May 11, 2011

U.S. SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. **000-19333**

Bion Environmental Technologies, Inc.

(Name of registrant in its charter)

Colorado

84-1176672

(State or other jurisdiction of incorporation or formation)

(I.R.S. employer identification number)

Box 566 / 1774 Summitview Way

Crestone, Colorado 81131

(Address of principal executive offices)

(212) 758-6622

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). ☐ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐

Accelerated filer ☐

Non-accelerated filer ☐

(Do not check if a smaller
reporting company)

Smaller reporting company ☒

SEC 1296 (03-10) Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

☐ Yes ☒ No

APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY

PROCEEDINGS DURING THE PRECEDING FIVE YEARS: Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. **Not applicable.**

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. On May 9, 2011, there were 13,472,900 Common Shares issued and 12,768,591 Common Shares outstanding.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements, within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve substantial risks and uncertainties. Forward-looking statements generally can be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "estimate," "anticipate," "project," "predict," "plan," "believe" or "continue" or the negative thereof or variations thereon or similar terminology. The expectations reflected in forward-looking statements may prove to be incorrect.

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10-Q

BION ENVIRONMENTAL TECHNOLOGIES, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE AND NINE MONTHS ENDED MARCH 31, 2011

1.

ORGANIZATION, NATURE OF BUSINESS, GOING CONCERN AND MANAGEMENT S PLANS:

Organization and nature of business:

Bion Environmental Technologies, Inc. (Bion or We or the "Company") was incorporated in 1987 in the State of Colorado.

Bion s patented and proprietary technology provides a comprehensive environmental solution to a significant source of pollution in US agriculture, Confined Animal Feeding Operations ("CAFO's"). Bion's technology produces substantial reductions of both nutrient releases to water and air emissions including ammonia (which is subsequently re-deposited to the ground) from livestock waste streams based upon our research to date. Because Bion's technology reduces the harmful releases and emissions from a CAFO on which it is utilized, the CAFO can potentially increase its herd concentration while lowering or maintaining its level of nutrient releases and atmospheric emissions.

From 2003 through early 2008, the Company primarily focused on completing re-development of its technology platform and business model. As such, during that period we elected not to pursue near- term revenue opportunities such as retrofitting existing CAFO's with our waste management solutions, because such efforts would have diverted scarce management and financial resources and negatively impacted our ability to complete: 1) re-development of our technology for environmentally sound treatment of CAFO waste streams and 2) development of our integrated technology platform in support of large-scale sustainable Integrated Projects (defined below) including renewable energy production.

Bion is now actively pursuing business opportunities in two broad areas 1) retrofit and environmental remediation of existing CAFO s to reduce nutrient (nitrogen and phosphorus) releases and gaseous emissions (ammonia, greenhouse gases, volatile organic compounds, etc.) in order to clean the air and water in the surrounding areas (as described below) and 2) development of "closed loop" Integrated Projects.

We believe that Bion's technology platform allows the integration of large-scale CAFO's and their end-product users, renewable energy production from the CAFO waste stream, on site utilization of the renewable energy generated and biofuel/ethanol production in an environmentally and economically sustainable manner while reducing the aggregate capital expense and operating costs for the entire integrated complex ("Integrated Projects" or "Projects"). In the context of Integrated Projects, Bion's waste treatment process, in addition to mitigating polluting releases, generates renewable energy from cellulosic portions of the CAFO waste stream which renewable energy can be utilized by integrated facilities including ethanol plants, CAFO end-product processors (including cheese, ice cream and/or bottling plants in the case of dairy CAFO s and/or slaughter and/or processing facilities in the context of beef CAFO s)

and/or other users as a natural gas replacement. Bion is presently involved in the very early development stage regarding a beef-based Integrated Projects in New York and Pennsylvania and is involved in pre-development evaluations regarding opportunities for Integrated Projects in Nebraska and elsewhere in the Midwest and the North Central United States (dairy and/or beef).

F-5

On September 27, 2008, the Company executed an agreement with Kreider Farms (and its affiliated entities) (collectively "Kreider") to design, construct and operate (through its wholly-owned subsidiaries, Bion Services Group, Inc. ("Bion Services ") and Bion PA-1 LLC ("LLC ") a Bion system to treat the waste of 1,200 milking dairy cows (milkers, dry cows and heifers) at the Kreider Dairy, located in Mannheim, Pennsylvania. In addition, the agreement provides for a second phase which will treat the wastes from the rest of Kreider's herd and includes renewable energy production from the cellulosic solid wastes from the Phase 1 system together with the waste stream from Kreider's poultry facilities for use at the facilities and/or for market sales. The Kreider projects will be owned and operated by Bion through subsidiaries, in which Kreider will have the option to purchase a noncontrolling interest. To complete these projects substantial capital (equity and/or debt) has been and will continue to be expended. Additional funds will be expended for construction. Upon successful construction and operation of these systems, the Company anticipates that it will earn revenue from the sale of nutrient (and other) environmental credits related to the Kreider system and through sales of renewable energy generated by the Kreider systems.

During January 2009, the Board of Pennsylvania Infrastructure Investment Authority ("Pennvest ") approved a loan up to \$7.8 million ("Pennvest Loan ") to LLC for development and construction of the Phase 1 System at Kreider. After substantial unanticipated delays over the previous year, on August 12, 2010 the Company received its permit for construction of the Phase I Kreider System. Initial construction-related activities, including bidding and ordering of equipment, commenced during October 2010. The closing/settlement of the Pennvest Loan took place on November 3, 2010, and LLC received the initial drawdown/reimbursement from Pennvest pursuant to the Pennvest Loan on January 6, 2011(see note 7). Bion is in the process of finalizing the construction of the Phase 1 Kreider System and will enter a period of system operation shakedown during May 2011. It is anticipated that the Phase 1 Kreider System will be in full, stabilized operation by mid to late summer 2011. The Pennsylvania Department of Environmental Protection recently re-certified the nutrient credits for this project. Work continues related to the details of the second phase of the Kreider project.

Going concern and management's plans:

The consolidated financial statements have been prepared assuming the Company will continue as a going concern. The Company has not generated revenues and has incurred net losses of approximately \$2,976,000 and \$1,318,000 during the years ended June 30, 2010 and 2009, respectively, and a net loss of approximately \$5,982,000 for the nine months ended March 31, 2011. These factors raise substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments relating to the recoverability or classification of assets or the amounts and classification of liabilities that may result should the Company be unable to continue as a going concern. The following paragraphs describe management's plans with regard to these conditions.

During the year ended June 30, 2010, the Company sold 18,000 shares of the Company's Series C Preferred shares at \$100 per share, which resulted in net proceeds to the Company of \$1,566,000 after commissions. During the nine months ended March 31, 2011, the Company sold an additional 14,150 shares of the Company's Series C Preferred shares at \$100 per share, which resulted in net proceeds to the Company of \$1,231,050. Also during the nine months ended March 31, 2011, the Company sold 311,746 shares of its common stock for net proceeds of \$813,200.

F-6

At March 31, 2011, the Company has a working capital surplus and a total deficit of approximately \$491,000 and \$1,655,000, respectively.

The Company continues to explore sources of additional financing to satisfy its current operating requirements. While the Company currently does not face a severe working capital shortage, it is not currently generating any revenues. The Company will need to obtain additional capital to fund its operations and technology development, to satisfy existing creditors, to develop Projects and to construct and operate the Kreider Farm facilities. The Company anticipates that it will seek to raise from \$5,000,000 to \$50,000,000 (debt and equity) during the next twelve months.

There is no assurance, especially in the extremely unsettled capital markets that presently exist, that the Company will be able to obtain the funds that it needs to stay in business, complete its technology development or to successfully develop its business.

There can be no assurance that funds required during the next twelve months or thereafter will be generated from operations or that those funds will be available from external sources such as debt or equity financings or other potential sources. The lack of additional capital resulting from the inability to generate cash flow from operations or to raise capital from external sources would force the Company to substantially curtail or cease operations and would, therefore, have a material adverse effect on its business. Further, there can be no assurance that any such required funds, if available, will be available on attractive terms or that they will not have a significantly dilutive effect on the Company's existing shareholders. All of these factors have been exacerbated by the extremely unsettled credit and capital markets presently existing.

