Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995.

This quarterly report on Form 10-Q contains forward-looking statements about U.S. Bancorp. Statements that are not historical or current facts, including statements about beliefs and expectations, are forward-looking statements and are based on the information available to, and assumptions and estimates made by, management as of the date hereof. These forward-looking statements cover, among other things, anticipated future revenue and expenses and the future plans and prospects of U.S. Bancorp. Forward-looking statements involve inherent risks and uncertainties, and important factors could cause actual results to differ materially from those anticipated. A reversal or slowing of the current economic recovery or another severe contraction could adversely affect U.S. Bancorp's revenues and the values of its assets and liabilities. Global financial markets could experience a recurrence of significant turbulence, which could reduce the availability of funding to certain financial institutions and lead to a tightening of credit, a reduction of business activity, and increased market volatility. Stress in the commercial real estate markets, as well as a downturn in the residential real estate markets could cause credit losses and deterioration in asset values. In addition, U.S. Bancorp's business and financial performance is likely to be negatively impacted by recently enacted and future legislation and regulation. U.S. Bancorp's results could also be adversely affected by deterioration in general business and economic conditions; changes in interest rates; deterioration in the credit quality of its loan portfolios or in the value of the collateral securing those loans; deterioration in the value of securities held in its investment securities

portfolio; legal and regulatory developments; litigation; increased competition from both banks and non-banks; changes in customer behavior and preferences; breaches in data security; effects of mergers and acquisitions and related integration; effects of critical accounting policies and judgments; and management's ability to effectively manage credit risk, residual value risk, market risk, operational risk, compliance risk, strategic risk, interest rate risk, liquidity risk and reputation risk.

For discussion of these and other risks that may cause actual results to differ from expectations, refer to U.S. Bancorp's Annual Report on Form 10-K for the year ended December 31, 2014, on file with the Securities and Exchange Commission, including the sections entitled "Risk Factors" and "Corporate Risk Profile" contained in Exhibit 13, and all subsequent filings with the Securities and Exchange Commission under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934. However, factors other than these also could adversely affect U.S. Bancorp's results, and the reader should not consider these factors to be a complete set of all potential risks or uncertainties.

Forward-looking statements speak only as of the date hereof, and U.S. Bancorp undertakes no obligation to update them in light of new information or future events.

U.S. Bancorp

Management's Discussion and Analysis

OVERVIEW

Earnings Summary U.S. Bancorp and its subsidiaries (the Company) reported net income attributable to U.S. Bancorp of \$1.5 billion for the second quarter of 2015, or \$0.80 per diluted common share, compared with \$1.5 billion, or \$0.78 per diluted common share, for the second quarter of 2014. Return on average assets and return on average common equity were 1.46 percent and 14.3 percent, respectively, for the second quarter of 2015, compared with 1.60 percent and 15.1 percent, respectively, for the second quarter of 2014.

Total net revenue, on a taxable-equivalent basis, for the second quarter of 2015 was \$146 million (2.8 percent) lower than the second quarter of 2014, reflecting a 7.0 percent decrease in noninterest income, partially offset by a 0.9 percent increase in net interest income. The decrease in noninterest income from the second quarter of 2014 was primarily due to lower other income from the sale of shares of stock of Visa Inc. (Visa stock sales) and lower mortgage banking revenue, partially offset by increases in trust and investment management fees, merchant processing services and credit and debit card revenue. The increase in net interest income was the result of an increase in average earning assets and continued growth in lower cost core deposit funding, partially offset by a decrease in the net interest margin.

Noninterest expense in the second quarter of 2015 was \$71 million (2.6 percent) lower than the second quarter of 2014, primarily due to a settlement relating to the Federal Housing Administration's insurance program (FHA DOJ settlement) recorded in the second quarter of 2014, partially offset by an increase in compensation expense, primarily reflecting the impact of merit increases, the June 2014 acquisition of the Chicago-area branch banking operations of the Charter One Bank franchise (Charter One), and higher staffing for risk, compliance and internal audit activities, as well as increased employee benefits expense mainly due to higher pension costs, and higher expenses related to mortgage servicing activities.

The provision for credit losses for the second quarter of 2015 of \$281 million was \$43 million (13.3 percent) lower than the second quarter of 2014. Net charge-offs in the second quarter of 2015 were \$296 million, compared with \$349 million in the second quarter of 2014. Refer to Corporate Risk Profile for further information on the provision for credit losses, net charge-offs, nonperforming assets and other factors considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for credit losses.

Net income attributable to U.S. Bancorp for the first six months of 2015 was \$2.9 billion, or \$1.56 per diluted common share, compared with \$2.9 billion, or \$1.51 per diluted common share, for the first six months of 2014. Return on average assets and return on average common equity were 1.45 percent and 14.2 percent, respectively, for the first six months of 2015, compared with 1.58 percent and 14.9 percent, respectively, for the first six months of 2014.

Total net revenue, on a taxable-equivalent basis, for the first six months of 2015 was \$54 million (0.5 percent) lower than the first six months of 2014, reflecting a 2.8 percent decrease in noninterest income, partially offset by a 1.3 percent increase in net interest income. The decrease in noninterest income from a year ago was primarily due to lower other income from Visa stock sales and lower mortgage banking revenue, partially offset by higher revenue in most other fee businesses. The increase in net interest income was the result of an increase in average earning assets and continued growth in lower cost core deposit funding, partially offset by a decrease in the net interest margin.

Noninterest expense in the first six months of 2015 was \$50 million (0.9 percent) higher than the first six months of 2014, primarily due to higher compensation and employee benefits expenses and costs related to mortgage servicing activities, partially offset by the second quarter 2014 FHA DOJ settlement.

The provision for credit losses for the first six months of 2015 of \$545 million was \$85 million (13.5 percent) lower than the first six months of 2014. Net charge-offs in the first six months of 2015 were \$575 million, compared with \$690 million in the first six months of 2014. Refer to Corporate Risk Profile for further information on the provision for credit losses, net charge-offs, nonperforming assets and other factors considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for credit losses.

STATEMENT OF INCOME ANALYSIS

Net Interest Income Net interest income, on a taxable-equivalent basis, was \$2.8 billion in the second quarter

U.S. Bancorp

3

Table of Contents

and \$5.5 billion in the first six months of 2015, representing increases of \$26 million (0.9 percent) and \$72 million (1.3 percent), respectively, over the same periods of 2014. The increases were principally the result of growth in average earning assets, partially offset by lower rates on new loans and a continued shift in loan portfolio mix, lower rates on investment securities and lower loan fees due to the wind down of the short-term, small-dollar deposit advance product, Checking Account Advance (CAA). Average earning assets were \$30.4 billion (9.1 percent) higher in the second quarter and \$32.5 billion (9.8 percent) higher in the first six months of 2015, compared with the same periods of 2014, driven by increases in investment securities, loans and loans held for sale. The net interest margin, on a taxable-equivalent basis, in the second quarter and first six months of 2015 was 3.03 percent and 3.05 percent, respectively, compared with 3.27 percent and 3.31 percent in the second quarter and first six months of 2014, respectively. The decreases in the net interest margin from the same periods of the prior year primarily reflected growth in the investment portfolio at lower average rates, as well as lower reinvestment rates on investment securities, lower loan fees due to the CAA product wind down, lower rates on new loans and a change in loan portfolio mix, partially offset by lower funding costs. Refer to the Consolidated Daily Average Balance Sheet and Related Yields and Rates tables for further information on net interest income.

Average investment securities for the second quarter and first six months of 2015 were \$14.8 billion (16.9 percent) and \$16.6 billion (19.6 percent) higher, respectively, than the same periods of 2014, primarily due to purchases of U.S. government and agency-backed securities, net of prepayments and maturities, to support regulatory liquidity coverage ratio requirements.

Average total loans for the second quarter and first six months of 2015 were \$6.1 billion (2.5 percent) and \$9.1 billion (3.8 percent) higher, respectively, than the same periods of 2014, the result of growth in commercial loans, commercial real estate loans, credit card loans and other retail loans, excluding the impact of the transfer of approximately \$3 billion of student loans from the loan portfolio to loans held for sale at the end of the first quarter of 2015 based on the Company's intent to sell these loans. The increases were driven by higher demand for loans from new and existing customers. The increases were partially offset by declines in residential mortgages and loans covered by loss sharing agreements with the Federal Deposit Insurance Corporation (FDIC), a run-off portfolio. Average loans acquired in FDIC-assisted transactions that are covered by loss sharing agreements with the FDIC (covered loans) decreased \$2.8 billion (35.4 percent) in the second quarter and \$2.9 billion (36.5 percent) in the first six months of 2015, compared with the same periods of 2014. The decreases were primarily the result of the expiration of the loss sharing agreements on commercial and commercial real estate assets at the end of 2014.

Average total deposits for the second quarter and first six months of 2015 were \$23.4 billion (8.9 percent) and \$22.2 billion (8.5 percent) higher, respectively, than the same periods of 2014. Average noninterest-bearing deposits for the second quarter and first six months of 2015 increased \$5.5 billion (7.7 percent) and \$4.6 billion (6.5 percent), respectively, over the same periods of the prior year, primarily in Wholesale Banking and Commercial Real Estate and Consumer and Small Business Banking. Average total savings deposits for the second quarter and first six months of 2015 were \$23.8 billion (16.1 percent) and \$22.3 billion (15.3 percent) higher, respectively, than the same periods of 2014, the result of growth in Consumer and Small Business Banking, including the impact of the Charter One branch acquisitions, corporate trust, and Wholesale Banking and Commercial Real Estate balances. The growth in average total savings deposits included increases in new accounts and increased balances from existing customers, including the continued strong participation in a savings product offered by Consumer and Small Business Banking. Average time deposits less than \$100,000 for the second quarter and first six months of 2015 were \$1.0 billion (9.5 percent) and \$1.0 billion (9.2 percent) lower, respectively, than the same periods of the prior year, due to maturities. Average time deposits greater than \$100,000 for the second quarter and first six months of 2015 were \$4.9 billion (15.7 percent) and \$3.7 billion (11.8 percent) lower, respectively, than the same periods of the prior year, primarily due to declines in Wholesale Banking and Commercial Real Estate, corporate trust and Consumer and Small Business Banking balances. Time deposits greater than \$100,000 are primarily managed as an alternative to other funding

sources, such as wholesale borrowing, based largely on funding needs and relative pricing.

Provision for Credit Losses The provision for credit losses for the second quarter and first six months of 2015 decreased \$43 million (13.3 percent) and \$85 million (13.5 percent), respectively, compared with the same periods of 2014. Net charge-offs decreased \$53 million (15.2 percent) and \$115 million (16.7 percent) in the second quarter and first six months of 2015, respectively, compared with the same periods of the prior year,

*Not meaningful.

reflecting improvements in residential mortgages, other retail, commercial, and construction and development loans. The provision for credit losses was lower than net charge-offs by \$15 million in the second quarter and \$30 million in the first six months of 2015, compared with \$25 million in the second quarter and \$60 million in the first six months of 2014. Refer to Corporate Risk Profile for further information on the provision for credit losses, net charge-offs, nonperforming assets and other factors considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for credit losses.

Noninterest Income Noninterest income was \$2.3 billion in the second quarter and \$4.4 billion in the first six months of 2015, representing decreases of \$172 million (7.0 percent) and \$126 million (2.8 percent), respectively, compared with the same periods of 2014. The decreases from a year ago were principally due to lower other income from Visa stock sales and lower mortgage banking revenue, partially offset by increases in other fee revenue categories. The decreases in mortgage banking revenue were primarily due to unfavorable changes in the valuation of mortgage servicing rights (MSRs), net of hedging activities, offset by increases in mortgage production revenue. Trust and investment management fees increased reflecting the benefits of the Company's investments in corporate trust and fund services businesses, as well as account growth and improved market conditions. Merchant processing services increased 2.9 percent in the second quarter and 1.9 percent in the first six months of 2015, compared with the same periods of 2014, due to higher transaction volumes and account growth. Adjusted for the impact of foreign currency rate changes, the increases would have been approximately 7.6 percent and 6.4 percent, respectively. In addition, credit and debit card revenue increased due to higher transaction volumes.

Noninterest Expense Noninterest expense was \$2.7 billion in the second quarter and \$5.3 billion in the first six months of 2015, representing a decrease of \$71 million (2.6 percent) and an increase of \$50 million (0.9 percent),

respectively, compared with the same periods of 2014. The changes from a year ago were primarily the result of higher compensation, employee benefits and mortgage servicing-related expenses in the current year, offset by the second quarter 2014 FHA DOJ settlement. The increases in compensation expense primarily reflected the impact of merit increases, the Charter One branch acquisitions, and higher staffing for risk, compliance and internal audit activities. The increases in employee benefits expense were primarily driven by higher pension costs. Postage, printing and supplies expense decreased from the same periods of the prior year reflecting reimbursement from a business partner.

Income Tax Expense The provision for income taxes was \$528 million (an effective rate of 26.1 percent) for the second quarter and \$1.0 billion (an effective rate of 25.5 percent) for the first six months of 2015, compared with \$547 million (an effective rate of 26.6 percent) and \$1.0 billion (an effective rate of 26.3 percent) for the same periods of 2014. For further information on income taxes, refer to Note 11 of the Notes to Consolidated Financial Statements.

BALANCE SHEET ANALYSIS

Loans The Company's loan portfolio was \$248.6 billion at June 30, 2015, compared with \$247.9 billion at December 31, 2014, an increase of \$788 million (0.3 percent). The increase was driven primarily by higher

(a) Computed as noninterest expense divided by the sum of net interest income on a taxable-equivalent basis and noninterest income excluding net securities gains (losses).

commercial loans, partially offset by lower credit card loans, commercial real estate loans, covered loans, residential mortgages and other retail loans, including the transfer of the student loans from the loan portfolio to loans held for sale at the end of the first quarter of 2015.

Commercial loans increased \$4.2 billion (5.3 percent) at June 30, 2015, compared with December 31, 2014, reflecting higher demand from new and existing customers. In addition, excluding student loans, other retail loans increased \$1.5 billion (3.2 percent) at June 30, 2015, compared with December 31, 2014. The increase was driven primarily by higher auto and installment loan balances.

Credit card and commercial real estate loans decreased \$727 million (3.9 percent) and \$537 million (1.3 percent), respectively, at June 30, 2015, compared with December 31, 2014, primarily the result of customers paying down balances.

Residential mortgages held in the loan portfolio decreased \$282 million (0.5 percent) at June 30, 2015, compared with December 31, 2014, reflecting higher loan prepayments due to the low interest rate environment. Residential mortgages originated and placed in the Company's loan portfolio include well-secured jumbo mortgages and branch-originated first lien home equity loans to borrowers with high credit quality. The Company generally retains portfolio loans through maturity; however, the Company's intent may change over time based upon various factors such as ongoing asset/liability management activities, assessment of product profitability, credit risk, liquidity needs, and capital implications. If the Company's intent or ability to hold an existing portfolio loan changes, the loan is transferred to loans held for sale.

Loans Held for Sale Loans held for sale, consisting of residential mortgages and other loans to be sold in the secondary market, were \$8.5 billion at June 30, 2015, compared with \$4.8 billion at December 31, 2014. The increase in loans held for sale was principally due to the transfer of the student loan balances to loans held for sale at the end of the first quarter of 2015, as well as an increase in residential mortgage loans held for sale balances due to a higher level of mortgage loan closings.

Almost all of the residential mortgage loans the Company originates or purchases for sale follow guidelines that allow the loans to be sold into existing, highly liquid secondary markets; in particular in government agency transactions and to government-sponsored enterprises (GSEs).

Investment Securities Investment securities totaled \$103.3 billion at June 30, 2015, compared with \$101.0 billion at December 31, 2014. The \$2.3 billion (2.2 percent) increase reflected \$2.5 billion of net investment purchases, partially offset by a \$148 million unfavorable change in net unrealized gains (losses) on available-for-sale investment securities.

The Company's available-for-sale securities are carried at fair value with changes in fair value reflected in other comprehensive income (loss) unless a security is deemed to be other-than-temporarily impaired. At June 30, 2015, the Company's net unrealized gains on available-for-sale securities were \$489 million, compared with \$637 million at December 31, 2014. The unfavorable change in net unrealized gains (losses) was primarily due to decreases in the fair value of agency mortgage-backed and state and political securities as a result of changes in interest rates. Gross unrealized losses on available-for-sale securities totaled \$369 million at June 30, 2015, compared with \$343 million at December 31, 2014. At June 30, 2015, the Company had no plans to sell securities with unrealized losses, and believes it is more likely than not that it would not be required to sell such securities before recovery of their amortized cost.

In December 2013, U.S. banking regulators approved final rules that prohibit banks from holding

- (a) Information related to asset and mortgage-backed securities included above is presented based upon weighted-average maturities anticipating future prepayments.
- (b) Information related to obligations of state and political subdivisions is presented based upon yield to first optional call date if the security is purchased at a premium, yield to maturity if purchased at par or a discount.
- (c) Maturity calculations for obligations of state and political subdivisions are based on the first optional call date for securities with a fair value above par and contractual maturity for securities with a fair value equal to or below par.
- (d) The weighted-average maturity of the available-for-sale investment securities was 4.3 years at December 31, 2014, with a corresponding weighted-average yield of 2.32 percent. The weighted-average maturity of the held-to-maturity investment securities was 4.0 years at December 31, 2014, with a corresponding weighted-average yield of 1.92 percent.
- (e) Average yields are presented on a fully-taxable equivalent basis under a tax rate of 35 percent. Yields on available-for-sale and held-to-maturity investment securities are computed based on amortized cost balances, excluding any premiums or discounts recorded related to the transfer of investment securities at fair value from available-for-sale to held-to-maturity. Average yield and maturity calculations exclude equity securities that have no stated yield or maturity.

certain types of investments, such as investments in hedge and certain private equity funds. The Company does not anticipate the implementation of these final rules will require any significant liquidation of securities held or impairment charges. Refer to Notes 3 and 14 in the Notes to Consolidated Financial Statements for further information on investment securities.

Deposits Total deposits were \$296.8 billion at June 30, 2015, compared with \$282.7 billion at December 31, 2014, the result of increases in total savings deposits and noninterest-bearing deposits, partially offset by a decrease in time deposits. Money market savings account balances increased \$6.7 billion (8.8 percent) primarily due to higher corporate trust and Wholesale Banking and

U.S. Bancorp

7

Table of Contents

Commercial Real Estate balances. Savings account balances increased \$1.9 billion (5.5 percent), primarily due to continued strong participation in a savings product offered by Consumer and Small Business Banking, including an increase in new accounts and increased balances from existing customers. Interest checking balances increased \$1.4 billion (2.5 percent) primarily due to higher Consumer and Small Business Banking, and Wholesale Banking and Commercial Real Estate balances, partially offset by lower broker dealer balances. Noninterest-bearing deposits increased \$8.9 billion (11.5 percent) at June 30, 2015, compared with December 31, 2014, primarily due to higher corporate trust and Wholesale Banking and Commercial Real Estate balances. Time deposits less than \$100,000 decreased \$862 million (8.1 percent) at June 30, 2015, compared with December 31, 2014, primarily due to lower Consumer and Small Business Banking balances, the result of maturities. Time deposits greater than \$100,000 decreased \$3.9 billion (13.9 percent) at June 30, 2015, compared with December 31, 2014, primarily due to lower Wholesale Banking and Commercial Real Estate, and Consumer and Small Business Banking balances. Time deposits greater than \$100,000 are primarily managed as an alternative to other funding sources, such as wholesale borrowing, based largely on funding needs and relative pricing.

Borrowings The Company utilizes both short-term and long-term borrowings as part of its asset/liability management and funding strategies. Short-term borrowings, which include federal funds purchased, commercial paper, repurchase agreements, borrowings secured by high-grade assets and other short-term borrowings, were \$27.8 billion at June 30, 2015, compared with \$29.9 billion at December 31, 2014. The \$2.1 billion (7.1 percent) decrease in short-term borrowings was primarily due to decreases in short-term Federal Home Loan Bank advances and other short-term borrowings balances. Long-term debt was \$34.2 billion at June 30, 2015, compared with \$32.3 billion at December 31, 2014. The \$1.9 billion (5.8 percent) increase was primarily due to the issuance of \$2.3 billion of bank notes and a \$783 million increase in long-term Federal Home Loan Bank advances, partially offset by \$750 million of medium-term note and \$500 million of subordinated bank note maturities. Refer to the Liquidity Risk Management section for discussion of liquidity management of the Company.

CORPORATE RISK PROFILE

Overview Managing risks is an essential part of successfully operating a financial services company. The Company's Board of Directors has approved a risk management framework which establishes governance and risk management requirements for all risk-taking activities. This framework includes Company and business line risk appetite statements which set boundaries for the types and amount of risk that may be undertaken in pursuing business objectives and initiatives. The Board of Directors, through its Risk Management Committee, oversees performance relative to the risk management framework, risk appetite statements, and other policy requirements.

The Executive Risk Committee (ERC), which is chaired by the Chief Risk Officer and includes the Chief Executive Officer and other members of the executive management team, oversees execution against the risk management framework and risk appetite statements. The ERC focuses on current and emerging risks, including strategic and reputation risks, by directing timely and comprehensive actions. Senior operating committees have also been established, each responsible for overseeing a specified category of risk.

The Company's most prominent risk exposures are credit, interest rate, market, liquidity, operational, compliance, strategic, and reputation. Credit risk is the risk of not collecting the interest and/or the principal balance of a loan, investment or derivative contract when it is due. Interest rate risk is the potential reduction of net interest income or market valuations as a result of changes in interest rates. Market risk arises from fluctuations in interest rates, foreign exchange rates, and security prices that may result in changes in the values of financial instruments, such as trading and available-for-sale securities, mortgage loans held for sale, MSRs and derivatives that are accounted for on a fair value basis. Liquidity risk is the possible inability to fund obligations or new business at a reasonable cost and in a timely manner. Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, or

systems, or from external events, including the risk of loss resulting from breaches in data security. Operational risk can also include failures by third parties with which the Company does business. Compliance risk is the risk of loss arising from violations of, or nonconformance with, laws, rules, regulations, prescribed practices, internal policies, and procedures, or ethical standards, potentially exposing the Company to fines, civil money penalties, payment of damages, and the voiding of contracts. Compliance risk also arises in situations where the laws or rules governing certain Company products or activities of the Company's customers may be ambiguous or untested. Strategic risk is the risk to earnings or capital arising from adverse business decisions or improper implementation of those decisions. Reputation risk is the

Table of Contents

risk to current or anticipated earnings, capital, or franchise or enterprise value arising from negative public opinion. This risk may impair the Company's competitiveness by affecting its ability to establish new relationships or services, or continue servicing existing relationships. In addition to the risks identified above, other risk factors exist that may impact the Company. Refer to Risk Factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for a detailed discussion of these factors.

