DEL FRISCO'S RESTAURANT GROUP, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements—Unaudited

1. BUSINESS AND BASIS OF PRESENTATION

As of June 17, 2014, Del Frisco's Restaurant Group, Inc. (the "Company") owned and operated 41 restaurants under the concept names of Del Frisco's Double Eagle Steak House ("Del Frisco's"), Sullivan's Steakhouse ("Sullivan's"), and Del Frisco's Grille ("Grille"). Of the 41 restaurants the Company operated at the end of the period covered by this report, there were 10 Del Frisco's restaurants, 19 Sullivan's restaurants and 12 Grille restaurants in operation in 20 states throughout the United States of America. One new Grille location opened during the 24 weeks ended June 17, 2014 in Burlington, Massachusetts.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information. Accordingly, they do not include all the information and disclosures required by GAAP for complete financial statements. Operating results for the 12 and 24 weeks ended June 17, 2014 are not necessarily indicative of the results that may be expected for the fiscal year ending December 30, 2014. In the opinion of management, the unaudited condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation. These unaudited condensed consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes for the fiscal year ended December 31, 2013 included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013 filed with the SEC on February 28, 2014.

The Company operates on a 52- or 53-week fiscal year ending the last Tuesday in December. The fiscal quarters ended June 17, 2014 and June 11, 2013 each contained 12 weeks and are referred to herein as the second quarter of fiscal year 2014 and the second quarter of fiscal year 2013, respectively. Fiscal year 2014 will be a 52-week fiscal year and fiscal year 2013 was a 53-week fiscal year.

2. PUBLIC OFFERINGS

On March 7, 2013, a secondary public offering of the Company's common stock was completed by the Company's former principal stockholder, LSF5 Holdings, LLC ("Wagon" and, together with its affiliates and associates, excluding the Company and other companies that it or they own as a result of their investment activities, "Lone Star Fund"). The selling shareholder sold 4,750,000 previously outstanding shares. In addition, on April 10, 2013, the shareholder sold an additional 150,000 shares of common stock to cover over-allotments related to the March 7, 2013 offering. The Company did not receive any proceeds from the offering. The selling shareholder paid all of the underwriting discounts and commissions associated with the sale of the shares; however, the Company incurred \$0.4 million in costs and registration expenses related to this offering.

### 3. EARNINGS PER SHARE

Basic earnings per share ("EPS") data is computed based on the weighted average number of shares of common stock outstanding during the period. Diluted EPS data is computed based on the weighted average number of shares of common stock outstanding, including all potentially issuable shares of common stock. Diluted EPS for the 12 and 24 weeks ended June 17, 2014 excludes options to purchase 708,047 and 700,285 shares of common stock, which were outstanding during the periods, but were antidilutive. Diluted EPS for the 12 and 24 weeks ended June 11, 2013, excludes options to purchase 125,279 and 818,053 shares, which were outstanding during the period but were anti-dilutive.

(dollars in thousands, except per share data)

Table of Contents

## 4. STOCK-BASED EMPLOYEE COMPENSATION

## 2012 Long-Term Equity Incentive Plan

On July 16, 2012, the Company adopted the Del Frisco's Restaurant Group, Inc. 2012 Long-Term Equity Incentive Plan (the "2012 Plan"), which allows the Company to grant stock options, restricted stock, restricted stock units, deferred stock units and other equity-based awards to directors, officers, key employees and other key individuals performing services for the Company. The 2012 Plan provides for granting of options to purchase shares of common stock at an exercise price not less than the fair value of the stock on the date of grant. Options become exercisable at various periods ranging from one to four years from the date of grant. The 2012 Plan has 2,232,800 shares authorized for issuance under the plan. There were 1,481,900 shares of common stock issuable upon exercise of outstanding options at June 17, 2014 and 704,300 shares available for future grants.

The following table details the Company's total stock option compensation cost during the 12 and 24 weeks ended June 17, 2014 and June 11, 2013 as well as where the costs were expensed (in thousands):

	12 Weeks Ended		24 Weeks Ended	
	June 17, 2014	June 11, 2013	June 17, 2014	June 11, 2013
Restaurant operating expenses	\$ 101	\$ 49	\$ 199	\$ 91
General and administrative costs	480	189	955	375
Total stock compensation cost	\$ 581	\$ 238	\$ 1,154	\$ 466

The following table summarizes stock option activity during the 24 week period ended June 17, 2014:

24 Weeks Ended June 17, 2014				
	Shares	Weighted average exercise price	Weighted average Remaining Contractual Term	Aggregate Intrinsic Value (\$000's)
Outstanding at beginning of year	1,492,775	\$ 17.01		
Granted	24,000	27.06		
Exercised	(18,125)	13.74		
Forfeited	(16,750)	20.45		
Outstanding at end of period	1,481,900	\$ 17.18	8.6 years	13,447
Options exercisable at end of period	161,275	\$ 13.33	8.2 years	2,083

A summary of the status of non-vested shares as of June 17, 2014 and changes during the 24 weeks ended June 17, 2014 is presented below:

24 Weeks Ended June 17, 2014		
	Shares	Weighted average Grant-Date Fair Value
Non-vested shares at beginning of year	1,326,375	\$ 6.84
Granted	24,000	9.99
Vested	(13,000)	6.99
Forfeited	(16,750)	7.90
Non-vested shares at end of period	1,320,625	\$ 6.89

Table of Contents

As of June 17, 2014, there was \$6.8 million of total unrecognized compensation cost related to non-vested stock options. This cost is expected to be recognized over a period of approximately 2.7 years. The following table details the values from and assumptions for the Black-Scholes option pricing model for stock options issued during the 24 weeks ended June 17, 2014 and June 11, 2013:

	24 Weeks Ended June 17, 2014	24 Weeks Ended June 11, 2013
Weighted average grant date fair value	\$9.99	\$6.99
Weighted average risk-free interest rate	1.86%	0.99%
Weighted average expected life	5.40 years	6.25 years
Weighted average volatility	37.32%	42.31%
Expected dividend	—	—

The Black-Scholes option valuation model requires the input of highly subjective assumptions, including the expected life of the stock-based award. The assumptions above represent management's best estimates, but these estimates involve inherent uncertainties and the application of management's judgment. The expected term of options granted is based on a representative peer group with similar employee groups and expected behavior. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury constant maturities rate in effect at the time of grant. The Company utilized a weighted rate for expected volatility based on a representative peer group with a similar expected term of options granted. Outstanding options granted under the 2012 Plan are subject to a four year vesting period and have a ten year maximum contractual term.

In addition, the Company is required to estimate the expected forfeiture rate and only recognizes expense for those shares expected to vest. If the actual forfeiture rate is materially different from the Company's estimate, the share-based compensation expense could be materially different.

