NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

(1) BASIS OF PRESENTATION

The interim Condensed Consolidated Financial Statements of Newmont Mining Corporation and its subsidiaries (collectively, Newmont or the Company) are unaudited. In the opinion of management, all adjustments and disclosures necessary for a fair presentation of these interim statements have been included. The results reported in these interim Condensed Consolidated Financial Statements are not necessarily indicative of the results that may be reported for the entire year. These interim Condensed Consolidated Financial Statements should be read in conjunction with Newmont s Consolidated Financial Statements included in its Annual Report on Form 10-K for the year ended December 31, 2006, filed February 26, 2007.

References to A\$ refer to Australian currency, CDN\$ to Canadian currency, IDR to Indonesian currency and \$ to United States currency.

Certain amounts for the three months ended March 31, 2006 have been reclassified to conform to the 2007 presentation. The Company has reclassified the income statement and cash flow statement amounts for the Zarafshan-Newmont Joint Venture operation from the historical presentation to discontinued operations in the Condensed Consolidated Statements of Income and Cash Flows for all periods presented.

(2) ACCOUNTING DEVELOPMENTS Recently Adopted Pronouncements

Income Taxes

The Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, (FIN 48) an interpretation of FASB Statement No. 109, Accounting for Income Taxes on January 1, 2007. As a result of the implementation of FIN 48, the Company recognized a \$72 increase in its net liability for unrecognized income tax benefits. The beginning balance of net deferred tax assets was reduced by \$37 (primarily, as a result of utilization of foreign tax credits and net operating losses as part of the FIN 48 measurement process, offset, in part, by the impact of the interaction of the Alternative Minimum Tax rules), goodwill increased by \$5, minority interest increased by \$4, and retained earnings decreased by \$108. In addition, the Company reclassified \$16 of income tax liabilities from current to non-current liabilities because payment of cash is not anticipated within one year of the balance sheet date. At January 1, 2007, the Company had \$267 of total gross unrecognized tax benefits. Of this, \$202 represents the amount of net unrecognized tax benefits that, if recognized, would affect the Company s effective income tax rate.

The Company s continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. The Company had \$13 accrued for interest at January 1, 2007. This amount has been considered in the statement of financial position as part of the cumulative effect adjustment to retained earnings.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, various states and in foreign jurisdictions. With limited exception, the Company is no longer subject to U.S. federal, state and local income or non-U.S. income tax audits by taxing authorities for years through 1999.

Recently Issued Pronouncements

Fair Value Option for Financial Assets and Liabilities

In February 2007, the FASB issued FASB Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (FAS 159). FAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value, with the objective of improving financial reporting by mitigating volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The provisions of FAS 159 are effective for the Company's year ending December 31, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's consolidated financial position, results of operations and disclosures.

Fair Value Measurements

In September 2006, the FASB issued FASB Statement No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The provisions of FAS 157 are effective for the Company's fiscal year ending December 31, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's consolidated financial position, results of operations and disclosures.

(5) STOCK BASED COMPENSATION

The Company recognized stock options and other stock based compensation as follows:

	d March 31, 2006	
Stock options \$ 4	\$ 6	
Restricted stock 2		
Restricted stock units 1		
Deferred stock awards 2	2	
\$ 9	\$ 8	

No stock option awards were granted during the three months ended March 31, 2007 and 2006. At March 31, 2007, there was \$20 of unrecognized compensation cost related to unvested stock options. This cost is expected to be recognized over a weighted-average period of approximately 1.8 years.

For the three months ended March 31, 2007 and 2006, 141,828 and 102,491 shares of restricted stock, respectively, were granted and issued, at the weighted-average fair market value of \$45 and \$58, respectively.

For the three months ended March 31, 2007 and 2006, 20,212 and 19,181 shares of restricted stock units, respectively, were granted, at the weighted-average fair market value of \$45 and \$58, respectively, per underlying share of the Company s common stock.

No deferred stock awards were granted during the three months ended March 31, 2007 and 2006.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

(6) INCOME TAXES

The Company operates in numerous countries around the world and accordingly it is subject to, and pays annual income taxes under, the various income tax regimes in the countries in which it operates. Some of these tax regimes are defined by contractual agreements with the local government, and others are defined by the general corporate income tax laws of the country. The Company has historically filed, and continues to file, all required income tax returns and to pay the taxes reasonably determined to be due. The tax rules and regulations in many countries are highly complex and subject to interpretation. From time to time the Company is subject to a review of its historic income tax filings and in connection with such reviews, disputes can arise with the taxing authorities over the interpretation or application of certain rules to the Company s business conducted within the country involved. The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, (FIN 48) an interpretation of FASB Statement No. 109, Accounting for Income Taxes on January 1, 2007. FIN 48 clarifies the accounting and reporting for uncertainties in income tax law. The interpretation prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. Refer to Recently Adopted Pronouncements for the discussion regarding the cumulative effect of adopting FIN 48.

In December 2006, the Company entered into an in-principle heads of agreement with the Australian Taxation Office (ATO). The heads of agreement specifies the terms of a proposed settlement of the outstanding audit issues relating to Normandy for the tax years 1994-1999. The issues relate to years before the Company acquired Normandy. At the date of the business combination, Normandy had recorded no income tax liability with respect to the tax positions taken in reporting certain transactions, therefore the Company s initial best estimate of the income tax contingency relating to these issues was recorded as a tax liability at the date of acquisition, February 15, 2002, by increasing the purchase price of Normandy. At December 31, 2006, the long-term income tax liability balance relating to this proposed settlement was reclassified to current income taxes payable and remains outstanding at March 31, 2007.

DISCONTINUED OPERATIONS (7)

Discontinued operations include the Company s 50% interest in the Zarafshan-Newmont Joint Venture, expropriated by the Uzbekistan government in August 2006, and the Holloway mine sold in November 2006. The Company has reclassified the income statement results from the historical presentation to Income from discontinued operations in the Condensed Consolidated Statements of Income for all periods presented. The Condensed Consolidated Statements of Cash Flows have been reclassified for discontinued operations for all periods presented.

The following table details selected financial information included in Income from discontinued operations in the Condensed Consolidated Statements of Income:

	March	31, 2006
Sales - gold, net	\$	23
Income from operations	\$	
Income tax benefit		2
Income from discontinued operations	\$	2

(8) SALES CONTRACTS, COMMODITY AND DERIVATIVE INSTRUMENTS

For the three months ended March 31, 2007 and 2006, losses of \$2 and \$24, respectively, were included in *Other income, net* for the ineffective portion of derivative instruments designated as cash flow hedges. The amount anticipated to be reclassified from *Accumulated other comprehensive income* to income for derivative instruments during the next 12 months is a gain of approximately \$6. The maximum period over which hedged forecasted transactions are expected to occur is 4 years.

Newmont had the following derivative contracts outstanding at March 31, 2007:

	Expe	cted Maturity	Date	Fa	ir Value	
			Total/	At March 31,	At December 3	1,
	2007	2008	Average	2007	2006

⁽¹⁾ 56.25% guaranteed by Newmont, 43.75% guaranteed by an affiliate of Sumitomo Corporation, delivered in the first quarter of 2007, awaiting final settlement.

⁽²⁾ The fair value does not include amounts payable (\$20) on derivative contracts that were closed out in March 2007 with the net settlement due in April 2007.

⁽³⁾ The fair value does not include amounts payable (\$24) on derivative contracts that were closed out in December 2006 with the net settlement due and paid in January 2007.

Provisional Copper and Gold Sales

The Company s provisional copper and gold sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the copper concentrates at the forward London Metal Exchange price at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

At March 31, 2007 and 2006, Batu Hijau had the following gross revenues before treatment and refining charges subject to final price adjustments:

	A	at March 31,
	2007	2006
Gross revenue subject to final price adjustments		
Copper	\$ 386	\$ 377
Gold	\$ 33	\$ 15

The average final price adjustments realized were as follows:

Three Months Ended March 31, 2007 2006

Average final price adjustments		
Copper	(19)%	26%
Gold	2%	9%

Price-Capped Forward Sales Contracts

In 2001, Newmont entered into transactions that closed out certain call options. The options were replaced with a series of forward sales contracts requiring physical delivery of the same quantity of gold over slightly extended future periods. Under the terms of the contracts, Newmont will realize the lower of the spot price on the delivery date or the capped price, ranging from \$381 to \$392 per ounce. The initial fair value of the forward sales contracts was recorded as deferred revenue. At March 31, 2007, \$47 remained in deferred revenue and will be included in revenue as delivery occurs. The forward sales contracts are accounted for as normal sales contracts under SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities and SFAS No. 138 Accounting for

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

Certain Derivative Instruments and Certain Hedging Activities-an Amendment to SFAS No. 133. The fair value of these contracts are not included on the Condensed Consolidated Balance Sheets.

Newmont had the following price-capped forward sales contracts outstanding at March 31, 2007:

	Scheduled M	Scheduled Maturity Date or Transaction Date			ate Fair Value			
				Total/	At March 31,	At E	December 31,	
	2008	2009	2011	Average	2007		2006	
Ounces (thousands)	1,000	600	250	1,850	\$ (589)	\$	(534)	
Average price	\$ 384	\$ 381	\$ 392	\$ 384				
Interest Rate Swap Contracts								

At March 31, 2007, Newmont had \$100 fixed to floating swap contracts designated as a hedge against a portion of its \$275 8 5/8% debentures expiring in 2011. Under the hedge contract terms, the Company receives fixed-rate interest payments at 8.625% and pays floating-rate interest amounts based on periodic London Interbank Offered Rate (LIBOR) settings plus a spread, ranging from 2.60% to 3.49%. For the three months ended March 31, 2007 and 2006, these transactions had an insignificant impact on interest expense. The fair value of the interest rate swaps was \$(1) and \$1 at March 31, 2007 and December 31, 2006, respectively.

(9) INCOME PER COMMON SHARE

Basic income per common share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted income per common share is computed similarly to basic income per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potentially dilutive common shares had been issued.

	Three Months Ended Mar			arch 31,
	2	2007	2	2006
Numerator:				
Income from continuing operations	\$	68	\$	207

During the first quarter of 2007, Newmont acquired an additional interest in Gabriel Resources for approximately \$27, obtained Oxiana Ltd. shares following the acquisition of Agincourt Resources by Oxiana Ltd., recognizing a \$27 gain, and recognized a \$6 impairment of its investment in Queenstake Resources Ltd. for an other-than-temporary decline in value of marketable equity securities and warrants. During the quarter, the unrealized value of the Company s investments in marketable equity securities declined by \$128, primarily related to a decline in the value of Canadian Oil Sands Trust.

