#### MOODY S CORPORATION

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(tabular dollar and share amounts in millions, except per share data)

#### NOTE 1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Moody s is a provider of (i) credit ratings, (ii) credit, capital markets and economic research, data and analytical tools, (iii) software solutions and related risk management services, (iv) quantitative credit risk measures, financial services training and certification services and (v) outsourced research and analytical services. Moody s has two reportable segments: MIS and MA.

MIS, the credit rating agency, publishes credit ratings on a wide range of debt obligations and the entities that issue such obligations in markets worldwide. Revenue is primarily derived from the originators and issuers of such transactions who use MIS ratings in the distribution of their debt issues to investors. Additionally, MIS earns revenue from certain non-ratings-related operations, which consist primarily of the distribution of research and fixed income pricing services in the Asia-Pacific region and from ICRA non-ratings services. The revenue from these operations is included in the MIS Other LOB and is not material to the results of the MIS segment.

The MA segment develops a wide range of products and services that support financial analysis and risk management activities of institutional participants in global financial markets. Within its Research, Data and Analytics business, MA distributes research and data developed by MIS as part of its ratings process, including in-depth research on major debt issuers, industry studies and commentary on topical credit-related events. The RD&A business also produces economic research as well as data and analytical tools such as quantitative credit risk scores. Within its Enterprise Risk Solutions business, MA provides software solutions as well as related risk management services. The Professional Services business provides outsourced research and analytical services along with financial training and certification programs.

These interim financial statements have been prepared in accordance with the instructions to Form 10-Q and should be read in conjunction with the Company s consolidated financial statements and related notes in the Company s 2015 annual report on Form 10-K filed with the SEC on February 25, 2016. The results of interim periods are not necessarily indicative of results for the full year or any subsequent period. In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for a fair presentation of financial position, results of operations and cash flows at the dates and for the periods presented have been included. The year-end consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

Certain reclassifications have been made to prior period amounts to conform to the current presentation.

In the first quarter of 2016, the Company adopted ASU No. 2015-17 Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes on a prospective basis, and accordingly, prior year comparative periods have not been adjusted. This ASU requires the classification of all deferred income tax assets and liabilities as noncurrent on the balance sheet.

In the first quarter of 2016, the Company adopted ASU No. 2015-03, Simplifying the Presentation of Debt Issuance Costs on a retrospective basis. This ASU requires a company to present debt issuance costs in the balance sheet as a reduction of debt rather than as an asset. The impact to the Company s balance sheet as of December 31, 2015 and September 30, 2016 relating to the adoption of this ASU is set forth in the table below:

											Septen	nber 30, 2016
												Under
	As	reported			Decem	ber 31, 2015	As	reported			p	revious
	Decen	iber 31, 2015	Recla	ssification	As	adjusted	Septen	nber 30, 2016	Reclas	sification	accoun	ting guidance
Long-term debt	\$	3,401.0	\$	(20.4)	\$	3,380.6	\$	3,118.2	\$	18.5	\$	3,136.7
Other assets	\$	160.8	\$	(20.4)	\$	140.4	\$	154.6	\$	18.6	\$	173.2
Current portion of long-term debt							\$	299.9	\$	0.1	\$	300.0

#### NOTE 2. STOCK-BASED COMPENSATION

Presented below is a summary of the stock-based compensation cost and associated tax benefit included in the accompanying consolidated statements of operations:

	Three Mon Septem		Nine Months Ende September 30,		
	2016	2015	2016	2015	
Stock-based compensation cost	\$ 23.9	\$ 22.1	\$ 72.8	\$ 66.5	
Tax benefit	\$ 7.8	\$ 7.2	\$ 23.7	\$ 21.8	

During the first nine months of 2016, the Company granted 0.5 million employee stock options, which had a weighted average grant date fair value of \$22.98 per share based on the Black-Scholes option-pricing model. The Company also granted 1.2 million shares of restricted stock in the first nine months of 2016, which had a weighted average grant date fair value of \$80.90 per share. Both the employee stock options and restricted stock generally vest ratably over a four-year period. Additionally, the Company granted approximately 0.2 million shares of performance-based awards whereby the number of shares that ultimately vest are based on the achievement of certain non-market based performance metrics of the Company over a three-year period. The weighted average grant date fair value of these awards was \$76.66 per share.

The following weighted average assumptions were used in determining the fair value for options granted in 2016:

Expected dividend yield	1.83%
Expected stock volatility	32.3%
Risk-free interest rate	1.60%
Expected holding period	6.8 years
Grant date fair value	\$ 22.98

Unrecognized compensation expense at September 30, 2016 was \$10.4 million and \$129.6 million for stock options and unvested restricted stock, respectively, which is expected to be recognized over a weighted average period of 1.3 years and 1.7 years, respectively. Additionally, there was \$14.6 million of unrecognized compensation expense relating to the aforementioned non-market based performance-based awards, which is expected to be recognized over a weighted average period of 1.0 years.

13

The following tables summarize information relating to stock option exercises and restricted stock vesting:

	Nine Months Ended September 30,		
Exercise of stock options:	2016	2015	
Proceeds from stock option exercises	\$ 67.7	\$ 68.0	
Aggregate intrinsic value	\$ 67.8	\$ 64.7	
Tax benefit realized upon exercise	\$ 23.1	\$ 23.0	
Number of shares exercised	1.4	1.3	
	Septen	nths Ended nber 30,	
Vesting of restricted stock:	2016	2015	
Fair value of shares vested	\$ 92.8	\$ 111.3	
Tax benefit realized upon vesting	\$ 29.5	\$ 35.7	
Number of shares vested	1.0	1.1	
	Septen	nths Ended nber 30,	
Vesting of performance-based restricted stock:	2016	2015	
Fair value of shares vested	\$ 23.6	\$ 43.1	
Tax benefit realized upon vesting	\$ 8.4	\$ 15.6	
Number of shares vested	0.2	0.5	

#### NOTE 3. INCOME TAXES

Moody s effective tax rate was 30.5% and 32.0% for the three months ended September 30, 2016 and 2015, respectively and 31.5% and 31.7% for the nine month periods ended September 30, 2016 and 2015, respectively. The decrease in the ETR compared to the third quarter of 2015 was primarily due to lower taxes on non-US income.

The Company classifies interest related to UTBs in interest income (expense), net in its consolidated statements of operations. Penalties, if incurred, would be recognized in other non-operating income (expense), net. The Company had an increase in its UTBs of \$2.9 million (\$2.1 million net of federal tax) during the third quarter of 2016 and an overall decrease in its UTBs during the first nine months of 2016 of \$2.3 million (increase of \$0.6 million net of federal tax). Moody s Corporation and subsidiaries are subject to U.S. federal income tax as well as income tax in various state, local and foreign jurisdictions.

The Company s U.S. federal income tax returns for the years 2011 and 2012 are under examination and its returns for 2013 through 2015 remain open to examination. The Company s New York State tax returns for 2011 through 2014 are currently under examination and the Company s New York City tax return for 2014 remains open to examination. The Company s U.K. tax return for 2012 is currently under examination and its returns for 2013 and 2014 remain open to examination.

For ongoing audits, it is possible the balance of UTBs could decrease in the next twelve months as a result of the settlement of these audits, which might involve the payment of additional taxes, the adjustment of certain deferred taxes and/or the recognition of tax benefits. It is also possible that new issues might be raised by tax authorities which could necessitate increases to the balance of UTBs. As the Company is unable to predict the timing or outcome of these audits, it is therefore unable to estimate the amount of changes to the balance of UTBs at this time. However, the Company believes that it has adequately provided for its financial exposure relating to all open tax years by tax jurisdiction in accordance with the applicable provisions of Topic 740 of the ASC regarding UTBs.

The following table shows the amount the Company paid for income taxes:

		nths Ended nber 30,
	2016	2015
Income taxes paid	\$ 242.8	\$ 299.9

#### NOTE 4. WEIGHTED AVERAGE SHARES OUTSTANDING

Below is a reconciliation of basic to diluted shares outstanding:

	Three Mont Septemb		Nine Months Endo September 30,		
	2016	2015	2016	2015	
Basic	191.7	199.4	193.3	201.1	
Dilutive effect of shares issuable under stock-based compensation plans	2.6	3.1	2.7	3.4	
Diluted	194.3	202.5	196.0	204.5	
Anti-dilutive options to purchase common shares and restricted stock as well as contingently issuable restricted stock which are excluded from the table above	0.5	0.6	0.9	0.8	

The calculation of diluted EPS requires certain assumptions regarding the use of both cash proceeds and assumed proceeds that would be received upon the exercise of stock options and vesting of restricted stock outstanding as of September 30, 2016 and 2015. These assumed proceeds include Excess Tax Benefits and any unrecognized compensation of the awards.

The decrease in the diluted shares outstanding primarily reflects treasury share repurchases under the Company s Board authorized share repurchase program.

#### NOTE 5. CASH EQUIVALENTS AND INVESTMENTS

The table below provides additional information on the Company s cash equivalents and investments:

	As of September 30, 2016										
			Gre	oss				Bala	nce s	heet locati	ion
			Unrea	alized		Fair	Cash	and casl	h Sho	ort-term	Other
		Cost	Ga	ins	,	Value	equ	ivalents	inve	estments	assets
Money market mutual funds	\$	38.9	\$		\$	38.9	\$	38.9	\$		\$
Certificates of deposit and money market deposit accounts (1)	\$	798.0	\$		\$	798.0	\$	458.1	\$	311.8	\$ 28.1
Fixed maturity and open ended mutual funds (2)	\$	27.9	\$	5.0	\$	32.9	\$		\$		\$ 32.9

	As of December 31, 2013							
				Bala	nce sheet locati	ion		
				Cash				
		Gross		and				
		Unrealized	Fair	cash	Short-term	Other		
	Cost	Gains	Value	equivalents	investments	assets		
Money market mutual funds	\$ 188.3	\$	\$ 188.3	\$ 188.3	\$	\$		
Certificates of deposit and money market deposit accounts (1)	\$ 1,307.3	\$	\$ 1,307.3	\$ 809.4	\$ 474.8	\$ 23.1		
Fixed maturity and open ended mutual funds (2)	\$ 28.7	\$ 32	\$ 31.9	\$	\$	\$ 31.9		

As of Docombor 31 2015

- Consists of time deposits and money market deposit accounts. The remaining contractual maturities for the certificates of deposits classified as short-term investments were one month to 12 months at both September 30, 2016 and December 31, 2015. The remaining contractual maturities for the certificates of deposits classified in other assets are one month to 18 months at September 30, 2016 and one month to 27 months at December 31, 2015. Time deposits with a maturity of less than 90 days at time of purchase are classified as cash and cash equivalents.
- (2) Consists of investments in fixed maturity mutual funds and open-ended mutual funds. The remaining contractual maturities for the fixed maturity instruments range from two months to 22 months and 11 months to 31 months at September 30, 2016 and December 31, 2015 respectively.

The money market mutual funds as well as the fixed maturity and open ended mutual funds in the table above are deemed to be available for sale under ASC Topic 320 and the fair value of these instruments is determined using Level 1 inputs as defined in the ASC.

#### NOTE 6. ACQUISITIONS

The GGY business combination described below is accounted for using the acquisition method of accounting whereby assets acquired and liabilities assumed were recognized at fair value on the date of the transaction. Any excess of the purchase price over the fair value of the assets acquired and liabilities assumed was recorded to goodwill. The Company has not presented proforma combined results because the impact on previously reported statements of operations would not have been material. Additionally, the near term impact to the Company s operations and cash flows is not material.

#### **Korea Investor Service (KIS)**

In July 2016, a subsidiary of the Company acquired the non-controlling interest of KIS and additional shares of KIS Pricing. The aggregate purchase price was not material and the near term impact to operations and cash flow is not expected to be material. KIS and KIS Pricing are a part of the MIS segment.

#### Gilliland Gold Young (GGY)

On March 1, 2016, subsidiaries of the Company acquired 100% of GGY, a leading provider of advanced actuarial software for the life insurance industry. The cash payments noted in the table below were funded with cash on hand. The acquisition of GGY will allow MA to provide an industry-leading enterprise risk offering for global life insurers and reinsurers.

The table below details the total consideration relating to the acquisition:

Cash paid at closing	\$ 83.4
Additional consideration paid to sellers in the third quarter 2016 <sup>(1)</sup>	3.1
Total consideration	\$ 86.5

Shown below is the purchase price allocation, which summarizes the fair value of the assets and liabilities assumed, at the date of acquisition:

Current assets		¢ 117
		\$ 11.7
Property and equipment, net		2.0
Indemnification assets		1.5
Intangible assets:		
Trade name (19 year weighted average life)	\$ 3.7	
Client relationships (21 year weighted average life)	13.8	
Software (7 year weighted average life)	16.6	
Total intangible assets (14 year weighted average life)		34.1
Goodwill		59.4
Liabilities		(22.2)
Net assets acquired		\$ 86.5

Current assets in the table above include acquired cash of \$7.5 million. Additionally, current assets include accounts receivable of \$2.9 million. Goodwill, which has been assigned to the MA segment, is not deductible for tax.

In connection with the acquisition, the Company assumed liabilities relating to UTPs and certain other tax exposures which are included in the liabilities assumed in the table above. The sellers have contractually indemnified the Company against any potential payments that may have to be made regarding these amounts. Accordingly, the Company carries an indemnification asset on its consolidated balance sheet at September 30, 2016.

The Company incurred \$0.9 million of costs directly related to the GGY acquisition of which \$0.6 million was incurred in 2015 and \$0.3 million was incurred in the first quarter of 2016. These costs are recorded within selling, general and administrative expenses in the Company s consolidated statements of operations.

<sup>(1)</sup> Represents additional consideration paid to the sellers for amounts withheld at closing pending the completion of certain administrative matters

GGY is part of the ERS reporting unit for purposes of the Company s annual goodwill impairment assessment.

17

#### NOTE 7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to global market risks, including risks from changes in FX rates and changes in interest rates. Accordingly, the Company uses derivatives in certain instances to manage the aforementioned financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for speculative purposes.