The Company's Board and management-level governance committees are supported by a three lines of defense model for establishing effective checks and balances. The first line of defense, the business lines, manages risks in conformity with established limits and policy requirements. In turn, business leaders and their risk officers establish programs to ensure conformity with these limits and policy requirements. The second line of defense, which includes the Chief Risk Officer's organization as well as policy and oversight activities of corporate support functions, translates risk appetite and strategy into actionable risk limits and policies. The second line of defense monitors first line of defense conformity with limits and policies, and provides reporting and escalation of emerging risks and other concerns to senior management and the Risk Management Committee of the Board of Directors. The third line of defense, internal audit, is responsible for providing the Audit Committee of the Board of Directors and senior management with independent assessment and assurance regarding the effectiveness of the Company's governance, risk management, and control processes.

Management provides various risk reports to the Risk Management Committee of the Board of Directors. The Risk Management Committee discusses with management the Company's risk management performance, and provides a summary of key risks to the entire Board of Directors, covering the status of existing matters, areas of potential future concern, and specific information on certain types of loss events. The Risk Management Committee considers quarterly reports by management assessing the Company's performance relative to the risk appetite statements and the associated risk limits, including:

- Qualitative considerations, such as the macroeconomic environment, regulatory and compliance changes, litigation developments, and technology and cybersecurity;
- Capital ratios and projections, including regulatory measures and stressed scenarios;
- Credit measures, including adversely rated and nonperforming loans, leveraged transactions, credit concentrations and lending limits;
- Interest rate and market risk, including market value and net income simulation, and trading-related Value at Risk;
- Liquidity risk, including funding projections under various stressed scenarios;
- Operational and compliance risk, including losses stemming from events such as fraud, processing errors, control breaches, breaches in data security, or adverse business decisions, as well as reporting on technology performance, and various legal and regulatory compliance measures; and
- Reputation and strategic risk considerations, impacts and responses.

Credit Risk Management The Company's strategy for credit risk management includes well-defined, centralized credit policies, uniform underwriting criteria, and ongoing risk monitoring and review processes for all commercial and consumer credit exposures. In evaluating its credit risk, the Company considers changes, if any, in underwriting activities, the loan portfolio composition (including product mix and geographic, industry or customer-specific concentrations), trends in loan performance and macroeconomic factors, such as changes in unemployment rates, gross domestic product and consumer bankruptcy filings. The Risk Management Committee oversees the Company's credit risk management process.

In addition, credit quality ratings, as defined by the Company, are an important part of the Company's overall credit risk management and evaluation of its allowance for credit losses. Loans with a pass rating represent those loans not classified on the Company's rating scale for problem credits, as minimal risk has been identified. Loans with a special mention or classified rating, including loans that are 90 days or more past due and still accruing, nonaccrual loans,

those considered troubled debt restructurings (TDRs), and loans in a junior lien position that are current but are behind a modified or delinquent loan in a first lien position, encompass all loans held by the Company that it considers to have a potential or well-defined weakness that may put full collection of contractual cash flows at risk. The Company's internal credit quality ratings for consumer loans are primarily based on delinquency and nonperforming status, except for a limited population of larger loans within those portfolios that are individually evaluated. For this limited population, the determination of the internal credit quality rating may also consider collateral value and customer cash flows. The Company obtains recent collateral value estimates for the majority of its residential mortgage and home equity and second mortgage portfolios, which allows the Company to

U.S. Bancorp

9

Table of Contents

compute estimated loan-to-value (LTV) ratios reflecting current market conditions. These individual refreshed LTV ratios are considered in the determination of the appropriate allowance for credit losses. However, the underwriting criteria the Company employs consider the relevant income and credit characteristics of the borrower, such that the collateral is not the primary source of repayment. Refer to Note 4 in the Notes to Consolidated Financial Statements for further discussion of the Company's loan portfolios including internal credit quality ratings. In addition, refer to Management's Discussion and Analysis – Credit Risk Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for a more detailed discussion on credit risk management processes.

The Company manages its credit risk, in part, through diversification of its loan portfolio and limit setting by product type criteria and concentrations. As part of its normal business activities, the Company offers a broad array of lending products. The Company categorizes its loan portfolio into three segments, which is the level at which it develops and documents a systematic methodology to determine the allowance for credit losses. The Company's three loan portfolio segments are commercial lending, consumer lending and covered loans. The commercial lending segment includes loans and leases made to small business, middle market, large corporate, commercial real estate, financial institution, non-profit and public sector customers. Key risk characteristics relevant to commercial lending segment loans include the industry and geography of the borrower's business, purpose of the loan, repayment source, borrower's debt capacity and financial flexibility, loan covenants, and nature of pledged collateral, if any. These risk characteristics, among others, are considered in determining estimates about the likelihood of default by the borrowers and the severity of loss in the event of default. The Company considers these risk characteristics in assigning internal risk ratings to, or forecasting losses on, these loans which are the significant factors in determining the allowance for credit losses for loans in the commercial lending segment. At June 30, 2015, approximately \$3.3 billion of the commercial loans outstanding were to customers in energy-related businesses, compared with \$3.1 billion at December 31, 2014. The recent decline in energy prices has resulted in deterioration to some of these loans; however, its impact has not been material to the Company.

The consumer lending segment represents loans and leases made to consumer customers including residential mortgages, credit card loans, and other retail loans such as revolving consumer lines, auto loans and leases, and home equity loans and lines. Home equity or second mortgage loans are junior lien closed-end accounts fully disbursed at origination. These loans typically are fixed rate loans, secured by residential real estate, with a 10- or 15-year fixed payment amortization schedule. Home equity lines are revolving accounts giving the borrower the ability to draw and repay balances repeatedly, up to a maximum commitment, and are secured by residential real estate. These include accounts in either a first or junior lien position. Typical terms on home equity lines in the portfolio are variable rates benchmarked to the prime rate, with a 10- or 15-year draw period during which a minimum payment is equivalent to the monthly interest, followed by a 20- or 10-year amortization period, respectively. At June 30, 2015, substantially all of the Company's home equity lines were in the draw period. Approximately \$856 million, or 6 percent, of the outstanding home equity line balances at June 30, 2015, will enter the amortization period within the next 36 months. Key risk characteristics relevant to consumer lending segment loans primarily relate to the borrowers' capacity and willingness to repay and include unemployment rates and other economic factors, customer payment history and in some cases, updated LTV information on real estate based loans. These risk characteristics, among others, are reflected in forecasts of delinquency levels, bankruptcies and losses which are the primary factors in determining the allowance for credit losses for the consumer lending segment.

The covered loan segment represents loans acquired in FDIC-assisted transactions that are covered by loss sharing agreements with the FDIC that greatly reduce the risk of future credit losses to the Company. Key risk characteristics for covered segment loans are consistent with the segment they would otherwise be included in had the loss share coverage not been in place, but consider the indemnification provided by the FDIC.

The Company further disaggregates its loan portfolio segments into various classes based on their underlying risk characteristics. The two classes within the commercial lending segment are commercial loans and commercial real estate loans. The three classes within the consumer lending segment are residential mortgages, credit card loans and other retail loans. The covered loan segment consists of only one class.

The Company's consumer lending segment utilizes several distinct business processes and channels to originate consumer credit, including traditional branch lending, indirect lending, portfolio acquisitions, correspondent banks and loan brokers. Each distinct underwriting and origination activity manages unique credit risk characteristics and prices its loan production commensurate with the differing risk profiles.

Table of Contents

Residential mortgages are originated through the Company's branches, loan production offices and a wholesale network of originators. The Company may retain residential mortgage loans it originates on its balance sheet or sell the loans into the secondary market while retaining the servicing rights and customer relationships. Utilizing the secondary markets enables the Company to effectively reduce its credit and other asset/liability risks. For residential mortgages that are retained in the Company's portfolio and for home equity and second mortgages, credit risk is also diversified by geography and managed by adherence to LTV and borrower credit criteria during the underwriting process.

The Company estimates updated LTV information quarterly, based on a method that combines automated valuation model updates and relevant home price indices. LTV is the ratio of the loan's outstanding principal balance to the current estimate of property value. For home equity and second mortgages, combined loan-to-value (CLTV) is the combination of the first mortgage original principal balance and the second lien outstanding principal balance, relative to the current estimate of property value. Certain loans do not have a LTV or CLTV, primarily due to lack of availability of relevant automated valuation model and/or home price indices values, or lack of necessary valuation data on acquired loans.

The following tables provide summary information for the LTVs of residential mortgages and home equity and second mortgages by borrower type at June 30, 2015:

Table of Contents

At June 30, 2015 and December 31, 2014, approximately \$1.2 billion of residential mortgages were to customers that may be defined as sub-prime borrowers based on credit scores from independent agencies at loan origination. In addition to residential mortgages, at June 30, 2015, \$215 million of home equity and second mortgage loans were to customers that may be defined as sub-prime borrowers, compared with \$238 million at December 31, 2014. The total amount of consumer lending segment residential mortgage, home equity and second mortgage loans to customers that may be defined as sub-prime borrowers represented only 0.3 percent of total assets at June 30, 2015, compared with 0.4 percent at December 31, 2014. The Company considers sub-prime loans to be those made to borrowers with a risk of default significantly higher than those approved for prime lending programs, as reflected in credit scores obtained from independent agencies at loan origination, in addition to other credit underwriting criteria. Sub-prime portfolios include only loans originated according to the Company's underwriting programs specifically designed to serve customers with weakened credit histories. The sub-prime designation indicators have been and will continue to be subject to re-evaluation over time as borrower characteristics, payment performance and economic conditions change. The sub-prime loans originated during periods from June 2009 and after are with borrowers who met the Company's program guidelines and have a credit score that generally is at or below a threshold of 620 to 650 depending on the program. Sub-prime loans originated during periods prior to June 2009 were based upon program level guidelines without regard to credit score.

Covered loans included \$792 million in loans with negative-amortization payment options at June 30, 2015, compared with \$850 million at December 31, 2014. Other than covered loans, the Company does not have any residential mortgages with payment schedules that would cause balances to increase over time.

Home equity and second mortgages were \$16.1 billion at June 30, 2015, compared with \$15.9 billion at December 31, 2014, and included \$5.1 billion of home equity lines in a first lien position and \$11.0 billion of home equity and second mortgage loans and lines in a junior lien position. Loans and lines in a junior lien position at June 30, 2015, included approximately \$4.3 billion of loans and lines for which the Company also serviced the related first lien loan, and approximately \$6.7 billion where the Company did not service the related first lien loan. The Company was able to determine the status of the related first liens using information the Company has as the servicer of the first lien or information reported on customer credit bureau files. The Company also evaluates other indicators of credit risk for these junior lien loans and lines including delinquency, estimated average CLTV ratios and updated weighted-average credit scores in making its assessment of credit risk, related loss estimates and determining the allowance for credit losses.

The following table provides a summary of delinquency statistics and other credit quality indicators for the Company's junior lien positions at June 30, 2015:

(Dollars in Millions)	Junior Liens Behind		
	Company Owned or Serviced First Lien	Third Party First Lien	Total
Total	\$ 4,284	\$ 6,741	\$ 11,025
Percent 30-89 days past due	.23%	.42%	.35%
Percent 90 days or more past due	.06%	.11%	.09%
Weighted-average CLTV	77%	74%	75%
Weighted-average credit score	750	745	747

See the Analysis and Determination of the Allowance for Credit Losses section for additional information on how the Company determines the allowance for credit losses for loans in a junior lien position.

Commercial	.16%	.19%
Commercial real estate	.46	.65
Residential mortgages (a)	1.80	2.07
Credit card	1.12	1.30
Other retail (b)	.51	.53
Total loans, excluding covered loans	.70	.83
Covered loans	6.88	7.74
Total loans	.82%	.97%

(a) Delinquent loan ratios exclude \$2.9 billion at June 30, 2015, and \$3.1 billion at December 31, 2014, of loans purchased from GNMA mortgage pools whose repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Including these loans, the ratio of residential mortgages 90 days or more past due including all nonperforming loans was 7.41 percent at June 30, 2015, and 8.02 percent at December 31, 2014.

(b) Delinquent loan ratios exclude student loans that are guaranteed by the federal government. Including these loans, the ratio of total other retail loans 90 days or more past due including all nonperforming loans was .81 percent at June 30, 2015, and .84 percent at December 31, 2014.

Loan Delinquencies Trends in delinquency ratios are an indicator, among other considerations, of credit risk within the Company's loan portfolios. The Company measures delinquencies, both including and excluding nonperforming

loans, to enable comparability with other companies. Accruing loans 90 days or more past due totaled \$801 million (\$469 million excluding covered loans) at June 30, 2015, compared with \$945 million (\$550 million excluding covered loans) at December 31, 2014. These balances exclude loans purchased from Government National Mortgage Association (GNMA) mortgage pools whose repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Accruing loans 90 days or more past due are not included in nonperforming assets and continue to accrue interest because they are adequately secured by collateral, are in the process of collection and are reasonably expected to result in repayment or restoration to current status, or are managed in homogeneous portfolios with specified charge-off timeframes adhering to regulatory guidelines. The ratio of accruing loans 90 days or more past due to total loans was 0.32 percent (0.19 percent excluding covered loans) at June 30, 2015, compared with 0.38 percent (0.23 percent excluding covered loans) at December 31, 2014.

Table of Contents

Restructured Loans In certain circumstances, the Company may modify the terms of a loan to maximize the collection of amounts due when a borrower is experiencing financial difficulties or is expected to experience difficulties in the near-term. In most cases the modification is either a concessionary reduction in interest rate, extension of the maturity date or reduction in the principal balance that would otherwise not be considered.

Troubled Debt Restructurings Concessionary modifications are classified as TDRs unless the modification results in only an insignificant delay in the payments to be received. TDRs accrue interest if the borrower complies with the revised terms and conditions and has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles, which is generally six months or greater. At June 30, 2015, performing TDRs were \$4.9 billion, compared with \$5.1 billion at December 31, 2014. Loans classified as TDRs are considered impaired loans for reporting and measurement purposes.

The Company continues to work with customers to modify loans for borrowers who are experiencing financial difficulties, including those acquired through FDIC-assisted acquisitions. Many of the Company's TDRs are determined on a case-by-case basis in connection with ongoing loan collection processes. The modifications vary within each of the Company's loan classes. Commercial lending segment TDRs generally include extensions of the maturity date and may be accompanied by an increase or decrease to the interest rate. The Company may also work with the borrower to make other changes to the loan to mitigate losses, such as obtaining additional collateral and/or guarantees to support the loan.

The Company has also implemented certain residential mortgage loan restructuring programs that may result in TDRs. The Company participates in the U.S. Department of the Treasury Home Affordable Modification Program (HAMP). HAMP gives qualifying homeowners an opportunity to permanently modify their loan and achieve more affordable monthly payments, with the U.S. Department of the Treasury compensating the Company for a portion of the reduction in monthly amounts due from borrowers participating in this program. The Company also modifies residential mortgage loans under Federal Housing Administration, Department of Veterans Affairs, and its own internal programs. Under these programs, the Company provides concessions to qualifying borrowers experiencing financial difficulties. The concessions may include adjustments to interest rates, conversion of adjustable rates to fixed rates, extensions of maturity dates or deferrals of payments, capitalization of accrued interest and/or outstanding advances, or in limited situations, partial forgiveness of loan principal. In most instances, participation in residential mortgage loan restructuring programs requires the customer to complete a short-term trial period. A permanent loan modification is contingent on the customer successfully completing the trial period arrangement and the loan documents are not modified until that time. The Company reports loans in a trial period arrangement as TDRs and continues to report them as TDRs after the trial period.

Credit card and other retail loan TDRs are generally part of distinct restructuring programs providing customers modification solutions over a specified time period, generally up to 60 months.

In accordance with regulatory guidance, the Company considers secured consumer loans that have had debt discharged through bankruptcy where the borrower has not reaffirmed the debt to be TDRs. If the loan amount exceeds the collateral value, the loan is charged down to collateral value and the remaining amount is reported as nonperforming.

Modifications to loans in the covered segment are similar in nature to that described above for non-covered loans, and the evaluation and determination of TDR status is similar, except that acquired loans restructured after acquisition are not considered TDRs for purposes of the Company's accounting and disclosure if the loans evidenced credit deterioration as of the acquisition date and are accounted for in pools. Losses associated with modifications on covered loans, including the economic impact of interest rate reductions, are generally eligible for reimbursement

under the loss sharing agreements.

Residential mortgages	1,931	3.5	2.8	497	2,428(d)
Credit card	202	9.5	5.7	16(c)	218
Other retail	156	4.3	4.1	63(c)	219(e)
TDRs, excluding GNMA and covered loans	2,815	3.8	3.1	705	3,520
Loans purchased from GNMA mortgage pools	2,080	6.8	61.7		2,080(f)
Covered loans	31	1.1	10.4	4	35
Total	\$ 4,926	5.1%	27.9%	\$ 709	\$ 5,635

- (a) Primarily represents loans less than six months from the modification date that have not met the performance period required to return to accrual status (generally six months) and small business credit cards with a modified rate equal to 0 percent.
- (b) Primarily represents loans less than six months from the modification date that have not met the performance period required to return to accrual status (generally six months).
- (c) Primarily represents loans with a modified rate equal to 0 percent.
- (d) Includes \$320 million of residential mortgage loans to borrowers that have had debt discharged through bankruptcy and \$83 million in trial period arrangements or previously placed in trial period arrangements but not successfully completed.
- (e) Includes \$117 million of other retail loans to borrowers that have had debt discharged through bankruptcy and \$10 million in trial period arrangements or previously placed in trial period arrangements but not successfully completed.
- (f) Includes \$484 million of Federal Housing Administration and Department of Veterans Affairs residential mortgage loans to borrowers that have had debt discharged through bankruptcy and \$610 million in trial period arrangements or previously placed in trial period arrangements but not successfully completed.

Short-term Modifications The Company makes short-term modifications that it does not consider to be TDRs, in limited circumstances, to assist borrowers experiencing temporary hardships. Consumer lending programs include payment reductions, deferrals of up to three past due payments, and the ability to return to current status if the borrower makes required payments. The Company may also make short-term modifications to commercial lending loans, with the most common modification being an extension of the maturity date of three months or less. Such extensions generally are used when the maturity date is imminent and the borrower is experiencing some level of financial stress, but the Company believes the borrower will pay all contractual amounts owed. Short-term modified loans were not material at June 30, 2015.

Table of Contents

Nonperforming Assets The level of nonperforming assets represents another indicator of the potential for future credit losses. Nonperforming assets include nonaccrual loans, restructured loans not performing in accordance with modified terms and not accruing interest, restructured loans that have not met the performance period required to return to accrual status, other real estate owned and other nonperforming assets owned by the Company. Nonperforming assets are generally either originated by the Company or acquired under FDIC loss sharing agreements that substantially reduce the risk of credit losses to the Company. Interest payments collected from assets on nonaccrual status are generally applied against the principal balance and not recorded as income. However, interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible.

At June 30, 2015, total nonperforming assets were \$1.6 billion, compared with \$1.8 billion at December 31, 2014. The \$231 million (12.8 percent) decrease in nonperforming assets was primarily driven by reductions in commercial loans, commercial real estate loans and residential mortgages. Nonperforming covered assets at June 30, 2015, were \$46 million, compared with \$51 million at December 31, 2014. The ratio of total nonperforming assets to total loans and other real estate was 0.63 percent at June 30, 2015, compared with 0.73 percent at December 31, 2014.

Other real estate owned, excluding covered assets, was \$287 million at June 30, 2015, compared with \$288 million at December 31, 2014, and was related to foreclosed properties that previously secured loan balances. These balances exclude foreclosed GNMA loans whose repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

The following table provides an analysis of other real estate owned, excluding covered assets, as a percent of their related loan balances, including geographical location detail for residential (residential mortgage, home equity and second mortgage) and commercial (commercial and commercial real estate) loan balances:

(Dollars in Millions)	Amount		As a Percent of Ending Loan Balances

months of 2014. The year-over-year decreases in total net charge-offs reflected the improvement in economic conditions.

Commercial and commercial real estate loan net charge-offs for the second quarter of 2015 were \$43 million (0.14 percent of average loans outstanding on an annualized basis), compared with \$51 million (0.18 percent of average loans outstanding on an annualized basis) for the second quarter of 2014. Commercial and commercial real estate loan net charge-offs for the first six months of 2015 were \$68 million (0.11 percent of average loans outstanding on an annualized basis), compared with \$84 million (0.15 percent of average loans outstanding on an annualized basis) for the first six months of 2014.

Residential mortgage loan net charge-offs for the second quarter of 2015 were \$33 million (0.26 percent of average loans outstanding on an annualized basis), compared with \$57 million (0.44 percent of average loans outstanding on an annualized basis) for the second quarter of 2014. Residential mortgage loan net charge-offs for the first six months of 2015 were \$68 million (0.27 percent of average loans outstanding on an annualized basis), compared with \$114 million (0.44 percent of average loans outstanding on an annualized basis) for the first six months of 2014. Credit card loan net charge-offs for the second quarter of 2015 were \$169 million (3.85 percent of average loans outstanding on an annualized basis), compared with \$170 million (3.92 percent of average loans outstanding on an annualized basis) for the second quarter of 2014. Credit card loan net charge-offs for the first six months of 2015 were \$332 million (3.78 percent of average loans outstanding on an annualized basis), compared with \$340 million (3.94 percent of average loans outstanding on an annualized basis) for the first six months of 2014. Other retail loan net charge-offs for the second quarter of 2015 were \$51 million (0.43 percent of average loans outstanding on an annualized basis), compared with \$69 million (0.58 percent of average loans outstanding on an annualized basis) for the second quarter of 2014. Other retail loan net charge-offs for the first six months of 2015 were \$107 million (0.45 percent of average loans outstanding on an annualized basis), compared with \$145 million (0.61 percent of average loans outstanding on an annualized basis) for the first six months of 2014. The decrease in total residential mortgage, credit card and other retail loan net charge-offs reflected the improvement in economic conditions.

The following table provides an analysis of net charge-offs as a percent of average loans outstanding for residential mortgages and home equity and second mortgages by borrower type:

(Dollars in Millions)	Three Months Ended June 30,				Six Months Ended June 30,			
	Average Loans		Percent of Average Loans		Average Loans		Percent of Average Loans	
	2015	2014	2015	2014	2015	2014	2015	2014
Residential Mortgages								
Prime borrowers	\$ 44,152	\$ 43,774	.20%	.33%	\$ 44,192	\$ 43,639	.20%	.35%
Sub-prime borrowers	1,164	1,323	2.76	4.55	1,185	1,341	3.06	4.81

Analysis and Determination of the Allowance for Credit Losses The allowance for credit losses reserves for probable and estimable losses incurred in the Company's loan and lease portfolio, including unfunded credit commitments, and includes certain amounts that do not represent loss exposure to the Company because those losses are recoverable under loss sharing agreements with the FDIC. The allowance for credit losses is increased through provisions charged to operating earnings and reduced by net charge-offs. Management evaluates the allowance each quarter to ensure it appropriately reserves for incurred losses.