(13) INVENTORIES

(17) RECLAMATION AND REMEDIATION LIABILITIES (ASSET RETIREMENT OBLIGATIONS)

At March 31, 2007 and December 31, 2006, \$522 and \$520, respectively, were accrued for reclamation obligations relating to mineral properties in accordance with SFAS No. 143, Accounting for Asset Retirement Obligations. In addition, the Company is involved in several matters concerning environmental obligations associated with former, primarily historic, mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. At March 31, 2007 and December 31, 2006, \$81 and \$85, respectively, were accrued for such obligations. These amounts are also included in *Reclamation and remediation liabilities*.

The following is a reconciliation of the liability for asset retirement obligations:

	ee Months 2007	Ended Ma 2	rch 31, 006
Balance at beginning of period	\$ 605	\$	508
Additions, changes in estimates and other			18
Liabilities settled	(12)		(12)
Accretion expense	10		7
Balance at end of period	\$ 603	\$	521

The current portions of *Reclamation and remediation liabilities* of \$75 and \$77 at March 31, 2007 and December 31, 2006, respectively, are included in *Other current liabilities*.

(18) NET CHANGE IN OPERATING ASSETS AND LIABILITIES

Net cash (used in) provided by operating activities attributable to the net change in operating assets and liabilities is composed of the following:

	Three Months 2007	Ended March 31, 2006
Decrease (increase) in operating assets:		
Trade and accounts receivable	\$ 2	\$ (44)
Inventories, stockpiles and ore on leach pads	9	(123)
Other assets		(11)
Increase (decrease) in operating liabilities:		
Accounts payable and other accrued liabilities	(262)	16
Reclamation liabilities	(12)	(12)
	\$ (263)	\$ (174)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

(21) COMMITMENTS AND CONTINGENCIES General

The Company follows FAS No. 5, Accounting for Contingencies, in determining its accruals and disclosures with respect to loss contingencies. Accordingly, estimated loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable (greater than a 75% probability) that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Operating Segments

The Company s operating segments are identified in Note 19. Except as noted in this paragraph, all of the Company s commitments and contingencies specifically described in this Note 21 relate to the Corporate and Other reportable segment. The Nevada Operations matters under Newmont USA Limited relate to the Nevada reportable segment. The PT Newmont Minahasa Raya matters relate to the Other Operations reportable segment. The Yanacocha matters relate to the Yanacocha reportable segment. The Newmont Yandal Operations Pty Limited and the Newmont Australia Limited matters relate to the Australia/New Zealand reportable segment.

Environmental Matters

The Company s mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. The Company conducts its operations so as to protect the public health and environment and believes its operations are in compliance with applicable laws and regulations in all material respects. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures.

Estimated future reclamation costs are based principally on legal and regulatory requirements. At March 31, 2007 and December 31, 2006, \$522 and \$520, respectively, were accrued for reclamation costs relating to mineral properties in accordance with FAS No. 143, Accounting for Asset Retirement Obligations. See Note 17.

In addition, the Company is involved in several matters concerning environmental obligations associated with former mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. The Company believes that the related environmental obligations associated with these sites are similar in nature with respect to the development of remediation plans, their risk profile and the compliance required to meet general environmental standards. Based upon the Company s best estimate of its liability for these matters, \$81 and \$85 were accrued for such obligations at March 31, 2007 and December 31, 2006, respectively. These amounts are included in *Other current liabilities* and *Reclamation and remediation liabilities*. Depending upon the ultimate resolution of these matters, the Company believes that it is reasonably possible that the liability for these matters could be as much as 93% greater or 28% lower than the amount accrued at March 31, 2007. The amounts accrued for these matters are reviewed periodically based upon facts and circumstances available at the time. Changes in estimates are recorded in *Other expense, net* in the period estimates are revised.

Details about certain of the more significant matters involved are discussed below.

Dawn Mining Company LLC (Dawn) - 51% Newmont Owned

Midnite Mine Site. Dawn previously leased an open pit uranium mine, currently inactive, on the Spokane Indian Reservation in the State of Washington. The mine site is subject to regulation by agencies of the U.S. Department of Interior (the Bureau of Indian Affairs and the Bureau of Land Management), as well as the United States Environmental Protection Agency (EPA).

In 1991, Dawn s mining lease at the mine was terminated. As a result, Dawn was required to file a formal mine closure and reclamation plan. The Department of Interior commenced an analysis of Dawn s proposed plan and alternate closure and reclamation plans for the mine. Work on this analysis has been suspended indefinitely. In mid-2000, the mine was included on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). In March 2003, the EPA notified Dawn and Newmont that it had thus far expended \$12 on the Remedial Investigation/Feasibility Study under CERCLA

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

(RI/FS). In October 2005, the EPA issued the RI/FS on this property in which it indicated a preferred remedy estimated to cost approximately \$150. Newmont and Dawn filed comments on the RI/FS with the EPA in January 2006. On October 3, 2006, the EPA issued a final Record of Decision in which it formally selected the preferred remedy identified in the RI/FS.

On January 28, 2005, the EPA filed a lawsuit against Dawn and Newmont under CERCLA in the U.S. District Court for the Eastern District of Washington. The EPA has asserted that Dawn and Newmont are liable for reclamation or remediation work and costs at the mine. Dawn does not have sufficient funds to pay for the reclamation plan it proposed or for any alternate plan, or for any additional remediation work or costs at the mine. Newmont intends to vigorously contest any claims as to its liability.

Newmont cannot reasonably predict the likelihood or outcome of this lawsuit or any other action against Dawn or Newmont arising from this matter.

Dawn Mill Site. Dawn also owns a uranium mill site facility, located on private land near Ford, Washington, which is subject to state and federal regulation. In late 1999, Dawn sought and later received state approval for a revised closure plan that expedites the reclamation process at the site. The currently approved plan for the site is guaranteed by Newmont.

Idarado Mining Company (Idarado) - 80.1% Newmont Owned

In July 1992, Newmont and Idarado signed a consent decree with the State of Colorado (State), which was agreed to by the U.S. District Court of Colorado, to settle a lawsuit brought by the State under CERCLA.

Idarado agreed in the consent decree to undertake specified remediation work at its former mining site in the Telluride/Ouray area of Colorado. Remediation work at this property is substantially complete. If the remediation does not achieve specific performance objectives defined in the consent decree, the State may require Idarado to implement supplemental activities at the site, also as defined in the consent decree. Idarado and Newmont obtained a \$6 reclamation bond to secure their potential obligations under the consent decree. In addition, Idarado settled natural resources damages and past and future response costs, and agreed to habitat enhancement work under the consent decree. All of this work is substantially complete.

Newmont Capital Limited - 100% Newmont Owned

In February 1999, the EPA placed the Lava Cap mine site in Nevada County, California on the National Priorities List under CERCLA. The EPA then initiated a RI/FS under CERCLA to determine environmental conditions and remediation options at the site.

Newmont Capital, formerly known as Franco-Nevada Mining Corporation, Inc., owned the property for approximately three years from 1984 to 1986 but never mined or conducted exploration at the site. The EPA asserts that Newmont Capital is responsible for clean up costs incurred at the site. Newmont Capital and the EPA have entered into an agreement tolling the statute of limitations until December 31, 2007 to facilitate on-going settlement negotiations with respect to potential claims under CERCLA. Based on Newmont Capital s limited involvement at Lava Cap, it does not believe it has any liability for environmental conditions at the site, and intends to vigorously defend any formal claims by the EPA. Newmont cannot reasonably predict the likelihood or outcome of any future action arising from this matter.

Newmont USA Limited - 100% Newmont Owned

Pinal Creek. Newmont is a defendant in a lawsuit brought on November 5, 1991 in U.S. District Court in Arizona by the Pinal Creek Group, alleging that the company and others are responsible for some portion of costs incurred to address groundwater contamination emanating from copper mining operations located in the area of Globe and Miami, Arizona. Two former subsidiaries of Newmont, Pinto Valley Copper Corporation and Magma Copper Company (now known as BHP Copper Inc.), owned some of the mines in the area between 1983 and 1987. The court has dismissed plaintiffs claims seeking to hold Newmont liable for the acts or omissions of its former subsidiaries. Based on information presently available, Newmont believes it has strong defenses to plaintiffs remaining claims, including, without limitation, that Newmont s agents did not participate in any pollution causing activities; that Newmont s liabilities, if any, were contractually transferred to one of the plaintiffs; that

portions of plaintiffs claimed damages are not recoverable; and that Newmont s equitable share of liability, if any, would be immaterial. While Newmont has denied liability and is vigorously defending these claims, we cannot reasonably predict the final outcome of this lawsuit.

Grass Valley. On February 3, 2004, the City of Grass Valley, California brought suit against Newmont under CERCLA in the U.S. District Court for the Northern District of California. This matter involves an abandoned mine adit on property previously owned

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

by a predecessor of Newmont and currently owned by the City of Grass Valley. The complaint alleges that the adit is discharging metals-bearing water into a stream on the property, in concentrations in excess of current EPA drinking water standards. Newmont cannot reasonably predict the likely outcome of this matter.

Gray Eagle Mine Site. By letter dated September 3, 2002, the EPA notified Newmont that the EPA had expended \$3 in response costs to address environmental conditions associated with a historic tailings pile located at the Grey Eagle Mine site near Happy Camp, California, and requested that Newmont pay those costs. The EPA has identified four potentially responsible parties, including Newmont. Newmont does not believe it has any liability for environmental conditions at the Grey Eagle Mine site, and intends to vigorously defend any formal claims by the EPA. Newmont cannot reasonably predict the likelihood or outcome of any future action against it arising from this matter.

PT Newmont Minahasa Raya (PTNMR) - 80% Newmont Owned

In July 2004, a criminal complaint was filed against PTNMR, the Newmont subsidiary that operated the Minahasa mine in Indonesia, alleging environmental pollution relating to submarine tailings placement into nearby Buyat Bay. The Indonesian police detained five PTNMR employees during September and October of 2004. The police investigation and the detention of PTNMR s employees was declared illegal by the South Jakarta District Court in December 2004, but in March 2005, the Indonesian Supreme Court upheld the legality of the police investigation, and the police turned their evidence over to the local prosecutor. In July 2005, the prosecutor filed an indictment against PTNMR and its President Director, alleging environmental pollution at Buyat Bay. After the court rejected motions to dismiss the proceeding, the trial proceeded and all evidence, including that of the defense, was presented in court as of September 2006. In November 2006 the prosecution filed its charge, seeking a three-year jail sentence for PTNMR s President Director plus a nominal fine. In addition, the prosecution has recommended a nominal fine against PTNMR. The defense filed responses in January 2007, and final briefing was completed in March 2007. On April 24, 2007, the court entered its verdict acquitting PTNMR and its President Director of all charges.

