SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended March 31, 2017

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the transition period from _____ to _____

Commission file number 001-36613

Middlefield Banc. Corp.

(Exact Name of Registrant as Specified in its Charter)

Ohio 34-1585111
State or Other Jurisdiction of I.R.S. Employer Identification No.
Incorporation or Organization

15985 East High Street, Middlefield, Ohio 44062-0035
Address of Principal Executive Offices Zip Code

Edgar Filing: MIDDLEFIELD BANC CORP - Form 10-Q

440-632-1666

Registrant's Telephone Number, Including Area Code

Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes **X** No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes **X** No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company **X**

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PRECEDING FIVE YEARS:

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No **X**

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class: Common Stock, without par value

Outstanding at May 15, 2017: 3,204,858

MIDDLEFIELD BANC CORP.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The consolidated financial statements of Middlefield Banc Corp. ("Company") include its bank subsidiary, The Middlefield Banking Company ("MBC"), and a nonbank asset resolution subsidiary, EMORECO, Inc. All significant inter-company items have been eliminated.

On January 12, 2017, the Company completed its acquisition of Liberty Bank, N.A. ("Liberty"), pursuant to a previously announced definitive merger agreement. Under the terms of the merger agreement, Liberty shareholders received \$37.96 in cash or 1.1934 shares of Middlefield's common stock in exchange for each share of Liberty common stock they owned immediately prior to the merger. Middlefield issued 544,610 shares of its common stock in the merger and the aggregate merger consideration was approximately \$42.2 million. Upon closing, Liberty was merged into MBC, and its three full-service bank offices, in Twinsburg, in northern Summit County, and in Beachwood and Solon in eastern Cuyahoga County, became offices of MBC. The systems integration of Liberty into MBC was completed in February.

The accompanying unaudited financial statements have been prepared in accordance with U.S. generally accepted accounting principles and the instructions for Form 10-Q and Article 10 of Regulation S-X. In management's opinion, the financial statements include all adjustments, consisting of normal recurring adjustments, that the Company considers necessary to fairly state the Company's financial position and the results of operations and cash flows. The consolidated balance sheet at December 31, 2016, has been derived from the audited financial statements at that date but does not include all of the necessary informational disclosures and footnotes as required by U.S. generally accepted accounting principles. The accompanying financial statements should be read in conjunction with the financial statements and notes thereto included with the Company's Form 10-K for the year ended December 31, 2016. The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

Recent Accounting Pronouncements –

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (a new revenue recognition standard). The Update's core principle is that a company will recognize revenue to depict the transfer of goods or

services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, this Update specifies the accounting for certain costs to obtain or fulfill a contract with a customer and expands disclosure requirements for revenue recognition. This Update is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Because the guidance does not apply to revenue associated with financial instruments, including loans and securities, we do not expect the new standard, or any of the amendments, to result in a material change from our current accounting for revenue because the majority of the Company's financial instruments are not within the scope of Topic 606. However, we do expect that the standard will result in new disclosure requirements, which are currently being evaluated.

In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers (Topic 606). The amendments in this Update defer the effective date of ASU 2014-09 for all entities by one year. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. All other entities should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2018, and interim reporting periods within annual reporting periods beginning after December 15, 2019. The Company is evaluating the effect of adopting this new accounting Update.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. This Update applies to all entities that hold financial assets or owe financial liabilities and is intended to provide more useful information on the recognition, measurement, presentation, and disclosure of financial instruments. Among other things, this Update (a) requires equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (b) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; (c) eliminates the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities; (d) eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (e) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (f) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and (g) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. For all other entities, including not-for-profit entities and employee benefit plans within the scope of Topics 960 through 965 on plan accounting, the amendments in this Update are effective for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019. All entities that are not public business entities may adopt the amendments in this Update earlier as of the fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The standard requires lessees to recognize the assets and liabilities that arise from leases on the balance sheet. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. A short-term lease is defined as one in which (a) the lease term is 12 months or less and (b) there is not an option to purchase the underlying asset that the lessee is reasonably certain to exercise. For short-term leases, lessees may elect to recognize lease payments over the lease term on a straight-line basis. For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2018, and interim periods within those years. For all other entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2019, and for interim periods within fiscal years beginning after December 15, 2020. The amendments should be applied at the beginning of the earliest period presented using a modified retrospective approach with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is currently assessing the practical expedients it may elect at adoption, but does not anticipate the amendments will have a significant impact on the financial statements. Based on the Company's preliminary analysis of its current portfolio, the impact to the Company's balance sheet is estimated to result in less than a 1 percent increase in assets and liabilities. The Company also anticipates additional disclosure to be provided at adoption.

In March 2016, the FASB issued ASU 2016-04, Liabilities – Extinguishments of Liabilities (Subtopic 405-20). The standard provides that liabilities related to the sale of prepaid stored-value products within the scope of this Update are financial liabilities. The amendments in the Update provide a narrow-scope exception to the guidance in Subtopic 405-20 to require that breakage for those liabilities be accounted for consistent with the breakage guidance in Topic 606. The amendments in this Update are effective for public business entities, certain not-for-profit entities, and certain employee benefit plans for financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. For all other entities, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019. Earlier application is permitted, including adoption in an interim period. This Update is not expected to have a significant impact on the Company's financial statements.

In March 2016, the FASB issued ASU 2016-05, Derivatives and Hedging (Topic 815). The amendments in this Update apply to all reporting entities for which there is a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under Topic 815. The standards in this Update clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815 does not, in and of itself, require designation of that hedging relationship provided that all other hedge accounting criteria continue to be met. For public business entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. For all other entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within fiscal years beginning after December 15, 2018. An entity has an option to apply the amendments in this Update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In March 2016, the FASB issued ASU 2016-06, Derivatives and Hedging (Topic 815). The amendments apply to all entities that are issuers of or investors in debt instruments (or hybrid financial instruments that are determined to have a debt host) with embedded call (put) options. The amendments in this Update clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt host. An entity performing the assessment under the amendments in this Update is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. For public business entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. For entities other than public business entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within fiscal years beginning after December 15, 2018. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In March 2016, the FASB issued ASU 2016-07, Investments – Equity Method and Joint Ventures (Topic 323). The Update affects all entities that have an investment that becomes qualified for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence. The amendments in this Update eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this Update require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this Update are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Earlier application is permitted. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606). The amendments in this Update affect entities with transactions included within the scope of Topic 606, which includes entities that enter into contracts with customers to transfer goods or services (that are an output of the entity's ordinary activities) in exchange for consideration. The amendments in this Update do not change the core principle of the guidance in Topic 606; they simply clarify the implementation guidance on principal versus agent considerations. The amendments in this Update are intended to improve the operability and understandability of the implementation guidance on principal versus agent considerations. The amendments in this Update affect the guidance in ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which is not yet effective. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements of Update 2014-09. ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, defers the effective date of Update 2014-09 by one year. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In March 2016, the FASB issued ASU 2016-09, Compensation – Stock Compensation (Topic 718). The amendments in this Update affect all entities that issue share-based payment awards to their employees. The standards in this Update provide simplification for several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as with equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. In addition to those simplifications, the amendments eliminate the guidance in Topic 718 that was indefinitely deferred shortly after the issuance of FASB Statement No. 123 (revised 2004), Share-Based Payment. This should not result in a change in practice because the guidance that is being superseded was never effective. For public business entities, the amendments in this Update are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. For all other entities, the amendments are effective for annual periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. Early adoption is permitted for any entity in any interim or annual period. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606). The amendments in this Update affect entities with transactions included within the scope of Topic 606, which includes entities that enter into contracts with customers to transfer goods or services in exchange for consideration. The amendments in this Update do not change the core principle for revenue recognition in Topic 606. Instead, the amendments provide (1) more detailed guidance in a few areas and (2) additional implementation guidance and examples based on feedback the FASB received from its stakeholders. The amendments are expected to reduce the degree of judgment necessary to comply with Topic 606, which the FASB expects will reduce the potential for diversity arising in practice and reduce the cost and complexity of applying the guidance. The amendments in this Update affect the guidance in ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which is not yet effective. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements in Topic 606 (and any other Topic amended by Update 2014-09). ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, defers the effective date of Update 2014-09 by one year. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In May 2016, the FASB issued ASU 2016-12, Revenue from Contracts with Customers (Topic 606), which among other things clarifies the objective of the collectability criterion in Topic 606, as well as certain narrow aspects of Topic 606. The amendments in this Update affect the guidance in ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which is not yet effective. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements for Topic 606 (and any other Topic amended by Update 2014-09). ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, defers the effective date of Update 2014-09 by one year. This Update is not expected to have a significant impact on the Company's financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments, which changes the impairment model for most financial assets. This Update is intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The underlying premise of the Update is that financial assets measured at amortized cost should be presented at the net amount expected to be collected, through an allowance for credit losses that are deducted from the amortized cost basis. The allowance for credit losses should reflect management's current estimate of credit losses that are expected to occur over the remaining life of a financial asset. The income statement will be effected for the measurement of credit losses for newly recognized financial assets, as well as the expected increases or decreases of expected credit losses that have taken place during the period. ASU 2016-13 is effective for annual and interim periods beginning after December 15, 2019, and early adoption is permitted for annual and interim periods beginning after December 15, 2018. With certain exceptions, transition to the new requirements will be through a cumulative effect adjustment to opening retained earnings as of the beginning of the first reporting period in which the guidance is adopted. We expect to recognize a one-time cumulative effect adjustment to the allowance for loan losses as of the beginning of the first reporting period in which the new standard is effective, but cannot yet determine the magnitude of any such one-time adjustment or the overall impact of the new guidance on the consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments, which addresses eight specific cash flow issues with the objective of reducing diversity in practice. Among these include recognizing cash payments for debt prepayment or debt extinguishment as cash outflows for financing activities; cash proceeds received from the settlement of insurance claims should be classified on the basis of the related insurance coverage; and cash proceeds received from the settlement of bank-owned life insurance policies should be classified as cash inflows from investing activities while the cash payments for premiums on bank-owned policies may be classified as cash outflows for investing activities, operating activities, or a combination of investing and operating activities. The amendments in this Update are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity that elects early adoption must adopt all of the amendments in the same period. The amendments in this Update should be applied using a retrospective transition method to each period presented. If it is impracticable to apply the amendments retrospectively for some of the issues, the amendments for those issues would be applied prospectively as of the earliest date practicable. The Company is currently evaluating the impact the adoption of the standard will have on the Company's statement of cash flows.

In October 2016, the FASB issued ASU 2016-17, Consolidation (Topic 810), which amends the consolidation guidance on how a reporting entity that is the single decision maker of a VIE should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary beneficiary of that VIE. The primary beneficiary of a VIE is the reporting entity that has a controlling financial interest in a VIE and, therefore, consolidates the VIE. A reporting entity has an indirect interest in a VIE if it has a direct interest in a related party that, in turn, has a direct interest in the VIE. Under the amendments, a single decision maker is not required to consider indirect interests held through related parties that are under common control with the single decision maker to be the equivalent of direct interests in their entirety. Instead, a single decision maker is required to include those interests on a proportionate basis consistent with indirect interests held through other related parties. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In October 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230), which requires that a statement of cash flows explains the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this Update are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The amendments in this Update should be applied using a retrospective transition method to each period presented. The Company is currently evaluating the impact the adoption of the standard will have on the Company's statement of cash flows.

In December 2016, the FASB issued ASU 2016-19, Technical Corrections and Improvements, which represents changes to clarify, correct errors, or make minor improvements to the Accounting Standards Codification. The amendments make the Accounting Standards Codification easier to understand and easier to apply by eliminating inconsistencies and providing clarifications. Most of the amendments in this Update do not require transition guidance and are effective upon issuance of this Update. This Update is not expected to have a significant impact on the Company's financial statements.

In December 2016, the FASB issued ASU 2016-20, Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers. This Update, among others things, clarifies that guarantee fees within the scope of Topic 460, Guarantees, (other than product or service warranties) are not within the scope of Topic 606. The effective date and transition requirements for ASU 2016-20 are the same as the effective date and transition requirements for the new revenue recognition guidance. For public entities with a calendar year-end, the new guidance is effective in the quarter and year beginning January 1, 2018. For all other entities with a calendar year-end, the new guidance is effective in the year ending December 31, 2019, and interim periods in 2020. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In January 2017, the FASB issued ASU 2017-01, Business Combinations (Topic 805), Clarifying the Definition of a Business, which provides a more robust framework to use in determining when a set of assets and activities (collectively referred to as a “set”) is a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This screen reduces the number of transactions that need to be further evaluated. Public business entities should apply the amendments in this Update to annual periods beginning after December 15, 2017, including interim periods within those periods. All other entities should apply the amendments to annual periods beginning after December 15, 2018, and interim periods within annual periods beginning after December 15, 2019. The amendments in this Update should be applied prospectively on or after the effective date. This Update is not expected to have a significant impact on the Company’s financial statements.

In January 2017, the FASB issued ASU 2017-03, Accounting Changes and Error Corrections (Topic 250) and Investments—Equity Method and Joint Ventures (Topic 323), Amendments to SEC Paragraphs Pursuant to Staff Announcements at the September 22, 2016 and November 17, 2016 EITF Meetings. This Update adds an SEC paragraph to the Codification following an SEC Staff Announcement about applying Staff Accounting Bulletin (SAB) Topic 11.M. Specifically, this announcement applies to ASU 2014-09, Revenue from Contracts with Customers (Topic 606); ASU 2016-02, Leases (Topic 842); and ASU 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. A registrant should evaluate Updates that have not yet been adopted to determine the appropriate financial statement disclosures about the potential material effects of those Updates on the financial statements when adopted. If a registrant does not know or cannot reasonably estimate the impact that adoption of the Updates referenced in this announcement are expected to have on the financial statements, then in addition to making a statement to that effect, that registrant should consider additional qualitative financial statement disclosures to assist the reader in assessing the significance of the impact that the standard will have on the financial statements of the registrant when adopted. In this regard, the SEC staff expects the additional qualitative disclosures to include a description of the effect of the accounting policies that the registrant expects to apply, if determined, and a comparison to the registrant’s current accounting policies. Also, a registrant should describe the status of its process to implement the new standards and the significant implementation matters yet to be addressed. The amendments in this Update are effective immediately.

In January 2017, the FASB issued ASU 2017-04, Simplifying the Test for Goodwill Impairment. To simplify the subsequent measurement of goodwill, the FASB eliminated Step 2 from the goodwill impairment test. In computing the implied fair value of goodwill under Step 2, an entity had to perform procedures to determine the fair value at the impairment testing date of its assets and liabilities (including unrecognized assets and liabilities) following the procedure that would be required in determining the fair value of assets acquired and liabilities assumed in a business combination. Instead, under the amendments in this Update, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting units fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. A public business entity that is a U.S. Securities and Exchange Commission (“SEC”) filer should adopt the amendments in this Update for its annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. A public business entity that is not an SEC filer should adopt the amendments in this Update for its annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2020. All other entities, including not-for-profit entities, that are adopting the amendments in this Update should do so for their annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2021. This Update is not expected to have a

significant impact on the Company's financial statements.

In February 2017, the FASB issued ASU 2017-06, Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965). This Update relates primarily to the reporting by an employee benefit plan for its interest in a master trust, which is a trust for which a regulated financial institution serves as a trustee or custodian and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held. For each master trust in which a plan holds an interest, the amendments in this Update require a plan's interest in that master trust and any change in that interest to be presented in separate line items in the statement of net assets available for benefits and in the statement of changes in net assets available for benefits, respectively. The amendments in this Update remove the requirement to disclose the percentage interest in the master trust for plans with divided interests and require that all plans disclose the dollar amount of their interest in each of those general types of investments, which supplements the existing requirement to disclose the master trusts balances in each general type of investments. There are also increased disclosure requirements for investments in master trust. The amendments in this Update are effective for fiscal years beginning after December 15, 2018. Early adoption is permitted. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In March 2017, the FASB issued ASU 2017-08, Receivables – Nonrefundable Fees and Other Costs (Subtopic 310-20). The amendments in this Update shorten the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. For public business entities, the amendments in this Update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity should apply the amendments in this Update on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. Additionally, in the period of adoption, an entity should provide disclosures about a change in accounting principle. This Update is not expected to have a significant impact on the Company's financial statements.

NOTE 2 - STOCK-BASED COMPENSATION

The Company had no unvested stock options outstanding or unrecognized stock-based compensation costs outstanding as of March 31, 2017 and 2016.

Stock option activity during the three months ended March 31 is as follows:

	2017	Weighted- average Exercise Price	2016	Weighted- average Exercise Price
Outstanding, January 1	29,324	\$ 19.50	31,949	\$ 25.03
Exercised	(1,562)	34.34	-	-
Outstanding, March 31	27,762	\$ 23.07	31,949	\$ 25.03
Exercisable, March 31	27,762	\$ 23.07	31,949	\$ 25.03

NOTE 3 - EARNINGS PER SHARE

The Company provides dual presentation of basic and diluted earnings per share. Basic earnings per share is calculated by dividing net income by the average shares outstanding. Diluted earnings per share adds the dilutive effects of stock options to average shares outstanding.

The following table sets forth the composition of the weighted-average common shares (denominator) used in the basic and diluted earnings per share computation.

	For the Three Months Ended March 31,	
	2017	2016
Weighted-average common shares outstanding	3,065,981	2,264,342
Average treasury stock shares	(386,165)	(386,165)
Weighted-average common shares and common stock equivalents used to calculate basic earnings per share	2,679,816	1,878,177
Additional common stock equivalents (stock options) used to calculate diluted earnings per share	12,199	8,766
Weighted-average common shares and common stock equivalents used to calculate diluted earnings per share	2,692,015	1,886,943

Options to purchase 27,762 shares of common stock, at prices ranging from \$17.55 to \$37.48, were outstanding during the three months ended March 31, 2017. Of those options, 27,762 were considered dilutive for the three-month period based on the market price exceeding the strike price and no options were anti-dilutive.

Options to purchase 31,949 shares of common stock, at prices ranging from \$17.55 to \$40.24, were outstanding during the three months ended March 31, 2016. Of those options, 7,249 were not included in the calculation of diluted earnings per share because they were anti-dilutive.