The allowance recorded for loans in the commercial lending segment is based on reviews of individual credit relationships and considers the migration analysis of commercial lending segment loans and actual loss experience. In the migration analysis applied to risk rated loan portfolios, the Company currently examines up to a 14-year period of historical loss experience. For each loan type, this historical loss experience is adjusted as necessary to consider any relevant changes in portfolio composition, lending policies, underwriting standards, risk management practices or economic conditions. The results of the analysis are evaluated quarterly to confirm an appropriate historical timeframe is selected for each commercial loan type. The allowance recorded for impaired loans greater than \$5 million in the commercial lending segment is based on an individual loan analysis utilizing expected cash flows discounted using the original effective interest rate, the observable market price of the loan, or the fair value of the collateral for collateral-dependent loans, rather than the migration analysis. The allowance recorded for all other commercial lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, and historical losses, adjusted for current trends.

The allowance recorded for TDR loans and purchased impaired loans in the consumer lending segment is determined on a homogenous pool basis utilizing expected cash flows discounted using the original effective interest rate of the pool, or the prior quarter effective rate, respectively. The allowance for collateral-dependent loans in the consumer lending segment is determined based on the fair value of the collateral less costs to sell. The allowance recorded for all other consumer lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, delinquency status, refreshed LTV ratios when possible, portfolio growth and historical losses, adjusted for current trends. Credit card and other retail loans 90 days or more past due are generally not placed on nonaccrual status because of the relatively short period of time to charge-off and, therefore, are excluded from nonperforming loans and measures that include nonperforming loans as part of the calculation.

When evaluating the appropriateness of the allowance for credit losses for any loans and lines in a junior lien position, the Company considers the delinquency and modification status of the first lien. At June 30, 2015, the Company serviced the first lien on 39 percent of the home equity loans and lines in a junior lien position. The Company also considers information received from its primary regulator on the status of the first liens that are serviced by other large servicers in the industry and the status of first lien mortgage accounts reported on customer credit bureau files. Regardless of whether or not the Company services the first lien, an assessment is made of economic conditions, problem loans, recent loss experience and other factors in determining the allowance for credit losses. Based on the available information, the Company estimated \$316 million or 2.0 percent of the total home equity portfolio at June 30, 2015, represented junior liens where the first lien was delinquent or modified.

The Company uses historical loss experience on the loans and lines in a junior lien position where the first lien is serviced by the Company, or can be identified in credit bureau data, to establish loss estimates for junior lien loans and lines the Company services that are current, but the first lien is delinquent or modified. Historically, the number of junior lien defaults in any period has been a small percentage of the total portfolio (for example, only 0.8 percent for the twelve months ended June 30, 2015), and the long-term average loss rate on the small percentage of loans that default has been approximately 80 percent. In addition, the Company obtains updated credit scores on its home equity portfolio each quarter, and in some cases more frequently, and uses this information to qualitatively supplement its

loss estimation methods. Credit score distributions for the portfolio are monitored monthly and any changes in the distribution are one of the factors considered in assessing the Company's loss estimates. In its evaluation of the allowance for credit losses, the Company also considers the increased risk of loss associated with home equity lines that are contractually scheduled to convert from a revolving status to a fully amortizing payment and with residential lines and loans that have a balloon payoff provision.

The allowance for the covered loan segment is evaluated each quarter in a manner similar to that described for non-covered loans, and represents any

Table of Contents

decreases in expected cash flows on those loans after the acquisition date. The provision for credit losses for covered loans considers the indemnification provided by the FDIC.

In addition, the evaluation of the appropriate allowance for credit losses for purchased non-impaired loans acquired after January 1, 2009, in the various loan segments considers credit discounts recorded as a part of the initial determination of the fair value of the loans. For these loans, no allowance for credit losses is recorded at the purchase date. Credit discounts representing the principal losses expected over the life of the loans are a component of the initial fair value. Subsequent to the purchase date, the methods utilized to estimate the required allowance for credit losses for these loans is similar to originated loans; however, the Company records a provision for credit losses only when the required allowance, net of any expected reimbursement under any loss sharing agreements with the FDIC, exceeds any remaining credit discounts.

The evaluation of the appropriate allowance for credit losses for purchased impaired loans in the various loan segments considers the expected cash flows to be collected from the borrower. These loans are initially recorded at fair value and therefore no allowance for credit losses is recorded at the purchase date.

Subsequent to the purchase date, the expected cash flows of purchased loans are subject to evaluation. Decreases in expected cash flows are recognized by recording an allowance for credit losses with the related provision for credit losses reduced for the amount reimbursable by the FDIC, where applicable. If the expected cash flows on the purchased loans increase such that a previously recorded impairment allowance can be reversed, the Company records a reduction in the allowance with a related reduction in losses reimbursable by the FDIC, where applicable. Increases in expected cash flows of purchased loans, when there are no reversals of previous impairment allowances, are recognized over the remaining life of the loans and resulting decreases in expected cash flows of the FDIC indemnification assets are amortized over the shorter of the remaining contractual term of the indemnification agreements or the remaining life of the loans.

The Company's methodology for determining the appropriate allowance for credit losses for all the loan segments also considers the imprecision inherent in the methodologies used. As a result, in addition to the amounts determined under the methodologies described above, management also considers the potential impact of other qualitative factors which include, but are not limited to, economic factors; geographic and other concentration risks; delinquency and nonaccrual trends; current business conditions; changes in lending policy, underwriting standards, internal review and other relevant business practices; and the regulatory environment. The consideration of these items results in adjustments to allowance amounts included in the Company's allowance for credit losses for each of the above loan segments.

Refer to Management's Discussion and Analysis - Analysis of the Allowance for Credit Losses in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on the analysis and determination of the allowance for credit losses.

At June 30, 2015, the allowance for credit losses was \$4.3 billion (1.74 percent of period-end loans), compared with \$4.4 billion (1.77 percent of period-end loans) at December 31, 2014. The ratio of the allowance for credit losses to nonperforming loans was 349 percent at June 30, 2015, compared with 298 percent at December 31, 2014. The ratio of the allowance for credit losses to annualized loan net charge-offs was 364 percent at June 30, 2015, compared with 328 percent of full year 2014 net charge-offs at December 31, 2014, reflecting the impact of improving economic conditions over the past year.

Nonperforming assets	274	229		
Annualized net charge-offs	364	318		

(a) Relates to covered loan charge-offs and recoveries not reimbursable by the FDIC.

(b) Includes net changes in credit losses to be reimbursed by the FDIC and reductions in the allowance for covered loans where the reversal of a previously recorded allowance was offset by an associated decrease in the indemnification asset, and the impact of any loan sales.

(c) At June 30, 2015 and 2014, \$1.6 billion and \$1.7 billion, respectively, of the total allowance for credit losses related to incurred losses on credit card and other retail loans.

Table of Contents

Residual Value Risk Management The Company manages its risk to changes in the residual value of leased assets through disciplined residual valuation setting at the inception of a lease, diversification of its leased assets, regular residual asset valuation reviews and monitoring of residual value gains or losses upon the disposition of assets. As of June 30, 2015, no significant change in the amount of residual values or concentration of the portfolios had occurred since December 31, 2014. Refer to Management's Discussion and Analysis - Residual Value Risk Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on residual value risk management.

Operational Risk Management Operational risk is inherent in all business activities, and the management of this risk is important to the achievement of the Company's objectives. Business lines have direct and primary responsibility and accountability for identifying, controlling, and monitoring operational risks embedded in their business activities. The Company maintains a system of controls with the objective of providing proper transaction authorization and execution, proper system operations, proper oversight of third parties with whom they do business, safeguarding of assets from misuse or theft, and ensuring the reliability and security of financial and other data. Refer to Management's Discussion and Analysis - Operational Risk Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on operational risk management.

Compliance Risk Management The Company may suffer legal or regulatory sanctions, material financial loss, or damage to reputation through failure to comply with laws, regulations, rules, standards of good practice, and codes of conduct. The Company has controls and processes in place for the assessment, identification, monitoring, management and reporting of compliance risks and issues. Refer to Management's Discussion and Analysis - Compliance Risk Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on compliance risk management.

Interest Rate Risk Management In the banking industry, changes in interest rates are a significant risk that can impact earnings, market valuations and the safety and soundness of an entity. To manage the impact on net interest income and the market value of assets and liabilities, the Company manages its exposure to changes in interest rates through asset and liability management activities within guidelines established by its Asset Liability Committee (ALCO) and approved by the Board of Directors. The ALCO has the responsibility for approving and ensuring compliance with the ALCO management policies, including interest rate risk exposure. The Company uses net interest income simulation analysis and market value of equity modeling for measuring and analyzing consolidated interest rate risk.

Net Interest Income Simulation Analysis Management estimates the impact on net interest income of changes in market interest rates under a number of scenarios, including gradual shifts, immediate and sustained parallel shifts, and flattening or steepening of the yield curve. Table 9 summarizes the projected impact to net interest income over the next 12 months of various potential interest rate changes. The ALCO policy limits the estimated change in net interest income in a gradual 200 basis point (bps) rate change scenario to a 4.0 percent decline of forecasted net interest income over the next 12 months. At June 30, 2015, and December 31, 2014, the Company was within policy. Refer to Management's Discussion and Analysis - Net Interest Income Simulation Analysis in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on net interest income simulation analysis.

Market Value of Equity Modeling The Company also manages interest rate sensitivity by utilizing market value of equity modeling, which measures the degree to which the market values of the Company's assets and liabilities and off-balance sheet instruments will change given a change in interest rates. Management measures the impact of changes in market interest rates under a number of scenarios, including immediate and sustained parallel shifts, and flattening or steepening of the yield curve. The ALCO policy limits the change in market value of equity in a 200 bps

parallel rate shock to a 15.0 percent decline. A 200 bps increase would have resulted in a 5.6 percent decrease in the market value of equity at June 30, 2015, compared with a 6.7 percent

Table 9 Sensitivity of Net Interest Income

	June 30, 2015				December 31, 2014			
	Down 50 bps	Up 50 bps	Down 200 bps	Up 200 bps	Down 50 bps	Up 50 bps	Down 200 bps	Up 200 bps
	Immediate	Immediate	Gradual	Gradual	Immediate	Immediate	Gradual	Gradual
Net interest income	*	1.71%	*	2.37%	*	1.38%	*	1.68%

**Given the current level of interest rates, a downward rate scenario can not be computed.*

23

Table of Contents

decrease at December 31, 2014. A 200 bps decrease, where possible given current rates, would have resulted in a 6.9 percent decrease in the market value of equity at June 30, 2015, compared with a 7.1 percent decrease at December 31, 2014. Refer to Management's Discussion and Analysis Market Value of Equity Modeling in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on market value of equity modeling.

Use of Derivatives to Manage Interest Rate and Other Risks To manage the sensitivity of earnings and capital to interest rate, prepayment, credit, price and foreign currency fluctuations (asset and liability management positions), the Company enters into derivative transactions. The Company uses derivatives for asset and liability management purposes primarily in the following ways:

- To convert fixed-rate debt from fixed-rate payments to floating-rate payments;
- To convert the cash flows associated with floating-rate loans and debt from floating-rate payments to fixed-rate payments;
- To mitigate changes in value of the Company's mortgage origination pipeline, funded mortgage loans held for sale and MSRs;
- To mitigate remeasurement volatility of foreign currency denominated balances; and
- To mitigate the volatility of the Company's investment in foreign operations driven by fluctuations in foreign currency exchange rates.

The Company may enter into derivative contracts that are either exchange-traded, centrally cleared through clearinghouses or over-the-counter. In addition, the Company enters into interest rate and foreign exchange derivative contracts to support the business requirements of its customers (customer-related positions). The Company minimizes the market and liquidity risks of customer-related positions by either entering into similar offsetting positions with broker-dealers, or on a portfolio basis by entering into other derivative or non-derivative financial instruments that partially or fully offset the exposure from these customer-related positions. The Company does not utilize derivatives for speculative purposes.

The Company does not designate all of the derivatives that it enters into for risk management purposes as accounting hedges because of the inefficiency of applying the accounting requirements and may instead elect fair value accounting for the related hedged items. In particular, the Company enters into interest rate swaps, forward commitments to buy to-be-announced securities (TBAs), U.S. Treasury futures and options on U.S. Treasury futures to mitigate fluctuations in the value of its MSRs, but does not designate those derivatives as accounting hedges.

Additionally, the Company uses forward commitments to sell TBAs and other commitments to sell residential mortgage loans at specified prices to economically hedge the interest rate risk in its residential mortgage loan production activities. At June 30, 2015, the Company had \$9.6 billion of forward commitments to sell, hedging \$4.5 billion of mortgage loans held for sale and \$6.4 billion of unfunded mortgage loan commitments. The forward commitments to sell and the unfunded mortgage loan commitments on loans intended to be sold are considered derivatives under the accounting guidance related to accounting for derivative instruments and hedging activities. The Company has elected the fair value option for the mortgage loans held for sale.

Derivatives are subject to credit risk associated with counterparties to the contracts. Credit risk associated with derivatives is measured by the Company based on the probability of counterparty default. The Company manages the credit risk of its derivative positions by diversifying its positions among various counterparties, by entering into master netting arrangements, and, where possible by requiring collateral arrangements. The Company may also transfer counterparty credit risk related to interest rate swaps to third parties through the use of risk participation agreements. In addition, certain interest rate swaps and forwards and credit contracts are required to be centrally cleared through clearinghouses to further mitigate counterparty credit risk.

For additional information on derivatives and hedging activities, refer to Notes 12 and 13 in the Notes to Consolidated Financial Statements.

Market Risk Management In addition to interest rate risk, the Company is exposed to other forms of market risk, principally related to trading activities which support customers' strategies to manage their own foreign currency, interest rate risk and funding activities. For purposes of its internal capital adequacy assessment process, the Company considers risk arising from its trading activities employing methodologies consistent with the requirements of regulatory rules for market risk. The Company's Market Risk Committee (MRC), within the framework of the ALCO, oversees market risk management. The MRC monitors and reviews the Company's trading positions and establishes policies for market risk management, including exposure limits for each portfolio. The Company uses a Value at Risk (VaR) approach to measure general market risk. Theoretically, VaR represents the statistical risk of loss

Table of Contents

the Company has to adverse market movements over a one-day time horizon. The Company uses the Historical Simulation method to calculate VaR for its trading businesses measured at the ninety-ninth percentile using a one-year look-back period for distributions derived from past market data. The market factors used in the calculations include those pertinent to market risks inherent in the underlying trading portfolios, principally those that affect its corporate bond trading business, foreign currency transaction business, client derivatives business, loan trading business and municipal securities business. On average, the Company expects the one-day VaR to be exceeded by actual losses two to three times per year for its trading businesses. The Company monitors the effectiveness of its risk programs by back-testing the performance of its VaR models, regularly updating the historical data used by the VaR models and stress testing. If the Company were to experience market losses in excess of the estimated VaR more often than expected, the VaR models and associated assumptions would be analyzed and adjusted.

The average, high, low and period-end one-day VaR amounts for the Company's trading positions were as follows:

Six Months Ended June 30,

(Dollars in Millions)	2015	2014
Average	\$ 1	\$ 1
High	2	2
Low	1	1
Period-end	1	1

The Company did not experience any actual trading losses for its combined trading businesses that exceeded VaR during the six months ended June 30, 2015 and 2014. The Company stress tests its market risk measurements to provide management with perspectives on market events that may not be captured by its VaR models, including worst case historical market movement combinations that have not necessarily occurred on the same date.

The Company calculates Stressed VaR using the same underlying methodology and model as VaR, except that a historical continuous one-year look-back period is utilized that reflects a period of significant financial stress appropriate to the Company's trading portfolio. The period selected by the Company includes the significant market volatility of the last four months of 2008.

The average, high, low and period-end one-day Stressed VaR amounts for the Company's trading positions were as follows:

Six Months Ended June 30,

(Dollars in Millions)	2015	2014
Average	\$ 4	\$ 4
High	8	8
Low	2	2
Period-end	4	5

Valuations of positions in the client derivatives and foreign currency transaction businesses are based on standard cash flow or other valuation techniques using market-based assumptions. These valuations are compared to third party quotes or other market prices to determine if there are significant variances. Significant variances are approved by the Company's market risk management department. Valuation of positions in the corporate bond trading, loan trading and

municipal securities businesses are based on trader marks. These trader marks are evaluated against third party prices, with significant variances approved by the Company's risk management department.

The Company also measures the market risk of its hedging activities related to residential mortgage loans held for sale and MSR's using the Historical Simulation method. The VaR's are measured at the ninety-ninth percentile and employ factors pertinent to the market risks inherent in the valuation of the assets and hedges. The Company monitors the effectiveness of the models through back-testing, updating the data and regular validations. A three-year look-back period is used to obtain past market data for the models.

The average, high and low one-day VaR amounts for the residential mortgage loans held for sale and related hedges and the MSR's and related hedges were as follows:

Six Months Ended June 30,

(Dollars in Millions)	2015	2014
Residential Mortgage Loans Held For Sale and		
Related Hedges		
Average	\$ 1	\$ 1
High	2	2
Low		
Mortgage Servicing Rights and Related Hedges		
Average	\$ 7	\$ 3
High	8	8
Low	5	2

The Company did not experience any actual losses on its residential mortgage loans held for sale and MSR's activities, including their related hedges, that exceeded VaR during the six months ended June 30, 2015 and 2014.

Table of Contents

Liquidity Risk Management The Company's liquidity risk management process is designed to identify, measure, and manage the Company's funding and liquidity risk to meet its daily funding needs and to address expected and unexpected changes in its funding requirements. The Company engages in various activities to manage its liquidity risk. These activities include diversifying its funding sources, stress testing, and holding readily-marketable assets which can be used as a source of liquidity if needed. In addition, the Company's profitable operations, sound credit quality and strong capital position have enabled it to develop a large and reliable base of core deposit funding within its market areas and in domestic and global capital markets.

The Company's Board of Directors approves the Company's liquidity policy. The Risk Management Committee of the Company's Board of Directors oversees the Company's liquidity risk management process and approves the contingency funding plan. The ALCO reviews the Company's liquidity policy and guidelines, and regularly assesses the Company's ability to meet funding requirements arising from adverse company-specific or market events.

The Company regularly projects its funding needs under various stress scenarios and maintains a contingency funding plan consistent with the Company's access to diversified sources of contingent funding. The Company maintains a substantial level of total available liquidity in the form of on-balance sheet and off-balance sheet funding sources. These include cash at the Federal Reserve Bank, unencumbered liquid assets, and capacity to borrow at the Federal Home Loan Bank (FHLB) and the Federal Reserve Bank's Discount Window. At June 30, 2015, the fair value of unencumbered available-for-sale and held-to-maturity investment securities totaled \$89.2 billion, compared with \$86.9 billion at December 31, 2014. Refer to Table 4 and Balance Sheet Analysis for further information on investment securities maturities and trends. Asset liquidity is further enhanced by the Company's ability to pledge loans to access secured borrowing facilities through the FHLB and Federal Reserve Bank. At June 30, 2015, the Company could have borrowed an additional \$77.4 billion at the FHLB and Federal Reserve Bank based on collateral available for additional borrowings.

The Company's diversified deposit base provides a sizeable source of relatively stable and low-cost funding, while reducing the Company's reliance on the wholesale markets. Total deposits were \$296.8 billion at June 30, 2015, compared with \$282.7 billion at December 31, 2014. Refer to Balance Sheet Analysis for further information on the Company's deposits.

Additional funding is provided by long-term debt and short-term borrowings. Long-term debt was \$34.2 billion at June 30, 2015, and is an important funding source because of its multi-year borrowing structure. Short-term borrowings were \$27.8 billion at June 30, 2015, and supplement the Company's other funding sources. Refer to Balance Sheet Analysis for further information on the Company's long-term debt and short-term borrowings.

In addition to assessing liquidity risk on a consolidated basis, the Company monitors the parent company's liquidity. The Company maintains sufficient funding to meet expected parent company obligations, without access to the wholesale funding markets or dividends from subsidiaries, for 12 months when forecasted payments of common stock dividends are included, and 24 months assuming dividends were reduced to zero. The parent company currently has available funds considerably greater than the amounts required to satisfy these conditions.

At June 30, 2015, parent company long-term debt outstanding was \$12.4 billion, compared with \$13.2 billion at December 31, 2014. The decrease was primarily due to the maturity of \$750 million of medium-term notes. As of June 30, 2015, there was \$1.0 billion of parent company debt scheduled to mature in the remainder of 2015.

During 2014, U.S. banking regulators approved a final regulatory Liquidity Coverage Ratio (LCR), requiring banks to maintain an adequate level of unencumbered high quality liquid assets to meet estimated liquidity needs over a 30-day stressed period. The LCR requirement became effective for the Company January 1, 2015, subject to certain transition

provisions over the following two years to full implementation by January 1, 2017. At June 30, 2015, the Company was compliant with the fully implemented LCR requirement based on its interpretation of the final U.S. LCR rule.

Refer to Management's Discussion and Analysis - Liquidity Risk Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on liquidity risk management.

European Exposures Certain European countries have experienced severe credit deterioration. The Company does not hold sovereign debt of any European country, but may have indirect exposure to sovereign debt through its investments in, and transactions with, European banks. At June 30, 2015, the Company had investments in perpetual preferred stock issued by European banks with an amortized cost totaling \$22 million and unrealized losses totaling \$1 million,

Table of Contents**Table 10** Regulatory Capital Ratios

(Dollars in Millions)	June 30, 2015	December 31, 2014
Basel III transitional standardized approach:		
Common equity tier 1 capital	\$ 31,674	\$ 30,856
Tier 1 capital	36,748	36,020
Total risk-based capital	43,526	43,208
Risk-weighted assets	333,177	317,398
Common equity tier 1 capital as a percent of risk-weighted assets	9.5%	9.7%
Tier 1 capital as a percent of risk-weighted assets	11.0	11.3
Total risk-based capital as a percent of risk-weighted assets	13.1	13.6
Tier 1 capital as a percent of adjusted quarterly average assets (leverage ratio)	9.2	9.3
Basel III transitional advanced approaches:		
Common equity tier 1 capital	\$ 31,674	\$ 30,856
Tier 1 capital	36,748	36,020
Total risk-based capital	40,561	40,475
Risk-weighted assets	245,038	248,596
Common equity tier 1 capital as a percent of risk-weighted assets	12.9%	12.4%
Tier 1 capital as a percent of risk-weighted assets	15.0	14.5
Total risk-based capital as a percent of risk-weighted assets	16.6	16.3

compared with an amortized cost totaling \$66 million and unrealized losses totaling \$2 million, at December 31, 2014. The Company also transacts with various European banks as counterparties to interest rate and foreign currency derivatives for its hedging and customer-related activities; however, none of these banks are domiciled in the countries currently experiencing the most significant credit deterioration. These derivatives are subject to master netting arrangements. In addition, interest rate and foreign currency derivative transactions are subject to collateral arrangements which significantly limit the Company's exposure to loss as they generally require daily posting of collateral. At June 30, 2015, the Company was in a net receivable position with six banks in Europe, totaling \$14 million. The Company was in a net payable position to each of the other European banks.

The Company has not bought or sold credit protection on the debt of any European country or any company domiciled in Europe, nor does it provide retail lending services in Europe. While the Company does not offer commercial lending services in Europe, it does provide financing to domestic multinational corporations that generate revenue from customers in European countries and provides a limited number of corporate credit cards to their European subsidiaries. While further deterioration in economic conditions in Europe could have a negative impact on these customers' revenues, it is unlikely that any effect on the overall credit-worthiness of these multinational corporations would be material to the Company.