2.

SIGNIFICANT ACCOUNTING POLICIES:

Principles of consolidation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Bion Integrated Projects Group, Inc. (formerly Bion Dairy Corporation) (Projects Group), Bion Technologies, Inc., BionSoil, Inc., Bion Services, Bion PA-1 LLC, and Bion PA-2 LLC; and its majority owned subsidiary, Centerpoint Corporation (Centerpoint) (Note 3). All significant intercompany accounts and transactions have been eliminated in consolidation.

The accompanying consolidated financial statements have been prepared without audit pursuant to the rules and regulations of the SEC. The consolidated financial statements reflect all adjustments (consisting of only normal recurring entries) that, in the opinion of management, are necessary to present fairly the financial position at March 31, 2011 and the results of operations and cash flows of the Company for the three and nine months ended March 31, 2011 and 2010. Operating results for the three and nine months ended March 31, 2011 are not necessarily indicative of the results that may be expected for the year ending June 30, 2011.

The unaudited consolidated financial statements should be read in conjunction with the Company's audited financial statements and footnotes thereto included in its Annual Report on Form 10-K for the year ended June 30, 2010.

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10-Q

BION ENVIRONMENTAL TECHNOLOGIES, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE AND NINE MONTHS ENDED MARCH 31, 2011

Loss per share:

Basic loss per share amounts are calculated using the weighted average number of shares of common stock outstanding during the period. Diluted loss per share assumes the conversion, exercise or issuance of all potential common stock instruments, such as options or warrants, unless the effect is to reduce the loss per share. During the three and nine months ended March 31, 2011 and 2010, the basic and diluted loss per share is the same, as the impact of potential dilutive common shares is anti-dilutive.

The following table represents the warrants, options and convertible securities excluded from the calculation of diluted loss per share:

Fair value measurements:

The fair value of cash, line of credit and accounts payable approximates their carrying amounts due to their short-term maturities. The fair value of the loan payable approximates its carrying value as it bears interest at rates

commensurate with market rates. The fair value of the redeemable preferred stock approximates its carrying value due to the dividends accrued on the preferred stock which are reflected as part of the redemption value.

Depreciation expense was \$4,165 and \$4,333 for the three months ended March 31, 2011 and 2010, respectively, and \$12,589 and \$12,531 for the nine months ended March 31, 2011 and 2010, respectively.

5.

LINE OF CREDIT:

In December 2010, the Company entered into a loan and security agreement with a lender whereby the lender extended a credit facility of up to \$1,500,000 in interim financing for the purchase of equipment and payment of construction costs of its Phase 1 System at the Kreider Dairy covered under the Pennvest Loan. As of March 31, 2011, the amount owed under the line of credit is \$183,530. The credit facility bears interest at the prime rate published in the Wall Street Journal plus 2% and requires a \$25,000 interest reserve account. The credit facility is collateralized by the Pennvest loan proceeds and is subject to many standard debt covenants and conditions regarding payment and representation. Should the Company default on the line of credit and not remedy the default within 10 days of notice from the lender, the principal and interest shall be payable immediately. The maturity date of the line

of credit is January 5, 2012. For the three and nine months ended March 31, 2011 the Company capitalized interest expense of \$6,668 related to the line of credit.

6.

DEFERRED COMPENSATION:

As of March 31, 2010, the Company owed Brightcap Capital Ltd. (Brightcap) for services provided by Mr. Bassani, deferred compensation of \$150,000. The Company entered into an agreement with Brightcap in June 2009, whereby the deferred compensation earned by Brightcap from January 1, 2009 through June 30, 2009, totaling \$150,000, was made due July 1, 2010 and convertible until July 1, 2010 into the Company's restricted common stock, at Brightcap's option, at a price of \$1.50 per share, the fair value of the shares at the date of the agreement. As the conversion price of \$1.50 per share approximated the fair value of the shares at the time the conversion agreement was entered into, no beneficial conversion feature existed. During June 2010, the Company entered into an extension agreement with Brightcap pursuant to which the maturity date and the conversion date of the deferred compensation were extended to July 1, 2011. As consideration for the extension, an additional \$15,000 principal was added to the obligation and the deferred compensation accrues interest commencing July 1, 2010 at 10% per annum. As of March 31, 2011, the deferred compensation and accrued interest total \$177,375. Interest expense for the three and nine months ended March 31, 2011 was \$4,125 and \$12,375, respectively.

F-9

7.

LOAN PAYABLE:

As of March 31, 2011, LLC, the Company's wholly owned subsidiary, owes \$5,694,857 under the terms of the Pennvest Loan related to the construction of the Phase 1 System at Kreider Farms. The Pennvest Loan is structured in phases (pre and post-completion of permitting/commencement of construction) and Pennvest's disbursements take the form of reimbursements of qualified sums expended by LLC. In connection with the Pennvest Loan, the Company has provided a technology guaranty regarding nutrient reduction performance of the Kreider System which will expire when the Kreider System's nutrient reduction performance has been demonstrated. The closing/settlement of the Pennvest Loan took place on November 3, 2010, and as of March 31, 2011, LLC has submitted four requests for drawdowns/reimbursements from Pennvest totaling \$5,994,587 of which Pennvest has held \$299,730 as retainage pending completion of the project and has loaned LLC \$5,694,857. LLC has been using the proceeds from the Pennvest Loan to reduce its current obligations related to the Kreider project. The terms of the Pennvest Loan provide for funding of up to \$7,754,000 which is to be repaid by interest-only payments for three years, followed by an additional ten-year amortization of principal. The Pennvest Loan accrues interest at 2.547% for years 1 through 5 and 3.184% for years 6 through maturity. The Pennvest Loan is collateralized by a pledge of all revenues generated from the project including, but not limited to, revenues generated from nutrient reduction credit sales and by-product sales. In addition, in consideration for the excess credit risk associated with the project, Pennvest is entitled to participate in

the profits from the project calculated on a net cash flow basis, as defined. Bion is in the process of finalizing construction of the Phase 1 Kreider System. For the three and nine months ended March 31, 2011, the Company has incurred interest expense related to the Pennvest Loan of \$18,912, of which \$16,963 has been capitalized as a cost of the Phase 1 System.

8.

STOCKHOLDERS' EQUITY:

Series B Preferred stock:

In March 2009, the Company authorized the issuance of 50,000 shares of Series B Preferred stock; which have a par value of \$0.01 per share and are issuable at a price of \$100 per share. The Series B Preferred stock is convertible for three years from the date of issuance at the option of the holder into shares of the Company's common stock calculated by dividing the sum of the \$100 per share purchase price plus any accrued and unpaid dividends by \$2.00 (the Conversion Rate). The Series B Preferred stock shall be automatically and mandatorily converted into shares of the Company's common stock at the Conversion Rate upon each occasion (at least 30 calendar days apart) after a date of six months subsequent to the initial issuance of the Series B Preferred stock on which the closing price of the Company's common stock has been equal to or greater than 150% of the Conversion Rate (initially \$3.00) for twenty consecutive trading days with a reported average daily trading volume of 10,000 shares or more. The Series B Preferred stock may be redeemable at the option of the Company after one year from the issuance with 10 days written notice, at a price equal to \$100 per share plus any accrued unpaid dividends. During the 10 day period, the holder may elect to convert the Series B Preferred stock to the Company's common stock at the Conversion Rate. On the third anniversary of issuance, the Company shall redeem the outstanding Series B Preferred stock at the price of \$100 per share plus any accrued unpaid dividends. The Series B Preferred stock accrues dividends at a rate of 2.5% per quarter (10% per year) and shall be earned and accrued or paid quarterly.

