CAL-MAINE FOODS, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

November 26, 2016

(unaudited)

1. Presentation of Interim Information

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair statement of the results for the interim periods presented have been included. The preparation of condensed consolidated financial statements requires us to make estimates and assumptions. These estimates and assumptions affected reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions. Operating results for the thirteen and twenty-six ended November 26, 2016 are not necessarily indicative of the results that may be expected for the year ending June 3, 2017.

The condensed consolidated balance sheet at May 28, 2016 has been derived from the audited consolidated financial statements at that date. It does not include all of the information and footnotes required by GAAP for complete financial statements.

For further information, refer to the consolidated financial statements and footnotes thereto included in Cal-Maine Foods, Inc.'s annual report on Form 10-K for the fiscal year ended May 28, 2016. References to “we,” “us,” “our,” or the “Company” refer to Cal-Maine Foods, Inc.

2. Acquisitions

On October 16, 2016, the Company acquired substantially all of the egg production assets and assumed certain liabilities of Foodonics International, Inc. ("Foodonics") and its related entities doing business as Dixie Egg Company for \$68.6 million of cash and \$3.0 million of deferred purchase price. The acquired assets include commercial egg production and processing facilities with capacity for 1.6 million laying hens, contract grower arrangements for an additional 1.5 million laying hens, and related feed production, milling and distribution facilities in Georgia, Alabama, and Florida. The Company also acquired Foodonics' interest in American Egg Products, LLC ("AEP") and the Egg-Land's Best franchise with licensing rights for portions of certain markets in Alabama, Florida, and Georgia as well as Puerto Rico, Bahamas and Cuba. The Company now owns 100% of AEP. The operations of the acquisition are included in the accompanying financial statements as of October 16, 2016, the effective date of the transaction.

Pending the finalization of the Company's valuation, the following table presents the preliminary fair values of the assets acquired and liabilities assumed (in thousands):

Inventory	\$7,669
Property, plant and equipment	38,683
Intangible assets	24,000
Liabilities assumed	(2,005)
Total identifiable net assets	68,347
Goodwill	3,296
Purchase price	71,643
Deferred purchase price	(3,000)
Cash consideration paid	\$68,643

These fair value measurements were primarily based on significant inputs that are not observable in the markets. The cost approach, which estimates value by determining the current cost of replacing an asset with another of equivalent

6

Index

economic utility, was utilized for certain property, plant and equipment of Foodonics. The cost to replace given assets reflects the estimated reproduction or replacement cost of the asset, less an allowance for loss in value due to depreciation. The market approach, which indicates value for a subject asset based on available market pricing for comparable assets, was utilized for inventory and the Egg-Land's Best franchise of Foodonics. The franchise fees will be amortized over a period of 15 years. Goodwill on business combination recognizes the difference in the fair value of the assets acquired and liabilities assumed, net of the acquisition price. Goodwill associated with the acquisition is tax deductible over a 15 years period.

Pro-forma information, which is usually presented for information purposes only and is not necessarily indicative of the results of operations that actually would have been achieved had the acquisition been completed as of an earlier time, was not material to the Company's Condensed Consolidated Financial Statements.

3. Stock Based Compensation

Total stock based compensation expense for the twenty-six weeks ended November 26, 2016 and November 28, 2015 was \$1.7 million and \$1.5 million, respectively.

Unrecognized compensation expense as a result of non-vested shares of the 2012 Omnibus Long-Term Incentive Plan at November 26, 2016 was \$3.9 million and will be recorded over a weighted average period of 1.8 years. Refer to Note 11 of our May 28, 2016 audited financial statements for further information on our stock compensation plans.

At November 26, 2016, there were 279,050 restricted shares outstanding, with a weighted average grant date fair value of \$35.99 per share. A summary of the Company's restricted share activity for the twenty-six weeks ended November 26, 2016 follows:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding, May 28, 2016	288,900	\$ 35.97
Vested	(4,548)	30.23
Forfeited	(5,302)	39.64
Outstanding, November 26, 2016	279,050	\$ 35.99

Index

4. Inventories

Inventories consisted of the following (in thousands):

	November 26, 2016	May 28, 2016
Flocks	\$ 101,413	\$94,312
Eggs	12,227	11,519
Feed and supplies	48,651	48,968
	\$ 162,291	\$ 154,799

We grow and maintain flocks of layers (mature female chickens), pullets (young female chickens, under 18 weeks of age), and breeders (male and female chickens used to produce fertile eggs to be hatched for egg production flocks). Our total flock at November 26, 2016, consisted of approximately 9.6 million pullets and breeders and 38.1 million layers.

5. Contingencies

Financial Instruments

The Company maintained standby letters of credit (“LOC”) totaling \$3.7 million at November 26, 2016. These LOCs are collateralized with cash which is included in the line item “Other assets” in the Condensed Consolidated Balance Sheets. The outstanding LOCs are for the benefit of certain insurance companies. The LOCs are not recorded as a liability on the consolidated balance sheets.

Legal Contingencies

The Company is a defendant in certain legal actions, and intends to vigorously defend its position in these actions. If the Company’s assessment of a contingency indicates it is probable a material loss has been incurred and the amount of the liability can be reasonably estimated, the estimated liability is accrued in the Company’s financial statements. If the assessment indicates a potential material loss contingency is not probable, but is reasonably possible, or probable but cannot be reasonably estimated, then the nature of the contingent liability, together with an estimate of the possible loss or range of possible loss will be disclosed, or a statement will be made that such an estimate cannot be made.

These legal actions are discussed in detail at Part II, Item 1, of this report.

Index

6. Net Income per Common Share

Basic net income per share was calculated by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted net income per share was calculated by dividing net income by the weighted-average number of common shares outstanding during the period plus the dilutive effects of options and restricted stock. Due to the net loss in the thirteen and twenty-six weeks ended November 26, 2016, restricted shares in the amount of 155,285 and 147,753, respectively, were excluded from the calculation of diluted earnings per share because their inclusion would have been antidilutive. The computations of basic and diluted net income per share attributable to the Company are as follows (in thousands, except per share data):

	13 Weeks Ended		26 Weeks Ended	
	November 26,	November 28,	November 26,	November 28,
	2016	2015	2016	2015
Net income (loss) attributable to Cal-Maine Foods, Inc.	\$(23,010)	\$ 109,230	\$(53,946)	\$ 252,253
Basic weighted-average common shares	48,250	48,164	48,249	48,164
Effect of dilutive securities:				
Restricted shares	—	197	—	190
Dilutive potential common shares	48,250	48,361	48,249	48,354
Net income (loss) per common share attributable to Cal-Maine Foods, Inc.:				
Basic	\$(0.48)	\$ 2.27	\$(1.12)	\$ 5.24
Diluted	\$(0.48)	\$ 2.26	\$(1.12)	\$ 5.22

7. Accrued Dividends Payable and Dividends per Common Share

We make an accrual of dividends payable at the end of each quarter according to the Company's dividend policy adopted by its Board of Directors. The Company pays a dividend to shareholders of its Common Stock and Class A Common Stock on a quarterly basis for each quarter for which the Company reports net income attributable to Cal-Maine Foods, Inc. computed in accordance with generally accepted accounting principles in an amount equal to one-third (1/3) of such quarterly income. Dividends are paid to shareholders of record as of the 60th day following the last day of such quarter, except for the fourth fiscal quarter. For the fourth quarter, the Company pays dividends to shareholders of record on the 65th day after the quarter end. Dividends are payable on the 15th day following the record date. Following a quarter for which the Company does not report net income attributable to Cal-Maine Foods, Inc., the Company will not pay a dividend for a subsequent profitable quarter until the Company is profitable on a cumulative basis computed from the date of the last quarter for which a dividend was paid. At November 26, 2016, cumulative losses that must be recovered prior to paying a dividend were \$54.3 million. When applicable, the amount of the accrual appears on the Condensed Consolidated Balance Sheets as "Accrued dividends payable."

Index

On our condensed consolidated statement of income, we determine dividends per common share in accordance with the computation in the following table (in thousands, except per share data):

	13 Weeks Ended		26 Weeks Ended	
	November 28, 2016	November 28, 2015	November 28, 2016	November 28, 2015
Net income (loss) attributable to Cal-Maine Foods, Inc. available for dividend	\$(23,010)	\$ 109,230	\$(53,946)	\$ 252,253
1/3 of net income attributable to Cal-Maine Foods, Inc.	—	36,410	—	84,084
Common stock outstanding (shares)	43,730	43,695		
Class A common stock outstanding (shares)	4,800	4,800		
Total common stock outstanding (shares)	48,530	48,495		
Dividends per common share*	\$—	\$ 0.751	\$—	\$ 1.734

*Dividends per common share = 1/3 of Net income (loss) attributable to Cal-Maine Foods, Inc. available for dividend ÷ Total common stock outstanding (shares)

8. Fair Value Measurements

The Company is required to categorize both financial and nonfinancial assets and liabilities based on the following fair value hierarchy. The fair value of an asset is the price at which the asset could be sold in an orderly transaction between unrelated, knowledgeable, and willing parties able to engage in the transaction. A liability's fair value is defined as the amount that would be paid to transfer the liability to a new obligor in a transaction between such parties, not the amount that would be paid to settle the liability with the creditor.

Level 1 - Quoted prices in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 - Unobservable inputs for the asset or liability that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

The disclosure of fair value of certain financial assets and liabilities that are recorded at cost are as follows:

Cash and cash equivalents: The carrying amount approximates fair value due to the short maturity of these instruments.

Long-term debt: The carrying value of the Company's long-term debt is at its stated value. We have not elected to carry our long-term debt at fair value. Fair values for debt are based on quoted market prices or published forward interest rate curves, which are level 2 inputs. Estimated fair values are management's estimate, which is a level 3 input; however, when there is no readily available market data, the estimated fair values may not represent the amounts that could be realized in a current transaction, and the fair values could change significantly. The fair value and carrying value of the Company's borrowings under its long-term debt were as follows (in thousands):

	November 26, 2016		May 28, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
5.4% – 6.4% Notes payable	\$22,510	\$22,568	\$25,570	\$25,824

\$22,510 \$22,568 \$25,570 \$25,824

Index

Assets and Liabilities Measured at Fair Value on a Recurring Basis

In accordance with the fair value hierarchy described above, the following table shows the fair value of financial assets and liabilities measured at fair value on a recurring basis as of November 26, 2016 and May 28, 2016 (in thousands):

November 26, 2016	Level 1	Level 2	Level 3	Total Balance
Assets				
US government and agency obligations	—	\$17,248	—	\$17,248
Municipal bonds	—	57,050	—	57,050
Corporate bonds	—	98,251	—	98,251
Foreign government obligations	—	2,019	—	2,019
Asset backed securities	—	5,842	—	5,842
Mutual funds	2,028	—	—	2,028
Total assets measured at fair value	\$2,028	\$180,410	—	\$182,438

May 28, 2016	Level 1	Level 2	Level 3	Total Balance
Assets				
US government and agency obligations	\$—	\$18,814	\$—	—\$18,814
Municipal bonds	—	79,643	—	79,643
Corporate bonds	—	240,537	—	240,537
Foreign government obligations	—	2,046	—	2,046
Asset backed securities	—	15,893	—	15,893
Mutual funds	5,503	—	—	5,503
Total assets measured at fair value	\$5,503	\$356,933	\$—	—\$362,436

Investment securities – available-for-sale, classified as level 2, consist of U.S. government and agency obligations, taxable and tax exempt municipal bonds, zero coupon municipal bonds, foreign government obligations, asset backed securities and corporate bonds with maturities of three months or longer when purchased. We classify these securities as current, because amounts invested are available for current operations. Observable inputs for these securities are yields, credit risks, default rates, and volatility.

9. Investment Securities

The following represents the Company's investment securities as of November 26, 2016 and May 28, 2016 (in thousands):

November 26, 2016	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
US government and agency obligations	\$17,296	\$—	\$48	\$17,248
Municipal bonds	56,960	90	—	57,050
Corporate bonds	98,318	—	67	98,251

Proceeds from sales of available-for-sale securities were \$193.3 million and \$104.5 million during the twenty-six weeks ended November 26, 2016 and November 28, 2015, respectively. Gross realized gains on those sales during the twenty-six weeks ended November 26, 2016 and November 28, 2015 were \$221,000 and \$18,000, respectively. Gross realized losses on those sales during the twenty-six weeks ended November 26, 2016 and November 28, 2015 were \$6,000 and \$36,000, respectively. For purposes of determining gross realized gains and losses, the cost of securities sold is based on the specific identification method.

Unrealized holding losses, net of tax, on current investment securities in the amount of \$78,000 were recorded for the twenty-six weeks ended November 26, 2016 compared with unrealized holding losses, net of tax, of \$267,000 for the same period of fiscal 2016. Unrealized holding gains, net of tax, on noncurrent investment securities of \$57,000 were recorded for the twenty-six weeks ended November 26, 2016 compared with unrealized holding losses, net of tax, of \$11,000 for the same period of fiscal 2016.

Actual maturities may differ from contractual maturities because some borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Contractual maturities at November 26, 2016, are as follows (in thousands):

	Estimated Fair Value
Within one year	\$91,976
1-5 years	88,434
Total	\$ 180,410

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains numerous forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934 (the "Exchange Act") relating to our shell egg business, including estimated production data, expected operating schedules, projected construction costs, and other operating data, including anticipated results of operations and financial condition. Such forward-looking statements are identified by the use of words such as "believes," "intends," "expects," "hopes," "may," "should," "plans," "pro," "contemplates," "anticipates," or similar words. Actual production, operating schedules, capital costs, results of operations, and other projections and estimates could differ materially from those projected in the forward-looking statements. The forward-looking statements are based on management's current intent, belief, expectations, estimates, and projections regarding the Company and its industry. These statements are not guarantees of future performance and involve risks, uncertainties, assumptions, and other factors that are difficult to predict and may be beyond our control. The factors that could cause actual results to differ materially from those projected in the forward-looking statements include, among others, (i) the risk factors set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended May 28, 2016, as updated by our subsequent Quarterly Reports on Form 10-Q, (ii) the risks and hazards inherent in the shell egg business (including disease, pests, weather conditions, and potential for product recall), (iii) changes in the demand for and market prices of shell eggs and feed costs, (iv) our ability to predict and meet demand for cage-free and other specialty eggs, (v) risks, changes, or obligations that could result from our future acquisition of new flocks or businesses and risks or changes that may cause conditions to completing a pending acquisition not to be met, and (vi) adverse results in pending litigation matters. Readers are cautioned not to place undue reliance on forward-looking statements because, while we believe the assumptions on which the forward-looking statements are based are reasonable, there can be no assurance that these forward-looking statements will prove to be accurate. Further, forward-looking statements included herein are only made as of the respective dates thereof, or if no date is stated, as of the date hereof. Except as otherwise required by law, we disclaim any intent or obligation to update publicly these forward-looking statements, whether because of new information, future events, or otherwise.

OVERVIEW

Cal-Maine Foods, Inc. ("we," "us," "our," or the "Company") is primarily engaged in the production, grading, packaging, marketing, and distribution of fresh shell eggs. Our fiscal year end is the Saturday closest to May 31.

Our operations are fully integrated. At our facilities we hatch chicks, grow and maintain flocks of pullets (young female chickens, under 18 weeks of age), layers (mature female chickens) and breeders (male and female birds used to produce fertile eggs to be hatched for egg production flocks), manufacture feed, and produce, process, and distribute shell eggs. We are the largest producer and marketer of shell eggs in the United States (U.S.). We market the majority of our shell eggs in the southwestern, southeastern, mid-western, and mid-Atlantic regions of the U.S. We market shell eggs through an extensive distribution network to a diverse group of customers, including national and regional grocery store chains, club stores, foodservice distributors, and egg product consumers.

The Company has one operating segment, which is the production, grading, packaging, marketing and distribution of shell eggs. The majority of our customers rely on us to provide most of their shell egg needs, including specialty and non-specialty eggs. Specialty eggs represent a broad range of products. We classify nutritionally enhanced, cage free, organic and brown eggs as specialty products for accounting and reporting purposes. We classify all other shell eggs as non-specialty products. While we report separate sales information for these types of eggs, we note there are a number of cost factors which are not specifically available for non-specialty or specialty eggs due to the nature of egg production. We manage our operations and allocate resources to these types of eggs on a consolidated basis based on the demands of our customers.

Index

Our operating results are directly tied to egg prices, which are highly volatile and subject to wide fluctuations, and are outside of our control. For example, the annual average Urner-Barry Southeastern Regional Large Egg Market Price per dozen eggs, for our fiscal 2005-2016 ranged from a low of \$0.72 during fiscal 2005 to a high of \$2.97 during fiscal 2016. The shell egg industry has traditionally been subject to periods of high profitability followed by periods of significant loss. In the past, during periods of high profitability, shell egg producers tended to increase the number of layers in production with a resulting increase in the supply of shell eggs, which generally caused a drop in shell egg prices until supply and demand returned to balance. As a result, our financial results from year to year may vary significantly. Shorter term, retail sales of shell eggs historically have been greatest during the fall and winter months and lowest during the summer months. Prices for shell eggs fluctuate in response to seasonal factors and a natural increase in shell egg production during the spring and early summer. Shell egg prices tend to increase with the start of the school year and are highest prior to holiday periods, particularly Thanksgiving, Christmas, and Easter. Consequently, we generally experience lower sales and net income in our first and fourth fiscal quarters ending in August and May, respectively. Because of the seasonal and quarterly fluctuations, comparisons of our sales and operating results between different quarters within a single fiscal year are not necessarily meaningful comparisons.

From April through June 2015, our industry experienced a significant avian influenza (“AI”) outbreak, primarily in the upper Midwestern U.S. Based on several published industry estimates, we believe approximately 12% of the national flock of laying hens was affected. The affected laying hens were either destroyed by the disease or euthanized. During April through June 2015, the supply of laying hens decreased substantially, and then began to recover gradually. As of November 1, 2016, the national laying hen flock according to the U.S. Department of Agriculture was approximately 8.0% higher than the AI reduced flock on November 1, 2015, but remained 1.7% below the number of layers on November 1, 2014. Egg prices increased significantly during the summer and fall of 2015. The average Urner-Barry Thursday prices for the large market (i.e. generic shell eggs) in the southeastern region for the months of June through November 2015 was \$2.32 per dozen, with a peak of \$2.97 in August. Subsequent to November 2015, shell egg prices declined. The Urner Barry price index hit a decade-low level during our fiscal 2016 fourth quarter. During our first quarter of fiscal 2017 it increased slightly, but remained at significantly lower levels than the corresponding period of last year. During our fiscal 2017 second quarter, it returned to and dropped below the low levels seen during the fiscal 2016 fourth quarter. Accordingly, our net average selling prices for eggs for the second quarter and year to date periods of fiscal 2017 were \$0.971 and \$0.962 compared with \$1.970 and \$2.105 for the corresponding periods of fiscal 2016, respectively. Retail demand has remained favorable; however, lower institutional demand for egg products and reduced egg exports have pushed inventory levels higher and created additional pricing pressure. Subsequent to the end of our second quarter, egg prices have risen sharply; however, egg prices will likely remain volatile and future prices will depend on levels of supply and the recovery of institutional demand for eggs which was adversely impacted as a result of the 2015 shortages caused by AI.

We are one of the largest producers and marketers of value-added specialty shell eggs in the U.S. They have been a significant and growing segment of the market in recent years. During our fiscal 2016 an increasing number of large restaurant chains, food service companies and grocery chains, including our largest customers, announced goals to transition to a cage-free egg supply chain by specified future dates. We are working with our customers to achieve smooth progress in meeting their goals, and our focus for future expansion at our farms will be with environments that are cage-free or with equipment that can easily be converted to cage-free, based on a timeline that meets our customer’s needs.

For the thirteen weeks ended November 26, 2016, we produced approximately 84% of the total number of shell eggs we sold. This compares to 77% in the comparable prior year period. For the thirteen weeks ended November 26, 2016, approximately 7% of such production was provided by contract producers who utilize their facilities in the production of shell eggs by layers owned by us compared to 4% for the same period of last year. We own the shell eggs produced under these arrangements.

Index

Our cost of production is materially affected by feed costs. Feed costs averaged approximately 57% and 58%, respectively, of our total farm egg production cost for the thirteen and twenty-six weeks ended November 26, 2016. Changes in market prices for corn and soybean meal, the primary ingredients in the feed we use, result in changes in our cost of goods sold. The cost of our feed ingredients, which are commodities, are subject to factors over which we have little or no control such as volatile price changes caused by weather, size of harvest, transportation and storage costs, demand and the agricultural and energy policies of the U.S. and foreign governments. Increased U.S. acreage and large per acre yields for both corn and soybeans in 2016 should provide adequate domestic supplies for both of our primary feed ingredients. Domestic corn supplies could be particularly robust, although domestic soybean stocks could be negatively impacted by increased exports due to reduced supplies from South America.

During the second quarter of fiscal 2017, the Company acquired substantially all of the egg production assets of Foodonics International, Inc. and its related entities doing business as Dixie Egg Company for \$68.6 million of cash and \$3.0 million of deferred purchase price. The acquired assets include commercial egg production and processing facilities with capacity for 1.6 million laying hens, contract grower arrangements for an additional 1.5 million laying hens, and related feed production, milling and distribution facilities in Georgia, Alabama, and Florida. The Company also acquired Foodonics' interest in American Egg Products, LLC ("AEP") and the Egg-Land's Best franchise with licensing rights for portions of certain markets in Alabama, Florida, and Georgia as well as Puerto Rico, Bahamas and Cuba. The Company now owns 100% of AEP. The operations of the acquisition are included in the accompanying financial statements as of October 16, 2016, the effective date of the transaction.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, certain items from our Condensed Consolidated Statements of Income expressed as a percentage of net sales.

	13 Weeks Ended		26 Weeks Ended	
	November 26, 2016	November 28, 2015	November 26, 2016	November 28, 2015
Net sales	100.0 %	100.0 %	100.0 %	100.0 %
Cost of sales	98.4 %	61.2 %	101.1 %	58.9 %

Net income (loss) before noncontrolling interest	(10.1)%	19.6 %	(11.9)%	21.6 %
Less: Net income (loss) attributable to noncontrolling interest	— %	0.1 %	— %	0.2 %
Net income (loss) attributable to Cal-Maine Foods, Inc.	(10.1)%	19.5 %	(11.9)%	21.4 %

NET SALES

Approximately 98% of our net sales for the quarter ended November 26, 2016 were shell eggs and approximately 2% were egg products. Net sales for the thirteen weeks ended November 26, 2016 were \$253.5 million, a decrease of \$292.5 million, or 53.6%, compared to net sales of \$546.0 million for the thirteen weeks ended November 28, 2015, primarily due to the decrease in egg selling prices. Total dozens of shell eggs sold and egg selling prices decreased for the current thirteen-week period compared to the same period in fiscal 2016. Dozens sold for the second quarter of fiscal year 2017 were 252.2 million, a decrease of 12.0 million, or 4.5%, compared to 264.2 million for the second quarter of fiscal 2016 resulting in a decrease in net sales of \$11.6 million.

Our net average selling price per dozen of shell eggs for the thirteen weeks ended November 26, 2016 was \$0.971, compared to \$1.970 for the thirteen weeks ended November 28, 2015, a decrease of 50.7%, resulting in a corresponding

16

Index

decrease in net shell egg sales of \$263.9 million. Net average selling price is the blended price for all sizes and grades of shell eggs, including non-graded shell egg sales, breaking stock, and undergrades.

Egg products and other revenues resulted in decreased net sales of \$16.3 million for the thirteen weeks ended November 26, 2016 compared to the same period of last year.

For the twenty-six weeks ended November 26, 2016, approximately 98% of our net sales were shell eggs and approximately 2% were egg products. Net sales for the twenty-six weeks ended November 26, 2016 were \$493.4 million a decrease of \$662.5 million, or 57.3%, compared to \$1,155.9 million for the twenty-six weeks ended November 28, 2015. Total dozens of shell eggs sold and egg selling prices decreased for the current twenty-six week period compared to the same period in fiscal 2016. Dozens sold for the twenty-six weeks ended November 26, 2016 were 494.5 million, a decrease of 28.4 million, or 5.4%, compared to 522.9 million for the same period of fiscal 2016 resulting in a decrease in net sales of \$27.4 million.

For the twenty-six weeks ended November 26, 2016, our net average selling price per dozen of shell eggs was \$0.962 compared to \$2.105 for the same period of fiscal 2016, a decrease of 54.3%, resulting in a corresponding decrease in net shell egg sales of \$597.7 million.

Egg products and other revenues resulted in decreased net sales of \$37.9 million for the twenty-six weeks ended November 26, 2016 compared to the same period of fiscal 2016.

The table below represents an analysis of our non-specialty and specialty shell egg sales (in thousands, except percentage data). Following the table is a discussion of the information presented in the table.

	13 Weeks Ended				26 Weeks Ended			
	November 26, 2016		November 28, 2015		November 26, 2016		November 28, 2015	
Total net sales	\$253,544		\$545,975		\$493,389		\$1,155,870	
Non-specialty shell egg sales	\$123,008	49.8 %	\$369,878	70.7 %	\$236,512	49.1 %	\$792,769	71.7 %
Specialty shell egg sales	113,224	45.8 %	136,791	26.1 %	222,536	46.2 %	280,744	25.4 %
Co-pack specialty shell egg sales	8,514	3.4 %	14,246	2.7 %	16,969	3.5 %	28,245	2.5 %
Other	2,485	1.0 %	2,515	0.5 %	5,482	1.2 %	4,301	0.4 %
Net shell egg sales	\$247,231		\$523,430		\$481,499		\$1,106,059	
Net shell egg sales as a percent of total net sales	98	%	96	%	98	%	96	%
Dozens sold:								
Non-specialty shell egg	191,383	75.9 %	199,186	75.4 %	374,113	75.7 %	394,538	75.5 %
Specialty shell egg	56,540	22.4 %	59,269	22.4 %	111,939	22.6 %	117,304	22.4 %
Co-pack specialty shell egg	4,254	1.7 %	5,717	2.2 %	8,449	1.7 %	11,104	2.1 %
Total dozens sold	252,177		264,172		494,501		522,946	
Net average selling price	\$0.971		\$1.970		\$0.962		\$2.105	

Non-specialty shell eggs include all shell egg sales not specifically identified as specialty shell egg sales. The non-specialty shell egg market is characterized by an inelasticity of demand. Small increases or decreases in production or demand can have a large positive or adverse effect on selling prices. For the thirteen weeks ended

Edgar Filing: CAL-MAINE FOODS INC - Form 10-Q

November 26, 2016, non-specialty shell egg dozens sold decreased approximately 3.9% and the average selling price decreased 64.9% to \$0.656 from \$1.870 for the same period of the prior year. For the twenty-six weeks ended November 26, 2016, non-specialty shell egg dozens sold decreased approximately 5.2% and the average selling price decreased 68.0% to \$0.647 from \$2.020 for the same period of fiscal 2016.

Index

Specialty shell eggs continue to make up a large portion of our total shell egg revenue and dozens sold. Specialty egg retail prices are less cyclical than non-specialty shell egg prices and are generally higher due to consumer willingness to pay for the perceived benefits from these products. This was particularly evident in recent quarters as non-specialty egg prices declined more than specialty egg prices. However, as non-specialty egg prices declined, we experienced some margin and volume pressures on specialty egg sales. For the thirteen weeks ended November 26, 2016, specialty shell egg dozens sold decreased approximately 4.6% and the average selling price decreased 13.2% to \$2.003 from \$2.308 for the same period of the prior year. For the twenty-six weeks ended November 26, 2016, specialty shell egg dozens sold decreased 4.6% and the average selling price decreased 16.9% to \$1.988 from \$2.393 for the same period of fiscal 2016.

Co-pack specialty shell eggs are sold primarily through co-pack arrangements, a common practice in the industry whereby production and processing of certain products is outsourced to another producer. Shell egg sales in this category represented 4.3 million and 5.7 million dozen for the quarters ended November 26, 2016 and November 28, 2015, respectively, primarily reflecting the loss of a portion of a major customer's co-pack business. Co-pack specialty shell eggs sold during the twenty-six weeks ended November 26, 2016 and November 28, 2015, were 8.4 million and 11.1 million, respectively.

The shell egg sales classified as "Other" represent sales of hard cooked eggs, hatching eggs, and/or other miscellaneous products, which are included with our shell egg operations.

Egg products are shell eggs that are broken and sold in liquid, frozen, or dried form. Our egg products are sold through our consolidated subsidiaries American Egg Products, LLC ("AEP") and Texas Egg Products, LLC ("TEP"). For the second quarter of fiscal 2017, egg product sales were \$6.3 million, a decrease of \$16.3 million, or 72.0%, compared to \$22.6 million for the same period of fiscal 2016. Pounds sold for the second quarter of fiscal year 2017 were 16.6 million pounds, an increase of 1.9 million pounds, or 12.4%, compared to 14.7 million pounds for the same quarter of fiscal 2016. For the twenty-six weeks ended November 26, 2016, egg product sales were \$11.9 million, a decrease of \$37.9 million, or 76.1%, compared to \$49.8 million for the same period of 2016. Pounds sold for the twenty-six weeks ended November 26, 2016 were 30.9 million, an increase of 2.1 million, or 7.2%, compared to 28.9 million for the same period of fiscal 2016. Selling prices for liquid and frozen egg products were down 77.4% for the year to date period of fiscal 2017 compared with the same period of last year.