## 5. RELATED PARTY TRANSACTIONS

In connection with the March 2013 secondary public offering, certain executives of the Company earned transaction bonuses totaling approximately \$1.8 million. These bonuses were earned under letter agreements, as amended, with Wagon, in which certain executives of the Company were eligible to receive a transaction bonus upon the occurrence of eligible transactions. Wagon was responsible for funding any transaction bonuses under these agreements, including those paid in connection with the March 2013 secondary public offering. As these bonuses were contingent upon employment with the Company, the Company was required to record the expense of these bonuses and

recognize the funding by Wagon as additional paid in capital. The \$1.8 million related to the March 2013 secondary public offering was recorded as an expense to the Company and capital contribution by Wagon in the first quarter of fiscal 2013.

In July 2012, the Company entered into a Transition Services Agreement with an affiliate of Lone Star Fund to provide certain limited support services, including legal and risk management, until the Company could complete transition of these functions to internal or third-party resources. This agreement was terminated in July 2013. General and administrative expenses include charges of approximately \$7,000 and \$25,000 for these services for the 12 and 24 weeks ended June 11, 2013, primarily for legal services.

## 6. LONG-TERM DEBT

On October 15, 2012 the Company entered into a credit facility that provides for a three-year unsecured revolving credit facility of up to \$25.0 million. Borrowings under the credit facility bear interest at a rate of LIBOR plus 1.50%. The Company is required to pay a commitment fee equal to 0.25% per annum on the available but unused revolving credit facility. The credit facility is guaranteed by certain subsidiaries of the Company. The credit facility contains various financial covenants, including a maximum ratio of total indebtedness to EBITDA and minimum fixed charge coverage, both as defined in the credit agreement. The credit facility also contains covenants restricting certain corporate actions, including asset dispositions, acquisitions, the payment of dividends, the incurrence of indebtedness and providing financing or other transactions with affiliates. The Company was in compliance with all of the debt covenants as of June 17, 2014 and December 31, 2013.

As of June 17, 2014 and December 31, 2013, there were no outstanding borrowings on the Company's revolving credit facility. Under the revolving loan commitment, the Company had approximately \$24.1 million of borrowings available under its revolving credit facility, with \$861,000 in outstanding letters of credit commitments drawn on the facility.

## 7. INCOME TAXES

The effective income tax rate for the 12 and 24 weeks ended June 17, 2014 was 30.7% and 31.7%, respectively, compared to an effective income tax rate of 35.9% and 32.2%, respectively, for the 12 and 24 weeks ended June 11, 2013. The factors that cause the effective tax rates to vary from the federal statutory rate of 35% include the impact of FICA tip and other credits, partially offset by state income taxes and certain non-deductible expenses. In the second quarter of fiscal 2013, the Company determined that a deferred tax asset of \$0.5 million recorded in the fourth quarter of fiscal 2012 relating to local income tax net operating loss carryforwards was not realizable, as the related net operating losses originated in years from which the carryforward period had expired. The Company corrected the deferred tax asset

Table of Contents

account resulting in a non-cash \$0.5 million cumulative adjustment to record additional income tax expense in the second quarter of fiscal 2013, which increased the effective income tax rate for the 12 and 24 weeks ended June 11, 2013. The adjustment did not impact historical cash flows and will not impact the timing of future income tax payments. Prior years' financial statements were not restated as the impact of these issues was immaterial to previously reported results for any individual prior year and 2012.

## 8. FAIR VALUE MEASUREMENT

Under GAAP, the Company is required to measure certain assets and liabilities at fair value, or to disclose the fair value of certain assets and liabilities recorded at cost. Pursuant to these fair value measurement and disclosure requirements, fair value is defined as the price that would be received upon sale of an asset or paid upon transfer of a liability in an orderly transaction between market participants at the measurement date and in the principal or most advantageous market for that asset or liability. The fair value is calculated based on assumptions that market participants would use in pricing the asset or liability, not on assumptions specific to the entity. In addition, the fair value of liabilities includes consideration of non-performance risk, including the Company's own credit risk. Each fair value measurement is reported in one of the following three levels:

Level 1—valuation inputs are based upon unadjusted quoted prices for identical instruments traded in active markets.

Level 2—valuation inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3—valuation inputs are unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models, and similar techniques.

The following table presents our financial assets and liabilities measured at fair value on a recurring basis at June 17, 2014 and December 31, 2013, respectively (in thousands):

Fair Value Measurements	
June 17, 2014	December 31, 2013

Edgar Filing: Del Frisco's Restaurant Group, Inc. - Form 10-Q

Deferred compensation plan investments	2	\$ 12,000	\$ 10,754
Deferred compensation plan liabilities (included in Other liabilities)	2	\$ (12,414)	\$ (11,022)

There were no transfers among levels within the fair-value hierarchy during the first two quarters of fiscal 2014 and fiscal 2013.

#### 9. SEGMENT REPORTING

The Company operates the Del Frisco's, Sullivan's, and Grille brands as operating segments. The restaurant concepts operate solely in the U.S. within the full-service dining industry, providing similar products to similar customers. Sales from external customers are derived principally from food and beverage sales, and the Company does not rely on any major customers as a source of sales. The restaurant concepts also possess similar economic characteristics, resulting in similar long-term expected financial performance characteristics. However, as Del Frisco's restaurants typically have higher revenues, driven by their larger physical presence and higher average check, the Del Frisco's, Sullivan's, and Grille operating segments have varying operating income and restaurant-level EBITDA margins due to the leveraging of higher revenues on certain fixed operating costs such as management labor, rent, utilities, and building maintenance.

# Table of Contents

The following tables present information about reportable segments for the 12 and 24 weeks ended June 17, 2014 and June 11, 2013 and as of June 17, 2014 and June 11, 2013, respectively (in thousands):

	12 Weeks Ended June 17, 2014

In addition to using consolidated results in evaluating the Company's performance and allocating its resources, the Company's chief operating decision maker uses restaurant-level EBITDA, which is not a measure defined by GAAP. The Company defines restaurant-level EBITDA as operating income before pre-opening costs, general and administrative costs, secondary public offering costs, public offering transaction bonuses, and depreciation and amortization. Pre-opening costs are excluded because they vary in timing and magnitude and are not related to the

health of ongoing operations. General and administrative costs are only included in the Company's consolidated financial results as they are generally not specifically identifiable to individual operating segments as these costs relate to supporting all of the restaurant operations of the Company and the extension of the Company's concepts into new markets. Public offering costs, transaction bonuses, and depreciation and amortization are excluded because they are not ongoing controllable cash expenses and they are not related to the health of ongoing operations. Property and equipment is the only balance sheet measure used by the Company's chief operating decision maker in allocating resources. See table below (in thousands) for a reconciliation of restaurant-level EBITDA to operating income from continuing operations.