F-10

Because the Series B Preferred stock is redeemable in cash at a fixed price (\$100 per share plus accrued unpaid dividends) on a fixed date (the third anniversary of issuance), the Company has classified the Series B Preferred stock outside of stockholders' equity. Therefore, the Series B Preferred stock has been recorded at its redemption value as temporary equity in the accompanying consolidated balance sheet. Dividends on the Series B Preferred stock are reflected as part of the redemption value with an offset to reduce additional paid-in capital, and are included in the determination of net loss applicable to common stockholders.

The Company declared dividends on July 31, 2010 for the Series B Preferred stockholders with a record date of June 30, 2010, totaling \$70,425; which were paid on August 16, 2010.

The Company declared dividends on November 12, 2010 for the Series B Preferred stockholders with a record date of September 30, 2010, totaling \$70,425; which were paid on November 16, 2010.

The Company declared dividends on January 1, 2011 for the Series B Preferred stockholders with a record date of December 31, 2010, totaling \$70,425; which were paid on February 15, 2011.

The Company declared dividends on April 22, 2011 for the Series B Preferred stockholders with a record date of March 31, 2011, totaling \$70,425, which are expected to be paid on or about May 17, 2011.

Series C Preferred stock:

During December 2009, the Company authorized the issuance of 60,000 shares of Series C Preferred stock, which have a par value of \$0.01 per share and are issuable at a price of \$100 per share. The Series C Preferred stock is convertible at the option of the holder at any time from the date of issuance, into shares of the Company's common stock calculated by dividing the sum of the \$100 per share purchase price plus any accrued and unpaid dividends by \$4.00 (the Conversion Rate), provided the shares have not been redeemed into common shares by the Company at its sole election. A portion (up to 100% as calculated below) of each share of Series C Preferred stock shall be automatically and mandatorily converted into shares of the Company's common stock at the Conversion Rate upon each occasion (at least 30 calendar days apart) after a date of six months subsequent to the initial issuance of the Series C Preferred stock on which the closing price of the Company's common stock has been equal or greater than 150% of the Conversion Rate (initially \$6.00) for twenty consecutive trading days with a reported average daily trading volume of 10,000 shares or more. On each occasion for mandatory conversion as set forth above, a sufficient portion of the outstanding shares of Series C Preferred stock shall be prorata converted so that the holders of the Series C Preferred stock receive an aggregate number of shares of the Company's restricted common stock equal to 7.5 times the average reported daily volume of trading in the Company's publicly traded common stock for the applicable twenty day period and each outstanding share shall thereafter be proportionately reduced in its rights to represent the effect of the partial conversions. The Series C Preferred stock accrues dividends at a rate of 2.5% per quarter (10% per year) and shall be earned and accrued or paid quarterly.

Dividends on the Series C Preferred stock are reflected as part of the redemption value with an offset to reduce additional paid-in capital, and are included in the determination of net loss applicable to common stockholders.

During the nine months ended March 31, 2011, the Company issued 14,150 shares of Series C Preferred stock for cash proceeds of \$1,415,000 (net proceeds of \$1,231,050 after commissions).

The Company declared dividends on July 31, 2010 for the Series C Preferred stockholders with a record date of June 30, 2010 totaling \$39,592; which were paid on August 16, 2010.

The Company declared dividends on November 12, 2010 for the Series C Preferred stockholders with a record date of September 30, 2010 totaling \$47,712; which were paid on November 16, 2010.

The Company declared dividends on January 1, 2011 for the Series C Preferred stockholders with a record date of December 31, 2010 totaling \$66,212; which were paid on February 15, 2011.

The Company declared dividends on April 22, 2011 for the Series C Preferred stockholders with a record date of March 31, 2011 totaling \$80,375, which are expected to be paid on or about May 17, 2011.

Common stock:

Holders of common stock are entitled to one vote per share on all matters to be voted on by common stockholders. In the event of liquidation, dissolution or winding up of the Company, the holders of common stock are entitled to share in all assets remaining after liabilities have been paid in full or set aside and the rights of any outstanding preferred stock holders have been satisfied. Common stock has no preemptive, redemption or conversion rights. The rights of holders of common stock are subject to, and may be adversely affected by, the rights of the holders of any outstanding series of preferred stock or any series of preferred stock the Company may designate in the future.

Centerpoint holds 704,309 shares of the Company's common stock. These shares of the Company's common stock held by Centerpoint are for the benefit of its shareholders without any beneficial interest. The Company accounts for these shares similar to treasury stock.

During the nine months ended March 31, 2011, the Company issued 113,721 shares of the Company's restricted common stock at prices ranging from \$1.50 to \$3.19 per share for consulting services valued at \$271,940, in aggregate, to various consultants and an employee.

During the nine months ended March 31, 2011, the Company sold 311,746 of the Company's common stock for net proceeds of \$813,200.

On December 31, 2010, the Company declared stock bonuses to certain key employees and a consultant at \$2.90 per share, the approximate market value on the date of the grant totaling \$536,500 for services performed through December 31, 2010. The Company issued 185,000 shares of its common stock and recorded non-cash compensation expense of \$536,500 during the nine months ended March 31, 2011.

On January 1, 2011 the Company declared a deferred stock bonus of 50,000 shares to Mr. Smith and recognized \$145,000 of non-cash compensation expense. The stock bonus is contingent upon the Company's stock price exceeding \$10.00 and does not require that Mr. Smith remains employed by the Company.

F-12

In July 2009, the Company issued 130,000 common shares of the Company as stock bonuses to certain key employees and a consultant at \$1.01 per share, the approximate market value on the date of grant, totaling \$131,300. The stock bonuses are subject to vesting and during the nine months ended March 31, 2011, \$3,367 was recorded as compensation expense and \$13,467 was capitalized as project construction in progress as it directly related to construction services provided by employees and consultants. As of March 31, 2011 the stock bonuses are fully vested.

During the nine months ended March 31, 2011, 20,000 warrants were exercised at \$2.00 per share for the purchase of 20,000 shares of the Company's common stock for proceeds of \$40,000.

In July 2010, warrants to purchase 200,000 shares of the Company's common stock at \$2.00 per share were issued pursuant to an extension agreement with Mr. Smith (Note 10). These warrants were determined to have a fair value of \$0.10 per warrant and expire on January 15, 2019. The fair value of these warrants was determined to be \$0.10 per warrant based on factors including the evaluation of the Company's fair value as of the date of the issuance, consideration of the Company's limited liquid resources and business prospects, the market price of the Company's stock in its mostly inactive public market, and the historical valuation and purchases of the Company's warrants. The Company recorded non-cash compensation expense of \$20,000 related to the warrant issuance.

From July 1, 2010 through March 31, 2011, warrants to purchase 135,000 shares of the Company's common stock at \$2.25 per share were issued pursuant to an agreement with two consultants. The warrants were determined to have a fair value of \$0.25 per warrant and expire on December 31, 2015. The fair value of these warrants was determined to be \$0.25 per warrant based on factors including the evaluation of the Company's fair value as of the date of the Company's agreement to issue the warrants, consideration of the Company's limited liquid resources and business prospects, the market price of the Company's stock in its mostly inactive public market and the historical valuation and purchases of the Company's warrants. The Company recorded non-cash compensation expense of \$33,750 related to the warrant issuances.

During the nine months ended March 31, 2011, 20,000 warrants were exercised to purchase 40,000 shares of the Company's common stock.

The weighted-average exercise price for the outstanding warrants is \$2.04, and the weighted-average remaining contractual life as of March 31, 2011 is 7.23 years.

Stock options:

The Company's 2006 Consolidated Incentive Plan (the "2006 Plan"), as amended, provides for the issuance of options to purchase up to 6,000,000 shares of the Company's common stock. Terms of exercise and expiration of options granted under the 2006 Plan may be established at the discretion of the Board of Directors, but no option may be exercisable for more than ten years.

In December 2010, the Board of Directors, in an effort to retain key employees and consultants, approved the modification of certain options to certain employees and consultants resulting in the extension of certain expiry dates. As a result of the modifications, the Company recorded incremental non-cash compensation expense of \$891,203 for the nine months ended March 31, 2011 and approximately \$13,000 of additional non-cash compensation will be recognized over a weighted average period of approximately 1 year.

In January and March 2011, the Company entered into new employment agreements with two employees which vested stock options previously granted to the employees during May 2008, with issuance and vesting contingent upon the signing of new employment agreements. The new employment agreements also entitled the employees to modifications of stock options resulting in the extension of certain expiry dates which resulted in incremental non-cash compensation expense of \$263,700 being recorded for the nine months ended March 31, 2011.

F-14

The Company recorded compensation expense related to employee stock options of \$979,499 and \$40,899 for the three months ended March 31, 2011 and 2010, respectively, and \$3,011,535 and \$208,976 for the nine months ended March 31, 2011 and 2010, respectively. The Company granted 2,045,000 and 195,000 options during the nine months ended March 31, 2011 and 2010, respectively. The fair value of the options granted during the nine months ended March 31, 2011 and 2010 were estimated on the grant date using the Black-Scholes option-pricing model with the following assumptions:

The expected volatility was based on the historical price volatility of the Company's common stock. The dividend yield represents the Company's anticipated cash dividend on common stock over the expected term of the stock options. The U.S. Treasury bill rate for the expected term of the stock options was utilized to determine the risk-free interest rate. The expected term of stock options represents the period of time the stock options granted are expected to be outstanding based upon management's estimates.

9.

OPERATING LEASE:

The Company entered into a non-cancellable operating lease commitment for office space in New York, effective August 1, 2006 and expiring November 30, 2013. In conjunction with the signing of the lease, the Company provided the lessor with a secured letter of credit. As of March 31, 2011, the Company has reflected \$57,315 as restricted cash related to the secured letter of credit. The Company's obligations under the lease are partially guaranteed by Mr.

Salvatore Zizza, a former officer and director of the Company. The Company has entered into three separate agreements to sub-lease approximately 100% of the Company's lease obligation, and the tenants have also agreed to reimburse the Company for leasehold improvements and furnishings. Because the lease contains an escalation clause, the Company is recognizing rent under the straight-line method resulting in an average monthly rent expense of \$15,820. The Company is also recognizing the sub-lease rental income from its tenants under the straight-line method, with a monthly average of \$17,242. The difference between the straight-line method, and the actual lease payments has resulted in a deferred rent liability of \$49,320 as of March 31, 2011. Rent expense net of contractual and month-to-month sub-lease rental income, was nil and \$1,838 for the three months ended March 31, 2011 and 2010, respectively, and nil and \$20,509 for the nine months ended March 31, 2011 and 2010, respectively.

F-16

At March 31, 2011, future minimum rental payments due under non-cancelable leases and future minimum rental payments to be received under non-cancelable subleases are:

Fiscal year:

Effective January 1, 2009, Mr. Zizza entered into a Master Sublease with the Company pursuant to which Mr. Zizza became a sublessee and for a one year initial period, made all payments pursuant to the lease and managed the lease

premises. Rental payments from existing sub-tenants are being deposited into a Company bank account such that Mr. Zizza utilizes those funds towards the monthly lease payment. During November 2009, Mr. Zizza exercised his option to continue the Master Sublease for the entire term of the lease. Mr. Zizza fulfilled his obligations under the Master Sublease during the one-year initial period and in January 2010 he received the funds from the release of the restricted cash securing the Company's letter of credit of \$28,658. Since Mr. Zizza exercised the option to continue the Master Sublease for the entire term of the lease, Mr. Zizza will be entitled to the balance of restricted funds securing the letter of credit of approximately \$57,000 if he fulfills his obligations pursuant to the Master Sublease.

10.

COMMITMENTS AND CONTINGENCIES:

Employment and consulting agreements:

On January 11, 2009, the Company and Mr. Smith entered into the Smith Agreement whereby Mr. Smith agreed to continue to hold positions of Director, President and General Counsel of the Company and its subsidiaries at an annual salary of \$150,000. Pursuant to the Smith Agreement, Mr. Smith was granted a \$37,500 bonus in the form of a warrant (and extension of outstanding warrants previously issued to Mr. Smith), immediately vested, to purchase 300,000 shares of the Company's common stock at \$0.75 per share until December 31, 2018, and Mr. Smith agreed to accept pre-payment of his calendar year 2009 base compensation of \$150,000 in the form of 200,000 restricted shares of Company common stock at a price of \$0.75 per share. In addition, Mr. Smith converted his deferred compensation as of December 31, 2008 into shares of the Company's common stock. On September 30, 2009, the Company and Mr. Smith entered into an extension agreement whereby Mr. Smith will continue to hold his current position in the Company through a date no later than December 31, 2010. Commencing January 1, 2010, Mr. Smith is paid a monthly salary of \$16,000 in addition to a cash bonus of \$15,000 paid in January 2010. In addition Mr. Smith was granted a \$20,000 bonus payable in warrants to purchase 200,000 shares of the Company's common stock at a price of \$2.50 per share until January 15, 2019. Effective July 27, 2010 the Company entered into an extension agreement whereby Mr. Smith will continue to hold his current position in the Company through a date no later than December 31, 2011. Commencing September 1, 2010, Mr. Smith is paid a monthly salary of \$19,000 in addition to a cash bonus of \$20,000 that was paid in January 2011. In addition Mr. Smith was granted a \$20,000 bonus payable in warrants to purchase 200,000 shares of the Company's common stock at a price of \$2.00 per share until January 15, 2019.

F-17

Effective March 31, 2005, an agreement with Brightcap, through which the services of Dominic Bassani are provided, was extended through March 31, 2009. Under the terms of the agreement, Brightcap was paid \$300,000 annually for Mr. Bassani's services. On January 11, 2009, the Company entered in the Brightcap Agreement, which extends Mr. Bassani's services under the terms of the March 31, 2005 agreement for up to an additional six months. In addition, Mr. Bassani was granted a bonus of \$125,000 in the form of a) warrant, immediately vested, to purchase 1,000,000 shares of the Company's common stock at \$0.75 per share until December 31, 2018 and b) the extension of all warrants previously issued to either Brightcap or Mr. Bassani, now held by their donees, to December 31, 2018. The

Brightcap Agreement also required that upon the consummation of the next financing received by the Company in excess of \$1,000,000 net proceeds, the Company would no longer defer compensation earned by Brightcap, rather it will be paid in cash. Since July 2009, Brightcap has been paid in cash. The Brightcap Agreement granted Brightcap the right to convert its existing deferred compensation as of December 31, 2008 of \$175,000 into 233,334 shares of the Company's common stock at a price of \$0.75 per share until December 31, 2009 which right was extended to January 14, 2010, on which date the conversion took place (Note 6). The Brightcap Agreement also extended the maturity date of Mr. Bassani's \$50,000 promissory note to June 30, 2009 and allowed for the conversion of the principal and interest, in whole or in part, at the election of Mr. Bassani, into the Company's restricted common shares at \$0.75 per share. The promissory note was converted on June 30, 2009. On September 30, 2009 the Company entered into an extension agreement with Brightcap pursuant to which Mr. Bassani will provide services to the Company through September 30, 2012 for \$312,000 annually. In conjunction with the extension agreement, Mr. Bassani was granted a \$60,000 bonus payable in warrants to purchase 600,000 shares of the Company's common stock at a price of \$2.50 per share until January 15, 2019.

Effective September 18, 2006, the Company entered into a four-year employment agreement with Jeremy Rowland whereby Mr. Rowland assumed the position of Chief Operating Officer of Dairy at an annual salary of \$150,000. In June 2008, the employment agreement terms were extended through July 1, 2012. Mr. Rowland now serves as Chief Operating Officer of the Company's Services Group subsidiary.

The Company approved an employment agreement contract extension effective January 1, 2011 with Craig Scott whereby Mr. Scott will continue to act as Vice President of Capital Markets and Shareholder Relations through December 31, 2011, at an annual salary of \$144,000.

Effective January 1, 2011, the Company entered into an employment agreement with Bill O'Neill, pursuant to which Mr. O'Neill will act as Chief Executive Officer and director of the Company for a period of four years and will be paid \$300,000 annually. The agreement also granted Mr. O'Neill 750,000 options to purchase common shares of the Company at an exercise price of \$3.10 per share, of which 300,000 options were immediately vested and the remaining 450,000 options will vest quarterly over the course of the employment agreement. The options expire on January 15, 2018.

F-18

Effective January 1, 2011, the Company entered into an employment agreement with Edward Schafer pursuant to which for a period of three years, Mr. Schafer will provide senior management services to the Company on an approximately 75% full time basis, initially as Executive Vice Chairman and as a director. Compensation for Mr. Schafer's services will initially be at an annual rate of \$250,000, which will consist of \$150,000 in cash compensation and \$100,000 payable in the Company's common stock. Commencing the month following the first calendar month-end after the Company has completed an equity financing in excess of \$3,000,000 (net of commissions and other offering expenses), Mr. Schafer's compensation shall be at an annual rate of \$225,000, all of which shall be payable in cash. However, the transition to all cash compensation shall take place no later than July 1, 2011. Mr. Schafer was also granted 200,000 options effective January 1, 2011 exercisable at \$3.00 per option until January 15,

2018.

Effective February 1, 2011, the Company entered into an employment agreement with James Morris, pursuant to which Mr. Morris will act as Chief Technology Officer of the Company through January 31, 2015 at an annual salary of \$150,000 until July 1, 2011, at which time the annual salary shall be increased to \$180,000.

In May 2005 the Company declared contingent deferred stock bonuses of 690,000 shares to its key employees and consultants. The stock bonuses of 492,500 and 197,500 shares are contingent upon the Company's stock price exceeding \$10.00 and \$20.00 per share, respectively, and the grantees still being employed by or providing services to the Company at the time the target prices are reached. As of March 31, 2011, 442,500 shares remain outstanding, to be issued when and if the Company's stock price exceeds \$10.00 and \$20.00 per share, respectively.

Effective January 1, 2011 the Company declared a deferred stock bonus of 50,000 shares to Mr. Smith. The stock bonus is contingent upon the Company's stock price exceeding \$10.00 and does not require that Mr. Smith remains employed by the Company.

In May 2008, the Company approved 250,000 stock options to certain employees that will be granted upon the execution of new employment agreements. As of March 31, 2011, 150,000 stock options were granted pursuant to two new employment agreements.

11. SUBSEQUENT EVENTS:

The Company has evaluated events that occurred subsequent to March 31, 2011 for recognition and disclosure in the financial statements and notes to the financial statements.

Issuance of Common Stock

From April 1, 2011 through May 10, 2011, the Company issued 27,603 shares of the Company's common shares to various consultants valued at approximately \$82,000.

From April 1, 2011 through May 10, 2011 the Company issued 60,000 shares of the Company's common shares to investors for net proceeds of approximately \$150,000.

From April 1, 2011 through May 10, 2011, LLC received draws/reimbursements of approximately \$717,000 pursuant to the Pennvest Loan.

In April 2011, the Company's board of directors approved an amendment to the Company's 2006 Plan, increasing the authorized options from 6,000,000 to 8,000,000 options and eliminated incentive stock options from the 2006 Plan.

F-19

Item 2.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the unaudited Consolidated Financial Statements and Notes to Consolidated Financial Statements filed herein and with the Company's Form 10-K for the year ended June 30, 2010.

BUSINESS OVERVIEW

For several years, the Company focused on completion of the development of the next generation of its technology which provides a comprehensive environmental solution to a significant source of pollution in U.S. agriculture, Confined Animal Feeding Operations ("CAFO's"). The re-development process is now substantially complete and the initial commercial system based on our updated technology is nearing completion of construction. Currently, Bion is focused on using applications of its patented waste management technology to pursue two main business opportunities: 1) environmental retrofit and remediation of the waste streams of existing CAFOs in selected markets where government policy supports such efforts (such as the Chesapeake Bay watershed); and 2) development of Integrated Projects which will include large CAFOs, such as large dairies, beef cattle feed lots and hog farms, with Bion waste treatment system modules processing the aggregate CAFO waste stream from the equivalent of 40,000 or more beef and/or dairy cows (or the waste stream equivalent of other species) while recovering cellulosic biomass (to be utilized for renewable energy production) and nutrient rich solids (that can potentially to be marketed as feed and/or fertilizer), integrated with an ethanol plant capable of producing 40 (or more) million gallons of ethanol per year and/or with CAFO end product processors.

The Company has commenced actively pursuing the opportunity presented by environmental retrofit and remediation of the waste streams of existing CAFOs. The first commercial activity in this area is an agreement with Kreider Farms ("KF") in Pennsylvania to design, construct and operate a Bion system to treat KF's dairy and poultry waste streams to reduce nutrient releases to the environment while generating marketable nutrient credits and renewable energy. On January 26, 2009 the Board of the Pennsylvania Infrastructure Investment Authority (Pennvest) approved a \$7.75 million loan to Bion PA 1, LLC (LLC), a wholly-owned subsidiary of the Company, for the initial stage of Bion's Kreider Farms project. After substantial unanticipated delays, on August 12, 2010 the Company received a permit for construction of the Phase 1 Kreider system. Construction activities commenced during November 2010. The closing/settlement of the Pennvest Loan took place on November 3, 2010, and as of March 31, 2011, LLC has submitted four requests for drawdowns/reimbursements from Pennvest totaling \$5,994,587 of which Pennvest has held \$299,730 as retainage pending completion of the project and has loaned LLC \$5,694,857. Bion is in the process of finalizing the construction of the Phase 1 Kreider System and will enter a period of system operation shakedown during May 2011. It is anticipated that the Phase 1 Kreider System will be in full, stabilized operation by mid to late

summer 2011. The Pennsylvania Department of Environmental Protection recently re-certified the nutrient credits for this project. Work continues related to the details of the second phase of the Kreider project.

Additionally, we believe that Bion's technology platform will allow the integration of large-scale CAFO's and their end-product users, renewable energy production from the CAFO waste stream, on site utilization of the renewable energy generated and biofuel/ethanol production in an environmentally and economically sustainable manner while reducing the aggregate capital expense and operating costs and increasing revenue and profitability for the entire integrated complex ("Integrated Projects" or "Projects"). In the context of Integrated Projects, Bion's waste treatment process, in addition to mitigating polluting

5

releases, will generate renewable energy from cellulosic portions of the CAFO waste stream which renewable energy can be utilized by integrated facilities including ethanol plants, CAFO end-product processors (including cheese, ice cream and/or bottling plants in the case of dairy CAFOs and/or slaughter and/or processing facilities in the context of beef CAFOs) and/or other users as a replacement for fossil fuel usage. Note that an integrated ethanol plant's main by-product, called distillers grain, can be added to the feed of the animals in wet form thereby lowering the capital expenditures, operating, marketing and shipping costs and energy usage of the ethanol production process. In such cases, the ethanol plant would act as a feed mill for the integrated CAFO, thus reducing the CAFO's feeding costs and generating revenue to the ethanol plant, and also provides a market for the renewable energy that Bion's System produces from the CAFO waste stream. Thus, such Bion Integrated Projects can be denominated "closed loop". Bion, as developer of and participant in Integrated Projects, anticipates that it will share in the cost savings and revenue generated from these activities.

Bion is currently working with local, state and federal officials with regard to regulatory and legislative initiatives and with such parties and potential industry participants to evaluate sites in multiple states. The Company believes that its initial Integrated Project will be located in Pennsylvania or upstate New York and anticipates optioning land in that area during the current calendar year or soon thereafter (although locations in other states are also under review). In addition, Bion intends to choose sites for additional Projects during the calendar years 2011-2012 to create a pipeline of Projects. Management has a 5-year development target (through calendar year 2017) of approximately 12-24 Integrated Projects. At the end of that period, Bion projects that 5 or more of these Integrated Projects will be in full operation in 3-5 states, and the balance would be in various stages ranging from partial operation to early permitting stage. No Integrated Project has been developed to date.

The Company's audited financial statements for the years ended June 30, 2010 and 2009 have been prepared assuming the Company will continue as a going concern. The Company has incurred net losses of approximately \$2,976,000 and \$1,318,000 during the years ended June 30, 2010 and 2009, respectively. At June 30, 2010, the Company had a total deficit of approximately \$1,429,000. The Report of the Independent Registered Public Accounting Firm on the Company's consolidated financial statements as of and for the year ended June 30, 2010 includes a "going concern"

explanatory paragraph which means that the accounting firm has expressed substantial doubt about the Company's ability to continue as a going concern. The Company has incurred net losses attributable to Bion stockholders of approximately \$6,383,000 and \$2,448,000 during the nine month periods ended March 31, 2011 and 2010, respectively. At March 31, 2011, the Company has a working capital surplus and a total deficit of approximately \$491,000 and \$1,655,000, respectively. Management's plans with respect to these matters are described in this section and in our consolidated financial statements (and notes thereto), and this material does not include any adjustments that might result from the outcome of this uncertainty. There is no guarantee that we will be able to raise the funds or raise further capital for the operations planned in the near future.

CRITICAL ACCOUNTING POLICIES

Management has identified the following policies below as critical to our business and results of operations. Our reported results are impacted by the application of the following accounting policies, certain of which require management to make subjective or complex judgments. These judgments involve making estimates about the effect of matters that are inherently uncertain and may significantly impact quarterly or annual results of operations. For all of these policies, management cautions that future events rarely develop exactly as expected, and the best estimates routinely require adjustment. Specific risks associated with these critical accounting policies are described in the paragraphs below.

6

Revenue Recognition

While the Company has not recognized any operating revenues for the past two fiscal years, the Company anticipates that future revenues will be generated from product sales, credit sales, technology license fees, annual waste treatment fees and/or direct ownership interests in Integrated Projects. The Company expects to recognize revenue from product sales when there is persuasive evidence that an arrangement exists, when title has passed, the price is fixed or determinable, and collection is reasonably assured. The Company expects that technology license fees will be generated from the licensing of Bion's Systems. The Company anticipates that it will charge its customers a non-refundable up-front technology license fee, which will be recognized over the estimated life of the customer relationship. In addition, any on-going technology license fees will be recognized as earned based upon the performance requirements of the agreement. Annual waste treatment fees will be recognized upon receipt. Revenues, if any, from the Company's interest in Projects will be recognized when the entity in which the Project has been developed recognizes such revenue.

Compensation Cost for Options with Service Conditions and Graded Vesting Schedules

The Company has issued non-employee options that include service conditions and have graded vesting schedules. Generally for these arrangements, the measurement date of the services occurs when the options vest. Recognition of compensation cost for reporting periods prior to the measurement date is based on the then current fair value of the options. Fair value of the options is determined using a Black-Scholes option-pricing model. Any subsequent changes in fair value will be recorded on the measurement date. Compensation cost in connection with options that are not fully vested is being recognized on a straight-line basis over the requisite service period for the entire award.

Stock-based compensation

The Company follows the provisions of Accounting Standards Codification 718, which generally requires that share-based compensation transactions be accounted and recognized in the statement of income based upon their grant date fair values.

THREE MONTHS ENDED MARCH 31, 2011 COMPARED TO THE THREE MONTHS ENDED MARCH 31, 2010

General and Administrative

Total general and administrative expenses were \$1,512,000 and \$563,000 for the three months ended March 31, 2011 and 2010, respectively.

General and administrative expenses, excluding stock-based compensation charges of \$687,000 and \$43,000 for the three months ended March 31, 2011 and 2010, respectively, were \$825,000 and \$520,000 for the three months ended March 31, 2011 and 2010, respectively, representing a \$305,000 increase. Salaries and related payroll tax expenses increased from \$173,000 for the three months ended March 31, 2010 to \$288,000 for the three months ended March 31, 2011 due to the hiring of the Company's Chief Executive Officer (CEO) and an Executive Vice Chairman effective January 1, 2011. Consulting costs increased from \$152,000 for the three months ended March 31, 2010 to \$193,000 for the three months ended March 31, 2011 due to additional consultants utilized for strategic planning for the Kreider projects, a consultant for the development of future projects and various consultants for fund raising and lobbying efforts. Travel expenses were \$47,000 and \$20,000 for the three months ended March 31, 2011 and 2010, respectively, and the increase is due to travel to Kreider Farms as construction efforts were fully underway during the three months ended March 31, 2011, and additional travel expense due to the hiring of the CEO and Executive Vice Chairman.

General and administrative stock-based compensation for the three months ended March 31, 2011 and 2010 consists of the following:

Three months

ended

March 31, 2011

Three months

ended

March 31, 2010

41,000

Fair value of
stock bonuses
expensed

145,000

2,000

Total

\$ 687,000

\$43,000

Stock-based compensation charges increased to \$687,000 from \$43,000 for the three months ended March 31, 2011 and 2010, respectively. The credit for the change in fair value from modification of option terms for the three months ended March 31, 2011 resulted from revisions to estimates of the incremental costs associated with the Company's December 31, 2010 modification of certain options. The Company recognized expense relating to the fair value of stock options for general and administrative employees of \$863,000 and \$41,000 for the three months ended March 31, 2011 and 2010, respectively. Compensation expense relating to stock options was higher during the three months ended March 31, 2011 primarily due to the granting of options during the three months ended March 31, 2011 due to the additional employees hired effective January 1, 2011. The Company also recognized general and administrative non-cash compensation expense of \$145,000 during the three months ended March 31, 2011 due to the granting of a fully vested contingent stock bonus to an employee.

Research and development

Total research and development expenses were \$479,000 and \$53,000 for the three months ended March 31, 2011 and 2010, respectively.

Research and development expenses, excluding stock-based compensation charges of \$437,000 and nil for the three months ended March 31, 2011 and 2010, respectively, were \$42,000 and \$53,000, respectively. The primary reason for the slight decrease in research and development expenses during the three months ended March 31, 2011 is due to a decrease in legal fees due to utilization of a less costly patent professional. Legal fees relating to research and development were \$16,000 and \$27,000 for the three months ended March 31, 2011 and 2010, respectively.

Research and development stock-based compensation for the three months ended March 31, 2011 and 2010 consists of the following:

8

Three months

ASC 718

\$237,000

\$ -

Change in fair
value from
modification of
option terms

200,000

-

Total

\$437,000

\$ -

Stock-based compensation expense increased from nil for the three months ended March 31, 2010 to \$437,000 for the three months ended March 31, 2011. The increase is due to the signing in March 2011 of a new employment agreement with a research and development employee which vested stock options previously granted to the employee during May 2008, with issuance and vesting contingent upon the signing of new employment agreement. The new employment agreement also entitled the employee to modifications of stock options resulting in the extension of certain expiry dates which resulted in incremental non-cash compensation expense of \$200,000 being recorded for the three months ended March 31, 2011.

Loss from Operations

As a result of the factors described above, the loss from operations was \$1,991,000 and \$617,000 for the three months ended March 31, 2011 and 2010, respectively.

Other Expense (Income)

Other expense (income) was \$4,000 and \$(3,000) for the three months ended March 31, 2011 and 2010, respectively. Interest expense increased to \$5,000 for the three months ended March 31, 2011 due to the interest accrued on the deferred compensation owed as of March 31, 2011 and the non-capitalized interest on the newly acquired loan payable. Interest income was \$1,000 and \$3,000 for the three months ended March 31, 2011 and 2010, respectively.

Net Loss Attributable to the Noncontrolling Interest

The net loss attributable to the noncontrolling interest was \$1,000 for both of the three month periods ended March 31, 2011 and 2010, respectively.

Net Loss Attributable to Bion's Common Stockholders

As a result of the factors described above, the net loss attributable to Bion's common stockholders was \$2,145,000 and \$702,000 for the three months ended March 31, 2011 and 2010, respectively, resulting in the net loss per basic and diluted common share for the three months ended March 31, 2011 and 2010 of \$0.17 and \$0.06, respectively.

NINE MONTHS ENDED MARCH 31, 2011 COMPARED TO THE NINE MONTHS ENDED MARCH 31, 2010

General and Administrative

Total general and administrative expenses were \$5,392,000 and \$2,074,000 for the nine months ended March 31, 2011 and 2010, respectively.