The Company provides merchant processing and corporate trust services in Europe either directly or through banking affiliations in Europe. Operating cash for these businesses is deposited on a short-term basis with certain European banks. However, exposure is mitigated by the Company placing deposits at multiple banks and managing the amounts on deposit at any bank based on institution-specific deposit limits. At June 30, 2015, the Company had an aggregate amount on deposit with European banks of approximately \$442 million.

The money market funds managed by a subsidiary of the Company do not have any investments in European sovereign debt, other than approximately \$275 million at June 30, 2015 guaranteed by the country of Germany. Other than investments in banks in the countries of the Netherlands, France and Germany, those funds do not have any unsecured investments in banks domiciled in the Eurozone.

Off-Balance Sheet Arrangements Off-balance sheet arrangements include any contractual arrangements to which an unconsolidated entity is a party, under which the Company has an obligation to provide credit or liquidity enhancements or market risk support. In the ordinary course of business, the Company enters into an array of commitments to extend credit, letters of credit and various forms of guarantees that may be considered off-balance sheet arrangements. Refer to Note 15 of the Notes to Consolidated Financial Statements for further information on these arrangements. The Company has not utilized private label asset securitizations as a source of funding. Off-balance sheet arrangements also include any obligation related to a variable interest held in an unconsolidated entity that provides financing, liquidity, credit enhancement or market risk support. Refer to Note 5 of the Notes to Consolidated Financial Statements for further information related to the Company's interests in variable interest entities.

Capital Management The Company is committed to managing capital to maintain strong protection for depositors and creditors and for maximum shareholder

Table of Contents

benefit. The Company also manages its capital to exceed regulatory capital requirements for well-capitalized bank holding companies. Beginning January 1, 2014, the regulatory capital requirements effective for the Company follow Basel III, subject to certain transition provisions from Basel I over the following four years to full implementation by January 1, 2018. Basel III includes two comprehensive methodologies for calculating risk-weighted assets: a general standardized approach and more risk-sensitive advanced approaches, with the Company's capital adequacy being evaluated against the methodology that is most restrictive. Table 10 provides a summary of statutory regulatory capital ratios in effect for the Company at June 30, 2015 and December 31, 2014. All regulatory ratios exceeded regulatory well-capitalized requirements.

During 2014, U.S. banking regulators approved a final regulatory Supplementary Leverage Ratio (SLR) requirement for banks calculating capital adequacy using advanced approaches under Basel III. The SLR is defined as tier 1 capital divided by total leverage exposure, which includes both on- and off-balance sheet exposures. At June 30, 2015, the Company's SLR exceeds the applicable minimum SLR requirement effective January 1, 2018.

Total U.S. Bancorp shareholders' equity was \$44.5 billion at June 30, 2015, compared with \$43.5 billion at December 31, 2014. The increase was primarily the result of corporate earnings, partially offset by dividends and common share repurchases.

The Company believes certain capital ratios in addition to statutory regulatory capital ratios are useful in evaluating its capital adequacy. The Company's tangible common equity, as a percent of tangible assets and as a percent of risk-weighted assets calculated under the transitional standardized approach, was 7.5 percent and 9.2 percent, respectively, at June 30, 2015, compared with 7.5 percent and 9.3 percent, respectively, at

December 31, 2014. The Company's common equity tier 1 to risk-weighted assets ratio using the Basel III standardized approach as if fully implemented was 9.2 percent at June 30, 2015, compared with 9.0 percent at December 31, 2014. The Company's common equity tier 1 to risk-weighted assets ratio using the Basel III advanced approaches as if fully implemented was 12.4 percent at June 30, 2015, compared with 11.8 percent at December 31, 2014. Refer to "Non-GAAP Financial Measures" for further information regarding the calculation of these ratios.

On March 11, 2015, the Company announced its Board of Directors had approved an authorization to repurchase up to \$3.022 billion of its common stock, from April 1, 2015 through June 30, 2016.

The following table provides a detailed analysis of all shares purchased by the Company or any affiliated purchaser during the second quarter of 2015:

Period (Dollars in Millions, Except Per Share Data)	Total Number of Shares Purchased	Average Price Paid Per Share	as Part of Publicly Announced Program (a)	Approximate Dollar Value of Shares that May
				Yet Be Purchased Under the Program
April	7,401,217 (b)	\$ 42.78	7,301,217	\$ 2,710

Edgar Filing: US BANCORP \DE\ - Form 10-Q

May	4,278,265	43.71	4,278,265	2,523
June	2,815,693	44.30	2,815,693	2,398
Total	14,495,175 (b)	\$ 43.35	14,395,175	\$ 2,398

(a) All shares were purchased under the stock repurchase program announced on March 11, 2015.

(b) Includes 100,000 shares of common stock purchased, at an average price per share of \$42.78, in open-market transactions by U.S. Bank National Association, the Company's principal banking subsidiary, in its capacity as trustee of the Company's Employee Retirement Savings Plan.

On June 16, 2015, the Company announced its Board of Directors had approved a 4.1 percent increase in the Company's dividend rate per common share, from \$0.245 per quarter to \$0.255 per quarter.

Refer to Management's Discussion and Analysis Capital Management in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on capital management.

Table of Contents**LINE OF BUSINESS FINANCIAL REVIEW**

The Company's major lines of business are Wholesale Banking and Commercial Real Estate, Consumer and Small Business Banking, Wealth Management and Securities Services, Payment Services, and Treasury and Corporate Support. These operating segments are components of the Company about which financial information is prepared and is evaluated regularly by management in deciding how to allocate resources and assess performance.

Basis for Financial Presentation Business line results are derived from the Company's business unit profitability reporting systems by specifically attributing managed balance sheet assets, deposits and other liabilities and their related income or expense. The allowance for credit losses and related provision expense are allocated to the lines of business based on the related loan balances managed. Refer to Management's Discussion and Analysis Line of Business Financial Review in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on the business lines basis for financial presentation.

Designations, assignments and allocations change from time to time as management systems are enhanced, methods of evaluating performance or product lines change or business segments are realigned to better respond to the Company's diverse customer base. During 2015, certain organization and methodology changes were made and, accordingly, 2014 results were restated and presented on a comparable basis.

Wholesale Banking and Commercial Real Estate Wholesale Banking and Commercial Real Estate offers lending, equipment finance and small-ticket leasing, depository services, treasury management, capital markets, international trade services and other financial services to middle market, large corporate, commercial real estate, financial institution, non-profit and public sector clients. Wholesale Banking and Commercial Real Estate contributed \$245 million of the Company's net income in the second quarter and \$454 million in the first six months of 2015, or decreases of \$27 million (9.9 percent) and \$99 million (17.9 percent), respectively, compared with the same periods of 2014. The decreases were primarily driven by lower net revenue and higher noninterest expense year-over-year.

Net revenue decreased \$34 million (4.5 percent) in the second quarter and \$55 million (3.7 percent) in the first six months of 2015, compared with the same periods of 2014. Net interest income, on a taxable-equivalent basis, decreased \$2 million (0.4 percent) in the second quarter and \$1 million (0.1 percent) in the first six months of 2015, compared with the same periods of 2014. The decreases were primarily driven by increases in average loans and deposits, offset by lower rates and fees on loans. Noninterest income decreased \$32 million (12.5 percent) in the second quarter and \$54 million (10.8 percent) in the first six months of 2015, compared with the same periods of 2014, driven by lower wholesale transaction activity and loan-related fees, partially offset by higher commercial leasing revenue and higher syndication fees.

Noninterest expense increased \$9 million (2.8 percent) in the second quarter and \$31 million (4.9 percent) in the first six months of 2015, compared with the same periods of 2014, primarily due to increases in the FDIC insurance assessment allocation, based on the level of commitments, and variable compensation expense. The provision for credit losses was flat in the second quarter and increased \$70 million in the first six months of 2015, compared with the same periods of 2014. The increase for the first six months of 2015, compared with the same period of the prior year, was due to portfolio growth and unfavorable changes in the reserve allocation reflecting the recent decline in energy prices and higher net charge-offs. Nonperforming assets were \$118 million at June 30, 2015, \$116 million at March 31, 2015, and \$287 million at June 30, 2014. Nonperforming assets as a percentage of period-end loans were 0.14 percent at June 30, 2015 and at March 31, 2015, and 0.37 percent at June 30, 2014. Refer to the Corporate Risk Profile section for further information on factors impacting the credit quality of the loan portfolios.

Consumer and Small Business Banking Consumer and Small Business Banking delivers products and services through banking offices, telephone servicing and sales, on-line services, direct mail, ATM processing and mobile devices, such as mobile phones and tablet computers. It encompasses community banking, metropolitan banking and indirect lending (collectively, the retail banking division), as well as mortgage banking. Consumer and Small Business Banking contributed \$321 million of the Company's net income in the second quarter and \$677 million in the first six months of 2015, or decreases of \$66 million (17.1 percent) and \$66 million (8.9 percent), respectively, compared with the same periods of 2014. The decreases were due to lower net revenue and higher noninterest expense, partially offset by decreases in the provision for credit losses. Within Consumer and Small Business Banking, the retail banking division contributed \$243 million of the total net income in the second quarter and \$496 million in the first six months of 2015, or a decrease of \$14 million (5.4 percent) and an increase of \$6 million (1.2 percent), respectively, compared with

Table of Contents

the same periods of 2014, principally due to decreases in the provision for credit losses, offset by increases in noninterest expense and lower net revenue. Mortgage banking contributed \$78 million of Consumer and Small Business Banking's net income in the second quarter and \$181 million in the first six months of 2015, or decreases of \$52 million (40.0 percent) and \$72 million (28.5 percent), respectively, from the same periods of 2014, reflecting increases in noninterest expense and the provision for credit losses, and decreases in net revenue.

Net revenue decreased \$84 million (4.5 percent) in the second quarter and \$135 million (3.7 percent) in the first six months of 2015, compared with the same periods of 2014. Net interest income, on a taxable-equivalent basis, decreased \$35 million (3.0 percent) in the second quarter and \$90 million (3.8 percent) in the first six months of 2015, compared with the same periods of 2014. The decreases in net interest income were primarily due to lower loan fees due to the wind down of the CAA product and lower rates on loans, partially offset by higher average loan, deposit and loans held for sale balances. Noninterest income decreased \$49 million (7.2 percent) in the second quarter and \$45 million (3.5 percent) in the first six months of 2015, compared with the same periods of 2014, primarily the result of lower mortgage banking revenue. The decreases in mortgage banking revenue in the second quarter and first six months of 2015, compared with the same periods of 2014, were primarily due to unfavorable changes in the valuation of MSRs, net of hedging activities, offset by increases in mortgage production revenue.

Noninterest expense increased \$88 million (7.8 percent) in the second quarter and \$159 million (7.0 percent) in the first six months of 2015, compared with the same periods of 2014, the result of higher compensation, employee benefits and mortgage servicing-related expenses. The provision for credit losses decreased \$68 million (56.7 percent) in the second quarter and \$189 million (74.7 percent) in the first six months of 2015, compared with the same periods of 2014. The decreases were due to lower net charge-offs and favorable changes in the reserve allocation, partially offset by higher loan balances. As a percentage of average loans outstanding on an annualized basis, net charge-offs decreased to 0.27 percent in the second quarter of 2015, compared with 0.40 percent in the second quarter of 2014. Nonperforming assets were \$1.3 billion at June 30, 2015, and \$1.4 billion at March 31, 2015 and at June 30, 2014. Nonperforming assets as a percentage of period-end loans were 1.03 percent at June 30, 2015, 1.11 percent at March 31, 2015 and 1.08 percent at June 30, 2014. Refer to the Corporate Risk Profile section for further information on factors impacting the credit quality of the loan portfolios.

Wealth Management and Securities Services Wealth Management and Securities Services provides private banking, financial advisory services, investment management, retail brokerage services, insurance, trust, custody and fund servicing through five businesses: Wealth Management, Corporate Trust Services, U.S. Bancorp Asset Management, Institutional Trust & Custody and Fund Services. Wealth Management and Securities Services contributed \$68 million of the Company's net income in the second quarter and \$123 million in the first six months of 2015, or an increase of \$6 million (9.7 percent) and a decrease of \$1 million (0.8 percent), respectively, compared with the same periods of 2014. The changes were primarily due to higher net revenue, offset by higher noninterest expense.

Net revenue increased \$20 million (4.5 percent) in the second quarter and \$29 million (3.3 percent) in the first six months of 2015, compared with the same periods of 2014. The increases were driven by higher noninterest income of \$25 million (7.2 percent) in the second quarter and \$42 million (6.1 percent) in the first six months of 2015, compared with the same periods of 2014, reflecting the impact of account growth and improved market conditions. Net interest income, on a taxable-equivalent basis, decreased \$5 million (5.2 percent) in the second quarter and \$13 million (6.8 percent) in the first six months of 2015, compared with the same periods of 2014, principally due to decreases in the margin benefit from corporate trust deposit balances.

Noninterest expense increased \$15 million (4.4 percent) in the second quarter and \$33 million (4.8 percent) in the first six months of 2015, compared with the same periods of 2014. The increases were primarily due to higher net shared

services expense and higher compensation and employee benefits expenses primarily due to merit increases and increased pension costs.

Payment Services Payment Services includes consumer and business credit cards, stored-value cards, debit cards, corporate, government and purchasing card services, consumer lines of credit and merchant processing. Payment Services contributed \$259 million of the Company's net income in the second quarter of 2015, or a decrease of \$28 million (9.8 percent), compared with the same period of the prior year. Payment Services contributed \$525 million of the Company's net income in the first six months of 2015, unchanged from the same period of the prior year.

Net revenue increased \$59 million (4.7 percent) in the second quarter and \$112 million (4.6 percent) in the first six months of 2015, compared with the same periods of 2014. Net interest income, on a taxable-equivalent basis, increased \$41 million (9.8 percent) in the second quarter and \$92 million (11.0 percent) in the first six months of

Table of Contents

2015, compared with the same periods of 2014, primarily driven by higher average loan balances and fees and improved loan rates. Noninterest income increased \$18 million (2.2 percent) in the second quarter and \$20 million (1.2 percent) in the first six months of 2015, compared with the same periods of 2014, primarily due to higher merchant processing services revenue driven by increased transaction volumes and product fees, partially offset by the impact of foreign currency rate changes.

Noninterest expense increased \$80 million (13.3 percent) in the second quarter and \$96 million (8.0 percent) in the first six months of 2015, compared with the same periods of 2014, primarily due to the allocation to the business line of a previously reserved regulatory item. The provision for credit losses increased \$26 million (14.3 percent) in the second quarter and \$22 million (5.7 percent) in the first six months of 2015, compared with the same periods of 2014, primarily due to unfavorable changes in the reserve allocation. As a percentage of average loans outstanding, net charge-offs were 3.20 percent in the second quarter of 2015, compared with 3.28 percent in the second quarter of 2014.

Treasury and Corporate Support Treasury and Corporate Support includes the Company's investment portfolios, most covered commercial and commercial real estate loans and related other real estate owned, funding, capital management, interest rate risk management, income taxes not allocated to business lines, including most investments in tax-advantaged projects, and the residual aggregate of those expenses associated with corporate activities that are managed on a consolidated basis. Treasury and Corporate Support recorded net income of \$590 million in the second quarter and \$1.1 billion in the first six months of 2015, compared with \$487 million and \$947 million in the same periods of 2014, respectively.

Net revenue decreased \$107 million (12.3 percent) in the second quarter and \$5 million (0.3 percent) in the first six months of 2015, compared with the same periods of 2014. Net interest income, on a taxable-equivalent basis, increased \$27 million (5.0 percent) in the second quarter and \$84 million (8.1 percent) in the first six months of 2015, compared with the same periods of 2014, principally due to growth in the investment portfolio, partially offset by lower income from the run-off of acquired assets. Noninterest income decreased \$134 million (40.7 percent) in the second quarter and \$89 million (19.2 percent) in the first six months of 2015, compared with the same periods of 2014, primarily due to lower other income from Visa stock sales.

Noninterest expense decreased \$263 million (73.1 percent) in the second quarter and \$269 million (51.1 percent) in the first six months of 2015, compared with the same periods of 2014, principally due to the second quarter 2014 FHA DOJ settlement and insurance-related recoveries in the current year. The provision for credit losses increased \$4 million in the second quarter and \$15 million in the first six months of 2015, compared with the same periods of 2014, reflecting unfavorable changes in the reserve allocation.

Income taxes are assessed to each line of business at a managerial tax rate of 36.4 percent with the residual tax expense or benefit to arrive at the consolidated effective tax rate included in Treasury and Corporate Support.

NON-GAAP FINANCIAL MEASURES

In addition to capital ratios defined by banking regulators, the Company considers various other measures when evaluating capital utilization and adequacy, including:

- Tangible common equity to tangible assets,
- Tangible common equity to risk-weighted assets,

Common equity tier 1 capital to risk-weighted assets estimated for the Basel III fully implemented standardized approach, and

Common equity tier 1 capital to risk-weighted assets estimated for the Basel III fully implemented advanced approaches.

These measures are viewed by management as useful additional methods of reflecting the level of capital available to withstand unexpected market or economic conditions. Additionally, presentation of these measures allows investors, analysts and banking regulators to assess the Company's capital position relative to other financial services companies. These measures differ from currently effective capital ratios defined by banking regulations principally in that the numerator includes unrealized gains and losses related to available-for-sale securities and excludes preferred securities, including preferred stock, the nature and extent of which varies among different financial services companies. These measures are not defined in generally accepted accounting principles (GAAP), or are not currently effective or defined in federal banking regulations. As a result, these measures disclosed by the Company may be considered non-GAAP financial measures.

There may be limits in the usefulness of these measures to investors. As a result, the Company encourages readers to consider the consolidated financial statements and other financial information contained in this report in their entirety, and not to rely on any single financial measure.

Table of Contents

The following table shows the Company's calculation of these Non-GAAP financial measures:

(Dollars in Millions)	June 30, 2015	December 31, 2014
Total equity	\$ 45,231	\$ 44,168
Preferred stock	(4,756)	(4,756)
Noncontrolling interests	(694)	(689)
Goodwill (net of deferred tax liability) (1)	(8,350)	(8,403)
Intangible assets, other than mortgage servicing rights	(744)	(824)
Tangible common equity (a)	30,687	29,496
Tangible common equity (as calculated above)	30,687	29,496
Adjustments (2)	125	172
Common equity tier 1 capital estimated for the Basel III fully implemented standardized and advanced approaches (b)	30,812	29,668
Total assets	419,075	402,529
Goodwill (net of deferred tax liability) (1)	(8,350)	(8,403)
Intangible assets, other than mortgage servicing rights	(744)	(824)
Tangible assets (c)	409,981	393,302
Risk-weighted assets, determined in accordance with prescribed regulatory requirements (d)	333,177	317,398
Adjustments (3)	3,532	11,110
Risk-weighted assets estimated for the Basel III fully implemented standardized approach (e)	336,709	328,508
Risk-weighted assets, determined in accordance with prescribed transitional advanced approaches regulatory requirements	245,038	248,596
Adjustments (4)	3,721	3,270
Risk-weighted assets estimated for the Basel III fully implemented advanced approaches (f)	248,759	251,866
Ratios		
Tangible common equity to tangible assets (a)/(c)	7.5%	7.5%
Tangible common equity to risk-weighted assets (a)/(d)	9.2	9.3
Common equity tier 1 capital to risk-weighted assets estimated for the Basel III fully implemented standardized approach (b)/(e)	9.2	9.0
Common equity tier 1 capital to risk-weighted assets estimated for the Basel III fully implemented advanced approaches (b)/(f)	12.4	11.8

(1) Includes goodwill related to certain investments in unconsolidated financial institutions per prescribed regulatory requirements.

(2) Includes net losses on cash flow hedges included in accumulated other comprehensive income and other adjustments.

(3) Includes higher risk-weighting for unfunded loan commitments, investment securities, residential mortgages, mortgage servicing rights and other adjustments.

(4) Primarily reflects higher risk-weighting for mortgage servicing rights.

CRITICAL ACCOUNTING POLICIES

The accounting and reporting policies of the Company comply with accounting principles generally accepted in the United States and conform to general practices within the banking industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions. The Company's financial position and results of operations can be affected by these estimates and assumptions, which are integral to understanding the Company's financial statements. Critical accounting policies are those policies management believes are the most important to the portrayal of the Company's financial condition and results, and require management to make estimates that are difficult, subjective or complex. Most accounting policies are not considered by management to be critical accounting policies. Those policies considered to be critical accounting policies relate to the allowance for credit losses, fair value estimates, purchased loans and related indemnification assets, MSRs, goodwill and other intangibles and income taxes. Management has discussed the development and the selection of critical accounting policies with the Company's Audit Committee. These accounting policies are discussed in detail in Management's Discussion and Analysis - Critical Accounting Policies and the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

CONTROLS AND PROCEDURES

Under the supervision and with the participation of the Company's management, including its principal executive officer and principal financial officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based upon this evaluation, the principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

During the most recently completed fiscal quarter, there was no change made in the Company's internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Notes to Consolidated Financial Statements

(Unaudited)

Note 1 Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all information and notes necessary for a complete presentation of financial position, results of operations and cash flow activity required in accordance with accounting principles generally accepted in the United States. In the opinion of management of U.S. Bancorp (the Company), all adjustments (consisting only of normal recurring adjustments) necessary for a fair statement of results for the interim periods have been made. These financial statements and notes should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. Certain amounts in prior periods have been reclassified to conform to the current presentation.

Accounting policies for the lines of business are generally the same as those used in preparation of the consolidated financial statements with respect to activities specifically attributable to each business line. However, the preparation of business line results requires management to establish methodologies to allocate funding costs, expenses and other financial elements to each line of business. Table 11 Line of Business Financial Performance included in Management's Discussion and Analysis provides details of segment results. This information is incorporated by reference into these Notes to Consolidated Financial Statements.

Note 2 Accounting Changes

Revenue Recognition In May 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance, originally effective for the Company on January 1, 2017, related to revenue recognition from contracts with customers. In July 2015, the FASB voted to delay the effective date of this guidance by one year, resulting in it becoming effective for the Company on January 1, 2018.

This guidance amends certain currently existing revenue recognition accounting guidance and allows for either retrospective application to all periods presented or a modified retrospective approach where the guidance would only be applied to existing contracts in effect at the adoption date and new contracts going forward. The Company is currently evaluating the impact of this guidance under the modified retrospective approach and expects the adoption will not be material to its financial statements.

Consolidation In February 2015, the FASB issued accounting guidance, effective for the Company on January 1, 2016, with early adoption permitted, related to the analysis required by organizations to evaluate whether they should consolidate certain legal entities. The Company expects the adoption of this guidance will not be material to its financial statements.

