PART I - FINANCIAL INFORMATION

Item 1. Financial Statements

The interim consolidated financial statements contained herein reflect all adjustments (all of a normal, recurring nature) which, in the opinion of management, are necessary for a fair statement of the financial condition, results of operations, cash flows and changes in shareholders' equity for the periods presented. They have been prepared in accordance with Rule 10-01 of Regulation S-X and do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. Operating results for the thirteen weeks ended March 28, 2015 are not necessarily indicative of the results that may be expected for the entire fiscal year ending December 26, 2015.

These interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's 2014 Annual Report on Form 10-K.

Table of Contents

LANDSTAR SYSTEM, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The consolidated financial statements include the accounts of Landstar System, Inc. and its subsidiary, Landstar System Holdings, Inc., and reflect all adjustments (all of a normal, recurring nature) which are, in the opinion of management, necessary for a fair statement of the results for the periods presented. The preparation of the consolidated financial statements requires the use of management's estimates. Actual results could differ from those estimates. Landstar System, Inc. and its subsidiary are herein referred to as Landstar or the Company. Significant intercompany accounts have been eliminated in consolidation.

(1) Share-based Payment Arrangements

As of March 28, 2015, the Company had two employee equity incentive plans, the 2002 employee stock option and stock incentive plan (the ESOSIP) and the 2011 equity incentive plan (the 2011 EIP). No further grants can be made under the ESOSIP. The Company also has a stock compensation plan for members of its Board of Directors, the 2013 Directors Stock Compensation Plan (the 2013 DSCP). 115,000 shares of the Company's common stock were authorized for issuance under the 2013 DSCP. The ESOSIP, 2011 EIP, and 2013 DSCP are each referred to herein as a Plan, and, collectively, as the Plans. Amounts recognized in the financial statements with respect to these Plans are as follows (in thousands):

	Thirteen Weeks Ended	
	March 28, 2015	March 29, 2014
Total cost of the Plans during the period	\$ 1,667	\$ 1,164
Amount of related income tax benefit recognized during the period	(701)	(614)
Net cost of the Plans during the period	\$ 966	\$ 550

Included in income tax benefits recognized in the thirteen-week periods ended March 28, 2015 and March 29, 2014 were income tax benefits of \$160,000 and \$295,000, respectively, recognized on disqualifying dispositions of the Company's common stock by employees who obtained shares of common stock through exercises of incentive stock options.

As of March 28, 2015, there were 95,531 shares of the Company's common stock reserved for issuance under the 2013 DSCP and 5,602,419 shares of the Company's common stock reserved for issuance in the aggregate under the ESOSIP and 2011 EIP.

Restricted Stock Units

Edgar Filing: LANDSTAR SYSTEM INC - Form 10-Q

The fair value of a restricted stock unit (RSU) is determined based on the market value of the Company's common stock on the date of grant, discounted for lack of marketability for a minimum post-vesting holding requirement. The discount rate due to lack of marketability used for RSU award grants during both thirteen-week periods ended March 28, 2015 and March 29, 2014 was 7%.

The following table summarizes information regarding the Company's outstanding RSU awards under the Plans:

	Number of RSUs	Weighted Average Grant Date Fair Value
Outstanding at December 27, 2014	425,630	\$ 50.72
Granted	91,562	\$ 57.97
Vested	(91,382)	\$ 51.98
Outstanding at March 28, 2015	425,810	\$ 52.01

Restricted stock units vest over a 3 to 5 year period based on varying metrics of growth in operating income and diluted earnings per share either from a base year, being the year immediately preceding the year of grant, or year-over-prior-year growth. At the time of grant, the maximum number of common shares available for issuance under the 2015 grant equals 200% of the number of RSUs granted. The maximum number of common shares available for issuance under grants made prior to 2015 equals 100% of the number of RSUs granted.

Table of Contents

With respect to all RSU awards, the Company reports compensation expense over the life of the award based on an estimated number of shares that will vest over the life of the award, multiplied by the fair value of a RSU. The Company recognized approximately \$1,158,000 and \$641,000 of share-based compensation expense related to RSU awards in the thirteen-week periods ended March 28, 2015 and March 29, 2014, respectively. As of March 28, 2015, there was a maximum of \$26,600,000 of total unrecognized compensation cost related to RSU awards granted under the Plans with an expected average remaining life of approximately 3.4 years. The amount of future compensation expense to be recognized will be determined based on future operating results.

Stock Options

The following table summarizes information regarding the Company's outstanding stock options under the Plans:

	Number of Options	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (000s)
Options outstanding at December 27, 2014	773,839	\$ 46.92		
Exercised	(48,700)	\$ 45.52		
Forfeited	(1,000)	\$ 52.60		
Options outstanding at March 28, 2015	724,139	\$ 47.01	5.5	\$ 13,572
Options exercisable at March 28, 2015	495,239	\$ 45.09	4.9	\$ 10,232

The total intrinsic value of stock options exercised during the thirteen-week periods ended March 28, 2015 and March 29, 2014 was \$1,108,000 and \$5,130,000, respectively.

As of March 28, 2015, there was \$2,509,000 of total unrecognized compensation cost related to non-vested stock options granted under the Plans. The unrecognized compensation cost related to these non-vested options is expected to be recognized over a weighted average period of 2.0 years.

Non-vested Restricted Stock

The fair value of each share of non-vested restricted stock issued under the Plans is based on the fair value of a share of the Company's common stock on the date of grant and shares of non-vested restricted stock are subject to vesting in three equal annual installments or 100% on the fifth anniversary of the date of the grant.

As of December 27, 2014, there were 23,353 shares of non-vested restricted stock outstanding with a weighted average grant date fair value of \$54.90 per share. None of these shares vested or forfeited and no additional restricted stock shares were granted during the thirteen-week period ended March 28, 2015.

As of March 28, 2015, there was \$710,000 of total unrecognized compensation cost related to non-vested shares of restricted stock granted under the Plans. The unrecognized compensation cost related to these non-vested shares of restricted stock is expected to be recognized over a weighted average period of 1.7 years.

(2) Income Taxes

The provisions for income taxes for both the 2015 and 2014 thirteen-week periods were based on estimated annual effective income tax rates of 38.2%, adjusted for discrete events, such as benefits resulting from disqualifying dispositions of the Company's common stock by employees who obtained the stock through exercises of incentive stock options. The effective income tax rates for the 2015 and 2014 thirteen-week periods were 37.8% and 37.5%, respectively, which were higher than the statutory federal income tax rate primarily as a result of state taxes, the meals and entertainment exclusion and non-deductible stock-based compensation.

Table of Contents**(3) Earnings Per Share**

Earnings per common share are based on the weighted average number of shares outstanding, including outstanding non-vested restricted stock. Diluted earnings per share are based on the weighted average number of common shares outstanding plus the incremental shares that would have been outstanding upon the assumed exercise of all dilutive stock options.

The following table provides a reconciliation of the average number of common shares outstanding used to calculate earnings per common share to the average number of common shares and common share equivalents outstanding used to calculate diluted earnings per share (in thousands):

	Thirteen Weeks Ended	
	March 28, 2015	March 29, 2014
Average number of common shares outstanding	44,588	45,407
Incremental shares from assumed exercises of stock options	172	189
Average number of common shares and common share equivalents outstanding	44,760	45,596

For the thirteen-week periods ended March 28, 2015 and March 29, 2014, no options outstanding to purchase shares of common stock were antidilutive. Outstanding RSUs were excluded from the calculation of diluted earnings per share for all periods because the performance metric requirements for vesting had not been satisfied.