#### Derivatives and non-derivative instruments designated as accounting hedges:

#### Interest Rate Swaps

In the second quarter of 2014, the Company entered into interest rate swaps with a total notional amount of \$250 million to convert the fixed interest rate on the 2010 Senior Notes to a floating interest rate based on the 3-month LIBOR. In the third quarter of 2014, the Company entered into interest rate swaps with a total notional amount of \$250 million to convert the fixed interest rate on the remaining balance of the 2010 Senior Notes to a floating interest rate based on the 3-month LIBOR. The purpose of these hedges is to mitigate the risk associated with changes in the fair value of the 2010 Senior Notes, thus the Company has designated these swaps as fair value hedges. The fair value of the swaps is adjusted quarterly with a corresponding adjustment to the carrying value of the 2010 Senior Notes. The changes in the fair value of the hedges and the underlying hedged item generally offset and the net cash settlements on the swaps are recorded each period within interest income (expense), net, in the Company s consolidated statement of operations.

In the third quarter of 2014, the Company entered into interest rate swaps with a total notional amount of \$250 million to convert the fixed interest rate on a portion of the 2014 Senior Notes (5-year) to a floating interest rate based on the 3-month LIBOR. In the first quarter of 2015, the Company entered into interest rate swaps with a total notional amount of \$200 million to convert the fixed interest rate on the remaining balance of the 2014 Senior Notes (5-year) to a floating interest rate based on the 3-month LIBOR. The purpose of these hedges is to mitigate the risk associated with changes in the fair value of the 2014 Senior Notes (5-year), thus the Company has designated these swaps as fair value hedges. The fair value of the swaps is adjusted quarterly with a corresponding adjustment to the carrying value of the 2014 Senior Notes (5-year). The changes in the fair value of the hedges and the underlying hedged item generally offset and the net cash settlements on the swaps are recorded each period within interest income (expense), net, in the Company s consolidated statement of operations.

The following table summarizes the impact to the statement of operations of the Company s interest rate swaps designated as fair value hedges:

		Amount of income recognized in the			
		consolidated statements of operations			
		Three Months Ended Nine Months End			ths Ended
		September 30, September 30			nber 30,
Derivatives designated as fair value accounting hedges	<b>Location on Statement of Operations</b>	2016	2015	2016	2015
Interest rate swaps	Interest income (expense), net	\$ 2.7	\$ 3.9	\$ 8.8	\$ 11.5

#### Cross-currency swaps

In conjunction with the issuance of the 2015 Senior Notes, the Company entered into a cross-currency swap to exchange 100 million for U.S. dollars on the date of the settlement of the notes. The purpose of this cross-currency swap is to mitigate FX risk on the remaining principal balance on the 2015 Senior Notes that was not designated as a net investment hedge as more fully discussed below. Under the terms of the swap, the Company will pay the counterparty interest on the \$110.5 million received at 3.945% per annum and the counterparty will pay the Company interest on the 100 million paid at 1.75% per annum. These interest payments will be settled in March of each year, beginning in 2016, until either the maturity of the cross-currency swap in 2027 or upon early termination at the discretion of the Company. The principal payments on this cross currency swap will be settled in 2027, concurrent with the repayment of the 2015 Senior Notes at maturity or upon early termination at the discretion of the Company. In March 2016, the Company designated these cross-currency swaps as cash flow hedges. Accordingly, changes in fair value subsequent to the date the swaps were designated as cash flow hedges will initially be recognized in OCI. Gains and losses on the swaps initially recognized in OCI will be reclassified to the statement of operations in the period in which changes in the underlying hedged item affects net income. Ineffectiveness, if any, will be recognized in other non-operating (expense) income, net in the Company s consolidated statement of operations.

#### Net investment hedges

The Company enters into foreign currency forward contracts which are designated as net investment hedges and has designated 400 million of the 2015 Senior Notes as a net investment hedge. These hedges are intended to mitigate FX exposure related to non-U.S. dollar net investments in certain foreign subsidiaries against changes in foreign exchange rates. These net investment hedges are designated as accounting hedges under the applicable sections of Topic 815 of the ASC.

Hedge effectiveness is assessed based on the overall changes in the fair value of the hedge. For hedges that meet the effectiveness requirements, changes in the fair value are recorded in AOCI in the foreign currency translation account. Any change in the fair value of these hedges that is the result of ineffectiveness is recognized immediately in other non-operating (expense) income, net in the Company s consolidated statement of operations.

The following table summarizes the notional amounts of the Company s outstanding net investment hedges:

	September 30, 2016	December 31, 2015
Notional amount of net investment hedges:		
Long-term debt designated as net investment hedge	400.0	400.0
Contracts to sell GBP for euros	£ 22.1	£ 21.2
Contracts to sell Japanese yen for USD	¥ 19,400	¥ 19,400

The outstanding contracts to sell Japanese yen for USD expire in November 2016. The outstanding contracts to sell GBP for euros expire in December 2016. The hedge relating to the portion of the 2015 Senior Notes that was designated as a net investment hedge will end upon the repayment of the notes in 2027 unless terminated earlier at the discretion of the Company.

The following table provides information on the gains/(losses) on the Company s net investment and cash flow hedges:

#### **Derivatives not designated as accounting hedges:**

#### Foreign exchange forwards

The Company also enters into foreign exchange forwards to mitigate the change in fair value on certain assets and liabilities denominated in currencies other than a subsidiary s functional currency. These forward contracts are not designated as accounting hedges under the applicable sections of Topic 815 of the ASC. Accordingly, changes in the fair value of these contracts are recognized immediately in other non-operating (expense) income, net in the Company s consolidated statements of operations along with the FX gain or loss recognized on the assets and liabilities denominated in a currency other than the subsidiary s functional currency. These contracts have expiration dates at various times through December 2016.

The following table summarizes the notional amounts of the Company s outstanding foreign exchange forwards:

	September 30, 2016		mber 31, 2015
Notional amount of currency pair:			
Contracts to purchase USD with euros	\$	263.1	\$
Contracts to sell USD for euros	\$	298.6	\$ 70.1
Contracts to purchase euros with other foreign currencies		36.3	35.5
Contracts to sell euros for other foreign currencies			1.4
Contracts to sell euros for GBP		22.7	23.1

The following table summarizes the impact to the consolidated statements of operations relating to the net gain (loss) on the Company s derivatives which are not designated as hedging instruments:

		Three Months Ended Nine Months Ende

(53.5)

976.3

(18.0)

\$ 284.4

The accumulated impairment charge in the table above reflects an impairment charge recognized in 2012 relating to the FSTC reporting unit within MA. This impairment charge reflected a contraction in spending for training and certification services for many individuals and global financial institutions in 2012 due to macroeconomic uncertainties at the time. The fair value of the FSTC reporting unit utilized in this impairment assessment was estimated using a discounted cash flow methodology and comparable public company and precedent transaction multiples.

Acquired intangible assets and related amortization consisted of:

	September 30, 2016		December 31, 2015	
Customer relationships	\$	313.9	\$	298.4
Accumulated amortization		(121.9)		(110.0)
Net customer relationships		192.0		188.4
Trade secrets		30.0		29.7
Accumulated amortization		(25.0)		(23.1)
Net trade secrets		5.0		6.6

Accumulated amortization		(25.0)		(23.4)
Net other		18.5		20.9
Total acquired intangible assets, net	\$	307.8	\$	299.1

Other intangible assets primarily consist of databases, covenants not to compete, and acquired ratings methodologies and models.

Amortization expense relating to acquired intangible assets is as follows:

		Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015	
Amortization expense	\$ 8.9	<b>\$</b> 7.6	\$ 25.5	\$ 24.1	

Estimated future amortization expense for acquired intangible assets subject to amortization is as follows:

Year Ending December 31,	
2016 (after September 30)	\$ <b>8.7</b>

Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

2017	31.9
2018	26.2
2019	23.1
2020	21.4
Thereafter	196.5
Total estimated future amortization	\$ 307.8

#### **NOTE 9. RESTRUCTURING**

In September 2016, the Company approved a restructuring plan relating to cost management initiatives in the MIS segment as well as in certain corporate overhead functions. This restructuring plan consists solely of headcount reductions, which when combined with an immaterial restructuring in the first half of 2016, represented approximately 1% of the Company s workforce. The entire charge for these actions will result in cash outlays that will be paid out over the next twelve months. The cumulative amount of expense incurred from inception through September 30, 2016 for these actions was \$12.0 million. Actions under these plans were substantially complete at September 30, 2016.

Total expenses included in the accompanying consolidated statements of operations are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
2016	2015	2016	2015	
\$ 8.4	\$	<b>\$</b> 12.0	\$	

Changes to the restructuring liability during the first nine months of 2016 were as follows:

	Emplo Terminatio Severa:	n Costs
Balance at January 1, 2016	\$	
Cost incurred and adjustments		12.0
Cash payments		(2.4)
Balance at September 30, 2016	\$	9.6

As of September 30, 2016, the remaining restructuring liability of \$9.6 million relating to severance is expected to be paid out during the years ending December 31, 2016 and 2017. This liability is recorded within accounts payable and accrued liabilities in the Company s consolidated balance sheet at September 30, 2016.

#### NOTE 10. FAIR VALUE

The ASC establishes a fair value hierarchy whereby the inputs contained in valuation techniques used to measure fair value are categorized into three broad levels as follows:

Level 1: quoted market prices in active markets that the reporting entity has the ability to access at the date of the fair value measurement;

<u>Level 2</u>: inputs other than quoted market prices described in Level 1 that are observable for the asset or liability, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

<u>Level 3</u>: unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurement of the assets or liabilities.

The table below presents information about items that are carried at fair value at September 30, 2016 and December 31, 2015:

Fair Value Measurement as of September 30, 2016

	Description	Balance	Level 1	Level 2
Assets:				
	Derivatives (a)	\$ 31.9	\$	\$ 31.9
	Money market mutual funds	38.9	38.9	
	Fixed maturity and open ended mutual funds (b)	32.9	32.9	
	Total	\$ 103.7	\$ 71.8	\$ 31.9
Liabilities:				
	Derivatives <sup>(a)</sup>	\$ 30.6	\$	\$ 30.6
	Total	\$ 30.6	\$	\$ 30.6

Fair Value Measurement as of December 31, 2015

	Description	Balance	Level 1	Level 2
Assets:				
	Derivatives (a)	<b>\$ 12.6</b>	\$	\$ 12.6
	Money market mutual funds	188.3	188.3	
	Fixed maturity and open ended mutual funds (b)	31.9	31.9	
	Total	\$ 232.8	\$ 220.2	<b>\$ 12.6</b>
Liabilities:				
	Derivatives (a)	\$ 10.4	\$	\$ 10.4
	Total	\$ 10.4	\$	\$ 10.4

<sup>(</sup>a) Represents FX forwards, interest rate swaps and cross-currency swaps as more fully described in Note 7 to the financial statements.

The following are descriptions of the methodologies utilized by the Company to estimate the fair value of its derivative contracts, fixed maturity plans, open ended mutual funds and money market mutual funds:

#### **Derivatives:**

In determining the fair value of the derivative contracts, the Company utilizes industry standard valuation models. Where applicable, these models project future cash flows and discount the future amounts to a present value using spot rates, forward points, currency volatilities, interest rates as well as the risk of non-performance of the Company and the counterparties with whom it has derivative contracts. The Company established strict counterparty credit guidelines and only enters into transactions with financial institutions that adhere to these guidelines. Accordingly, the risk of counterparty default is deemed to be minimal.

#### Fixed maturity and open ended mutual funds:

<sup>(</sup>b) Consists of investments in fixed maturity mutual funds and open-ended mutual funds.

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

The fixed maturity mutual funds and open ended mutual funds primarily represent exchange traded funds in India and are classified as securities available-for-sale. Accordingly, any unrealized gains and losses are recognized through OCI until the instruments mature or are sold.

26

### Money market mutual funds:

The money market mutual funds represent publicly traded funds with a stable \$1 net asset value.

Table of Contents

#### NOTE 13. PENSION AND OTHER RETIREMENT BENEFITS

Moody s maintains funded and unfunded noncontributory Defined Benefit Pension Plans. The U.S. plans provide defined benefits using a cash balance formula based on years of service and career average salary for its employees or final average pay for selected executives. The Company also provides certain healthcare and life insurance benefits for retired U.S. employees. The retirement healthcare plans are contributory; the life insurance plans are noncontributory. Moody s funded and unfunded U.S. pension plans, the U.S. retirement healthcare plans and the U.S. retirement life insurance plans are collectively referred to herein as the Retirement Plans . The U.S. retirement healthcare plans and the U.S. retirement plans are collectively referred to herein as the Other Retirement Plans .

Effective January 1, 2008, the Company no longer offers DBPPs to U.S. employees hired or rehired on or after January 1, 2008. New U.S. employees will instead receive a retirement contribution of similar benefit value under the Company s Profit Participation Plan. Current participants of the Company s DBPPs continue to accrue benefits based on existing plan formulas.

The components of net periodic benefit expense related to the Retirement Plans are as follows:

	Three Months Ended September 30,					
	Pension	Plans	Other Retirem	ent Plans		
	2016	2015	2016	2015		
Components of net periodic expense						
Service cost	\$ 5.0	\$ 5.5	\$ 0.6	\$ 0.5		
Interest cost	4.5	4.2	0.3	0.2		
Expected return on plan assets	(4.3)	(3.6)				
Amortization of net actuarial loss from earlier periods	2.5	3.1	0.1	0.1		
Amortization of net prior service costs from earlier periods	0.1	0.1	(0.1)			
Net periodic expense	<b>\$ 7.8</b>	\$ 9.3	\$ 0.9	\$ 0.8		

	Nine Months Ended September 30,						
	Pension	Other Retires	rement Plans				
	2016	2015	2016	2015			
Components of net periodic expense							
Service cost	\$ 15.1	\$ 16.3	<b>\$ 1.7</b>	\$ 1.6			
Interest cost	13.6	12.7	0.8	0.7			
Expected return on plan assets	(12.8)	(10.8)					
Amortization of net actuarial loss from earlier periods	7.4	9.3	0.1	0.3			
Amortization of net prior service costs from earlier periods	0.1	0.5	(0.2)				
Net periodic expense	\$ 23.4	\$ 28.0	\$ 2.4	\$ 2.6			

The Company made a contribution of \$22.4 million to its funded pension plan as well as payments of \$2.3 million related to its unfunded U.S. DBPPs and \$0.4 million to its U.S. other retirement plans during the nine months ended September 30, 2016. The Company anticipates making payments of \$2.8 million related to its unfunded U.S. DBPPs and \$0.4 million to its U.S. other retirement plans, respectively, during the remainder of 2016.

<sup>(1)</sup> The Company has entered into interest rate swaps on the 2010 Senior Notes and the 2014 Senior Notes (5-Year) which are more fully discussed in Note 7 above.

32

<sup>(2)</sup> Pursuant to ASU No. 2015-03, unamortized debt issuance costs are presented as a reduction to the carrying value of the notes payable. See Note 1 for additional discussion.

On August 3, 2016, the Company entered into a private placement commercial paper program under which the Company may issue CP notes up to a maximum amount of \$1.0 billion. Borrowings under the CP Program are backstopped by the 2015 Facility. Amounts under the CP Program may be re-borrowed. The maturity of the CP Notes will vary, but may not exceed 397 days from the date of issue. The CP Notes are sold at a discount from par, or alternatively, sold at par and bear interest at rates that will vary based upon market conditions. The rates of interest will depend on whether the CP Notes will be a fixed or floating rate. The interest on a floating rate may be based on the following: (a) certificate of deposit rate; (b) commercial paper rate; (c) the federal funds rate; (d) the LIBOR; (e) prime rate; (f) Treasury rate; or (g) such other base rate as may be specified in a supplement to the private placement agreement. The CP Program contains certain events of default including, among other things: non-payment of principal, interest or fees; entrance into any form of moratorium; and bankruptcy and insolvency events, subject in certain instances to cure periods. The Company has not borrowed under this program through September 30, 2016.

At September 30, 2016, the Company was in compliance with all covenants contained within all of the debt agreements. The 2015 Facility, the 2015 Senior Notes, the 2014 Senior Notes (5-year), the 2014 Senior Notes (30-year), the Series 2007-1 Notes, the 2010 Senior Notes, the 2012 Senior Notes and the 2013 Senior Notes all contain cross default provisions. These provisions state that default under one of the aforementioned debt instruments could in turn permit lenders under other debt instruments to declare borrowings outstanding under those instruments to be immediately due and payable. As of September 30, 2016, there were no such cross defaults.

#### Interest expense, net

The following table summarizes the components of interest as presented in the consolidated statements of operations:

	Three Mor Septem		Nine Mont Septeml	
	2016	2015	2016	2015
Income	\$ 2.5	\$ 2.8	\$ 8.2	\$ 7.0
Expense on borrowings	(35.6)	(29.8)	(105.6)	(88.8)
Expense on UTPs and other tax related liabilities (1)	(2.5)	0.4	<b>(7.0)</b>	(6.3)
Legacy Tax	0.2	0.7	0.2	0.7
Capitalized		0.1	0.4	0.4
Total	\$ (35.4)	\$ (25.8)	\$ (103.8)	\$ (87.0)

(1) The three and nine months ended September 30, 2015 include approximately \$2 million in interest income on a tax refund. The following table shows the cash paid for interest:

	Nine Mon	ths Ended
	Septem	ber 30,
	2016	2015
Interest paid	\$ 129.3	\$ 101.0

The fair value and carrying value of the Company s debt as of September 30, 2016 and December 31, 2015 are as follows:

	Septemb	er 30, 2016	December 31, 2015			
	Carrying	Estimated	Carrying	Estimated		
	Amount	Amount Fair Value		Amount Fair Value Amount		Fair Value
Series 2007-1 Notes	\$ 299.9	\$ 312.9	\$ 299.8	\$ 320.6		
2010 Senior Notes	516.9	563.9	505.8	551.2		
2012 Senior Notes	495.3	557.8	494.7	530.0		
2013 Senior Notes	495.1	568.8	494.6	533.8		
2014 Senior Notes (5-Year)	455.6	463.4	449.4	454.3		
2014 Senior Notes (30-Year)	597.3	743.7	597.2	617.7		
2015 Senior Notes	558.0	600.0	539.1	520.2		
Total	\$ 3,418.1	\$ 3,810.5	\$ 3,380.6	\$ 3,527.8		

The fair value of the Company s debt is estimated based on quoted market prices for similar instruments. Accordingly, the inputs used to estimate the fair value of the Company s long-term debt are classified as Level 2 inputs within the fair value hierarchy.

#### **NOTE 15. CONTINGENCIES**

Moody s is involved in legal and tax proceedings, governmental investigations and inquiries, claims and litigation that are incidental to the Company s business, including claims based on ratings assigned by MIS. Moody s is also subject to ongoing tax audits in the normal course of business. Management periodically assesses the Company s liabilities and contingencies in connection with these matters based upon the latest information available. Moody s discloses material pending legal proceedings pursuant to SEC rules and other pending matters as it may determine to be appropriate.

Following the global credit crisis of 2008, MIS and other credit rating agencies have been the subject of intense scrutiny, increased regulation, ongoing inquiry and governmental investigations, and civil litigation. Legislative, regulatory and enforcement entities around the world are considering additional legislation, regulation and enforcement actions, including with respect to MIS s compliance with regulatory standards. Moody s periodically receives and is continuing to address subpoenas and inquiries from various governmental authorities, including the U.S. Department of Justice and state attorneys general, and is responding to such investigations and inquiries.

In a letter dated September 29, 2016, the DOJ stated that it is preparing a civil complaint to be filed against Moody s and MIS in the U.S. District Court for the District of New Jersey alleging certain violations of the Financial Institutions Reform, Recovery, and Enforcement Act in connection with the ratings MIS assigned to residential mortgage-backed securities and collateralized debt obligations in the period leading up to the 2008 financial crisis. The DOJ also stated that its investigation remains ongoing and may expand to include additional theories. A number of state attorneys general have indicated that they also expect to pursue similar claims under state law, which claims may include additional periods, theories, asset classes or activities. The Company is continuing to respond to the DOJ s and states subpoenas and inquiries.

In addition, the Company is facing litigation from market participants relating to the performance of MIS rated securities. Although Moody s in the normal course experiences such litigation, the volume and cost of defending such litigation has significantly increased following the events in the U.S. subprime residential mortgage sector and global credit markets more broadly over the last several years.

For claims, litigation and proceedings and governmental investigations and inquiries not related to income taxes, where it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated, the Company records liabilities in the consolidated financial statements and periodically adjusts these as appropriate. When the reasonable estimate of the loss is within a range of amounts, the minimum amount of the range is accrued unless some higher amount within the range is a better estimate than another amount within the range. In other instances, because of uncertainties related to the probable outcome and/or the amount or range of loss, management does not record a liability but discloses the contingency if significant. As additional information becomes available, the Company adjusts its assessments and estimates of such matters accordingly. In view of the inherent difficulty of predicting the outcome of litigation, regulatory, governmental investigations and inquiries, enforcement and similar matters and contingencies, particularly where the claimants seek large or indeterminate damages or where the parties assert novel legal theories or the matters involve a large number of parties, the Company cannot predict what the eventual outcome of the pending matters will be or the timing of any resolution of such matters. The Company also cannot predict the impact (if any) that any such matters may have on how its business is conducted, on its competitive position or on its financial position, results of operations or cash flows. As the process to resolve any pending matters progresses, management will continue to review the latest information available and assess its ability to predict the outcome of such matters and the effects, if any, on its operations and financial condition. However, in light of the large or indeterminate damages sought in some such matters, the absence of similar court rulings on the theories of law asserted and uncertainties regarding apportionment of any potenti

#### NOTE 16. SEGMENT INFORMATION

The Company is organized into three operating segments: (i) MIS, (ii) MA and (iii) Copal Amba. The Copal Amba operating segment has been aggregated with the MA operating segment based on the fact that it has similar economic characteristics to MA. Accordingly, the Company reports in two reportable segments: MIS and MA.

The MIS segment consists of five LOBs. The CFG, SFG, FIG and PPIF LOBs generate revenue principally from fees for the assignment and ongoing monitoring of credit ratings on debt obligations and the entities that issue such obligations in markets worldwide. The MIS Other LOB primarily consists of the distribution of research and financial instruments pricing services in the Asia-Pacific region as well as ICRA non-ratings revenue.

The MA segment develops a wide range of products and services that support the risk management activities of institutional participants in global financial markets. The MA segment consists of three LOBs - RD&A, ERS and PS.

Revenue for MIS and expenses for MA include an intersegment royalty charged to MA for the rights to use and distribute content, data and products developed by MIS. The royalty rate charged by MIS approximates the fair value of the aforementioned content, data and products and is generally based on comparable market transactions. Also, revenue for MA and expenses for MIS include an intersegment fee charged to MIS from MA for certain MA products and services utilized in MIS s ratings process. These fees charged by MA are generally equal to the costs incurred by MA to produce these products and services. Additionally, overhead costs and corporate expenses of the Company that exclusively benefit only one segment are fully charged to that segment. Overhead costs and corporate expenses of the Company that benefit both segments are allocated to each segment based on a revenue-split methodology. Accordingly, a reportable segment s share of these costs will increase as its proportion of revenue relative to Moody s total revenue increases. Overhead expenses include costs such as rent and occupancy, information technology and support staff such as finance, human resources and information technology. Eliminations in the table below represent intersegment revenue/expense. Moody s does not report the Company s assets by reportable segment, as this metric is not used by the chief operating decision maker to allocate resources to the segments. Consequently, it is not practical to show assets by reportable segment.

35

Operating income

#### **Financial Information by Segment**

The table below shows revenue, Adjusted Operating Income and operating income by reportable segment. Adjusted Operating Income is a financial metric utilized by the Company s chief operating decision maker to assess the profitability of each reportable segment.

Three Months Ended September 30,

			2016			,	2015	
	MIS	MA	Eliminations	Consolidated	MIS	MA	Eliminations	Consolidated
Revenue	\$ 637.6	\$ 309.0	\$ (29.5)	\$ 917.1	\$ 571.6	\$ 290.1	\$ (26.8)	\$ 834.9
Operating, SG&A	272.8	235.2	(29.5)	478.5	268.1	215.6	(26.8)	456.9
Adjusted Operating Income	364.8	73.8		438.6	303.5	74.5		378.0
Less:								
Restructuring	7.6	0.8		8.4				
Depreciation and amortization	19.1	13.6		32.7	16.9	11.4		28.3
Operating income	\$ 338.1	\$ 59.4	\$	\$ 397.5	\$ 286.6	\$ 63.1	\$	\$ 349.7
			2016	ine Months End	-		2015	
_	MIS	MA	Eliminations	Consolidated	MIS	MA	Eliminations	Consolidated
Revenue	\$ 1,836.9	\$ 908.9	\$ (83.7)	\$ 2,662.1	\$ 1,859.1	\$ 838.7	\$ (79.2)	\$ 2,618.6
Operating, SG&A	830.1	698.1	(83.7)	1,444.5	836.4	636.3	(79.2)	1,393.5
Adjusted Operating Income	1,006.8	210.8		1,217.6	1,022.7	202.4		1,225.1
Less:								
Restructuring	10.2	1.8		12.0				
Depreciation and amortization	54.8	39.0		93.8	48.7	36.1		84.8

The cumulative restructuring charges incurred since January 1, 2016 through September 30, 2016 for the MIS and MA reportable segments are \$10.2 million and \$1.8 million, respectively. The charge in MA reflects cost management initiatives in certain corporate overhead functions of which a portion is allocated to MA based on a revenue-split methodology.

### NOTE 17. RECENTLY ISSUED ACCOUNTING STANDARDS

### Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers . This ASU outlines a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14 Revenue from Contracts with Customers (Topic 606), Deferral of the Effective Date which defers the effective date of the ASU for annual and interim reporting periods beginning after December 15, 2017, with early adoption permitted up to the original effective date of December 15, 2016. In addition, in the first and second quarter of 2016, the FASB issued additional updates clarifying the implementation guidance for the new revenue recognition standard.

The Company intends to adopt the new revenue guidance as of January 1, 2018 and is currently evaluating the application of a transition method and the impact that adoption of these updates will have on its consolidated financial statements. Currently, the Company believes this ASU will have an impact on: i) the accounting for certain software subscription revenue in MA whereby the license rights within the arrangement would be recognized at the inception of the contract based on estimated stand-alone selling price with the remainder recognized over the subscription period; ii) the accounting for certain ERS revenue arrangements where VSOE is not available should result in the acceleration of revenue recognition and iii) the capitalization of certain contract implementation costs for its ERS business which will be expensed as incurred under the new standard.

37

### Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

#### **Table of Contents**

In January 2016, the FASB issued ASU No. 2016-01 Financial Instruments Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The amendments in this ASU update various aspects of recognition, measurement, presentation and disclosures relating to financial instruments. This ASU is effective for fiscal years beginning after December 15, 2017. The Company is currently evaluating the impact of this ASU on the Company is financial statements.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) requiring lessees to recognize a right-of-use asset and lease liability for all leases with terms of more than 12 months. Recognition, measurement and presentation of expenses and cash flows will depend on classification as either a finance or operating lease. This ASU is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. This standard must be adopted using a modified retrospective approach whereby leases will be presented in accordance with the new standard as of the earliest period presented. The Company is currently evaluating the impact of this ASU on the Company is financial statements.

In March 2016, the FASB issued ASU No. 2016-07, Investments Equity Method and Joint Ventures (Topic 323), Simplifying the Transition to the Equity Method of Accounting. This ASU amends the accounting for an investment not previously accounted for under the equity method that subsequently qualifies for the equity method of accounting. It requires a company to add the cost of the additional interest acquired to its current basis and the commencement of the equity method of accounting when the criteria are met. In addition, the unrealized gains or losses in accumulated other comprehensive related to an available for sale equity security should be recognized through earnings if the investment subsequently qualifies for the equity method of accounting. The amendments of this ASU are effective for fiscal years beginning after December 15, 2016, with early adoption permitted. The adoption of this ASU will only impact the Company if an investment not previously accounted for under the equity method qualifies for accounting under the equity method.