COST OF SALES

Cost of sales consists of costs directly related to production, processing and packing shell eggs, purchases of shell eggs from outside producers, processing and packing of liquid and frozen egg products, and other non-egg costs. Farm production costs are those costs incurred at the egg production facility, including feed, facility, hen amortization, and other related farm production costs.

Index

The following table presents the key variables affecting cost of sales (in thousands, except cost per dozen data).

	13 Weeks Ended			26 Weeks Ended		
	November 26, 2016	November 28, 2015	Percent Change	November 26, 2016	November 28, 2015	Percent Change
Cost of Sales:						
Farm production	\$ 144,581	\$ 140,817	2.7 %	287,452	279,852	2.7 %
Processing, packaging, and warehouse	47,988	46,197	3.9 %	94,291	91,050	3.6 %
Outside egg purchases and other (including change in inventory)	52,432	131,775	(60.2)%	108,026	276,849	(61.0)%
Total shell eggs	245,001	318,789	(23.1)%	489,769	647,751	(24.4)%
Egg products	4,434	15,452	(71.3)%	8,732	32,955	(73.5)%
Other	160	137	16.8 %	509	496	2.6 %
Total	\$249,595	\$ 334,378	(25.4)%	\$499,010	\$ 681,202	(26.7)%
Farm production cost (per dozen produced)						
Feed	\$0.394	\$ 0.427	(7.7)%	\$0.412	\$ 0.423	(2.6)%
Other	0.294	0.262	12.2 %	\$0.294	\$ 0.271	8.5 %
Total	\$0.688	\$ 0.689	(0.1)%	\$0.706	\$ 0.694	1.7 %
Outside egg purchases (average cost per dozen)	\$0.98	\$ 1.97	(50.3)%	\$1.01	\$ 2.12	(52.4)%
Dozen produced	211,971	204,423	3.7 %	410,753	407,071	0.9 %
Dozen sold	252,177	264,172	(4.5)%	494,501	522,946	(5.4)%

Cost of sales for the second quarter of fiscal 2017 was \$249.6 million, a decrease of \$84.8 million, or 25.4%, compared to cost of sales of \$334.4 million for the same quarter of fiscal 2016. The decrease was primarily driven by a decrease in the cost of outside egg purchases during the quarter, including eggs purchased by our egg products divisions. Feed cost per dozen for the fiscal 2017 second quarter was \$0.394, compared to \$0.427 per dozen for the comparable fiscal 2016 quarter, a decrease of 7.7% resulting in a decrease in cost of sales of \$7.0 million for the thirteen weeks ended November 26, 2016 compared with the same period of fiscal 2016. Other farm production cost increased 12.2% to \$0.294 for the second quarter of 2017, compared with \$0.262 for the same period of last year primarily due to increased amortization expense and facility costs related to capital improvement and conversion projects.

For the twenty-six weeks ended November 26, 2016, total cost of sales was \$499.0 million, a decrease of \$182.2 million , or 26.7% , from \$681.2 million for the same period of fiscal 2016. Similar to the thirteen week period, the decrease was driven by a decrease in the cost of outside egg purchases during the period, including eggs purchased by our egg products divisions. Feed cost per dozen for twenty-six weeks ended November 26, 2016, was \$0.412, compared to \$0.423 per dozen for the comparable period of fiscal 2016, a decrease of 2.6%, resulting in a decrease in cost of sales of \$4.5 million for the comparable periods. Other farm production cost increased 8.5% to \$0.294 for the twenty-six weeks ended November 26, 2016, compared to \$0.271 for the same period of last year primarily due to increased amortization expense and facility costs related to capital improvement and conversion projects.

Gross margin decreased from 38.8% for the second quarter of fiscal 2016 to 1.6% for the thirteen weeks ended November 26, 2016 primarily due to the decreased average customer selling prices. For the twenty-six weeks ended November 26, 2016, gross loss was 1.1% compared to gross profit of 41.1% for the same period of fiscal 2016, also primarily due to the decreased average customer selling prices.

Index

SELLING, GENERAL, AND ADMINISTRATIVE EXPENSES

Selling, general, and administrative expenses include costs of marketing, distribution, accounting, and corporate overhead. The following table presents an analysis of our selling, general, and administrative expenses (in thousands).

	13 Weeks Ended			
	November 26, 2016	November 28, 2015	Change	% Change
Stock compensation expense	\$808	\$ 745	\$63	8.5 %
Specialty egg expense	13,773	16,187	(2,414)	(14.9)%
Payroll and overhead	8,723	10,097	(1,374)	(13.6)%
Other expenses	5,551	5,700	(149)	(2.6)%
Delivery expense	13,136	12,709	427	3.4 %
Total	\$41,991	\$ 45,438	\$(3,447)	(7.6)%

For the thirteen weeks ended November 26, 2016, selling, general, and administrative expense was \$42.0 million, a decrease of 7.6%, compared to \$45.4 million for the thirteen weeks ended November 28, 2015. Specialty egg expense decreased \$2.4 million compared to the same period of last year, a decrease of 14.9%. Specialty egg expense typically fluctuates with specialty egg dozens sold which decreased 4.6% for the current quarter compared to the same period of last year. Franchise fees and advertising, which are components of specialty egg expense, decreased 9.4% and 18.4%, respectively, compared to higher than normal amounts in fiscal 2016. Payroll and overhead decreased \$1.4 million, or 13.6%, compared to the same period of last year primarily due to reduced bonus accruals in the current period. As a percentage of net sales, payroll and overhead was 3.4% for the second quarter of fiscal 2017 compared to 1.8% for the same period of last year.

	26 Weeks Ended			
	November 26, 2016	November 28, 2015	Change	% Change
Stock compensation expense	\$1,656	\$ 1,444	\$212	14.7 %
Specialty egg expense	26,829	30,069	(3,240)	(10.8)%
Payroll and overhead	17,162	19,683	(2,521)	(12.8)%
Other expenses	10,904	12,302	(1,398)	(11.4)%
Delivery expense	25,696	24,903	793	3.2 %
Total	\$82,247	\$ 88,401	\$(6,154)	(7.0)%

For the twenty-six weeks ended November 26, 2016, selling, general, and administrative expenses was \$82.2 million, a decrease of 7.0%, compared to \$88.4 million for the twenty-six weeks ended November 28, 2015. Specialty egg expense decreased \$3.2 million compared to the same period of last year, a decrease of 10.8%. Specialty egg expense typically fluctuates with specialty egg dozens sold, which decreased 4.6% for the twenty-six weeks ended November 26, 2016 compared the same period of last year. Franchise fees and advertising, which are components of specialty egg expense, decreased 11.4% and 6.5%, respectively, compared to higher than normal amounts in fiscal 2016. Payroll and overhead decreased \$2.5 million, or 12.8%, compared to the same period of last year primarily due to reduced bonus accruals in the current period and reduced expense related to the vesting of liability awards incurred in the first quarter of fiscal 2016. As a percentage of net sales, payroll and overhead was 3.5% for the twenty-six weeks ended November 26, 2016 compared to 1.7% for the same period of last year. Other expenses decreased \$1.4 million, or 11.4%, for the twenty-six weeks ended November 26, 2016 compared with the same period of fiscal 2016, primarily due to decreased legal fees and reduction in intangible asset amortization expense related to fully amortized

customer relationships and Egg-Land's Best franchises.