NOTE 4 - FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction between market participants at the measurement date. GAAP established a fair value hierarchy that prioritizes the use of inputs used in valuation methodologies into the following levels:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level II: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following tables present the assets measured on a recurring basis on the Consolidated Balance Sheet at their fair value by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(Dollar amounts in thousands)	March 31, 2017			Total
	Level I	Level II	Level III	
Assets measured on a recurring basis:				
U.S. government agency securities	\$ -	\$9,827	\$ -	\$9,827
Obligations of states and political subdivisions	-	79,697	-	79,697
Mortgage-backed securities in government-sponsored entities	-	19,036	-	19,036
Private-label mortgage-backed securities	-	1,602	-	1,602
Total debt securities	-	110,162	-	110,162
Equity securities in financial institutions	-	290	-	290
Total	\$ -	\$110,452	\$ -	\$110,452

(Dollar amounts in thousands)	December 31, 2016			Total
	Level I	Level II	Level III	
Assets measured on a recurring basis:				
U.S. government agency securities	\$ -	\$10,236	\$ -	\$10,236
Obligations of states and political subdivisions	-	81,223	-	81,223
Mortgage-backed securities in government-sponsored entities	-	20,069	-	20,069
Private-label mortgage-backed securities	-	1,709	-	1,709
Total debt securities	-	113,237	-	113,237
Equity securities in financial institutions	-	1,139	-	1,139
Total	\$ -	\$114,376	\$ -	\$114,376

The Company obtains fair values from an independent pricing service which represent either quoted market prices for the identical securities (Level I inputs) or fair values determined by pricing models using a market approach that considers observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems (Level II).

The Company uses prices compiled by third party vendors.

The following tables present the assets measured on a nonrecurring basis on the Consolidated Balance Sheet at their fair value by level within the fair value hierarchy.

Impaired Loans - The Company has measured impairment on impaired loans generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third-party appraisals of the properties. In some cases, management may adjust the appraised value due to the age of the appraisal, changes in market conditions, or observable deterioration of the property since the appraisal was completed. Additionally, management makes estimates about expected costs to sell the property which are also included in the net realizable value. If the fair value of the collateral dependent loan is less than the carrying amount of the loan, a specific reserve for the loan is made in the allowance for loan losses or a charge-off is taken to reduce the loan to the fair value of the collateral (less estimated selling costs) and the loan is included in the table below as a Level III measurement. If the fair value of the collateral exceeds the carrying amount of the loan, then the loan is not included in the table below as it is not currently being carried at its fair value. The fair values below excluded estimated selling costs of \$280,600 at March 31, 2017.

Other Real Estate Owned (OREO) – OREO is carried at the lower of cost or fair value, which is measured at the date of foreclosure. If the fair value of the collateral exceeds the carrying amount of the loan, no charge-off or adjustment is necessary, the loan is not considered to be carried at fair value, and is therefore not included in the table below. If the fair value of the collateral is less than the carrying amount of the loan, management will charge the loan down to its estimated realizable value. The fair value of OREO is based on the appraised value of the property, which is generally unadjusted by management and is based on comparable sales for similar properties in the same geographic region as the subject property, and is included in the table below as a Level II measurement. In some cases, management may adjust the appraised value due to the age of the appraisal, changes in market conditions, or observable deterioration of the property since the appraisal was completed. In these cases, the loans are categorized in the table below as Level III measurement since these adjustments are considered to be unobservable inputs. Income and expenses from operations and further declines in the fair value of the collateral subsequent to foreclosure are included in net expenses from OREO.

(Dollar amounts in thousands)	March 31, 2017			Total
	Level I	Level II	Level III	
Assets measured on a nonrecurring basis:				
Impaired loans	\$ -	\$ -	\$ 585	\$ 585
Other real estate owned	-	-	27	27

(Dollar amounts in thousands)	December 31, 2016			Total
	Level I	Level II	Level III	
Assets measured on a nonrecurring basis:				
Impaired loans	\$ -	\$ -	\$ 6,498	\$ 6,498
Other real estate owned	-	-	511	511

The following tables present additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Company uses Level III inputs to determine fair value:

(Dollar amounts in thousands)	Quantitative Information about Level III Fair Value Measurements			
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
March 31, 2017				
Impaired loans	\$585	Appraisal of collateral (1)	Appraisal adjustments (2)	3.5% to 8.3% (5.6%)
Other real estate owned	\$27	Appraisal of collateral (1)	Appraisal adjustments (2)	0.0% to 10.0%

(Dollar amounts in thousands)	Quantitative Information about Level III Fair Value Measurements			
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
December 31, 2016				
Impaired loans	\$4,928	Discounted cash flow	Discount rate	3.1% to 7.0% (5.1%)
	1,570	Appraisal of collateral (1)	Appraisal adjustments (2)	0.0% to 59.7% (28.2%)

Other real estate owned \$511 Appraisal of collateral (1) Appraisal adjustments (2) 0% to 10.0

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable, less any associated allowance.

Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated (2) liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

The estimated fair value of the Company's financial instruments is as follows:

	March 31, 2017 Carrying				Total Fair Value
	Value	Level I	Level II	Level III	
(Dollar amounts in thousands)					
Financial assets:					
Cash and cash equivalents	\$62,364	\$62,364	\$-	\$-	\$62,364
Investment securities Available for sale	110,452	-	110,452	-	110,452
Loans held for sale	9,462	8,328	1,134	-	9,462
Net loans	830,438	-	-	834,096	834,096
Bank-owned life insurance	15,334	15,334	-	-	15,334

Other borrowings	9,437	-	-	9,512	9,512
Accrued interest payable	395	395	-	-	395

Financial instruments are defined as cash, evidence of ownership interest in an entity, or a contract which creates an obligation or right to receive or deliver cash or another financial instrument from/to a second entity on potentially favorable or unfavorable terms.

Fair value is defined as the amount at which a financial instrument could be exchanged in a current transaction between willing parties other than in a forced liquidation sale. If a quoted market price is available for a financial instrument, the estimated fair value would be calculated based upon the market price per trading unit of the instrument.

If no readily available market exists, the fair value estimates for financial instruments should be based upon management's judgment regarding current economic conditions, interest rate risk, expected cash flows, future estimated losses, and other factors as determined through various option pricing formulas or simulation modeling. Since many of these assumptions result from judgments made by management based upon estimates which are inherently uncertain, the resulting estimated fair values may not be indicative of the amount realizable in the sale of a particular financial instrument. In addition, changes in assumptions on which the estimated fair values are based may have a significant impact on the resulting estimated fair values.

As certain assets such as deferred tax assets and premises and equipment are not considered financial instruments, the estimated fair value of financial instruments would not represent the full value of the Company.

The Company employed simulation modeling in determining the estimated fair value of financial instruments for which quoted market prices were not available based upon the following assumptions:

Cash and Cash Equivalents, Federal Home Loan Bank Stock, Accrued Interest Receivable, Accrued Interest Payable, and Short-Term Borrowings

The fair value is equal to the current carrying value.

Bank-Owned Life Insurance

The fair value is equal to the cash surrender value of the life insurance policies.

Investment Securities Available for Sale

The fair value of investment securities is equal to the available quoted market price. If no quoted market price is available, fair value is estimated using the quoted market price for similar securities.

Loans Held for Sale

Loans held for sale are carried at lower of cost or fair value. The fair value of loans held for sale is based on secondary market pricing on portfolios with similar characteristics. The changes in fair value of the assets are largely driven by changes in interest rates subsequent to loan funding and changes in the fair value of servicing associated with the mortgage loan held for sale.

Net Loans

The fair value is estimated by discounting future cash flows using current market inputs at which loans with similar terms and qualities would be made to borrowers of similar credit quality. Where quoted market prices were available, primarily for certain residential mortgage loans, such market rates were used as estimates for fair value.

Deposits and Other Borrowings

The fair values of certificates of deposit and other borrowings are based on the discounted value of contractual cash flows. The discount rates are estimated using rates currently offered for similar instruments with similar remaining maturities. Demand, savings, and money market deposits are valued at the amount payable on demand as of period end.

Commitments to Extend Credit

These financial instruments are generally not subject to sale, and estimated fair values are not readily available. The carrying value, represented by the net deferred fee arising from the unrecognized commitment or letter of credit, and the fair value, determined by discounting the remaining contractual fee over the term of the commitment using fees currently charged to enter into similar agreements with similar credit risk, are not considered material for disclosure.

NOTE 5 – ACCUMULATED OTHER COMPREHENSIVE INCOME

The following tables present the changes in accumulated other comprehensive income by component net of tax for the three months ended March 31, 2017 and 2016, respectively:

	Unrealized gains on available-for-sale securities (a)
(Dollars in thousands)	
Balance as of December 31, 2016	\$ 1,201
Other comprehensive income before reclassification	153
Amount reclassified from accumulated other comprehensive income	(322)
Period change	(169)
Balance at March 31, 2017	\$ 1,032

	Unrealized gains on available-for-sale securities
(Dollars in thousands)	
Balance as of December 31, 2015	\$ 2,395
Other comprehensive income before reclassification	360
Amount reclassified from accumulated other comprehensive income	(34)
Period change	326
Balance at March 31, 2016	\$ 2,721

(a) All amounts are net of tax. Amounts in parentheses indicate debits to net income

The following tables present significant amounts reclassified out of each component of accumulated other comprehensive income for the three months ended March 31, 2017 and 2016, respectively:

	Amount Reclassified from Accumulated Other Comprehensive		Affected Line Item in the Statement Where
(Dollars in thousands)	Income (a) For the Three Months Ended		Net Income is
	March 31, 2017	March 31, 2016	Presented
Details about other comprehensive income			
Unrealized gains on available-for-sale securities	\$488	\$ 51	Investment securities gains, net
	(166)	(17)	Income taxes
	\$322	\$ 34	Net of tax

(a) Amounts in parentheses indicate debits to net income

NOTE 6 - INVESTMENT SECURITIES AVAILABLE FOR SALE

The amortized cost and fair values of securities available for sale are as follows:

(Dollar amounts in thousands)	March 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government agency securities	\$9,732	\$ 167	\$ (72) \$9,827
Obligations of states and political subdivisions:				
Taxable	1,614	129	(3) 1,740
Tax-exempt	76,804	1,658	(505) 77,957
Mortgage-backed securities in government-sponsored entities	19,091	172	(227) 19,036
Private-label mortgage-backed securities	1,479	123	-	1,602
Total debt securities	108,720	2,249	(807) 110,162
Equity securities in financial institutions	170	120	-	290
Total	\$108,890	\$ 2,369	\$ (807) \$110,452

	December 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government agency securities	\$10,158	\$ 174	\$ (96) \$10,236
Obligations of states and political subdivisions:				
Taxable	1,615	129	(4) 1,740
Tax-exempt	78,327	1,678	(522) 79,483
Mortgage-backed securities in government-sponsored entities	20,128	202	(261) 20,069

Equity securities in financial institutions	750	389	-	1,139
Total	\$112,557	\$ 2,702	\$ (883) \$114,376

The amortized cost and fair value of debt securities at March 31, 2017, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollar amounts in thousands)	Amortized Fair	
	Cost	Value
Due in one year or less	\$ 3,922	\$3,975
Due after one year through five years	9,224	9,527
Due after five years through ten years	11,400	11,793
Due after ten years	84,174	84,867
Total	\$ 108,720	\$ 110,162

Proceeds from the sales of securities available for sale and the gross realized gains and losses for the three months ended March 31 are as follows:

(Dollar amounts in thousands)	For the Three Months Ended March 31,	
	2017	2016
Proceeds from sales	\$ -	\$ 1,322
Gross realized gains	488	51
Gross realized losses	-	-

Investment securities with an approximate carrying value of \$58.4 million and \$60.3 million at March 31, 2017 and December 31, 2016, respectively, were pledged to secure deposits and other purposes as required by law. Pledged cash with a carrying value of \$4.5 million at March 31, 2017 was also pledged to secure deposits and other purposes as required by law.

Prior to the acquisition of Liberty Bank, N.A., the Company had a previously held equity interest in Liberty which was re-measured at fair value on the acquisition date and resulted in a gain of \$488,000, which was recorded in Investment Securities Gains on the consolidated Income Statement for the three months ended March 31, 2017.

The following tables show the Company's gross unrealized losses and fair value, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position.

(Dollar amounts in thousands)	March 31, 2017 Less than Twelve Months		Twelve Months or Greater		Total

There were 67 securities considered temporarily impaired at March 31, 2017.

On a quarterly basis, the Company performs an assessment to determine whether there have been any events or economic circumstances indicating that a security with an unrealized loss has suffered other-than-temporary impairment (“OTTI”). A debt security is considered impaired if the fair value is less than its amortized cost basis at the reporting date. The Company assesses whether the unrealized loss is other than temporary.

OTTI losses are recognized in earnings when the Company has the intent to sell the debt security or it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, even if the Company does not expect to sell a debt security, it must evaluate expected cash flows to be received and determine if a credit loss has occurred.

An unrealized loss is generally deemed to be other than temporary and a credit loss is deemed to exist if the present value of the expected future cash flows is less than the amortized cost basis of the debt security. As a result the credit loss component of an OTTI is recorded as a component of investment securities gains (losses) in the accompanying Consolidated Statement of Income, while the remaining portion of the impairment loss is recognized in other comprehensive income, provided the Company does not intend to sell the underlying debt security and it is “more likely than not” that the Company will not have to sell the debt security prior to recovery.

Debt securities issued by U.S. government agencies, U.S. government-sponsored enterprises, and state and political subdivisions accounted for more than 98.3% of the total available-for-sale portfolio as of March 31, 2017 and no credit losses are expected, given the explicit and implicit guarantees provided by the U.S. federal government and the lack of prolonged unrealized loss positions within the obligations of state and political subdivisions security portfolio. The Company considers the following factors in determining whether a credit loss exists and the period over which the debt security is expected to recover:

- The length of time and the extent to which the fair value has been less than the amortized cost basis.
- Changes in the near term prospects of the underlying collateral of a security such as changes in default rates, loss severity given default and significant changes in prepayment assumptions;
- The level of cash flows generated from the underlying collateral supporting the principal and interest payments of the debt securities; and

Any adverse change to the credit conditions and liquidity of the issuer, taking into consideration the latest information available about the overall financial condition of the issuer, credit ratings, recent legislation and government actions affecting the issuer’s industry and actions taken by the issuer to deal with the present economic climate.

For the three months ended March 31, 2017 and 2016, there were no available-for-sale debt securities with an unrealized loss that suffered OTTI. Management does not believe any individual unrealized loss as of March 31, 2017 or December 31, 2016 represented an other-than-temporary impairment. The unrealized losses on debt securities are primarily the result of interest rate changes. These conditions will not prohibit the Company from receiving its contractual principal and interest payments on these debt securities. The fair value of these debt securities is expected to recover as payments are received on these securities and they approach maturity. Should the impairment of any of these securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss

recognized in net income in the period the other-than-temporary impairment is identified.

NOTE 7 - LOANS AND RELATED ALLOWANCE FOR LOAN AND LEASE LOSSES

Major classifications of loans are summarized as follows (in thousands):

	March 31, 2017	December 31, 2016
Commercial and industrial	\$91,777	\$ 60,630
Real estate - construction	29,238	23,709
Real estate - mortgage:		
Residential	300,508	270,830
Commercial	395,102	249,490
Consumer installment	20,533	4,481
	837,158	609,140
Less: Allowance for loan and lease losses	6,720	6,598
Net loans	\$830,438	\$ 602,542

The amounts above include deferred loan origination costs of \$3.2 million and \$1.7 million at March 31, 2017 and December 31, 2016, respectively.

The Company's primary business activity is with customers located within its local Northeastern Ohio trade area, eastern Geauga County, and contiguous counties to the north, east, and south. The Company also serves the central Ohio market with offices in Dublin, Sunbury and Westerville, Ohio. The Northeastern Ohio trade area includes the newly acquired Liberty locations in Beachwood, Twinsburg, and Solon, Ohio. Commercial, residential, consumer, and agricultural loans are granted. Although the Company has a diversified loan portfolio, loans outstanding to individuals and businesses are dependent upon the local economic conditions in the Company's immediate trade area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff generally are reported at their outstanding unpaid principal balances net of the allowance for loan and lease losses. Interest income is recognized as income when earned on the accrual method. The accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's financial condition is such that collection of interest is doubtful. Interest received on nonaccrual loans is recorded as income or applied against principal according to management's judgment as to the collectability of such principal.

Loan origination fees and certain direct loan origination costs are being deferred and the net amount amortized as an adjustment of the related loan's yield. Management is amortizing these amounts over the contractual life of the related loans.

The following tables summarize the primary segments of the loan portfolio and allowance for loan and lease losses (in thousands):

March 31, 2017	Commercial and industrial	Real estate- construction	Real Estate- Mortgage		Consumer installment	Total
			Residential	Commercial		
Loans:

The Company's loan portfolio is segmented to a level that allows management to monitor risk and performance. The portfolio is segmented into Commercial and Industrial ("C&I"), Real Estate Construction, Real Estate - Mortgage which is further segmented into Residential and Commercial real estate ("CRE"), and Consumer Installment Loans. The C&I loan segment consists of loans made for the purpose of financing the activities of commercial customers. The residential mortgage loan segment consists of loans made for the purpose of financing the activities of residential homeowners. The commercial mortgage loan segment consists of loans made for the purpose of financing the activities of commercial real estate owners and operators. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts. The increase in the allowance for loan loss for C&I, Real Estate Construction, and CRE loan portfolios were partially offset by decreases in the allowance for the Residential and Consumer Installment loan portfolios.

Management evaluates individual loans in all of the commercial segments for possible impairment based on guidance established by the Board of Directors. Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The Company does not separately evaluate individual consumer and residential mortgage loans for impairment, unless such loans are part of a larger relationship that is impaired.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of the following methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral less selling costs. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary (in thousands):

March 31, 2017

Management uses a nine-point internal risk-rating system to monitor the credit quality of the overall loan portfolio. The first five categories are considered not criticized and are aggregated as Pass rated. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due are considered Substandard. Any portion of a loan that has been charged off is placed in the Loss category.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan-rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as bankruptcy, repossession, or death, occurs to raise awareness of a possible credit event. The Company's Commercial Loan Officers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis with the Chief Credit Officer ultimately responsible for accurate and timely risk ratings. The Credit Department performs an annual review of all commercial relationships with loan balances of \$1,000,000 or greater. Confirmation of the appropriate risk grade is included in the review on an ongoing basis. The Company engages an external consultant to conduct loan reviews on a semiannual basis. Generally, the external consultant reviews commercial relationships greater than \$250,000 and/or criticized relationships greater than \$125,000. Detailed reviews, including plans for resolution, are performed on loans classified as Substandard on a quarterly basis. Loans in the Special Mention and Substandard categories that are collectively evaluated for impairment are given separate consideration in the determination of the allowance.

The primary risk of commercial and industrial loans is the current economic uncertainties. C&I loans are, by nature, secured by less substantial collateral than real estate-secured loans. The primary risk of real estate construction loans is potential delays and /or disputes during the completion process. The primary risk of residential real estate loans is current economic uncertainties along with the slow recovery in the housing market. The primary risk of commercial real estate loans is loss of income of the owner or occupier of the property and the inability of the market to sustain

rent levels. Consumer installment loans historically have experienced higher delinquency rates. Consumer installments are typically secured by less substantial collateral than other types of credits.