Table of Contents**Note 3** Investment Securities

The amortized cost, other-than-temporary impairment recorded in other comprehensive income (loss), gross unrealized holding gains and losses, and fair value of held-to-maturity and available-for-sale investment securities were as follows:

- (a) *Held-to-maturity investment securities are carried at historical cost or at fair value at the time of transfer from the available-for-sale to held-to-maturity category, adjusted for amortization of premiums and accretion of discounts and credit-related other-than-temporary impairment.*
- (b) *Available-for-sale investment securities are carried at fair value with unrealized net gains or losses reported within accumulated other comprehensive income (loss) in shareholders' equity.*
- (c) *Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads). When the Company determines the designation, prime securities typically have a weighted average credit score of 725 or higher and a loan-to-value of 80 percent or lower; however, other pool characteristics may result in designations that deviate from these credit score and loan-to-value thresholds.*
- (d) *Includes all securities not meeting the conditions to be designated as prime.*
- (e) *Represents impairment not related to credit for those investment securities that have been determined to be other-than-temporarily impaired.*
- (f) *Represents unrealized losses on investment securities that have not been determined to be other-than-temporarily impaired.*

The weighted-average maturity of the available-for-sale investment securities was 4.7 years at June 30, 2015, compared with 4.3 years at December 31, 2014. The corresponding weighted-average yields were 2.23 percent and 2.32 percent, respectively. The weighted-average maturity of the held-to-maturity investment securities was 4.3 years at June 30, 2015, and 4.0 years at December 31, 2014. The corresponding weighted-average yields were 1.85 percent and 1.92 percent, respectively.

For amortized cost, fair value and yield by maturity date of held-to-maturity and available-for-sale investment securities outstanding at June 30, 2015, refer to Table 4 included in Management's Discussion and Analysis which is incorporated by reference into these Notes to Consolidated Financial Statements.

Investment securities with a fair value of \$13.3 billion at June 30, 2015, and \$12.6 billion at December 31, 2014, were pledged to secure public, private and trust deposits, repurchase agreements and for other purposes required by contractual obligation or law. Included in these amounts were securities where the Company and certain counterparties have agreements granting the counterparties the right to sell or pledge the securities. Investment securities delivered under these types of arrangements had a fair value of \$986 million at June 30, 2015, and \$856 million at December 31, 2014.

Table of Contents

The following table provides information about the amount of interest income from taxable and non-taxable investment securities:

(Dollars in Millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Taxable	\$ 449	\$ 403	\$ 885	\$ 784
Non-taxable	56	58	115	118
Total interest income from investment securities	\$ 505	\$ 461	\$ 1,000	\$ 902

The following table provides information about the amount of gross gains and losses realized through the sales of available-for-sale investment securities:

(Dollars in Millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Realized gains	\$	\$ 3	\$ 1	\$ 8
Realized losses			(1)	
Net realized gains (losses)	\$	\$ 3	\$	\$ 8
Income tax (benefit) on net realized gains (losses)	\$	\$ 1	\$	\$ 3

The Company conducts a regular assessment of its investment securities with unrealized losses to determine whether investment securities are other-than-temporarily impaired considering, among other factors, the nature of the investment securities, credit ratings or financial condition of the issuer, the extent and duration of the unrealized loss, expected cash flows of underlying collateral, the existence of any government or agency guarantees, market conditions and whether the Company intends to sell or it is more likely than not the Company will be required to sell the investment securities. The Company determines other-than-temporary impairment recorded in earnings for debt securities not intended to be sold by estimating the future cash flows of each individual investment security, using market information where available, and discounting the cash flows at the original effective rate of the investment security. Other-than-temporary impairment recorded in other comprehensive income (loss) is measured as the difference between that discounted amount and the fair value of each investment security. The total amount of other-than-temporary impairment recorded was immaterial for the three and six months ended June 30, 2015 and 2014.

Changes in the credit losses on debt securities are summarized as follows:

(Dollars in Millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Balance at beginning of period	\$ 96	\$ 111	\$ 101	\$ 116
Additions to Credit Losses Due to Other-than-temporary Impairments				
Decreases in expected cash flows on securities for which other-than-temporary impairment was previously recognized		3		3

Total other-than-temporary impairment on debt securities		3		3
Other Changes in Credit Losses				
Increases in expected cash flows			(2)	(2)
Realized losses (a)	(5)	(3)	(8)	(6)
Credit losses on security sales and securities expected to be sold				
Balance at end of period	\$ 91	\$ 111	\$ 91	\$ 111

(a) Primarily represents principal losses allocated to mortgage and asset-backed securities in the Company's portfolio under the terms of the securitization transaction documents.

Table of Contents

At June 30, 2015, certain investment securities had a fair value below amortized cost. The following table shows the gross unrealized losses and fair value of the Company's investment securities with unrealized losses, aggregated by investment category and length of time the individual investment securities have been in continuous unrealized loss positions, at June 30, 2015:

(Dollars in Millions)	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Held-to-maturity						
U.S. Treasury and agencies	\$ 1,114	\$ (19)	\$ 109	\$ (3)	\$ 1,223	\$ (22)
Residential agency mortgage-backed securities	11,882	(71)	4,854	(110)	16,736	(181)
Other asset-backed securities			6	(1)	6	(1)
Obligations of state and political subdivisions	2	(1)			2	(1)
Other debt securities			20	(1)	20	(1)
Total held-to-maturity	\$ 12,998	\$ (91)	\$ 4,989	\$ (115)	\$ 17,987	\$ (206)
Available-for-sale						
U.S. Treasury and agencies	\$ 871	\$ (11)	\$ 9	\$	\$ 880	\$ (11)
Residential mortgage-backed securities						
Agency	9,568	(84)	6,914	(190)	16,482	(274)
Non-agency (a)						
Prime (b)	84	(1)	75	(3)	159	(4)
Non-prime (c)	16		19	(1)	35	(1)
Other asset-backed securities	21		2		23	
Obligations of state and political subdivisions	325	(9)			325	(9)
Corporate debt securities			448	(60)	448	(60)
Perpetual preferred securities			74	(10)	74	(10)
Total available-for-sale	\$ 10,885	\$ (105)	\$ 7,541	\$ (264)	\$ 18,426	\$ (369)

- (a) The Company had \$5 million of unrealized losses on residential non-agency mortgage-backed securities. Credit-related other-than-temporary impairment on these securities may occur if there is further deterioration in the underlying collateral pool performance. Borrower defaults may increase if economic conditions worsen. Additionally, deterioration in home prices may increase the severity of projected losses.
- (b) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
- (c) Includes all securities not meeting the conditions to be designated as prime.

The Company does not consider these unrealized losses to be credit-related. These unrealized losses primarily relate to changes in interest rates and market spreads subsequent to purchase. A substantial portion of investment securities that have unrealized losses are either corporate debt issued with high investment grade credit ratings or agency

mortgage-backed securities. In general, the issuers of the investment securities are contractually prohibited from prepayment at less than par, and the Company did not pay significant purchase premiums for these investment securities. At June 30, 2015, the Company had no plans to sell investment securities with unrealized losses, and believes it is more likely than not it would not be required to sell such investment securities before recovery of their amortized cost.

U.S. Bancorp

43

Table of Contents**Note 4** Loans and Allowance for Credit Losses

The composition of the loan portfolio, disaggregated by class and underlying specific portfolio type, was as follows:

(Dollars in Millions)	June 30, 2015		December 31, 2014	
	Amount	Percent of Total	Amount	Percent of Total
Commercial				
Commercial	\$ 79,323	31.9%	\$ 74,996	30.2%
Lease financing	5,297	2.1	5,381	2.2
Total commercial	84,620	34.0	80,377	32.4
Commercial Real Estate				
Commercial mortgages	32,060	12.9	33,360	13.5
Construction and development	10,198	4.1	9,435	3.8

Home equity loans, first liens	13,027	5.2	13,021	5.2
Total residential mortgages	51,337	20.6	51,619	20.8
Credit Card	17,788	7.2	18,515	7.5
Other Retail				
Retail leasing	5,616	2.3	5,871	2.4
Home equity and second mortgages	16,071	6.5	15,916	6.4
Revolving credit	3,289	1.3	3,309	1.3
Installment	6,741	2.7	6,242	2.5
Automobile	15,935	6.4	14,822	6.0
Student (a)			3,104	1.3
Total other retail	47,652	19.2	49,264	19.9
Total loans, excluding covered loans	243,655	98.0	242,570	97.9
Covered Loans	4,984	2.0	5,281	2.1
Total loans	\$ 248,639	100.0%	\$ 247,851	100.0%

(a) The Company transferred all of its student loans to loans held for sale at the end of the first quarter of 2015.

The Company had loans of \$79.4 billion at June 30, 2015, and \$79.8 billion at December 31, 2014, pledged at the Federal Home Loan Bank (FHLB), and loans of \$64.8 billion at June 30, 2015, and \$61.8 billion at December 31, 2014, pledged at the Federal Reserve Bank.

Originated loans are reported at the principal amount outstanding, net of unearned interest and deferred fees and costs. Net unearned interest and deferred fees and costs amounted to \$509 million at June 30, 2015, and \$574 million at December 31, 2014. All purchased loans and related indemnification assets are recorded at fair value at the date of purchase. The Company evaluates purchased loans for impairment at the date of purchase in accordance with applicable authoritative accounting guidance. Purchased loans with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are considered purchased impaired loans. All other purchased loans are considered purchased nonimpaired loans.

Changes in the accretable balance for purchased impaired loans were as follows:

(Dollars in Millions)	Three Months Ended		Six Months	
	June 30,		Ended	
	2015	2014	2015	2014
Balance at beginning of period	\$ 1,187	\$ 1,584	\$ 1,309	\$ 1,655
Accretion	(100)	(120)	(198)	(231)
Disposals	(43)	(29)	(70)	(69)
Reclassifications from nonaccretable difference (a)	32	53	37	134
Other		(1)	(2)	(2)
Balance at end of period	\$ 1,076	\$ 1,487	\$ 1,076	\$ 1,487

(a) Primarily relates to changes in expected credit performance.

Table of Contents

Allowance for Credit Losses The allowance for credit losses reserves for probable and estimable losses incurred in the Company's loan and lease portfolio, including unfunded credit commitments, and includes certain amounts that do not represent loss exposure to the Company because those losses are recoverable under loss sharing agreements with the Federal Deposit Insurance Corporation (FDIC). The allowance for credit losses is increased through provisions charged to operating earnings and reduced by net charge-offs. Management evaluates the allowance each quarter to ensure it appropriately reserves for incurred losses.

The allowance recorded for loans in the commercial lending segment is based on reviews of individual credit relationships and considers the migration analysis of commercial lending segment loans and actual loss experience. In the migration analysis applied to risk rated loan portfolios, the Company currently examines up to a 14-year period of loss experience. For each loan type, this historical loss experience is adjusted as necessary to consider any relevant changes in portfolio composition, lending policies, underwriting standards, risk management practices or economic conditions. The results of the analysis are evaluated quarterly to confirm an appropriate historical time frame is selected for each commercial loan type. The allowance recorded for impaired loans greater than \$5 million in the commercial lending segment is based on an individual loan analysis utilizing expected cash flows discounted using the original effective interest rate, the observable market price of the loan, or the fair value of the collateral for collateral-dependent loans, rather than the migration analysis. The allowance recorded for all other commercial lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, portfolio growth and historical losses, adjusted for current trends. The Company also considers the impacts of any loan modifications made to commercial lending segment loans and any subsequent payment defaults to its expectations of cash flows, principal balance, and current expectations about the borrower's ability to pay in determining the allowance for credit losses.

The allowance recorded for Troubled Debt Restructuring (TDR) loans and purchased impaired loans in the consumer lending segment is determined on a homogenous pool basis utilizing expected cash flows discounted using the original effective interest rate of the pool, or the prior quarter effective rate, respectively. The allowance for collateral-dependent loans in the consumer lending segment is determined based on the fair value of the collateral less costs to sell. The allowance recorded for all other consumer lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, delinquency status, refreshed loan-to-value ratios when possible, portfolio growth and historical losses, adjusted for current trends. The Company also considers any modifications made to consumer lending segment loans including the impacts of any subsequent payment defaults since modification in determining the allowance for credit losses, such as the borrower's ability to pay under the restructured terms, and the timing and amount of payments.

The allowance for the covered loan segment is evaluated each quarter in a manner similar to that described for non-covered loans and reflects decreases in expected cash flows of those loans after the acquisition date. The provision for credit losses for covered loans considers the indemnification provided by the FDIC.

In addition, subsequent payment defaults on loan modifications considered TDRs are considered in the underlying factors used in the determination of the appropriateness of the allowance for credit losses. For each loan segment, the Company estimates future loan charge-offs through a variety of analysis, trends and underlying assumptions. With respect to the commercial lending segment, TDRs may be collectively evaluated for impairment where observed performance history, including defaults, is a primary driver of the loss allocation. For commercial TDRs individually evaluated for impairment, attributes of the borrower are the primary factors in determining the allowance for credit losses. However, historical loss experience is also incorporated into the allowance methodology applied to this category of loans. With respect to the consumer lending segment, performance of the portfolio, including defaults on TDRs, is considered when estimating future cash flows.

The Company's methodology for determining the appropriate allowance for credit losses for all the loan segments also considers the imprecision inherent in the methodologies used. As a result, in addition to the amounts determined under the methodologies described above, management also considers the potential impact of other qualitative factors which include, but are not limited to, economic factors; geographic and other concentration risks; delinquency and nonaccrual trends; current business conditions; changes in lending policy, underwriting standards, internal review and other relevant business practices; and the regulatory environment. The consideration of these items results in adjustments to allowance amounts included in the Company's allowance for credit losses for each of the above loan segments.

The Company also assesses the credit risk associated with off-balance sheet loan commitments, letters of credit, and derivatives. Credit risk associated with derivatives is reflected in the fair values recorded for those positions. The

U.S. Bancorp

45

Table of Contents

liability for off-balance sheet credit exposure related to loan commitments and other credit guarantees is included in other liabilities. Because business processes and credit risks associated with unfunded credit commitments are essentially the same as for loans, the Company utilizes similar processes to estimate its liability for unfunded credit commitments.

Activity in the allowance for credit losses by portfolio class was as follows:

(a) Represents loans greater than \$5 million classified as nonperforming or TDRs.

(b) Includes expected reimbursements from the FDIC under loss sharing agreements.

Credit Quality The quality of the Company's loan portfolios is assessed as a function of net credit losses, levels of nonperforming assets and delinquencies, and credit quality ratings as defined by the Company.

For all loan classes, loans are considered past due based on the number of days delinquent except for monthly amortizing loans which are classified delinquent based upon the number of contractually required payments not made (for example, two missed payments is considered 30 days delinquent). When a loan is placed on nonaccrual status, unpaid accrued interest is reversed.

Commercial lending segment loans are generally placed on nonaccrual status when the collection of principal and interest has become 90 days past due or is otherwise considered doubtful. Commercial lending segment loans are generally fully or partially charged down to the fair value of the collateral securing the loan, less costs to sell, when the loan is considered uncollectible.

Consumer lending segment loans are generally charged-off at a specific number of days or payments past due. Residential mortgages and other retail loans secured by 1-4 family properties are generally charged down to the fair value of the collateral securing the loan, less costs to sell, at 180 days past due, and placed on nonaccrual status in instances where a partial charge-off occurs unless the loan is well secured and in the process of collection. Loans and lines in a junior lien position secured by 1-4 family properties are placed on nonaccrual status at 120 days past due or when behind a first lien that has become 180 days or greater past due or placed on nonaccrual status. Any secured consumer lending segment loan whose borrower has had debt discharged through bankruptcy, for which the loan amount exceeds the fair value of the collateral, is charged down to the fair value of the related collateral and the

remaining balance is placed on nonaccrual status. Credit card loans continue to accrue interest until the account is

U.S. Bancorp

47

Table of Contents

charged off. Credit cards are charged off at 180 days past due. Other retail loans not secured by 1-4 family properties are charged-off at 120 days past due; and revolving consumer lines are charged off at 180 days past due. Similar to credit cards, other retail loans are generally not placed on nonaccrual status because of the relative short period of time to charge-off. Certain retail customers having financial difficulties may have the terms of their credit card and other loan agreements modified to require only principal payments and, as such, are reported as nonaccrual.

For all loan classes, interest payments received on nonaccrual loans are generally recorded as a reduction to a loan's carrying amount while a loan is on nonaccrual and are recognized as interest income upon payoff of the loan. However, interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible. In certain circumstances, loans in any class may be restored to accrual status, such as when a loan has demonstrated sustained repayment performance or no amounts are past due and prospects for future payment are no longer in doubt; or when the loan becomes well secured and is in the process of collection. Loans where there has been a partial charge-off may be returned to accrual status if all principal and interest (including amounts previously charged-off) is expected to be collected and the loan is current.

Covered loans not considered to be purchased impaired are evaluated for delinquency, nonaccrual status and charge-off consistent with the class of loan they would be included in had the loss share coverage not been in place. Generally, purchased impaired loans are considered accruing loans. However, the timing and amount of future cash flows for some loans is not reasonably estimable, and those loans are classified as nonaccrual loans with interest income not recognized until the timing and amount of the future cash flows can be reasonably estimated.

The following table provides a summary of loans by portfolio class, including the delinquency status of those that continue to accrue interest, and those that are nonperforming:

(Dollars in Millions)	Current	Accruing 30-89 Days Past Due	90 Days or More Past Due	Nonperforming	Total
June 30, 2015					
Commercial	\$ 84,292	\$ 195	\$ 43	\$ 90	\$ 84,620

Total loans	\$ 244,327	\$ 1,113	\$ 945	\$ 1,466	\$ 247,851

(a) At June 30, 2015, \$375 million of loans 30-89 days past due and \$2.9 billion of loans 90 days or more past due purchased from Government National Mortgage Association (GNMA) mortgage pools whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs, were classified as current, compared with \$431 million and \$3.1 billion at December 31, 2014, respectively.

At June 30, 2015, the amount of foreclosed residential real estate held by the Company, and included in other real estate owned, was \$274 million (\$239 million excluding covered assets), compared with \$270 million (\$233 million excluding covered assets) at December 31, 2014. This excludes \$753 million and \$641 million at June 30, 2015 and December 31, 2014, respectively, of foreclosed residential real estate related to mortgage loans whose payments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. In addition, the amount of residential mortgage loans secured by residential real estate in the process of foreclosure at June 30, 2015 and December 31, 2014, was \$2.8 billion and \$2.9 billion, respectively, of which \$2.1 billion related to loans purchased from Government National Mortgage Association (GNMA) mortgage pools whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

The Company classifies its loan portfolios using internal credit quality ratings on a quarterly basis. These ratings include: pass, special mention and classified, and are an important part of the Company's overall credit risk management process and evaluation of the allowance for credit losses. Loans with a pass rating represent those not classified on the Company's rating scale for problem credits, as minimal credit risk has been identified. Special mention

Table of Contents

loans are those that have a potential weakness deserving management's close attention. Classified loans are those where a well-defined weakness has been identified that may put full collection of contractual cash flows at risk. It is possible that others, given the same information, may reach different reasonable conclusions regarding the credit quality rating classification of specific loans.

The following table provides a summary of loans by portfolio class and the Company's internal credit quality rating:

			Criticized		
(Dollars in Millions)	Pass	Special Mention	Classified (a)	Total Criticized	Total
June 30, 2015					
Commercial (b)	\$ 81,686	\$ 1,808	\$ 1,126	\$ 2,934	\$ 84,620

(a) Classified rating on consumer loans primarily based on delinquency status.

(b) At June 30, 2015, \$907 million of loans to customers in energy-related businesses had a special mention or classified rating, compared with \$122 million at December 31, 2014.

(c) At June 30, 2015, \$2.9 billion of GNMA loans 90 days or more past due and \$2.1 billion of restructured GNMA loans whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs were classified with a pass rating, compared with \$3.1 billion and \$2.2 billion at December 31, 2014, respectively.

For all loan classes, a loan is considered to be impaired when, based on current events or information, it is probable the Company will be unable to collect all amounts due per the contractual terms of the loan agreement. Impaired loans include all nonaccrual and TDR loans. For all loan classes, interest income on TDR loans is recognized under the modified terms and conditions if the borrower has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles. Interest income is generally not recognized on other impaired loans until the loan is paid off. However, interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible.

Factors used by the Company in determining whether all principal and interest payments due on commercial and commercial real estate loans will be collected and therefore whether those loans are impaired include, but are not limited to, the financial condition of the borrower, collateral and/or guarantees on the loan, and the borrower's estimated future ability to pay based on industry, geographic location and certain financial ratios. The evaluation of impairment on residential mortgages, credit card loans and other retail loans is primarily driven by delinquency status of individual loans or whether a loan has been modified, and considers any government guarantee where applicable. Individual covered loans, whose future losses are covered by loss sharing agreements with the FDIC that substantially reduce the risk of credit losses to the Company, are evaluated for impairment and accounted for in a manner consistent with the class of loan they would have been included in had the loss sharing coverage not been in place.

Troubled Debt Restructurings In certain circumstances, the Company may modify the terms of a loan to maximize the collection of amounts due when a borrower is experiencing financial difficulties or is expected to experience difficulties in the near-term. Concessionary modifications are classified as TDRs unless the modification results in only an insignificant delay in payments to be received. The Company recognizes interest on TDRs if the borrower complies with the revised terms and conditions as agreed upon with the Company and has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles, which is generally six months or greater. To the extent a previous restructuring was insignificant, the Company considers the cumulative effect of past restructurings related to the receivable when determining whether a current restructuring is a TDR. Loans classified as TDRs are considered impaired loans for reporting and measurement purposes.

Table of Contents

The following table provides a summary of loans modified as TDRs during the periods presented by portfolio class:

(Dollars in Millions)	2015			2014

Total loans	20,238	\$ 921	\$ 922	22,132	\$ 992	\$ 964

Residential mortgages, home equity and second mortgages, and loans purchased from GNMA mortgage pools in the table above include trial period arrangements offered to customers during the periods presented. The post-modification balances for these loans reflect the current outstanding balance until a permanent modification is made. In addition, the post-modification balances typically include capitalization of unpaid accrued interest and/or fees under the various modification programs. For those loans modified as TDRs during the second quarter of 2015, at June 30, 2015, 237 residential mortgages, 57 home equity and second mortgage loans and 2,154 loans purchased from GNMA mortgage pools with outstanding balances of \$33 million, \$4 million and \$279 million, respectively, were in a trial period and have estimated post-modification balances of \$33 million, \$3 million and \$284 million, respectively, assuming permanent modification occurs at the end of the trial period.

The Company has implemented certain restructuring programs that may result in TDRs. However, many of the Company's TDRs are also determined on a case-by-case basis in connection with ongoing loan collection processes.

For the commercial lending segment, modifications generally result in the Company working with borrowers on a case-by-case basis. Commercial and commercial real estate modifications generally include extensions of the maturity date and may be accompanied by an increase or decrease to the interest rate, which may not be deemed a market rate of interest. In addition, the Company may work with the borrower in identifying other changes that mitigate loss to the Company, which may include additional collateral or guarantees to support the loan. To a lesser extent, the Company may waive contractual principal. The Company classifies all of the above concessions as TDRs to the extent the Company determines that the borrower is experiencing financial difficulty.

