ORBCOMM Inc.

Notes to Condensed Consolidated Financial Statements (Unaudited)

(in thousands, except share and per share amounts)

1. Business

ORBCOMM Inc. (ORBCOMM or the Company), a Delaware corporation, is a satellite-based data communications company that operates a two-way global wireless data messaging system optimized for narrowband data communication. In the third quarter of 2007, the Company began providing terrestrial-based cellular communication services through a reseller agreement with a major cellular wireless provider. The Company provides these services through a constellation of 29 owned and operated low-Earth orbit satellites and accompanying ground infrastructure through which small, low power, fixed or mobile subscriber communicators (Communicators) and cellular wireless subscriber identity modules, or SIMS, that can be can be connected to other public or private networks, including the Internet and the cellular wireless provider s networks (collectively, the ORBCOMM System). The ORBCOMM System is designed to enable businesses and government agencies to track, monitor, control and communicate with fixed and mobile assets.

2. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements (the financial statements) have been prepared pursuant to the rules of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to SEC rules. These financial statements should be read in conjunction with the Company s Annual Report on Form 10-K for the year ended December 31, 2007.

In the opinion of management, the financial statements as of March 31, 2008 and for the three month periods ended March 31, 2008 and 2007 include all adjustments (including normal recurring accruals) necessary for a fair presentation of the consolidated financial position, results of operations and cash flows for the periods presented. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of the results to be expected for the full year.

The financial statements include the accounts of the Company, its wholly-owned and majority-owned subsidiaries, and investments in variable interest entities in which the Company is determined to be the primary beneficiary. All significant intercompany accounts and transactions have been eliminated in consolidation. Investments in entities over which the Company has the ability to exercise significant influence but does not have a controlling interest are accounted for under the equity method of accounting. The Company considers several factors in determining whether it has the ability to exercise significant influence with respect to investments, including, but not limited to, direct and indirect ownership level in the voting securities, active participation on the board of directors, approval of operating and budgeting decisions and other participatory and protective rights. Under the equity method, the Company s proportionate share of the net income or loss of such investee is reflected in the Company s consolidated results of operations. The Company s interests in entities that it accounts for pursuant to the equity method, other than its 37% interest in ORBCOMM Japan Limited (ORBCOMM Japan) (see Note 7) had no carrying value as of March 31, 2008 and December 31, 2007. The Company s equity in the earnings or losses of those investees for the three months ended March 31, 2008 and 2007 is not significant. Non-controlling interests in companies are accounted for by the cost method where the Company does not exercise significant influence over the investee. The Company s cost basis investments had no carrying value as of March 31, 2008 and December 31, 2007.

The Company has incurred losses from inception including a net loss of \$534 for the three months ended March 31, 2008 and as of March 31, 2008, the Company has an accumulated deficit of \$63,970. As of March 31, 2008, the Company s primary source of liquidity consisted of cash and cash equivalents, which the Company believes will be sufficient to provide working capital and fund capital expenditures including the deployment of its quick-launch satellites and investments in its next-generation satellites for at least the next twelve months.

Concentration of credit risk

Long-term receivables represent amounts due from the sale of products and services to related parties that are collateralized by assets whose estimated fair market value exceeds the carrying value of the receivables.

During the three months ended March 31, 2008 and 2007, one customer comprised 28.2% and 39.7% of revenues, respectively. As of March 31, 2008 and December 31, 2007, this customer accounted for 24.1% and 42.8% of accounts receivable, respectively.

Inventories

Inventories are stated at the lower of cost or market, determined on a first-in, first-out basis. Inventory represents finished goods available for sale to customers. The Company regularly evaluates the realizability of inventories and adjusts the carrying value as necessary.

Table of Contents

Income taxes

As of March 31, 2008, the Company had unrecognized tax benefits of \$775. There were no changes to the Company's unrecognized tax benefits during the three months ended March 31, 2008. The Company is subject to U.S. federal and state examinations by tax authorities for all years since its inception. The Company does not expect any significant changes to its unrecognized tax positions during the next twelve months.

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. No interest and penalties related to uncertain tax positions were recognized during the three months ended March 31, 2008.

A valuation allowance has been provided for all of the Company's deferred tax assets except for an unrecognized tax benefit of \$184 because it is more likely than not that the Company will not recognize the tax benefits of these deferred tax assets.

Recent accounting pronouncements

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), to define fair value, establish a framework for measuring fair value in accordance with generally accepted accounting principles and expand disclosures about fair value measurements. SFAS 157 requires quantitative disclosures using a tabular format in all periods (interim and annual) and qualitative disclosures about the valuation techniques used to measure fair value in all annual periods. On January 1, 2008, the Company adopted SFAS 157 except with respect to its non-financial assets and liabilities for which the effective date is January 1, 2009. The adoption of SFAS 157 for the Company's financial assets and liabilities did not have a material impact on the Company's consolidated financial statements. The Company also does not expect the adoption of SFAS 157 for its non-financial assets and liabilities to have a material impact on the Company's financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. The Company adopted SFAS 159 on January 1, 2008, however the Company did not elect the fair value option for any of its eligible financial instruments on the effective date.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements: an amendment of ARB No. 51* (SFAS 160). SFAS 160 requires that a noncontrolling interest in a subsidiary be reported as equity and the amount of consolidated net income specifically attributable to the noncontrolling interest be identified in the consolidated financial statements. It also calls for consistency in the manner of reporting changes in the parent's ownership interest and requires fair value measurement of any noncontrolling equity investment retained in a deconsolidation. SFAS 160 is effective for the Company on January 1, 2009. The Company is currently evaluating the impact SFAS 160 will have on its consolidated financial statements.

In December 2007, the FASB issued No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R broadens the guidance of SFAS 141, extending its applicability to all transactions and other events in which one entity obtains control over one or more other businesses. It broadens the fair value measurement and recognition of assets acquired, liabilities assumed, and interests transferred as a result of business combinations. SFAS 141R expands on required disclosures to improve the statement users' abilities to evaluate the nature and financial effects of business combinations. SFAS 141R is effective for the Company on January 1, 2009. The impact of adopting SFAS 141R will be dependent on the business combinations that the Company may pursue after its effective date.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* – an Amendment of FASB Statement No. 133 ("SFAS 161"). SFAS 161 requires expanded qualitative, quantitative and credit-risk disclosures of derivative instruments and hedging activities. These disclosures include more detailed information about gains and losses, location of derivative instruments in financial statements, and credit-risk-related contingent features in derivative instruments. SFAS 161 also clarifies that derivative instruments are subject to concentration of credit risk disclosures under SFAS 107, *Disclosure About Fair Value of Financial Instruments*, SFAS 161, which applies only to disclosures, is effective for the Company on January 1, 2009. The Company is currently evaluating the impact of SFAS 161 will have on its consolidated financial statements.

3. Comprehensive Loss

The components of comprehensive loss are as follows:

	Three months ended March 31,	
	2008	2007
Net loss	\$ (534)	\$ (2,939)
Foreign currency translation adjustment	(55)	(24)
Comprehensive loss	\$ (589)	\$ (2,963)

4. Stock-based Compensation

The Company's share-based compensation plans consist of its 2006 Long-Term Incentives Plan (the "2006 LTIP") and its 2004 Stock Option Plan. As of March 31, 2008, there were 2,250,944 shares available for grant under the 2006 LTIP and no shares available for grant under the 2004 Stock Option Plan.

