## Edgar Filing: FORT DEARBORN INCOME SECURITIES INC - Form N-Q

**Step Bonds** Coupon rate increases in increments to maturity. Rate disclosed is as of June 30, 2006. Maturity date disclosed is the ultimate maturity date.

**Floating rate securities** The interest rates shown are the current rates as of June 30, 2006.

All or a portion of this security is segregated for to be announced ( TBA ) securities.

\* Reflects annualized yield at June 30, 2006 on zero coupon bonds.

\*\* Security is issued by a fund that is advised by a related entity of UBS Global Asset Management (Americas) Inc., Fort Dearborn Income Securities, Inc. s advisor.

\*\*\* Interest rate reflects yield at June 30, 2006.

(a) Perpetual bond security. The maturity date reflects the next call date.

# The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized matrix systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter ( OTC ) market and listed on The Nasdaq Stock Market, Inc. ( NASDAQ ) normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. ( UBS Global AM or the Advisor ), the investment advisor of the Fund. UBS Global AM is an indirect wholly owned asset management subsidiary of UBS AG, an internationally diversified organization with headquarters in Zurich and Basel, Switzerland and operations in many areas of the financial services industry. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund s Board of Directors (the Board ). The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value.

144A Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2006, the value of these securities amounted to \$7,527,342 or 5.66% of net assets.

REIT Real Estate Investment Trust.

REMIC Real Estate Mortgage Investment Conduit.

Strips Bonds that can be subdivided into a series of zero-coupon bonds.

TBA (To Be Announced) Security is purchased on a forward commitment basis with an approximate principal amount (generally +/-1.0%) and no definite maturity date. The actual principal amount and maturity date will be determined upon settlement when the specific mortgage pools are assigned.

TIPS Treasury Inflation Protected Security. Inflation protected securities are debt securities whose principal and/or interest payments are adjusted for inflation, unlike debt securities that make fixed principal and interest payments. Inflation-protected securities include Treasury Inflation Protected Securities ( TIPS ), which are securities issued by the US Treasury. The interest rate paid by the TIPS is fixed, while the principal value rises or falls based on changes in a published Consumer Price Index ( CPI ). Thus, if inflation occurs, the principal and interest payments on the TIPS are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the TIPS principal amounts will not drop below their face amounts at maturity. In exchange for the inflation protection, the TIPS generally pay lower interest rates than typical US Treasury securities. Only if inflation occurs will TIPS offer a higher real yield than a conventional Treasury bond of the same maturity.

### 1) Transactions with Affiliates

The Fund invests in shares of UBS Supplementary Trust U.S. Cash Management Prime Fund ( Supplementary Trust ). The Supplementary Trust is managed by UBS Global Asset Management (Americas), Inc. (the Advisor ) and is offered as a cash management option only as a business trust to mutual funds and other accounts managed by the Advisor. Distributions from Supplementary Trust are reflected as affiliated interest income. Amounts relating to those investments at June 30, 2006 and for the period ended are summarized as follows:

Fund	Purchases	Sales Proceeds	Interest	Value	% of Net Assets
UBS Supplementary Trust U.S. Cash Management Prime Fund	\$24,966,630	\$25,527,140	\$69,925	\$1,377,814	1.04%

For more information regarding the Fund s other significant accounting policies, please refer to the Fund s semiannual report to shareholders dated March 31, 2006.