OPERATING INCOME (LOSS)

As a result of the above, operating loss was \$38.0 million for the second quarter of fiscal 2017, compared to operating income of \$166.2 million for the fiscal 2016 second quarter.

20

Index

For the twenty-six weeks ended November 26, 2016, operating loss was \$87.9 million compared to operating income of \$386.3 million for the same period of last year.

OTHER INCOME (EXPENSE)

Total other income (expense) consists of items not directly charged to, or related to, operations such as interest expense, royalty income, and patronage income, among other items. Other income for the thirteen weeks ended November 26, 2016 was \$1.3 million, a decrease of \$575,000, compared to \$1.9 million for the thirteen weeks ended November 28, 2015. This decrease is primarily due to a decrease in equity income from affiliates in the second quarter of fiscal 2017 compared to the same period of last year. As a percent of net sales, other income was 0.5% for the thirteen weeks ended November 26, 2016 and 0.3% for the same period of fiscal 2016.

For the second quarter of fiscal 2017, we recorded \$781,000 of interest income compared with \$1.2 million for the same period of last year. This decrease resulted from lower average invested balances partially offset by higher average interest rates earned on investments. The Company recorded interest expense of \$370,000 and \$724,000, of which \$370,000 and \$186,000 was capitalized in the second quarters of fiscal 2017 and 2016, respectively. These changes resulted from the Company reducing outstanding debt and increasing capitalized interest related to major expansion and renovation projects.

Equity in income of affiliates for the second quarter of fiscal 2017 was \$645,000 compared to \$1.3 million for the same period of last year. The decrease of \$657,000 is primarily due to increased costs as our Red River joint venture nears completion as well as decreased income from specialty egg sales in our other unconsolidated joint ventures.

Total other income (expense) for the twenty-six weeks ended November 26, 2016, was \$2.6 million, an increase of \$200,000, compared to \$2.4 million for the same period of last year. This decrease is primarily due to a decrease in equity income from affiliates offset by an increase in interest income in the current year. As a percentage of net sales, other income was 0.5% for the twenty-six weeks ended November 26, 2016 compared to 0.2% for the same period of last year.

The Company recorded interest income of \$1.9 million for the twenty-six weeks ended November 26, 2016, compared to \$1.6 million for the same period of last year. We recorded interest expense of \$757,000 and \$1.4 million, of which \$749,000 and \$454,000 was capitalized in the year to date period of fiscal 2017 and 2016, respectively. These changes resulted from the Company reducing outstanding debt and increasing capitalized interest related to major expansion and renovation projects.

Equity in income of affiliates for the twenty-six weeks ended November 26, 2016, was \$836,000, a decrease of \$1.2 million, from \$2.0 million for the same period of fiscal 2016. This decrease is primarily due to increased costs as our Red River joint venture nears completion as well as decreased income from specialty egg sales in our other unconsolidated joint ventures.

INCOME TAXES

Pre-tax loss, less net loss attributable to noncontrolling interest, was \$36.8 million for the thirteen weeks ended November 26, 2016, compared to pre-tax income of \$167.3 million for last year's comparable period. For the current thirteen-week period, income tax benefit of \$13.8 million was recorded, with an effective tax rate of 37.5%, compared to income tax expense of \$58.1 million, with an effective rate of 34.7%, for last year's comparable period.

Edgar Filing: CAL-MAINE FOODS INC - Form 10-Q

For the twenty-six weeks ended November 26, 2016, pre-tax loss, less net loss attributable to noncontrolling interest was \$85.3 million compared to net income of \$386.9 million. For the current twenty-six week period we recognized income tax benefit of \$31.4 million, with an effective tax rate of 36.8%, compared to income tax expense of \$134.7 million, with an effective tax rate of 34.8% for the same period of last year.

Index

Included in prior period income tax expense is the benefit of the domestic production activity deduction.

Our effective rate differs from the federal statutory income tax rate of 35% due to state income taxes and certain items included in income for financial reporting purposes that are not included in taxable income for income tax purposes, including tax exempt interest income, domestic production activity deduction, and net income or loss attributable to noncontrolling interest.

NET INCOME (LOSS) ATTRIBUTABLE TO NONCONTROLLING INTEREST

For the thirteen weeks ended November 26, 2016 and November 28, 2015, net income attributable to noncontrolling interest was \$43,000 and \$680,000, respectively.

For the twenty-six weeks ended November 26, 2016, net loss attributable to noncontrolling interest was \$1,000 compared to net income of \$1.7 million for the same period of fiscal 2016.

NET INCOME (LOSS) ATTRIBUTABLE TO CAL-MAINE FOODS, INC.

Net loss for the thirteen weeks ended November 26, 2016 was \$23.0 million, or \$0.48 per basic and diluted share, compared to net income of \$109.2 million, or \$2.27 per basic and \$2.26 per diluted share for the same period last year.

For the twenty-six weeks ended November 26, 2016, net loss was \$53.9 million, or \$1.12 per basic and diluted share, compared to net income of \$252.3 million, or \$5.24 per basic and \$5.22 per diluted share for the same period of last year.

CAPITAL RESOURCES AND LIQUIDITY

Our working capital at November 26, 2016 was \$402.2 million, compared to \$542.8 million at May 28, 2016. The calculation of working capital is defined as current assets less current liabilities. Our current ratio was 5.87 at November 26, 2016, compared with 7.50 at May 28, 2016. We have \$3.7 million in outstanding standby letters of credit, which are collateralized by cash for the benefit of certain insurance companies. Our long-term debt at November 26, 2016, including current maturities, amounted to \$22.5 million, compared to \$25.6 million at May 28, 2016. Refer to Note 9 of our May 28, 2016 audited financial statements for further information on our long-term debt.

For the twenty-six weeks ended November 26, 2016, \$70.2 million in net cash was used in operating activities, a decrease of \$370.6 million, compared to net cash provided by operations of \$300.5 million for the comparable period in fiscal 2016. Decreased gross profit margins resulting from lower egg selling prices contributed greatly to our decrease in cash flow from operations.

For the twenty-six weeks ended November 26, 2016, approximately \$193.3 million was provided from the sale of short-term investments and \$13.3 million was used to purchase short-term investments, compared to \$104.5 million in sales and \$260.2 million in purchases in the second quarter of fiscal 2016. We used \$68.6 million for the previously discussed acquisition of the assets of Foodonics. We invested an additional \$10.8 million in our previously disclosed Red River Valley Egg Farm, LLC joint venture ("Red River"). Approximately \$40.6 million was used to purchase property, plant and equipment, including construction projects discussed in detail below, compared to \$34.0 million in the twenty-six weeks ended November 28, 2015. We paid dividends of \$63.1 million in twenty-six weeks ended November 28, 2015 and none in fiscal 2017. As of November 26, 2016, cash decreased approximately \$11.6 million since May 28, 2016 compared to an increase of \$6.4 million during the same period of fiscal 2016.

