KeyBank National Association and Bank of America related to \$139.6 million of outstanding principal on our variable rate debt. See Item 3 Quantitative and Qualitative Disclosures about Market Risk.

As of March 31, 2005, GI Partners had \$1.2 million of letters of credit outstanding that secure obligations relating to two of our properties, Carrier Center and Stanford Place II. These letters of credit were initially issued in lieu of making deposits required by a local utility and in lieu of establishing a restricted cash account on behalf of a lender. We are in the process of causing these letters of credit to be transferred to us. We

Edgar Filing: Digital Realty Trust, Inc. - Form 10-Q

are currently reimbursing GI Partners for the costs of maintaining the letters of credit, which payments are less than \$5,000 per quarter. We currently have no other off-balance sheet arrangements.

Cash Flows

The following summary discussion of our cash flows is based on the consolidated and combined statements of cash flows and is not meant to be an all-inclusive discussion of the changes in our cash flows for the periods presented below.

Comparison of Three Months Ended March 31, 2005 to Three Months Ended March 31, 2004

Cash and cash equivalents were \$2.9 million and \$4.3 million at March 31, 2005 and 2004, respectively.

Net cash provided by operating activities increased \$5.1 million to \$11.7 million for the three months ended March 31, 2005 compared to \$6.6 million for the three months ended March 31, 2004. The increase was primarily due to revenues from the properties added to our portfolio which was partially offset by the increased interest expense incurred on the mortgage and other secured debt related to the acquired properties.

Net cash used in investing activities increased \$31.0 million to \$71.6 million for the three months ended March 31, 2005 compared to \$40.6 million for the three months ended March 31, 2004. The increase was primarily the result of the acquisition of two properties during the three months ended March 31, 2005, which required a larger investment than the property acquired during the three months ended March 31, 2004.

Net cash provided by financing activities increased \$25.3 million to \$58.3 million, for the three months ended March 31, 2005

compared to \$33.0 million for the three months ended March 31, 2004. The increase was primarily due to proceeds from the sale of preferred stock of \$103.5 million during the three months ended March 31, 2005 offset by costs paid related to our preferred stock offering and our IPO totaling \$4.4 million, payment of dividends and distribution totaling \$22.5 million during the three months ended March 31, 2005, net repayments of debt totaling \$17.8 million during the three months ended March 31, 2005 compared to net borrowings of \$20.6 million during the three months ended March 31, 2004 and net contributions from the owner of the Company Predecessor of \$12.5 million during the three months ended March 31, 2004.

Table of Contents**Inflation**

Substantially all of our leases provide for separate real estate tax and operating expense escalations. In addition, many of the leases provide for fixed base rent increases. We believe that inflationary increases may be at least partially offset by the contractual rent increases and expense escalations described above.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevalent market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. We do not use derivatives for trading or speculative purposes and only enter into contracts with major financial institutions based on their credit rating and other factors.

Effective November 26, 2004, we entered into interest rate swap agreements with KeyBank National Association and Bank of America for approximately \$140.3 million of our variable rate debt, of which \$139.6 million is outstanding as of March 31, 2005. As a result, approximately 80.2% of our total indebtedness was subject to fixed interest rates as of March 31, 2005. The table below summarizes the terms of these interest rate swaps and their fair values as of March 31, 2005 (in thousands):

Current

Notional	Strike			Fair
Amount	Rate	Effective Date	Expiration Date	Value
\$ 46,268	3.178%	Nov. 26, 2004	Jul. 1, 2006	\$ 344
43,000	3.250	Nov. 26, 2004	Sep. 15, 2006	396
21,510	3.754	Nov. 26, 2004	Jan. 1, 2009	429
20,000	3.824	Nov. 26, 2004	Apr. 1, 2009	431
8,775	3.331	Nov. 26, 2004	Dec. 1, 2006	93
\$139,553				\$ 1,693

If interest rates were to increase by 10%, or approximately 40 basis points, the fair value of our interest rate swaps would decrease by approximately \$1.0 million. If interest rates were to decrease by 10%, or approximately 40 basis points, the fair value of our interest rate swaps would increase by approximately \$1.0 million.

If interest rates were to increase by 10%, or approximately 40 basis points, the increase in interest expense on the unhedged variable rate debt would decrease future earnings and cash flows by approximately \$0.4 million annually. If fixed interest rates were to increase by 10%, the fair value of our \$273.4 million principal amount of outstanding fixed rate debt would decrease by approximately \$5.8 million. If interest rates were to decrease by 10%, or approximately 40 basis points, the decrease in interest expense on the unhedged variable rate debt would be approximately \$0.4 million annually. If interest rates were to decrease by 10%, the fair value of our \$273.4 million principal amount of outstanding fixed rate debt would increase by approximately \$5.7 million.

Interest risk amounts were determined by considering the impact of hypothetical interest rates on our financial instruments. These analyses do not consider the effect of any change in overall economic activity that could occur in that environment. Further, in the event of a change of that magnitude, we may take actions to further mitigate our exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, these analyses assume no changes in our financial structure.

As of March 31, 2005, our total outstanding debt was approximately \$515.7 million, which consisted of \$456.8 million of principal outstanding for mortgage loans and \$0.9 million for the debt premium on one of our mortgage loans, \$36.0 million of notes payable under our line of credit and \$22.0 million of other secured loans. Approximately \$241.4 million of our total outstanding debt was variable rate debt and after considering that \$139.6 million of such debt is hedged with interest rate swaps, our variable rate debt comprises 19.8% of our total outstanding debt. As of March 31, 2005, the fair value of our outstanding fixed-rate debt approximated \$278.5 million compared to the carrying value of \$274.3 million, comprised of \$273.4 of principal and \$0.9 million of debt premium.

We are also party to a foreign currency hedging contract with a notional value of approximately £7.9 million, which we use to convert the balance of our investment in the Camperdown House property into U.S. dollars. The fair value of this forward contract was (\$0.2) million as of March 31, 2005 using the currency exchange rate in effect as of that date. If the exchange rate of United States Dollars to Great Britain Pounds were to increase by 10%, the fair value of our forward contract would decrease by \$1.4 million to (\$1.6) million. If the exchange rate of United States Dollars to Great Britain Pounds were to decrease by 10%, the fair value of our forward contract would increase by \$1.5 million to \$1.3 million.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have adopted and maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by SEC Rule 13a-15(b), we have carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the quarter covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting that has occurred during the fiscal quarter ended March 31, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION