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting. This ASU changes various aspects related to the accounting for share-based payments including: i) accounting for Excess Tax Benefits and shortfalls; ii) the accounting for forfeitures; iii) restrictions on the value of shares retained by an entity to fund the employee s portion of payroll taxes; and iv) classification of Excess Tax Benefits in the statement of cash flows. This ASU is effective for fiscal years beginning after December 15, 2016 and early adoption is permitted if all amendments are adopted in the same period. The Company is evaluating the impact of this ASU on its financial statements but currently expects that the most significant effect of this ASU will be the impact on its reported Net Income and Diluted EPS as Excess Tax Benefits and shortfalls will be recorded to the provision for income taxes under this ASU as compared to a charge to capital surplus under current GAAP. The Company intends to adopt this ASU in the first quarter of 2017.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. The amendments in this ASU require the use of an expected credit loss impairment model for most financial assets reported at amortized cost which will require entities to estimate expected credit losses over the lifetime of the instrument. This may result in the earlier recognition of allowances for losses. For available-for-sale debt securities with unrealized losses, an allowance for credit losses will be recognized as a contra account to the amortized cost carrying value of the asset rather than a direct reduction to the carrying value, with changes in the allowance impacting earnings. This ASU is effective for annual and interim reporting periods beginning after December 15, 2019, with early adoption permitted in annual and interim reporting periods beginning after December 15, 2018. Entities will apply the standard s provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first effective reporting period. The Company is currently evaluating the impact of this ASU on its financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Classification of Certain Cash Receipts and Cash Payments. This ASU adds or clarifies guidance on the classification of certain cash receipts and payments in the statement of cash flows with the intent to alleviate diversity in practice for classifying various types of cash flows. This ASU is effective for annual and interim reporting periods beginning after December 15, 2017, with early adoption permitted. The Company is currently evaluating the impact of this ASU on its statements of cash flows.

#### NOTE 18. SUBSEQUENT EVENT

On October 18, 2016, the Board approved the declaration of a quarterly dividend of \$0.37 per share of Moody s common stock, payable on December 12, 2016 to shareholders of record at the close of business on November 21, 2016.

38

#### Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis of financial condition and results of operations should be read in conjunction with the Moody s Corporation condensed consolidated financial statements and notes thereto included elsewhere in this quarterly report on Form 10-Q.

This Management s Discussion and Analysis of Financial Condition and Results of Operations contains Forward-Looking Statements. See Forward-Looking Statements commencing on page 63 for a discussion of uncertainties, risks and other factors associated with these statements.

#### The Company

Moody s is a provider of (i) credit ratings, (ii) credit and economic related research, data and analytical tools, (iii) software solutions and related risk management services, (iv) quantitative credit risk measures, financial services training and certification services and (v) outsourced research and analytical services. Moody s has two reportable segments: MIS and MA.

MIS, the credit rating agency, publishes credit ratings on a wide range of debt obligations and the entities that issue such obligations in markets worldwide. Revenue is primarily derived from the originators and issuers of such transactions who use MIS ratings in the distribution of their debt issues to investors. Additionally, MIS earns revenue from certain non-ratings-related operations, which consist primarily of the distribution of research and fixed income pricing services in the Asia-Pacific region, and from ICRA non-ratings services. The revenue from these operations is included in the MIS Other LOB and is not material to the results of the MIS segment.

The MA segment develops a wide range of products and services that primarily support financial analysis and risk management activities of institutional participants in global financial markets. Within its RD&A business, MA distributes research and data developed by MIS as part of its ratings process, including in-depth research on major debt issuers, industry studies and commentary on topical credit-related events. The RD&A business also produces economic research as well as data and analytical tools such as quantitative credit risk scores. Within its ERS business, MA provides software solutions as well as related risk management services. The PS business provides outsourced research and analytical services and financial training and certification programs.

#### **Critical Accounting Estimates**

Moody s discussion and analysis of its financial condition and results of operations are based on the Company s consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires Moody s to make estimates and judgments that affect reported amounts of assets and liabilities and related disclosures of contingent assets and liabilities at the dates of the financial statements and revenue and expenses during the reporting periods. These estimates are based on historical experience and on other assumptions that are believed to be reasonable under the circumstances. On an ongoing basis, Moody s evaluates its estimates, including those related to revenue recognition, accounts receivable allowances, contingencies, goodwill and acquired intangible assets, pension and other retirement benefits, stock-based compensation, and income taxes. Actual results may differ from these estimates under different assumptions or conditions. Item 7, MD&A, in the Company s annual report on Form 10-K for the year ended December 31, 2015, includes descriptions of some of the judgments that Moody s makes in applying its accounting estimates in these areas. Since the date of the annual report on Form 10-K, there have been no material changes to the Company s critical accounting estimates, except for updates to estimates utilized in the Company s annual goodwill impairment assessment, which is performed as of July 31 of each year.

#### Goodwill and Other Acquired Intangible Assets

On July 31 of each year, Moody s evaluates its goodwill for impairment at the reporting unit level, defined as an operating segment or one level below an operating segment.

39

The Company has six primary reporting units: two within the Company s ratings business (one for the ICRA business and one that encompasses all of Moody s other ratings operations) and four reporting units within MA: RD&A, ERS, FSTC and Copal Amba. The RD&A reporting unit encompasses the distribution of investor-oriented research and data developed by MIS as part of its ratings process, in-depth research on major debt issuers, industry studies, economic research and commentary on topical events and credit analytic tools. The ERS reporting unit provides products and services that support the credit risk management and regulatory compliance activities of financial institutions and also provides advanced actuarial software for the life insurance industry. These products and services are primarily delivered via software that is licensed on a perpetual basis or sold on a subscription basis. The FSTC reporting unit consists of the portion of the MA business that offers both credit training as well as other professional development training and implementation services. The Copal Amba reporting unit provides outsourced research and analytical services.

The Company evaluates the recoverability of goodwill using a three-step impairment test approach at the reporting unit level. In the first step, the Company assesses various qualitative factors to determine whether the fair value of a reporting unit may be less than its carrying amount. If a determination is made based on the qualitative factors that an impairment does not exist, the Company is not required to perform further testing. If the aforementioned qualitative assessment results in the Company concluding that it is more likely than not that the fair value of a reporting unit may be less than its carrying amount, the fair value of the reporting unit will be determined and compared to its carrying value including goodwill. If the fair value of the reporting unit avoid to that unit, goodwill is not impaired and the Company is not required to perform further testing. If the fair value of the reporting unit is less than the carrying value, the Company must perform a third step of the impairment test to determine the implied fair value of the reporting unit and the net fair value of the identifiable assets and liabilities of the reporting unit. If the implied fair value of the goodwill is less than its carrying value, the difference is recognized as an impairment charge. For the reporting units where the Company is consistently able to conclude that no impairment exists using only a qualitative approach, the Company s accounting policy is to perform the second step of the goodwill impairment test on all reporting units, which resulted in no impairment of goodwill.

Determining the fair value of a reporting unit or an indefinite-lived acquired intangible asset involves the use of significant estimates and assumptions. These estimates and assumptions include revenue growth rates and operating margins used to calculate projected future cash flows, risk-adjusted discount rates, future economic and market conditions, and appropriate comparable market metrics. However, as these estimates and assumptions are unpredictable and inherently uncertain, actual future results may differ from these estimates. In addition, the Company also makes certain judgments and assumptions in allocating shared assets and liabilities to determine the carrying values for each of its reporting units.

Other assets and liabilities, including applicable corporate assets, are allocated to the extent they are related to the operation of respective reporting units.

40

#### Sensitivity Analyses and Key Assumptions for Deriving the Fair Value of a Reporting Unit

The following table identifies the amount of goodwill allocated to each reporting unit as of September 30, 2016 as well as the amount by which the net assets of each reporting unit would exceed the fair value under Step 2 of the goodwill impairment test as prescribed in ASC Topic 350, assuming hypothetical reductions in their fair values as of July 31, 2016, which was the date of the last quantitative goodwill impairment assessment for all reporting units.

		Deficit C	uction to Fair		
	Goodwill	10%	20%	30%	40%
MIS	\$ 48.9	\$	\$	\$	\$
RD&A	179.9				
ERS	335.4				
FSTC	85.4			(14.4)	(34.6)
Copal Amba	160.3				(6.5)
ICRA	230.9				
Totals	\$ 1,040.8	\$	\$	\$ (14.4)	\$ (41.1)

Sensitivity Analysis

#### Methodologies and significant estimates utilized in determining of the fair value of reporting units:

The following is a discussion regarding the Company s methodology for determining the fair value of its reporting units, excluding ICRA, as of at July 31, 2016, the date of each reporting unit s last quantitative assessment. As ICRA is a publicly traded company in India, the Company was able to observe its fair value based on its market capitalization.

The fair value of each reporting unit, excluding ICRA, was estimated using a discounted cash flow methodology and comparable public company and precedent transaction multiples. The DCF analysis requires significant estimates, including projections of future operating results and cash flows of each reporting unit that is based on internal budgets and strategic plans, expected long-term growth rates, terminal values, weighted average cost of capital and the effects of external factors and market conditions. Changes in these estimates and assumptions could materially affect the estimated fair value of each reporting unit which could result in an impairment charge to reduce the carrying value of goodwill, which could be material to the Company s financial position and results of operations. Moody s allocates newly acquired goodwill to reporting units based on the reporting unit expected to benefit from the acquisition. The Company evaluates its reporting units on an annual basis, or more frequently if there are changes in the reporting structure of the Company due to acquisitions or realignments.

The sensitivity analyses on the future cash flows and WACC assumptions described below are as of July 31, 2016. The following discusses the key assumptions utilized in the discounted cash flow valuation methodology that requires significant management judgment:

Future cash flow assumptions The projections for future cash flows utilized in the models are derived from historical experience and assumptions regarding future growth and profitability of each reporting unit. These projections are consistent with the Company s operating and strategic plan. Cash flows for the five years subsequent to the date of the quantitative goodwill impairment analysis were utilized in the determination of the fair value of each reporting unit. The growth rates assumed a gradual increase in revenue based on a continued improvement in the global economy and capital markets, new customer acquisition and new products. Beyond five years, a terminal value was determined using a perpetuity growth rate based on inflation and real GDP growth rates. A sensitivity analysis of the revenue growth rates was performed on all reporting units. For all reporting units, a 10% decrease in the revenue growth rates used would not have resulted in the carrying value of the reporting unit exceeding its respective estimated fair value.

Table of Contents 56

41

WACC The WACC is the rate used to discount each reporting unit s estimated future cash flows. The WACC is calculated based on the proportionate weighting of the cost of debt and equity. The cost of equity is based on a risk-free interest rate, an equity risk factor which is derived from public companies similar to the reporting unit and which captures the perceived risks and uncertainties associated with the reporting unit s cash flows. The cost of debt component is calculated as the weighted average cost associated with all of the Company s outstanding borrowings as of the date of the impairment test and was immaterial to the computation of the WACC. The cost of debt and equity is weighted based on the debt to market capitalization ratio of publicly traded companies with similarities to the reporting unit being tested. The WACC for all reporting units ranged from 8.5% to 11.5% as of July 31, 2016. Differences in the WACC used between reporting units is primarily due to distinct risks and uncertainties regarding the cash flows of the different reporting units. A sensitivity analysis of the WACC was performed on all reporting units as of July 31, 2016 for each reporting unit. For all reporting units, an increase in the WACC of one percentage point would not result in the carrying value of the reporting unit exceeding its fair value.

Amortizable intangible assets are reviewed for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. There were no such events or changes during the first nine months of 2016 that would indicate that the carrying amount of amortizable intangible assets in any of the Company s reporting units may not be recoverable. This determination was made based on continued growth, consistent with operating and strategic plans for the reporting unit where the intangible asset resides.

#### Reportable Segments

The Company is organized into two reportable segments at September 30, 2016: MIS and MA.

The MIS segment is comprised primarily of all of the Company s ratings operations consisting of five LOBs CFG, SFG, FIG, PPIF and MIS Other. The ratings LOBs generate revenue principally from fees for the assignment and ongoing monitoring of credit ratings on debt obligations and the entities that issue such obligations in markets worldwide. The MIS Other LOB consists of certain non-ratings operations managed by MIS which consists of non-rating revenue from ICRA as well as certain research and fixed income pricing service operations in the Asia-Pacific region.

The MA segment develops a wide range of products and services that support financial analysis and risk management activities of institutional participants in global financial markets. The MA segment consists of three lines of business RD&A, ERS and PS.

The following is a discussion of the results of operations of the Company and its reportable segments. Total MIS revenue and total MA expenses include the intersegment royalty revenue for MIS and expense charged to MA for the rights to use and distribute content, data and products developed by MIS. The royalty rate charged by MIS approximates the fair value of the aforementioned content, data and products developed by MIS. Total MA revenue and total MIS expenses include intersegment fees charged to MIS from MA for the use of certain MA products and services in MIS s ratings process. These fees charged by MA are generally equal to the costs incurred by MA to provide these products and services. Overhead charges and corporate expenses that exclusively benefit one segment are fully charged to that segment. Additionally, overhead costs and corporate expenses of the Company that benefit both segments are generally allocated to each segment based on a revenue-split methodology. Overhead expenses include costs such as rent and occupancy, information technology and support staff such as finance, human resources and information technology.

42

#### RESULTS OF OPERATIONS

Three months ended September 30, 2016 compared with three months ended September 30, 2015

Executive Summary

Moody s revenue in the three months ended September 30, 2016 totaled \$917.1 million, an increase of \$82.2 million, or 10%, compared to 2015 and reflected growth in both reportable segments.

MIS revenue increased 12% compared to the prior year primarily due to strong growth in rated issuance volumes for high-yield corporate debt and bank loans reflecting opportunistic refinancing and M&A activity in the sector. The increase also reflects strong growth in public finance issuance reflecting a combination of both new issuance as well as higher refunding volumes.

MA revenue was 6% higher than the prior year reflecting increases in ERS and RD&A, most notably in the U.S. The ERS revenue growth reflected revenue from the first quarter 2016 acquisition of GGY as well as growth in the credit assessment and stress testing product lines. In RD&A, revenue growth was primarily driven by credit research subscriptions and licensing of ratings data.

Total operating expenses increased \$34.4 million, or 7%, compared to the third quarter of 2015 primarily reflecting:

higher compensation costs of \$24.9 million associated with headcount growth, most notably in MA, which included costs from the acquisition of GGY, and annual compensation increases; and

a restructuring charge of \$8.4 million associated with cost management initiatives in the MIS segment as well as in certain corporate overhead functions.

Operating income of \$397.5 million in the third quarter of 2016 was up \$47.8 million compared to 2015. Operating margin was 43.3% compared to 41.9% in the prior year. Adjusted Operating Income of \$438.6 million in the third quarter of 2016 increased \$60.6 million compared to 2015. Adjusted Operating Margin was 47.8% compared to 45.3% in the prior year period.

The increase in non-operating expense, net, compared to the prior year is primarily due to higher interest expense on borrowings reflecting the \$300 million of additional borrowings under the 2014 Senior Notes (30-Year) in November 2015. Additionally, there were higher FX gains in the prior year.

The ETR in the third quarter of 2016 was 150 BPS lower compared to the third quarter of 2015 primarily due to lower taxes on non-U.S. income.

Diluted EPS of \$1.31 in the third quarter of 2016, which included a \$0.03 restructuring charge, increased \$0.17 from 2015, which included a \$0.03 benefit from a Legacy Tax Matter. Excluding the restructuring charge in 2016 and the benefit from a Legacy Tax Matter in the prior year, non-GAAP diluted EPS of \$1.34 in 2016 increased \$0.23 reflecting a 10% increase in Net Income coupled with a 4% reduction in diluted weighted average shares outstanding.

	2016	2015	
United States	3,417	3,302	3%

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

International	7,440	6,946	7%
			***
Total	10,857	10,248	6%

Global revenue of \$917.1 million in the third quarter of 2016 increased \$82.2 million, or 10%, compared to 2015 reflecting growth in both reportable segments.

The \$64.2 million increase in MIS revenue is primarily due to strong growth in rated issuance volumes for high-yield corporate debt and bank loans reflecting opportunistic refinancing and M&A activity in the sector. The increase also reflects strong growth in public finance issuance reflecting a combination of both new issuance as well as higher refunding volumes. Additionally, the growth reflects benefits from changes in the mix of fee type, new fee initiatives and pricing increases.

The growth in MA reflects increases in ERS and RD&A in the U.S. The growth in ERS reflects revenue from the acquisition of GGY as well as growth in the credit assessment and stress testing product lines. In RD&A, revenue growth was primarily driven by credit research subscriptions and licensing of ratings data.

Transaction revenue accounted for 50% of global MCO revenue in the third quarter of 2016 compared to 46% in the prior year.

U.S. revenue of \$545.7 million in the third quarter of 2016 increased \$63.6 million compared to the prior year, reflecting growth in both MIS and MA.

Non-U.S. revenue of \$371.4 million increased \$18.6 million compared to the third quarter of 2015. This increase reflects strong growth in MIS revenue in EMEA and Asia-Pacific partially offset by declines in MA in the EMEA and Asia-Pacific regions.

Operating expenses were \$253.2 million in the third quarter of 2016, or 7% higher compared to 2015 and included an increase in compensation costs reflecting higher expenses resulting from the impact of annual compensation increases and increased headcount in MA (including headcount from the acquisition of GGY). The growth in compensation costs also reflects higher incentive compensation reflecting the Company s strong financial performance in the third quarter of 2016. These increases were partially offset by lower non-compensation costs reflecting cost reduction initiatives in response to challenging business conditions in MIS in the first half of 2016.

SG&A expenses of \$225.3 million in the third quarter of 2016 increased \$4.5 million from the prior year period reflecting modestly higher compensation costs. The growth in compensation costs was primarily due to higher incentive compensation in the third quarter of 2016 reflecting the Company s strong financial performance in the previous three months.

The restructuring charge in 2016 is comprised of severance costs relating to cost management initiatives in the MIS segment as well as in certain corporate overhead functions.

Operating income of \$397.5 million in the third quarter of 2016 increased \$47.8 million compared to 2015, resulting in an operating margin of 43.3%, compared to 41.9% in the prior year. Adjusted Operating Income of \$438.6 million in the third quarter of 2016 increased \$60.6 million compared to 2015, resulting in an Adjusted Operating Margin of 47.8% compared to 45.3% in the prior year period.

Interest income (expense), net in the third quarter of 2016 was (\$35.4) million, a \$9.6 million increase in expense compared to 2015 reflecting interest on the \$300 million of additional borrowings under the 2014 Senior Notes (30-Year) in November 2015.

Other non-operating income (expense), net was \$6.9 million in the third quarter of 2016, a \$12.8 million decrease in income compared to 2015 reflecting lower FX gains of approximately \$5 million compared to the prior year. Additionally, there was a \$6.4 million benefit from a Legacy Tax Matter in 2015 compared to a \$1.6 million benefit in 2016.

The Company s ETR was 30.5% in the third quarter of 2016, compared with 32.0% in 2015 with the decrease primarily due to lower taxes on non-U.S. income.

Net Income in the third quarter of 2016 was \$255.3 million, or \$23.7 million higher than 2015. Diluted EPS, which included a \$0.03 restructuring charge, was \$1.31 or \$0.17 higher compared to 2015 which included a \$0.03 benefit related to a Legacy Tax Matter. Excluding the restructuring charge in 2016 and Legacy Tax benefit in 2015, non-GAAP diluted EPS of \$1.34 increased \$0.23. The increase in diluted EPS reflects a 10% increase in Net Income coupled with a 4% reduction in diluted weighted average shares outstanding. The reduction in diluted weighted average shares outstanding reflects share repurchases under the Company s Board authorized share repurchase program partially offset by shares issued under the employee stock-based compensation programs.

Operating margin	53.0%	50.1%	
1 6 6	/0	2 0.2 ,0	

The following is a discussion of external MIS revenue and operating expenses:

Global MIS revenue of \$612.3 million in the third quarter of 2016 increased 12% compared to 2015. The increase reflects strong growth in rated issuance volumes for high-yield corporate debt and bank loans as well as higher volumes in the U.S. public finance sector. Additionally, the increase over the prior year reflects the impact of changes in the mix of fee type, new fee initiatives and pricing increases. These increases were partially offset by challenges in the U.S. securitization markets, most notably in the CLO and CMBS asset classes, as well as lower investment-grade corporate debt revenue in the U.S.

 $Transaction\ revenue\ for\ MIS\ was\ 63\%\ in\ the\ third\ quarter\ of\ 2016\ compared\ to\ 58\%\ in\ the\ third\ quarter\ of\ 2015.$ 

In the U.S., revenue was \$391.3 million in the third quarter of 2016, an increase of \$38.8 million compared to 2015 reflecting growth in bank loan and high-yield corporate debt issuance volumes as well as strong growth in U.S. public finance issuance. Also contributing to the growth were the impacts of changes in the mix of fee type, new fee initiatives and pricing increases. These increases were partially offset by continued

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

challenges in the U.S. securitization markets, most notably in the CLO and CMBS asset classes.

Non-U.S. revenue was \$221.0 million in the third quarter of 2016, or 13% higher compared to 2015. The increase primarily reflects growth in the EMEA region in speculative-grade corporate debt, bank loan and investment-grade corporate debt revenue coupled with higher banking revenue in Asia-Pacific.

46

Global CFG revenue of \$299.6 million in the third quarter of 2016 increased 21% compared to 2015 primarily due to strong growth in rated issuance volumes for high-yield corporate debt and bank loans in the U.S. and EMEA. This growth was due to favorable market conditions which resulted in opportunistic refinancing and continued M&A activity as well as increased investor demand for high-yield instruments. Also, the growth in high-yield issuance in EMEA reflects the favorable impact of the ECB s Corporate Sector Purchase Programme. Benefits from changes in the mix of fee type, new fee initiatives and pricing increases also contributed to the revenue growth. These increases were partially offset by a decline in U.S. investment-grade revenue reflecting an unfavorable shift in the mix of fee type in this sector. Transaction revenue represented 70% and 65% of total CFG revenue in the third quarter of 2016 and 2015, respectively. In the U.S., revenue was \$200.4 million, or \$27.5 million higher than the prior year. Internationally, revenue of \$99.2 million increased \$23.8 million compared to the prior year.

Global SFG revenue of \$104.2 million in the third quarter of 2016 decreased \$8.3 million, or 7%, compared to 2015, primarily due to lower U.S. securitization revenue. Revenue in the U.S. of \$71.4 million decreased \$7.0 million compared to the third quarter of 2015 primarily reflecting smaller deal sizes within structured credit coupled with lower CMBS issuance. The decline in CMBS issuance reflected declining availability of collateral for these instruments as well as uncertainties relating to the forthcoming risk retention regulations for this asset class. These declines were partially offset by higher REIT and RMBS activity. Non-U.S. revenue in the third quarter of 2016 of \$32.8 million decreased \$1.3 million primarily reflecting declines in RMBS and covered bond activity in EMEA. Transaction revenue was 60% of total SFG revenue in the third quarter of 2016 compared to 62% in the prior year.

Global FIG revenue of \$95.8 million in the third quarter of 2016 increased 7% compared to 2015, with substantially all of the growth coming from the banking sector in the Asia-Pacific region reflecting robust cross-border issuance from Chinese banks and asset managers. Additionally, the growth reflects benefits from changes in the mix of fee type, new fee initiatives and pricing increases. These increases were partially offset by lower U.S. banking-related rated issuance volumes. In the U.S., revenue was \$41.5 million, \$0.8 million higher compared to 2015. Internationally, revenue was \$54.3 million in the third quarter of 2016, or \$5.5 million higher compared to 2015. Transaction revenue was 41% of total FIG revenue in the third quarter of 2016 compared to 35% in the same period in 2015.

Global PPIF revenue was \$105.2 million in the third quarter of 2016, an increase of \$14.6 million, or 16%, compared to 2015. In the U.S., revenue in the third quarter of 2016 was \$75.6 million, an increase of \$17.2 million compared to 2015, primarily due to strong growth in public finance issuance. This growth reflects opportunistic refunding activity amidst favorable market conditions as well as higher new issuance volumes to fund municipal infrastructure investment needs. Additionally, the growth in the U.S. reflects higher infrastructure finance revenue coupled with benefits from changes in the mix of fee type, new fee initiatives and pricing increases. Outside the U.S., PPIF revenue decreased \$2.6 million compared to 2015, primarily due to lower public and infrastructure finance revenue in EMEA. Transaction revenue was 63% and 56% of total PPIF revenue in third quarter of 2016 and 2015, respectively.

Operating and SG&A expenses in the third quarter of 2016 increased \$3.8 million compared to 2015 primarily due to higher incentive compensation costs reflecting MIS s strong financial performance in the third quarter of 2016. This was partially offset by lower non-compensation expense reflecting cost reduction initiatives.

The restructuring charge in 2016 relates to cost management initiatives in the MIS segment as well as in certain corporate overhead functions in response to challenging market conditions in the ratings business in the first half of 2016.

Adjusted Operating Income and operating income in the third quarter of 2016, which includes intersegment royalty revenue and intersegment expenses, were \$364.8 million and \$338.1 million, respectively, up 20% and 18%, respectively, compared to 2015. Adjusted Operating Margin and operating margin were 57.2% and 53.0%, respectively, or 410BPS and 290BPS higher compared to the third quarter of 2015.

47

#### Moody s Analytics

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Three months ende 2016	d September 30, 2015	% Change Favorable (Unfavorable)
Revenue:			
Research, data and analytics (RD&A)	<b>\$ 167.7</b>	\$ 157.9	6%
Enterprise risk solutions (ERS)	101.5	92.2	10%
Professional services (PS)	35.6	36.7	(3%)
Total external revenue	304.8	286.8	6%
Intersegment revenue	4.2	3.3	27%
Total MA Revenue	309.0	290.1	7%
Expenses:			
Operating and SG&A (external)	209.9	192.1	(9%)
Operating and SG&A (intersegment)	25.3	23.5	(8%)
Adjusted Operating Income	73.8	74.5	(1%)
Restructuring	0.8		NM
Depreciation and amortization	13.6	11.4	(19%)
Operating income	\$ 59.4	\$ 63.1	(6%)
Adjusted Operating Margin	23.9%	25.7%	
Operating margin	19.2%	21.8%	

The following is a discussion of external MA revenue and operating expenses:

Global MA revenue increased \$18.0 million, or 6%, compared to the third quarter of 2015 reflecting growth in RD&A as well as ERS, which included revenue from the acquisition of GGY. Excluding unfavorable changes in FX translation rates, MA revenue grew 9% compared to the prior year. Recurring revenue comprised 76% and 75% of total MA revenue in the third quarter of 2016 and 2015.

In the U.S., revenue of \$154.4 million in the third quarter of 2016 increased \$24.8 million, and reflected growth in ERS and RD&A.

Non-U.S. revenue of \$150.4 million in the third quarter of 2016 was \$6.8 million lower than in 2015 reflecting declines in RD&A and ERS due to unfavorable changes in FX rates.

Global RD&A revenue of \$167.7 million, which comprised 55% of total external MA revenue in both the third quarter of 2016 and 2015, increased \$9.8 million, or 6%, over the prior year period. Excluding unfavorable changes in FX rates, RD&A revenue grew 9%. This growth, which was most notable in the U.S., reflected strong sales of credit research and licensing of ratings data. In the U.S., revenue of \$100.4 million increased 14% over the prior year. Non-U.S. revenue of \$67.3 million decreased 4% with the decline due to unfavorable changes in FX rates.

Global ERS revenue in the third quarter of 2016 of \$101.5 million increased \$9.3 million, or 10%, over 2015. Excluding unfavorable changes in FX rates, ERS revenue grew 14% due to revenue from the first quarter 2016 acquisition of GGY as well as growth in the credit assessment and stress testing product lines. Revenue in ERS is subject to quarterly volatility resulting from the variable nature of project timing and the concentration of software implementation and license revenue in a relatively small number of engagements. In the U.S., revenue of \$41.0

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

million increased 39% compared to the prior year. Non-U.S. revenue of \$60.5 million decreased 3% compared to the prior year with the decline due to unfavorable changes in FX rates.

48

Global PS revenue of \$35.6 million in the third quarter of 2016 decreased \$1.1 million compared to 2015 primarily reflecting declines in the outsourced research and analytical services business due to current challenges in the financial services industry. In the U.S., revenue of \$13.0 million increased 6% over the prior year. Non-U.S. revenue of \$22.6 million decreased 7% compared to the prior year.

Operating and SG&A expenses in the third quarter of 2016 increased \$17.8 million compared to 2015. The expense growth is primarily due to an increase in compensation costs reflecting higher headcount to support business growth. Headcount from the acquisition of GGY as well as annual merit increases also contributed to the compensation expense growth.

The restructuring charge in 2016 reflects cost management initiatives in certain corporate overhead functions of which a portion is allocated to MA based on a revenue-split methodology.

Adjusted Operating Income was \$73.8 million in the third quarter of 2016 and decreased \$0.7 million compared to the same period in 2015. Operating income of \$59.4 million in the third quarter of 2016 was \$3.7 million lower compared to the same period in 2015. Adjusted Operating Margin for the third quarter of 2016 was 23.9%, compared to 25.7% in 2015. Operating margin was 19.2% compared to 21.8% in the prior year. Operating margin and Adjusted Operating Margin in 2016 were suppressed due to a larger proportion of overhead costs allocated to MA under the Company s revenue-split methodology. Adjusted Operating Income and operating income both include intersegment revenue and expense.

#### RESULTS OF OPERATIONS

Nine months ended September 30, 2016 compared with nine months ended September 30, 2015

**Executive Summary** 

Moody s revenue in the first nine months of 2016 totaled \$2,662.1 million, an increase of \$43.5 million, or 2%, compared to 2015 reflecting good growth in MA revenue partially offset by modest declines in MIS.

MIS revenue decreased 1% compared to the prior year reflecting challenges in the first half of 2016 in the high-yield and investment-grade corporate debt sectors due to elevated credit spreads and market volatility at the time. Additionally, the decrease reflected lower 2016 securitization activity in the U.S., most notably in the U.S. CLO and CMBS asset classes which reflected the aforementioned elevated credit spreads and market volatility as well as uncertainty relating to the implementation of certain regulatory requirements for these asset classes. The aforementioned declines were partially offset by benefits from changes in the mix of fee type, new fee initiatives and pricing increases. The decline in the first nine months of 2016 was also partially offset by robust rated issuance volumes for high-yield corporate debt and bank loans as well as for public finance related activity in the third quarter of 2016 reflecting both opportunistic refinancing and new issuance activity.

MA revenue was 8% higher than the prior year reflecting increases in ERS and RD&A, most notably in the U.S. Revenue grew in all product areas of ERS and included revenue from the acquisition of GGY. In RD&A, revenue growth was primarily driven by credit research subscriptions and licensing of ratings data as well as growth in SAV and ECCA.

Total operating expenses increased \$72.0 million, or 5%, reflecting:

higher compensation costs of \$58.7 million associated with headcount growth in MA (including costs from the acquisition of GGY) and annual compensation increases partially offset by cost reduction initiatives in response to the challenging business conditions in MIS in the first half of 2016:

a restructuring charge of \$12.0 million associated with cost management initiatives in the MIS segment as well as in certain corporate overhead functions;

Operating income of \$1,111.8 million in the first nine months of 2016 was down \$28.5 million compared to 2015 and resulted in an operating margin of 41.8% compared to 43.5% in the prior year. Adjusted Operating Income of \$1,217.6 million in the first nine months of 2016 decreased \$7.5 million compared to 2015, resulting in an Adjusted Operating Margin of 45.7% compared to 46.8% in the prior year.

The ETR in the first nine months of 2016 was 20 BPS lower than the prior year primarily due to lower taxes on non-U.S. income.

The change in non-operating income (expense) net, compared to the prior year is primarily due to higher interest expense reflecting the 2015 Senior Notes issued in March 2015 and the \$300 million of additional borrowings under the 2014 Senior Notes (30-Year) in November 2015. Additionally, there was a \$6.4 million Legacy tax benefit in 2015 compared to a \$1.6 million benefit in 2016. Partially offsetting this change were FX gains of approximately \$9 million in 2016 compared to FX losses of approximately \$3 million in the prior year.

Diluted EPS of \$3.55 in the first nine months of 2016 was flat compared to 2015 as lower Net Income was offset by a 4% reduction in diluted weighted average shares outstanding. Excluding the \$0.04 restructuring charge in 2016 and the \$0.03 benefit from a Legacy Tax Matter in the prior year, non-GAAP EPS of \$3.59 in 2016 increased \$0.08.

Adjusted Operating Income and Adjusted Operating Margin are non-GAAP financial measures. Refer to the section entitled Non-GAAP Financial Measures of this Management Discussion and Analysis for further information regarding these measures.

Global revenue of \$2,662.1 million in the first nine months of 2016 increased \$43.5 million, or 2%, compared to 2015 and reflected good growth in MA revenue, which included revenue from the first quarter 2016 acquisition of GGY, partially offset by a modest decline in MIS revenue.

The \$26.6 million decrease in MIS revenue reflects challenges early in 2016 in the speculative-grade corporate debt sector due to elevated credit spreads and market volatility at the time as well as unfavorable issuance mix in investment-grade corporate debt. Additionally, the decrease reflects lower securitization activity in the U.S. in the first nine months of 2016, primarily in the U.S. CLO and CMBS asset classes which was due to the aforementioned elevated credit spreads and market volatility as well as uncertainty relating to the implementation of certain risk retention regulatory requirements. These declines were mostly offset by benefits from changes in the mix of fee type, new fee initiatives and pricing increases coupled with robust issuance in the third quarter of 2016 for high-yield corporate debt and bank loans as well as in public finance.

The \$70.1 million growth in MA reflects increases in ERS and RD&A, most notably in the U.S. Revenue grew in all product areas of ERS and included revenue from the 2016 acquisition of GGY. In RD&A, revenue growth was primarily driven by credit research, subscriptions and licensing of ratings data as well as growth in the SAV and ECCA businesses.

Transaction revenue accounted for 48% of global MCO revenue in the first nine months of 2016 compared to 50% in the prior year.

U.S. revenue of \$1,571.6 million in the first nine months of 2016 increased \$43.8 million from the prior year, reflecting strong growth in MA partially offset by a modest decline in MIS.

Non-U.S. revenue of \$1,090.5 million was flat compared to the first nine months of 2015 due to declines in MIS across all regions being offset by growth in MA across all regions.

Operating expenses were \$761.3 million in the first nine months of 2016, up \$36.9 million compared to 2015 and included an increase in compensation costs of approximately \$49 million. This increase reflects higher salaries and employee benefit expenses resulting from the impact of annual compensation increases and increased headcount, most notably in MA which includes headcount from the acquisition of GGY. These increases were partially offset by an approximate \$13 million decrease in non-compensation expenses reflecting cost reduction initiatives in response to challenging business conditions in MIS earlier in the year.

SG&A expenses of \$683.2 million in the first nine months of 2016 grew \$14.1 million from the prior year period reflecting increased compensation costs primarily due to annual compensation increases and headcount growth in MA which included headcount from the GGY acquisition. Additionally, there was an increase in non-compensation expenses reflecting higher rent and occupancy costs and legal expenses being partially offset by the impact of cost reduction initiatives in response to challenging business conditions in MIS earlier in the year.

The restructuring charge of \$12.0 million relates to cost management initiatives in 2016 in the MIS segment as well as in certain corporate overhead functions.

Operating income of \$1,111.8 million decreased \$28.5 million from the first nine months of 2015. Adjusted Operating Income was \$1,217.6 million in the first nine months of 2016, a decrease of \$7.5 million compared to 2015. Operating margin of 41.8% decreased 170 BPS compared to the first nine months of prior year. Adjusted Operating Margin of 45.7% decreased 110 BPS compared to the prior year.

Interest income (expense), net in the first nine months of 2016 was (\$103.8) million, a \$16.8 million increase in expense compared to 2015 reflecting interest on the 2015 Senior Notes which were issued in March 2015 as well as interest on the \$300 million of additional borrowings under the 2014 Senior Notes (30-Year) in November 2015.

Other non-operating income (expense), net was \$15.5 million in the first nine months of 2016, a \$1.5 million increase in income compared to 2015 reflecting approximately \$9 million in FX gains compared to approximately \$3 million in FX losses in the prior year. The gains in 2016 are primarily due to the strengthening of the euro to the British pound over the previous nine months. This increase in income was partially offset by a \$6.4 million benefit from a Legacy Tax Matter in 2015 compared to a \$1.6 million benefit in 2016.

The Company s ETR was 31.5% in the first nine months of 2016, compared with 31.7% in 2015 with the decrease reflecting lower taxes on non-U.S. income.

51

Net Income in the first nine months of 2016 was \$695.2 million, \$28.2 million lower than prior year. EPS of \$3.55 per diluted share in 2016 was flat compared to the prior year as lower Net Income was offset by a 4% reduction in diluted weighted average shares outstanding. Excluding the restructuring charge in 2016 and the benefit from a Legacy Tax Matter in the prior year, non-GAAP EPS of \$3.59 in 2016 increased \$0.08. The reduction in diluted weighted average shares outstanding reflects share repurchases under the Company s Board authorized share repurchase program partially offset by shares issued under the employee stock-based compensation programs.

The following is a discussion of external MIS revenue and operating expenses:

Global MIS revenue of \$1,763.0 million in the first nine months of 2016 was down 1% compared to 2015 reflecting challenges in the first half of 2016 in the speculative-grade corporate debt sector due to elevated credit spreads and market volatility at the time coupled with an unfavorable shift in issuance mix for investment-grade corporate debt. Additionally, the decrease reflected lower securitization activity in the U.S. in the first nine months of 2016, primarily in the U.S. CLO and CMBS asset classes, which reflected the aforementioned elevated credit spreads and market volatility as well as uncertainty relating to the implementation of certain risk retention regulatory requirements for these

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

asset classes. These declines were partially offset by the favorable impact of changes in the mix of fee type, new fee initiatives and pricing increases as well as robust rated issuance volumes for high-yield corporate debt and bank loans in the third quarter of 2016 as capital market volatility and elevated credit spreads that hindered issuance in the first half of 2016 subsided. The declines also were partially offset by strong growth in U.S. public finance issuance in the third quarter of 2016.

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

#### **Table of Contents**

Transaction revenue for MIS was 60% in the first nine months of 2016 compared to 62% in the first nine months of 2015.

In the U.S., revenue was \$1,126.3 million in the first nine months of 2016, a decrease of \$9.7 million compared to 2015 and reflected lower rated issuance volumes for high-yield corporate debt in the first half of 2016. Additionally, there were declines in securitization activity within the CLO and CMBS asset classes within SFG. The declines were partially offset by benefits from changes in the mix of fee type, new fee initiatives and pricing increases. The decrease compared to the prior year was also partially offset by the aforementioned growth in rated issuance volumes for high-yield corporate debt and bank loans as well as strong public finance issuance in the third quarter of 2016.

Non-U.S. revenue was \$636.7 million in the first nine months of 2016, a decrease of \$16.9 million compared to 2015 primarily reflecting lower revenue in the first half of 2016 from rating investment-grade and high-yield corporate debt across all regions. These declines were partially offset by benefits from changes in the mix of fee type, new fee initiatives and pricing increases. These declines compared to the prior year were also partially offset by growth in non-U.S. high-yield corporate debt and bank loans as well as investment-grade corporate debt in the third quarter of 2016. This growth in the third quarter reflected improved market sentiment following volatility in the first half of 2016 as well as the CSPP providing a ballast to corporate debt issuance in the EMEA region.

Global CFG revenue of \$844.7 million in the first nine months of 2016 was down 3% compared to 2015. The decline reflects lower rated issuance volumes in the first half of 2016 for speculative-grade corporate debt across all regions due to elevated credit spreads and capital market volatility at the time. Also, there was lower investment-grade corporate debt revenue across all regions reflecting the aforementioned elevated credit spreads and market volatility early in 2016. These declines were partially offset by benefits from changes in the mix of fee type, new fee initiatives and pricing increases. The decline compared to the prior year was also partially offset by robust rated issuance volumes for high-yield corporate debt and bank loans in the U.S. and EMEA in the third quarter of 2016 as capital market volatility and elevated credit spreads that hindered issuance in the first half of 2016 subsided. Furthermore, the increase in high-yield rated issuance volumes in EMEA in the third quarter of 2016 reflects additional liquidity in the region resulting from the ECB sponsored CSPP. Transaction revenue represented 68% and 70% of total CFG revenue in the first nine months of 2016 and 2015, respectively. In the U.S., revenue was \$580.9 million, or flat compared to than the prior year. Internationally, revenue of \$263.8 million decreased \$21.4 million compared to the prior year.

Global SFG revenue of \$306.3 million in the first nine months of 2016 decreased \$28.7 million, or 9%, compared to 2015. In the U.S., revenue of \$204.3 million decreased \$32.0 million compared to 2015. This decrease primarily reflected lower CLO formation, most notably in the first half of 2016, due to elevated credit spreads and declining availability of collateral for these instruments earlier in the year. Additionally, the decrease reflected lower securitization activity in the CMBS asset class reflecting higher average credit spreads over the course of 2016, particularly in the first quarter, as well as uncertainties relating to the implementation of certain risk retention regulatory requirements for this asset class. Non-U.S. revenue in the first nine months of 2016 of \$102.0 million increased \$3.3 million compared to the prior year primarily reflecting an increase in RMBS and ABS activity in EMEA. Transaction revenue was 59% of total SFG revenue in the first nine months of 2016 compared to 63% in the prior year.

Global FIG revenue of \$280.4 million in the first nine months of 2016 increased 2% compared to 2015. In the U.S., revenue was \$122.5 million, up modestly compared to 2015 primarily reflecting benefits from changes in the mix of fee type, new fee initiatives and pricing increases as well as higher M&A related issuance volumes in the insurance sector. These increases were partially offset by reduced banking-related issuance volumes due to market volatility in the first half of 2016. Internationally, revenue was \$157.9 million in the first nine months of 2016, also up modestly compared to 2015 primarily due to benefits from changes in the mix of fee type, new fee initiatives and pricing increases coupled with growth in the Asia-Pacific region reflecting higher cross-border issuance from Chinese banks and asset managers. Transaction revenue was 38% of total FIG revenue in the first nine months of 2016 compared to 37% in the same period in 2015.