The following tables present the classes of the loan portfolio summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk-rating system (in thousands):

	Pass	Special Mention	Substandard	Doubtful	Total Loans
March 31, 2017

Total	\$591,706	\$ 5,657	\$ 11,777	\$ -	\$609,140

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due.

Nonperforming assets include nonaccrual loans, troubled debt restructurings (TDRs), loans 90 days or more past due, EMORECO assets, other real estate owned, and repossessed assets. A loan is classified as nonaccrual when, in the opinion of management, there are serious doubts about collectability of interest and principal. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's financial condition is such that collection of principal and interest is doubtful. Payments received on nonaccrual loans are applied against the principal balance.

The following tables present the classes of the loan portfolio summarized by the aging categories of performing loans (in thousands):

	Current	30-59 Days Past Due	60-89 Days Past Due	90 Days+ Past Due	Total Past Due	Total Loans

Total	\$ 5,903	\$ -

Interest income that would have been recorded had these loans not been placed on nonaccrual status was \$462,000 for the three months ended March 31, 2017 and \$309,000 for the year ended December 31, 2016.

An allowance for loan and lease losses (“ALLL”) is maintained to absorb losses from the loan portfolio. The ALLL is based on management’s continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of nonperforming loans.

The Company’s methodology for determining the ALLL is based on the requirements of ASC Section 310-10-35 for loans individually evaluated for impairment (discussed above) and ASC Subtopic 450-20 for loans collectively evaluated for impairment, as well as the Interagency Policy Statements on the Allowance for Loan and Lease Losses and other bank regulatory guidance. The total of the two components represents the Company’s ALLL. Management also performs impairment analyses on TDRs, which may result in specific reserves.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by other qualitative factors.

The classes described above, which are based on the purpose code assigned to each loan, provide the starting point for the ALLL analysis. Management tracks the historical net charge-off activity at the purpose code level. The historical charge-off factor was calculated using the last twelve consecutive historical quarters.

Management has identified a number of additional qualitative factors which it uses to supplement the historical charge-off factor because these factors are likely to cause estimated credit losses associated with the existing loan pools to differ from historical loss experience. The additional factors that are evaluated quarterly and updated using information obtained from internal, regulatory, and governmental sources are: national and local economic trends and conditions; levels of and trends in delinquency rates and nonaccrual loans; trends in volumes and terms of loans; effects of changes in lending policies; experience, ability, and depth of lending staff; value of underlying collateral; and concentrations of credit from a loan type, industry and/or geographic standpoint.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALLL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALLL.

The following tables summarize the primary segments of the loan portfolio (in thousands):

	Commercial and industrial	Real estate- construction	Real estate- residential mortgage	Real estate- commercial mortgage	Consumer installment	Total

subsequently defaulted	Contracts		Investment
Residential real estate	1	\$	33

There were no subsequent defaults of troubled debt restructurings for the three months ended March 31, 2016.

NOTE 8 – OTHER REAL ESTATE OWNED (“OREO”)

OREO comprises foreclosed assets acquired in settlement of loans and is carried at fair value less estimated cost to sell and is included in other assets on the Consolidated Balance Sheet. At March 31, 2017 and December 31, 2016, there was \$1.6 million and \$934,000 of OREO, respectively. As of March 31, 2017, there were no formal foreclosure proceedings in process.

NOTE 9 – BUSINESS ACQUISITION

In the second quarter of 2016, the Company announced the signing of a definitive merger agreement to acquire 100% of the outstanding equity interest of Liberty Bank for cash and stock. Liberty was an Ohio bank that conducted its business from a main office in Beachwood, Ohio with branches in Twinsburg and Solon, Ohio.

The transaction closed on January 12, 2017, with Liberty having been merged into Middlefield Bank, with Middlefield Bank as the surviving entity. The acquisition established the Company’s presence in Cuyahoga and Summit Counties.

Under the terms of the merger agreement, the Company acquired all of the outstanding shares of Liberty for a total purchase price of \$42.2 million. As a result of the acquisition, the Company issued 544,610 common shares and \$21.2 million in cash to the former shareholders of Liberty Bank. The shares were issued with a value of \$38.55 per share, which was the closing price of the Company’s stock on January 12, 2017. Prior to the acquisition the Company had a previously held equity interest in Liberty Bank which was re-measured at fair value on the acquisition date and resulted in a gain of \$488,000, which was recorded in the Investment Securities Gains – Taxable Interest line on the consolidated Income Statement for the three months ended March 31, 2017.

The acquired assets and assumed liabilities were measured at estimated fair values. The Company relied on the income approach to estimate the value of the loans. The loans’ underlying characteristics (account types, remaining terms (in months), annual interest rates or coupons, interest types, past delinquencies, timing of principal and interest payments, current market rates, loan-to-value ratios, loss exposures and remaining balance) were considered. Various assumptions were applied regarding credit, interest, and prepayment risks for the loans based on loan types, payment types and fixed or variable classifications.

The Company also recorded an identifiable intangible asset representing the core deposit base of Liberty Bank. The discounted cash flow method was used in valuing this intangible. This method is based upon the principle of future benefits; economic value is based on anticipated future benefits as measured by cash flows expected to occur in the future. The estimated future cash flows are converted to a value indicator by determining the present value of the cash flows using a discount rate. The discount rate is based upon the nature of the business, the level of risk, and the expected stability of the estimated future cash flows. The higher the risk, the higher the discount rate, and the lower the value indicator.

Time deposit fair values were estimated using an income approach. The methodology entailed discounting the contractual cash flows of the instruments over their remaining contractual lives at prevailing market rates. Interest and principal payments were projected for each category of CDs over the period from the valuation date to the maturity dates. These payments represent future cash flows to be paid to depositors until maturity. Using appropriate market interest rates for each category of CDs the future cash flows were discounted to their present value equivalents. The market interest rates were selected based on peer rates in Ohio from Bankrate as of the valuation date.

The following table summarizes the purchase of Liberty Bank as of January 12, 2017:

(In Thousands, Except Per Share Data)

Purchase Price Consideration in Common Stock		
Middlefield Banc Corp shares issued	544,610	
Value assigned to Middlefield Banc Corp common share	\$38.55

Accrued interest payable	(47)	
Other liabilities	(3,131)	
		31,081
Goodwill resulting from the Liberty Bank merger		\$11,087

Middlefield recorded goodwill and intangibles associated with the purchase of Liberty Bank totaling \$11,087,000. Goodwill is not amortized, but is periodically evaluated for impairment. The Bank did not recognize any impairment during the three months ended March 31, 2017.

Identifiable intangibles are amortized to their estimated residual values over the expected useful lives. Such lives are also periodically reassessed to determine if any amortization period adjustments are required. During the three months ended March 31, 2017, no such adjustments were recorded. The identifiable intangible assets consist of a core deposit intangible which is being amortized over the estimated useful life. The gross carrying amount of the core deposit intangible at March 31, 2017 was \$3,025,000 with \$62,000 accumulated amortization as of that date.

As of March 31, 2017, the current year and estimated future amortization expense for the core deposits intangible.

Results of operations for Liberty prior to the acquisition date are not included in the Consolidated Statement of Income for the three-month period ended March 31, 2017. The results of activities from the former Liberty Bank operations that are included in the Consolidated Statement of Income from the date of acquisition through March 31, 2017 are broken out in the following table:

	Actual From Acquisition Date Through March 31, 2017 (in thousands)
Net interest income	\$ 2,735
Noninterest income	291
Net income	\$ 98

The table below presents unaudited pro forma information as if the acquisition of Liberty Bank had occurred on January 1, 2016 and as if the acquisition had occurred on January 1, 2017. This had been prepared for comparative purposes only and is not necessarily indicative of the actual results that would have been attained had the acquisition occurred as of the beginning of the periods presented, nor is it indicative of future results. Furthermore, the unaudited pro forma information does not reflect management's estimate of any revenue-enhancing opportunities nor anticipated cost savings as a result of the integration and consolidation of the acquisition. Merger and acquisition integration costs and amortization of fair value adjustments are included in the amounts below.

NOTE 10 – SUBSEQUENT EVENT

Pursuant to its private placement, on May 9, 2017, the Company sold 400,000 shares of its common stock, no par value, at a purchase price of \$40.00 per share. The offering was to accredited investors only, without the use of a general solicitation or general advertising. The gross proceeds of the offering were \$16,000,000 before compensation of \$760,000 payable to the investment bank acting as placement agent. The offer and sale of the Company's common stock in the private placement was exempt from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act") pursuant to Section 4(a)(2) of, and Rule 506 of Regulation D under, the Securities Act.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides further detail to the financial condition and results of operations of the Company. The MD&A should be read in conjunction with the notes and financial statements presented in this report.

The information contained or incorporated by reference in this current report on Form 10-Q contain forward-looking statements, including certain plans, expectations, goals, and projections, which are subject to numerous assumptions, risks, and uncertainties. Actual results could differ materially from those contained or implied by such statements for a variety of factors, including: changes in economic conditions; movements in interest rates; competitive pressures on product pricing and services; success and timing of business strategies; the nature, extent, and timing of government actions and reforms; and extended disruption of viral infrastructure. All forward-looking statements included in this current report on Form 10-Q are based on information available at the time of the report. Middlefield Banc Corp. assumes no obligation to update any forward-looking statement.