	12 Weeks Ended		24 Weeks Ended

Table of Contents

10. COMMITMENTS AND CONTINGENCIES

The Company is subject to various claims, possible legal actions, and other matters arising out of the normal course of business. While it is not possible to predict the outcome of these issues, management is of the opinion that adequate provision for potential losses has been made in the accompanying condensed consolidated financial statements and that the ultimate resolution of these matters will not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Prior to the acquisition of Lone Star Steakhouse & Saloon, Inc. by Lone Star Fund, the Company's predecessor guaranteed certain lease payments of certain non-Company restaurants in connection with the leasing of real estate for restaurant locations. As of December 31, 2013 and June 17, 2014, the Company was responsible as guarantor for five of these leases of its former affiliates. The leases expire at various times through 2016. These guarantees will require payment by the Company only in an event of default by the former affiliate where it is unable to make the required lease payments. Management believes that the likelihood is remote that material payments will be required under these guarantees. At December 31, 2013 and June 17, 2014 the maximum potential amount of future lease payments the Company could be required to make as a result of the guarantees was approximately \$1.4 million and \$1.2 million, respectively.

At December 31, 2013 and June 17, 2014, the Company had outstanding letters of credit of \$976,000 and \$1,076,000, respectively, of which \$761,000 and \$861,000, respectively, were drawn on the Company's credit facility (see Note 6, Long-Term Debt ) and \$215,000 were collateralized by restricted cash. The letters of credit typically act as guarantee of payment to certain third parties in accordance with specified terms and conditions.

Cautionary Statement

Certain statements made or incorporated by reference in this report and our other filings with the Securities and Exchange Commission, in our press releases and in statements made by or with the approval of authorized personnel constitute forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and are subject to the safe harbor created thereby. Forward looking statements reflect intent, belief, current expectations, estimates or projections about, among other things, our industry, management's beliefs, and future events and financial trends affecting us. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," "may," "will" and variations of words or similar expressions are intended to identify forward looking statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances, including any underlying assumptions, are forward looking statements. Although we believe the expectations reflected in any forward looking statements are reasonable, such statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially and adversely from those expressed in any forward looking statements as a result of various factors. These differences can arise as a result of the risks described in the section entitled "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013, filed February 28, 2014, or the 2013 10-K, as well as other factors that may affect our business, results of operations, or financial condition. Forward looking statements in this report speak only as of the date hereof, and forward looking statements in documents incorporated by reference speak only as of the date of those documents. Unless otherwise required by law, we undertake no obligation to publicly update or revise these forward looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, we cannot assure you that the forward looking statements contained in this report will, in fact, transpire.

Overview

Del Frisco's Restaurant Group develops, owns and operates three contemporary, high-end, complementary restaurants: Del Frisco's Double Eagle Steak House, or Del Frisco's, Sullivan's Steakhouse, or Sullivan's, and Del Frisco's Grille, or the Grille. We currently operate 41 restaurants in 20 states. Of the 41 restaurants we operated as of the end of the period covered by this report, there were 10 Del Frisco's restaurants, 19 Sullivan's restaurants and 12 Grille restaurants. During the second fiscal quarter of 2014, we opened one new Grille location in Burlington, Massachusetts.

Unless the context otherwise indicates, all references to "we," "our," "us," or the "Company" refer to Del Frisco's Restaurant Group, Inc. and its subsidiaries.

Our Growth Strategies and Outlook. Our growth model is comprised of the following three primary drivers:

-

Pursue Disciplined Restaurant Growth. We believe that there are significant opportunities to grow our concepts on a nationwide basis in both existing and new markets where we believe we can generate attractive unit-level economics. We are presented with many development opportunities and we carefully evaluate each opportunity to determine that sites selected for development have a high probability of meeting our return on investment targets. Our disciplined growth strategy includes accepting only those sites that we believe present attractive rent and tenant allowance structures as well as reasonable construction costs given the sales potential of the site. We believe our concepts' complementary market positioning and ability to coexist in the same markets, coupled with our flexible unit models, will allow us to expand each of our three concepts into a greater number of locations.

- **Grow Existing Revenue.** We will continue to pursue opportunities to increase the sales at our existing restaurants, pursue targeted local marketing efforts and evaluate operational initiatives, including growth in private dining, designed to increase restaurant unit volumes.
- **Maintain Margins Throughout Our Growth.** We will continue to aggressively protect our margins using economies of scale, including marketing and purchasing synergies between our concepts and leveraging our corporate infrastructure as we continue to open new restaurants.

We believe there are opportunities to open five to seven restaurants annually, generally composed of one Del Frisco's and four to six Sullivan's and/or Grilles, with new openings of our Grille concept likely serving as the primary driver of new unit growth in the near term.

Table of Contents

Performance Indicators. We use the following key metrics in evaluating the performance of our restaurants:

- **Comparable Restaurant Sales.** We consider a restaurant to be comparable during the first full fiscal period following the eighteenth month of operations. Changes in comparable restaurant sales reflect changes in sales for the comparable group of restaurants over a specified period of time. Changes in comparable sales reflect changes in customer count trends as well as changes in average check. Our comparable restaurant base consisted of 29 and 33 restaurants at June 11, 2013 and June 17, 2014, respectively.
- **Average Check.** Average check is calculated by dividing total restaurant sales by customer counts for a given time period. Average check is influenced by menu prices and menu mix. Management uses this indicator to analyze trends in customers' preferences, the effectiveness of menu changes and price increases and per customer expenditures.
- **Average Unit Volume.** Average unit volume, or AUV, consists of the average sales of our restaurants over a certain period of time. This measure is calculated by dividing total restaurant sales within a period by the number of restaurants operating during the relevant period. This indicator assists management in measuring changes in customer traffic, pricing and development of our concepts.
- **Customer Counts.** Customer counts are measured by the number of entrées ordered at our restaurants over a given time period.
- **Restaurant-Level EBITDA Margin.** Restaurant-level EBITDA margin, a non-GAAP financial measure, represents net income before interest, taxes and depreciation and amortization plus the sum of certain non-operating expenses, including pre-opening costs, management fees and expenses, non-cash impairment charges, secondary public offering costs, public offering transaction bonuses and general and administrative expenses, as a percentage of our revenues. By monitoring and controlling our restaurant-level EBITDA margins, we can gauge the overall profitability of our core restaurant operations. See Note 9, Segment Reporting in the notes to our condensed consolidated financial statements for additional information on restaurant-level EBITDA.

Our business is subject to seasonal fluctuations. Historically, the percentage of our annual revenues earned during the first and fourth fiscal quarters has been higher due, in part, to increased gift card redemptions and increased private dining during the year-end holiday season, respectively. In addition, our first, second and third quarters each contain 12 operating weeks with the fourth quarter containing 16 or 17 operating weeks. As many of our operating expenses have a fixed component, our operating income and operating income margin have historically varied significantly from quarter to quarter. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year.

Revenues. Consolidated revenues increased \$7.0 million, or 11.6%, to \$67.4 million in the second quarter of fiscal 2014 from \$60.4 million in the second quarter of fiscal 2013. This increase was primarily driven by \$6.8 million in

incremental revenue from an additional 61 operating weeks provided by six new restaurants opened subsequent to the second quarter of fiscal 2013 and increased revenue at our comparable restaurants. These increases were partially offset by a decrease in revenue related to non-comparable restaurant sales.

Due to the inclusion of a 53rd week in fiscal 2013, there is a one-week calendar shift in the comparison of the second quarter of fiscal 2014, which ended June 17, 2014, to the second quarter of fiscal 2013, which ended June 11, 2013. As a result, our comparable restaurant sales calculation is based on comparing sales in the second quarter of fiscal 2014 to sales in the corresponding twelve week calendar period ended June 18, 2013. Comparable restaurant sales increased 2.2% for the second quarter of fiscal 2014 compared to the twelve week period ended June 18, 2013. The increase in comparable sales was driven by a 5.4% increase in average check partially offset by a 3.2% decrease in customer counts. Sales for the same restaurants in the second quarter of fiscal 2014 increased 2.3% compared to the second quarter of fiscal 2013.

Del Frisco's revenues increased \$1.3 million, or 3.8%, to \$33.9 million in the second quarter of fiscal 2014 from \$32.6 million in the second quarter of fiscal 2013. Comparable restaurant sales increased 5.2% for the second quarter of fiscal 2014 compared to the twelve week period ended June 18, 2013. The increase in comparable sales was driven by a 3.3% increase in average check as well as a 1.9% increase in customer counts. Sales for the same restaurants in the second quarter of fiscal 2014 increased 5.4% compared to the second quarter of fiscal 2013. The increases in comparable restaurant sales were partially offset by a decrease in revenue related to non-comparable restaurant sales.

Sullivan's revenues increased \$0.2 million, or 1.4%, to \$18.4 million in the second quarter of fiscal 2014 from \$18.2 million in the second quarter of fiscal 2013. Comparable restaurant sales increased 0.9% for the second quarter of fiscal 2014 compared to the twelve week period ended June 18, 2013. The increase in comparable sales was driven by a 5.9% increase in average check partially offset by a 5.0% decrease in customer counts.

Table of Contents

Sales for the same restaurants in the second quarter of fiscal 2014 increased 0.7% compared to the second quarter of fiscal 2013. The increase in average check and offsetting reduced customer counts were impacted by a shift in mix associated with the removal of certain bar entrees.

Grille revenues increased \$5.5 million, or 57.9%, to \$15.1 million in the second quarter of fiscal 2014 from \$9.6 million in the second quarter of fiscal 2013. This increase was primarily driven by incremental revenue from an additional 61 operating weeks provided by six new restaurants opened subsequent to the second quarter of fiscal 2013. These increases were partially offset by a decrease in revenue related to non-comparable restaurant sales.

Cost of Sales. Consolidated cost of sales increased \$2.2 million, or 12.0%, to \$20.3 million in the second quarter of fiscal 2014 from \$18.1 million in the second quarter of fiscal 2013. This increase was primarily due to an additional 61 operating weeks provided by the opening of six restaurants subsequent to the second quarter of fiscal 2013. As a percentage of consolidated revenues, consolidated cost of sales increased to 30.1% during the second quarter of fiscal 2014 from 30.0% in the second quarter of fiscal 2013.

As a percentage of revenues, Del Frisco's cost of sales increased to 31.1% during the second quarter of fiscal 2014 from 30.0% in the second quarter of fiscal 2013. This increase in cost of sales, as a percentage of revenues, was primarily due to higher beef and seafood costs partially offset by menu price increases implemented in the fourth quarter of fiscal 2013.

As a percentage of revenues, Sullivan's cost of sales decreased to 30.4% during the second quarter of fiscal 2014 from 31.1% in the second quarter of fiscal 2013. This decrease in cost of sales, as a percentage of revenues, was primarily due to lower liquor and wine costs as well as menu price increases implemented in the fourth quarter of fiscal 2013 and a shift in menu mix to more profitable items, partially offset by higher beef costs.

As a percentage of revenues, Grille cost of sales decreased to 27.5% during the second quarter of fiscal 2014 from 28.0% in the second quarter of fiscal 2013. This decrease in cost of sales, as a percentage of revenues, was primarily due to lower new opening inefficiencies.

Restaurant Operating Expenses. Consolidated restaurant operating expenses increased \$3.1 million, or 11.6%, to \$30.0 million in the second quarter of fiscal 2014 from \$26.9 million in the second quarter of fiscal 2013. This increase was primarily due to an additional 61 operating weeks in the second quarter of fiscal 2014 as compared to the second quarter of fiscal 2013 from the opening of six restaurants subsequent to the second quarter of fiscal 2013. As a percentage of consolidated revenues, consolidated restaurant operating expenses remained consistent at 44.6% in the second quarter of fiscal 2014 compared to the second quarter of fiscal 2013.

As a percentage of revenues, Del Frisco's restaurant operating expenses decreased to 37.9% during the second quarter of fiscal 2014 from 38.9% during the second quarter of fiscal 2013. This decrease in restaurant operating expenses, as a percentage of revenues, was primarily due to lower labor and benefits costs and lower restaurant operating expenses related to the leveraging effect of certain fixed and semi-variable costs in relation to increased revenue.

As a percentage of revenues, Sullivan's restaurant operating expenses decreased to 50.5% during the second quarter of fiscal 2014 from 51.6% in the second quarter of fiscal 2013. This decrease in restaurant operating expenses, as a percentage of revenues, was due to lower occupancy and other restaurant operating expenses related to the leveraging effect of certain fixed and semi-variable costs in relation to increased revenue, partially offset by higher direct labor

and benefits costs.

As a percentage of revenues, Grille restaurant operating expenses increased to 52.4% during the second quarter of fiscal 2014 from 50.5% in the second quarter of fiscal 2013. This increase in restaurant operating expenses, as a percentage of revenues, was primarily due to higher direct labor and benefits costs due to opening inefficiencies from restaurants opened in the fourth quarter of fiscal 2013 as well as higher occupancy costs.