General and administrative expenses, excluding stock-based compensation charges of \$3,258,000 and \$358,000 for the nine months ended March 31, 2011 and 2010, respectively, were \$2,134,000 and \$1,716,000 for the nine months ended March 31, 2011 and 2010, respectively, representing a \$418,000 increase. Salaries and related payroll tax expenses increased from \$491,000 for the nine months ended March 31, 2010 to \$626,000 for the nine months ended March 31, 2011 due to the hiring of the Company's Chief Executive Officer (CEO) and an Executive Vice Chairman effective January 1, 2011. Consulting costs increased from \$459,000 for the nine months ended March 31, 2010 to \$620,000 for the nine months ended March 31, 2011 due to additional consultants utilized for strategic planning for the Kreider projects, a consultant for the development of future projects and various consultants for fund raising and lobbying efforts. Travel expenses were \$117,000 and \$70,000 for the nine months ended March 31, 2011 and 2010 and the increase is due to increased travel to Kreider Farms as construction efforts were in full force during the quarter and additional travel expense due to the hiring of the CEO and Executive Vice Chairman.

General and administrative stock-based compensation for the nine months ended March 31, 2011 and 2010 consist of the following:

\$358,000

Stock-based compensation charges increased to \$3,258,000 from \$358,000 for the nine months ended March 31, 2011 and 2010, respectively. Compensation expense relating to stock options was \$1,619,000 and \$202,000 during the nine months ended March 31, 2011 and 2010, respectively, due to 2,045,000 and 195,000 options being granted during the nine months ended March 31, 2011 and 2010, respectively. Additionally, compensation expense relating to stock options was higher during the nine months ended March 31, 2011 primarily due to \$954,000 of non-cash compensation being recognized due to the modification of certain key employee and consultant options. The Company also recognized general and administrative non-cash compensation expenses of \$685,000 and \$64,000 due to the granting and vesting of stock bonuses during the nine months ended March 31, 2011 and 2010, respectively.

10

Research and Development

Total research and development expenses were \$580,000 and \$161,000 for the nine months ended March 31, 2011 and 2010, respectively.

Research and development expenses, excluding stock-based compensation charges of \$438,000 and \$17,000 for the nine months ended March 31, 2011 and 2010, respectively, were \$142,000 and \$144,000, respectively. The differences between the two periods have no notable variations.

Research and development stock-based compensation for the nine months ended March 31, 2011 and 2010 consist of the following:

7,000

Total

\$438,000

\$17,000

Stock-based compensation expense increased from \$17,000 for the nine months ended March 31, 2010 to \$438,000 for the same period in fiscal year 2011. The increase is due to the signing in March 2011 of a new employment agreement with a research and development employee which vested stock options previously granted to the employee during May 2008, with issuance and vesting contingent upon the signing of new employment agreement. The new employment agreement also entitled the employee to modifications of stock options resulting in the extension of certain expiry dates which resulted in incremental non-cash compensation expense of \$200,000 being recorded for the nine months ended March 31, 2011.

Loss from Operations

As a result of the factors described above, the loss from operations was \$5,972,000 and \$2,235,000 for the nine months ended March 31, 2011 and 2010, respectively.

Other Expense and (Income)

Other expense and (income) was \$10,000 and \$(8,000) for the nine months ended March 31, 2011 and 2010, respectively. Interest expense increased to \$14,000 for the nine months ended March 31, 2011 from \$2,000 for the nine months ended March 31, 2010. Interest expense increased due to the interest accrued on the deferred compensation balance as of March 31, 2011 and the non-capitalized interest associated with the Company's loan payable. Interest income was \$4,000 and \$9,000 for the nine months ended March 31, 2011 and 2010, respectively and the difference is primarily due to lower average invested cash balances.

Net Loss Attributable to the Noncontrolling Interest

The net loss attributable to the noncontrolling interest was \$4,000 and \$3,000 for the nine months ended March 31, 2011 and 2010, respectively.

Net Loss Attributable to Bion's Stockholders

As a result of the factors described above, the net loss attributable to Bion's stockholders was \$6,383,000 and \$2,448,000 for the nine months ended March 31, 2011 and 2010, respectively, representing a \$0.31 increase in the net loss per basic and diluted common share to \$0.52 from \$.21.

LIQUIDITY AND CAPITAL RESOURCES

The Company's financial statements for the nine months ended March 31, 2011 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Report of our Independent Registered Public Accounting Firm on the Company's financial statements as of and for the year ended June 30, 2010 includes a "going concern" explanatory paragraph which means that the auditors stated that conditions exist that raise substantial doubt about the Company's ability to continue as a going concern.

Operating Activities

As of March 31, 2011, the Company had cash and cash equivalents of approximately \$3,370,000. Approximately \$1,804,000 of the cash balance represented cash from a Pennvest loan draw/reimbursement received during the final days of March 2011 which funds had not yet been dispersed to pay invoices related to construction of the Kreider system. The Company's payables were elevated in a similar amount. During the nine months ended March 31, 2011, net cash used in operating activities was \$82,000, primarily consisting of cash operating expenses. As previously noted, the Company is currently not generating revenue and accordingly has not generated cash flows from operations. The Company does not anticipate generating sufficient revenues to offset operating and capital costs for a minimum of two to five years. While there are no assurances that the Company will be successful in its efforts to develop and construct its Projects and market its Systems, it is certain that the Company will require significant

funding from external sources. Given the unsettled state of the current credit and capital markets, there is no assurance the Company will be able to raise the funds it needs on reasonable terms.

Investing Activities

During the nine months ended March 31, 2011 the Company used \$5,147,000 for the design, permitting and the majority of the construction of the KF Project which has been capitalized as property and equipment. Also during the nine months ended March 31, 2011, the Company was required to maintain an interest reserve bank account of \$25,000 associated with its line of credit.

Financing Activities

During the nine months ended March 31, 2011, \$1,231,000 and \$853,000 of cash was provided from the sale of the Company's Series C preferred stock and the Company's common stock, respectively. Cash of \$1,136,000 and \$5,695,000 was provided from a line of credit and loan payable the Company utilized during the nine months ended March 31, 2011 for the construction of the KF Project. The Company used \$211,000 and \$154,000 for Series B and Series C preferred dividends payments, respectively and \$953,000 for repayments on the line of credit.

As of March 31, 2011 the Company has debt obligations consisting of deferred compensation of \$177,000, a line of credit of \$184,000 and a loan payable of \$5,695,000. In addition, the Company entered into an 88-month operating lease for office space in New York City in August 2006, with an average monthly lease expense of \$15,820. The Company has entered into sub-lease agreements with three separate parties which fully covers the lease expense. As of March 31, 2011, the Company has 32 months remaining on the lease.

Plan of Operations and Outlook

As of March 31, 2011 the Company had cash and cash equivalents of approximately \$3,370,000. Approximately \$1,804,000 of the cash balance represented cash from a Pennvest loan draw/reimbursement received during the final days of March 2011 which funds had not yet been dispersed to pay invoices related to construction of the Kreider system. The Company's payables were elevated in a similar amount. While the Company currently does not face a severe working capital shortage, it is not currently generating any revenues. The Company will need to obtain additional capital to fund its operations and technology development, to satisfy existing creditors, to develop Projects and to finish construction and sustain operations at the KF facilities. In January 2009, the Board of Pennsylvania

Infrastructure Investment Authority approved a \$7.75 million loan to the Company for the initial stage of the KF Project. The Company received a permit for construction of the KF Project on August 12, 2010. Initial construction commenced during November 2010. The settlement/closing of the Pennvest loan took place on November 3, 2010 and the Company received the initial drawdown/reimbursement from Pennvest on January 6, 2011. From January 1, 2011 through May 10, 2011, the Company has received reimbursements of approximately \$6,412,000 pursuant to the Pennvest Loan.