On March 9, 2005, the Indonesian Ministry of the Environment filed a civil lawsuit against PTNMR and its President Director in relation to these allegations, seeking in excess of \$100 in monetary damages. In October 2005, PTNMR filed an objection to the court s jurisdiction, contending that the Government previously agreed to resolve any disputes through out-of-court conciliation or arbitration. The Court upheld PTNMR s objection and dismissed the case in November 2005. The Government filed a notice of appeal of this ruling. On February 16, 2006, PTNMR and the Government of the Republic of Indonesia signed an agreement settling the civil lawsuit. Under the terms of the agreement, the Government and PTNMR will nominate members to an independent scientific panel that will develop and implement a ten-year environmental monitoring and assessment program to make a definitive, scientific conclusion regarding the condition of Buyat Bay. PTNMR is required to fund specific remedial measures if, as a result of its mining operations, pollution has occurred. The agreement also provides for enhanced community development programs paid in the first quarter of 2007 and which was included in *Other current liabilities* at December 31, 2006. Over a ten-year period, PTNMR will contribute an additional \$18. The present value of \$13 is included in *Other long-term liabilities* at December 31, 2006. The funds will be managed by an organization governed by interested stakeholders. Accountability for the fund will be ensured through yearly reports that will be made available to the public. The transparency of the scientific panel s activities will also be assured through annual reports to the public. Pursuant to the agreement, the civil lawsuit against PTNMR has been terminated. The scientific panel held its first meeting in February 2007 and has now commenced its work program.

Independent sampling and testing of Buyat Bay water and fish, as well as area residents, conducted by the World Health Organization and the Australian Commonwealth Scientific and Industrial Research Organization, confirm that PTNMR has not polluted the Buyat Bay environment, and, therefore, has not adversely affected the fish in Buyat Bay or the health of nearby residents. The Company remains steadfast that it has not caused pollution or health problems and will continue to vigorously defend itself against these allegations.

Resurrection Mining Company (Resurrection) - 100% Newmont Owned

Newmont, Resurrection and other defendants were named in lawsuits filed by the State of Colorado under CERCLA in 1983, which were subsequently consolidated with a lawsuit filed by EPA in 1986. These proceedings sought to compel the defendants to remediate the impacts of pre-existing, historic mining activities near Leadville, Colorado, which date back to the mid-1800s, and which the government agencies claim were causing substantial environmental problems in the area.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

In 1988 and 1989, the EPA issued administrative orders with respect to one area on the site and the defendants have collectively implemented those orders by constructing a water treatment plant, which was placed in operation in early 1992. Remaining remedial work for this area consists of water treatment plant operation and continuing environmental monitoring and maintenance activities. Newmont and Resurrection are currently responsible for 50% of these costs, but their share of such costs could increase in the event other defendants become unable to pay their share of such costs. On August 9, 2005, ASARCO LLC, the party responsible for the other 50% of these costs, filed for Chapter 11 bankruptcy in the United States Bankruptcy Court for the Southern District of Texas. The company is evaluating the effect that the ASARCO bankruptcy could have on its obligations.

The parties also have entered into a consent decree with respect to the remaining areas at the site, which apportions liabilities and responsibilities for these areas. The EPA has approved remedial actions for selected components of Resurrection s portion of the site, which were initiated in 1995. The EPA has not yet selected the final remedy for the site. Accordingly, Newmont cannot yet determine the full extent or cost of its share of the remedial action that will be required. The government agencies may also seek to recover for damages to natural resources. In March 1999, the parties entered into a Memorandum of Understanding (MOU) to facilitate the settlement of natural resources damages claims under CERCLA for the upper Arkansas River Basin. In January 2004, an MOU report was issued that evaluated the extent of natural resource damages and possible restoration activities that might be required, which Resurrection and other parties could potentially be required to fund.

Other Legal Matters

Minera Yanacocha S.R.L. (Yanacocha) - 51.35% Newmont Owned

Choropampa. In June 2000, a transport contractor of Yanacocha spilled approximately 151 kilograms of elemental mercury near the town of Choropampa, Peru, which is located 53 miles (85 kilometers) southwest of the Yanacocha mine. Elemental mercury is not used in Yanacocha s operations but is a by-product of gold mining and was sold to a Lima firm for use in medical instruments and industrial applications. A comprehensive health and environmental remediation program was undertaken by Yanacocha in response to the incident. In August 2000, Yanacocha paid under protest a fine of 1,740,000 Peruvian soles (approximately \$0.5) to the Peruvian government. Yanacocha has entered into settlement agreements with a number of individuals impacted by the incident. As compensation for the disruption and inconvenience caused by the incident Yanacocha entered into agreements with and provided a variety of public works in the three communities impacted by this incident. Yanacocha cannot predict the likelihood of additional expenditures related to this matter.

Yanacocha, various wholly-owned subsidiaries of Newmont, and other defendants have been named in lawsuits filed by approximately 1,100 Peruvian citizens in Denver District Court for the State of Colorado. These actions seek compensatory damages based on claims associated with the elemental mercury spill incident. In February 2005, Yanacocha and the various Newmont defendants answered the complaint in the Denver District Court. The parties in these cases have agreed to submit these matters to binding arbitration.

Additional lawsuits relating to the Choropampa incident were filed against Yanacocha in the local courts of Cajamarca, Peru, in May 2002 by over 900 Peruvian citizens. A significant number of the plaintiffs in these lawsuits entered into settlement agreements with Yanacocha prior to filing such claims. In September 2006, the Peruvian Supreme Court issued contradictory opinions on the validity of these settlement agreements. Subsequent lower court decisions have upheld the validity of these settlement agreements, discharging a number of the lawsuits. In 2005, Yanacocha entered into settlement agreements with approximately 350 additional plaintiffs.

Neither Newmont nor Yanacocha can reasonably predict the final outcome of any of the above-described lawsuits.

Conga. Yanacocha is involved in a dispute with the Provincial Municipality of Celendin regarding the authority of that governmental body to regulate the development of the Conga project. In the fourth quarter of 2004, the Municipality of Celendin enacted an ordinance declaring the area around Conga to be a mining-free reserve and naturally protected area. Yanacocha has challenged this ordinance on the grounds that, under Peruvian law, local governments lack authority to create such areas and deny the rights granted by Yanacocha s mining concessions. Based on legal precedent established by Peru's Constitutional Tribunal, it is reasonable to believe that Yanacocha s mining rights will be upheld.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

Yanacocha has carefully evaluated the social issues and dynamics of the communities in and around the area of Conga. Yanacocha has engaged in extensive community and external affairs efforts at this early stage of the Conga project. It is Yanacocha s current assessment that a significant percentage of the population in the communities immediately surrounding the Conga area support the project. Yanacocha will continue to engage actively with these communities during the process of permitting the project, and will expand its outreach efforts to communities in the surrounding region. It will continually monitor and evaluate conditions in the area and any resulting impact on Yanacocha s ability to successfully permit and develop the Conga project.

Newmont Mining Corporation

On June 8, 2005, UFCW Local 880 Retail Food Employers Joint Pension Fund filed a putative class action in the federal district court in Colorado purportedly on behalf of purchasers of Newmont Mining Corporation (Newmont) publicly traded securities between July 28, 2004 and April 26, 2005. The action named Newmont, Wayne W. Murdy, Pierre Lassonde and Bruce D. Hansen as defendants. Substantially similar purported class actions were filed in the same court on June 15, 2005 by John S. Chapman and on June 20, 2005 by Zoe Myerson. In November 2005, the court consolidated these cases and, in March 2006, appointed a lead plaintiff. In April 2006, the lead plaintiff filed a consolidated amended complaint naming David Francisco, Russell Ball, Thomas Enos and Robert Gallagher as additional defendants. It alleged, among other things, that Newmont and the individual defendants violated certain antifraud provisions of the federal securities laws by failing to disclose alleged operating deficiencies and sought unspecified monetary damages and other relief. On October 20, 2006, the lead plaintiff, on behalf of a settlement class consisting of all purchasers of Newmont securities from November 1, 2003, through and including March 23, 2006 (except defendants and certain related persons), entered into a Stipulation of Settlement with defendants. If approved by the Court, the Settlement (a) would release all claims asserted, or that could have been asserted, in the action; (b) would provide for a payment by Newmont of \$15 to be distributed to class members pursuant to a plan of allocation developed by the lead plaintiff; and (c) would provide that all defendants deny any wrongdoing or liability with respect to the settled matters. The parties have moved for preliminary approval of the settlement, but the court has not ruled on the motion. Gideon Minerals, U.S.A., Inc. ("Gideon") has sought to intervene to bring a claim alleging that Gideon has an interest in the Batu Hijau operation in Indonesia; the court has denied that motion. Gideon subsequently filed a substantially similar motion and moved for default judgment; the court has also denied this motion and has required Gideon to show cause as to why it should not be sanctioned in relation to its filings.

On June 14, 2005, June 30, 2005 and July 1, 2005, purported derivative actions were filed, on behalf of Newmont, by Doris Staehr, Frank J. Donio and Jack G. Blaz, respectively, in the federal district court in Colorado against certain of Newmont s current and former directors and officers. Each action alleged that certain defendants breached their fiduciary duties by engaging in insider trading and misappropriation of information, and that all defendants breached their fiduciary duties and engaged in conduct that constituted abuse of control, gross mismanagement, waste of corporate assets and unjust enrichment in connection with, among other things, failing to disclose alleged operating deficiencies and failing to prevent alleged violations of environmental laws in Indonesia. The plaintiffs seek, on behalf of Newmont, among other remedies, all damages sustained by the Company as a result of the allegedly improper conduct. In November 2005, the court consolidated these cases and in December 2005 the court appointed a lead plaintiff. On April 10, 2006, the lead plaintiff filed a consolidated amended complaint. This action has been administratively closed without prejudice to any party filing a motion to reopen prior to June 19, 2007. The defendants deny the claims made and, should the case be re-opened, intend to vigorously defend against them. The Company cannot reasonably predict the final outcome of these cases. In a related development, on January 13, 2006, a purported Newmont shareholder sent to the Board of Directors a letter demanding the Company take action against the defendants in the purported derivative actions with respect to the matters alleged in the derivative complaints. The Board has taken the demand under consideration. Counsel for plaintiffs in the derivative actions, counsel for the demanding shareholder and the Company have agreed to settle the action and related disputes on the basis of certain revisions to the Company's corporate governance arrangements, and an attorneys' fee to be paid by the Company. This settlement is subject to court approval.