Modifications for the consumer lending segment are generally part of programs the Company has initiated. The Company participates in the U.S. Department of Treasury Home Affordable Modification Program (HAMP). HAMP gives qualifying homeowners an opportunity to permanently modify residential mortgage loans and achieve more affordable monthly payments, with the U.S. Department of Treasury compensating the Company for a portion of the reduction in monthly amounts due from borrowers participating in this program. The Company also modifies residential mortgage loans under Federal Housing Administration, Department of Veterans Affairs, or its own internal programs. Under these programs, the Company provides concessions to qualifying borrowers experiencing financial difficulties. The concessions may include adjustments to interest rates, conversion of adjustable rates to fixed rates, extension of maturity dates or deferrals of payments, capitalization of accrued interest and/or outstanding advances, or in limited situations, partial forgiveness of loan principal. In most instances, participation in residential mortgage loan restructuring programs requires the customer to complete a short-term trial period. A permanent loan modification is contingent on the customer successfully completing the trial period arrangement and the loan documents are not modified until that time. The Company reports loans in a trial period arrangement as TDRs and continues to report them as TDRs after the trial period.

Table of Contents

Credit card and other retail loan TDRs are generally part of distinct restructuring programs providing customers experiencing financial difficulty with modifications whereby balances may be amortized up to 60 months, and generally include waiver of fees and reduced interest rates.

In addition, the Company considers secured loans to consumer borrowers that have debt discharged through bankruptcy where the borrower has not reaffirmed the debt to be TDRs.

Modifications to loans in the covered segment are similar in nature to that described above for non-covered loans, and the evaluation and determination of TDR status is similar, except that acquired loans restructured after acquisition are not considered TDRs for accounting and disclosure purposes if the loans evidenced credit deterioration as of the acquisition date and are accounted for in pools. Losses associated with the modification on covered loans, including the economic impact of interest rate reductions, are generally eligible for reimbursement under loss sharing agreements with the FDIC.

The following table provides a summary of TDR loans that defaulted (fully or partially charged-off or became 90 days or more past due) during the periods presented that were modified as TDRs within 12 months previous to default:

(Dollars in Millions)	2015		2014	
	Number of Loans	Amount Defaulted	Number of Loans	Amount Defaulted
Three Months Ended June 30				
Commercial	149	\$ 17	150	\$ 3
Commercial real estate	3	1	6	3
Residential mortgages	80	12	129	17
Credit card	1,443	7	1,460	8
Other retail	237	4	158	4
Total loans, excluding GNMA and covered loans	1,912	41	1,903	35
Loans purchased from GNMA mortgage pools	170	22	105	12
Covered loans			2	1
Total loans	2,082	\$ 63	2,010	\$ 48
Six Months Ended June 30				
Commercial	313	\$ 19	295	\$ 8
Commercial real estate	8	3	12	10
Residential mortgages	186	25	277	39
Credit card	3,021	15	2,921	16
Other retail	368	7	343	10
Total loans, excluding GNMA and covered loans	3,896	69	3,848	83
Loans purchased from GNMA mortgage pools	368	48	176	22
Covered loans			10	4
Total loans	4,264	\$ 117	4,034	\$ 109

In addition to the defaults in the table above, for the three and six months ended June 30, 2015, the Company had a total of 379 and 1,154 residential mortgage loans, home equity and second mortgage loans and loans purchased from GNMA mortgage pools with aggregate outstanding balances of \$51 million and \$152 million, respectively, where borrowers did not successfully complete the trial period arrangement and therefore are no longer eligible for a permanent modification under the applicable modification program.

Covered Assets Covered assets represent loans and other assets acquired from the FDIC, subject to loss sharing agreements, and include expected reimbursements from the FDIC. The carrying amount of the covered assets consisted of purchased impaired loans, purchased nonimpaired loans and other assets as shown in the following table:

(Dollars in Millions)	June 30, 2015				December 31, 2014			
	Purchased Impaired Loans	Purchased Nonimpaired Loans	Other Assets	Total	Purchased Impaired Loans	Purchased Nonimpaired Loans	Other Assets	Total
Residential mortgage loans	\$ 2,661	\$ 677	\$	\$ 3,338	\$ 2,784	\$ 738	\$	\$ 3,522
Other retail loans		535		535		584		584
Losses reimbursable by the FDIC (a)			705	705			717	717
Unamortized changes in FDIC asset (b)			406	406			458	458
Covered loans	2,661	1,212	1,111	4,984	2,784	1,322	1,175	5,281
Foreclosed real estate			35	35			37	37
Total covered assets	\$ 2,661	\$ 1,212	\$ 1,146	\$ 5,019	\$ 2,784	\$ 1,322	\$ 1,212	\$ 5,318

(a) Relates to loss sharing agreements with remaining terms up to four years.

(b) Represents decreases in expected reimbursements by the FDIC as a result of decreases in expected losses on the covered loans. These amounts are amortized as a reduction in interest income on covered loans over the shorter of the expected life of the respective covered loans or the remaining contractual term of the indemnification agreements.

Table of Contents

Interest income is recognized on purchased impaired loans through accretion of the difference between the carrying amount of those loans and their expected cash flows. The initial determination of the fair value of the purchased loans includes the impact of expected credit losses and, therefore, no allowance for credit losses is recorded at the purchase date. To the extent credit deterioration occurs after the date of acquisition, the Company records an allowance for credit losses.

Note 5 Accounting for Transfers and Servicing of Financial Assets and Variable Interest Entities

The Company transfers financial assets in the normal course of business. The majority of the Company's financial asset transfers are residential mortgage loan sales primarily to government-sponsored enterprises (GSEs), transfers of tax-advantaged investments, commercial loan sales through participation agreements, and other individual or portfolio loan and securities sales. In accordance with the accounting guidance for asset transfers, the Company considers any ongoing involvement with transferred assets in determining whether the assets can be derecognized from the balance sheet. Guarantees provided to certain third parties in connection with the transfer of assets are further discussed in Note 15.

For loans sold under participation agreements, the Company also considers whether the terms of the loan participation agreement meet the accounting definition of a participating interest. With the exception of servicing and certain performance-based guarantees, the Company's continuing involvement with financial assets sold is minimal and generally limited to market customary representation and warranty clauses. Any gain or loss on sale depends on the previous carrying amount of the transferred financial assets, the consideration received, and any liabilities incurred in exchange for the transferred assets. Upon transfer, any servicing assets and other interests that continue to be held by the Company are initially recognized at fair value. For further information on mortgage servicing rights (MSRs), refer to Note 6. On a limited basis, the Company may acquire and package high-grade corporate bonds for select corporate customers, in which the Company generally has no continuing involvement with these transactions. Additionally, the Company is an authorized GNMA issuer and issues GNMA securities on a regular basis. The Company has no other asset securitizations or similar asset-backed financing arrangements that are off-balance sheet.

The Company is involved in various entities that are considered to be variable interest entities (VIEs). The Company's investments in VIEs are primarily related to investments promoting affordable housing, community development and renewable energy sources. Some of these tax-advantaged investments support the Company's regulatory compliance with the Community Reinvestment Act. The Company's investments in these entities generate a return primarily through the realization of federal and state income tax credits, and other tax benefits, such as tax deductions from operating losses of the investments, over specified time periods. These tax credits are recognized as a reduction of tax expense or, for investments qualifying as investment tax credits, as a reduction to the related investment asset. The Company recognized federal and state income tax credits related to its affordable housing and other tax-advantaged investments in tax expense of \$170 million and \$179 million for the three months ended June 30, 2015 and 2014, respectively, and \$338 million and \$357 million for the six months ended June 30, 2015 and 2014, respectively. The Company also recognized \$170 million and \$217 million of investment tax credits for the three months ended June 30, 2015 and 2014, respectively, and \$284 million and \$320 million for the six months ended June 30, 2015 and 2014, respectively. The Company recognized \$156 million and \$166 million of expenses related to all of these investments for the three months ended June 30, 2015 and 2014, respectively, of which \$65 million and \$59 million, respectively, was included in tax expense and the remainder was included in noninterest expense. The Company recognized \$302 million and \$330 million of expenses related to all of these investments for the six months ended June 30, 2015 and 2014, respectively, of which \$131 million and \$130 million, respectively, was included in tax expense and the remainder was included in noninterest expense.

The Company is not required to consolidate VIEs in which it has concluded it does not have a controlling financial interest, and thus is not the primary beneficiary. In such cases, the Company does not have both the power to direct the entities' most significant activities and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIEs.

The Company's investments in these unconsolidated VIEs are carried in other assets on the Consolidated Balance Sheet. The Company's unfunded capital and other commitments related to these unconsolidated VIEs are generally carried in other liabilities on the Consolidated Balance Sheet. The Company's maximum exposure to loss from these unconsolidated VIEs include the investment recorded on the Company's Consolidated Balance Sheet, net of unfunded capital commitments, and previously recorded tax credits which remain subject to recapture by taxing authorities based

U.S. Bancorp

53

Table of Contents

on compliance features required to be met at the project level. While the Company believes potential losses from these investments are remote, the maximum exposure was determined by assuming a scenario where the community-based business and housing projects completely fail and do not meet certain government compliance requirements resulting in recapture of the related tax credits.

The following table provides a summary of investments in community development and tax-advantaged VIEs that the Company has not consolidated:

(Dollars in Millions)	June 30, 2015	December 31, 2014
Investment carrying amount	\$ 4,995	\$ 4,259
Unfunded capital and other commitments	2,377	1,743
Maximum exposure to loss	8,608	8,393

The Company also has noncontrolling financial investments in private investment funds and partnerships considered to be VIEs, which are not consolidated. The Company's recorded investment in these entities, carried in other assets on the Consolidated Balance Sheet, was approximately \$86 million at June 30, 2015, compared with \$97 million at December 31, 2014. The maximum exposure to loss related to these VIEs was \$95 million at June 30, 2015 and \$105 million at December 31, 2014, representing the Company's investment balance and its unfunded commitments to invest additional amounts.

The Company's individual net investments in unconsolidated VIEs, which exclude any unfunded capital commitments, ranged from less than \$1 million to \$50 million at June 30, 2015, compared with less than \$1 million to \$53 million at December 31, 2014.

The Company is required to consolidate VIEs in which it has concluded it has a controlling financial interest. The Company sponsors entities to which it transfers its interests in tax-advantaged investments to third parties. At June 30, 2015, approximately \$2.9 billion of the Company's assets and \$2.1 billion of its liabilities included on the Consolidated Balance Sheet were related to community development and tax-advantaged investment VIEs which the Company has consolidated, primarily related to these transfers. These amounts compared to \$2.7 billion and \$2.0 billion, respectively, at December 31, 2014. The majority of the assets of these consolidated VIEs are reported in other assets, and the liabilities are reported in long-term debt and other liabilities. The assets of a particular VIE are the primary source of funds to settle its obligations. The creditors of the VIEs do not have recourse to the general credit of the Company. The Company's exposure to the consolidated VIEs is generally limited to the carrying value of its variable interests plus any related tax credits previously recognized or transferred to others with a guarantee.

The Company also sponsors a conduit to which it previously transferred high-grade investment securities. The Company consolidates the conduit because of its ability to manage the activities of the conduit. At June 30, 2015, \$34 million of the held-to-maturity investment securities on the Company's Consolidated Balance Sheet were related to the conduit, compared with \$35 million at December 31, 2014.

In addition, the Company sponsors a municipal bond securities tender option bond program. The Company controls the activities of the program's entities, is entitled to the residual returns and provides credit, liquidity and remarketing arrangements to the program. As a result, the Company has consolidated the program's entities. At June 30, 2015, \$2.3 billion of available-for-sale investment securities and \$2.2 billion of short-term borrowings on the Consolidated Balance Sheet were related to the tender option bond program, compared with \$2.9 billion of available-for-sale investment securities and \$2.7 billion of short-term borrowings at December 31, 2014.

Note 6 Mortgage Servicing Rights

The Company serviced \$225.5 billion of residential mortgage loans for others at June 30, 2015, and \$225.0 billion at December 31, 2014, which included subserviced mortgages with no corresponding MSR asset. The net impact included in mortgage banking revenue of fair value changes of MSRs due to changes in valuation assumptions and derivatives used to economically hedge MSRs were net gains of \$7 million and \$93 million (of which \$44 million related to excess servicing rights sold during the second quarter of 2014) for the three months ended June 30, 2015 and 2014, respectively, and net gains of \$6 million and \$151 million for the six months ended June 30, 2015 and 2014, respectively. Loan servicing fees, not including valuation changes, included in mortgage banking revenue, were \$179 million and \$185 million for the three months ended June 30, 2015 and 2014, respectively, and \$357 million and \$373 million for the six months ended June 30, 2015 and 2014, respectively.

Table of Contents

Changes in fair value of capitalized MSR are summarized as follows:

(Dollars in Millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Balance at beginning of period	\$ 2,250	\$ 2,618	\$ 2,338	\$ 2,680
Rights purchased	9	1	15	2
Rights capitalized	164	71	309	155
Rights sold		(141)		(141)
Changes in fair value of MSRs				
Due to fluctuations in market interest rates (a)	172	(82)	41	(158)
Due to revised assumptions or models (b)	2	44	2	56
Other changes in fair value (c)	(116)	(99)	(224)	(182)
Balance at end of period	\$ 2,481	\$ 2,412	\$ 2,481	\$ 2,412

(a) Includes changes in MSR value associated with changes in market interest rates, including estimated prepayment rates and anticipated earnings on escrow deposits.

(b) Includes changes in MSR value not caused by changes in market interest rates, such as changes in cost to service, ancillary income, and discount rate, as well as the impact of any model changes.

(c) Primarily represents changes due to realization of expected cash flows over time (decay).

The estimated sensitivity to changes in market interest rates of the fair value of the MSRs portfolio and the related derivative instruments was as follows:

(Dollars in Millions)	June 30, 2015						December 31, 2014					
	Down 100 bps	Down 50 bps	Down 25 bps	Up 25 bps	Up 50 bps	Up 100 bps	Down 100 bps	Down 50 bps	Down 25 bps	Up 25 bps	Up 50 bps	Up 100 bps
MSR portfolio	\$ (512)	\$ (214)	\$ (99)	\$ 83	\$ 156	\$ 305	\$ (540)	\$ (242)	\$ (114)	\$ 100	\$ 185	\$ 346
Derivative instrument hedges	390	190	92	(85)	(164)	(313)	441	223	109	(102)	(197)	(375)
Net sensitivity	\$ (122)	\$ (24)	\$ (7)	\$ (2)	\$ (8)	\$ (8)	\$ (99)	\$ (19)	\$ (5)	\$ (2)	\$ (12)	\$ (29)

The fair value of MSRs and their sensitivity to changes in interest rates is influenced by the mix of the servicing portfolio and characteristics of each segment of the portfolio. The Company's servicing portfolio consists of the distinct portfolios of government-insured mortgages, conventional mortgages and Housing Finance Agency (HFA) mortgages. The servicing portfolios are predominantly comprised of fixed-rate agency loans with limited adjustable-rate or jumbo mortgage loans. The HFA division specializes in servicing loans made under state and local housing authority programs. These programs provide mortgages to low-income and moderate-income borrowers and are generally government-insured programs with a favorable rate subsidy, down payment and/or closing cost assistance.

A summary of the Company's MSRs and related characteristics by portfolio was as follows:

June 30, 2015

December 31, 2014

(Dollars in Millions)	June 30, 2015				December 31, 2014			
	HFAGovernment	Conventional (b)	Total		HFAGovernment	Conventional (b)	Total	
Servicing portfolio	\$ 22,226	\$ 40,017	\$ 160,932	\$ 223,175	\$ 19,706	\$ 40,471	\$ 162,620	\$ 222,797
Fair value	\$ 243	\$ 444	\$ 1,794	\$ 2,481	\$ 213	\$ 426	\$ 1,699	\$ 2,338
Value (bps) (a)	109	111	111	111	108	105	104	105
Weighted-average servicing fees (bps)	36	33	27	29	37	33	27	29
Multiple (value/servicing fees)	3.03	3.36	4.11	3.83	2.92	3.18	3.85	3.62
Weighted-average note rate	4.51%	4.13%	4.11%	4.15%	4.58%	4.18%	4.14%	4.19%
Weighted-average age (in years)	3.4	3.4	3.3	3.3	3.6	3.2	3.1	3.2
Weighted-average expected prepayment (constant prepayment rate)	12.9%	13.7%	10.1%	11.0%	12.8%	14.8%	11.4%	12.1%
Weighted-average expected life (in years)	6.1	5.8	6.8	6.6	6.2	5.5	6.5	6.3
Weighted-average discount rate	11.8%	11.3%	9.6%	10.1%	11.9%	11.2%	9.6%	10.1%

(a) Value is calculated as fair value divided by the servicing portfolio.

(b) Represents loans sold primarily to GSEs.

Series H	20,000	500	13	487	20,000	500	13	487
Total preferred stock (a)	159,910	\$ 4,936	\$ 180	\$ 4,756	159,910	\$ 4,936	\$ 180	\$ 4,756

(a) The par value of all shares issued and outstanding at June 30, 2015 and December 31, 2014, was \$1.00 per share.

Note 8 Accumulated Other Comprehensive Income (Loss)

Shareholders' equity is affected by transactions and valuations of asset and liability positions that require adjustments to accumulated other comprehensive income (loss). The reconciliation of the transactions affecting accumulated other comprehensive income (loss) included in shareholders' equity is as follows:

Three Months Ended June 30, (Dollars in Millions)	Unrealized Gains (Losses)				Unrealized Gains (Losses)			Total
	Unrealized Gains (Losses)	Unrealized Gains (Losses)	Unrealized Gains (Losses)	Unrealized Gains (Losses)	Unrealized Gains (Losses)	Unrealized Gains (Losses)	Unrealized Gains (Losses)

Tax effect of				
Tax credits and benefits, net of related expenses	(182)	(184)	(346)	(349)
Tax-exempt income	(51)	(51)	(103)	(103)
Noncontrolling interests	(6)	(5)	(10)	(10)
Other items (a)	(5)	10	(30)	17
Applicable income taxes	\$ 528	\$ 547	\$ 1,007	\$ 1,043

(a) Includes the resolution of certain tax matters with taxing authorities in the first quarter of 2015.

The Company's income tax returns are subject to review and examination by federal, state, local and foreign government authorities. On an ongoing basis, numerous federal, state, local and foreign examinations are in progress and cover multiple tax years. As of June 30, 2015, the federal taxing authority has completed its examination of the Company through the fiscal year ended December 31, 2010. The years open to examination by foreign, state and local government authorities vary by jurisdiction.

The Company's net deferred tax liability was \$1.8 billion at June 30, 2015, and \$1.7 billion at December 31, 2014.

Note 12 Derivative Instruments

In the ordinary course of business, the Company enters into derivative transactions to manage various risks and to accommodate the business requirements of its customers. The Company recognizes all derivatives on the Consolidated Balance Sheet at fair value in other assets or in other liabilities. On the date the Company enters into a derivative contract, the derivative is designated as either a hedge of the fair value of a recognized asset or liability (fair value hedge); a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge); a hedge of the volatility of an investment in foreign operations driven by changes in foreign currency exchange rates (net investment hedge); or a designation is not made as it is a customer-related transaction, an economic hedge for asset/liability risk management purposes or another stand-alone derivative created through the Company's operations (free-standing derivative). When a derivative is designated as a fair value, cash flow or net investment hedge, the Company performs an assessment, at inception and, at a minimum, quarterly thereafter, to determine the effectiveness of the derivative in offsetting changes in the value or cash flows of the hedged item(s).

Fair Value Hedges These derivatives are interest rate swaps the Company uses to hedge the change in fair value related to interest rate changes of its underlying fixed-rate debt. Changes in the fair value of derivatives designated as fair value

Table of Contents

hedges, and changes in the fair value of the hedged items, are recorded in earnings. All fair value hedges were highly effective for the three and six months ended June 30, 2015, and the change in fair value attributed to hedge ineffectiveness was not material.

Cash Flow Hedges These derivatives are interest rate swaps the Company uses to hedge the forecasted cash flows from its underlying variable-rate loans and debt. Changes in the fair value of derivatives designated as cash flow hedges are recorded in other comprehensive income (loss) until the cash flows of the hedged items are realized. If a derivative designated as a cash flow hedge is terminated or ceases to be highly effective, the gain or loss in other comprehensive income (loss) is amortized to earnings over the period the forecasted hedged transactions impact earnings. If a hedged forecasted transaction is no longer probable, hedge accounting is ceased and any gain or loss included in other comprehensive income (loss) is reported in earnings immediately, unless the forecasted transaction is at least reasonably possible of occurring, whereby the amounts remain within other comprehensive income (loss). At June 30, 2015, the Company had \$125 million (net-of-tax) of realized and unrealized losses on derivatives classified as cash flow hedges recorded in other comprehensive income (loss), compared with \$172 million (net-of-tax) at December 31, 2014. The estimated amount to be reclassified from other comprehensive income (loss) into earnings during the remainder of 2015 and the next 12 months are losses of \$56 million (net-of-tax) and \$94 million (net-of-tax), respectively. This amount includes gains and losses related to hedges that were terminated early for which the forecasted transactions are still probable. All cash flow hedges were highly effective for the six months ended June 30, 2015, and the change in fair value attributed to hedge ineffectiveness was not material.

Net Investment Hedges The Company uses forward commitments to sell specified amounts of certain foreign currencies, and occasionally non-derivative debt instruments, to hedge the volatility of its investment in foreign operations driven by fluctuations in foreign currency exchange rates. The ineffectiveness on all net investment hedges was not material for the three and six months ended June 30, 2015. There were no non-derivative debt instruments designated as net investment hedges at June 30, 2015 or December 31, 2014.

Other Derivative Positions The Company enters into free-standing derivatives to mitigate interest rate risk and for other risk management purposes. These derivatives include forward commitments to sell to-be-announced securities (TBAs) and other commitments to sell residential mortgage loans, which are used to economically hedge the interest rate risk related to residential mortgage loans held for sale (MLHFS) and unfunded mortgage loan commitments. The Company also enters into interest rate swaps, forward commitments to buy TBAs, U.S. Treasury futures and options on U.S. Treasury futures to economically hedge the change in the fair value of the Company's MSR. The Company also enters into foreign currency forwards to economically hedge remeasurement gains and losses the Company recognizes on foreign currency denominated assets and liabilities. In addition, the Company acts as a seller and buyer of interest rate derivatives and foreign exchange contracts for its customers. The Company mitigates the market and liquidity risk associated with these customer derivatives by entering into similar offsetting positions with broker-dealers, or on a portfolio basis by entering into other derivative or non-derivative financial instruments that partially or fully offset the exposure from these customer-related positions. The Company's customer derivatives and related hedges are monitored and reviewed by the Company's Market Risk Committee, which establishes policies for market risk management, including exposure limits for each portfolio. The Company also has derivative contracts that are created through its operations, including commitments to originate MLHFS and swap agreements related to the sale of a portion of its Class B common shares of Visa Inc. Refer to Note 14 for further information on these swap agreements.

For additional information on the Company's purpose for entering into derivative transactions and its overall risk management strategies, refer to Management Discussion and Analysis Use of Derivatives to Manage Interest Rate and Other Risks which is incorporated by reference into these Notes to Consolidated Financial Statements.