(4) Additional Cash Flow Information

During the 2015 thirteen-week period, Landstar paid income taxes and interest of \$669,000 and \$794,000, respectively. During the 2014 thirteen-week period, Landstar paid income taxes and interest of \$19,792,000 and \$784,000, respectively. Landstar did not acquire any operating property by entering into capital leases in the 2015 thirteen-week period. Landstar acquired operating property by entering into capital leases in the amount of \$641,000 in the 2014 thirteen-week period.

(5) Segment Information

The following table summarizes information about the Company's reportable business segments as of and for the thirteen-week periods ended March 28, 2015 and March 29, 2014 (in thousands):

			Thirteen Weeks Ended		
			March 28, 2015		March 29, 2014
Transportation					Transportation
	Logistics	Insurance	Total	Logistics	Insurance
					Total

Edgar Filing: LANDSTAR SYSTEM INC - Form 10-Q

External revenue	\$ 751,796	\$ 10,584	\$ 762,380	\$ 678,853	\$ 9,344	\$ 688,197
Investment income		354	354		363	363
Internal revenue		6,396	6,396		5,792	5,792
Operating income	43,730	5,315	49,045	38,984	6,030	45,014
Expenditures on long-lived assets	2,450		2,450	732		732
Goodwill	31,134		31,134	31,134		31,134

In the thirteen-week periods ended March 28, 2015 and March 29, 2014, no single customer accounted for more than 10% of the Company's consolidated revenue.

(6) Other Comprehensive Income

The following table presents the components of and changes in accumulated other comprehensive income, net of related income taxes, as of and for the thirteen-week period ended March 28, 2015 (in thousands):

	Unrealized Holding Gain on			
	Available-for-Sale Securities	Foreign Currency Translation	Total	
Balance as of December 27, 2014	\$ 105	\$ (1,290)	\$ (1,185)	
Other comprehensive income (loss)	228	(280)	(52)	
Balance as of March 28, 2015	\$ 333	\$ (1,570)	\$ (1,237)	

Table of Contents

Amounts reclassified from accumulated other comprehensive income to investment income due to the realization of previously unrealized gains and losses in the accompanying consolidated statements of income were not significant for the thirteen-week period ended March 28, 2015.

(7) Investments

Investments include primarily investment-grade corporate bonds and U.S. Treasury obligations having maturities of up to five years (the bond portfolio). Investments in the bond portfolio are reported as available-for-sale and are carried at fair value. Investments maturing less than one year from the balance sheet date are included in short-term investments and investments maturing more than one year from the balance sheet date are included in other assets in the consolidated balance sheets. Management performs an analysis of the nature of the unrealized losses on available-for-sale investments to determine whether such losses are other-than-temporary. Unrealized losses, representing the excess of the purchase price of an investment over its fair value as of the end of a period, considered to be other-than-temporary, are to be included as a charge in the statement of income, while unrealized losses considered to be temporary are to be included as a component of shareholders' equity. Investments whose values are based on quoted market prices in active markets are classified within Level 1. Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, are classified within Level 2. As Level 2 investments include positions that are not traded in active markets, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Any transfers between levels are recognized as of the beginning of any reporting period. Fair value of the bond portfolio was determined using Level 1 inputs related to U.S. Treasury obligations and money market investments and Level 2 inputs related to investment-grade corporate bonds, asset-backed securities and direct obligations of government agencies. Unrealized gains, net of unrealized losses, on the investments in the bond portfolio were \$516,000 and \$163,000 at March 28, 2015 and December 27, 2014, respectively.

The amortized cost and fair values of available-for-sale investments are as follows at March 28, 2015 and December 27, 2014 (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
<u>March 28, 2015</u>				
Money market investments	\$ 1,060	\$	\$	\$ 1,060
Asset-backed securities	5,078	2	22	5,058
Corporate bonds and direct obligations of government agencies	77,823	614	87	78,350
U.S. Treasury obligations	19,651	13	4	19,660
Total	\$ 103,612	\$ 629	\$ 113	\$ 104,128
<u>December 27, 2014</u>				
Money market investments	\$ 1,729	\$	\$	\$ 1,729
Asset-backed securities	5,106	1	50	5,057

Edgar Filing: LANDSTAR SYSTEM INC - Form 10-Q

Corporate bonds and direct obligations of government agencies	76,964	491	284	77,171
U.S. Treasury obligations	19,507	14	9	19,512
Total	\$ 103,306	\$ 506	\$ 343	\$ 103,469

For those available-for-sale investments with unrealized losses at March 28, 2015 and December 27, 2014, the following table summarizes the duration of the unrealized loss (in thousands):

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
March 28, 2015

Table of Contents

The Company expects to recover the amortized cost basis of these securities as it does not intend to sell, and does not anticipate being required to sell, these securities before recovery of the cost basis. For these reasons, the Company does not consider the unrealized losses on these securities to be other-than-temporary at March 28, 2015.

(8) Commitments and Contingencies

Short-term investments include \$37,174,000 in current maturities of investments held by the Company's insurance segment at March 28, 2015. The non-current portion of the bond portfolio of \$66,954,000 is included in other assets. The short-term investments, together with \$27,059,000 of non-current investments, provide collateral for the \$57,810,000 of letters of credit issued to guarantee payment of insurance claims. As of March 28, 2015, Landstar also had \$33,033,000 of additional letters of credit outstanding under the Company's Credit Agreement.

On March 13, 2015, a jury in state court in Maricopa County, Arizona, rendered a verdict (the "Verdict") of \$19,250,000 against Landstar Ranger, Inc. in the matter of Bruno v. Landstar Ranger, Inc., in connection with a tragic vehicular accident that occurred on July 19, 2011, on US-93 north of Kingman, Arizona. The accident involved a tractor-trailer leased to Landstar Ranger, Inc., by a truck owner-operator. The truck had pulled off the highway due to mechanical issues and parked in a designated pull-off area. A pick-up truck driven by the decedent lost control while driving on the highway following a tire tread delamination while the decedent may have been engaged with his cell phone. The pick-up truck hit the right rear portion of the trailer of the tractor-trailer approximately 20 to 25 feet from the fog line of the highway. The accident occurred at approximately 2 p.m. on a clear, dry day. The decedent's wife, one of his daughters and two friends of the family were in the car at the time of the accident. As a result of the accident, the decedent's wife, his daughter and one of the friends sustained non-life threatening injuries. In connection with the Verdict, the jury determined that Landstar Ranger, Inc. was responsible for 100% of the liability associated with the accident.

During the trial and prior to the Verdict, the parties entered into an agreement that, among other things, limited the Company's financial exposure from the possibility of an adverse verdict to \$4,500,000 and all parties waived all appellate rights following the trial. As a result of the Verdict and the agreement with the plaintiffs, the Verdict resulted in a pre-tax charge of \$4,500,000, or approximately \$0.06 per share, to the Company's financial results from operations for the 2015 first quarter.

The Company is involved in certain claims and pending litigation, including those described herein, arising from the normal conduct of business. Many of these claims are covered in whole or in part by insurance. Based on knowledge of the facts and, in certain cases, opinions of outside counsel, management believes that adequate provisions have been made for probable losses with respect to the resolution of all such claims and pending litigation and that the ultimate outcome, after provisions therefor, will not have a material adverse effect on the financial condition of the Company, but could have a material effect on the results of operations in a given quarter or year.