Newmont Yandal Operations Pty Ltd (NYOL) 100% Newmont Owned

On September 3, 2003, J. Aron & Co. commenced proceedings in the Supreme Court of New South Wales (Australia) against NYOL, its subsidiaries and the administrator in relation to the completed voluntary administration of the NYOL group. J. Aron & Co., an NYOL creditor, initially sought injunctive relief that was denied by the court on September 8, 2003. On October 30, 2003, J. Aron & Co. filed a statement of claim alleging various deficiencies in the implementation of the voluntary administration process and seeking damages and other relief against NYOL and other parties. Newmont cannot reasonably predict the final outcome of this lawsuit.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

Zarafshan-Newmont Joint Venture 50% Newmont Owned

In June 2006, an economic court in Uzbekistan ruled in favor of tax authorities and against the Zarafshan-Newmont Joint Venture (ZNJV), which is 50% owned by the Company, on two claims to collect approximately \$48 in taxes other than income taxes. The tax authorities argued that Decree 151, which protected ZNJV from changes in tax laws and provided other financial and operational benefits, became ineffective and that the taxes and penalties claimed were owed for the period 2002-2005. Decree 151 had been granted by the Republic of Uzbekistan in 1992 as an incentive for the Company s investment in ZNJV. The benefits it provided, including the stability of the tax and legal regime in effect at that time, were guaranteed to remain in effect for so long as ZNJV had ongoing operations.

On July 26, 2006, the Republic of Uzbekistan caused the seizure of gold, silver and unfinished product belonging to ZNJV. On August 14, 2006, the Company received notice that the economic court had accepted the petition of an agency of the Republic of Uzbekistan to institute a bankruptcy proceeding against ZNJV. Neither ZNJV nor the Company received advance notice that the petition was filed or that a hearing would be held. The court ordered supervisory measures restricting normal operations, including the export of gold or repayment of loans, without the approval of a court-appointed temporary administrator, who has been overseeing all operations of ZNJV.

At a September 19, 2006 meeting of the ZNJV creditor s committee, which was principally composed of government representatives, the committee voted to liquidate ZNJV. On September 29, 2006, the economic court concluded that ZNJV was insolvent and ordered ZNJV to be liquidated by December 29, 2006. At this hearing, representatives of ZNJV and the Company were denied an opportunity to present the case against liquidation. The remaining assets of ZNJV are anticipated to be liquidated to pay the tax liabilities that have been imposed on ZNJV by the Republic of Uzbekistan, resulting in the effective transfer to the Republic of Uzbekistan of the Company s interest in ZNJV. The liquidation sale has been postponed three times, and is now scheduled for May 2007. Despite the Company s demands for compensation for the losses it has suffered, the Republic of Uzbekistan has refused to provide such compensation. On October 31, 2006, the Company filed demands for arbitration against the Republic of Uzbekistan in two separate international venues on the basis that the Republic of Uzbekistan repudiated its obligations to the Company under Decree 151, Uzbek and international law, and various agreements. The Uzbekistan parties to the joint venture agreement are also named as defendants in one of these proceedings. The Company and the defendants have appointed the arbitrators for both proceedings. At September 30, 2006, the Company wrote off the book value of its ownership interest in ZNJV. The ultimate outcome of this matter cannot be determined at this time.

Other Commitments and Contingencies

Tax contingencies are provided for under FIN 48. See Notes 2 and 6.

In a 1993 asset exchange, a wholly-owned subsidiary transferred a coal lease under which the subsidiary had collected advance royalty payments totaling \$484. From 1994 to 2018, remaining advance payments under the lease to the transferee total \$390. In the event of title failure as stated in the lease, this subsidiary has a primary obligation to refund previously collected payments and has a secondary obligation to refund any of the \$390 collected by the transferee, if the transferee fails to meet its refund obligation. The subsidiary has title insurance on the leased coal deposits of \$240 covering the secondary obligation. The Company and the subsidiary regard the circumstances entitling the lessee to a refund as remote.

The Company has minimum royalty obligations on one of its producing mines in Nevada for the life of the mine. Amounts paid as a minimum royalty (where production royalties are less than the minimum obligation) in any year are recoverable in future years when the minimum royalty obligation is exceeded. Although the minimum royalty requirement may not be met in a particular year, the Company expects that over the mine life, gold production will be sufficient to meet the minimum royalty requirements. Minimum royalty payments payable are \$8 for 2007, \$13 for 2008, \$2 in 2009 and 2010, \$18 in 2011 and \$98 thereafter.

As part of its ongoing business and operations, the Company and its affiliates are required to provide surety bonds, bank letters of credit and bank guarantees as financial support for various purposes, including environmental reclamation, exploration permitting, workers compensation programs and other general corporate purposes. At March 31, 2007 and December 31, 2006, there were \$475 and \$445, respectively, of outstanding letters of credit, surety bonds and bank guarantees. The surety bonds, letters of credit and bank guarantees reflect fair value as a condition of their underlying purpose and are subject to fees competitively determined in the market place. The obligations associated with these instruments are generally related to performance requirements that the Company addresses through its ongoing operations. As the specific

requirements are met, the beneficiary of the associated instrument cancels and/or returns the instrument to the issuing entity. Certain of these instruments are associated with operating sites with long-lived

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)

(dollars in millions, except per share, per ounce and per pound amounts)

assets and will remain outstanding until closure. Generally, bonding requirements associated with environmental regulation are becoming more restrictive. In addition, the surety markets for certain types of environmental bonding used by the Company have become increasingly constrained. The Company, however, believes it is in compliance with all applicable bonding obligations and will be able to satisfy future bonding requirements, through existing or alternative means, as they arise.

Under the Batu Hijau Contract of Work with the Indonesian government, beginning in 2005, and continuing through 2010, a portion of each foreign shareholders equity interest in the project must be offered for sale to the Indonesian government or to Indonesian nationals. The price at which such interest must be offered for sale to the Indonesian parties is the highest of the then-current replacement cost, the price at which shares of the project company would be accepted for listing on the Jakarta Stock Exchange, or the fair market value of such interest in the project company as a going concern. Pursuant to this provision of the Batu Hijau Contract of Work, it is possible that the ownership interest of the Newmont/Sumitomo partnership in Batu Hijau could be reduced to 49% by the end of 2010.

A company owned by an Indonesian national currently owns a 20% equity interest in Batu Hijau, and the Newmont/Sumitomo partnership was required to offer a 3% interest in 2006. An offer to sell a 3% interest was made to the government of Indonesia. While the central government declined to participate, local governments in the area in which the mine is located have expressed interest in acquiring shares, as have various Indonesian nationals. The Newmont/Sumitomo partnership continues discussions with various interested parties to meet its divestiture obligations. Under the terms of the Contract of Work, an additional 7% interest in Batu Hijau was offered for sale in March 2007 to the government of Indonesia.

Newmont is from time to time involved in various legal proceedings related to its business. Except in the above-described proceedings, management does not believe that adverse decisions in any pending or threatened proceeding or that amounts that may be required to be paid by reason thereof will have a material adverse effect on the Company s financial condition or results of operations.

(22) SUPPLEMENTARY DATA

Ratio of Earnings to Fixed Charges

The ratio of earnings to fixed charges for the three months ended March 31, 2007 was 5.8. The ratio of earnings to fixed charges represents income from continuing operations before income tax expense, minority interest and equity income of affiliates, divided by interest expense. Interest expense includes amortization of capitalized interest and the portion of rent expense representative of interest. Interest expense does not include interest on income tax liabilities. The computation of the ratio of earnings to fixed charges can be found in Exhibit 12.1.

(23) SUBSEQUENT EVENT

Revolving Credit Facility

Effective April 24, 2007, the Company renegotiated the terms of its uncollateralized \$1,250 revolving credit facility, increasing the facility amount to \$2,000 and extending the maturity date to April 2012.

Buyat Bay

On April 24, 2007, an Indonesian court ruled that PTNMR and its President Director Richard Ness were innocent of all criminal charges of pollution and regulatory violations. The court further found that the Company was in compliance with all regulations and permits during its eight years of operations from 1996 to 2004.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

(dollars in millions, except per share, per ounce and per pound amounts).

The following discussion provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Newmont Mining Corporation and its subsidiaries (collectively, Newmont or the Company). References to A\$ refer to Australian currency, CDN\$ to Canadian currency, IDR to Indonesian currency and \$ to United States currency.

This item should be read in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report.

⁽²⁾ Before treatment and refining charges but after hedge losses.

⁽³⁾ Excludes depreciation, depletion and amortization.

Consolidated Financial Results

Newmont s income from continuing operations for the three month period ended March 31, 2007 was \$68, or \$0.15 per share. Results for the first three months of 2007 compared to 2006 were impacted by fewer gold ounces sold and higher operating costs, partially offset by higher realized gold and copper prices, higher copper pounds sold, the gain realized on the exchange of Agincourt Resources equity securities for Oxiana Ltd. equity securities and the commencement of operations at the Ahafo mine in August 2006.

Sales gold, net for the first quarter of 2007 increased \$48, or 5%, compared to the first quarter of 2006 as higher realized prices more than offset lower ounces sold. The following analysis summarizes the change in consolidated gold sales revenue:

	Three Months Ended Mar 2007 20			
Consolidated gold sales:				
Gross	\$ 1,049	\$	998	
Less: Treatment and refining charges	(6)		(3)	
Net	\$ 1,043	\$	995	
Consolidated gold ounces sold (thousands):				
Gross	1,605		1,809	
Less: Incremental start-up sales			(14)	
Net	1,605		1,795	
Average realized price (per ounce):				
Before treatment and refining charges	\$ 653	\$	556	
After treatment and refining charges	\$ 649	\$	554	
e in consolidated gold sales is due to:				

The change in consolidated gold sales is due to:

	Three Months Ended March 31, 2007 vs. 2006
Reduction in consolidated ounces sold	\$ (106)
Increase in average realized gold price	157
Increase in treatment and refining charges	(3)
	\$ 48

Sales copper, net for the first quarter of 2007 increased \$76, or 55%, compared to the first quarter of 2006 primarily due to higher realized prices and increased sales volumes. Hedge losses recognized during the first quarter of 2007 were lower than the first quarter of 2006 as the final deliveries were made under copper collar contracts. At March 31, 2007, 13 million pounds delivered under the contracts remain subject to final settlement. In the first quarter of 2006, a loss of \$23 was included in *Other income, net* for the ineffective portion of copper hedges. For a complete discussion regarding variations in gold and copper volumes, see *Results of Consolidated Operations* below.