(a) Gains (Losses) on items hedged by interest rate contracts included in noninterest income (expense), were \$40 million and \$(8) million for the three months ended June 30, 2015 and 2014, respectively, and \$7 million and \$(6) million for the six months ended June 30, 2015 and 2014, respectively. The ineffective portion was immaterial for the three and six months ended June 30, 2015 and 2014.

Derivatives are subject to credit risk associated with counterparties to the derivative contracts. The Company measures that credit risk using a credit valuation adjustment and includes it within the fair value of the derivative. The Company manages counterparty credit risk through diversification of its derivative positions among various counterparties, by entering into master netting arrangements and, where possible, by requiring collateral arrangements. A master netting arrangement allows two counterparties, who have multiple derivative contracts with each other, the ability to net settle amounts under all contracts, including any related collateral, through a single payment and in a single currency. Collateral arrangements require the counterparty to deliver collateral (typically cash or U.S. Treasury and agency securities) equal to the Company's net derivative receivable, subject to minimum transfer and credit rating requirements.

The Company's collateral arrangements are predominately bilateral and, therefore, contain provisions that require collateralization of the Company's net liability derivative positions. Required collateral coverage is based on certain net liability thresholds and contingent upon the Company's credit rating from two of the nationally recognized statistical rating organizations. If the Company's credit rating were to fall below credit ratings thresholds established in the collateral arrangements, the counterparties to the derivatives could request immediate additional collateral coverage up to and including full collateral coverage for derivatives in a net liability position. The aggregate fair value of all derivatives under collateral arrangements that were in a net liability position at June 30, 2015, was \$915 million. At June 30, 2015, the Company had \$759 million of cash posted as collateral against this net liability position.

Note 13 Netting Arrangements for Certain Financial Instruments and Securities Financing Activities

The majority of the Company's derivative portfolio consists of bilateral over-the-counter trades. However, current regulations require that certain interest rate swaps and forwards and credit contracts need to be centrally cleared through clearinghouses. In addition, a portion of the Company's derivative positions are exchange-traded. These are predominately U.S. Treasury futures or options on U.S. Treasury futures. Of the Company's \$178.9 billion total notional amount of derivative positions at June 30, 2015, \$50.6 billion related to those centrally cleared through clearinghouses and \$3.5 billion related to those that were exchange-traded. Irrespective of how derivatives are traded, the Company's derivative contracts include offsetting rights (referred to as netting arrangements), and depending on expected volume, credit risk, and counterparty preference, collateral maintenance may be required. For all derivatives under collateral support arrangements, fair value is determined daily and, depending on the collateral maintenance

Table of Contents

requirements, the Company and a counterparty may receive or deliver collateral, based upon the net fair value of all derivative positions between the Company and the counterparty. Collateral is typically cash, but securities may be allowed under collateral arrangements with certain counterparties. Receivables and payables related to cash collateral are included in other assets and other liabilities on the Consolidated Balance Sheet, along with the related derivative asset and liability fair values. Any securities pledged to counterparties as collateral remain on the Consolidated Balance Sheet. Securities received from counterparties as collateral are not recognized on the Consolidated Balance Sheet, unless the counterparty defaults. In general, securities used as collateral can be sold, repledged or otherwise used by the party in possession. No restrictions exist on the use of cash collateral by either party. Refer to Note 12 for further discussion of the Company's derivatives, including collateral arrangements.

As part of the Company's treasury and broker-dealer operations, the Company executes transactions that are treated as securities sold under agreements to repurchase or securities purchased under agreements to resell, both of which are accounted for as collateralized financings. Securities sold under agreements to repurchase include repurchase agreements and securities loaned transactions. Securities purchased under agreements to resell include reverse repurchase agreements and securities borrowed transactions. For securities sold under agreements to repurchase, the Company records a liability for the cash received, which is included in short-term borrowings on the Consolidated Balance Sheet. For securities purchased under agreements to resell, the Company records a receivable for the cash paid, which is included in other assets on the Consolidated Balance Sheet.

Securities transferred to counterparties under repurchase agreements and securities loaned transactions continue to be recognized on the Consolidated Balance Sheet, are measured at fair value, and are included in investment securities or other assets. Securities received from counterparties under reverse repurchase agreements and securities borrowed transactions are not recognized on the Consolidated Balance Sheet unless the counterparty defaults. The securities transferred under repurchase and reverse repurchase transactions typically are U.S. Treasury and agency securities or residential agency mortgage-backed securities. The securities loaned or borrowed typically are corporate debt securities traded by the Company's broker-dealer. In general, the securities transferred can be sold, repledged or otherwise used by the party in possession. No restrictions exist on the use of cash collateral by either party. Repurchase/reverse repurchase and securities loaned/borrowed transactions expose the Company to counterparty risk. The Company manages this risk by performing assessments, independent of business line managers, and establishing concentration limits on each counterparty. Additionally, these transactions include collateral arrangements that require the fair values of the underlying securities to be determined daily, resulting in cash being obtained or refunded to counterparties to maintain specified collateral levels.

The following table summarizes the maturities by category of collateral pledged for repurchase agreements and securities loaned transactions at June 30, 2015:

(Dollars in Millions)	Overnight and Continuous	Less Than 30 Days	Total
Repurchase Agreements			
U.S. Treasury and agencies	\$ 26	\$ 14	\$ 40
Residential agency mortgage-backed securities	497	438	935
Total repurchase agreements	523	452	975
Securities Loaned			
Corporate debt securities	190		190
Total securities loaned	190		190
	\$ 713	\$ 452	\$ 1,165

Gross amount of recognized liabilities for repurchase agreements and securities loaned

The Company executes its derivative, repurchase/reverse repurchase and securities loaned/borrowed transactions under the respective industry standard agreements. These agreements include master netting arrangements that allow for multiple contracts executed with the same counterparty to be viewed as a single arrangement. This allows for net settlement of a single amount on a daily basis. In the event of default, the master netting arrangement provides for close-out netting, which allows all of these positions with the defaulting counterparty to be terminated and net settled with a single payment amount.

U.S. Bancorp

63

Table of Contents

The Company has elected to offset the assets and liabilities under netting arrangements for the balance sheet presentation of the majority of its derivative counterparties, excluding centrally cleared derivative contracts due to current uncertainty about the legal enforceability of netting arrangements with the clearinghouses. The netting occurs at the counterparty level, and includes all assets and liabilities related to the derivative contracts, including those associated with cash collateral received or delivered. The Company has not elected to offset the assets and liabilities under netting arrangements for the balance sheet presentation of repurchase/reverse repurchase and securities loaned/borrowed transactions.

The following tables provide information on the Company's netting adjustments, and items not offset on the Consolidated Balance Sheet but available for offset in the event of default:

(Dollars in Millions)	Gross Amounts Offset on the		Net Gross Amounts Not Offset on the		Net Amount	
	Gross Recognized Assets	Consolidated Balance Sheet (a)	Amounts Presented on the Consolidated Balance Sheet	Financial Instruments (b)	Collateral Received (c)	
June 30, 2015						
Derivative assets (d)	\$ 2,010	\$ (916)	\$ 1,094	\$ (88)	\$	\$ 1,006
Reverse repurchase agreements	178		178	(26)	(152)	
Securities borrowed	789		789	(43)	(722)	24
Total	\$ 2,977	\$ (916)	\$ 2,061	\$ (157)	\$ (874)	\$ 1,030
December 31, 2014						
Derivative assets (d)	\$ 1,847	\$ (870)	\$ 977	\$ (58)	\$	\$ 919
Reverse repurchase agreements	40		40	(40)		
Securities borrowed	638		638		(620)	18
Total	\$ 2,525	\$ (870)	\$ 1,655	\$ (98)	\$ (620)	\$ 937

(a) Includes \$220 million and \$258 million of cash collateral related payables that were netted against derivative assets at June 30, 2015 and December 31, 2014, respectively.

(b) For derivative assets this includes any derivative liability fair values that could be offset in the event of counterparty default; for reverse repurchase agreements this includes any repurchase agreement payables that could be offset in the event of counterparty default; for securities borrowed this includes any securities loaned payables that could be offset in the event of counterparty default.

(c) Includes the fair value of securities received by the Company from the counterparty. These securities are not included on the Consolidated Balance Sheet unless the counterparty defaults.

(d) Excludes \$289 million and \$221 million of derivative assets centrally cleared or otherwise not subject to netting arrangements at June 30, 2015 and December 31, 2014, respectively.

Gross	Gross Amounts Offset on	Net Gross Amounts	Gross Amounts Not Offset on the Consolidated Balance Sheet	Net Amount
-------	-------------------------	-------------------	--	------------

(Dollars in Millions)	Recognized Liabilities	thPresented on the Consolidated Balance Sheet (a)	Consolidated Balance Sheet	Financial Instruments (b)	Sheet Collateral Pledged (c)	
June 30, 2015

Repurchase agreements	975		975	(26)	(949)	
Securities loaned	190		190	(43)	(145)	2
Total	\$ 3,127	\$ (1,366)	\$ 1,761	\$ (157)	\$ (1,094)	\$ 510
December 31, 2014						
Derivative liabilities (d)	\$ 1,847	\$ (1,317)	\$ 530	\$ (58)	\$	\$ 472
Repurchase agreements	948		948	(40)	(908)	
Securities loaned	47		47		(46)	1
Total	\$ 2,842	\$ (1,317)	\$ 1,525	\$ (98)	\$ (954)	\$ 473

(a) Includes \$670 million and \$705 million of cash collateral related receivables that were netted against derivative liabilities at June 30, 2015 and December 31, 2014, respectively.

(b) For derivative liabilities this includes any derivative asset fair values that could be offset in the event of counterparty default; for repurchase agreements this includes any reverse repurchase agreement receivables that could be offset in the event of counterparty default; for securities loaned this includes any securities borrowed receivables that could be offset in the event of counterparty default.

(c) Includes the fair value of securities pledged by the Company to the counterparty. These securities are included on the Consolidated Balance Sheet unless the Company defaults.

(d) Excludes \$368 million and \$342 million of derivative liabilities centrally cleared or otherwise not subject to netting arrangements at June 30, 2015 and December 31, 2014, respectively.

Note 14 Fair Values of Assets and Liabilities

The Company uses fair value measurements for the initial recording of certain assets and liabilities, periodic remeasurement of certain assets and liabilities, and disclosures. Derivatives, trading and available-for-sale investment securities, MSRs and substantially all MLHFS are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as loans held for sale, loans held for investment and certain other assets. These nonrecurring fair value adjustments typically involve application of lower-of-cost-or-fair value accounting or impairment write-downs of individual assets.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market

Table of Contents

participants on the measurement date. A fair value measurement reflects all of the assumptions that market participants would use in pricing the asset or liability, including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset and the risk of nonperformance.

The Company groups its assets and liabilities measured at fair value into a three-level hierarchy for valuation techniques used to measure financial assets and financial liabilities at fair value. This hierarchy is based on whether the valuation inputs are observable or unobservable. These levels are:

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 includes U.S. Treasury securities, as well as exchange-traded instruments, including certain perpetual preferred and corporate debt securities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 includes debt securities that are traded less frequently than exchange-traded instruments and which are typically valued using third party pricing services; derivative contracts and other assets and liabilities, including securities, whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data; and MLHFS whose values are determined using quoted prices for similar assets or pricing models with inputs that are observable in the market or can be corroborated by observable market data.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

This category includes MSRs, certain debt securities and certain derivative contracts.

When the Company changes its valuation inputs for measuring financial assets and financial liabilities at fair value, either due to changes in current market conditions or other factors, it may need to transfer those assets or liabilities to another level in the hierarchy based on the new inputs used. The Company recognizes these transfers at the end of the reporting period in which the transfers occur. During the six months ended June 30, 2015 and 2014, there were no transfers of financial assets or financial liabilities between the hierarchy levels.

The Company has processes and controls in place to increase the reliability of estimates it makes in determining fair value measurements. Items quoted on an exchange are verified to the quoted price. Items provided by a third party pricing service are subject to price verification procedures as described in more detail in the specific valuation discussions below. For fair value measurements modeled internally, the Company's valuation models are subject to the Company's Model Risk Governance Policy and Program, as maintained by the Company's risk management department. The purpose of model validation is to assess the accuracy of the models' input, processing, and reporting components. All models are required to be independently reviewed and approved prior to being placed in use, and are subject to formal change control procedures. Under the Company's Model Risk Governance Policy, models are required to be reviewed at least annually to ensure they are operating as intended. Inputs into the models are market observable inputs whenever available. When market observable inputs are not available, the inputs are developed based upon analysis of historical experience and evaluation of other relevant market data. Significant unobservable model inputs are subject to review by senior management in corporate functions, who are independent from the modeling. Significant unobservable model inputs are also compared to actual results, typically on a quarterly basis. Significant Level 3 fair value measurements are also subject to corporate-level review and are benchmarked to market transactions or other market data, when available. Additional discussion of processes and controls are provided in the valuation methodologies section that follows.

The following section describes the valuation methodologies used by the Company to measure financial assets and liabilities at fair value and for estimating fair value for financial instruments not recorded at fair value as required under disclosure guidance related to the fair value of financial instruments. In addition, the following section includes an indication of the level of the fair value hierarchy in which the assets or liabilities are classified. Where appropriate, the description includes information about the valuation models and key inputs to those models. During the six months ended June 30, 2015 and 2014, there were no significant changes to the valuation techniques used by the Company to measure fair value.

U.S. Bancorp

65

Table of Contents

Cash and Due From Banks The carrying value of cash and due from banks approximate fair value and are classified within Level 1. Fair value is provided for disclosure purposes only.

Federal Funds Sold and Securities Purchased Under Resale Agreements The carrying value of federal funds sold and securities purchased under resale agreements approximate fair value because of the relatively short time between the origination of the instrument and its expected realization and are classified within Level 2. Fair value is provided for disclosure purposes only.

Investment Securities When quoted market prices for identical securities are available in an active market, these prices are used to determine fair value and these securities are classified within Level 1 of the fair value hierarchy. Level 1 investment securities include U.S. Treasury and exchange-traded securities.

For other securities, quoted market prices may not be readily available for the specific securities. When possible, the Company determines fair value based on market observable information, including quoted market prices for similar securities, inactive transaction prices, and broker quotes. These securities are classified within Level 2 of the fair value hierarchy. Level 2 valuations are generally provided by a third party pricing service. The Company reviews the valuation methodologies utilized by the pricing service and, on a quarterly basis, reviews the security level prices provided by the pricing service against management's expectation of fair value, based on changes in various benchmarks and market knowledge from recent trading activity. Additionally, each quarter, the Company validates the fair value provided by the pricing service by comparing them to recent observable market trades (where available), broker provided quotes, or other independent secondary pricing sources. Prices obtained from the pricing service are adjusted if they are found to be inconsistent with observable market data. Level 2 investment securities are predominantly agency mortgage-backed securities, certain other asset-backed securities, municipal securities, corporate debt securities, agency debt securities and certain perpetual preferred securities.

The fair value of securities for which there are no market trades, or where trading is inactive as compared to normal market activity, are classified within Level 3 of the fair value hierarchy. The Company determines the fair value of these securities by using a discounted cash flow methodology and incorporating observable market information, where available. These valuations are modeled by a unit within the Company's treasury department. The valuations use assumptions regarding housing prices, interest rates and borrower performance. Inputs are refined and updated at least quarterly to reflect market developments and actual performance. The primary valuation drivers of these securities are the prepayment rates, default rates and default severities associated with the underlying collateral, as well as the discount rate used to calculate the present value of the projected cash flows. Level 3 fair values, including the assumptions used, are subject to review by senior management in corporate functions, who are independent from the modeling. The fair value measurements are also compared to fair values provided by third party pricing services, where available. Securities classified within Level 3 include non-agency mortgage-backed securities, non-agency commercial mortgage-backed securities, certain asset-backed securities, certain collateralized debt obligations and collateralized loan obligations and certain corporate debt securities.

Mortgage Loans Held For Sale MLHFS measured at fair value, for which an active secondary market and readily available market prices exist, are initially valued at the transaction price and are subsequently valued by comparison to instruments with similar collateral and risk profiles. MLHFS are classified within Level 2. Included in mortgage banking revenue was a \$83 million net loss and \$46 million net gain for the three months ended June 30, 2015 and 2014, respectively, and a \$34 million net loss and \$98 million net gain for the six months ended June 30, 2015 and 2014, respectively, from the changes to fair value of these MLHFS under fair value option accounting guidance. Changes in fair value due to instrument specific credit risk were immaterial. Interest income for MLHFS is measured based on contractual interest rates and reported as interest income on the Consolidated Statement of Income. Electing to measure MLHFS at fair value reduces certain timing differences and better matches changes in fair value of these

assets with changes in the value of the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting.

Loans The loan portfolio and those loans classified as held for sale that are carried at lower-of-cost-or-fair value, include adjustable and fixed-rate loans, the fair value of which is estimated using discounted cash flow analyses and other valuation techniques. The expected cash flows of loans consider historical prepayment experiences and estimated credit losses and are discounted using current rates offered to borrowers with similar credit characteristics. Generally, loan fair values reflect Level 3 information. Fair value is provided for disclosure purposes only, with the exception of impaired collateral-based loans that are measured at fair value on a non-recurring basis utilizing the underlying collateral fair value.

Table of Contents

Mortgage Servicing Rights MSR are valued using a discounted cash flow methodology, and are classified within Level 3. The Company determines fair value by estimating the present value of the asset's future cash flows using prepayment rates, discount rates, and other assumptions. The MSR valuations, as well as the assumptions used, are developed by the mortgage banking division and are subject to review by senior management in corporate functions, who are independent from the modeling. The MSR valuations and assumptions are validated through comparison to trade information, publicly available data and industry surveys when available, and are also compared to independent third party valuations each quarter. Risks inherent in MSR valuation include higher than expected prepayment rates and/or delayed receipt of cash flows. There is minimal observable market activity for MSRs on comparable portfolios, and, therefore the determination of fair value requires significant management judgment. Refer to Note 6 for further information on MSR valuation assumptions.

Derivatives The majority of derivatives held by the Company are executed over-the-counter and are valued using standard cash flow, Black-Derman-Toy and Monte Carlo valuation techniques. The models incorporate inputs, depending on the type of derivative, including interest rate curves, foreign exchange rates and volatility. In addition, all derivative values incorporate an assessment of the risk of counterparty nonperformance, measured based on the Company's evaluation of credit risk as well as external assessments of credit risk, where available. The Company monitors and manages its nonperformance risk by considering its ability to net derivative positions under master netting arrangements, as well as collateral received or provided under collateral arrangements. Accordingly, the Company has elected to measure the fair value of derivatives, at a counterparty level, on a net basis. The majority of the derivatives are classified within Level 2 of the fair value hierarchy, as the significant inputs to the models, including nonperformance risk, are observable. However, certain derivative transactions are with counterparties where risk of nonperformance cannot be observed in the market, and therefore the credit valuation adjustments result in these derivatives being classified within Level 3 of the fair value hierarchy. The credit valuation adjustments for nonperformance risk are determined by the Company's treasury department using credit assumptions provided by the risk management department. The credit assumptions are compared to actual results quarterly and are recalibrated as appropriate.

The Company also has other derivative contracts that are created through its operations, including commitments to purchase and originate mortgage loans and swap agreements executed in conjunction with the sale of a portion of its Class B common shares of Visa Inc. (the Visa swaps). The mortgage loan commitments are valued by pricing models that include market observable and unobservable inputs, which result in the commitments being classified within Level 3 of the fair value hierarchy. The unobservable inputs include assumptions about the percentage of commitments that actually become a closed loan and the MSR value that is inherent in the underlying loan value, both of which are developed by the Company's mortgage banking division. The closed loan percentages for the mortgage loan commitments are monitored on an on-going basis, as these percentages are also used for the Company's economic hedging activities. The inherent MSR value for the commitments are generated by the same models used for the Company's MSRs and thus are subject to the same processes and controls as described for the MSRs above. The Visa swaps require payments by either the Company or the purchaser of the Visa Inc. Class B common shares when there are changes in the conversion rate of the Visa Inc. Class B common shares to Visa Inc. Class A common shares, as well as quarterly payments to the purchaser based on specified terms of the agreements. Management reviews and updates the Visa swaps fair value in conjunction with its review of Visa related litigation contingencies, and the associated escrow funding. The fair value of the Visa swaps are calculated by the Company's corporate development department using a discounted cash flow methodology which includes unobservable inputs about the timing and settlement amounts related to the resolution of certain Visa related litigation. The expected litigation resolution impacts the Visa Inc. Class B common share to Visa Inc. Class A common share conversion rate, as well as the ultimate termination date for the Visa swaps. Accordingly, the Visa swaps are classified within Level 3. Refer to Note 15 for further information on the Visa restructuring and related card association litigation.

Other Financial Instruments Other financial instruments include cost method equity investments and certain community development and tax-advantaged related assets and liabilities. The majority of the Company's cost method equity investments are in Federal Home Loan Bank and Federal Reserve Bank stock, for which the carrying amounts approximate fair value and are classified within Level 2. Investments in other equity and limited partnership funds are estimated using fund provided net asset values. These equity investments are classified within Level 3. The community development and tax-advantaged related asset balances primarily represent the underlying assets of consolidated community development and tax-advantaged entities. The community development and tax-advantaged related

Table of Contents

liabilities represent the underlying liabilities of the consolidated entities (included in long-term debt) and liabilities related to other third party interests (included in other liabilities). The carrying value of the community development and tax-advantaged related asset and other liability balances are a reasonable estimate of fair value and are classified within Level 3. Refer to Note 5 for further information on community development and tax-advantaged related assets and liabilities. Fair value is provided for disclosure purposes only.

Deposit Liabilities The fair value of demand deposits, savings accounts and certain money market deposits is equal to the amount payable on demand. The fair value of fixed-rate certificates of deposit was estimated by discounting the contractual cash flow using current market rates. Deposit liabilities are classified within Level 2. Fair value is provided for disclosure purposes only.

Short-term Borrowings Federal funds purchased, securities sold under agreements to repurchase, commercial paper and other short-term funds borrowed have floating rates or short-term maturities. The fair value of short-term borrowings was determined by discounting contractual cash flows using current market rates. Short-term borrowings are classified within Level 2. Included in short-term borrowings is the Company's obligation on securities sold short, which is required to be accounted for at fair value per applicable accounting guidance. Fair value for other short-term borrowings is provided for disclosure purposes only.

Long-term Debt The fair value for most long-term debt was determined by discounting contractual cash flows using current market rates. Junior subordinated debt instruments were valued using market quotes. Long-term debt is classified within Level 2. Fair value is provided for disclosure purposes only.

Loan Commitments, Letters of Credit and Guarantees The fair value of commitments, letters of credit and guarantees represents the estimated costs to terminate or otherwise settle the obligations with a third party. Other loan commitments, letters of credit and guarantees are not actively traded, and the Company estimates their fair value based on the related amount of unamortized deferred commitment fees adjusted for the probable losses for these arrangements. These arrangements are classified within Level 3. Fair value is provided for disclosure purposes only.