(9) Change in Accounting Estimate for Self-Insured Claims

Landstar provides for the estimated costs of self-insured claims primarily on an actuarial basis. The amount recorded for the estimated liability for claims incurred is based upon the facts and circumstances known on the applicable balance sheet date. The ultimate resolution of these claims may be for an amount greater or less than the amount estimated by management. The Company continually revises its existing claim estimates as new or revised information becomes available on the status of each claim. Historically, the Company has experienced both favorable and unfavorable development of prior years' claims estimates.

Table of Contents

The following table summarizes the effect of the increase in the cost of insurance claims resulting from unfavorable development of prior year self-insured claims estimates on operating income, net income and earnings per share amounts in the consolidated statements of income for the thirteen-week periods ended March 28, 2015 and March 29, 2014 (in thousands, except per share amounts):

	Thirteen Weeks Ended	
	March 28, 2015	March 29, 2014
Operating income	\$ 4,641	\$ 1,891
Net income	2,868	1,169
Earnings per share	\$ 0.06	\$ 0.03
Diluted earnings per share	\$ 0.06	\$ 0.03

The unfavorable development of prior years' claims in the 2015 fiscal period primarily related to impact of the Verdict described in Footnote (8) Commitments and Contingencies.

(10) Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-09 - Revenue from Contracts with Customers (ASU 2014-09). ASU 2014-09 is a comprehensive revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. In adopting ASU 2014-09, companies may use either a full retrospective or a modified retrospective approach. On April 1, 2015, the FASB proposed deferring the effective date by one year to December 15, 2017 for annual reporting periods beginning after that date. The FASB also proposed permitting early adoption of the standard, but not before the original effective date of December 15, 2016. ASU 2014-09 is not expected to have a material impact on the Company's financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the attached interim consolidated financial statements and notes thereto, and with the Company's audited financial statements and notes thereto for the fiscal year ended December 27, 2014 and Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2014 Annual Report on Form 10-K.

FORWARD-LOOKING STATEMENTS

The following is a "safe harbor" statement under the Private Securities Litigation Reform Act of 1995. Statements contained in this document that are not based on historical facts are "forward-looking statements." This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Form 10-Q contain forward-looking statements, such as statements which relate to Landstar's business objectives, plans, strategies and expectations. Terms such as "anticipates," "believes," "estimates," "intention," "expects," "plans," "predicts," "may," "could," "will," the negative thereof and similar expressions are intended to identify forward-looking statements. Such statements are by nature subject to uncertainties and risks, including but not limited to: an increase in the frequency or severity of accidents or other claims; unfavorable development of existing accident claims; dependence on third party insurance companies; dependence on independent commission sales agents; dependence on third party capacity

providers; decreased demand for transportation services; substantial industry competition; disruptions or failures in the Company's computer systems; dependence on key vendors; changes in fuel taxes; status of independent contractors; regulatory and legislative changes; catastrophic loss of a Company facility; intellectual property; unclaimed property; and other operational, financial or legal risks or uncertainties detailed in Landstar's Form 10-K for the 2014 fiscal year, described in Item 1A "Risk Factors", this report or in Landstar's other Securities and Exchange Commission filings from time to time. These risks and uncertainties could cause actual results or events to differ materially from historical results or those anticipated. Investors should not place undue reliance on such forward-looking statements and the Company undertakes no obligation to publicly update or revise any forward-looking statements.

Table of Contents

Introduction

Landstar System, Inc. and its subsidiary, Landstar System Holdings, Inc. (together, referred to herein as "Landstar" or the "Company"), is an asset-light provider of integrated transportation management solutions. The Company offers services to its customers across multiple transportation modes, with the ability to arrange for individual shipments of freight to enterprise-wide solutions to manage all of a customer's transportation needs. Landstar provides services principally throughout the United States and to a lesser extent in Canada, and between the United States and Canada, Mexico and other countries around the world. The Company's services emphasize safety, information coordination and customer service and are delivered through a network of independent commission sales agents and third party capacity providers linked together by a series of technological applications which are provided and coordinated by the Company. The nature of the Company's business is such that a significant portion of its operating costs varies directly with revenue.

Landstar markets its integrated transportation management solutions primarily through independent commission sales agents and exclusively utilizes third party capacity providers to transport customers' freight. Landstar's independent commission sales agents enter into contractual arrangements with the Company and are responsible for locating freight, making that freight available to Landstar's capacity providers and coordinating the transportation of the freight with customers and capacity providers. The Company's third party capacity providers consist of independent contractors who provide truck capacity to the Company under exclusive lease arrangements (the "BCO Independent Contractors"), unrelated trucking companies who provide truck capacity to the Company under non-exclusive contractual arrangements (the "Truck Brokerage Carriers"), air cargo carriers, ocean cargo carriers and railroads. Through this network of agents and capacity providers linked together by Landstar's information technology systems, Landstar operates an integrated transportation management solutions business primarily throughout North America with revenue of \$3.2 billion during the most recently completed fiscal year. The Company reports the results of two operating segments: the transportation logistics segment and the insurance segment.

The transportation logistics segment provides a wide range of integrated transportation management solutions. Transportation services offered by the Company include truckload and less-than-truckload transportation, rail intermodal, air cargo, ocean cargo, expedited ground and air delivery of time-critical freight, heavy-haul/specialized, U.S.-Canada and U.S.-Mexico cross-border, project cargo and customs brokerage. Industries serviced by the transportation logistics segment include automotive products, building products, metals, chemicals, foodstuffs, heavy machinery, retail, electronics, ammunition and explosives and military equipment. In addition, the transportation logistics segment provides transportation services to other transportation companies, including logistics and less-than-truckload service providers. Each of the independent commission sales agents has the opportunity to market all of the services provided by the transportation logistics segment. Billings for freight transportation services are typically charged to customers on a per shipment basis for the physical transportation of freight and are referred to as transportation revenue. During the thirteen weeks ended March 28, 2015, revenue hauled by BCO Independent Contractors, Truck Brokerage Carriers and railroads represented approximately 46%, 47% and 3%, respectively, of the Company's consolidated revenue. Collectively, revenue hauled by air and ocean cargo carriers represented approximately 3% of the Company's consolidated revenue in the thirteen-week period ended March 28, 2015.

The insurance segment is comprised of Signature Insurance Company, a wholly owned offshore insurance subsidiary ("Signature"), and Risk Management Claim Services, Inc. This segment provides risk and claims management services to certain of Landstar's operating subsidiaries. In addition, it reinsures certain risks of the Company's BCO Independent Contractors and provides certain property and casualty insurance directly to certain of Landstar's operating subsidiaries. Revenue at the insurance segment represents reinsurance premiums from third party insurance companies that provide insurance programs to BCO Independent Contractors where all or a portion of the risk is ultimately borne by Signature. Revenue at the insurance segment represented approximately 1% of the Company's consolidated revenue

for the thirteen-week period ended March 28, 2015.

Changes in Financial Condition and Results of Operations

Management believes the Company's success principally depends on its ability to generate freight through its network of independent commission sales agents and to safely and efficiently deliver that freight utilizing third party capacity providers. Management believes the most significant factors to the Company's success include increasing revenue, sourcing capacity and controlling costs, including insurance and claims.