**Marketing and Advertising Costs.** Consolidated marketing and advertising costs increased \$0.1 million, or 2.9%, to \$1.4 million in the second quarter of fiscal 2014 from \$1.3 million in the second quarter of fiscal 2013. As a percentage of consolidated revenues, consolidated marketing and advertising costs decreased to 2.0% in the second quarter of fiscal 2014 from 2.2% in the second quarter of fiscal 2013.

As a percentage of revenues, Del Frisco's marketing and advertising costs increased to 1.8% during the second quarter of fiscal 2014 from 1.7% in the second quarter of fiscal 2013. Marketing and advertising costs, as a percentage of revenues, increased primarily due to higher outside promotions and direct mail marketing, which were partially offset by lower print media spending.

As a percentage of revenues, Sullivan's marketing and advertising costs remained consistent at 3.1% during the second quarter of fiscal 2014 compared to the second quarter of fiscal 2013, which was the result of higher broadcast advertising and direct mail marketing, fully offset by lower outside promotions costs.

As a percentage of revenues, Grille marketing and advertising costs decreased to 1.5% during the second quarter of fiscal 2014 compared to 2.3% in the second quarter of fiscal 2013. The decrease in marketing and advertising costs, as a percentage of revenues, was primarily due to lower outside promotions and print media spending.

**Pre-opening Costs.** Pre-opening costs increased by \$0.6 million to \$0.9 million in the second quarter of fiscal 2014 from \$0.3 million in the second quarter of fiscal 2013 due to there being one Grille opening in the second quarter of 2014, while there were no openings in the second quarter of 2013. Pre-opening costs include non-cash straight line rent, which is incurred during construction and can precede a restaurant opening by four to six months.

Table of Contents

**General and Administrative Costs.** General and administrative costs increased \$0.6 million, or 16.4%, to \$4.8 million in the second quarter of fiscal 2014 from \$4.2 million in the second quarter of fiscal 2013. This increase was primarily related to additional costs related to growth in the number of corporate and regional management-level personnel to support recent and anticipated growth. In addition, we incurred approximately \$0.3 million in additional stock compensation expense in the second quarter of fiscal 2014 over the second quarter of fiscal 2013. As a percentage of revenues, general and administrative costs increased to 7.2% in the second quarter of fiscal 2014 from 6.9% in the second quarter of fiscal 2013. General and administrative costs are expected to continue to increase as a result of costs related to our anticipated growth, including further investments in our infrastructure. As we are able to leverage these investments made in our people and systems, we expect these expenses to decrease as a percentage of total revenues over time.

**Depreciation and Amortization.** Depreciation and amortization increased \$0.4 million, or 17.0%, to \$3.0 million in the second quarter of fiscal 2014 from \$2.6 million in the second quarter of fiscal 2013. The increase in depreciation and amortization expense primarily resulted from new assets placed in service during 2013 and upon the opening of the six new restaurants opened subsequent to the second quarter of fiscal 2013 as well as for existing restaurants that were remodeled during 2013 and the first two quarters of fiscal 2014.

**Income Tax Expense.** The effective income tax rate for the second quarter of fiscal 2014 was 30.7% compared to an effective income tax rate of 35.9% for the second quarter of fiscal 2013. The factors that cause the effective tax rates to vary from the federal statutory rate of 35% include the impact of FICA tip and other credits, partially offset by state income taxes and certain non-deductible expenses. In the second quarter of fiscal 2013, the Company determined that a deferred tax asset of \$0.5 million recorded in the fourth quarter of fiscal 2012 relating to local income tax net operating loss carryforwards was not realizable, as the related net operating losses originated in years from which the carryforward period had expired. The Company corrected the deferred tax asset account resulting in a non-cash \$0.5 million cumulative adjustment to record additional income tax expense in the second quarter of fiscal 2013, which increased the effective income tax rate for the second quarter of fiscal 2013. The adjustment did not impact historical cash flows and will not impact the timing of future income tax payments. Prior years' financial statements were not restated as the impact of these issues was immaterial to previously reported results for any individual prior year and 2012.

Revenues. Consolidated revenues increased \$13.8 million, or 11.5%, to \$134.0 million in the first two quarters of fiscal 2014 from \$120.2 million in the first two quarters of fiscal 2013. This increase was primarily driven by \$15.1 million in incremental revenue from an additional 132 operating weeks provided by the one restaurant opened during and the six restaurants opened subsequent to the first two quarters of fiscal 2013 and increased revenue at our comparable restaurants. These increases were partially offset by a decrease in revenue related to non-comparable restaurant sales. During the first quarter of fiscal 2014, revenues were also negatively impacted by 32 lost restaurant operating days resulting from severe weather.

Due to the inclusion of a 53rd week in fiscal 2013, there is a one-week calendar shift in the comparison of the first two quarters of fiscal 2014, which ended June 17, 2014, to the first two quarters of fiscal 2013, which ended June 11, 2013. As a result, our comparable restaurant sales calculation is based on comparing sales in the first two quarters of fiscal 2014 to sales in the corresponding twenty-four week calendar period ended June 18, 2013. Comparable restaurant sales increased 1.9% for the first two quarters of fiscal 2014 compared to the twenty-four week period ended June 18, 2013. The increase in comparable sales was driven by a 5.2% increase in average check partially offset by a 3.3% decrease in customer counts. Sales for the same restaurants in the first two quarters of fiscal 2014 increased 1.6% compared to the first two quarters of fiscal 2013.

Del Frisco's revenues increased \$1.5 million, or 2.4%, to \$66.4 million in the first two quarters of fiscal 2014 from \$64.9 million in the first two quarters of fiscal 2013. Comparable restaurant sales increased 5.2% for the first two quarters of fiscal 2014 compared to the twenty-four week

Table of Contents

period ended June 18, 2013. The increase in comparable sales was driven by a 4.3% increase in average check as well as a 0.9% increase in customer counts. Sales for the same restaurants in the first two quarters of fiscal 2014 increased 5.4% compared to the first two quarters of fiscal 2013. The increases in comparable restaurant sales were partially offset by a decrease in revenue related to non-comparable restaurant sales. During the first quarter of fiscal 2014, Del Frisco's revenues were negatively impacted by approximately 6 lost restaurant operating days resulting from severe weather.

Sullivan's revenues decreased \$0.6 million, or 1.6%, to \$37.5 million in the first two quarters of fiscal 2014 from \$38.1 million in the first two quarters of fiscal 2013. Comparable restaurant sales decreased 0.6% for the first two quarters of fiscal 2014 compared to the twenty-four week period ended June 18, 2013. The decrease in comparable sales was driven by a 4.7% decrease in customer counts partially offset by a 4.1% increase in average check. Sales for the same restaurants in the first two quarters of fiscal 2014 decreased 2.0% compared to the first two quarters of fiscal 2013. The increase in average check and offsetting reduced customer counts were impacted by a shift in mix associated with the removal of certain bar entrees. During the first two quarters of fiscal 2014, Sullivan's revenues were negatively impacted by approximately 21 lost restaurant operating days resulting from severe weather.