CHANGES IN FINANCIAL CONDITION

General. The Company's total assets ended the March 31, 2017 quarter at \$1.1 billion, an increase of \$281.6 million or 35.7% from December 31, 2016. For the same time period, cash and cash equivalents increased \$29.9 million, or 91.9% while net loans increased \$227.9 million, or 37.8%. Total liabilities increased \$259.3 million, or 36.5% while stockholders' equity increased \$22.4 million, or 29.0%.

On January 12, 2017, the Company completed its acquisition of Liberty Bank, N.A. ("Liberty"), pursuant to a previously announced definitive merger agreement. Under the terms of the merger agreement, Liberty shareholders received \$37.96 in cash or 1.1934 shares of Middlefield's common stock in exchange for each share of Liberty common stock they owned immediately prior to the merger. Middlefield issued 544,610 shares of its common stock in the merger and the aggregate merger consideration was approximately \$42.2 million.

Cash and cash equivalents. Cash and due from banks and Federal funds sold represent cash and cash equivalents. Cash and cash equivalents increased \$29.9 million or 91.9% to \$62.4 million at March 31, 2017 from \$32.5 million at December 31, 2016. Deposits from customers into savings and checking accounts, loan and securities repayments and proceeds from borrowed funds typically increase these accounts. Decreases result from customer withdrawals, new loan originations, purchases of investment securities and repayments of borrowed funds.

Investment securities. Investment securities available for sale on March 31, 2017 totaled \$110.5 million, a decrease of \$3.9 million or 3.4% from \$114.4 million at December 31, 2016. During this period the Company recorded repayments, calls, and maturities of \$3.5 million. The Company recorded \$488,000 in security gains as of March 31, 2017 which is the liquidation of the Company's investment in Liberty stock due to the acquisition. There were no securities available for sale sold or purchased during the period.

Loans receivable. The loans receivable category consists primarily of single-family mortgage loans used to purchase or refinance personal residences located within the Company's market area and commercial real estate loans used to finance properties that are used in the borrowers' businesses or to finance investor-owned rental properties, and to a lesser extent, construction and consumer loans. Net loans receivable increased \$227.9 million or 37.8% to \$830.4 million as of March 31, 2017 from \$602.5 million at December 31, 2016 due to the Liberty acquisition as well as strategic growth goals. The Liberty acquisition resulted in a net increase of loans receivable of \$192.6 million as of March 31, 2017. Included in the total increase to loans receivable were increases in the residential real estate, commercial and industrial, commercial real estate, and construction portfolios of \$29.7 million, or 11.0%, \$31.2 million, or 51.4%, \$145.6 million, or 58.4% and \$5.5 million, or 23.3%, respectively.

The Company's Mortgage Banking operation generates loans for sale to FHLMC. Loans held for sale on March 31, 2017 totaled \$9.5 million, an increase of \$8.8 million, or 1,392.4%, from December 31, 2016. \$8.3 million of this increase is the result of the acquisition of Liberty's Student Lending loans which are classified as Loans Held for Sale as of March 31, 2017. This increase is also a result of a greater number of funded loans being held in the warehouse at quarter end.

Student Lending Through its merger with Liberty Bank, N.A., on January 12, 2017, MBC has acquired Liberty's private student loan business, which provides qualified borrowers nationwide with the ability to finance the costs associated with obtaining their undergraduate or graduate degrees and to refinance their existing student loans. Pursuant to loan origination agreements with student loan origination and servicing companies, MBC will make student loans to qualified students and sell those loans, without recourse and with servicing released, into the secondary market. This "originate-to-sell" model allows the Bank to enhance its liquidity, making credit more widely available while transferring the risk of non-payment to third parties. During the three-month period ending March 31, 2017, the Company originated \$110.8 million in student loans. We anticipate continuing the student loan program but can give no assurance that MBC will originate student loans at equivalent levels.

Allowance for Loan and Lease Losses and Asset Quality. The allowance for loan and lease losses increased \$122,000 or 1.8% to \$6.7 million at March 31, 2017 from \$6.6 million at December 31, 2016. For the three months ended March 31, 2017, net loan charge-offs totaled \$43,000, or 0.01% of average loans, compared to net charge-offs of \$133,000, or 0.10%, for the same period in 2016. To maintain the allowance for loan and lease losses, the Company recorded a provision for loan loss of \$165,000 in the three month period ending March 31, 2017, and a provision of \$105,000 in the three month period ending March 31, 2016. MBC recorded loans acquired through the Liberty acquisition net of any allowance. As such, the acquisition of these loans had a negligible effect on the determination of the allowance for loans and lease losses as of March 31, 2017.

Management analyzes the adequacy of the allowance for loan and lease losses regularly through reviews of the performance of the loan portfolio considering economic conditions, changes in interest rates and the effect of such changes on real estate values and changes in the amount and composition of the loan portfolio. The allowance for loan and lease losses is a significant estimate that is particularly susceptible to changes in the near term. Such evaluation includes a review of all loans designated as impaired, historical loan loss experience, the estimated fair value of the underlying collateral, economic conditions, current interest rates, trends in the borrower's industry and other factors that management believes warrant recognition in providing for an appropriate allowance for loan and lease losses. Future additions or reductions to the allowance for loan and lease losses will be dependent on these factors. Additionally, the Company uses an outside party to conduct an independent review of commercial and commercial real estate loans that is designed to validate management conclusions of risk ratings and the appropriateness of the allowance allocated to these loans. The Company uses the results of this review to help determine the effectiveness of policies and procedures and to assess the adequacy of the allowance for loan and lease losses allocated to these types of loans. Management believes the allowance for loan and lease losses is appropriately stated at March 31, 2017. Based on the variables involved and management's judgments about uncertain outcomes, the determination of the allowance for loan and lease losses is considered a critical accounting policy.

Nonperforming assets. Nonperforming assets include nonaccrual loans, troubled debt restructurings (TDRs), loans 90 days or more past due, EMORECO assets, other real estate, and repossessed assets. Real estate owned is written down to fair value at its initial recording and continually monitored for changes in fair value. A loan is classified as nonaccrual when, in the opinion of management, there are serious doubts about collectability of interest and principal. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's financial condition is such that collection of principal and interest is doubtful. Payments received on nonaccrual loans are applied against principal until doubt about collectability ceases. TDRs are those loans which the Company, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise consider. The Company has 21 TDRs with a total balance of \$1.4 million as of March 31, 2017. A TDR that yields a market interest rate at the time of restructuring and is in compliance with its modified terms is no longer reported as TDR in calendar years after the year in which the restructuring took place. To be in compliance with its modified terms, a loan that is a TDR must not be in nonaccrual status and must be current or less than 30 days past due on its contractual principal and interest payments under the modified repayment terms. Nonperforming loans secured by real estate totaled \$8.0 million as of March 31, 2017, an increase of \$0.9 million from \$7.1 million at December 31, 2016.

Edgar Filing: MIDDLEFIELD BANC CORP - Form 10-Q

(Dollar amounts in thousands)	3/31/2017	12/31/2016	9/30/2016	6/30/2016	3/31/2016
Nonperforming loans	\$8,019	\$ 6,990	\$ 12,675	\$ 9,491	\$ 10,508
Real estate owned	1,634	934	1,205	1,142	1,447
Nonperforming assets	\$9,653	\$ 7,924	\$ 13,880	\$ 10,633	\$ 11,955
Allowance for loan and lease losses	6,720	6,598	6,334	6,366	6,357
Ratios					
Nonperforming loans to total loans	0.96 %	1.16 %	2.16 %	1.64 %	1.98 %
Nonperforming assets to total assets	0.90 %	1.02 %	1.82 %	1.40 %	1.63 %
Allowance for loan and lease losses to total loans	0.80 %	1.08 %	1.08 %	1.10 %	1.20 %
Allowance for loan and lease losses to nonperforming loans	83.80 %	93.30 %	49.97 %	67.07 %	60.50 %

A major factor in determining the appropriateness of the allowance for loan and lease losses is the type of collateral which secures the loans. Of the total nonperforming loans at March 31, 2017, 100% were secured by real estate. Although this does not insure against all losses, the real estate typically provides for at least partial recovery, even in a distressed-sale and declining-value environment. The Company's objective is to minimize the future loss exposure to the Company.

The allowance for loan and lease losses to total loans ratio decreased from 1.08% as of December 31, 2016 to 0.80% as of March 31, 2017. This decrease is primarily due to the increase in total loans resulting from the Liberty acquisition. Liberty's asset quality was such that it did not require any additional reserves to be determined as of March 31, 2017.

Deposits. The Company considers various sources when evaluating funding needs, including but not limited to deposits, which are a significant source of funds totaling \$847.9 million or 88.0% of the Company's total funding sources at March 31, 2017. Total deposits increased \$217.9 million or 34.6% at March 31, 2017 from \$629.9 million at December 31, 2016. The Liberty acquisition resulted in a net increase of deposits of \$175.6 million as of March 31, 2017. The total increase in deposits is primarily related to increases in noninterest-bearing demand, interest-bearing demand, money market, savings, and time deposits of \$29.0 million or 23.2%, \$35.1 million or 58.8%, \$87.9 million or 117.3%, \$11.5 million or 6.7%, and \$54.5 million or 28.8%, respectively, at March 31, 2017.