The following analysis summarizes the change in consolidated copper sales revenue:

	e Months E 007	arch 31, 006
Consolidated copper sales:		
Gross before hedging	\$ 245	\$ 176
Hedging loss	(1)	(95)
Provisional pricing mark-to-market gain	6	87
Gross after hedging	250	168
Less: Treatment and refining charges	(37)	(31)
Net	\$ 213	\$ 137

Consolidated copper pounds sold (millions)	91	81
Average realized price (per pound):		
Gross before hedging	\$ 2.68	\$ 2.18
Hedging loss	(0.01)	(1.18)
Provisional pricing mark-to-market gain	0.07	1.08
Gross after hedging	2.74	2.08
Less: Treatment and refining charges	(0.41)	(0.38)
Net	\$ 2.33	\$ 1.70

The change in consolidated copper sales is due to:

	Three Moni Ended March 31 2007 vs. 20	,
Increase in consolidated pounds sold	\$	22
Increase in average realized copper price	(60
Increase in treatment and refining charges		(6)
	\$	76

The following is a summary of net gold and copper sales:

Copper Batu Hijau, Indonesia	\$	213	\$	137
Datu Injau, muonesia	ф	213	φ	137

Costs applicable to sales increased \$182 for gold and \$63 for copper for the first quarter of 2007 compared to the first quarter of 2006, as detailed in the table below. The increase in the first quarter of 2007 is primarily due to new operations at Ahafo and Phoenix and Leeville in Nevada, increased input commodity prices, higher labor costs, higher waste removal costs and unfavorable exchange rate movements in the Australian dollar. For a complete discussion regarding variations in operations, see *Results of Consolidated Operations* below.

The following is a summary of Costs applicable to sales, excluding depreciation, depletion and amortization:

	Three Months Ended M 2007	Iarch 31, 2006

	16	21
	\$ 676 \$	494
Copper		
Batu Hijau, Indonesia	\$ 128 \$	65

Depreciation, depletion and amortization (DD&A) increased for the first quarter of 2007 compared to the first quarter of 2006 as detailed in the table below, and primarily relates to increases from new operations at Ahafo and Phoenix and Leeville in Nevada, sales of inventory in Australia/NewZealand and the expansion of the mining fleet at Batu Hijau in the later half of 2006. Newmont expects 2007 DD&A to be approximately \$800 to \$865.

The following is a summary of Depreciation, depletion and amortization:

	Three Months 2007	s Ended March 31 2006		
Nevada, USA	\$ 55	\$ 36

	5	5		
Other:				
Exploration		1		
Merchant Banking	4	5		
Corporate and Other	6	3		
	10	ç		
	\$ 192	\$ 140		

Exploration increased \$7, or 21% for the first quarter of 2007 compared to the first quarter of 2006. The increase was primarily a result of spending at the Fort a la Corne diamond joint venture in Canada and increased spending in Nevada. Newmont expects 2007 *Exploration* expense to be approximately \$170 to \$175.

Advanced projects, research and development and General and administrative expenses remained constant for the first quarter of 2007 compared to the first quarter of 2006. Newmont expects 2007 Advanced projects, research and development expenses to be approximately \$85 to \$100 and General and administrative expenses to be approximately \$155 to \$165.

Other expense, net increased by \$8 for the first quarter of 2007 compared to the first quarter of 2006. The increase is primarily due to a \$5 loss on an unfavorable natural gas supply agreement for the Company s power plant in Western Australia.

Other income, net for the first quarter of 2007 and 2006 is summarized as follows:

	Three Months E 2007	nded March 31, 2006
Gain on investments, net	\$ 27	\$ 1
Royalty and dividend income	31	29
Interest income	13	19
Income from development projects, net		4
Loss on ineffective portion of derivative instruments, net	(2)	(24)
Foreign currency exchange (losses) gains, net	(5)	3
Other	3	3
	\$ 67	\$ 35

Gain on investments, net includes a \$27 gain resulting from Oxiana Ltd. shares obtained following the acquisition of Agincourt Resources by Oxiana Ltd., a \$6 gain on the sale of other investments offset by a \$6 write-down of the Company s investment in Queenstake Resources Ltd.

Interest income decreased in 2007 due to a reduction in funds available for investment, partially offset by a higher return on funds invested.

Income from development projects in 2006 included revenue net of incremental operating costs incurred prior to commencement of commercial production at the Leeville and Phoenix operations in Nevada during the fourth quarter of 2006.

Loss on ineffective portion of derivative instruments, net included \$2 for the ineffective portion of interest rate swap derivative instruments designated as cash flow hedges in 2007. In 2006, the losses included \$23 for the ineffective portion of copper collar contracts and \$1 for interest rate swap derivative instruments each designated as cash flow hedges.

Interest expense, net increased in 2007 due to \$200 debt issued at Yanacocha during 2006 and \$3 lower capitalized interest. Capitalized interest decreased as a result of the completion of the Ahafo, Phoenix and Leeville development projects in 2006. Newmont expects 2007 *Interest expense, net* to be approximately \$95 to \$105.

Income tax expense during the first quarter of 2007 was \$62 compared to \$37 during the first quarter of 2006. The effective tax rate for the first quarter of 2007 was 33% compared to 11% for the first quarter of 2006. The 22% increase over the 2006 first quarter rate primarily relates to the following non-recurring discrete items occurring in 2006; (i) the Australian tax functional currency election, (ii) Ghanaian tax rate change, and (iii) the valuation allowance release on foreign tax credits. The effective tax rate in the first quarter of 2007 is different from the United States statutory rate of 35% primarily due to (i) U.S. percentage depletion, (ii) the valuation allowance release relative to the Company s deferred tax asset for capital losses in Australia, and (iii) the effect of different income tax rates in countries where earnings are indefinitely reinvested. The effective tax rate in 2006 is different from the United States statutory rate of 35% primarily due to (i) U.S. percentage depletion, (ii) the valuation allowance release relative to the Company s deferred tax asset for capital losses in Australia, and (iii) the effect of different income tax rates in countries where earnings are indefinitely reinvested. The effective tax rate in 2006 is different from the United States statutory rate of 35% primarily due to (i) U.S. percentage depletion, (ii) additional tax benefits associated with the change in Australian tax law regarding the ability of the company to file consolidated income tax returns, and (iii) the valuation allowance release relative to the Company s deferred tax assets for post-retirement benefit obligations, the latter two being discrete non-recurring items. For a complete discussion of the factors that influence the Company s effective tax rate, see Management s Discussion and Analysis of Results of Operations and Financial Condition in Newmont s Annual Report on Form 10-K for the year ended December 31, 2006, filed February 26, 2007. Newmont expects the 2007 full year tax rate to

In December 2006, the Company entered into an in-principle heads of agreement with the Australian Taxation Office (ATO). The heads of agreement specifies the terms of a proposed settlement of the outstanding audit issues relating to Normandy for the tax years 1994-1999. These issues relate to years before the Company acquired Normandy. At the date of the business combination, Normandy had recorded no income tax liability with respect to the tax positions taken in reporting certain transactions, therefore the Company s initial best estimate of the income tax contingency relating to these issues was recorded as a tax liability at the date of acquisition, February 15, 2002, by increasing the purchase price of Normandy. At December 31, 2006, the long-term income tax liability balance relating to this proposed settlement was reclassified to current income taxes payable and remains outstanding at March 31, 2007.

The *Income from discontinued operations* in 2006 resulted from the Holloway and Zarafshan gold operations being discontinued from sale and expropriation, respectively. The Company reclassified the income statement results from the historical presentation to discontinued operations in the Condensed Consolidated Statements of Income for all periods presented (see Note 7 to the Condensed Consolidated Financial Statements).

⁽¹⁾ Includes 14 ounces in 2006 from Phoenix and Leeville start-up activities which are not included in *Revenue*, *Costs applicable to sales* and *Depreciation, depletion and amortization* per ounce calculations.

⁽²⁾ Excludes depreciation, depletion and amortization.

⁽³⁾ Consolidated gold ounces or copper pounds sold includes minority interests share.

Consolidated gold ounces sold decreased 11% in the first quarter of 2007 from 2006, primarily due to lower production at Yanacocha, partially offset by the commencement of operations at Ahafo in the third quarter of 2006 and Phoenix and Leeville in Nevada during the fourth quarter of 2006.

Consolidated copper pounds sold increased 12% in the first quarter of 2007 from 2006, primarily due to increased mill throughput, partially offset by lower recovery at Batu Hijau.

Costs applicable to sales per consolidated gold ounce sold increased 53% in the first quarter of 2007 from 2006, primarily due to the decrease in production, higher waste removal costs at Nevada, Yanacocha, Batu Hijau and Kalgoorlie (Australia/New Zealand) and high operating costs at Phoenix in Nevada. Also, the strengthening of the Australian dollar increased Consolidated *Costs applicable to sales* by \$6 per ounce in the first quarter of 2007 compared to 2006. *Costs applicable to sales* per consolidated copper pound increased 73% in the first quarter of 2007 from 2006, primarily due to the increase in waste removal costs at Batu Hijau.

The Company expects consolidated gold sales of approximately 6.1 to 6.6 million ounces in 2007, primarily as a result of lower production from Yanacocha and Australia, as well as the completion of mining at Lone Tree in Nevada and lower remnant production from Golden Giant (Other operations). *Costs applicable to sales* per ounce for the full year in 2007 are expected to be approximately 25% higher than 2006, primarily from lower production at Yanacocha and Australia, as well as higher labor, consumables and energy prices in all operating regions. Additionally, continued operating difficulties at Phoenix, unfavorable exchange rate movements in Australia and potential power interruptions in Ghana could negatively impact the Company s *Costs applicable to sales* in 2007.

The Company expects consolidated copper sales of approximately 400 to 435 million pounds of copper in 2007 at *Costs applicable to sales* of approximately \$1.10 to \$1.20 per pound.

Nevada Operations

Depreciation, Depletion

	2007	2006	2	2007	2	2006		2007		2006	
	(in thousands)		(\$ per ounce)				(\$ per	per ounce)			
Three months ended March 31,	560	535	\$	493	\$	395	\$	98	\$	68	

(1) Includes 14 incremental start-up ounces in 2006.

⁽²⁾ Excludes depreciation, depletion and amortization.

Gold ounces sold in Nevada increased 5% in the first quarter of 2007 from 2006. Gold sales increased with the commencement of commercial production at Phoenix and Leeville in October of 2006. Open pit and underground ore mined increased to 11.1 million tons in the first quarter of 2007, up from 9.1 million tons in the first quarter of 2006. Mining at Phoenix and Leeville contributed to the increase in ore mined. Ore milled increased to 6.2 million tons from 3.6 million tons in the first quarter of 2006, although milled ore

grade decreased 28% with the processing of lower grade ore from Phoenix. Ore placed on leach pads decreased by 49% due to the completion of mining at Lone Tree in 2006 and fewer leach ore tons were processed at Carlin in the first quarter of 2007, as the ore mined contained a higher proportion of mill ore. Stockpile processing at the Lone Tree mill continued in the first quarter of 2007 and is expected to continue throughout the remainder of 2007. Incorporating the first quarter results summarized above, the Company continues to expect gold sales in Nevada of approximately 2.35 to 2.55 million ounces for 2007.

Phoenix optimization remains the primary risk influencing Nevada s gold sales and *Costs applicable to sales* outlook for the year. During the quarter, Phoenix experienced lower than expected ore grade, tailings line restrictions, harder than anticipated ore and lower mill availability. The Company continues to evaluate solutions to address metallurgical and startup challenges related to oxide and transitional ores at Phoenix. Higher grades, throughput and recovery opportunities exist throughout the rest of the Nevada complex, particularly as Leeville continues to ramp up and as Twin Creeks begins mining ore from recently accessed laybacks.