For the three months ended March 31, 2008 and 2007, the Company recorded stock-based compensation expense of \$810 and \$1,928, respectively.

The components of the Company's stock-based compensation expense are presented below:

	Three months ended March 31,	
	2008	2007
Stock options	\$ 24	\$ 57
Restricted stock units	697	1,520
Stock appreciation rights	89	351
Total	\$ 810	\$ 1,928

As of March 31, 2008, the Company had an aggregate of \$5,470 of unrecognized compensation costs for all share-based payment arrangements.

Table of Contents***Time-Based Restricted Stock Units***

During the three months ended March 31, 2008, the Company granted 121,052 time-based RSUs. These RSUs vest over various periods through December 2010.

A summary of the Company's time-based RSUs for the three months ended March 31, 2008 is as follows:

	Shares	Weighted-Average Grant Date Fair Value
Balance at January 1, 2008	356,538	\$ 11.20
Granted	121,052	5.70
Vested	(129,370)	11.17
Forfeited or expired		
Balance at March 31, 2008	348,220	\$ 9.30

For the three months ended March 31, 2008 and 2007, the Company recorded stock-based compensation expense of \$513 and \$495 related to the time-based RSUs. As of March 31, 2008, \$2,083 of total unrecognized compensation cost related to the time-based RSUs granted is expected to be recognized over periods through December 2010.

Performance-Based Restricted Stock Units

During the three months ended March 31, 2008, 129,784 performance-based RSUs were granted when the Compensation Committee established financial and operational performance targets for fiscal 2008. These RSUs will vest through May 2009 and the Company estimates that 100% of the performance targets will be achieved. The Company expects that 54,522 performance-based RSUs granted during 2007 will vest in the second quarter of 2008 and 6,000 performance-based RSUs granted during 2007 will vest in January 2009.

A summary of the Company's performance-based RSUs for the three months ended March 31, 2008 is as follows:

	Shares	Weighted-Average Grant Date Fair Value
Balance at January 1, 2008	179,404	\$ 12.58
Granted	129,784	4.81
Vested	(1,500)	12.89
Forfeited or expired	(108,770)	12.50
Balance at March 31, 2008	198,918	\$ 7.55

For the three months ended March 31, 2008 and 2007, the Company recorded stock-based compensation expense of \$184 and \$1,025 related to the performance-based RSUs, respectively. As of March 31, 2008, \$657 of total unrecognized compensation cost related to the performance-based RSUs is expected to be recognized through the second quarter of 2009.

The fair value of the performance-and time-based RSU awards granted in 2008 is based upon the closing stock price of the Company's common stock on the date of grant.

Time-Based Stock Appreciation Rights

During the three months ended March 31, 2008, the Company granted 1,075,000 time-based SARs. These SARs vest over various periods through December 2010.

A summary of the Company's time-based SARs for the three months ended March 31, 2008 is as follows:

	Weighted-Average Remaining Contractual	Aggregate Intrinsic Value
Number of	Weighted-Average	

	Shares	Exercise Price	Term (years)	(In thousands)
Outstanding at January 1, 2008	66,667	\$ 11.00		
Granted	1,075,000	4.96		
Forfeited or expired				
Outstanding at March 31, 2008	1,141,667	\$ 5.31	9.91	\$
Exercisable at March 31, 2008	44,444	\$ 11.00	8.50	\$
Vested and expected to vest at March 31, 2008	1,141,667	\$ 5.31	9.91	\$

Table of Contents

For the three months ended March 31, 2008 and 2007, the Company recorded stock-based compensation expense of \$33 and \$30 relating to the time-based SARs, respectively. As of March 31, 2008, \$2,528 of total unrecognized compensation cost related to the time-based SARs is expected to be recognized over periods through December 31, 2010.

Performance-Based Stock Appreciation Rights

During the three months ended March 31, 2008, 115,555 performance-based SARs were granted when the Compensation Committee established financial and operational performance targets for fiscal 2008. These SARs will vest through March 2009 and the Company estimates that 100% of the performance targets will be achieved. The Company expects that 44,610 performance based SARs granted during 2007 will vest in the second quarter of 2008. A summary of the Company's performance-based SARs for the three months ended March 31, 2008 is as follows:

	Number of	Weighted-Average	Weighted-Average Remaining Contractual	Aggregate Intrinsic Value (In thousands)
	Shares	Exercise Price	Term (years)	
Outstanding at January 1, 2008	217,289	\$ 11.00		
Granted	115,555	11.00		
Forfeited or expired	(70,945)	11.00		
Outstanding at March 31, 2008	261,899	\$ 11.00	9.20	\$
Exercisable at March 31, 2008	146,344	\$ 11.00	8.63	\$
Vested and expected to vest at March 31, 2008	261,899	\$ 11.00	9.20	\$

The weighted-average grant date fair value of the performance-based SARs granted during the three months ended March 31, 2008 was \$0.98 per share.

For the three months ended March 31, 2008 and 2007, the Company recorded stock-based compensation expense of \$56 and \$321 relating to the performance-based SARs, respectively. As of March 31, 2008, \$106 of total unrecognized compensation cost related to the performance-based SARs is expected to be recognized through the first quarter of 2009.

The fair value of each SAR award is estimated on the date of grant using the Black-Scholes option pricing model with the assumptions described below for the periods indicated. Expected volatility was based on the stock volatility for comparable publicly traded companies. The Company uses the simplified method based on the average of the vesting term and the contractual term to calculate the expected life of each SAR award. Estimated forfeitures were based on voluntary and involuntary termination behavior as well as analysis of actual SAR forfeitures. The risk-free interest rate was based on the U.S. Treasury yield curve at the time of the grant over the expected term of the SAR grants.

	Three months ended March 31,	
	2008	2007
Risk-free interest rate	2.50% to 2.67%	4.93%
Expected life (years)	5.50 to 6.00	5.50
Estimated volatility factor	43.98%	43.93%
Expected dividends	None	None

2004 Stock Option Plan

The fair value of each stock option award is estimated on the date of grant using the Black-Scholes option pricing model with the assumptions described below for the periods indicated. Expected volatility was based on the stock volatility for comparable publicly traded companies. The Company uses historical activity to estimate the expected life of stock options, giving consideration to the contractual terms and vesting schedules. Estimated forfeitures were based on voluntary and involuntary termination behavior as well as analysis of actual option forfeitures. The risk-free interest rate was based on the U.S. Treasury yield curve at the time of the grant over the expected term of the stock option grants. No stock options were granted during the three months ended March 31, 2008 and 2007.

Table of Contents

A summary of the status of the Company's stock options as of March 31, 2008 is as follows:

	Number of	Weighted-Average	Weighted-Average Remaining	Contractual	Aggregate Intrinsic Value (In thousands)
	Shares	Exercise Price		Term (years)	
Outstanding at January 1, 2008	832,957	\$ 3.02			
Granted					
Exercised					
Forfeited or expired					
Outstanding at March 31, 2008	832,957	\$ 3.02	5.90	\$	1,613
Exercisable at March 31, 2008	824,621	\$ 3.01	5.89	\$	1,612
Vested and expected to vest at March 31, 2008	832,957	\$ 3.02	5.90	\$	1,613

As of March 31, 2008, \$96 of total unrecognized compensation cost related to stock options issued to employees is expected to be recognized ratably through March 31, 2009.

5. Net Loss per Common Share

Basic net loss per common share is calculated by dividing net loss by the weighted-average number of common shares outstanding for the year. Diluted net loss per common share is the same as basic net loss per common share, because potentially dilutive securities such as RSUs, SARs, stock options and stock warrants would have an antidilutive effect as the Company incurred a net loss for the three months ended March 31, 2008 and 2007.

The potentially dilutive securities excluded from the determination of basic and diluted loss per share, as their effect is antidilutive, are as follows:

	Three months ended March 31,	
	2008	2007
Common stock warrants	371,850	1,443,985
Stock options	832,957	1,464,420
RSUs	547,138	759,889
SARs	1,403,566	297,779
	3,155,511	3,966,073

6. Satellite Network and Other Equipment

Satellite network and other equipment consisted of the following:

	Useful life (years)	March 31, 2008	December 31, 2007
Land		\$ 381	\$ 381
Satellite network	5-10	9,497	9,463
Capitalized software	3-5	908	887
Computer hardware	5	940	920

Edgar Filing: ORBCOMM Inc. - Form 10-Q

Other	5-7	665	565
Assets under construction		47,425	45,706
		59,816	57,922
Less: accumulated depreciation and amortization		(8,494)	(8,218)
		\$ 51,322	\$ 49,704

During the three months ended March 31, 2008 and 2007, the Company capitalized costs attributable to the design and development of internal-use software in the amount of \$132 and \$139, respectively. Depreciation and amortization expense for the three months ended March 31, 2008 and 2007 was \$276 and \$170, respectively. This includes amortization of internal-use software of \$74 and \$44 for the three months ended March 31, 2008 and 2007, respectively.

Assets under construction primarily consist of costs relating to the design, development and launch of a single demonstration satellite pursuant to a contract with the United States Coast Guard (USCG) (see Notes 9 and 14) and milestone payments and other costs pursuant to the Company's satellite payload and launch procurement agreements with Orbital Sciences Corporation and OHB-System AG for its quick-launch satellites (see Note 14) and upgrades to its infrastructure and ground segment.

Table of Contents**7. Investment in ORBCOMM Japan**

On March 25, 2008, the Company received a 37% equity interest in ORBCOMM Japan and cash of \$602 in satisfaction of claims against ORBCOMM Japan. The distribution was pursuant to a voluntary reorganization of ORBCOMM Japan in accordance with a rehabilitation plan approved by the Tokyo district court on December 25, 2007.

The Company and ORBCOMM Japan are parties to a service license agreement, pursuant to which ORBCOMM Japan acts as a country representative and a reseller of the Company's services in Japan. ORBCOMM Japan owns a gateway earth station in Japan, holds the regulatory authority and authorization to operate the gateway earth station and provides the Company's satellite communication services in Japan.

The consideration the Company received for settlement of claims against ORBCOMM Japan exceeded the \$366 carrying value of current and long-term receivables from ORBCOMM Japan by \$876 and the Company recognized a gain for the same amount. The estimated fair value of the Company's equity interest in ORBCOMM Japan of \$640 has been recorded in investment in affiliates at March 31, 2008.

The Company's aggregate claims against ORBCOMM Japan totaled approximately \$2,910 of which \$2,410 related to amounts owed to the Company pursuant to a change in control payment provision in the service license agreement that was triggered by a change in control of ORBCOMM Japan prior to the reorganization. The Company had not previously recognized any amounts in its financial statements related to the change in control provision because it believed that the collection of the change in control payment was not reasonably assured.

The transaction was accounted for as of March 31, 2008 as ORBCOMM Japan's results of operations were not significant for the period from March 25, 2008 through March 31, 2008.

The following table presents summary balance sheet of ORBCOMM Japan as of March 31, 2008:

Balance Sheet Data:

Current assets	\$	1,974
Total assets		2,077
Current liabilities		348
Total liabilities		348
Stockholders' equity		1,729

8. Intangible Assets

The Company's intangible assets consisted of the following:

		March 31, 2008			December 31, 2007		
	Useful life (years)	Cost	Accumulated amortization	Net	Cost	Accumulated amortization	Net
Acquired licenses	6	\$ 8,115	\$ (2,915)	\$ 5,200	\$ 8,115	\$ (2,543)	\$ 5,572

Amortization expense was \$372 for the three months ended March 31, 2008 and 2007.

Estimated amortization expense for intangible assets subsequent to March 31, 2008 is as follows:

Years ending December 31,	
Remainder of 2008	\$ 1,114
2009	1,486
2010	1,486
2011	1,114
	\$ 5,200

9. Accrued Liabilities

The Company's accrued liabilities consisted of the following:

	March 31, 2008	December 31, 2007
Advances from USCG (See Note 14)	\$ 7,228	\$ 7,228
Gateway settlement obligation (see Note 14)	644	644
Accrued compensation and benefits	1,384	1,821
Accrued interest	697	712
Accrued professional services	436	425
Accrued inventory purchases	562	
Other accrued expenses	1,547	1,475
	\$ 12,498	\$ 12,305

During 2004, the Company entered into a contract with the USCG to design, develop, launch and operate a single satellite equipped with the capability to receive, process and forward Automatic Identification System (AIS) data (the

Concept Validation Project). Under the terms of the agreement, title to the Concept Validation Project demonstration satellite remains with the Company, however the USCG was granted a non-exclusive, royalty free license to use the designs, software processes and procedures developed under the contract in connection with any future Company satellites that are AIS enabled. The Company is permitted to use the Concept Validation Project satellite to provide services to other customers. On March 21, 2008, the Company received a modification of its current license agreement to allow the inclusion of AIS receivers on its satellites. The agreement also provides for post-launch maintenance and AIS data transmission services to be provided by the Company to the USCG for an initial term of 14 months. At its option, the USCG may elect under the agreement to receive maintenance and AIS data transmission services for up to an additional 18 months subsequent to the initial term. The deliverables under the arrangement do not qualify as separate units of accounting and, as a result, revenues from the contract will be recognized ratably commencing upon the launch of the Concept Validation Project demonstration satellite (expected during 2008) over the expected life of the customer relationship.

On April 14, 2008, the Company and USCG agreed to extend the launch date of this satellite to August 15, 2008 (See Note 14).

10. Deferred Revenues

Deferred revenues consisted of the following:

	March 31, 2008	December 31, 2007
Service activation fees	\$ 2,144	\$ 1,796
Manufacturing license fees	71	75
Prepaid services	1,031	1,071
	3,246	2,942
Less current portion	(1,590)	(1,435)
Long-term portion	\$ 1,656	\$ 1,507

Table of Contents**11. Note Payable**

In connection with the acquisition of a majority interest in Satcom in 2005, the Company recorded an indebtedness to OHB Technology A.G. (formerly known as OHB Teledata A.G.) (OHB), a stockholder of the Company. At March 31, 2008, the principal balance of the note payable was 1,138 (\$1,755) and it had a carrying value of \$1,296. At December 31, 2007, the principal balance of the note payable was 1,138 (\$1,661) and it had a carrying value of \$1,170. The carrying value was based on the note's estimated fair value at the time of acquisition. The difference between the carrying value and principal balance is being amortized to interest expense over the estimated life of the note of six years. Interest expense related to the note for each of the three months ended March 31, 2008 and 2007 was \$33. This note does not bear interest and has no fixed repayment term. Repayment will be made from the distribution profits (as defined in the note agreement) of ORBCOMM Europe LLC. The note has been classified as long-term and the Company does not expect any repayments to be required prior to March 31, 2009.

12. Stockholders' Equity

Warrants to purchase the Company's common stock outstanding at March 31, 2008 were as follows:

Exercise price	Shares subject to Warrants
\$2.33	88,640
\$3.38	25,224
\$4.26	257,986
	371,850

During the three months ended March 31, 2008, the Company issued 54,974 shares of common stock upon the exercise of warrants at per share exercise prices ranging from \$2.33 to \$4.26. The Company received gross proceeds of \$133 from the exercise of these warrants. In addition, the Company issued 21,019 shares of common stock upon the cashless exercise of warrants to purchase 41,717 common shares with per share exercise prices ranging from \$2.33 to \$4.26.

During the three months ended March 31, 2008, warrants to purchase 5,362 common shares with per share exercise prices of \$2.33 and \$3.38 expired.

At March 31, 2008, the Company has reserved the following shares of common stock for future issuance:

	Shares
Employee stock compensation plans	5,034,605
Warrants to purchase common stock	371,850
	5,406,455

13. Geographic Information

The Company operates in one reportable segment, machine to machine data communications. Other than satellites in orbit, long-lived assets outside of the United States are not significant. The following table summarizes revenues on a percentage basis by geographic region, based on the country in which the customer is located:

	Three months ended March 31,	
	2008	2007
United States	91%	89%
Other ⁽¹⁾	9%	11%

100%

100%

- (1) *No other single geographic areas are more than 10% of revenues for the three months ended March 31, 2007.*

Table of Contents

14. Commitments and Contingencies

Procurement agreements in connection with quick-launch satellites

On April 21, 2006, the Company entered into an agreement with Orbital Sciences whereby Orbital Sciences will design, manufacture, test and deliver to the Company, one payload engineering development unit and six AIS-equipped satellite payloads for the Company. The cost of the payloads is \$17,000, subject to adjustment under certain circumstances. Payments under the agreement are due upon the achievement of specified milestones by Orbital Sciences. As of March 31, 2008, the Company has made milestone payments of \$16,150 under this agreement. The Company anticipates making the remaining payments subject to adjustments under the agreement of \$150 in 2008 and \$700 in 2009.

On June 5, 2006, the Company entered into an agreement with OHB-System AG, an affiliate of OHB, to design, develop and manufacture six satellite buses, integrate such buses with the payloads to be provided by Orbital Sciences, and launch the six integrated satellites. The price for the six satellite buses and launch services is \$20,000 and payments under the agreement are due upon specific milestones achieved by OHB-System AG. In addition, if OHB-System AG meets specific on-time delivery milestones, the Company would be obligated to pay up to an additional \$1,000. As of March 31, 2008, the Company has made milestone payments of \$14,600 under this agreement. In addition, OHB-System AG will provide services relating to the development, demonstration and launch of the Company's next-generation satellites at a total cost of \$1,350.

Due to delays associated with the construction of the final quick-launch satellite, the Company intends to retain it for future deployment.

The Company anticipates making the remaining payments under the agreement of \$5,000 and \$400 in 2008 and 2009, respectively, for the six satellite buses and the related integration and launch services.

Procurement agreements in connection with U.S. Coast Guard contract

In May 2004, the Company entered into an agreement to construct and deploy a satellite for use by the USCG (see Note 9). In connection with this agreement, the Company entered into procurement agreements with Orbital Sciences and OHB-System AG. All expenditures relating to this project are being capitalized as assets under construction. The satellite is expected to be launched during 2008. As of March 31, 2008 and December 31, 2007, the Company has incurred \$7,163 and \$7,138 of costs related to this project, respectively. As of March 31, 2008, the Company's remaining obligation under these procurement agreements were \$362.

As a result of delays in launching the satellite, in February 2007, the USCG issued a unilateral modification to the contract setting a definitive launch date of July 2, 2007. On September 13, 2007, the Company and USCG entered into an amendment to the agreement to extend the definitive launch date to December 31, 2007. In consideration for agreeing to extend the launch date, the Company will provide up to 200 hours of additional support for up to 14 months after the launch date at no cost and reduce USCG's cost for the post-launch maintenance options and for certain usage options.

The USCG project is to be launched with the Company's quick-launch satellites, however the launch did not occur by December 31, 2007. On January 14, 2008, the Company received a cure notice from the USCG notifying the Company that unless the satellite is launched within 90 days after receipt of the cure notice, the USCG may terminate the contract for default and pursue the remedies available to it, one of which is procuring supplies and services similar to those terminated and holding the Company liable for any excess costs of procurement. The Company has indemnification rights against the launch services provider for the Coast Guard demonstration satellite in the event the launch services contract is terminated for default from and against any and all claims, demands, assessments and all liabilities and costs related thereto for which the Company becomes liable, including but not limited to any assessment of damages and/or reprocurement costs by the USCG. As of March 31, 2008 and December 31, 2007, the Company believed that the launch of the Coast Guard demonstration satellite would have likely extended beyond the 90 days cure period.

The Company had reflected all amounts received under the USCG contract in accrued liabilities in its March 31, 2008 and December 31, 2007 consolidated balance sheet.

On April 14, 2008, the Company and the USCG entered into an amendment to the agreement extending the definitive launch date to August 15, 2008. In consideration for agreeing to extend the launch date, the Company will provide

the USCG with all AIS data from each of the quick-launch satellites being launched with the Coast Guard demonstration satellite, to the extent the satellites are providing service, for 90 continuous days (upon request by the USCG during the first 180 days of the base operating period) at no additional cost. In addition, the USCG will have certain intellectual property rights over the AIS data received by the AIS receivers aboard the quick-launch satellites and the Coast Guard demonstration satellite solely during the 90-day evaluation period to share only with other U.S. government agencies, provided that during the 90-day evaluation period the Company is permitted to use the AIS data from the quick-launch satellites in connection with the Company's other programs.

Table of Contents

Gateway settlement obligation

In 1996, a predecessor to the Company entered into a contract to purchase gateway earth stations (GESs) from ViaSAT Inc. (the GESs Contract). As of September 15, 2000, the date the predecessor company filed for bankruptcy, approximately \$11,000 had been paid to ViaSAT, leaving approximately \$3,700 owing under the GESs Contract for 8.5 GESs manufactured and stored by ViaSAT. In December 2004, the Company and ViaSAT entered into a settlement agreement whereby the Company was granted title to 4 completed GESs in return for a commitment to pay an aggregate of \$1,000 by December 2007. ViaSAT maintains a security interest and lien in the 4 GESs and has the right to possession of each GESs until the lien associated with the GESs has been satisfied. The Company has options, which expired in December 2007, to purchase any or all of the remaining 4.5 GESs for aggregate consideration of \$2,700. However, the Company must purchase one of the remaining 4.5 GESs for \$1,000 prior to the sale or disposition of the last of the 4 GESs for which title has been transferred. The Company and ViaSAT are in discussions to extend the option. The Company recorded the 4 GESs in inventory at an aggregate value of \$1,644 upon execution of the settlement agreement. As of March 31, 2008 and December 31, 2007, the accrued liability for the settlement agreement was \$644.

Airtime credits

In 2001, in connection with the organization of ORBCOMM Europe LLC and the reorganization of the ORBCOMM business in Europe, the Company agreed to grant certain country representatives in Europe approximately \$3,736 in airtime credits. The Company has not recorded the airtime credits as a liability for the following reasons: (i) the Company has no obligation to pay the unused airtime credits if they are not utilized; and (ii) the airtime credits are earned by the country representatives only when the Company generates revenue from the country representatives. The airtime credits have no expiration date. Accordingly, the Company is recording airtime credits as services are rendered and these airtime credits are recorded net of revenues from the country representatives. For the three months ended March 31, 2008 and 2007, airtime credits used totaled approximately \$41 and \$43, respectively. As of March 31, 2008 and December 31, 2007, unused credits granted by the Company were approximately \$2,449 and \$2,490, respectively.

Litigation

From time to time, the Company is involved in various litigation matters involving ordinary and routine claims incidental to its business. Management currently believes that the outcome of these proceedings, either individually or in the aggregate, will not have a material adverse effect on the Company's business, results of operations or financial condition. The Company is also involved in certain litigation matters as discussed below.

Class Action Litigation

On September 20 and 25, 2007, two separate plaintiffs filed purported class action lawsuits in the United States District Court for the District of New Jersey against the Company and certain of its officers. The actions allege that the Company's registration statement related to its initial public offering in November 2006 contained material misstatements and omissions in violation of the Securities Act of 1933. The actions cited a drop in the trading price of the Company's common stock that followed disclosure on August 14, 2007 of reduced guidance for the remainder of 2007 released with the Company's second quarter financial results. The actions seek to recover compensatory, and in one complaint rescissory damages, on behalf of a class of shareholders who purchased common stock in and/or traceable to the Company's initial public offering on or about November 3, 2006 through August 14, 2007. The court has yet to certify the class or appoint a lead plaintiff(s). The Company intends to defend the matter vigorously. No provision for losses, if any, that might result from the matter have been recorded in the Company's consolidated financial statements as this action is in its preliminary stages and the Company is unable to predict the outcome and therefore it is not probable that a liability has been incurred and the amount of loss, if any, is not reasonably estimable.

15. Subsequent Event

Procurement agreement in connection with next-generation satellites

On May 5, 2008, the Company entered into a Procurement Agreement (the Agreement) with Sierra Nevada Corporation (SNC) pursuant to which SNC will construct eighteen low-earth-orbit satellites in three sets of six satellites (shipsets) for the Company's next-generation satellites (the Initial Satellites). Under the Agreement, SNC will also provide launch support services, a test satellite (excluding the mechanical structure), a satellite software simulator

and the associated ground support equipment. Under the Agreement, the Company may elect to use the launch option to be offered by SNC or it may contract separately with other providers for launch services and launch insurance for the satellites.

Under the Agreement, the Company has the option, exercisable at any time until the third anniversary of the execution of the Agreement, to order up to thirty additional satellites substantially identical to the Initial Satellites (the Optional Satellites).

The total contract price (for the Initial Satellites) is \$117,000, subject to reduction upon failure to achieve certain in-orbit operational milestones with respect to the Initial Satellites or if the pre-ship reviews of each shipset are delayed more than 60 days after the specified time periods described below. The Company has agreed to pay SNC up to \$1,500 in incentive payments for the successful operation of the Initial Satellites five years following the successful completion of in-orbit testing for the third shipset of six satellites. The price for the Optional Satellites ranges from \$5,000 to \$7,700 per satellite depending on the number of satellites ordered and the timing of the exercise of the option.

The Agreement also requires SNC to complete the pre-ship review of the Initial Satellites (i) no later than 24 months after the execution of the Agreement for the first shipset of six satellites, (ii) no later than 31 months after the execution of the Agreement for the second shipset of six satellites and (iii) no later than 36 months after the execution of the Agreement for the third shipset of six satellites. Payments under the Agreement will begin upon the execution of the Agreement and will extend into the second quarter of 2012, subject to SNC's successful completion of each payment milestone.

Under the Agreement, SNC has agreed to provide the Company with an optional secured credit facility for up to \$20,000 commencing twenty-four months after the execution of the Agreement and maturing forty four months after the effective date. If the Company elects to establish and use the credit facility it and SNC will enter into a formal credit facility on terms established in the Agreement.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Safe Harbor Statement Under the Private Securities Litigation Reform of Act 1995.

Certain statements discussed in Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Quarterly Report on Form 10-Q constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally relate to our plans, objectives and expectations for future events and includes statements about our expectations, beliefs, plans, objectives, intentions, assumptions and other statements that are not historical facts. Such forward-looking statements, including those concerning the Company's expectations, are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results, projected, expected or implied by the forward-looking statements, some of which are beyond the Company's control, that may cause the Company's actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. These risks and uncertainties include but are not limited to: substantial losses we have incurred and expect to continue to incur; demand for and market acceptance of our products and services and the applications developed by our resellers; loss or decline or slowdown in the growth in business from Asset Intelligence division of General Electric Company (GE), other value-added resellers or VARs and international value-added resellers or IVARs; litigation proceedings; technological changes, pricing pressures and other competitive factors; the inability of our international resellers to develop markets outside the United States; satellite launch failures, satellite launch and construction delays and cost overruns and in-orbit satellite failures or reduced performance; the failure to launch the Coast Guard demonstration satellite by the definitive launch date; the failure of our system or reductions in levels of service due to technological malfunctions or deficiencies or other events; our inability to renew or expand our satellite constellation; political, legal regulatory, government administrative and economic conditions and developments in the United States and other countries and territories in which we operate and changes in our business strategy. These and other risks are described in more detail in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007. The Company undertakes no obligation to publicly revise any forward-looking statements or cautionary factors, except as required by law.

Table of Contents

Overview

Presently, we operate the only global commercial wireless messaging system optimized for narrowband communications. Our system consists of a global network of 29 low-Earth orbit, or LEO, satellites and accompanying ground infrastructure. Our two-way communications system enables our customers and end-users, which include large and established multinational businesses and government agencies, to track, monitor, control and communicate cost-effectively with fixed and mobile assets located anywhere in the world. In 2007, we began providing terrestrial-based cellular communication services through a re-seller agreement with a major cellular wireless provider. These services commenced in the third quarter of 2007 and revenues from such services were not significant. In addition, a re-seller agreement was signed with a second major cellular wireless provider in the fourth quarter of 2007 and services with this provider are expected to commence in the first half of 2008. These terrestrial-based communication services enable our customers who have higher bandwidth requirements to receive and send messages from communication devices based on terrestrial-based technologies using the cellular provider's wireless network as well as from dual-mode devices combining our satellite subscriber communicators with devices for terrestrial-based technologies. As a result, our customers are now able to integrate into their applications a terrestrial communications device that will allow them to add messages, including data intensive messaging from the cellular provider's wireless network.

Our products and services enable our customers and end-users to enhance productivity, reduce costs and improve security through a variety of commercial, government and emerging homeland security applications. We enable our customers and end-users to achieve these benefits using a single global technology standard for machine-to-machine and telematic, or M2M, data communications. Our customers have made significant investments in developing ORBCOMM-based applications. Examples of assets that are connected through our M2M data communications system include trucks, trailers, railcars, containers, heavy equipment, fluid tanks, utility meters, pipeline monitoring equipment, marine vessels and oil wells. Our customers include original equipment manufacturers, or OEMs, such as Caterpillar Inc., Komatsu Ltd., Hitachi Construction Machinery Co., Ltd. and the Volvo Group, IVARs, such as the GE, VARs, such as Fleet Management Services, XATA Corporation and American Innovations, Ltd., and government agencies, such as the U.S. Coast Guard.

Presently our unique M2M data communications system is comprised of three elements: (i) a constellation of 29 LEO satellites in multiple orbital planes between 435 and 550 miles above the Earth operating in the Very High Frequency, or VHF, radio frequency spectrum, (ii) related ground infrastructure, including 15 gateway earth stations, four regional gateway control centers and a network control center in Dulles, Virginia, through which data sent to and from subscriber communicators are routed and (iii) subscriber communicators and cellular wireless SIMS attached to a variety of fixed and mobile assets worldwide.

Our principal products and services are satellite-based data communications services and product sales from subscriber communicators. During the third quarter of 2007, we commenced terrestrial-based cellular communication services, which consist of reselling airtime using a cellular provider's wireless technology network and product sales from cellular wireless SIMS for use with devices or equipment that enable the use of the cellular provider's wireless network for data communications. We provide global M2M data communications services through our satellite-based system. We focus our communications services on narrowband data applications. These data messages are typically sent by a remote subscriber communicator through our satellite system to our ground facilities for forwarding through an appropriate terrestrial communications network to the ultimate destination. In addition we provide terrestrial cellular communication services which support higher bandwidth applications that are not typical for an ORBCOMM application. These data messages are sent by cellular wireless SIMS which are routed through the cellular provider's wireless network to our ground facilities and forwarded to the ultimate destination in real time.

Increasingly, businesses and governments face the need to track, control, monitor and communicate with fixed and mobile assets that are located throughout the world. At the same time, these assets increasingly incorporate microprocessors, sensors and other devices that can provide a variety of information about the asset's location, condition, operation or measurements and respond to external commands. As these intelligent devices proliferate, we believe that the need to establish two-way communications with these devices is greater than ever. Increasingly, owners and users of these intelligent devices are seeking low cost and efficient communications systems that will

enable them to communicate with these devices.

Our products and services are typically combined with industry-or customer-specific applications developed by our resellers which are sold to their end-user customers. We do not generally market to end-users directly; instead, we utilize a cost-effective sales and marketing strategy of partnering with over 160 resellers (*i.e.*, VARs and country representatives). These resellers, which are our direct customers, market to end-users.

Table of Contents**Critical Accounting Policies**

Our discussion and analysis of our results of operations, liquidity and capital resources are based on our unaudited condensed consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and judgments, including those related to revenue recognition, costs of revenues, accounts receivable, satellite network and other equipment, capitalized development costs, intangible assets, inventory valuation, the valuation of deferred tax assets, uncertain tax positions and the fair value of securities underlying share-based payment arrangements. We base our estimates on historical and anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results may differ from our estimates and could have a significant adverse effect on our results of operations and financial position. For a discussion of our critical accounting policies see Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2007. There have been no material changes to our critical accounting policies during the three months ended March 31, 2008.

EBITDA

EBITDA is defined as earnings before interest income (expense), provision for income taxes and depreciation and amortization. We believe EBITDA is useful to our management and investors in evaluating our operating performance because it is one of the primary measures used by us to evaluate the economic productivity of our operations, including our ability to obtain and maintain our customers, our ability to operate our business effectively, the efficiency of our employees and the profitability associated with their performance; it also helps our management and investors to meaningfully evaluate and compare the results of our operations from period to period on a consistent basis by removing the impact of our financing transactions and the depreciation and amortization impact of capital investments from our operating results. In addition, our management uses EBITDA in presentations to our board of directors to enable it to have the same measurement of operating performance used by management and for planning purposes, including the preparation of our annual operating budget.

EBITDA is not a performance measure calculated in accordance with GAAP. While we consider EBITDA to be an important measure of operating performance, it should be considered in addition to, and not as a substitute for, or superior to, net loss or other measures of financial performance prepared in accordance with GAAP and may be different than EBITDA measures presented by other companies.

The following table (in thousands) reconciles our net loss to EBITDA for the periods shown:

	Three months ended March 31,	
	2008	2007
Net loss	\$ (534)	\$ (2,939)
Interest income	(766)	(1,279)
Interest expense	50	52
Depreciation and amortization	648	542
EBITDA	\$ (602)	\$ (3,624)

EBITDA during the three months ended March 31, 2008 improved by \$3.0 million over the three months ended March 31, 2007. This improvement was due to an increase in net service revenues of \$1.1 million and a decrease in operating expenses of \$2.2 million. Operating expenses decreased in the first quarter of 2008, due to a decrease in stock-based compensation of \$1.1 million and a gain of \$0.9 million from the settlement of claims from ORBCOMM Japan.

Results of Operations***Revenues***

Revenues consist of service revenues and product sales. Service revenues are based upon utilization of subscriber communicators on our communications system and the reselling of airtime from the utilization of terrestrial-based subscriber communicators using SIMS on the cellular provider's wireless network. These service revenues generally consist of a one-time activation for each subscriber communicator and SIMS activated for use on our communications system and monthly usage fees. Service revenues are also earned from providing engineering, technical and management support services to customers, and from license fees and a one time royalty by third parties for the use of our proprietary communications protocol, which enables subscriber communicators to connect to our M2M data communications system. Product sales consist of sales of subscriber communicators, other products such as subscriber communicator peripherals, and other equipment such as gateway earth stations and gateway control centers to customers. During the third quarter of 2007, we began selling cellular wireless subscriber identity modules, or SIMS, (for our terrestrial-communications services) to our resellers and direct customers.

Table of Contents

	Three months ended March 31,			2008			2007		
					% of	Total		% of	Total
Service revenues	\$	4,855			82.6%		\$	3,950	66.3%
Product sales		1,024			17.4%			2,011	33.7%
	\$	5,879			100.0%		\$	5,961	100.0%

Total revenues for the three months ended March 31, 2008 decreased by \$0.1 million, or 1.4%, to \$5.9 million from \$6.0 million for the three months ended March 31, 2007. This decrease related to a decrease in product sales of \$1.0 million offset by an increase in service revenues of \$0.9 million.

Service revenues

Service revenues increased \$0.9 million for the three months ended March 31, 2008, or 22.9%, to \$4.9 million, or approximately 82.6% of total revenues, from \$4.0 million, or approximately 66.3% of total revenues for the three months ended March 31, 2007. This increase was primarily due to an increase in the number of billable subscriber communicators activated on our communications system. As of March 31, 2008, there were approximately 380,000 billable subscriber communicators on the ORBCOMM System as compared to approximately 250,000 billable subscriber communicators as of March 31, 2007, an increase of approximately 51.8%. Service revenue growth can be impacted by the customary lag between subscriber communicator activations and recognition of service revenue from these units. In addition, this customary lag has been increased by the slowdown in deployments of activated units to end users by GE.

