HUANENG POWER INTERNATIONAL, INC.
Announces Results for the First Three Quarters of 2007

Equity Net Profit Increases by 25.03% to RMB4.465 Billion

(Beijing, China, October 23, 2007) Huaneng Power International, Inc. (the “Company”) [NYSE: HNP; HKEx: 902; SSE: 600011] today announced its unaudited results for the nine months ended September 30, 2007.

Under the PRC Accounting Standards, for the first three quarters of 2007, the Company realized consolidated operating revenues of RMB35.928 billion, representing an increase of 13.80% over the same period last year. Equity net profit attributable to shareholders of the Company amounted to RMB4.465 billion, representing an increase of 25.03% over the same period last year. The Board is pleased with the production operation in the first three quarters of the Company.

For the first three quarters of 2007, the statutory financial statements of the Company are compiled in accordance with the newly-issued “Accounting Standards for Enterprises”. In accordance with the relevant regulations of the China Securities Regulatory Commission, adjustments were also made to the income statement of the corresponding period last year and the balance sheet as at the beginning of the reporting period with reference to the new accounting standards. In addition, Sichuan Hydropower is no longer included in the scope of consolidation of the Company’s financial statements starting from 2007.

Regarding power output, owing to continued growth in social power demand, the Company’s new generating units have obtained a market share. When compared to the same period of last year (excluding Sichuan Hydropower), the Company’s total power generation on a consolidated basis amounted to 124.521 billion kWh, an increase of 11.24% over the same period last year; as for power tariffs, the Company's average settled power tariff increased by RMB20.81/MWh to RMB357.92/MWh, primarily a tailing-off effect of the Coal-Electricity Price Linkage Mechanism implemented last year. The unit fuel cost for power sold of the Company increased by 9.24% compared to the same period last year as a result of the increase in coal prices. The Company faced relatively substantial operating pressure in terms of fuel cost control.