Nevada s Costs applicable to sales per ounce increased 25% from \$395 in the first quarter of 2006 to \$493 per ounce in the first quarter of 2007. Higher cost production from Phoenix contributed to the increase in operating costs. Waste removal costs also increased due to accelerated mining at Pete, Gold Quarry and Twin Creeks. Costs for underground contracted services also increased at Leeville and Carlin East. Labor and input commodity cost escalation continued to impact operating costs. *Depreciation, depletion and amortization* per ounce increased 44% from the first quarter of 2006 as a result of increased investment in new equipment and facilities in 2006.

The Company continues to expect *Costs applicable to sales* of approximately \$375 to \$400 per ounce for 2007, provided that the current oxide and transitional ore issues at Phoenix are resolved. Unit costs during the first quarter of 2007 were above the expected range as a result of the higher cost production and lower by-product credits at Phoenix, as well as continued deployment of higher cost contracted underground and maintenance services. Contractor expenses are expected to decrease as Newmont employees are deployed for the remainder of the year. Ongoing challenges at Phoenix could result in *Costs applicable to* sales per ounce above the expected range for the year. During the second quarter of 2007, *Costs applicable to sales* per ounce will be temporarily impacted by the regularly planned annual maintenance at Mill 6. Potentially higher grades, improving throughput and increased recoveries at Leeville and Twin Creeks provide cost enhancement opportunities for the remainder of 2007.

Construction of the 200-megawatt coal-fired power plant was approximately 55% complete at March 31, 2007 and remains on schedule for completion in 2008. Anticipated capital costs for the power plant are expected to be between \$620 and \$640.

Yanacocha Operations

	Gold Ounces Sold ⁽¹⁾ Costs Applicable to Sales ⁽²⁾					Depreciation, Depletion and Amortization				
	2007	2006	2	007	20)06	20	007	20	006
	(in thousands)		(\$ per ounce)				(\$ per ounce)			
Three months ended March 31,	455	770	\$	310	\$	161	\$	93	\$	56

⁽¹⁾ Consolidated gold ounces sold includes minority interests share (51.35% Newmont owned).

⁽²⁾ Excludes depreciation, depletion and amortization.

As expected, consolidated gold sales at Yanacocha decreased 41% in the first quarter of 2007 from the first quarter of 2006. Ore mined and placed on the leach pads decreased to 16.5 million tons in the first quarter of 2007 from 31.1 million tons in the first quarter of 2006. During the same periods, the amount of waste material mined increased to 29.7 million tons from 19.3 million tons as expected in the mine plan. Leached ore grade also decreased by 63% from 0.035 to 0.013 ounces per ton in the first quarter of 2007.

The Company continues to expect consolidated gold sales of approximately 1.5 to 1.6 million ounces for 2007. Higher than anticipated gold sales during the first quarter of 2007 resulted from sales of inventory on hand at year-end. Yanacocha s gold sales for the remainder of the year could be adversely impacted by potentially higher waste removal rates and lower ore grades, while opportunities exist for inventory reductions and increased recoveries during the remainder of the year at La Quinua and Carachugo deposits.

Costs applicable to sales per ounce increased in the first quarter of 2007 to \$310 per ounce from \$161 per ounce in the first quarter of 2006, primarily due to higher waste removal, lower production and rising labor costs. Consumption of fuel, cyanide, chemicals and reagents decreased from the first quarter of 2006 as the volume of tons mined and placed on leach pads declined. The Company continues to expect *Costs applicable to sales* of approximately \$340 to \$360 per ounce for the full year. Increased recoveries could result in *Costs applicable to sales* per ounce towards the lower end of the expected range for the full year.

Construction of the gold mill at Yanacocha was approximately 56% complete at March 31, 2007. Progress on the gold mill continues as expected, with costs expected to be between \$250 and \$270 with completion anticipated by mid-2008.

The collective bargaining agreement at Yanacocha expired in February 2007. Most employees covered by this contract continue to work while a new agreement is currently being negotiated.

Total/Weighted-Average	332	333	\$	519	\$	384	\$	107	\$	79

⁽¹⁾ Excludes depreciation, depletion and amortization.

Australia/New Zealand gold sales were essentially unchanged in the first quarter 2007 compared to 2006, primarily due to inventory sales and increased production at Pajingo offset by lower production at Martha, Tanami, Kalgoorlie and Jundee. *Costs applicable to sales* per ounce for the first quarter increased in 2007 from 2006 by 35%, primarily due to the decrease in production, increased royalties due to the higher gold price and increased input costs, particularly diesel, electricity and labor. Also, the strengthening of the Australian dollar increased *Costs applicable to sales* by \$26 per ounce in the first quarter of 2007 compared to 2006.

Tanami, Australia. Gold ounces sold increased 5% in the first quarter of 2007 from 2006, primarily due to a reduction in inventories and 4% higher mill ore grade partially offset by an 11% decrease in mill throughput due to unplanned mill maintenance, as well as limited underground ore availability resulting from haul road flooding during the first quarter. *Costs applicable to sales* per ounce increased 27%, primarily due to higher ore hauling charges associated with longer hauling distances, as well increased royalties due to the higher gold price.

Kalgoorlie, Australia. Gold ounces sold remained constant in the first quarter of 2007 compared to 2006, as increased inventory sales offset lower production due to a 12% decrease in mill ore grade caused by lower than anticipated mining rates resulting from poor weather conditions and limited shovel availability. *Costs applicable to sales* per ounce increased 32%, primarily due to lower gold production and increased mining and milling costs.

Jundee, Australia. Gold ounces sold remained constant in the first quarter of 2007 compared to 2006, as increased inventory sales and a 7% increase in mill ore grade were offset by a 20% decrease in mill throughput and 4% lower mill recovery. Mill throughput decreased due to ball mill maintenance during the first quarter. *Costs applicable to sales* per ounce increased 37%, primarily attributable to increased maintenance and electricity costs, as well as higher drilling and technical service charges.

Pajingo, Australia. Gold ounces sold increased 50% in the first quarter of 2007 from 2006, due to a 19% increase in tons milled and a 16% increase in mill ore grade as mining and ground conditions continue to improve. *Costs applicable to sales* per ounce decreased 11%, primarily due to increased production.

Waihi (Martha), New Zealand. Gold ounces sold decreased 62% in the first quarter of 2007 from 2006, resulting from a planned mill suspension related to underground mine development at Favona and waste removal at the Martha open pit. *Costs applicable to sales* per ounce were higher due to the decrease in gold production and the planned transition to underground operations.

Incorporating first quarter results, the Company continues to expect gold sales in Australia/New Zealand of approximately 1.275 and 1.325 million ounces for 2007 at *Costs applicable to sales* of approximately \$445 to \$470 per ounce, excluding adverse changes in the Australian dollar exchange rate beyond a full year average rate of A\$1.00:\$0.77. Unfavorable changes in the Australian dollar exchange rate could result in operating costs for the region outside of the expected range for the full year, as a significant portion of costs are Australian dollar denominated. *Costs applicable to sales* in Australia/New Zealand are expected to change by approximately \$5 to \$6 per ounce for every \$0.01 move in the Australian dollar exchange rate.

Development of the Boddington project remains on schedule and is approximately 33% complete, with start-up expected in late 2008 or early 2009. Newmont s share of the expected capital cost remains between \$900 and \$1,100.

Depreciation, Depletion

⁽¹⁾ Consolidated gold ounces or copper pounds sold includes minority interests share (Newmont has a 52.875% economic interest).
⁽²⁾ Excludes depreciation, depletion and amortization.

Consolidated copper and gold sales increased 12% and 15% in the first quarter of 2007 from 2006, respectively, primarily as a result of 11% higher mill throughput with an increase in stockpile material feed. Total tons mined increased by 6% compared to the first quarter of 2006 due to the addition of 26 haul trucks and a loading shovel. Waste material mined increased to 62.2 million tons from 29.0 million tons in the first quarter of 2006 due to a change in the short term mine plan that increased the amount of waste tons mined and decreased ore tons mined during the first quarter.

Incorporating first quarter results, the Company continues to expect consolidated gold and copper sales of approximately 435,000 to 475,000 ounces of gold and approximately 395 to 435 million pounds of copper in 2007. Higher grade and throughput opportunities exist for the remainder of 2007.

Costs applicable to sales increased 73% per pound of copper and 59% per ounce of gold in the first quarter of 2007 from 2006, as waste removal costs increased due to a change in the short term mine plan. Additionally, operating costs were impacted by higher mill throughput and stockpile re-handling costs. Increasing labor and input commodity prices continue to impact operating costs, as well as increased selling expenses and royalties due to higher average prices for both gold and copper.

The average realized copper price increased 32% to \$2.74 per pound from \$2.08 per pound in the prior year quarter, as the last remaining copper hedge contracts were delivered in February 2007.

The Company continues to expect *Costs applicable to sales* of approximately \$225 to \$240 per ounce of gold and \$1.10 to \$1.20 per pound of copper for the full year. Fewer waste tons are expected to be mined during the remainder of 2007, resulting in lower mining costs expensed for the full year compared to the first quarter of 2007. Additionally, a higher proportion of total operating costs could be allocated to *Costs applicable to* sales of gold if gold prices and gold sales volumes continue to increase at a higher rate than copper prices and sales volumes.

Under the Contract of Work, beginning in 2005 and continuing through 2010, a portion of the project must be offered for sale to the Indonesian government or to Indonesian nationals, equal to the difference between the following percentages and the percentage of shares already owned by the Indonesian government or Indonesian nationals (if such number is positive): 15%, by the end of 2005; 23%, by the end of 2006; 30%, by the end of 2007; 37%, by the end of 2008; 44%, by the end of 2009; and 51%, by the end of 2010. The price at which such interest must be offered for sale to the Indonesian parties is the highest of the then-current replacement cost, the price at which shares of the project company would be accepted for listing on the Jakarta Stock Exchange, or the fair market value of such interest in the project company as a going concern. Pursuant to this provision, it is possible that the ownership interest of the Newmont/Sumitomo partnership in Batu Hijau could be reduced to 49% by the end of 2010.

A company owned by an Indonesian national currently owns a 20% interest in Batu Hijau, and therefore the Newmont/Sumitomo partnership was required to offer a 3% interest for sale in 2006. An offer to sell a 3% interest was made to the government of Indonesia. While the central government declined to participate, local governments in the area in which the mine is located have expressed interest in acquiring shares, as have various Indonesian nationals. The Newmont/Sumitomo partnership continues discussions with various interested parties to meet its divestiture obligations. Under the terms of the Contract of Work, an additional 7% interest in Batu Hijau was offered for sale in March 2007 to the government of Indonesia.