Product sales

Revenue from product sales decreased \$1.0 million for the three months ended March 31, 2008, or 49.1%, to \$1.0 million, or approximately 17.4% of total revenues, from \$2.0 million, or approximately 33.7% of total revenues for the three months ended March 31, 2007. This decrease was primarily due to lower sales to GE. We expect this trend to continue throughout 2008 due to lower demand for subscriber communicators by VARs in the transportation sector.

Costs of services

Costs of services include the expenses associated with our engineering groups, the repair and maintenance of our ground infrastructure, the depreciation associated with our communications system and the amortization of licenses acquired.

Costs of services decreased by \$0.4 million, or 13.5%, to \$2.0 million for the three months ended March 31, 2008 from \$2.4 million during the three months ended March 31, 2007. The decrease was due to a \$0.2 million decrease in stock-based compensation and lower equipment maintenance costs of \$0.2 million. As a percentage of service revenues, cost of services were 40.0% of service revenues for the three months ended March 31, 2008 compared to 59.6% for the three months ended March 31, 2007. This decrease in costs of services as a percentage of service revenue is primarily due to an increase in service revenues.

Costs of product sales

Costs of product sales include the cost of subscriber communicators and Sims and related peripheral equipment, as well as the operational costs to fulfill customer orders, including costs for employees.

Costs of product sales decreased by \$0.8 million, or 39.2%, to \$1.3 million for the three months ended March 31, 2008 from \$2.1 million for the three months ended March 31, 2007. Product cost represented 66.0% of the cost of product sales for the three months ended March 31, 2008, which decreased by \$0.9 million, or 51.8%, to \$0.8 million for the three months ended March 31, 2008 from \$1.8 million for the three months ended March 31, 2007. We had a gross loss from product sales (revenues from product sales minus costs of product sales including costs for Stellar) of \$0.3 million and \$0.1 million for the three months ended March 31, 2008 and 2007, respectively. The gross loss from product sales was related to lower revenues from subscriber communicator sales which was not enough to cover costs

associated with distribution, fulfillment and customer service costs associated with completing customer orders.

Selling, general and administrative expenses

Selling, general and administrative expenses relate primarily to compensation and associated expenses for employees in general management, sales and marketing, and finance, litigation expenses and regulatory matters.

Selling, general and administrative expenses decreased by \$0.9 million, or 16.3%, to \$4.4 million for the three months ended March 31, 2008 from \$5.3 million for the three months ended March 31, 2007. This decrease is primarily due to lower employee costs of \$0.6 million, resulting primarily from a decrease in stock-based compensation of \$0.9 million, offset by an increase in payroll costs of \$0.3 million and a decrease in professional fees of \$0.5 million, primarily due to reduced litigation expenses as a result of settling the Quake litigation in 2007.

Table of Contents

Product development expenses

Product development expenses consist primarily of the expenses associated with the staff of our engineering development team, along with the cost of third parties that are contracted for specific development projects.

Product development expenses for the three months ended March 31, 2008 and 2007 were \$0.3 million and \$0.4 million, respectively, decreasing 28.9% in the current year period over the same period in the prior year.

Gain on customer claims settlement

On March 25, 2008, we received a 37% equity interest in ORBCOMM Japan and cash of \$0.6 million in satisfaction of claims against ORBCOMM Japan, pursuant to a voluntary reorganization of ORBCOMM Japan in accordance with the rehabilitation plan approved by the Tokyo district court on December 25, 2007.

The fair value of the consideration we received for settlement of claims against ORBCOMM Japan exceeded the \$0.4 million carrying value of current and long-term receivables from ORBCOMM Japan by \$0.9 million and we recognized a gain for the same amount. The estimated fair value of our equity interest in ORBCOMM Japan in the amount of \$0.6 million has been recorded in investment in affiliates at March 31, 2008.

Other income (expense)

Other income is comprised primarily of interest income from our cash and cash equivalents, which consists of U.S. Treasuries, interest bearing instruments, including commercial paper, and our investments in investment grade floating rate redeemable municipal debt securities classified as available-for-sale marketable securities, foreign exchange gains and interest expense.

Other income was \$0.8 million for the three months ended March 31, 2008 compared to \$1.3 million for the three months ended March 31, 2007. This decrease was primarily due to lower interest rates from investing in low risk U.S. Treasury securities during the three months ended March 31, 2008 compared to higher interest rates from investing in investment grade floating rate redeemable municipal debt securities during the three months ended March 31, 2007. We expect that interest income will continue to decrease in future periods as cash is used for our capital expenditures, working capital purposes and to fund operating losses.

Net loss and net loss applicable to common shares

As a result of the items described above, our net loss narrowed to \$0.5 million for the three months ended March 31, 2008, compared to a net loss of \$2.4 million for the three months ended March 31, 2007, decreasing by \$1.8 million, an improvement of 81.8%.

Liquidity and Capital Resources

Overview

Our liquidity requirements arise from our working capital needs and to fund capital expenditures to support our current operations, and facilitate growth and expansion. Since our inception, we have financed our operations from sales of our common stock through public offerings and private placements of debt, convertible redeemable preferred stock, membership interests and common stock. We have incurred losses from operations since inception, including a net loss of \$0.5 million for the three months ended March 31, 2008 and as of March 31, 2008 we have an accumulated deficit of approximately \$64.0 million. As of March 31, 2008, our primary source of liquidity consisted of cash and cash equivalents including U.S. Treasury securities totaling \$114.0 million.

Operating activities

Cash provided by our operating activities for the three months ended March 31, 2008 was \$0.1 million resulting from a net loss of \$0.5 million, offset by adjustments for non-cash items of \$0.7 million. Adjustments for non-cash items primarily consisted of \$0.6 million for depreciation and amortization and \$0.8 million for stock-based compensation, offset by decreases of \$0.2 million in the allowance for doubtful accounts and a \$0.6 million non-cash gain related to the 37% interest we received in ORBCOMM Japan in March 2008.

Cash provided by in our operating activities for the three months ended March 31, 2007 was \$0.7 million resulting from a net loss of \$2.9 million offset by adjustments for non-cash items of \$2.5 million, and \$1.1 million of cash generated from working capital. Adjustments for non-cash items primarily consisted of \$0.5 million for depreciation and amortization and \$1.9 million for stock-based compensation. Working capital activities primarily consisted of a

net source of cash of \$1.4 million for a decrease to inventories primarily related to better inventory management, offset by a use of cash of \$0.5 million for an increase in prepaid expense and other current assets primarily related to deferred costs incurred in connection with a secondary public offering of our common stock completed in May 2007.

Investing activities

Cash used in our investing activities for the three months ended March 31, 2008 was \$1.5 million, resulting from capital expenditures of \$0.6 million for the quick-launch and next generation satellites and \$0.9 million of improvements to our internal infrastructure and ground segment.

Cash used in our investing activities for the three months ended March 31, 2007 was \$15.3 million resulting from capital expenditures of \$3.0 million and purchases of marketable securities consisting of investment grade floating rate redeemable municipal debt securities totaling \$19.0 million offset by sales of marketable securities of \$6.8 million. Capital expenditures included \$2.2 million for the quick-launch and next-generation satellites and \$0.8 million of improvements to our internal infrastructure and ground segment.

Table of Contents

Financing activities

Cash provided by our financing activities for the three months ended March 31, 2008 was \$0.1 million resulting primarily from proceeds received from the exercise from the issuance of an aggregate of 54,974 shares of common stock upon the exercise of warrants to purchase common stock at per share exercise prices ranging from \$2.33 to \$4.26.