Grille revenues increased \$12.9 million, or 75.4%, to \$30.1 million in the first two quarters of fiscal 2014 from \$17.2 million in the first two quarters of fiscal 2013. This increase was primarily driven by incremental revenue from an additional 132 operating weeks provided by the one restaurant opened during and the six restaurants opened subsequent to the first two quarters of fiscal 2013. These increases were partially offset by a decrease in revenue related to non-comparable restaurant sales.

Cost of Sales. Consolidated cost of sales increased \$3.8 million, or 10.4%, to \$40.3 million in the first two quarters of fiscal 2014 from \$36.5 million in the first two quarters of fiscal 2013. This increase was primarily due to an additional 132 operating weeks provided by the opening of one restaurant during and six restaurants subsequent to the first two quarters of fiscal 2013. As a percentage of consolidated revenues, consolidated cost of sales decreased to 30.1% during the first two quarters of fiscal 2014 from 30.4% in the first two quarters of fiscal 2013. This decrease was impacted by a blended menu price increase of 1.8% implemented in the fourth quarter of fiscal 2013.

As a percentage of revenues, Del Frisco's cost of sales increased to 31.0% during the first two quarters of fiscal 2014 from 30.7% in the first two quarters of fiscal 2013. This increase in cost of sales, as a percentage of revenues, was primarily due to higher beef and seafood costs partially offset by menu price increases implemented in the fourth quarter of fiscal 2013.

As a percentage of revenues, Sullivan's cost of sales decreased to 30.2% during the first two quarters of fiscal 2014 from 30.9% in the first two quarters of fiscal 2013. This decrease in cost of sales, as a percentage of revenues, was primarily due to menu price increases implemented in the fourth quarter of fiscal 2013 as well as a shift in menu mix to more profitable items, partially offset by higher beef costs.

As a percentage of revenues, Grille cost of sales decreased to 27.9% during the first two quarters of fiscal 2014 from 28.0% in the first two quarters of fiscal 2013. This decrease in cost of sales, as a percentage of revenues, was primarily due to lower new opening inefficiencies from restaurants opened in the fourth quarter of fiscal 2013.

Restaurant Operating Expenses. Consolidated restaurant operating expenses increased \$7.1 million, or 13.4%, to \$60.6 million in the first two quarters of fiscal 2014 from \$53.5 million in the first two quarters of fiscal 2013. This increase was primarily due to an additional 132 operating weeks in the first two quarters of fiscal 2014 as compared to the first two quarters of fiscal 2013 from the opening of one restaurant during and six restaurants subsequent to the first two

quarters of fiscal 2013. As a percentage of consolidated revenues, consolidated restaurant operating expenses increased to 45.2% in the first two quarters of fiscal 2014 from 44.5% in the first quarter of fiscal 2013.

As a percentage of revenues, Del Frisco's restaurant operating expenses decreased to 38.6% during the first two quarters of fiscal 2014 from 39.5% during the first two quarters of fiscal 2013. This decrease in restaurant operating expenses was primarily due to lower direct labor and benefits costs, partially offset by slightly higher occupancy costs. These decreases were primarily related to the leveraging effect of certain fixed and semi-variable costs in relation to increased revenue.

As a percentage of revenues, Sullivan's restaurant operating expenses increased to 50.7% during the first two quarters of fiscal 2014 from 50.2% in the first two quarters of fiscal 2013. This increase in restaurant operating expenses, as a percentage of revenues, was due to higher direct labor and benefits costs partially offset by lower occupancy and other restaurant operating costs. These increases were primarily related to the de-leveraging effect of certain fixed and semi-variable costs in relation to reduced revenue.

As a percentage of revenues, Grille restaurant operating expenses increased to 53.2% during the first two quarters of fiscal 2014 from 50.5% in the first two quarters of fiscal 2013. This increase in restaurant operating expenses, as a percentage of revenues, was primarily due to higher direct labor and benefits costs, occupancy costs and restaurant operating costs due to new opening inefficiencies from restaurants opened in the fourth quarter of fiscal 2013.

**Marketing and Advertising Costs.** Consolidated marketing and advertising costs increased \$0.3 million, or 15.6%, to \$2.6 million in the first two quarters of fiscal 2014 from \$2.3 million in the first two quarters of fiscal 2013. As a percentage of consolidated revenues, consolidated marketing and advertising costs increased to 2.0% in the first two quarters of fiscal 2014 from 1.9% in the first two quarters of fiscal 2013.

Table of Contents

As a percentage of revenues, Del Frisco's marketing and advertising costs increased to 1.6% during the first two quarters of fiscal 2014 from 1.5% in the first two quarters of fiscal 2013. Marketing and advertising costs, as a percentage of revenues, increased primarily due to higher outside promotions and direct mail marketing, which were partially offset by lower broadcast advertising spending.

As a percentage of revenues, Sullivan's marketing and advertising costs increased to 2.8% during the first two quarters of fiscal 2014 from 2.6% in the first two quarters of fiscal 2013, which was the result of higher broadcast advertising, outside promotions costs and direct mail marketing. These costs were also impacted by the de-leveraging effect of certain fixed costs in relation to reduced revenue.

As a percentage of revenues, Grille marketing and advertising costs decreased to 1.6% during the first two quarters of fiscal 2014 compared to 1.9% in the first two quarters of fiscal 2013. The decrease in marketing and advertising costs, as a percentage of revenues, was primarily due to lower outdoor advertising and print media spending partially offset by higher direct mail marketing.

**Pre-opening Costs.** Pre-opening costs increased by \$0.4 million to \$1.3 million in the first two quarters of fiscal 2014 from \$0.9 million in the first two quarters of fiscal 2013 primarily due to non-cash preopening rent related to a new Del Frisco's opening in the summer of 2014. Pre-opening costs include non-cash straight line rent, which is incurred during construction and can precede a restaurant opening by four to six months.

**General and Administrative Costs.** General and administrative costs increased \$1.6 million, or 20.1%, to \$9.5 million in the first two quarters of fiscal 2014 from \$7.9 million in the first two quarters of fiscal 2013. This increase was primarily related to additional costs related to growth in the number of corporate and regional management-level personnel to support recent and anticipated growth. In addition, we incurred approximately \$0.7 million in additional stock compensation expense in the first two quarters of fiscal 2014 over the first two quarters of fiscal 2013. As a percentage of revenues, general and administrative costs increased to 7.1% in the first two quarters of fiscal 2014 from 6.6% in the first two quarters of fiscal 2013. General and administrative costs are expected to continue to increase as a result of costs related to our anticipated growth, including further investments in our infrastructure. As we are able to leverage these investments made in our people and systems, we expect these expenses to decrease as a percentage of total revenues over time.