The Company anticipates that it will seek to raise from \$5,000,000 to \$50,000,000 (debt and equity) during the next twelve months. There is no assurance, especially in the extremely unsettled capital markets that presently exist, that the Company will be able to obtain the funds that it needs to stay in business, finance its Projects and other activities, continue its technology development and/or to successfully develop its business.

There can be no assurance that funds required during the next twelve months or thereafter will be generated from operations or that those funds will be available from external sources such as debt or equity financings or other potential sources. The lack of additional capital resulting from the inability to generate cash flow from operations or to raise capital from external sources would force the Company to substantially curtail or cease operations and would, therefore, have a material adverse effect on its business. Further, there can be no assurance that any such required funds, if available, will be available on attractive terms or that they will not have a significantly dilutive effect on the Company's existing shareholders. All of these factors have been exacerbated by the extremely unsettled credit and capital markets presently existing.

Currently, Bion is focused on using applications of its patented waste management technology to pursue two main business opportunities: 1) development of Integrated Projects which will include large CAFOs, such as large dairies, beef cattle feed lots and hog farms, with Bion waste treatment System modules processing the aggregate CAFO waste stream from the equivalent of 40,000 or more beef and/or dairy cows (or the waste stream equivalent of other species) while producing solids to be utilized for renewable energy production (and potentially to be marketed as feed and/or fertilizer), integrated with an ethanol plant capable of producing 40 (or more) million gallons of ethanol per year and/or integrated with CAFO end product processors, and 2) environmental retrofit and remediation of the waste streams of existing CAFOs in selected markets.

Bion is currently working with local, state and federal officials with regard to regulatory and legislative initiatives and with such parties and potential industry participants to evaluate sites in multiple states and anticipates selecting a site for its initial Integrated Project during the 2010 fiscal year. The Company anticipates that its initial Integrated Project will be developed in Pennsylvania or upstate New York and anticipates optioning land for the first Integrated Project during the 2011 fiscal year or soon thereafter (although locations other states are also under review). In addition, Bion intends to choose sites for additional Projects during the calendar years 2011-2012 to create a pipeline of Projects. Management has a 5-year development target (through calendar year 2017) of approximately 12-24 Integrated Projects. At the end of that period, Bion projects that 5 or more of these Integrated Projects will be in full operation in 3-5 states, and the balance would be in various stages ranging from partial operation to early permitting stage. No

Integrated Project has been developed to date.

The Company has also commenced actively pursuing the opportunity presented by environmental retrofit and remediation of the waste streams of existing CAFOs in selected markets. The first commercial activities in this area are the Kreider projects in Pennsylvania.

CONTRACTUAL OBLIGATIONS

We have the following material contractual obligations (in addition to employment and consulting agreements with management and employees):

1) The Company executed a non-cancelable operating lease for office space in New York City effective August 1, 2006 and extending to November 30, 2013. The average monthly rent expense under the lease is \$15,820. The Company has provided the lessor with a letter of credit in the amount of \$57,315 in connection with the lease as of December 31, 2010. The Company's obligations under the lease are partially guaranteed by Salvatore Zizza, former Chairman of Bion Projects. The Company has entered into sub-leases with non-affiliated parties for approximately 100% of the obligations under the lease. Effective January 1, 2009, Mr. Zizza entered into a Master Sublease with the Company pursuant to which Mr. Zizza became a sublessee and for a one year initial period, made all payments pursuant to the lease and managed the lease premises. Rental payments from existing sub-tenants are being deposited into a Company bank account such that Mr. Zizza utilizes those funds towards the monthly lease payment. During November 2009, Mr. Zizza exercised his option to continue the Master Sublease for the entire period of the lease. Mr. Zizza fulfilled his obligations under the Master Sublease during the one year initial period and in January 2010; he received the funds from the release from the Company's letter of credit of \$28,658. Since Mr. Zizza exercised the option to continue the Master Sublease for the entire term of the lease, Mr. Zizza will be entitled to the balance of funds held under the letter of credit of approximately \$57,000 if he fulfills his obligations pursuant to the Master Sublease.

2) On September 27, 2008, the Company executed an agreement with Kreider Farms (and its affiliated entities) (collectively "Kreider") to design, construct and operate, through its wholly-owned subsidiaries, Bion Services Group, Inc. ("Bion Services") and Bion PA-1 LLC ("LLC"), a Bion system to treat the waste of the dairy cows (milkers, dry cows and heifers) at the Kreider Dairy, located in Mannheim, Pennsylvania. In addition, the agreement provides for a second phase which will include treatment of the cellulosic solid wastes from the Phase 1 together with the waste stream from Kreider's poultry facilities to produce renewable energy for Bion's waste treatment facility and/or for market sales. The system will be owned and operated by Bion through LLC, in which Kreider has the option to

purchase a minority interest. Funds were expended over the last year to complete final design work and all building, zoning and other related pre-construction matters, and for construction of the Phase 1 Kreider System and substantial capital and operating funds (equity and/or debt) has been and will continue to be expended. Upon successful completion of construction and shakedown operations of the Phase 1 system, the Company anticipates that it will receive revenue from the sale of nutrient (and other) environmental credits related to the Kreider system and through sales of renewable energy generated in connection with the second phase (largely poultry manure) of the Kreider project. On January 26, 2009 the Board of the Pennsylvania Infrastructure Investment Authority approved a \$7.75 million loan to Bion for "the construction of a livestock waste treatment facility at Kreider Farms..." for the Phase 1 dairy portion of the Kreider Farms projects. After substantial unanticipated delays, on August 12, 2010 the Company received a permit for construction of the Phase 1 Kreider System. Initial construction commenced during November 2010. The initial settlement/closing of the Pennvest loan took place on November 3, 2010 and the Company received the initial drawdown/re-imbursement from Pennvest pursuant to the Pennvest Loan on January 6, 2011. The Company believes the \$7.75 million loan from Pennvest will be sufficient to fund the anticipated construction costs and that the construction will be completed and the project will be operational by early summer 2011. The Pennsylvania Department of Environmental Protection recently re-certified the nutrient credits for this project.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements (as that term is defined in Item 303 of Regulation S-K) that are reasonably likely to have a current or future material effect on our financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources.

Item 3.

Quantitative and Qualitative Disclosures About Market Risk.

Not applicable.

Item 4.

Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

The term "disclosure controls and procedures" is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). This term refers to the controls and procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized, and reported within the required time periods. Our Chief Executive Officer and Principal Financial Officer has evaluated the effectiveness of the design and operations of our disclosure

controls and procedures as of the end of the period covered by this quarterly report, and has concluded that, as of that date, our disclosure controls and procedures were not effective at ensuring that required information will be disclosed on a timely basis in our reports filed under the Exchange Act, as a result of the material weakness in internal control over financial reporting discussed in Item 9(A) of our Form 10-K for the year ended June 30, 2010.

(b) Changes in Internal Control over Financial Reporting.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1.

Legal Proceedings.

The Company is not involved in any material legal proceedings at this time.e

Item 1A.

Risk Factors.

Not applicable.

Item 2.

Unregistered Sales of Equity Securities and Use of Proceeds.

During the quarter ended March 31, 2010 the Company sold 236,000 shares of restricted common stock for net proceeds of \$590,000 (not including: a) 196,066 shares issued pursuant to our 2006 Consolidated Incentive Plan (Plan), valued at \$570,619, in aggregate, to certain consultants and/or employees for services; b) 20,000 shares issued to consultants outside the Plan, valued at \$60,000,for services which shares were issued in reliance on the exemption in Section 4(2) of the Securities Act of 1933 and c)20,000 shares issued pursuant to exercise of an outstanding warrant at \$2.00 per share which shares were issued in reliance on the exemption in Section 4(2) of the Securities Act of 1933). These shares were issued in reliance on the exemptions provided by Regulation D of the Securities Act of 1933.

The proceeds were utilized for general corporate purposes.

Item 3.

Defaults Upon Senior Securities.

Not applicable.

Item 4.

(Removed and Reserved)

Item 5.

Other Information.

Not applicable.

Item 6.

Exhibits.

(a) Exhibits required by Item 601 of Regulation S-K.