Ahafo Operation

					Deprecia	tion, D	epletion
	Gold Ounces S	old Co	osts Applicable	and Amortization			
	2007 200	6	2007	2006	2007	7	2006
	(in thousands)	(\$ per oun	(\$ per ounce)			
Three months ended March 31,	125	\$	5 341	\$	\$	78	\$

⁽¹⁾ Excludes depreciation, depletion and amortization.

Ahafo sold 125,000 ounces in the first quarter of 2007. Mill throughput and gold production were in line with expectations. Ore mill grade of 0.063 ounces per ton was higher than expected during the first quarter of 2007. *Costs applicable to sales* were \$341 per ounce for the first quarter of 2007, primarily due to lower than anticipated power generation charges. Power costs are expected to be higher for the remainder of 2007. Additionally, higher than expected production helped to reduce *Costs applicable to sales* per ounce.

Incorporating first quarter results, the Company continues to expect gold sales of approximately 410,000 to 450,000 ounces in 2007. Higher milled ore grades during the first quarter may provide positive grade reconciliation opportunities for the remainder of 2007. The Company continues to expect *Costs applicable to sales* of approximately \$460 to \$500 per ounce for the year. Lower than anticipated power charges and higher than expected mill grades could reduce *costs applicable to sales* to the lower end of the expected range if sustained throughout the remainder of the year. Ahafo continues to address power availability issues in Ghana. Generators are currently being commissioned at Ahafo, allowing the plant to operate while meeting the government's power shedding requirements.

An additional 80 mega-watt power plant is under construction in Ghana with completion anticipated during the third quarter. Newmont will have a 25% share in the power supplied from this plant. The majority of the equipment for this plant cleared customs in March, with the remaining critical equipment expected to be delivered by the end of May. As a result of the mining industry's initiative to install a power plant, the Ghanaian government has agreed to distribute power proportionately between participating mines and the public. The Company currently anticipates generating roughly one-third of Ahafo's power needs from this plant, with the remainder coming from the Ghanaian power grid.

Other Operations

Total/Weighted-Average	49	98	\$	331	\$	209	\$	101	\$	48

⁽¹⁾ Excludes depreciation, depletion and amortization.

La Herradura, Mexico. Gold ounces sold increased 10% in the first quarter of 2007 from 2006, primarily as a result of 41% more tons placed on the leach pad offset by timing of flows from the pad. *Costs applicable to sales* per ounce increased 18%, primarily due to increases in tons mined and leaching costs.

Golden Giant, Canada. Mining operations at Golden Giant were completed in December 2005. Remnant production from in-circuit inventory recovery and mill clean-up activities was 3,000 ounces in the first quarter of 2007, down from 34,000 ounces in the first quarter of 2006.

⁽²⁾ Consolidated gold ounces sold includes minority interests share.

Kori Kollo, Bolivia. Consolidated gold ounces sold decreased 45% in the first quarter of 2007 from 2006, resulting from 42% fewer tons placed on the leach pads. Waste tons mined increased 51% due to a change in the pit design. *Costs applicable to sales* per ounce more than doubled in the first quarter of 2007 from 2006 primarily as a result of lower production and higher waste removal costs.

Consolidated gold sales for Other Operations in 2007 are expected to be approximately 160,000 to 200,000 ounces at *Costs applicable to sales* of approximately \$305 to \$325 per ounce.

Merchant Banking

During the first quarter of 2007, Merchant Banking invested a further \$27 in Gabriel Resources, obtained Oxiana Ltd. shares following the acquisition of Agincourt Resources by Oxiana Ltd. and recognized a \$27 gain, realized a gain of \$6 on the sale of other investments and recognized a \$6 impairment of its investment in Queenstake Resources Ltd. for an other-than-temporary decline in value of marketable equity securities and warrants.

Merchant Banking s royalty interests and equity investments generated \$31 and \$29 of *Royalty and dividend income* for the first quarter of 2007 and 2006, respectively.

Foreign Currency Exchange Rates

The Company s foreign operations sell their gold and copper production based on U.S. dollar metal prices. Approximately 27% and 32%, of Newmont s *Costs applicable to sales* were paid in local currencies during the first quarter of 2007 and 2006, respectively. Variations in the local currency exchange rates in relation to the U.S. dollar at Newmont s foreign mining operations increased consolidated *Costs applicable to sales* per ounce by approximately \$6 during the first quarter as compared to the first quarter of 2006.

Liquidity and Capital Resources

Cash Provided from Operating Activities

Net cash provided from continuing operations decreased 75% for the first quarter of 2007 compared to 2006. Cash flow from operations during 2007 was negatively impacted by fewer gold ounces sold and higher operating costs, partially offset by higher realized gold and copper prices and higher copper pounds sold, as discussed above in *Consolidated Financial Results*. A \$263 decrease in net operating assets and liabilities (Note 18) also impacted cash flow from operations during the first quarter of 2007.

Investing Activities

Net cash used in investing activities was \$390 during the first quarter of 2007 compared to \$257 during the same period of 2006.

Additions to property, plant and mine development were as follows:

	e Months E 007	Ended March 31 2006	
Nevada, USA	\$ 158	\$	154

		3	2
Merchant Banking			1
Corporate and Other		3	3
	\$ 362	2 \$	367

Capital expenditures in Nevada during the first quarter of 2007 were primarily due to the construction of the power plant, mine equipment replacement and sustaining mine development. Yanacocha capital expenditures were primarily on construction of the gold

mill and leach pad expansions. Capital expenditures in Australia/New Zealand largely resulted from the continued construction of the Boddington project. Remaining capital expenditures at Boddington are expected to change by roughly \$8 for every \$0.01 move in the Australian dollar exchange rate from \$0.77. Batu Hijau s capital expenditures were predominately used for sustaining mine development. Capital expenditures at Ahafo were mainly as a result of continued risk mitigation for power shortages and sustaining development. Newmont expects to spend \$1,800 to \$2,000 on capital expenditures in 2007.

Capital expenditures in Nevada during the first quarter of 2006 related to activities for the development of the Leeville, Phoenix, and Power Plant projects, and mine equipment replacement. Yanacocha capital expenditures were for continuing leach pad construction, mine development and mine equipment. Australia/New Zealand capital expenditures resulted from mine development and underground fleet replacement. Expenditures at Batu Hijau primarily included the purchase of additional surface mining equipment. Capital expenditures at Ahafo resulted from construction and development.

Investments in marketable debt and equity securities, net. The Company had net proceeds of \$nil and \$297 from auction rate marketable debt securities during the first quarter of 2007 and 2006, respectively. The Company accounts for these investments as short-term available-for-sale marketable debt securities.

During the first quarter of 2007, the Company purchased additional marketable equity securities of Gabriel Resources for \$27 and other marketable equity securities for \$2.

Acquisitions. In March 2006, Newmont acquired Newcrest Mining Limited s 22.22% interest in the Boddington unincorporated joint venture, bringing its interest in the project to 66.67%, for cash consideration of \$164. In January 2006, Newmont acquired the remaining 15% interest in the Akyem project for cash consideration of \$23, bringing its interest in the project to 100%.

Financing Activities

Net cash used in financing activities was \$50 and \$80 during the first quarter of 2007 and 2006, respectively.

During the first quarter of 2007, the Company made scheduled debt repayments of \$21 related to the sale-leaseback of the refractory ore treatment plant, classified as a capital lease.

Scheduled minimum debt repayments are \$138 for the remainder of 2007, \$243 in 2008, \$125 in 2009, \$133 in 2010, \$322 in 2011 and \$929 thereafter. Newmont expects to be able to fund maturities of its debt from *Net cash provided by operating activities*, short-term investments, existing cash balances or available credit facilities. Effective April 24, 2007, the Company renegotiated the terms of its uncollateralized \$1,250 revolving credit facility, increasing the facility amount to \$2,000 and extending the maturity date to April 2012.

Approximately \$480 of the total scheduled minimum long-term debt repayments at March 31, 2007 relate to the project financing facility for Batu Hijau, which is non-recourse to Newmont. Approximately \$87 of this facility is classified as a current liability. Additionally, PT Newmont Nusa Tenggara shareholder loans of \$36 at March 31, 2007 from one of its shareholders, Nusa Tenggara Mining Corporation, are payable on demand, subject to the project financing facility subordination terms, and are also non-recourse to Newmont. This amount is also classified as a current liability.

At March 31, 2007, the Company was in compliance with all required debt covenants and other restrictions related to its debt agreements.

The Company declared a regular quarterly dividend totaling \$0.10 per common share through March 31, 2007 paid on March 29, 2007. Additionally, Newmont Mining Corporation of Canada Limited, a subsidiary of the Company, declared regular quarterly dividends on its exchangeable shares totaling CDN\$0.1185 per share. The amount paid to common stockholders in the first quarter of 2007 and 2006 were \$45 each. The Company also used \$1 and \$45 to pay dividends to minority interests for the first quarter of 2007 and 2006, respectively.

During the first quarter of 2007 and 2006, respectively, the Company issued 311,123 and 994,994 common shares for proceeds of \$9 and \$38, related to the exercise of employee stock options.

Off-Balance Sheet Arrangements

The Company has the following off-balance sheet arrangements: operating leases (as disclosed in Note 26 to the Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended December 31, 2006, filed on February 26, 2007) and \$475 of outstanding letters of credit, surety bonds and bank guarantees. Newmont also provides a contingent support line of credit to PT Newmont Nusa Tanggara of which Newmont s pro-rata share is \$37. Batu Hijau has sales agreements to sell copper

concentrates at market prices as follows (in thousands of tons): 776 for the remainder of 2007; 786 in 2008; 695 in 2009; 681 in 2010 and 2011; and 1,977 thereafter.

The Company has forward sales contracts to deliver gold at the lower of the spot price on the delivery date or the capped price ranging from \$381 to \$392 per ounce as follows (ounces in thousands): 1,000 in 2008; 600 in 2009; and 250 in 2011. For information regarding these agreements, see Item 3, Provisional Copper and Gold Sales and Price-capped Sales Contracts, below.

Environmental

The Company s mining and exploration activities are subject to various federal and state laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. The Company conducts its operations so as to protect the public health and environment and believes its operations are in compliance with all applicable laws and regulations in all material respects. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the amount of such future expenditures. Estimated future reclamation costs are based principally on legal and regulatory requirements. At March 31, 2007 and December 31, 2006, \$522 and \$520, respectively, were accrued for reclamation costs relating to currently producing mineral properties.