Borrowed funds. The Company uses short and long-term borrowings as another source of funding used for asset growth and liquidity needs. These borrowings primarily include FHLB advances, junior subordinated debt, short-term borrowings from other banks, federal funds purchased, and repurchase agreements. Short-term borrowings increased \$7.9 million, or 11.5%, to \$76.2 million as of March 31, 2017. Other borrowings increased \$30 million, or 317.4%, to \$39.4 million as of March 31, 2017 from \$ 9.4 million as of December 31, 2016. This increase is due to new FHLB borrowings during the three-month period ending March 31, 2017.

Stockholders' equity. Stockholders' equity increased \$22.4 million, or 29.0%, to \$99.3 million at March 31, 2017 from \$77.0 million at December 31, 2016. This growth was largely the result of an increase in common stock of \$21.2 million, or 44.2%. The increase in common stock is primarily the result of the issuance of stock in relation to the Liberty Bank, N.A. acquisition (Note 9). This growth was also the result of increases in retained earnings of \$1.3 million. The change in retained earnings is due to the year to date net income offset by dividends paid. The increase in stockholders' equity was partially offset by the decrease in accumulated other comprehensive income ("AOCI") of \$169 thousand. The change to AOCI is due to available-for-sale securities fair value adjustments.

RESULTS OF OPERATIONS

General. Net income for the three months ended March 31, 2017, was \$2.1 million, a \$613,000, or 41.2% increase from the amount earned during the same period in 2016. Diluted earnings per share for the quarter decreased to \$0.78, compared to \$0.79 from the same period in 2016.

The Company's annualized return on average assets (ROA) and return on average equity (ROE) for the quarter were .84% and 8.73%, respectively, compared with .81% and 9.34% for the same period in 2016.

Net interest income. Net interest income, the primary source of revenue for the Company, is determined by the Company's interest rate spread, which is defined as the difference between income on earning assets and the cost of funds supporting those assets, and the relative amounts of interest-earning assets and interest-bearing liabilities. Management periodically adjusts the mix of assets and liabilities, as well as the rates earned or paid on those assets and liabilities in order to manage and improve net interest income. The level of interest rates and changes in the amount and composition of interest-earning assets and liabilities affect the Company's net interest income. Historically from an interest rate risk perspective, it has been management's goal to maintain a balance between steady net interest income growth and the risks associated with interest rate fluctuations. Net interest income for the three months ended March 31, 2017 totaled \$8.8 million, an increase of 38.49% from that reported in the comparable period of 2016. The net interest margin was 3.84% for the first quarter of 2017, down from the 3.87% reported for the same quarter of 2016.

Interest income. Interest income increased \$2.9 million, or 38.8%, for the three months ended March 31, 2017, compared to the same period in the prior year. This increase is attributable to an increase in interest and fees on loans (including the interest and fees on the loans acquired through the Liberty acquisition), partially offset by a decrease in interest earned on investment securities.

Interest earned on loans receivable increased \$3.0 million, or 48.7%, for the three months ended March 31, 2017, compared to the same period in the prior year. This is attributable to an increase in average loan balances of \$268.7 million, partially offset by a 2 basis point decrease in the average yield, to 4.65%. The net increase in interest and fees earned on loans receivable attributed to the Liberty acquisition is \$2.6 million for the three months ended March 31, 2017.

Interest earned on securities decreased by \$275,000 for the three months ended March 31, 2017 when compared to the same period in the prior year. The average balance decreased \$34.9 million, or 23.8% while the 4.3% yield on the investment portfolio increased by 1 basis point, from 4.2%, for the same period in the prior year.

Interest expense. Interest expense increased \$417,000, or 40.7%, for the three months ended March 31, 2017, compared to the same period in the prior year. The increase is largely attributable to a total increase of \$68.7 million, or 158.5%, in the average balance of borrowings, partially offset by a decrease in cost of 43 basis points. The Liberty acquisition resulted in a net increase of interest income of \$282,600 as of March 31, 2017.

Provision for loan losses. The provision for loan losses represents the charge to income necessary to adjust the allowance for loan and lease losses to an amount that represents management's assessment of the estimated probable incurred credit losses inherent in the loan portfolio. Each quarter management performs a review of estimated probable incurred credit losses in the loan portfolio. Based on this review, a provision for loan losses of \$165,000 was recorded for the quarter ended March 31, 2017, an increase of \$60,000, or 57.1%, from the quarter ended March 31, 2016. Nonperforming loans were \$8.0 million, or 1% of total loans at March 31, 2017 compared with \$10.5 million, or 1.98% at March 31, 2016. For the three months ended March 31, 2017, net loan charge-offs totaled \$43,000, or 0.01% of average loans, compared to net charge-offs of \$133,000 or 0.10%, for the first quarter of 2016.

Noninterest income. Noninterest income increased \$602,000 for the three months ended March 31, 2017 over the comparable 2016 period. This increase was largely the result of a net increase in investment security gains of \$437,000 for the three months ended March 31, 2017, \$488,000 of which is a result of the Company liquidating its investment in Liberty stock due to the acquisition. Also contributing to the increase in noninterest income is an increase in the gain on sale of loans of \$147,000.

Noninterest expense. Noninterest expense of \$7.3 million for the first quarter 2017 was 36.1%, or \$1.9 million more than the first quarter of 2016. Salaries and benefits, professional fees, and data processing costs increased \$916,000, or 32.9%, \$304,000, or 104.1%, and \$212,000, or 77.9%, respectively. These were partially offset by a gain on other real estate sales of \$35,000. The salary increase is mostly due to annual pay adjustments and the increase of employees due to the acquisition of Liberty Bank, N.A. Professional fees and data processing costs are also higher due to additional services provided related to the acquisition.

Provision for income taxes. The Company recognized \$736,000 in income tax expense, which reflected an effective tax rate of 26.0% for the three months ended March 31, 2017, as compared to \$302,000 with an effective tax rate of 16.9% for the comparable 2016 period. The provision is directly correlated to the increase in net income before taxes. The increase in the effective tax rate is due to a lower level of nontaxable income and certain non-deductible merger expenses.

CRITICAL ACCOUNTING ESTIMATES

The Company's critical accounting estimates involving the more significant judgments and assumptions used in the preparation of the consolidated financial statements as of March 31, 2017, have remained unchanged from December 31, 2016.

Average Balance Sheet and Yield/Rate Analysis. The following table sets forth, for the periods indicated, information concerning the total dollar amounts of interest income from interest-earning assets and the resultant average yields, the total dollar amounts of interest expense on interest-bearing liabilities and the resultant average costs, net interest income, interest rate spread and the net interest margin earned on average interest-earning assets. For purposes of this table, average balances are calculated using monthly averages and the average loan balances include nonaccrual loans and exclude the allowance for loan and lease losses, and interest income includes accretion of net deferred loan fees. Interest and yields on tax-exempt securities (tax exempt for federal income tax purposes) are shown on a fully tax-equivalent basis utilizing a federal tax rate of 34%. Yields and rates have been calculated on an annualized basis utilizing monthly interest amounts.

	For the Three Months Ended March 31,							
	2017				2016			
(Dollar amounts in thousands)	Average Balance	Interest	Average Yield/Cost		Average Balance	Interest	Average Yield/Cost	
Interest-earning assets:								
Loans	\$799,870	\$9,180	4.65	%	\$531,196	\$6,173	4.67	%
Investment securities (3)	111,373	855	4.31	%	146,245	1,130	4.23	%
Interest-bearing deposits with other banks	49,084	164	1.36	%	21,134	45	0.86	%
Total interest-earning assets	960,327	10,199	4.45	%	698,575	7,348	4.46	%
Noninterest-earning assets	59,525				36,695			
Total assets	\$1,019,852				\$735,270			
Interest-bearing liabilities:								
Interest-bearing demand deposits	\$82,187	\$50	0.25	%	\$59,931	\$42	0.28	%
Money market deposits	154,554	171	0.45	%	79,964	83	0.42	%
Savings deposits	179,342	123	0.28	%	178,827	128	0.29	%
Certificates of deposit	225,962	781	1.40	%	191,016	602	1.27	%
Borrowings	112,020	317	1.15	%	43,331	170	1.58	%
Total interest-bearing liabilities	754,065	1,442	0.78	%	553,069	1,025	0.75	%
Noninterest-bearing liabilities								
Other liabilities	168,202				118,313			
Stockholders' equity	97,585				63,888			
Total liabilities and stockholders' equity	\$1,019,852				\$735,270			
Net interest income		\$8,757				\$6,323		
Interest rate spread (1)			3.67	%			3.72	%

Net interest margin (2)	3.84	%	3.87	%
Ratio of average interest-earning assets to average interest-bearing liabilities	127.35	%	126.31	%

(1) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.

(2) Net interest margin represents net interest income as a percentage of average interest-earning assets.

(3) Tax-equivalent adjustments to interest income for tax-exempt securities were \$328 and \$407 for the three months ended March 31, 2017 and 2016, respectively.

Analysis of Changes in Net Interest Income. The following table analyzes the changes in interest income and interest expense, between the three month periods ended March 31, 2017 and 2016, in terms of: (1) changes in volume of interest-earning assets and interest-bearing liabilities and (2) changes in yields and rates. The table reflects the extent to which changes in the Company's interest income and interest expense are attributable to changes in rate (change in rate multiplied by prior period volume), changes in volume (changes in volume multiplied by prior period rate) and changes attributable to the combined impact of volume/rate (change in rate multiplied by change in volume). The changes attributable to the combined impact of volume/rate are allocated on a consistent basis between the volume and rate variances. Changes in interest income on securities reflects the changes in interest income on a fully tax-equivalent basis.