Significant Unobservable Inputs of Level 3 Assets and Liabilities

The following section provides information on the significant inputs used by the Company to determine the fair value measurements of Level 3 assets and liabilities recorded at fair value on the Consolidated Balance Sheet. In addition, the following section includes a discussion of the sensitivity of the fair value measurements to changes in the significant inputs and a description of any interrelationships between these inputs for Level 3 assets and liabilities recorded at fair value on a recurring basis. The discussion below excludes nonrecurring fair value measurements of collateral value used for impairment measures for loans and other real estate owned. These valuations utilize third party appraisal or broker price opinions, and are classified as Level 3 due to the significant judgment involved.

Available-For-Sale Investment Securities The significant unobservable inputs used in the fair value measurement of the Company's modeled Level 3 available-for-sale investment securities are prepayment rates, probability of default and loss severities associated with the underlying collateral, as well as the discount margin used to calculate the present value of the projected cash flows. Increases in prepayment rates for Level 3 securities will typically result in higher fair values, as increased prepayment rates accelerate the receipt of expected cash flows and reduce exposure to credit losses. Increases in the probability of default and loss severities will result in lower fair values, as these increases reduce expected cash flows. Discount margin is the Company's estimate of the current market spread above the respective benchmark rate. Higher discount margin will result in lower fair values, as it reduces the present value of the expected cash flows.

Prepayment rates generally move in the opposite direction of market interest rates. In the current environment, an increase in the probability of default will generally be accompanied with an increase in loss severity, as both are impacted by underlying collateral values. Discount margins are influenced by market expectations about the security's collateral performance, and therefore may directionally move with probability and severity of default; however, discount margins are also impacted by broader market forces, such as competing investment yields, sector liquidity, economic news, and other macroeconomic factors.

Table of Contents

The following table shows the significant valuation assumption ranges for Level 3 available-for-sale investment securities at June 30, 2015:

	Minimum	Maximum	Average
Residential Prime Non-Agency Mortgage-Backed Securities (a)			
Estimated lifetime prepayment rates	7%	22%	14%
Lifetime probability of default rates		7	4
Lifetime loss severity rates	15	60	33
Discount margin	2	5	3
Residential Non-Prime Non-Agency Mortgage-Backed Securities (b)			
Estimated lifetime prepayment rates	3%	10%	7%
Lifetime probability of default rates	4	12	7
Lifetime loss severity rates	20	70	52
Discount margin	1	5	2
Other Asset-Backed Securities			
Estimated lifetime prepayment rates	6%	6%	6%
Lifetime probability of default rates	5	5	5
Lifetime loss severity rates	40	40	40
Discount margin	6	6	6

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).

(b) Includes all securities not meeting the conditions to be designated as prime.

Mortgage Servicing Rights The significant unobservable inputs used in the fair value measurement of the Company's MSR are expected prepayments and the discount rate used to calculate the present value of the projected cash flows. Significant increases in either of these inputs in isolation would result in a significantly lower fair value measurement. Significant decreases in either of these inputs in isolation would result in a significantly higher fair value measurement. There is no direct interrelationship between prepayments and discount rate. Prepayment rates generally move in the opposite direction of market interest rates. Discount rates are generally impacted by changes in market return requirements.

The following table shows the significant valuation assumption ranges for MSRs at June 30, 2015:

	Minimum	Maximum	Average
Expected prepayment	10%	20%	11%
Discount rate	9	13	10

Derivatives The Company has two distinct Level 3 derivative portfolios: (i) the Company's commitments to purchase and originate mortgage loans that meet the requirements of a derivative and (ii) the Company's asset/liability and customer-related derivatives that are Level 3 due to unobservable inputs related to measurement of risk of nonperformance by the counterparty. In addition, the Company's Visa swaps are classified within Level 3.

The significant unobservable inputs used in the fair value measurement of the Company's derivative commitments to purchase and originate mortgage loans are the percentage of commitments that actually become a closed loan and the MSR value that is inherent in the underlying loan value. A significant increase in the rate of loans that close would result in a larger derivative asset or liability. A significant increase in the inherent MSR value would result in an increase in the derivative asset or a reduction in the derivative liability. Expected loan close rates and the inherent MSR values are directly impacted by changes in market rates and will generally move in the same direction as interest rates.

The following table shows the significant valuation assumption ranges for the Company's derivative commitments to purchase and originate mortgage loans at June 30, 2015:

	Minimum	Maximum	Average
Expected loan close rate	19%	100%	78%
Inherent MSR value (basis points per loan)	47	217	131

The significant unobservable input used in the fair value measurement of certain of the Company's asset/liability and customer-related derivatives is the credit valuation adjustment related to the risk of counterparty nonperformance. A significant increase in the credit valuation adjustment would result in a lower fair value measurement. A significant decrease in the credit valuation adjustment would result in a higher fair value measurement. The credit valuation adjustment is impacted by changes in the Company's assessment of the counterparty's credit position. At June 30, 2015, the minimum, maximum and average credit valuation adjustment as a percentage of the derivative contract fair value prior to adjustment was 0 percent, 97 percent and 5 percent, respectively.

Table of Contents

The significant unobservable inputs used in the fair value measurement of the Visa swaps are management's estimate of the probability of certain litigation scenarios, and the timing of the resolution of the related litigation loss estimates in excess, or shortfall, of the Company's proportional share of escrow funds. An increase in the loss estimate or a delay in the resolution of the related litigation would result in an increase in the derivative liability. A decrease in the loss estimate or an acceleration of the resolution of the related litigation would result in a decrease in the derivative liability.

The following table summarizes the balances of assets and liabilities measured at fair value on a recurring basis:

(Dollars in Millions)	Level 1	Level 2	Level 3	Netting	Total
June 30, 2015

Mortgage servicing rights	2,680	(284) (d)		2	(141)	155 (g)	2,412	(284) (d)
Net derivative assets and liabilities	445	473 (j)		1		(361)	558	161 (k)

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).

(b) Includes all securities not meeting the conditions to be designated as prime.

(c) Included in interest income.

(d) Included in mortgage banking revenue.

(e) Approximately \$86 million included in other noninterest income and \$213 million included in mortgage banking revenue.

(f) Included in changes in unrealized gains and losses on securities available-for-sale.

(g) Represents MSRs capitalized during the period.

(h) Approximately \$(60) million included in other noninterest income and \$54 million included in mortgage banking revenue.

(i) Included in securities gains (losses).

(j) Approximately \$208 million included in other noninterest income and \$265 million included in mortgage banking revenue.

(k) Approximately \$85 million included in other noninterest income and \$76 million included in mortgage banking revenue.

The Company is also required periodically to measure certain other financial assets at fair value on a nonrecurring basis. These measurements of fair value usually result from the application of lower-of-cost-or-fair value accounting or write-downs of individual assets.

The following table summarizes the balances of assets measured at fair value on a nonrecurring basis:

(Dollars in Millions)	June 30, 2015				December 31, 2014			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Loans (a)	\$	\$	\$ 32	\$ 32	\$	\$	\$ 77	\$ 77
Other assets (b)			63	63			90	90

(a) Represents the carrying value of loans for which adjustments were based on the fair value of the collateral, excluding loans fully charged-off.

(b) Primarily represents the fair value of foreclosed properties that were measured at fair value based on an appraisal or broker price opinion of the collateral subsequent to their initial acquisition.

The following table summarizes losses recognized related to nonrecurring fair value measurements of individual assets or portfolios:

Three Months Ended June 30,	Six Months Ended June 30,
--------------------------------	------------------------------

(Dollars in Millions)	2015	2014	2015	2014
Loans (a)	\$ 15	\$ 31	\$ 40	\$ 47
Other assets (b)	10	15	19	34

(a) Represents write-downs of loans which were based on the fair value of the collateral, excluding loans fully charged-off.

(b) Primarily represents related losses of foreclosed properties that were measured at fair value subsequent to their initial acquisition.

Table of Contents**Fair Value Option**

The following table summarizes the differences between the aggregate fair value carrying amount of MLHFS for which the fair value option has been elected and the aggregate unpaid principal amount that the Company is contractually obligated to receive at maturity:

(Dollars in Millions)	June 30, 2015			December 31, 2014		
	Fair Value Carrying Amount	Aggregate Unpaid Principal	Carrying Amount Over (Under) Unpaid Principal	Fair Value Carrying Amount	Aggregate Unpaid Principal	Carrying Amount Over (Under) Unpaid Principal
Total loans	\$ 5,538	\$ 5,421	\$ 117	\$ 4,774	\$ 4,582	\$ 192
Nonaccrual loans	4	7	(3)	6	9	(3)
Loans 90 days or more past due	1	1		1	1	

Disclosures About Fair Value of Financial Instruments

The following table summarizes the estimated fair value for financial instruments as of June 30, 2015 and December 31, 2014, and includes financial instruments that are not accounted for at fair value. In accordance with disclosure guidance related to fair values of financial instruments, the Company did not include assets and liabilities that are not financial instruments, such as the value of goodwill, long-term relationships with deposit, credit card, merchant processing and trust customers, other purchased intangibles, premises and equipment, deferred taxes and other liabilities. Additionally, in accordance with the disclosure guidance, insurance contracts and investments accounted for under the equity method are excluded.

The estimated fair values of the Company's financial instruments are shown in the table below:

		June 30, 2015					December 31, 2014			
		Fair Value					Fair Value			
(Dollars in Millions)	Carrying Amount	Level 1	Level 2	Level 3	Total	Carrying Amount	Level 1	Level 2	Level 3	Total
Financial Assets										
Cash and due from banks	\$ 17,925	\$ 17,925	\$	\$	\$ 17,925	\$ 10,654	\$ 10,654	\$	\$	\$ 10,654
Federal funds sold and securities purchased under resale agreements	232		232		232	118		118		118
Investment securities held-to-maturity	46,233	2,180	44,100	84	46,364	44,974	1,928	43,124	88	45,140
	2,960			2,964	2,964	18			18	18

Loans held for sale (a)							
Loans (b)	244,594		247,060	247,060	243,735		245,424
Other financial instruments	2,298	921	1,384	2,305	2,187	924	1,269
Financial Liabilities							
Deposits	296,848	296,806		296,806	282,733	282,708	282,708
Short-term borrowings (c)	26,801	26,566		26,566	29,184	28,973	28,973
Long-term debt	34,141	34,471		34,471	32,260	32,659	32,659
Other liabilities	1,321		1,321	1,321	1,231		1,231

(a) Excludes mortgages held for sale for which the fair value option under applicable accounting guidance was elected.

(b) Excludes loans measured at fair value on a nonrecurring basis.

(c) Excludes the Company's obligation on securities sold short required to be accounted for at fair value per applicable accounting guidance.

The fair value of unfunded commitments, deferred non-yield related loans fees, standby letters of credit and other guarantees is approximately equal to their carrying value. The carrying value of unfunded commitments, deferred non-yield related loan fees and standby letters of credit was \$380 million and \$413 million at June 30, 2015 and December 31, 2014, respectively. The carrying value of other guarantees was \$213 million and \$211 million at June 30, 2015 and December 31, 2014, respectively.

Note 15 Guarantees and Contingent Liabilities

Visa Restructuring and Card Association Litigation The Company's payment services business issues and acquires credit and debit card transactions through the Visa U.S.A. Inc. card association or its affiliates (collectively "Visa"). In 2007, Visa completed a restructuring and issued shares of Visa Inc. common stock to its financial institution members in contemplation of its initial public offering ("IPO") completed in the first quarter of 2008 (the "Visa Reorganization"). As a part of the Visa Reorganization, the Company received its proportionate number of shares of Visa Inc. common stock, which were subsequently converted to Class B shares of Visa Inc. ("Class B shares"). Visa U.S.A. Inc. ("Visa U.S.A.") and MasterCard International (collectively, the "Card Associations") are defendants in antitrust lawsuits challenging the practices of the Card Associations (the "Visa Litigation"). Visa U.S.A. member banks have a contingent

Table of Contents

obligation to indemnify Visa Inc. under the Visa U.S.A. bylaws (which were modified at the time of the restructuring in October 2007) for potential losses arising from the Visa Litigation. The indemnification by the Visa U.S.A. member banks has no specific maximum amount.

Using proceeds from its IPO and through reductions to the conversion ratio applicable to the Class B shares held by Visa U.S.A. member banks, Visa Inc. has funded an escrow account for the benefit of member financial institutions to fund their indemnification obligations associated with the Visa Litigation. The receivable related to the escrow account is classified in other liabilities as a direct offset to the related Visa Litigation contingent liability. On October 19, 2012, Visa signed a settlement agreement to resolve class action claims associated with the multi-district interchange litigation, the largest of the remaining Visa Litigation matters. The settlement has been approved by the court, but has been challenged by some class members and is being appealed. In addition, a number of class members opted out of the settlement and have filed actions against the Card Associations. At June 30, 2015, the carrying amount of the Company's liability related to the Visa Litigation matters, net of its share of the escrow fundings, was \$19 million. During the three and six months ended June 30, 2015, the Company sold 0.4 million and 0.8 million, respectively, of its Class B shares. These sales, and any previous sales of its Class B shares, do not impact the Company's liability for the Visa Litigation matters or the receivable related to the escrow account. The remaining 8.1 million Class B shares held by the Company will be eligible for conversion to Class A shares of Visa Inc., and thereby become marketable, upon final settlement of the Visa Litigation. These shares are excluded from the Company's financial instruments disclosures included in Note 14.

Other Guarantees and Contingent Liabilities

The following table is a summary of other guarantees and contingent liabilities of the Company at June 30, 2015:

(Dollars in Millions)	Collateral Held	Carrying Amount	Maximum Potential Future Payments
Standby letters of credit	\$	\$ 50	\$ 13,506
Third party borrowing arrangements			16
Securities lending indemnifications	4,203		4,088
Asset sales		134	4,661 (a)
Merchant processing	599	73	99,313
Contingent consideration arrangements		2	2
Tender option bond program guarantee	2,289		2,185
Minimum revenue guarantees		4	14
Other			821

(a) The maximum potential future payments do not include loan sales where the Company provides standard representation and warranties to the buyer against losses related to loan underwriting documentation defects that may have existed at the time of sale that generally are identified after the occurrence of a triggering event such as delinquency. For these types of loan sales, the maximum potential future payments is generally the unpaid principal balance of loans sold measured at the end of the current reporting period. Actual losses will be significantly less than the maximum exposure, as only a fraction of loans sold will have a representation and warranty breach, and any losses on repurchase would generally be mitigated by any collateral held against the

loans.

Merchant Processing The Company, through its subsidiaries, provides merchant processing services. Under the rules of credit card associations, a merchant processor retains a contingent liability for credit card transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder's favor. In this situation, the transaction is charged-back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If the Company is unable to collect this amount from the merchant, it bears the loss for the amount of the refund paid to the cardholder.

The Company currently processes card transactions in the United States, Canada, Europe, Mexico and Brazil through wholly-owned subsidiaries and joint ventures with other financial institutions. In the event a merchant was unable to fulfill product or services subject to delayed delivery, such as airline tickets, the Company could become financially liable for refunding tickets purchased through the credit card associations under the charge-back provisions. Charge-back risk related to these merchants is evaluated in a manner similar to credit risk assessments and, as such, merchant processing contracts contain various provisions to protect the Company in the event of default. At June 30, 2015, the value of airline tickets purchased to be delivered at a future date was \$9.7 billion. The Company held collateral of \$481 million in escrow deposits, letters of credit and indemnities from financial institutions, and liens on various assets.

Asset Sales The Company regularly sells loans to GSEs as part of its mortgage banking activities. The Company provides customary representations and warranties to the GSEs in conjunction with these sales. These representations and warranties generally require the Company to repurchase assets if it is subsequently determined that a loan did not

Table of Contents

meet specified criteria, such as a documentation deficiency or rescission of mortgage insurance. If the Company is unable to cure or refute a repurchase request, the Company is generally obligated to repurchase the loan or otherwise reimburse the counterparty for losses. At June 30, 2015, the Company had reserved \$40 million for potential losses from representation and warranty obligations, compared with \$46 million at December 31, 2014. The Company's reserve reflects management's best estimate of losses for representation and warranty obligations. The Company's repurchase reserve is modeled at the loan level, taking into consideration the individual credit quality and borrower activity that has transpired since origination. The model applies credit quality and economic risk factors to derive a probability of default and potential repurchase that are based on the Company's historical loss experience, and estimates loss severity based on expected collateral value. The Company also considers qualitative factors that may result in anticipated losses differing from historical loss trends.

The following table is a rollforward of the Company's representation and warranty reserve:

(Dollars in Millions)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Balance at beginning of period	\$ 46	\$ 75	\$ 46	\$ 83
Net realized losses	(2)	(2)	(4)	(12)
Change in reserve	(4)	(4)	(2)	(2)
Balance at end of period	\$ 40	\$ 69	\$ 40	\$ 69

As of June 30, 2015 and December 31, 2014, the Company had \$21 million and \$19 million, respectively, of unresolved representation and warranty claims from the GSEs. The Company does not have a significant amount of unresolved claims from investors other than the GSEs.

Litigation and Regulatory Matters The Company is subject to various litigation and regulatory matters that arise in the ordinary course of its business. The Company establishes reserves for such matters when potential losses become probable and can be reasonably estimated. The Company believes the ultimate resolution of existing legal and regulatory matters will not have a material adverse effect on the financial condition, results of operations or cash flows of the Company. However, changes in circumstances or additional information could result in additional accruals or resolution in excess of established accruals, which could adversely affect the Company's results from operations, potentially materially.

Litigation Matters In the last several years, the Company and other large financial institutions have been sued in their capacity as trustee for residential mortgage backed securities trusts. Among these lawsuits are actions originally brought in June 2014 by a group of institutional investors, including BlackRock and PIMCO funds, against six bank trustees, including the Company. These actions are currently pending in the Supreme Court of the State of New York, New York County, and in the United States District Court for the Southern District of New York. In these lawsuits, the investors allege that U.S. Bank National Association as trustee caused them to incur losses by failing to enforce loan repurchase obligations and failing to abide by appropriate standards of care after events of default allegedly occurred. The plaintiffs seek monetary damages in an unspecified amount and also seek equitable relief.

Regulatory Matters The Company is currently subject to investigations and examinations by government agencies and bank regulators concerning mortgage-related practices, including those related to compliance with selling guidelines relating to residential home loans sold to GSEs, foreclosure-related expenses submitted to the Federal Housing Administration or GSEs for reimbursement, lender-placed insurance, and notices and filings in bankruptcy cases, as well as investigations and examinations by government agencies and bank regulators with respect to

anti-money laundering programs and their adequacy and effectiveness. The Company is also regularly subject to examinations and inquiries in areas of increasing regulatory scrutiny, such as compliance, risk management, third party risk management, consumer protection and Office of Foreign Assets Control requirements. The Company is cooperating fully with these examinations, inquiries and investigations, any of which could lead to administrative or legal proceedings or settlements. Remedies in these proceedings or settlements may include fines, penalties, restitution or alterations in the Company's business practices (which may increase the Company's operating expenses and decrease its revenue).

Certain federal and state governmental authorities reached settlement agreements in 2012 and 2013 with other major financial institutions regarding their mortgage origination, servicing, and foreclosure activities. Those governmental authorities have had settlement discussions with other financial institutions, including the Company. The Company has not agreed to any settlement; however, if a settlement were reached it would likely include an agreement

U.S. Bancorp

75

Table of Contents

to comply with specified servicing standards, and settlement payments to governmental authorities as well as a monetary commitment that could be satisfied under various loan modification programs (in addition to the programs the Company already has in place).

In April 2011, the Company and certain other large financial institutions entered into Consent Orders with the Office of the Comptroller of the Currency (the OCC) and the Board of Governors of the Federal Reserve System relating to residential mortgage servicing and foreclosure practices. On June 16, 2015, the Company entered into an agreement to amend the 2011 Consent Order it has with the OCC. Under the amended Consent Order, the Company is required to complete an action plan to resolve outstanding issues under the 2011 Consent Order and obtain approval from the OCC before taking certain actions related to residential mortgage servicing. Depending on the Company's execution of the requirements of the action plan and the Company's progress toward addressing the requirements of the 2011 Consent Order, the Company may be released or be required to enter into further orders and settlements, pay additional fines or penalties, make restitution or further modify the Company's business practices (which may increase the Company's operating expenses and decrease its revenue).

Outlook Due to their complex nature, it can be years before litigation and regulatory matters are resolved. For those litigation and regulatory matters where the Company has information to develop an estimate or range of loss, the Company believes the upper end of reasonably possible losses in aggregate, in excess of any reserves established for matters where a loss is considered probable, will not be material to its financial condition, results of operations or cash flows. The Company's estimates are subject to significant judgment and uncertainties, and the matters underlying the estimates will change from time to time. Actual results may vary significantly from the current estimates.

For additional information on the nature of the Company's guarantees and contingent liabilities, refer to Note 23 in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Note 16 Subsequent Events

The Company has evaluated the impact of events that have occurred subsequent to June 30, 2015 through the date the consolidated financial statements were filed with the United States Securities and Exchange Commission. Based on this evaluation, the Company has determined none of these events were required to be recognized or disclosed in the consolidated financial statements and related notes.

EXHIBIT 31.1

CERTIFICATION PURSUANT TO RULE 13a-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934

I, Richard K. Davis, certify that:

- (1) I have reviewed this Quarterly Report on Form 10-Q of U.S. Bancorp;
- (2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- (4) The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

- (5) The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
- (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Privacy

U.S. Bancorp is committed to respecting the privacy of our customers and safeguarding the financial and personal information provided to us. To learn more about the U.S. Bancorp commitment to protecting privacy, visit usbank.com and click on *Privacy*.

Code of Ethics

At U.S. Bancorp, our commitment to high ethical standards guides everything we do. Demonstrating this commitment through our words and actions is how each of us does the right thing every day for our customers, shareholders, communities and each other. Our style of ethical leadership is part of the reason why we were named a World's Most Ethical Company® in 2015 by the Ethisphere Institute.

Each year, every employee certifies compliance with the letter and spirit of our Code of Ethics and Business Conduct. For details about our Code of Ethics and Business Conduct, visit usbank.com and click on *About U.S. Bank* and then *Investor Relations*.

Diversity and Inclusion

At U.S. Bancorp, embracing diversity and fostering inclusion are business imperatives. We view everything we do through a diversity and inclusion lens to deepen our relationships with our stakeholders, employees, customers, shareholders and communities.

We respect and value each other's differences, strengths and perspectives, and we strive to reflect the communities we serve. This makes us stronger, more innovative and more responsive to our diverse customers' needs.

Equal Opportunity and Affirmative Action

U.S. Bancorp and our subsidiaries are committed to providing Equal Employment Opportunity to all employees and applicants for employment. In keeping with this commitment, employment decisions are made based on abilities, not race, color, religion, national origin or ancestry, gender, age, disability, veteran status, sexual orientation, marital status, gender identity or expression, genetic information or any other factors protected by law. The corporation complies with municipal, state and federal fair employment laws, including regulations applying to federal contractors.

U.S. Bancorp, including each of our subsidiaries, is an Equal Opportunity Employer committed to creating a diverse workforce.

Accessibility

U.S. Bancorp is committed to providing ready access to our products and services so all of our customers, including people with disabilities, can succeed financially. To learn more, visit usbank.com and click on *Accessibility*.