While customer demand, which is subject to overall economic conditions, ultimately drives increases or decreases in revenue, the Company primarily relies on its independent commission sales agents to establish customer relationships and generate revenue opportunities. Management's emphasis with respect to revenue growth is on revenue generated by independent commission sales agents who on an annual basis generate \$1 million or more of Landstar revenue (Million Dollar Agents). Management believes future revenue growth is primarily dependent on its ability to increase both the revenue generated by Million Dollar Agents and the number of Million Dollar Agents through a combination of recruiting new agents and increasing the revenue opportunities generated by existing independent commission sales agents. During the 2014 fiscal year, 525 independent commission sales agents generated \$1 million or more of Landstar revenue and thus qualified as Million Dollar Agents. During the 2014 fiscal year, the average revenue generated by a Million Dollar Agent was \$5,609,000 and revenue generated by Million Dollar Agents in the aggregate represented 92% of consolidated revenue.

Table of Contents

Management monitors business activity by tracking the number of loads (volume) and revenue per load by mode of transportation. Revenue per load can be influenced by many factors other than a change in price. Those factors include the average length of haul, freight type, special handling and equipment requirements, fuel costs and delivery time requirements. For shipments involving two or more modes of transportation, revenue is generally classified by the mode of transportation having the highest cost for the load. The following table summarizes this information by trailer type for truck transportation and by mode for all others:

	Thirteen Weeks Ended	
	March 28, 2015	March 29, 2014
<u>Revenue generated through (in thousands):</u>		
Truck transportation		
Truckload:		
Van equipment	\$ 449,688	\$ 397,261

Rail intermodal	3%	2%
Ocean and air cargo carriers	3%	2%
Other	1%	1%

(1) Includes primarily premium revenue generated by the insurance segment.

Table of Contents

Also critical to the Company's success is its ability to secure capacity, particularly truck capacity, at rates that allow the Company to profitably transport customers' freight. The following table summarizes available truck capacity providers:

	March 28, 2015	March 29, 2014
BCO Independent Contractors	8,478	7,922
Truck Brokerage Carriers:		
Approved and active ⁽¹⁾	27,304	21,588
Other approved	13,016	11,291
	40,320	32,879
Total available truck capacity providers	48,798	40,801
Trucks provided by BCO Independent Contractors	9,046	8,424

⁽¹⁾ Active refers to Truck Brokerage Carriers who moved at least one load in the 180 days immediately preceding the fiscal quarter end.

The Company incurs costs that are directly related to the transportation of freight that include purchased transportation and commissions to agents. The Company incurs indirect costs associated with the transportation of freight that include other operating costs and insurance and claims. In addition, the Company incurs selling, general and administrative costs essential to administering its business operations. Management continually monitors all components of the costs incurred by the Company and establishes annual cost budgets which, in general, are used to benchmark costs incurred on a monthly basis.

Purchased transportation represents the amount a BCO Independent Contractor or other third party capacity provider is paid to haul freight. The amount of purchased transportation paid to a BCO Independent Contractor is primarily based on a contractually agreed-upon percentage of revenue generated by delivered loads the BCO Independent Contractor hauled. Purchased transportation paid to a Truck Brokerage Carrier is based on either a negotiated rate for each load hauled or, to a lesser extent, a contractually agreed-upon fixed rate per load. Purchased transportation paid to railroads is based on either a negotiated rate for each load hauled or a contractually agreed-upon fixed rate. Purchased transportation paid to air cargo carriers is generally based on a negotiated rate for each load hauled and purchased transportation paid to ocean cargo carriers is generally based on contractually agreed-upon fixed rates. Purchased transportation as a percentage of revenue for truck brokerage, rail intermodal and ocean cargo services is normally higher than that of BCO Independent Contractor and air cargo services. Purchased transportation is the largest component of costs and expenses and, on a consolidated basis, increases or decreases as a percentage of consolidated revenue in proportion to changes in the percentage of consolidated revenue generated through BCO Independent Contractors and other third party capacity providers and external revenue from the insurance segment, consisting of reinsurance premiums. Purchased transportation as a percent of revenue also increases or decreases in relation to the availability of truck brokerage capacity and with changes in the price of fuel on revenue hauled by Truck Brokerage Carriers. Purchased transportation costs are recognized upon the completion of freight delivery.

Commissions to agents are based on contractually agreed-upon percentages of revenue or net revenue, defined as revenue less the cost of purchased transportation, or net revenue less a contractually agreed upon percentage of revenue retained by Landstar. Commissions to agents as a percentage of consolidated revenue will vary directly with fluctuations in the percentage of consolidated revenue generated by the various modes of transportation and reinsurance premiums and with changes in net revenue margin, defined as net revenue divided by revenue, on services provided by Truck Brokerage Carriers, railroads, air cargo carriers and ocean cargo carriers. Commissions to agents are recognized upon the completion of freight delivery.

The Company defines gross profit as revenue less the cost of purchased transportation and commissions to agents. Gross profit divided by revenue is referred to as gross profit margin. The Company's operating margin is defined as operating income divided by gross profit.

In general, gross profit margin on revenue hauled by BCO Independent Contractors represents a fixed percentage of revenue due to the nature of the contracts that pay a fixed percentage of revenue to both the BCO Independent Contractors and independent commission sales agents. For revenue hauled by Truck Brokerage Carriers, gross profit margin is either fixed or variable as a percent of revenue, depending on the contract with each individual independent commission sales agent. Under certain contracts with independent commission sales agents, the Company retains a fixed percentage of revenue and the agent retains the amount remaining less the cost of purchased transportation (the retention contracts). Gross profit margin on revenue hauled by railroads, air cargo carriers, ocean cargo carriers and Truck Brokerage Carriers, other than those under retention contracts, is variable in nature as the Company's contracts with independent commission sales agents provide commissions to agents at a contractually agreed upon percentage of net revenue for these type of loads. Approximately 55% of the Company's consolidated revenue in the thirteen-week period ended March 28, 2015 was generated under contracts that have a fixed gross profit margin while 45% was under contracts that have a variable gross profit margin.

Table of Contents

Maintenance costs for Company-provided trailing equipment and BCO Independent Contractor recruiting costs are the largest components of other operating costs. Also included in other operating costs are the provision for uncollectible advances and other receivables due from BCO Independent Contractors and independent commission sales agents and gains/losses, if any, on sales of Company-owned trailing equipment.

With respect to insurance and claims cost, potential liability associated with accidents in the trucking industry is severe and occurrences are unpredictable. For commercial trucking claims, Landstar retains liability up to \$5,000,000 per occurrence. The Company also retains liability of up to \$1,000,000 for each general liability claim, \$250,000 for each workers' compensation claim and up to \$250,000 for each cargo claim. The Company's exposure to liability associated with accidents incurred by Truck Brokerage Carriers, railroads and air and ocean cargo carriers who transport freight on behalf of the Company is reduced by various factors including the extent to which such carriers maintain their own insurance coverage. A material increase in the frequency or severity of accidents, cargo claims or workers' compensation claims or the material unfavorable development of existing claims could have a material adverse effect on Landstar's cost of insurance and claims and its results of operations.

During the thirteen-week period ended March 28, 2015, employee compensation and benefits accounted for over sixty percent of the Company's selling, general and administrative costs.

Depreciation and amortization primarily relate to depreciation of trailing equipment and information technology hardware and software.

The following table sets forth the percentage relationship of purchased transportation and commissions to agents, both being direct costs, to revenue and indirect costs as a percentage of gross profit for the periods indicated:

	Thirteen Weeks Ended	
	March 28, 2015	March 29, 2014
Revenue	100.0%	100.0%
Purchased transportation	77.0	77.0
Commissions to agents	7.8	7.7
Gross profit margin	15.1%	15.3%
Gross profit	100.0%	100.0%
Investment income	0.3	0.3
Indirect costs and expenses:		
Other operating costs, net of gains on asset sales/dispositions	6.7	6.2
Insurance and claims	12.8	11.2
Selling, general and administrative	32.3	33.8
Depreciation and amortization	6.1	6.4
Total costs and expenses	57.8	57.7

Operating margin	42.5%	42.7%
------------------	-------	-------

Management believes that a discussion of indirect costs as a percentage of gross profit is useful and meaningful to potential investors for the following principal reasons: (1) disclosure of these relative measures (i.e., each indirect operating cost line item as a percentage of gross profit) allows investors to better understand the underlying trends in the Company's results of operations; (2) due to the generally fixed nature of these indirect costs (other than insurance and claims costs), these relative measures are meaningful to investors' evaluations of the Company's management of its indirect costs attributable to operations; (3) management considers this financial information in its decision-making, such as budgeting for infrastructure, trailing equipment and selling, general and administrative costs; and (4) this information facilitates comparisons by investors of the Company's results to the results of other non-asset or asset-light companies in the transportation and logistics services industry who report "net revenue" in Management Discussion and Analysis, which represents revenue less the cost of purchased transportation. The difference between the Company's use of the term "gross profit" and use of the term "net revenue" by other companies in the transportation and logistics services industry is due to the direct cost of commissions to agents under the Landstar business model, whereas other companies in this industry generally have no commissions to agents.

Table of Contents

Also, as previously mentioned, the Company reports two operating segments: the transportation logistics segment and the insurance segment. External revenue at the insurance segment, representing reinsurance premiums, has historically been relatively consistent on a year-over-year basis at less than 2% of consolidated revenue and generally corresponds directly with the number of trucks provided by BCO Independent Contractors. The discussion of indirect cost line items in Management's Discussion and Analysis of Financial Condition and Results of Operations considers the Company's costs on a consolidated basis rather than on a segment basis. Management believes this presentation format is the most appropriate to assist users of the financial statements in understanding the Company's business for the following reasons: (1) the insurance segment has no other operating costs; (2) discussion of insurance and claims at either segment without reference to the other may create confusion amongst investors and potential investors due to intercompany arrangements and specific deductible programs that affect comparability of financial results by segment between various fiscal periods but that have no effect on the Company from a consolidated reporting perspective; (3) selling, general and administrative costs of the insurance segment comprise less than 10% of consolidated selling, general and administrative costs and have historically been relatively consistent on a year-over-year basis; and (4) the insurance segment has no depreciation and amortization.

THIRTEEN WEEKS ENDED MARCH 28, 2015 COMPARED TO THIRTEEN WEEKS ENDED MARCH 29, 2014

Revenue for the 2015 thirteen-week period was \$762,380,000, an increase of \$74,183,000, or 11%, compared to the 2014 thirteen-week period. Transportation revenue increased \$72,943,000, or 11%. The increase in transportation revenue was primarily attributable to an approximately 7% increase in the number of loads hauled and increased revenue per load of approximately 4%. Reinsurance premiums from third party insurance companies that provide insurance programs to BCO Independent Contractors where all or a portion of the risk of loss is ultimately borne by Signature, were \$10,584,000 and \$9,344,000 for the 2015 and 2014 thirteen-week periods, respectively. The increase in revenue from reinsurance premiums was primarily attributable to the net increase in the number of BCO Independent Contractors in the 2015 thirteen-week period compared to the 2014 thirteen-week period.

Truck transportation revenue hauled by BCO Independent Contractors and Truck Brokerage Carriers (together, the third party truck capacity providers) for the thirteen-week period ended March 28, 2015, was \$708,869,000, or 93% of total revenue, an increase of \$63,704,000, or 10%, compared to the 2014 thirteen-week period. The number of loads hauled by third party truck capacity providers in the 2015 thirteen-week period increased approximately 6% compared to the 2014 thirteen-week period, and revenue per load increased approximately 3% compared to the 2014 thirteen-week period. The increase in the number of loads hauled via third party truck capacity providers was due to a broad-based increase in demand for truck transportation services, particularly truck transportation services provided on van trailing equipment, and increased market share from new agents. The increase in revenue per load on loads hauled via truck was primarily attributable to increased demand and a tight truck capacity environment, partially offset by the impact of lower diesel fuel costs on loads hauled via Truck Brokerage Carriers and a decrease in the number of loads hauled via unsided/platform equipment as a percentage of total truck revenue, which typically have a higher revenue per load. Loads hauled via van equipment increased 7% and revenue per load on loads hauled via van equipment increased 6% compared to the 2014 thirteen-week period. Loads hauled via unsided/platform equipment remained approximately flat while revenue per load on loads hauled via unsided/platform equipment increased 3% compared to the 2014 thirteen-week period. The increase in the number of less-than-truckload (LTL) loads of 32% compared to the 2014 thirteen-week period was primarily due to increased loadings at one specific customer. The decrease in LTL revenue per load of 12% compared to the 2014 thirteen-week period was primarily due to increased loadings at one specific customer, which had a comparatively low revenue per load. Fuel surcharges on Truck Brokerage Carrier revenue identified separately in billings to customers and included as a component of Truck Brokerage Carrier revenue were \$22,983,000 and \$27,040,000 in the 2015 and 2014 periods, respectively. Fuel surcharges billed to customers on revenue hauled by BCO Independent Contractors are excluded from revenue.

Transportation revenue hauled by rail intermodal, air cargo and ocean cargo carriers (collectively, the multimode capacity providers) for the thirteen-week period ended March 28, 2015, was \$42,813,000, or 6% of total revenue, an increase of \$9,302,000, or 28%, compared to the 2014 thirteen-week period. The number of loads hauled by multimode capacity providers in the 2015 thirteen-week period increased approximately 32% compared to the 2014 thirteen-week period, while revenue per load on revenue hauled by multimode capacity providers decreased approximately 3% over the same period. The increase in loads hauled by multimode capacity providers was primarily due to increased rail intermodal loads. The decrease in revenue per load on revenue hauled by multimode capacity providers was primarily due to a decreased revenue per load on rail intermodal loads and an increase in intermodal loads as a percentage of multimode loads, as intermodal loads generally generate a lower revenue per load amount compared to loads hauled by ocean or air cargo carriers. Also, revenue per load on revenue hauled by multimode capacity providers is influenced by many factors, including revenue mix among the various modes of transportation used, length of haul, complexity of freight, density of freight lanes, fuel costs and availability of capacity.