Index

To accommodate the previously discussed increase in customers committing to cage-free eggs over time, we expect that future expansions at our farms will be with environments that are cage-free or with equipment that can easily be converted to cage-free, based on a timeline that meets our customer's needs. The following table represents material construction projects approved as of December 22, 2016:

Project	Location	Projected Completion	Projected Cost	Spent as of November 26, 2016	Remaining Projected Cost
Organic Facility Expansion	Chase, KS	December 2016	\$ 19,082	\$ 18,569	\$ 513
Cage-Free Layer Houses	South Texas	January 2017	4,033	3,640	393
Cooler & Storage Expansion	Bethune, SC	February 2017	1,529	1,331	198
California Compliant/Cage Free Layer House Expansions	Delta, UT	March 2017	10,696	10,081	615
Cage-Free Layer Houses	Lake City, FL	April 2017	9,287	5,854	3,433
Convertible/Cage-Free Layer House with Pullets	South Texas	April 2017	11,353	9,299	2,054
Cage-Free Layer Houses	South Texas	April 2017	4,063	770	3,293
Refurbish Layer Houses Cage Free	Shady Dale, GA	May 2017	4,864	2,782	2,082
Convertible/Cage-Free Layer Houses	Green Forest, AR	May 2017	8,146	5,592	2,554
Convertible/Cage-Free Layer House with Pullets	Guthrie, KY	September 2017	13,252	6,333	6,919
			\$ 67,223	\$ 45,682	\$ 21,541

In addition to these projects, the Company expects to continue to fund its 50% share of the previously discussed Red River JV during fiscal 2017. As of December 22, 2016, we have contributed \$50.3 million to the joint venture and we estimate we will make additional contributions of approximately \$3.8 million to fund our share of the remaining construction and startup costs.

Certain property, plant, and equipment is pledged as collateral on our notes payable and senior secured notes. Unless otherwise approved by our lenders, we are required by provisions of our loan agreements to (1) maintain minimum levels of working capital (current ratio of not less than 1.25 to 1) and net worth (minimum of \$90.0 million tangible net worth, plus 45% of cumulative net income since the fiscal year ended May 28, 2005); (2) limit dividends paid in any given quarter to not exceed an amount equal to one third of the previous quarter's consolidated net income (allowed if no events of default); (3) maintain minimum total funded debt to total capitalization (not to exceed 55%); and (4) maintain various cash-flow coverage ratios (1.25 to 1), among other restrictions. At November 26, 2016, we were in compliance with the financial covenant requirements of all loan agreements. Under certain of the loan agreements, the lenders have the option to require the prepayment of any outstanding borrowings in the event we undergo a change in control, as defined in the applicable loan agreement. Our debt agreements require Fred R. Adams, Jr., our Founder and Chairman Emeritus, or his family, to maintain ownership of Company shares representing not less than 50% of the outstanding voting power of the Company.

We believe our current cash balances, investments, borrowings, and cash flows from operations will be sufficient to fund our current and projected capital needs for at least the next twelve months.

Index

IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standard Update No. 2014-09, Revenue from Contracts with Customers (ASU 2014-09). The standard provides companies with a single model for use in accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, including industry-specific revenue guidance. The core principle of the model is to recognize revenue when control of the goods or services transfers to the customer in an amount that reflects the consideration that is expected to be received for those goods or services. In August 2015, FASB issued ASU 2015-14 which deferred the effective date of ASU 2014-09 until annual reporting periods beginning after December 15, 2017. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. The Company does not expect ASU 2014-09 to have a material impact on the consolidated financial statement presentation.

In February 2016, the FASB issued ASU 2016-02, Leases. The purpose of the standard is to improve transparency and comparability related to the accounting and reporting of leasing arrangements. The guidance will require balance sheet recognition for assets and liabilities associated with rights and obligations created by leases with terms greater than twelve months. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and interim periods within those annual periods. Early adoption is permitted. The Company does not expect ASU 2016-02 to have a material impact on the consolidated financial statement presentation.

In March 2016, the FASB issued ASU 2016-09, Improvements to Employee Share-Based Compensation Accounting. ASU 2016-09 requires that excess tax benefits are recorded on the income statement as opposed to additional paid-in-capital, and treated as an operating activity on the statement of cash flows. ASU 2016-09 also allows companies to make an accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2017 with early adoption permitted. The Company does not expect ASU 2016-09 to have a material impact on the consolidated financial statement presentation.

CRITICAL ACCOUNTING POLICIES

We suggest our Summary of Significant Accounting Policies, as described in Note 1 of the Notes to Consolidated Financial Statements included our Annual Report on Form 10-K for the fiscal year ended May 28, 2016, be read in conjunction with Management’s Discussion and Analysis of Financial Condition and Results of Operations. There have been no changes to critical accounting policies identified in our Annual Report on Form 10-K for the year ended May 28, 2016.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the market risk reported in the Company's Annual Report on Form 10-K for the fiscal year ended May 28, 2016.

Index

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation of our disclosure controls and procedures conducted by our Chief Executive Officer and Chief Financial Officer, together with other financial officers, such officers concluded that our disclosure controls and procedures were effective as of November 26, 2016 at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended November 26, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Index

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDING

Refer to the discussion of certain legal proceedings involving the Company and/or its subsidiaries in our Quarterly Report on Form 10-Q for the period ended August 27, 2016, under Part II Item 1: Legal Proceedings, and in our Annual Report on Form 10-K for the year ended May 28, 2016, under Part I, Item 3: Legal Proceedings, and Part II Item 8, Notes to Consolidated Financial Statements, Note 13: Contingencies, which discussions are incorporated herein by reference, as well as the following:

Egg Antitrust Litigation

Since September 25, 2008, the Company has been named as one of several defendants in numerous antitrust cases involving the United States shell egg industry. In some of these cases, the named plaintiffs allege that they purchased eggs or egg products directly from a defendant and have sued on behalf of themselves and a putative class of others who claim to be similarly situated. In other cases, the named plaintiffs allege that they purchased shell eggs and egg products directly from one or more of the defendants but sue only for their own alleged damages and not on behalf of a putative class. In the remaining cases, the named plaintiffs are individuals or companies who allege that they purchased shell eggs indirectly from one or more of the defendants - that is, they purchased from retailers that had previously purchased from defendants or other parties - and have sued on behalf of themselves and a putative class of others who claim to be similarly situated.

The Judicial Panel on Multidistrict Litigation consolidated all of the putative class actions (as well as certain other cases in which the Company was not a named defendant) for pretrial proceedings in the United States District Court for the Eastern District of Pennsylvania. The Pennsylvania court has organized the putative class actions around two groups (direct purchasers and indirect purchasers) and has named interim lead counsel for the named plaintiffs in each group.

The Direct Purchaser Putative Class Action. The direct purchaser putative class cases were consolidated into *In re: Processed Egg Products Antitrust Litigation*, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. As previously reported, in November 2014, the Court approved the Company's settlement with the direct purchaser plaintiff class and entered final judgment dismissing with prejudice the class members' claims against the Company.