**Secondary Public Offering Costs.** In conjunction with the secondary public offering in the first quarter of fiscal 2013, we incurred \$0.4 million in legal, accounting, printing, and registration expenses.

**Public Offering Transaction Bonuses.** Under a letter agreement, as amended, with LSF5 Wagon Holdings, LLC, or Wagon, an affiliate of Lone Star Fund, and our former principal stockholder, certain executives of the Company were eligible to receive a transaction bonus upon the occurrence of an eligible transaction. Wagon was responsible to fund the transaction bonus. As this bonus was contingent upon employment with the Company, the Company was required to record the expense of these bonuses and recognize the funding by Wagon as additional paid in capital. Associated with the March 2013 secondary public offering, the Company recorded \$1.8 million in transaction bonuses under the transaction bonus agreements.

**Depreciation and Amortization.** Depreciation and amortization increased \$1.0 million, or 19.0%, to \$6.0 million in the first two quarters of fiscal 2014 from \$5.0 million in the first two quarters of fiscal 2013. The increase in depreciation and amortization expense primarily resulted from new assets placed in service during 2013 and 2014 upon the opening of the one restaurant during and six restaurants subsequent to the first two quarters of fiscal 2013 as well as for existing restaurants that were remodeled during 2013 and the first two quarters of fiscal 2014.

**Income Tax Expense.** The effective income tax rate for the first two quarters of fiscal 2014 was 31.7% compared to an effective income tax rate of 32.2% for the first two quarters of fiscal 2013. The factors that cause the effective tax rates to vary from the federal statutory rate of 35% include the impact of FICA tip and other credits, partially offset by state income taxes and certain non-deductible expenses. In the second quarter of fiscal 2013, the Company determined that a deferred tax asset of \$0.5 million recorded in the fourth quarter of fiscal 2012 relating to local income tax net operating loss carryforwards was not realizable, as the related net operating losses originated in years from which the carryforward period had expired. The Company corrected the deferred tax asset account resulting in a non-cash \$0.5 million cumulative adjustment to record additional income tax expense in the second quarter of fiscal 2013, which increased the effective income tax rate for the first two quarters of fiscal 2013. The adjustment did not impact historical cash flows and will not impact the timing of future income tax payments. Prior years' financial statements were not restated as the impact of these issues was immaterial to previously reported results for any individual prior year and 2012.

Table of Contents

## Liquidity and Capital Resources

Our principal liquidity requirements are our lease obligations and capital expenditure needs. We expect to finance our operations for at least the next several years, including costs of opening currently planned new restaurants, through cash provided by operations and borrowings available under our credit facility. We cannot be sure that these sources will be sufficient to finance our operations, and we may seek additional financing in the future. As of June 17, 2014, we had cash and cash equivalents of approximately \$12.0 million.

Our operations have not required significant working capital and, like many restaurant companies, we may at times have negative working capital. Revenues are received primarily in cash or by credit card, and restaurant operations do not require significant receivables or inventories, other than our wine inventory. In addition, we receive trade credit for the purchase of food, beverages and supplies, thereby reducing the need for incremental working capital to support growth.

The following table presents a summary of our cash flows for the 24 weeks ended June 17, 2014 and June 11, 2013 (in thousands):

	24 Weeks Ended	
	June 17, 2014	June 11, 2013
Net cash provided by operating activities	\$ 17,421	\$ 12,151
Net cash used in investing activities	(16,652)	(10,250)
Net cash (used in) provided by financing activities	(2,393)	1,779
Net (decrease) increase in cash and cash equivalents	\$ (1,624)	\$ 3,680

**Operating Activities.** Net cash flows provided by operating activities increased \$5.3 million during the 24 weeks ended June 17, 2014 as compared to the 24 weeks ended June 11, 2013, primarily due to a \$4.3 million increase in cash related to the timing of payables, a \$1.5 million increase in cash related to an increase in other liabilities, a \$1.3 million increase in net income, a \$1 million increase in depreciation and amortization and a \$0.7 million increase in equity based compensation, partially offset by a \$4.1 million decrease in deferred income taxes.

**Investing Activities.** Net cash used in investing activities for the 24 weeks ended June 17, 2014 was \$16.7 million, consisting primarily of purchases of property and equipment. These purchases primarily related to construction of one Grille restaurant opened during the second quarter of 2014 and two Grille restaurants and one Del Frisco's in progress at the end of the period and remodel activity of existing restaurants. Net cash used in investing activities for the 24 weeks ended June 11, 2013 was \$10.3 million, consisting primarily of purchases of property and equipment. These purchases primarily related to construction of one Grille restaurant opened during the first quarter of fiscal 2013, one Grille restaurant that opened in the summer of fiscal 2013, and remodel activity of existing restaurants.

**Financing Activities.** Net cash used in financing activities for the 24 weeks ended June 17, 2014 was \$2.4 million, which was comprised of \$2.7 million in treasury stock purchases partially offset by \$0.3 million in proceeds from the exercise of stock options. Net cash provided by financing activities for the 24 weeks ended June 11, 2013 was \$1.8 million, which was comprised solely of the contribution by Wagon to pay the transaction bonuses related to the secondary public offering that occurred in March of 2013.

**Capital Expenditures.** We typically target an average cash investment of approximately \$7.0 million to \$9.0 million per restaurant for a Del Frisco's restaurant and \$3.0 million to \$4.5 million for a Sullivan's or a Grille, in each case net of landlord contributions and equipment financing and including pre-opening costs. In addition, we are currently "refreshing" a number of our Sullivan's and Del Frisco's locations. These capital expenditures will primarily be funded by cash flows from operations and, if necessary, by the use of our credit facility, depending upon the timing of expenditures.

**Credit Facility.** On October 15, 2012, we entered into a credit facility that provides for a three-year unsecured revolving credit facility of up to \$25.0 million. Borrowings under the credit facility bear interest at a rate of LIBOR plus 1.50%. We are required to pay a commitment fee equal to 0.25% per annum on the available but unused revolving loan facility. The credit facility is guaranteed by certain of our subsidiaries. The credit facility contains various financial covenants, including a maximum ratio of total indebtedness to EBITDA (as defined in the credit facility), and minimum fixed charge coverage. Specifically, we are required to have a leverage ratio of less than 1.00 and a fixed charge coverage ratio of greater than 2.00. As of June 17, 2014, we were in compliance with each of these tests. The credit facility also contains covenants restricting certain corporate actions, including asset dispositions, acquisitions, the payment of dividends, the incurrence of indebtedness and providing financing or other transactions with affiliates. As of June 17, 2014 there were no outstanding borrowings under this facility.