Table of Contents

Purchased transportation was 77.0% of revenue in both of the 2015 and 2014 thirteen-week periods. Purchased transportation as a percentage of revenue was flat in the 2015 thirteen-week period compared to the 2014 thirteen-week period as the effect of the increase in the purchased transportation rate due to an increase in the percentage of revenue hauled by Truck Brokerage Carriers, which typically has a higher rate of purchased transportation than revenue hauled by BCO Independent Contractors, was offset by the effect of a decreased rate of purchased transportation paid to Truck Brokerage Carriers. Commissions to agents were 7.8% and 7.7% of revenue in the 2015 and 2014 periods, respectively. The increase in commissions to agents as a percentage of revenue was primarily attributable to an increased net revenue margin on revenue hauled by Truck Brokerage Carriers.

Investment income was \$354,000 and \$363,000 in the 2015 and 2014 thirteen-week periods, respectively.

Other operating costs increased \$1,103,000 in the 2015 thirteen-week period compared to the 2014 thirteen-week period and represented 6.7% of gross profit in the 2015 period compared to 6.2% of gross profit in the 2014 period. The increase in other operating costs compared to the prior year was primarily due to increased trailing equipment maintenance and rental costs. The increase in other operating costs as a percentage of gross profit was primarily caused by the increase in trailing equipment costs, partially offset by the effect of increased gross profit.

Insurance and claims increased \$2,939,000 in the 2015 thirteen-week period compared to the 2014 thirteen-week period and represented 12.8% of gross profit in the 2015 period compared to 11.2% of gross profit in the 2014 period. The increase in insurance and claims compared to prior year was due to increased net unfavorable development of prior years' claims in the 2015 period as unfavorable development of prior year claims was \$4,641,000 and \$1,891,000 in the 2015 and 2014 thirteen-week periods, respectively. The unfavorable development of prior years' claims in the 2015 fiscal period primarily related to a \$4,500,000 charge related to a single accident that occurred in 2011. The increase in insurance and claims as a percent of gross profit was primarily caused by a single claim, partially offset by the effect of increased gross profit.

Selling, general and administrative costs increased \$1,648,000 in the 2015 thirteen-week period compared to the 2014 thirteen-week period and represented 32.3% of gross profit in the 2015 period compared to 33.8% of gross profit in the 2014 period. The increase in selling, general and administrative costs compared to prior year was primarily due to increased employee wages, benefits and stock-based compensation expense, partially offset by a decreased provision for bonuses under the Company's incentive compensation plan in the 2015 period. The decrease in selling, general and administrative costs as a percent of gross profit, however, was primarily due to the effect of increased gross profit, which more than offset the effect of the increase in selling, general and administrative costs.

Depreciation and amortization increased \$251,000 in the 2015 thirteen-week period compared to the 2014 thirteen-week period and represented 6.1% of gross profit in the 2015 period compared to 6.4% of gross profit in the 2014 period. The increase in depreciation and amortization costs were primarily due to depreciation on new trailing equipment that replaced older, fully depreciated trailing equipment. The decrease in depreciation and amortization as a percentage of gross profit was primarily due to the effect of increased gross profit.

Interest and debt expense in the 2015 thirteen-week period was \$13,000 higher than the 2014 thirteen-week period.

The provisions for income taxes for both the 2015 and 2014 thirteen-week periods were based on estimated annual effective income tax rates of approximately 38.2%, adjusted for discrete events, such as benefits resulting from disqualifying dispositions of the Company's common stock by employees who obtained the stock through exercises of incentive stock options. The effective income tax rates for the 2015 and 2014 thirteen-week periods were 37.8% and 37.5%, respectively, which were higher than the statutory federal income tax rate primarily as a result of state taxes, the meals and entertainment exclusion and non-deductible stock compensation expense. The effective income tax rates

Edgar Filing: LANDSTAR SYSTEM INC - Form 10-Q

in the 2015 and 2014 thirteen-week periods were less than the 38.2% estimated annual effective income tax rate primarily due to disqualifying dispositions of the Company's common stock by employees who obtained the stock through exercises of incentive stock options in each year.

Net income was \$30,015,000, or \$0.67 per common share (\$0.67 per diluted share), in the 2015 thirteen-week period. Net income was \$27,638,000, or \$0.61 per common share (\$0.61 per diluted share), in the 2014 thirteen-week period.

Table of Contents**CAPITAL RESOURCES AND LIQUIDITY**

Working capital and the ratio of current assets to current liabilities were \$314,695,000 and 2.0 to 1, respectively, at March 28, 2015, compared with \$321,877,000 and 1.8 to 1, respectively, at December 27, 2014. Landstar has historically operated with current ratios within the range of 1.5 to 1 to 2.0 to 1. Cash provided by operating activities was \$49,270,000 in the 2015 thirteen-week period compared with \$13,669,000 in the 2014 thirteen-week period. The increase in cash flow provided by operating activities was primarily attributable to the collection of trade receivables since the beginning of the fiscal year 2015.

The Company declared and paid \$0.07 per share, or \$3,112,000 in the aggregate, in cash dividends during the thirteen-week period ended March 28, 2015 and, during such period, also paid \$44,794,000 of dividends payable which were declared during fiscal year 2014 and included in current liabilities in the consolidated balance sheet at December 27, 2014. The Company declared and paid \$0.06 per share, or \$2,720,000 in the aggregate, in cash dividends during the thirteen-week period ended March 29, 2014 and, during such period, also paid \$15,921,000 of dividends payable which were declared during fiscal year 2013 and included in current liabilities in the consolidated balance sheet at December 28, 2013. During the thirteen-week period ended March 28, 2015, the Company purchased 464,469 shares of its common stock at a total cost of \$31,300,000. As of March 28, 2015, the Company may purchase up to an additional 1,363,313 shares of its common stock under its authorized stock purchase program. Long-term debt, including current maturities, was \$102,103,000 at March 28, 2015, \$9,218,000 lower than at December 27, 2014.

Shareholders' equity was \$484,325,000, or 83% of total capitalization (defined as long-term debt including current maturities plus equity), at March 28, 2015, compared to \$488,261,000, or 81% of total capitalization, at December 27, 2014. The decrease in equity was primarily a result of the purchases of shares of the Company's common stock and dividends declared by the Company in the 2015 thirteen-week period, partially offset by net income.

On June 29, 2012, Landstar entered into a credit agreement with a syndicate of banks and JPMorgan Chase Bank, N.A., as administrative agent (the "Credit Agreement"). The Credit Agreement, which matures on June 29, 2017, provides \$225,000,000 of borrowing capacity in the form of a revolving credit facility, \$75,000,000 of which may be utilized in the form of letter of credit guarantees.

The Credit Agreement contains a number of covenants that limit, among other things, the incurrence of additional indebtedness. The Company is required to, among other things, maintain a minimum Fixed Charge Coverage Ratio, as defined in the Credit Agreement, and maintain a Leverage Ratio, as defined in the Credit Agreement, below a specified maximum. The Credit Agreement provides for a restriction on cash dividends and other distributions to stockholders on the Company's capital stock to the extent there is a default under the Credit Agreement. In addition, the Credit Agreement under certain circumstances limits the amount of such cash dividends and other distributions to stockholders to the extent that, after giving effect to any payment made to effect such cash dividend or other distribution, the Leverage Ratio would exceed 2.5 to 1 on a pro forma basis as of the end of the Company's most recently completed fiscal quarter. The Credit Agreement provides for an event of default in the event that, among other things, a person or group acquires 25% or more of the outstanding capital stock of the Company or obtains power to elect a majority of the Company's directors. None of these covenants are presently considered by management to be materially restrictive to the Company's operations, capital resources or liquidity. The Company is currently in compliance with all of the debt covenants under the Credit Agreement.