(Dollar amounts in thousands)	2017 versus 2016		
	Increase (decrease) due to		
	Volume	Rate	Total
Interest-earning assets:			
Loans receivable	\$3,094	\$(87)	\$3,007
Investment securities	(364)	89	(275)
Interest-bearing deposits with other banks	59	60	119
Total interest-earning assets	2,789	62	2,851
Interest-bearing liabilities:			
Interest-bearing demand deposits	15	(7)	8
Money market deposits	77	11	88
Savings deposits	-	(5)	(5)
Certificates of deposit	109	70	179
Borrowings	268	(121)	147
Total interest-bearing liabilities	469	(52)	417
Net interest income	\$2,320	\$114	\$2,434

LIQUIDITY

Management's objective in managing liquidity is maintaining the ability to continue meeting the cash flow needs of banking customers, such as borrowings or deposit withdrawals, as well as the Company's own financial commitments. The principal sources of liquidity are net income, loan payments, maturing and principal reductions on securities and sales of securities available for sale, federal funds sold and cash and deposits with banks. Along with its liquid assets, the Company has additional sources of liquidity available to ensure that adequate funds are available as needed. These include, but are not limited to, the purchase of federal funds, and the ability to borrow funds under line of credit agreements with correspondent banks and a borrowing agreement with the Federal Home Loan Bank of Cincinnati, Ohio and the adjustment of interest rates to obtain depositors. Management believes the Company has the capital adequacy, profitability and reputation to meet the current and projected needs of its customers.

For the three months ended March 31, 2017, the adjustments to reconcile net income to net cash from operating activities consisted mainly of depreciation and amortization of premises and equipment, the provision for loan losses, net amortization of securities and net changes in other assets and liabilities. For a more detailed illustration of sources and uses of cash, refer to the Condensed Consolidated Statements of Cash Flows.

INFLATION

Substantially all of the Company's assets and liabilities relate to banking activities and are monetary in nature. The consolidated financial statements and related financial data are presented in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"). GAAP currently requires the Company to measure the financial position and results of operations in terms of historical dollars, with the exception of securities available for sale, impaired loans and other real estate loans that are measured at fair value. Changes in the value of money due to rising inflation can cause purchasing power loss.

Management's opinion is that movements in interest rates affect the financial condition and results of operations to a greater degree than changes in the rate of inflation. It should be noted that interest rates and inflation do affect each other, but do not always move in correlation with each other. The Company's ability to match the interest sensitivity of its financial assets to the interest sensitivity of its liabilities in its asset/liability management may tend to minimize the effect of changes in interest rates on the Company's performance.

REGULATORY MATTERS

The Company is subject to the regulatory requirements of the Federal Reserve System as a bank holding company. The bank subsidiary is subject to regulations of the Federal Deposit Insurance Corporation ("FDIC") and the State of Ohio, Division of Financial Institutions.

The Federal Reserve Board and the FDIC have extensive authority to prevent and to remedy unsafe and unsound practices and violations of applicable laws and regulations by institutions and holding companies. The agencies may assess civil money penalties, issue cease-and-desist or removal orders, seek injunctions, and publicly disclose those actions. In addition, the Ohio Division of Financial Institutions possesses enforcement powers to address violations of Ohio banking law by Ohio-chartered banks.

REGULATORY CAPITAL REQUIREMENTS

Financial institution regulators have established guidelines for minimum capital ratios for banks, thrifts and bank holding companies. The net unrealized gain or loss on available-for-sale securities is generally not included in computing regulatory capital. In order to avoid limitations on capital distributions, including dividend payments, the Bank must hold a capital conservation buffer above the adequately capitalized risk-based capital ratios. The capital conservation buffer is being phased in from 0.0% for 2017 to 2.50% by 2019. Within the tabular presentation that follows is the adequately capitalized ratio plus capital conservation buffer that includes the fully phased-in 2.50% buffer.

The Bank met each of the well-capitalized ratio guidelines at March 31, 2017. The following table indicates the capital ratios for the Bank and Company at March 31, 2017 and December 31, 2016.

	As of March 31, 2017				
	Tier 1 Risk		Common Equity Tier 1		Total Risk
	Leverag	Based			Based
The Middlefield Banking Company	9.38 %	10.47 %	10.47	%	11.22 %
Middlefield Banc Corp.	8.95 %	10.17 %	10.17	%	10.93 %
Adequately capitalized ratio	4.00 %	6.00 %	4.50	%	8.00 %
Adequately capitalized ratio plus capital conservation buffer	4.00 %	8.50 %	7.00	%	10.50 %
Well-capitalized ratio (Bank only)	5.00 %	8.00 %	6.50	%	10.00 %

	As of December 31, 2016				
	Tier 1 Risk		Common Equity Tier 1		Total Risk
	Leverag	Based			Based
The Middlefield Banking Company	9.46 %	13.03 %	13.03	%	14.25 %
Middlefield Banc Corp.	9.27 %	13.07 %	13.07	%	15.75 %
Adequately capitalized ratio	4.00 %	6.00 %	4.50	%	8.00 %
Adequately capitalized ratio plus capital conservation buffer	4.00 %	8.50 %	7.00	%	10.50 %
Well-capitalized ratio (Bank only)	5.00 %	8.00 %	6.50	%	10.00 %

Item 3. Quantitative and Qualitative Disclosures about Market Risk

ASSET AND LIABILITY MANAGEMENT

The primary objective of the Company's asset and liability management function is to maximize the Company's net interest income while simultaneously maintaining an acceptable level of interest rate risk given the Company's operating environment, capital and liquidity requirements, performance objectives and overall business focus. The principal determinant of the exposure of the Company's earnings to interest rate risk is the timing difference between the re-pricing or maturity of interest-earning assets and the re-pricing or maturity of its interest-bearing liabilities. The Company's asset and liability management policies are designed to decrease interest rate sensitivity primarily by shortening the maturities of interest-earning assets while at the same time extending the maturities of interest-bearing liabilities. The Board of Directors of the Company continues to believe in a strong asset/liability management process in order to insulate the Company from material and prolonged increases in interest rates. Mortgage-backed securities generally increase the quality of the Company's assets by virtue of the insurance or guarantees that back them, are more liquid than individual mortgage loans and may be used to collateralize borrowings or other obligations of the Company.

The Company's Board of Directors has established an Asset and Liability Management Committee consisting of outside directors and senior management. This committee, which meets quarterly, generally monitors various asset and liability management policies and strategies.

Interest Rate Sensitivity Simulation Analysis

The Company engages an external consultant to facilitate income simulation modeling on a quarterly basis. This modeling measures interest rate risk and sensitivity. The Asset and Liability Management Committee of the Company believes the various rate scenarios of the simulation modeling enables the Company to more accurately evaluate and manage the exposure of interest rate fluctuations on net interest income, the yield curve, various loan and mortgage-backed security prepayments, and deposit decay assumptions.

Earnings simulation modeling and assumptions about the timing and volatility of cash flows are critical in net portfolio equity valuation analysis. Particularly important are the assumptions driving mortgage prepayments and expected attrition of the core deposit portfolios. These assumptions are based on the Company's historical experience and industry standards and are applied consistently across all rate risk measures.

The Company has established the following guidelines for assessing interest rate risk:

Net interest income simulation- Projected net interest income over the next twelve months will not be reduced by more than 10% given a gradual shift (i.e., over 12-months) in interest rates of up to 200 basis points (+ or -) and assuming no balance sheet growth.

Portfolio equity simulation- Portfolio equity is the net present value of the Company's existing assets and liabilities. Given a 200 basis point immediate and permanent increase in market interest rates, portfolio equity may not correspondingly decrease or increase by more than 20% of stockholders' equity. Given a 100 basis point immediate and permanent decrease in market interest rates, portfolio equity may not correspondingly decrease or increase by more than 10% of stockholders' equity.

The following table presents the simulated impact of a 200 basis point upward or 100 basis point downward shift of market interest rates on net interest income, and the change in portfolio equity. This analysis was done assuming the interest-earning asset and interest-bearing liability levels at March 31, 2017 remained constant. The impact of the market rate movements was developed by simulating the effects of rates changing gradually over a one-year period from the March 31, 2017 levels for net interest income and portfolio equity. The impact of market rate movements was developed by simulating the effects of an immediate and permanent change in rates at March 31, 2017 for portfolio equity:

	Increase 200 Basis Points		Decrease 100 Basis Points	
Net interest income - increase (decrease)	(1.38)%		(2.66)%	
Portfolio equity - increase (decrease)	6.50 %		(17.20)%	

Item 4. Controls and Procedures

Controls and Procedures Disclosure

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As of the end of the period covered by this quarterly report, an evaluation was carried out under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are, to the best of their knowledge, effective to ensure that information required to be disclosed by the Corporation in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Subsequent to the date of their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that there were no significant changes in internal control or in other factors that could significantly affect the Company's internal controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

A material weakness is a significant deficiency (as defined in Public Company Accounting Oversight Board Auditing Standard No. 2), or a combination of significant deficiencies, that results in there being more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis by management or employees in the normal course of performing their assigned functions.

Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the Company's most recent fiscal quarter that have materially

affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

None

Item 1a. There are no material changes to the risk factors set forth in Part I, Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year ended December 31, 2016. Please refer to that section for disclosures regarding the risks and uncertainties related to the Company's business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults by the Company on its Senior Securities

None

Item 4. Mine Safety Disclosures

N/A

Item 5. Other information

None