Cash used in our financing activities the three months ended March 31, 2007 was \$0.6 million, resulting from payments of invoices in 2007 related to offering costs incurred in connection with our initial public offering in November 2006.

Future Liquidity and Capital Resource Requirements

We expect cash flows from operating activities, along with our existing cash and cash equivalents will be sufficient to provide working capital and fund capital expenditures, which primarily includes the deployment of additional satellites for at least the next 12 months. For the remainder of 2008, we expect to incur approximately \$36 million of capital expenditures primarily for our quick-launch and next-generation satellites.

Contractual Obligations

Other than with respect to the contractual obligation discussed below there have been no material changes in our contractual obligations as of March 31, 2008, as previously disclosed in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading Contractual Obligations in our Annual Report on Form 10-K for the year ended December 31, 2007.

On May 5, 2008, we entered into a Procurement Agreement (the Agreement) with Sierra Nevada Corporation (SNC) pursuant to which SNC will construct eighteen low-earth-orbit satellites in three sets of six satellites (shipsets) for our next-generation satellites (the Initial Satellites). Under the Agreement, SNC will also provide launch support services, a test satellite (excluding the mechanical structure), a satellite software simulator and the associated ground support equipment. Under the Agreement, we may elect to use the launch option to be offered by SNC or it may contract separately with other providers for launch services and launch insurance for the satellites.

Under the Agreement, we have the option, exercisable at any time until the third anniversary of the execution of the Agreement, to order up to thirty additional satellites substantially identical to the Initial Satellites (the Optional Satellites).

The total contract price (for the initial Satellites) is \$117 million, subject to reduction upon failure to achieve certain in-orbit operational milestones with respect to the Initial Satellites or if the pre-ship reviews of each shipset are delayed more than 60 days after the specified time periods described below. We have agreed to pay SNC up to \$1.5 million in incentive payments for the successful operation of the Initial Satellites five years following the successful completion of in-orbit testing for the third shipset of six satellites. The price for the Optional Satellites ranges from \$5.0 million to \$7.7 million per satellite depending on the number of satellites ordered and the timing of the exercise of the option.

The Agreement also requires SNC to complete the pre-ship review of the Initial Satellites (i) no later than 24 months after the execution of the Agreement for the first shipset of six satellites, (ii) no later than 31 months after the execution of the Agreement for the second shipset of six satellites and (iii) no later than 36 months after the execution of the Agreement for the third shipset of six satellites. Payments under the Agreement will begin upon the execution of the Agreement and will extend into the second quarter of 2012, subject to SNC's successful completion of each payment milestone.

Under the Agreement, SNC has agreed to provide us with an optional secured credit facility for up to \$20,000 commencing twenty-four months after the execution of the Agreement and maturing forty four months after the effective date. If we elect to establish and use the credit facility we and SNC will enter into a formal credit facility on terms established in the Agreement.

Off-Balance Sheet Arrangements

We have no material off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K.

Recent accounting pronouncements

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), to define fair value, establish a framework for measuring fair value in accordance with generally accepted accounting principles

(GAAP) and expand disclosures about fair value measurements. SFAS 157 requires quantitative disclosures using a tabular format in all periods (interim and annual) and qualitative disclosures about the valuation techniques used to measure fair value in all annual periods. On January 1, 2008, we adopted SFAS 157, except with respect to our non-financial assets and liabilities, for which the effective date is January 1, 2009. The adoption of SFAS 157 for our financial assets and liabilities did not have a material impact on our consolidated financial statements. We also do not expect the adoption of SFAS 157 for our non-financial assets and liabilities to have a material impact on our financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 is effective for us on January 1, 2008. However, we did not elect the fair value option for any of our eligible financial instruments on the effective date.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (SFAS 160). SFAS 160 requires that a noncontrolling interest in a subsidiary be reported as equity and the amount of consolidated net income specifically attributable to the noncontrolling interest be identified in the consolidated financial statements. It also calls for consistency in the manner of reporting changes in the parent's ownership interest and requires fair value measurement of any noncontrolling equity investment retained in a deconsolidation. SFAS 160 is effective for us on January 1, 2009. We are currently evaluating the impact SFAS 160 will have on our consolidated financial statements.

In December 2007, the FASB issued No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R broadens the guidance of SFAS 141, extending its applicability to all transactions and other events in which one entity obtains control over one or more other businesses. It broadens the fair value measurement and recognition of assets acquired, liabilities assumed, and interests transferred as a result of business combinations. SFAS 141R expands on required disclosures to improve the statement users' abilities to evaluate the nature and financial effects of business combinations. SFAS 141R is effective for us on January 1, 2009. The impact of adopting SFAS 141R will be dependent on the business combinations that we may pursue after its effective date.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133* (SFAS 161). SFAS 161 requires expanded qualitative, quantitative and credit-risk disclosures of derivative instruments and hedging activities. These disclosures include more detailed information about gains and losses, location of derivative instruments in financial statements, and credit-risk-related contingent features in derivative instruments. SFAS 161 also clarifies that derivative instruments are subject to concentration of credit risk disclosures under SFAS No. 107, *Disclosure About Fair Value of Financial Instruments*, SFAS 161, which applies only to disclosures, is effective for us on January 1, 2009. We are currently evaluating the impact of SFAS 161 will have on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risks

There has been no material changes in our assessment of our sensitivity to market risk as of March 31, 2008, as previously disclosed in Part II, Item 7A Quantitative and Qualitative Disclosures about Market Risks in our Annual Report on Form 10-K for the year ended December 31, 2007.

Concentration of credit risk

During the three months ended March 31, 2008 and 2007, sales to GE, comprised 28.2% and 39.7% of our revenues, respectively.

Item 4. Disclosure Controls and Procedures

Evaluation of the Company's disclosure controls and procedures. The Company's management evaluated, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of March 31, 2008. Based on their evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of March 31, 2008.

Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

We discuss certain legal proceedings pending the Company in the notes to the condensed consolidated financial statements and refer you to that discussion for important information concerning those legal proceedings, including the basis for such actions and relief sought. See Note 14 to the condensed consolidated financial statements for this discussion.

Item 1A. Risk Factors

There have been no material changes in the risk factors as of March 31, 2008, as previously disclosed in Part I, Item 1A Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Use of Proceeds from Initial Public Offering

On November 2, 2006, the SEC declared effective our Registration Statement on Form S-1 (Registration No. 333-134088), relating to our initial public offering. After deducting underwriters' discounts and commissions and other offering costs, our net proceeds were approximately \$68.3 million. We intend to use the remaining net proceeds from our initial public offering to provide working capital and fund capital expenditures, primarily related to the deployment of additional satellites, which will be comprised of our quick-launch and next-generation satellites. As of March 31, 2008, we have used \$19.6 million for such purposes. Pending such uses, we are investing the net proceeds in short-term interest bearing cash equivalents.

Exercise of Warrants

During the three months ended March 31, 2008, we issued 54,974 shares of common stock upon the exercise of warrants at per share exercise prices ranging from \$2.33 to \$4.26. We received gross proceeds of \$0.1 million from the exercise of these warrants. In addition, we issued 21,019 shares of common stock upon the cash less exercise of warrants to purchase 41,717 common shares with per share exercise prices ranging from \$2.33 to \$4.26.