In addition, the Company is involved in several matters concerning environmental obligations associated with former mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. The Company believes that the related environmental obligations associated with these sites are similar in nature with respect to the development of remediation plans, their risk profile and the compliance required to meet general environmental standards. Based upon the Company s best estimate of its liability for these matters, \$81 and \$85 were accrued for such obligations at March 31, 2007 and December 31, 2006, respectively. Depending upon the ultimate resolution of these matters, the Company believes that it is reasonably possible that the liability for these matters could be as much as 93% greater or 28% lower than the amount accrued at March 31, 2007. The amounts accrued for these matters are reviewed periodically based upon facts and circumstances available at the time. Changes in estimates are charged to *Costs and expenses, other* in the period estimates are revised.

For more information on the Company s reclamation and remediation liabilities, see Notes 17 and 21 to the Condensed Consolidated Financial Statements.

During the first quarter of 2007 and 2006, capital expenditures were approximately \$9 and \$22, respectively, to comply with environmental regulations. Ongoing costs to comply with environmental regulations have not been a significant component of operating costs.

Newmont spent \$3 and \$2, respectively, during the first quarter of 2007 and 2006 for environmental obligations related to the former mining sites discussed in Note 21 to the Condensed Consolidated Financial Statements.

Recently Adopted Accounting Pronouncements

See Note 2 of the Notes to Condensed Consolidated Financial Statements for a discussion of the impact of adopting FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007.

Recently Issued Accounting Pronouncements

In February 2007, the FASB issued FASB Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (FAS 159). FAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value, with the objective of improving financial reporting by mitigating volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The provisions of FAS 159 are effective for the Company's fiscal year ending December 31, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's consolidated financial position, results of operations and disclosures.

In September 2006, the FASB issued FASB Statement No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions for FAS 157 are effective for the Company's fiscal year ending December 31, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's consolidated financial position, results of operations and disclosures.

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements include, without limitation: (a) statements regarding future earnings, and the sensitivity of earnings to gold and other metal prices; (b) estimates of future mineral production and sales for specific operations and on a consolidated basis; (c) estimates of future production costs and other metal prices; (e) estimates of future capital expenditures and other cash needs for specific operations and on a consolidated basis and expectations as to the funding thereof; (f) statements as to the projected development of certain ore deposits, including estimates of development and other capital costs, financing plans for these deposits, and expected production commencement dates; (g) estimates of future costs and other liabilities for certain environmental matters; (h) estimates of reserves, and statements regarding future exploration results and reserve replacement; (i) statements regarding modifications to Newmont s hedge positions; (j) statements regarding future transactions relating to portfolio management or rationalization efforts; and (k) projected synergies and costs associated with acquisitions and related matters.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements (cautionary statements) are disclosed under Risk Factors in the Newmont Annual Report on Form 10-K for the year ended December 31, 2006, as well as in other filings with the Securities and Exchange Commission. Many of these factors are beyond Newmont s ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to Newmont or to persons acting on its behalf are expressly qualified in their entirety by the cautionary statements. Newmont disclaims any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (dollars in millions, except per ounce and per pound amounts).

Metal Prices

Changes in the market price of gold significantly affect the Company s profitability and cash flow. Gold prices can fluctuate widely due to numerous factors, such as demand; forward selling by producers; central bank sales, purchases and lending; investor sentiment; the strength of the U.S. dollar and global mine production levels. Changes in the market price of copper also affects the Company s profitability and cash flow. Copper is traded on established international exchanges and copper prices generally reflect market supply and demand, but can also be influenced by speculative trading in the commodity or by currency exchange rates.

Newmont had the following derivative contracts outstanding at March 31, 2007:

	Expected Maturity Date			Fair Value		
		••••	Total/		At December 31,	
	2007	2008	Average	2007	2006	
Copper Collar Contracts ⁽¹⁾ (\$ denominated):

⁽¹⁾ 56.25% guaranteed by Newmont, 43.75% guaranteed by an affiliate of Sumitomo Corporation, delivered in the first quarter of 2007, awaiting final settlement.

⁽²⁾ The fair value does not include amounts payable (\$20) on derivative contracts that were closed out in March 2007 with the net settlement due in April 2007.

⁽³⁾ The fair value does not include amounts payable (\$24) on derivative contracts that were closed out in December 2006 with the net settlement due and paid in January 2007.

Provisional Copper and Gold Sales

The Company s copper and gold provisional sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the copper concentrates at the forward London Metal Exchange price at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

At March 31, 2007 and 2006, Batu Hijau had the following gross revenues before treatment and refining charges subject to final price adjustments:

	At Mar	At March 31,		
	2007	2006		
Gross revenue subject to final price adjustments				
Copper	\$ 386	\$ 377		
Gold	\$ 33	\$ 15		
The average final price adjustments realized were as follows:	Thurs Mandha E	- d- d M 21		
	Three Months E	nded March 3		

	2007	2006
Average final price adjustments		
Copper	(19)%	26%
Gold	2%	9%

Price-Capped Forward Sales Contracts

In 2001, Newmont entered into transactions that closed out certain call options. The options were replaced with a series of forward sales contracts requiring physical delivery of the same quantity of gold over slightly extended future periods. Under the terms of the contracts, Newmont will realize the lower of the spot price on the delivery date or the capped price, ranging from \$381 to \$392 per ounce. The initial fair value of the forward sales contracts was recorded as deferred revenue. At March 31, 2006, \$47 remained in deferred revenue and will be included in revenues as delivery occurs. The forward sales contracts are accounted for as normal sales contracts under SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities and SEAS No. 138. Accounting for Certain Derivative Instruments and Certain

Accounting for Derivative Instruments and Hedging Activities and SFAS No. 138 Accounting for Certain Derivative Instruments and Certain Hedging Activities-an Amendment to SFAS No. 133. The fair value of these contracts are not included on the Condensed Consolidated Balance Sheets.

Newmont had the following price-capped forward sales contracts outstanding at March 31, 2007:

	Expected M	Expected Maturity Date or Transaction Date			e Fair Value		
				Total/	At March 31,	At D	ecember 31,
	2008	2009	2011	Average	2007		2006
Ounces (thousands)	1,000	600	250	1,850	\$ (589)	\$	(534)
Average price	\$ 384	\$ 381	\$ 392	\$ 384			
Interest Rate Swap Contracts							

At March 31, 2007, Newmont had \$100 fixed to floating swap contracts designated as a hedge against a portion of its \$275 8 5/8% debentures expiring in 2011. Under the hedge contract terms, the Company receives fixed-rate interest payments at 8.625% and pays floating-rate interest amounts based on periodic London Interbank Offered Rate (LIBOR) settings plus a spread, ranging from 2.60% to 3.49%. For the three months ended March 31, 2007 and 2006, these transactions had an insignificant impact on interest expense. The fair value of the interest rate swaps was \$(1) and \$1 at March 31, 2007 and December 31, 2006, respectively.

ITEM 4. CONTROLS AND PROCEDURES.

During the fiscal period covered by this report, the Company s management, with the participation of the Chief Executive Officer and Chief Financial Officer of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on

Edgar Filing: NEWMONT MINING CORP /DE/ - Form 10-Q

such evaluation, the Company s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company s disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods.

Even an effective internal control system, no matter how well designed, has inherent limitations including the possibility of the circumvention or overriding of controls. Therefore, the Company s internal control over financial reporting can provide only reasonable assurance with respect to the reliability of the Company s financial reporting and financial statement preparation.

There has been no change in the Company s internal control over financial reporting during the most recent fiscal quarter that has materially affected, or that is reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Information regarding legal proceedings is contained in Note 21 to the Condensed Consolidated Financial Statements contained in this Report and is incorporated herein by reference.

ITEM 5. OTHER INFORMATION.

Item 1.01 Entry into a Material Definitive Agreement.

On April 24, 2007, Newmont Mining Corporation and Newmont USA Limited amended and restated its existing credit agreement (the Amended and Restated Credit Agreement), dated as of July 30, 2004, as amended and restated as of July 28, 2005, among Newmont Mining Corporation and Newmont USA Limited, as borrowers, the lenders party thereto, JP Morgan Chase Bank, N.A., as Administrative Agent, The Bank of Nova Scotia and The Royal Bank of Scotland, plc, as co-syndication agents, and Citicorp USA, Inc. HSBC Bank USA, UBS Loan Finance LLC and Sumitomo Mitsui Banking Corporation, as Co-Documentation Agents.

The amendment to the Amended and Restated Credit Agreement (1) allows Newmont Mining Corporation and Newmont USA Limited to obtain additional commitments and incur loans and (2) extends the maturity date of the revolving credit facility from July 2010 to April 2012 and (3) increases the amount that Newmont Mining Corporation and Newmont USA Limited can borrow on a revolving basis from \$1.25 billion to \$2 billion.

The foregoing summary of the Amended and Restated Credit Agreement is qualified in its entirety by reference to the complete text of the Amended and Restated Credit Agreement, which is filed herewith as Exhibit 10.1 and incorporated by reference herein.

Edgar Filing: NEWMONT MINING CORP /DE/ - Form 10-Q

Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

On April 24, 2007, the Board of Directors (the Board) of Newmont Mining Corporation (the Company) elected Richard T. O'Brien as the Company s President, effective as of April 24, 2007, which is subject to no fixed term. In addition to serving as President of the Company, Mr. O'Brien will continue to serve as Chief Financial Officer.

Mr. O'Brien, 53, has served as Executive Vice President and Chief Financial Officer since September 2006. He previously served as Senior Vice President and Chief Financial Officer from September 2005 to September 2006. Mr. O'Brien was Executive Vice President and Chief Financial Officer of AGL Resources from April 2001 to September 2005. Mr. O'Brien is also a Director of Inergy Holdings GP, LLC.

In connection with Mr. O'Brien's election as President, the Company will, on April 30, 2007, award to him shares of restricted stock at a fair market value of \$1,400,000, two-thirds of which vest in two years and the remaining one-third of which vests in three years. The terms of the restricted stock are governed by the Newmont Mining Corporation 2005 Stock Incentive Plan and are subject to the terms set forth in the form of award agreement, a copy of which is filed herewith as Exhibit 10.2 and incorporated by reference herein.

There is no arrangement or understanding between Mr. O'Brien and any other persons pursuant to which he was elected as the President.

On April 25, 2007, Thomas L. Enos, Executive Vice President, Operations, informed the Company of his intention to retire as of August 1, 2007. Mr. Enos is the Company's principal operating officer.

Item 5.03. Amendments to Articles of Incorporation or Bylaws; Change in Fiscal Year.

On April 24, 2007, the Board of Directors of the Company approved an amendment to Article IV, Section 1 of the Corporation s By-Laws (the By-Laws), deleting the provision that the President shall be a Director.

The foregoing description of the amendment to the By-Laws is qualified in its entirety by reference to the complete text of the By-Laws, as amended and restated effective as of April 24, 2007. A copy of the By-Laws, as amended and restated, is filed herewith as Exhibit 3.1 and incorporated by reference herein.

ITEM 6. EXHIBITS.

(a) The exhibits to this report are listed in the Exhibit Index.