Global PPIF revenue was \$309.0 million in the first nine months of 2016 and increased \$17.8 million, or 6%, compared to 2015. In the U.S., revenue of \$211.7 million increased \$20.3 million compared to 2015 primarily due to strong growth in public finance issuance in the third quarter of 2016. This growth reflects opportunistic refunding activity amidst favorable market conditions as well as higher new issuance volumes to fund municipal infrastructure investment needs. Additionally, the growth in the U.S. reflects higher infrastructure finance revenue coupled with benefits from changes in the mix of fee type, new fee initiatives and pricing increases. Outside the U.S., PPIF revenue decreased 3% compared to 2015 reflecting lower infrastructure finance revenue in EMEA coupled with lower project finance revenue in Asia-Pacific and the Americas regions. These declines were partially offset by higher infrastructure finance revenue in the Americas region. Transaction revenue was 63% and 61% of total PPIF revenue in first nine months of 2016 and 2015, respectively.

Operating and SG&A expenses in the first nine months of 2016 decreased \$6.4 million compared to 2015 primarily reflecting lower non-compensation expenses due to overall cost control initiatives. Compensation expenses were up slightly compared to the prior year reflecting annual salary increases and modest headcount growth in the ratings LOBs. These increases in compensation expense were partially offset by reduced incentive compensation costs reflecting lower projected achievement against full-year targeted results compared to the prior year.

The restructuring charge in 2016 relates to cost management initiatives in the MIS segment as well as in certain corporate overhead functions.

The increase in D&A compared to the prior year reflects capital expenditures related to investments in the Company s IT and operational infrastructure.

Adjusted Operating Income and operating income in the first nine months of 2016, which includes intersegment royalty revenue and intersegment expenses, were \$1,006.8 million and \$941.8 million, respectively, and decreased \$15.9 million and \$32.2 million, respectively, compared to 2015. Adjusted Operating Margin and operating margin were 54.8% and 51.3%, respectively, compared to 55.0% and 52.4%, in the prior year, respectively.

#### Moody s Analytics

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Nine Months Ende	ed September 30, 2015	% Change Favorable (Unfavorable)
Revenue:

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

#### **Table of Contents**

The following is a discussion of external MA revenue and operating expenses:

Global MA revenue increased \$70.1 million in the first nine months of 2016, or 8%, compared to the first nine months of 2015. Excluding unfavorable changes in FX rates, MA revenue grew 11% compared to the prior year and reflected growth in RD&A as well as ERS, which included revenue from the acquisition of GGY. Recurring revenue comprised 76% in both the first nine months of 2016 and 2015.

In the U.S., revenue of \$445.3 million in the first nine months of 2016 increased \$53.5 million, and reflected growth in ERS and RD&A.

Non-U.S. revenue of \$453.8 million in the first nine months of 2016 was \$16.6 million higher than in 2015 reflecting growth in RD&A and ERS partially offset by unfavorable changes in FX rates.

Global RD&A revenue of \$500.9 million, which comprised 56% of total external MA revenue in both the first nine months of 2016 and 2015, increased \$35.9 million, or 8%, over the prior year period. Excluding unfavorable changes in FX rates, RD&A revenue increased 10% over the prior year. The growth reflected strength in credit research subscriptions and licensing of ratings data as well as higher revenue within SAV and ECCA. In the U.S., revenue of \$292.9 million increased 12% over the prior year. Non-U.S. revenue of \$208.0 million increased 2%.

Global ERS revenue in the first nine months of 2016 of \$288.5 million increased \$36.0 million, or 14%, over 2015. Excluding unfavorable changes in FX rates, ERS revenue grew 17% reflecting increases across all product offerings and included revenue from the acquisition of GGY in March of 2016. Revenue in ERS is subject to quarterly volatility resulting from the variable nature of project timing and the concentration of software implementation and license revenue in a relatively small number of engagements. In the U.S., revenue of \$114.1 million increased 24% compared to the prior year. Non-U.S. revenue of \$174.4 million increased 8%.

Global PS revenue of \$109.7 million in the first nine months of 2016 declined modestly compared to 2015. Excluding unfavorable changes in FX rates, PS revenue was flat compared to the prior year. In the U.S., revenue of \$38.3 million was flat compared to 2015. Non-U.S. revenue of \$71.4 million was also flat compared to the prior year.

Operating and SG&A expenses in the first nine months of 2016 increased \$57.4 million compared to 2015. The expense growth resulted from an increase in compensation costs primarily due to higher headcount to support business growth as well as headcount from the acquisition of GGY and annual merit increases.

Adjusted Operating Income was \$210.8 million in the first nine months of 2016 and increased \$8.4 million compared to 2015. Operating income of \$170.0 million in the first nine months of 2016 increased \$3.7 million compared to 2015. Adjusted Operating Margin for the first nine months of 2016 was 23.2% compared to 24.1% in 2015. Operating margin was 18.7% in the first nine months of 2016 compared to 19.8% in the prior year. Operating margin and Adjusted Operating Margin in 2016 were suppressed due to a larger proportion of overhead costs allocated to MA under the Company s revenue split methodology. Adjusted Operating Income and operating income both include intersegment revenue and expense.

55

## **Liquidity and Capital Resources**

#### Cash Flow

The Company is currently financing its operations, capital expenditures and share repurchases from cash flow from operating and financing activities. The following is a summary of the changes in the Company s cash flows followed by a brief discussion of these changes:

	Nine Months Ended September 30,			\$ Change Favorable (Unfavorable)		
	2016	2015				
Net cash provided by operating activities	\$ 856.6	\$ 893.5	\$	(36.9)		
Net cash used in investing activities	<b>\$</b> (2.4)	\$ (81.5)	\$	79.1		
Net cash used in financing activities	\$ (882.6)	\$ (512.5)	\$	(370.1)		
Free Cash Flow*	<b>\$ 771.8</b>	\$ 827.6	\$	(55.8)		

<sup>\*</sup> Free Cash Flow is a non-GAAP financial measure. Refer to the section Non-GAAP financial Measures of this MD&A for further information on this financial measure. Free Cash Flow declined from 2015 due to lower net income coupled with higher capital expenditures.

#### Net cash provided by operating activities

Net cash flows from operating activities decreased \$36.9 million compared to the prior year primarily due to:

A decrease in net income of \$27.9 million;

a \$96.6 million decrease from changes in accounts receivable primarily reflecting growth in accounts receivable in 2016 compared to a decrease in accounts receivable in 2015;

Partially offset by:

an approximate \$42 million increase relating to the timing of tax payments;

an approximate \$27 million increase relating to higher incentive compensation payouts in 2015 compared to 2016 which reflected lower achievement against full-year targeted results in 2015 compared to 2014; and

an approximate \$21 million increase relating to higher deferred revenue reflecting overall business growth.

# Net cash used in investing activities

The \$79.1 million decrease in cash used in investing activities is primarily due to:

lower net maturities of short-term investments of \$190.8 million; Partially offset by:

# Edgar Filing: MOODYS CORP /DE/ - Form 10-Q

cash paid, net of cash acquired, of approximately \$79 million to acquire GGY;

\$18.3 million less cash received upon maturity of FX forward contracts designated as net investment hedges; and

higher capital expenditures of approximately \$19 million reflecting investment in the Company  $\,$  s IT and operational infrastructure. Net cash used in financing activities

The \$370.1 million increase in cash used in financing activities was attributed to:

net proceeds of \$552.8 million in 2015 reflecting the issuance of the 2015 Senior Notes;

56

Partially offset by:

treasury shares repurchased of \$678.9 million in the first nine months of 2016 compared to \$905.6 million repurchased in the prior year period.

## Cash and short-term investments held in non-U.S. jurisdictions

The Company's aggregate cash and cash equivalents and short-term investments of \$2.1 billion at September 30, 2016 consisted of approximately \$1.7 billion located outside of the U.S. Approximately 28% of the Company's aggregate cash and cash equivalents and short-term investments is denominated in euros and British pounds. Approximately 95% of the cash and cash equivalents and short-term investments in the Company's non-U.S. operations are held by entities whose undistributed earnings are indefinitely reinvested in the Company's foreign operations. Accordingly, the Company has not provided for deferred income taxes on these indefinitely reinvested earnings. A future distribution or change in assertion regarding reinvestment by the foreign subsidiaries relating to these earnings could result in additional tax liability to the Company. It is not practicable to determine the amount of the potential additional tax liability due to complexities in the tax laws and in the hypothetical calculations that would have to be made. The Company manages both its U.S. and international cash flow to maintain sufficient liquidity in all regions to effectively meet its operating needs.

#### **Indebtedness**

At September 30, 2016, Moody s had \$3.4 billion of outstanding debt and \$1.0 billion of additional capacity available under the Company s CP program which is backstopped by the 2015 Facility as more fully discussed in Note 14 to the condensed consolidated financial statements. There were no borrowings outstanding under the CP program or 2015 Facility at September 30, 2016. At September 30, 2016, the Company was in compliance with all covenants contained within all of the debt agreements. The 2015 Facility, the 2007 Agreement, the 2010 Indenture, the 2012 Indenture, the 2013 Indenture, the 2014 Indenture and the 2015 Indenture contain cross default provisions. These provisions state that default under one of the aforementioned debt instruments could in turn permit lenders under other debt instruments to declare borrowings outstanding under those instruments to be immediately due and payable. At September 30, 2016, there were no such cross defaults.

The repayment schedule for the Company s borrowings is as follows:

### Year Ended

#### Other Material Future Cash Requirements

The Company believes that it has the financial resources needed to meet its cash requirements for the next twelve months. Cash requirements for periods beyond the next twelve months will depend, among other things, on the Company s profitability and ability to manage working capital requirements. Future cash requirements may be affected by developments with respect to existing contingencies. See Item 1 Financial Statements, Note 15 Contingencies of this Form 10-Q. The Company may also borrow from various sources.

The Company remains committed to using its strong cash flow to create value for shareholders by investing in growing areas of the business, reinvesting in ratings quality initiatives, making selective acquisitions, repurchasing stock and paying a dividend, all in manner consistent with maintaining sufficient liquidity after giving effect to any additional indebtedness that may be incurred. In October 2016, the Board of Directors of the Company declared a quarterly dividend of \$0.37 per share of Moody s common stock, payable on December 12, 2016 to shareholders of record at the close of business on November 21, 2016. The continued payment of dividends at this rate, or at all, is subject to the discretion of the Board. In December 2015, the Board authorized \$1.0 billion of share repurchase authority that has a remaining repurchase authority of approximately \$787 million at September 30, 2016. Full-year 2016 total share repurchases are expected to be approximately \$750 million, subject to available cash, market conditions and other ongoing capital allocation decisions.

On February 6, 2008, the Company entered into an operating lease agreement to occupy six floors of an office tower located in the Canary Wharf district of London, England with an initial term of 17.5-years and a total of 15 years of renewal options. The total remaining lease payments as of September 30, 2016 are approximately £84 million, of which approximately £8 million will be paid in the next twelve months. Payments under this lease agreement are included in the contractual obligations table below.

On October 20, 2006, the Company entered into an operating lease agreement with 7 World Trade Center, LLC for 589,945 square-feet of an office building located at 7WTC at 250 Greenwich Street, New York, New York, which is serving as Moody s headquarters. The 7WTC Lease has an initial term of 21 years with a total of 20 years of renewal options. The total remaining lease payments are approximately \$394 million, of which approximately \$32 million will be paid during the next twelve months. Payments under this lease agreement are included in the contractual obligations table below.

# **Off-Balance Sheet Arrangements**

At September 30, 2016, Moody s did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as special purpose or variable interest entities where Moody s is the primary beneficiary, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, Moody s is not exposed to any financing, liquidity market or credit risk that could arise if it had engaged in such relationships.

58

#### **Contractual Obligations**

The following table presents payments due under the Company s contractual obligations as of September 30, 2016:

		Payments Due by Period			
(in millions)	Total	Less Than 1 Year	1 - 3 Years	3 - 5 Years	Over 5 Years
Indebtedness <sup>(1)</sup>	\$ 4,851.1	\$ 431.3	\$ 676.1	\$ 695.7	\$ 3,048.0
Operating lease obligations	762.5	93.4	167.6	139.6	361.9
Capital lease obligations	0.9	0.5	0.4		
Purchase obligations	143.9	64.5	54.0	25.4	
Pension obligations <sup>(2)</sup>	160.8	28.1	44.5	17.3	70.9
Total <sup>(3)</sup>	\$ 5,919.2	\$ 617.8	\$ 942.6	\$ 878.0	\$ 3,480.8

- (1) Reflects principal payments, related interest and applicable fees due on the Series 2007-1 Notes, the 2010 Senior Notes, the 2012 Senior Notes, the 2013 Senior Notes, the 2014 Senior Notes (5-year), the 2014 Senior Notes (30-year), the 2015 Senior Notes and the 2015 Facility as described in Note 14 to the condensed consolidated financial statements.
- (2) Reflects projected benefit contributions to the Company s funded U.S. DBPP and payments relating to the Company s U.S. unfunded DBPPs and Retirement and Other Plans described in Note 13 to the condensed consolidated financial statements
- (3) The table above does not include the Company s net long-term tax liabilities of \$201.1 million relating to UTPs since the expected cash outflow of such amounts by period cannot be reasonably estimated.

#### **Dividends**

On October 18, 2016, the Board approved the declaration of a quarterly dividend of \$0.37 per share of Moody s common stock, payable on December 12, 2016 to shareholders of record at the close of business on November 21, 2016.