The Indirect Purchaser Putative Class Action. The indirect purchaser putative class cases were consolidated into *In re: Processed Egg Products Antitrust Litigation*, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. On April 20-21, 2015, the Court held an evidentiary hearing on the indirect purchaser plaintiffs' motion for class certification. On September 18, 2015, the Court denied the indirect purchaser plaintiffs' motion for class certification of 21 separate classes seeking damages under the laws of 21 states, holding that the plaintiffs were not able to prove that their purported method for ascertaining class membership was reliable or administratively feasible, that common questions would predominate, or that their proposed class approach would be manageable in a single trial. In addition to barring any right to pursue a class monetary remedy under state law, the Court also denied indirect purchaser plaintiffs' request for certification of an injunctive-relief class under federal law. However, the court allowed the indirect purchaser plaintiffs to renew their motion for class certification seeking a federal injunction. The plaintiffs filed their renewed motion to certify an injunctive-relief class on October 23, 2015. The Company joined the other defendants in opposing that motion on November 20. The plaintiffs filed their reply memorandum on December 11, 2015. The plaintiffs requested oral argument on their renewed motion for injunctive class certification. The plaintiffs also filed a petition with the United States Court of Appeals for the Third Circuit, asking the court to hear an immediate appeal of the trial court's denial of the motion to certify 21 state-law

damages classes. On December 3, 2015, the Third Circuit entered an order staying its consideration of the plaintiffs' request for an immediate appeal of the damages-class ruling pending the trial court's resolution of the plaintiffs' renewed motion to certify an injunctive-relief class.

Index

On July 2, 2015, the Company filed and joined several motions for summary judgment that sought either dismissal of the entire case or, in the alternative, dismissal of portions of the case. On July 2, 2015, the indirect purchaser plaintiffs filed motions for summary judgment seeking dismissal of certain affirmative defenses based on statutory immunities from federal and state antitrust laws. The Court heard oral argument on the motions for summary judgment on February 22 and 23, 2016. On September 9, 2016, the Court granted in part the Company's motion for summary judgment on liability, dismissing as a matter of law the plaintiffs' allegations of a side agreement to cease construction of new facilities and ruling that the plaintiffs' allegations against the United Egg Producers (UEP) animal-welfare guidelines must be evaluated at trial under the rule of reason. On September 13, 2016, the Court granted in part the plaintiffs' motion for summary judgment as to the applicability of the Capper-Volstead defense, ruling that United States Egg Marketers (an industry cooperative of which the Company is a member) may invoke the defense at trial but that UEP (another industry cooperative of which the Company is a member) cannot. The Capper-Volstead defense is a defense pursuant to the Capper-Volstead Act (the Co-operative Marketing Associations Act), enacted by Congress in 1922, which gives certain associations of farmers certain exemptions from antitrust laws.

The Non-Class Cases. Six of the cases in which plaintiffs do not seek to certify a class have been consolidated with the putative class actions into In re: Processed Egg Products Antitrust Litigation, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. The court granted with prejudice the defendants' renewed motion to dismiss the non-class plaintiffs' claims for damages arising before September 24, 2004. On July 2, 2015, the Company filed and joined several motions for summary judgment that sought either dismissal of all of the claims in all of these cases or, in the alternative, dismissal of portions of these cases. On July 2, 2015, the non-class plaintiffs filed a motion for summary judgment seeking dismissal of certain affirmative defenses based on statutory immunities from federal antitrust law. The Court heard oral argument on the motions for summary judgment on February 22 and 23, 2016. On September 6, 2016, the Court granted the defendants' motion for summary judgment against the plaintiffs' claims arising from their purchases of egg products, dismissing those claims with prejudice. On September 9, 2016, the Court granted in part the Company's motion for summary judgment on liability, dismissing as a matter of law the plaintiffs' allegations of a side agreement to cease construction of new facilities and ruling that the plaintiffs' allegations against the UEP animal-welfare guidelines must be evaluated at trial under the rule of reason. On September 12, 2016, the Court granted in part the Company's motion for summary judgment on damages, ruling that plaintiffs cannot recover damages on purchases of eggs from non-defendants and cannot recover any relief on eggs and egg products produced or sold in Arizona after October 1, 2009, the date that Arizona mandated that all eggs sold or produced in that state must be produced in compliance with the 2008 version of the UEP animal-welfare guidelines. On September 13, 2016, the Court granted in part the plaintiffs' motion for summary judgment as to the applicability of the Capper-Volstead defense, ruling that United States Egg Marketers may invoke the defense at trial but that UEP cannot. On October 4, 2016, certain direct action plaintiffs filed an appeal to the United States Court of Appeals for the Third Circuit from the District Court's Order dated September 6, 2016 granting Defendants' motion for summary judgment and dismissing with prejudice all claims based on the purchase of egg products. On November 22, 2016, the non-class plaintiffs filed a motion asking the Court to hold a status conference and set the non-class cases for trial in June of 2017. The District Court referred that motion to the Magistrate. A status conference has not yet been scheduled.

Allegations in Each Case. In all of the cases described above, the plaintiffs allege that the Company and certain other large domestic egg producers conspired to reduce the domestic supply of eggs in a concerted effort to raise the price of eggs to artificially high levels. In each case, plaintiffs allege that all defendants agreed to reduce the domestic supply of eggs by: (a) agreeing to limit production; (b) manipulating egg exports; and (c) implementing industry-wide animal welfare guidelines that reduced the number of hens and eggs.

The named plaintiffs in the remaining indirect purchaser putative class action seek treble damages under the statutes and common-law of various states and injunctive relief under the Sherman Act on behalf of themselves and all other putative class members in the United States. Although plaintiffs allege a class period starting in October, 2006 and

running “through the present,” the Court denied the plaintiffs’ motion to certify classes seeking damages under the laws of 21 states and denied without prejudice the plaintiffs’ motion to certify an injunctive-relief class, although the plaintiffs have filed a renewed motion to certify an injunctive-relief class, as discussed above.

Index

Five of the original six non-class cases remain pending against the Company. The principal plaintiffs in these cases are: The Kroger Co.; Publix Super Markets, Inc.; SUPERVALU, Inc.; Safeway, Inc.; Albertsons LLC; H.E. Butt Grocery Co.; The Great Atlantic & Pacific Tea Company, Inc.; Walgreen Co.; Hy-Vee, Inc.; and Giant Eagle, Inc. In four of these remaining non-class cases, the plaintiffs seek treble damages and injunctive relief under the Sherman Act. In one of those four cases, the plaintiffs purchased only egg products, and as noted above, the Court dismissed with prejudice all claims arising from the purchase of egg products. On October 4, 2016, the four plaintiffs in that case (Kraft Food Global, Inc., General Mills, Inc., Nestle USA, Inc., and The Kellogg Company) appealed that decision to the United States Court of Appeals for the Third Circuit. In the fifth remaining non-class case, the plaintiff seeks treble damages and injunctive relief under the Sherman Act and the Ohio antitrust act (known as the Valentine Act).

The Pennsylvania court has entered a series of orders related to case management, discovery, class certification, summary judgment, and scheduling. The Court has also denied all four motions that the plaintiffs filed to exclude testimony from certain expert witnesses retained by the defendants. The Pennsylvania court has not set a trial date for any of the Company’s remaining consolidated cases (non-class and indirect purchaser cases). As noted above, the non-class plaintiffs have requested that a status conference be held in the near future and that the Court schedule a trial for June of 2017.

The Company intends to continue to defend the remaining cases as vigorously as possible based on defenses which the Company believes are meritorious and provable. While management believes that the likelihood of a material adverse outcome in the overall egg antitrust litigation has been significantly reduced as a result of the settlements and rulings described above, there is still a reasonable possibility of a material adverse outcome in the remaining egg antitrust litigation. At the present time, however, it is not possible to estimate the amount of monetary exposure, if any, to the Company because of these cases. Accordingly, adjustments, if any, which might result from the resolution of these remaining legal matters, have not been reflected in the financial statements.

Other Matters

In addition to the above, the Company is involved in various other claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company’s consolidated results of operations or financial position.

At this time, it is not possible for us to predict the ultimate outcome of the matters set forth above.

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended May 28, 2016.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
