3. LIMRA Secure Retirement Institute, Not-for-Profit Market Survey, first-quarter 2016 results. Based on a survey of 28 companies; TIAA assets by market segment estimated; segment breakdown based on 16 companies. Market share ranking does not reflect current investment performance.
4. LIMRA3Q4Q 2015 Stable Value and Funding Agreement Product Survey. Based on a survey of 16 insurance companies and 4 banks reporting \$633.3 billion in stable value amounts associated with both qualified plan arrangements and nonqualified arrangements. 5. Guarantees are subject to TIAA's claims-paying ability.
6. Please note: an individual's income replacement ratio will vary from the study's estimated rate based on a number of unique individual factors. Study results are not intended to project an individual's actual ratio. TIAA Retirement Income Index data as of 12/31/2014, based on 501,639 actively contributing participants from 303 TIAA recordkept plans. Using the participant's current salary, age, contribution rates (employer/employee), asset allocation, and an assumed retirement age of 67, TIAA leverages the advice engine from Ibbotson Associates, Inc., an independent expert retained by TIAA, to calculate the projected retirement income stream (including estimated Social Security benefits) in current dollars as a percentage of current salaries using Monte Carlo analysis (500 total simulations). The results indicate the participant's 70% probability of achieving the retirement goal. A lower probability of success is associated with better (and less likely) estimated income; a higher probability is associated with lower estimated income. Please note the median income replacement ratio based on the analysis above is approximately 88%.

The Ibbotson tool's advice is based on statistical projections of the likelihood that an individual will achieve their retirement goals. The projections rely on financial and economic assumptions of historical rates of return of various asset classes that may not reoccur in the future, volatility measures and other facts, as well as information the individual provides.

IMPORTANT: Projections, and other information generated through the Retirement Income Index and the Ibbotson tool regarding the likelihood of various investment outcomes, are hypothetical, do not reflect actual investment results, and are not a guarantee of future results. Results may vary with each use and over time.

For a fund or account with multiple share classes and the same pricing, the share class with the longest performance history is used. Please note Morningstar rates CREF group variable annuities within the open-end mutual fund universe. Morningstar ratings may be higher or lower on a monthly basis. Morningstar is an independent service that rates mutual funds. The top 10% of funds or accounts in an investment category receive five stars, the next 22.5% receive four stars and the next 35% receive three stars. Morningstar proprietary ratings reflect historical risk-adjusted performance and can change every month. They are calculated from the fund or account's three-, five- and ten-year average annual returns in excess of 90-day Treasury bill returns with appropriate fee adjustments, and a risk factor that reflects fund or account performance below 90-day T-bill returns. The overall star ratings are Morningstar's published ratings, which are weighted averages of its three-, five- and ten-year ratings for periods ended June 30, 2016. Past performance cannot guarantee future results. For current performance and rankings, please visit tiaa.org/public/investment-performance/.