#### **Non-GAAP Financial Measures:**

In addition to its reported results, Moody s has included in this MD&A certain adjusted results that the SEC defines as non-GAAP financial measures. Management believes that such non-GAAP financial measures, when read in conjunction with the Company s reported results, can provide useful supplemental information for investors analyzing period to period comparisons of the Company s performance, facilitate comparisons to competitors operating results and can provide greater transparency to investors of supplemental information used by management in its financial and operational decision-making. These non-GAAP measures, as defined by the Company, are not necessarily comparable to similarly defined measures of other companies. Furthermore, these non-GAAP measures should not be viewed in isolation or used as a substitute for other GAAP measures in assessing the operating performance or cash flows of the Company. Below are brief descriptions of the Company s non-GAAP financial measures accompanied by a reconciliation of the non-GAAP measure to its most directly comparable GAAP measure:

#### Constant Currency Measures:

The Company presents certain revenue growth on a constant currency basis because management deems this metric to be a useful measure of assessing the operations of the Company in times of foreign exchange rate volatility. Constant currency measures exclude the impact of changes in foreign exchange rates on operating results. The Company calculates the dollar impact of foreign exchange as the difference between the translation of its current period non-USD functional currency results using prior comparative period weighted average foreign exchange translation rates and current year as reported results. Growth rates on a constant currency basis are determined based on the difference between current period revenue translated using prior period comparative weighted average exchange rates and prior period as reported results divided by prior as reported results. Below is a reconciliation of certain of the Company s reported revenue changes to the changes on a constant currency basis:

59

**Three Months Ended September 30, 2016** Total RD&A **ERS** MA Revenue Revenue Revenue % % 10% 6% Reported change 6% FX impact 3% 4% 3% 9% 14% 9% Constant currency change

#### Nine Months Ended September 30, 2016

	RD&A Revenue %	ERS Revenue %	PS Revenue %	Total MA Revenue %
Reported change	8%	14%	(2%)	8%
FX impact	3%	3%	2%	3%
Constant currency change	11%	17%		11%

#### Adjusted Operating Income and Adjusted Operating Margin:

The table below reflects a reconciliation of the Company s operating income to Adjusted Operating Income. The Company defines Adjusted Operating Income as operating income excluding depreciation and amortization and restructuring charges. The Company utilizes Adjusted Operating Income because management deems this metric to be a useful measure for assessing the operating performance of Moody s, measuring the Company s ability to service debt, fund capital expenditures, and expand its business. Adjusted Operating Income excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. Adjusted Operating Income also excludes restructuring charges as the frequency and magnitude of these charges may vary widely across periods and companies. Management believes that the exclusion of these items, detailed in the reconciliation below, allows for a more meaningful comparison of the Company s results from period to period and across companies. The Company defines Adjusted Operating Margin as Adjusted Operating Income divided by revenue.

		Three Months Ended September 30,		hs Ended ber 30,
	2016	2015	2016	2015
Operating income	\$ 397.5	\$ 349.7	\$ 1,111.8	\$ 1,140.3
Adjustments:				
Restructuring	8.4		12.0	
Depreciation and amortization	32.7	28.3	93.8	84.8
Adjusted Operating Income	\$ 438.6	\$ 378.0	\$ 1,217.6	\$ 1,225.1
Operating Margin	43.3%	41.9%	41.8%	43.5%
Adjusted Operating Margin	47.8%	45.3%	45.7%	46.8%

#### Non-GAAP Diluted EPS

The Company presents this non-GAAP measure to exclude restructuring charges in 2016 and a Legacy Tax benefit in the third quarter of 2015 to allow for a more meaningful comparison of Moody s diluted earnings per share from period to period. Below is a reconciliation of these measures to their most directly comparable U.S. GAAP amount:

	Three Mon	Three Months Ended		nths Ended	
	Septen	ıber 30,	September 30,		
	2016	2015	2016	2015	
Diluted EPS - GAAP	\$ 1.31	\$ 1.14	\$ 3.55	\$ 3.54	
Legacy Tax		(0.03)		(0.03)	
Restructuring	0.03		0.04		
Diluted EPS - Non-GAAP	\$ 1.34	\$ 1.11	\$ 3.59	\$ 3.51	

#### Free Cash Flow:

The Company defines free cash flow as net cash provided by operating activities minus payments for capital additions. Management believes that free cash flow is a useful metric in assessing the Company s cash flows to service debt, pay dividends and to fund acquisitions and share repurchases. Management deems capital expenditures essential to the Company s product and service innovations and maintenance of Moody s operational capabilities. Accordingly, capital expenditures are deemed to be a recurring use of Moody s cash flow. Below is a reconciliation of the Company s net cash flows from operating activities to free cash flow:

	Nine Months	Ended
	September	30,
	2016	2015
Net cash flows provided by operating activities	\$ 856.6	\$ 893.5
Capital additions	(84.8)	(65.9)
Free cash flow	\$ 771.8	\$ 827.6
Net cash used in investing activities	\$ (2.4)	\$ (81.5)
Net cash used in financing activities	\$ (882.6)	\$ (512.5)

#### **Recently Issued Accounting Standards**

For information regarding recently issued accounting standards, see Item 1 - Financial Statements , Note 17 Recently Issued Accounting Standards.

#### Contingencies

Legal proceedings in which the company is involved also may impact Moody s liquidity or operating results. No assurance can be provided as to the outcome of such proceedings. In addition, litigation inherently involves significant costs. For information regarding legal proceedings, see Item 1 - Financial Statements, Note 15 Contingencies.

61

#### Regulation

MIS and many of the securities that it rates are subject to extensive regulation in both the U.S. and in other countries (including by state and local authorities). Thus, existing and proposed laws and regulations can impact the Company s operations and the markets for securities that it rates. Additional laws and regulations have been adopted but not yet implemented or have been proposed or are being considered. Each of the existing, adopted, proposed and potential laws and regulations can increase the costs and legal risk associated with the issuance of credit ratings and may negatively impact Moody s operations or profitability, the Company s ability to compete, or result in changes in the demand for credit ratings, in the manner in which ratings are utilized and in the manner in which Moody s operates.

The regulatory landscape has changed rapidly in recent years, and continues to evolve. In the EU, the CRA industry is registered and supervised through a pan-European regulatory framework. The European Securities and Markets Authority has direct supervisory responsibility for the registered CRA industry throughout the EU. MIS is a registered entity and is subject to formal regulation and periodic inspection. Applicable rules include procedural requirements with respect to ratings of sovereign issuers, liability for intentional or grossly negligent failure to abide by applicable regulations, mandatory rotation requirements of CRAs hired by issuers of securities for ratings of resecuritizations, restrictions on CRAs or their shareholders if certain ownership thresholds are crossed, reporting requirements to ESMA regarding fees, and additional procedural and substantive requirements on the pricing of services. CRA3 also requires that ESMA and the European Commission produce several reports on the industry s structure and the use of ratings. In October 2015, ESMA published its reports, wherein it acknowledged the impact of regulation on the industry, and stated that it will continue to monitor the industry structure over the next three to five years. On October 19, 2016, the Commission published its analysis, reaching a conclusion similar to ESMA s that no new legislation is needed for the industry at this time, but that it will continue to monitor the credit rating market and analyze approaches that may strengthen existing regulation.

Separately, on June 23, 2016 the U.K. voted through a referendum to exit the EU. The longer-term impacts of the decision to leave the EU on the overall regulatory framework for the U.K. will depend, in part, on the relationship that the U.K. negotiates with the EU in the future. In the interim, however, the U.K. s markets regulator (the Financial Conduct Authority) has said that all EU financial regulations will stay in place and that firms must continue to abide by their existing obligations. As a consequence, at this point in time, there is no change to the regulatory framework under which MIS operates and ESMA remains MIS s regulator both in the EU and in the U.K.

In the U.S., CRAs are subject to extensive regulation primarily pursuant to the Reform Act and the Financial Reform Act. The SEC is required by these legislative acts to publish two annual reports to Congress on NRSROs. The Financial Reform Act requires the SEC to examine each NRSRO once a year and issue an annual report summarizing the examination findings, among other requirements. The annual report required by the Reform Act details the SEC s views on the state of competition, transparency and conflicts of interests among NRSROs, among other requirements. The SEC voted in August 2014 to adopt its final rules for NRSROs as required by the Financial Reform Act. The Company has made and continues to make substantial IT and other investments, and has implemented the relevant compliance obligations.

In light of the regulations that have gone into effect in both the EU and the U.S. (as well as many other countries), from time to time and as a matter of course pursuant to their enabling legislation these regulatory authorities have and will continue to publish reports that describe their oversight activities over the industry. In addition, other legislation and/or interpretation of existing regulation relating to credit rating and research services is being considered by local, national and multinational bodies and this type of activity is likely to continue in the future. Finally, in certain countries, governments may provide financial or other support to locally-based rating agencies. For example, governments may from time to time establish official rating agencies or credit ratings criteria or procedures for evaluating local issuers. If enacted, any such legislation and regulation could change the competitive landscape in which MIS operates. The legal status of rating agencies has been addressed by courts in various decisions and is likely to be considered and addressed in legal proceedings from time to time in the future. Management of the Company cannot predict whether these or any other proposals will be enacted, the outcome of any pending or possible future legal proceedings, or regulatory or legislative actions, or the ultimate impact of any such matters on the competitive position, financial position or results of operations of Moody s.

62

#### **Forward-Looking Statements**

Certain statements contained in this quarterly report on Form 10-Q are forward-looking statements and are based on future expectations, plans and prospects for the Company s business and operations that involve a number of risks and uncertainties. Such statements involve estimates, projections, goals, forecasts, assumptions and uncertainties that could cause actual results or outcomes to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements. Those statements appear at various places throughout this quarterly report on Form 10-Q, including in the section entitled Contingencies under Item 2. MD&A, commencing on page 39 of this quarterly report on Form 10-Q, under Legal Proceedings in Part II, Item 1, of this Form 10-Q, and elsewhere in the context of statements containing the words believe, expect, anticipate, intend, plan, will, predict, potential, continue, strategy, aspire, target, should, could, may and similar expressions or words and variations thereof relating to the Company s views on future events, trends and contingencies. Stockholders and investors are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements and other information are made as of the date of this quarterly report on Form 10-Q, and the Company undertakes no obligation (nor does it intend) to publicly supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company is identifying examples of factors, risks and uncertainties that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements.

Those factors, risks and uncertainties include, but are not limited to, the current world-wide credit market disruptions and economic slowdown, which is affecting and could continue to affect the volume of debt and other securities issued in domestic and/or global capital markets; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including regulation, credit quality concerns, changes in interest rates and other volatility in the financial markets such as that due to the U.K. s referendum vote whereby the U.K. citizens voted to withdraw from the EU; the level of merger and acquisition activity in the U.S. and abroad; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives to respond to the current world-wide credit market disruptions and economic slowdown; concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent credit agency ratings; the introduction of competing products or technologies by other companies; pricing pressure from competitors and/or customers; the level of success of new product development and global expansion; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations, including provisions in the Financial Reform Act and regulations resulting from that Act; the potential for increased competition and regulation in the EU and other foreign jurisdictions; exposure to litigation related to our rating opinions, as well as any other litigation, government and regulatory proceedings, investigations and inquires to which the Company may be subject from time to time; provisions in the Financial Reform Act legislation modifying the pleading standards, and EU regulations modifying the liability standards, applicable to credit rating agencies in a manner adverse to credit rating agencies; provisions of EU regulations imposing additional procedural and substantive requirements on the pricing of services; the possible loss of key employees; failures or malfunctions of our operations and infrastructure; any vulnerabilities to cyber threats or other cybersecurity concerns; the outcome of any review by controlling tax authorities of the Company s global tax planning initiatives; exposure to potential criminal sanctions or civil remedies if the Company fails to comply with foreign and U.S. laws and regulations that are applicable in the jurisdictions in which the Company operates, including sanctions laws, anti-corruption laws, and local laws prohibiting corrupt payments to government officials; the impact of mergers, acquisitions or other business combinations and the ability of the Company to successfully integrate acquired businesses; currency and foreign exchange volatility; the level of future cash flows; the levels of capital investments; and a decline in the demand for credit risk management tools by financial institutions. These factors, risks and uncertainties as well as other risks and uncertainties that could cause Moody's actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements are described in greater detail under Risk Factors in Part I, Item 1A of the Company s annual report on Form 10-K for the year ended December 31, 2015, and in other filings made by the Company from time to time with the SEC or in materials incorporated herein or therein. Stockholders and investors are cautioned that the occurrence of any of these factors, risks and uncertainties may cause the Company s actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements, which could have a material and adverse effect on the Company s business, results of operations and financial condition. New factors may emerge from time to time, and it is not possible for the Company to predict new factors, nor can the Company assess the potential effect of any new factors on it.

63

#### Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: The Company carried out an evaluation, as required by Rule 13a-15(b) under the Exchange Act, under the supervision and with the participation of the Company s management, including the Company s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company s disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act, as of the end of the period covered by this report (the Evaluation Date ). Based on such evaluation, such officers have concluded that, as of the Evaluation Date, the Company s disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the communication to the Company s management, including the Company s Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

In addition, the Company s management, including the Company s Chief Executive Officer and Chief Financial Officer, has determined that there were no changes in the Company s internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, these internal controls over financial reporting during the period covered by the report.

64

#### PART II. OTHER INFORMATION

#### Item 1. Legal Proceedings

For information regarding legal proceedings, see Item 1 Financial Statements Notes to Condensed Consolidated Financial Statements (Unaudited), Note 15 Contingencies in this Form 10-Q.

#### Item 1A. Risk Factors

There have been no material changes since December 31, 2015 to the significant risk factors and uncertainties known to the Company that, if they were to occur, could materially adversely affect the Company s business, financial condition, operating results and/or cash flow. For a discussion of the Company s risk factors, refer to Item 1A. Risk Factors, contained in the Company s annual report on Form 10-K for the year ended December 31, 2015.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds MOODY S PURCHASES OF EQUITY SECURITIES

For the Three Months Ended September 30, 2016

Period	Total Number of Shares Purchased (1)	rage Price I per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Sha	imate Dollar Value of res That May Yet be chased Under the Program (2)
July 1 - 31	723,660	\$ 97.09	720,761	\$	909.8 million
August 1 - 31	576,647	\$ 104.69	572,909	\$	849.8 million
September 1 - 30	581,160	\$ 108.66	579,574	\$	786.8 million
Total	1,881,467	\$ 103.00	1,873,244		

During the third quarter of 2016, Moody s issued 0.8 million shares under employee stock-based compensation plans.

#### Item 5. Other Information

Not applicable

<sup>(1)</sup> Includes surrender to the Company of 2,899, 3,738 and 1,586 shares of common stock in July, August and September, respectively, to satisfy tax withholding obligations in connection with the vesting of restricted stock issued to employees

<sup>(2)</sup> As of the last day of each of the months. On December 15, 2015, the Board authorized a \$1 billion share repurchase program. There is no established expiration date for the remaining authorization.