We believe that net cash provided by operating activities and available borrowings under our credit facility will be sufficient to fund currently anticipated working capital, planned capital expenditures and debt service requirements for the next 24 months. We regularly review acquisitions and other strategic opportunities, which may require additional debt or equity financing.

**Common Stock Repurchase Program.** On October 9, 2013, the Company announced that the Board of Directors approved a common stock repurchase program. Under this program, the Company may from time to time purchase up to \$10 million of its outstanding common stock. The common stock repurchases will be made at the Company's discretion in the open market depending on share price, market conditions and other

## Table of Contents

factors. The common stock repurchase program does not obligate the Company to repurchase any dollar amount or number of shares. As of June 17, 2014, we had repurchased 300,000 shares of our common stock at a cost of \$6.4 million.

### Off-Balance Sheet Arrangements

Prior to the acquisition of Lone Star Steakhouse & Saloon, Inc. by Lone Star Fund, our predecessor guaranteed lease payments of certain non-Del Frisco's Restaurant Group restaurants in connection with the leasing of real estate for these locations. As of June 17, 2014, we continue to be a guarantor for five of these leases. The leases expire at various times through 2016. These guarantees would require payment by us only in an event of default by the non-Del Frisco's Restaurant Group tenant where it failed to make the required lease payments or perform other obligations under a lease. We believe that the likelihood is remote that material payments will be required under these guarantees. At June 17, 2014, the maximum potential amount of future lease payments we could be required to make as a result of the guarantees was \$1.2 million.

## SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Accounting Estimates

The preparation of the unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. We base our estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances at the time. Actual amounts may differ from those estimates.

There have been no material changes to the significant accounting policies from what was previously reported in our 2013 10-K.

### Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update, or ASU, 2014-09, Revenue from Contracts with Customers. This ASU is a comprehensive new revenue recognition model, which requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. This update is effective in fiscal periods beginning after December 15, 2016. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

In April 2014, the Financial Accounting Standards Board issued ASU, 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. This ASU raises the threshold for a disposal to qualify as a discontinued operation and requires new disclosures of both discontinued operations and certain other disposals that do not meet the definition of a discontinued operation. This update is effective in fiscal periods beginning after December 15, 2014. The adoption of this new guidance is not expected to have a significant impact on our consolidated financial statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to market risk from fluctuations in interest rates. For fixed rate debt, interest rate changes affect the fair market value of the debt but do not impact earnings or cash flows. Conversely for variable rate debt, including borrowings available under our credit facility, interest rate changes generally do not affect the fair market value of the debt, but do impact future earnings and cash flows, assuming other factors are held constant. Although we currently do not have any outstanding debt, holding other variables constant, a hypothetical immediate one percentage point change in interest rates would be expected to have an impact on pre-tax earnings and cash flows of approximately \$10,000 per \$1.0 million outstanding debt.

Commodity Price Risk

We are exposed to market price fluctuations in beef, seafood, produce and other food product prices. Given the historical volatility of beef, seafood, produce and other food product prices, these fluctuations can materially impact our food and beverage costs. While we have taken steps to qualify multiple suppliers who meet our standards as suppliers for our restaurants and enter into agreements with suppliers for some of the commodities used in our restaurant operations, there can be no assurance that future supplies and costs for such commodities will not fluctuate due to weather and other market conditions outside of our control. We are currently unable to contract for some of our commodities, such as fresh seafood and certain produce, for periods longer than one week. Consequently, such commodities can be subject to unforeseen supply and cost fluctuations. Dairy costs can also fluctuate due to government regulation. Because we typically set our menu prices in advance of our food product prices, our menu prices cannot immediately take into account changing costs of food items. To the extent that we are unable to pass the increased costs on to our customers through price increases, our results of operations would be adversely affected. We do not use financial instruments to hedge our risk to market price fluctuations in beef, seafood, produce and other food product prices at this time.

Inflation

Over the past five years, inflation has not significantly affected our operations. However, the impact of inflation on labor, food and occupancy costs could, in the future, significantly affect our operations. We pay many of our tipped employees hourly rates related to the applicable federal or state minimum wage. Food costs as a percentage of revenues have been somewhat stable due to procurement efficiencies and menu price adjustments, although no assurance can be made that our procurement will continue to be efficient or that we will be able to raise menu prices in the future. Costs for construction, taxes, repairs, maintenance and insurance all impact our occupancy costs. We believe that our current strategy, which is to seek to maintain operating margins through a combination of menu price increases, cost controls, careful evaluation of property and equipment needs, and efficient purchasing practices, has been an effective tool for dealing with inflation. There can be no assurance, however, that future inflationary or other cost pressure will be effectively offset by this strategy.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedure

We carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

The design of any system of control is based upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated objectives under all future events, no matter how remote, or that the degree of compliance with the policies or procedures may not deteriorate. Because of its inherent limitations, disclosure controls and procedures may not prevent or detect all misstatements. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

## PART II – Other Information

## ITEM 1. LEGAL PROCEEDINGS

We are subject to various claims and legal actions, including class actions, arising in the ordinary course of business from time to time, including claims related to food quality, personal injury, contract matters, health, wage and employment and other issues. None of these types of litigation, most of which are covered by insurance, has had a material effect on us, and as of the date of this report, we are not a party to any material pending legal proceedings and are not aware of any claims that we believe could have a materially adverse effect on our consolidated financial position, results of operations, or cash flows.

## ITEM 1A. RISK FACTORS

There have been no material changes from our risk factors as previously reported in our 2013 10-K.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On October 9, 2013, the Company announced that the Board of Directors approved a common stock repurchase program. Under this program, the Company may from time to time purchase up to \$10 million of its outstanding common stock. The common stock repurchases will be made at the Company's discretion in the open market depending on share price, market conditions and other factors. The common stock repurchase program does not obligate the Company to repurchase any dollar amount or number of shares. As of June 17, 2014, we had repurchased 300,000 shares of our common stock at a cost of \$6.4 million.

Common stock repurchase activity during the fiscal quarter ended June 17, 2014 was as follows:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value That May Yet Be Purchased Under the Plans or Programs
March 26 - April 22, 2014	—	\$ —	—	\$ 6,319,476
April 23 - May 20, 2014	103,500	\$ 26.10	103,500	\$ 3,618,267
May 21 - June 17, 2014	—	\$ —	—	\$ 3,618,267

Total	103,500	\$ 26.10	103,500	\$ 3,618,267
-------	---------	----------	---------	--------------