At March 28, 2015, the Company had no borrowings outstanding and \$33,033,000 of letters of credit outstanding under the Credit Agreement. At March 28, 2015, there was \$191,967,000 available for future borrowings under the Credit Agreement. In addition, the Company has \$57,810,000 in letters of credit outstanding as collateral for

insurance claims that are secured by investments and cash equivalents totaling \$64,233,000 at March 28, 2015. Investments, all of which are carried at fair value, include primarily investment-grade bonds and U.S. Treasury obligations having maturities of up to five years. Fair value of investments is based primarily on quoted market prices. See Notes to Consolidated Financial Statements for further discussion on measurement of fair value of investments.

Historically, the Company has generated sufficient operating cash flow to meet its debt service requirements, fund continued growth, both internal and through acquisitions, complete or execute share purchases of its common stock under authorized share purchase programs, pay dividends and meet working capital needs. As an asset-light provider of integrated transportation management solutions, the Company's annual capital requirements for operating property are generally for trailing equipment and information technology hardware and software. In addition, a significant portion of the trailing equipment used by the Company is provided by third party capacity providers, thereby reducing the Company's capital requirements. During the 2015 thirteen-week period, the Company purchased \$2,450,000 of operating property. Landstar anticipates acquiring approximately \$70,000,000 in operating property, primarily new trailing equipment to replace older trailing equipment and information technology equipment, during the remainder of fiscal year 2015 either by purchase or lease financing. In addition, the Company has entered an agreement to purchase a parcel of land in Laredo, Texas for approximately \$4,500,000 and intends to build a freight staging and transload facility on the land.

Table of Contents

Management believes that cash flow from operations combined with the Company's borrowing capacity under the Credit Agreement will be adequate to meet Landstar's debt service requirements, fund continued growth, both internal and through acquisitions, pay dividends, complete the authorized share purchase program and meet working capital needs.

LEGAL MATTERS

On March 13, 2015, a jury in state court in Maricopa County, Arizona, rendered a verdict (the Verdict) of \$19,250,000 against Landstar Ranger, Inc. in the matter of Bruno v. Landstar Ranger, Inc., in connection with a tragic vehicular accident that occurred on July 19, 2011, on US-93 north of Kingman, Arizona. The accident involved a tractor-trailer leased to Landstar Ranger, Inc., by a truck owner-operator. The truck had pulled off the highway due to mechanical issues and parked in a designated pull-off area. A pick-up truck driven by the decedent lost control while driving on the highway following a tire tread delamination while the decedent may have been engaged with his cell phone. The pick-up truck hit the right rear portion of the trailer of the tractor-trailer approximately 20 to 25 feet from the fog line of the highway. The accident occurred at approximately 2 p.m. on a clear, dry day. The decedent's wife, one of his daughters and two friends of the family were in the car at the time of the accident. As a result of the accident, the decedent's wife, his daughter and one of the friends sustained non-life threatening injuries. In connection with the Verdict, the jury determined that Landstar Ranger, Inc. was responsible for 100% of the liability associated with the accident.

During the trial and prior to the Verdict, the parties entered into an agreement that, among other things, limited the Company's financial exposure from the possibility of an adverse verdict to \$4,500,000 and all parties waived all appellate rights following the trial. As a result of the Verdict and the agreement with the plaintiffs, the Verdict resulted in a pre-tax charge of \$4,500,000, or approximately \$0.06 per share, to the Company's financial results from operations for the 2015 first quarter.

The Company is involved in certain claims and pending litigation, including those described herein, arising from the normal conduct of business. Many of these claims are covered in whole or in part by insurance. Based on knowledge of the facts and, in certain cases, opinions of outside counsel, management believes that adequate provisions have been made for probable losses with respect to the resolution of all such claims and pending litigation and that the ultimate outcome, after provisions therefor, will not have a material adverse effect on the financial condition of the Company, but could have a material effect on the results of operations in a given quarter or year.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The allowance for doubtful accounts for both trade and other receivables represents management's estimate of the amount of outstanding receivables that will not be collected. Historically, management's estimates for uncollectible receivables have been materially correct. Although management believes the amount of the allowance for both trade and other receivables at March 28, 2015 is appropriate, a prolonged period of low or no economic growth may adversely affect the collection of these receivables. In addition, liquidity concerns and/or unanticipated bankruptcy proceedings at any of the Company's larger customers in which the Company is carrying a significant receivable could result in an increase in the provision for uncollectible receivables and have a significant impact on the Company's results of operations in a given quarter or year. However, it is not expected that an uncollectible accounts receivable resulting from an individual customer would have a significant impact on the Company's financial condition. Conversely, a more robust economic environment or the recovery of a previously provided for uncollectible receivable from an individual customer may result in the realization of some portion of the estimated uncollectible receivables.

Landstar provides for the estimated costs of self-insured claims primarily on an actuarial basis. The amount recorded for the estimated liability for claims incurred is based upon the facts and circumstances known on the applicable balance sheet date. The ultimate resolution of these claims may be for an amount greater or less than the amount estimated by management. The Company continually revises its existing claim estimates as new or revised information becomes available on the status of each claim. Historically, the Company has experienced both favorable and unfavorable development of prior years' claims estimates. During the 2015 and 2014 thirteen-week periods, insurance and claims costs included \$4,641,000 and \$1,891,000 of net unfavorable adjustments to prior years' claims estimates, respectively. The unfavorable development of prior years' claims in the 2015 fiscal period primarily related to a single claim for which the Company incurred a pre-tax charge of \$4,500,000. It is reasonably likely that the ultimate outcome of settling all outstanding claims will be more or less than the estimated claims reserve at March 28, 2015.

The Company utilizes certain income tax planning strategies to reduce its overall cost of income taxes. If the Company were to be subject to an audit, it is possible that certain strategies might be disallowed resulting in an increased liability for income taxes. Certain of

Table of Contents

these tax planning strategies result in a level of uncertainty as to whether the related tax positions taken by the Company would result in a recognizable benefit. The Company has provided for its estimated exposure attributable to such tax positions due to the corresponding level of uncertainty with respect to the amount of income tax benefit that may ultimately be realized. Management believes that the provision for liabilities resulting from the uncertainty in certain income tax positions is appropriate. To date, the Company has not experienced an examination by governmental revenue authorities that would lead management to believe that the Company's past provisions for exposures related to the uncertainty of such income tax positions are not appropriate.

Significant variances from management's estimates for the amount of uncollectible receivables, the ultimate resolution of self-insured claims and the provision for uncertainty in income tax positions could each be expected to positively or negatively affect Landstar's earnings in a given quarter or year. However, management believes that the ultimate resolution of these items, given a range of reasonably likely outcomes, will not significantly affect the long-term financial condition of Landstar or its ability to fund its continuing operations.

EFFECTS OF INFLATION

Management does not believe inflation has had a material impact on the results of operations or financial condition of Landstar in the past five years. However, inflation in excess of historic trends might have an adverse effect on the Company's results of operations in the future.

SEASONALITY

Landstar's operations are subject to seasonal trends common to the trucking industry. Results of operations for the quarter ending in March are typically lower than for the quarters ending June, September and December.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to changes in interest rates as a result of its financing activities, primarily its borrowings on its revolving credit facility, and investing activities with respect to investments held by the insurance segment.

On June 29, 2012, Landstar entered into a credit agreement with a syndicate of banks and JPMorgan Chase Bank, N.A., as administrative agent (the "Credit Agreement"). The Credit Agreement, which matures on June 29, 2017, provides \$225,000,000 of borrowing capacity in the form of a revolving credit facility, \$75,000,000 of which may be utilized in the form of letter of credit guarantees.

Depending upon the specific type of borrowing, borrowings under the Credit Agreement bear interest based on either (a) the prime rate, (b) the federal funds effective rate, (c) the rate at the time offered to JPMorgan Chase Bank, N.A. in the Eurodollar market or (d) the London Interbank Offered Rate, plus a margin that is determined based on the level of the Company's Leverage Ratio, as defined in the Credit Agreement. As of March 28, 2015 and during all of the first quarter of 2015, the Company had no borrowings outstanding under the Credit Agreement. The Credit Agreement maturity date is June 29, 2017.

Long-term investments, all of which are available-for-sale and are carried at fair value, include primarily investment-grade bonds and U.S. Treasury obligations having maturities of up to five years. Assuming that the long-term portion of investments remains at \$66,954,000, the balance at March 28, 2015, a hypothetical increase or decrease in interest rates of 100 basis points would not have a material impact on future earnings on an annualized basis. Short-term investments consist of short-term investment-grade instruments and the current maturities of investment-grade corporate bonds and U.S. Treasury obligations. Accordingly, any future interest rate risk on these

short-term investments would not be material to the Company's operating results.

Assets and liabilities of the Company's Canadian operations are translated from their functional currency to U.S. dollars using exchange rates in effect at the balance sheet date and revenue and expense accounts are translated at average monthly exchange rates during the period. Adjustments resulting from the translation process are included in accumulated other comprehensive income. Transactional gains and losses arising from receivable and payable balances, including intercompany balances, in the normal course of business that are denominated in a currency other than the functional currency of the operation are recorded in the statements of income when they occur. The assets held at the Company's Canadian subsidiary at March 28, 2015 were, as translated to U.S. dollars, less than 1% of total consolidated assets. Accordingly, any translation gain or loss related to the Canadian operation would not be material.

Table of Contents

Item 4. Controls and Procedures

As of the end of the period covered by this quarterly report on Form 10-Q, an evaluation was carried out, under the supervision and with the participation of the Company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended). Based on that evaluation, the CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of March 28, 2015 to provide reasonable assurance that information required to be disclosed by the Company in reports that it filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

There were no significant changes in the Company's internal control over financial reporting during the Company's fiscal quarter ended March 28, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

In designing and evaluating controls and procedures, Company management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of the inherent limitation in any control system, no evaluation or implementation of a control system can provide complete assurance that all control issues and all possible instances of fraud have been or will be detected.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

On March 13, 2015, a jury in state court in Maricopa County, Arizona, rendered a verdict (the Verdict) of \$19,250,000 against Landstar Ranger, Inc. in the matter of Bruno v. Landstar Ranger, Inc., in connection with a tragic vehicular accident that occurred on July 19, 2011, on US-93 north of Kingman, Arizona. The accident involved a tractor-trailer leased to Landstar Ranger, Inc., by a truck owner-operator. The truck had pulled off the highway due to mechanical issues and parked in a designated pull-off area. A pick-up truck driven by the decedent lost control while driving on the highway following a tire tread delamination while the decedent may have been engaged with his cell phone. The pick-up truck hit the right rear portion of the trailer of the tractor-trailer approximately 20 to 25 feet from the fog line of the highway. The accident occurred at approximately 2 p.m. on a clear, dry day. The decedent's wife, one of his daughters and two friends of the family were in the car at the time of the accident. As a result of the accident, the decedent's wife, his daughter and one of the friends sustained non-life threatening injuries. In connection with the Verdict, the jury determined that Landstar Ranger, Inc. was responsible for 100% of the liability associated with the accident.

During the trial and prior to the Verdict, the parties entered into an agreement that, among other things, limited the Company's financial exposure from the possibility of an adverse verdict to \$4,500,000 and all parties waived all appellate rights following the trial. As a result of the Verdict and the agreement with the plaintiffs, the Verdict resulted in a pre-tax charge of \$4,500,000, or approximately \$0.06 per share, to the Company's financial results from operations for the 2015 first quarter.

The Company is involved in certain claims and pending litigation, including those described herein, arising from the normal conduct of business. Many of these claims are covered in whole or in part by insurance. Based on knowledge of the facts and, in certain cases, opinions of outside counsel, management believes that adequate provisions have been made for probable losses with respect to the resolution of all such claims and pending litigation and that the ultimate outcome, after provisions therefor, will not have a material adverse effect on the financial condition of the Company, but could have a material effect on the results of operations in a given quarter or year.

Item 1A. Risk Factors

For a discussion identifying additional risk factors and other important factors that could cause actual results to differ materially from those anticipated, see the discussions under Part I, Item 1A, *Risk Factors* in the Company's Annual Report on Form 10-K for the fiscal year ended December 27, 2014, and in *Management's Discussion and Analysis of Financial Condition and Results of Operations* and *Notes to Consolidated Financial Statements* in this Quarterly Report on Form 10-Q.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**
Purchases of Equity Securities by the Company

The following table provides information regarding the Company's purchase of its common stock during the period from December 28, 2014 to March 28, 2015, the Company's first fiscal quarter:

Fiscal Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Maximum Number of Shares That May Yet Be Purchased Under the Program
December 27, 2014				1,827,782
Dec. 28, 2014 Jan. 24, 2015		\$		1,827,782
Jan. 25, 2015 Feb. 21, 2015	464,469	67.39	464,469	1,363,313
Feb. 22, 2015 Mar. 28, 2015				1,363,313
Total	464,469	\$ 67.39	464,469	

On December 11, 2013, Landstar System, Inc. announced that it had been authorized by its Board of Directors to increase the number of shares of the Company's common stock that the Company is authorized to purchase from time to time in the open market and in privately negotiated transactions under a previously announced purchase program to 3,000,000 shares. As of March 28, 2015, the Company has authorization to purchase 1,363,313 shares of its common stock under this program. No specific expiration date has been assigned to the December 11, 2013 authorization.

Dividends

During the thirteen-week period ended March 28, 2015, Landstar paid dividends as follows:

Dividend Amount per Share	Declaration Date	Record Date	Payment Date
\$ 1.00	December 3, 2014	January 12, 2015	January 26, 2015
\$ 0.07	January 27, 2015	February 16, 2015	March 13, 2015

Dividends payable of \$1.00 per share, or \$44,794,000 in the aggregate, was included in current liabilities in the consolidated balance sheet at December 27, 2014.

On June 29, 2012, Landstar entered into a credit agreement with a syndicate of banks and JPMorgan Chase Bank, N.A., as administrative agent (the "Credit Agreement"). The Credit Agreement provides for a restriction on cash dividends and other distributions to stockholders on the Company's capital stock in the event there is a default under the Credit Agreement. In addition, the Credit Agreement, under certain circumstances, limits the amount of such cash dividends and other distributions to stockholders to the extent that, after giving effect to any payment made to effect such cash dividend or other distribution, the Leverage Ratio, as defined in the Credit Agreement, would exceed 2.5 to 1 on a pro forma basis as of the end of the Company's most recently completed fiscal quarter.
