

KIMBERLY CLARK CORP  
Form 10-Q  
July 24, 2018

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 1-225

KIMBERLY-CLARK CORPORATION  
(Exact name of registrant as specified in its charter)

Delaware 39-0394230  
(State or other jurisdiction of (I.R.S. Employer  
incorporation) Identification No.)

P. O. Box 619100

Dallas, Texas

75261-9100

(Address of principal executive offices)

(Zip code)

(972) 281-1200

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer   
Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company   
Emerging growth company

Edgar Filing: KIMBERLY CLARK CORP - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

As of July 17, 2018, there were 347,664,541 shares of the Corporation's common stock outstanding.

KIMBERLY-CLARK CORPORATION AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

Note 1. Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all material adjustments which are of a normal and recurring nature necessary for a fair presentation of the results for the periods presented have been reflected. Dollar amounts are reported in millions, except per share dollar amounts, unless otherwise noted.

For further information, refer to the consolidated financial statements and footnotes included in our Annual Report on Form 10-K for the year ended December 31, 2017. The terms "Corporation," "Kimberly-Clark," "K-C," "we," "our" and "us" refer to Kimberly-Clark Corporation and its consolidated subsidiaries.

In prior years, we followed an accounting practice whereby costs associated with sales of K-C Professional dispensers were classified as a reduction in revenue, similar to sales incentives. Effective January 1, 2018, we changed this practice and now classify these costs as cost of products sold. This change resulted in an immaterial increase in net sales and cost of products sold and all applicable amounts included in this filing have been recast accordingly.

Adoption of Highly Inflationary Accounting in Argentina

GAAP guidance requires the use of highly inflationary accounting for countries whose cumulative three-year inflation exceeds 100 percent. We have been closely monitoring the inflation data and currency volatility in Argentina, where there are multiple data sources for measuring and reporting inflation. In the second quarter of 2018, the Argentine peso rapidly devalued relative to the U.S. dollar, which along with increased inflation, indicated that the three-year cumulative inflation in that country exceeded 100 percent as of June 30, 2018. As a result, we have elected to adopt highly inflationary accounting as of July 1, 2018 for our subsidiaries in Argentina ("K-C Argentina"). Under highly inflationary accounting, K-C Argentina's functional currency became the U.S. dollar, and its income statement and balance sheet will be measured in U.S. dollars using both current and historical rates of exchange. The effect of changes in exchange rates on peso-denominated monetary assets and liabilities will be reflected in earnings in other (income) and expense, net. As of June 30, 2018, K-C Argentina had a small net peso monetary position. Net sales of K-C Argentina were less than 2 percent of our consolidated net sales for the six months ended June 30, 2018 and 2017.

Recently Adopted Accounting Standards

The Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") No. 2018-02, Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. This new standard permits entities to reclassify to retained earnings the tax effects stranded in accumulated other comprehensive income ("AOCI") as a result of U.S. tax reform. We early adopted this ASU as of April 1, 2018 and reclassified \$156 of stranded tax effects related to the U.S. tax reform change in the federal corporate tax rate from AOCI to retained earnings.

The FASB issued ASU No. 2017-07, Compensation-Retirement Benefits (Topic 715), Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The standard requires that an employer report the service cost component in the same line items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component and outside of operating profit (presented as "Nonoperating expense" in our consolidated income statement). We adopted this standard as of January 1, 2018 and applied the amendments retrospectively, and all applicable amounts included in this filing have been recast accordingly. We used the practical expedient that permits us to use the amounts previously disclosed in our employee postretirement benefits note for the prior comparative periods as the basis for applying the retrospective presentation requirements.

The FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which provides a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. We adopted this ASU effective January 1, 2018 on a full retrospective basis. Adoption of this standard did not result in significant changes to our accounting policies, business processes, systems or controls, or have a material impact on our financial position, results of operations and cash flows or related disclosures. As such, prior period financial statements were not recast. We primarily generate revenue from the sale of finished products and recognize revenue at the time of product shipment or delivery, depending on when control passes. Rebate and promotion accruals are based on estimates of the quantity of customer sales. Promotion accruals also consider estimates of the number of consumer coupons that will be redeemed and timing and costs of activities within the promotional programs. The cost

of promotion activities provided to customers is classified as a reduction in sales revenue. Under ASU No. 2014-09, effective January 1, 2018 for interim reporting, the estimated redemption value of consumer coupons and related expense are recorded when the related revenue from customers is recognized. In prior years, these costs were recognized at the time of coupon issuance. The impact of this change was not material.

#### Accounting Standards Issued - Not Yet Adopted

The FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The standard makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the presentation and disclosure requirements and changes how companies assess effectiveness. For public companies, this ASU is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted in any interim period. The effects of this standard on our financial position, results of operations and cash flows are not expected to be material.

The FASB issued ASU No. 2016-02, Leases (Topic 842). Under the new guidance, a lessee will be required to recognize assets and liabilities for all leases with lease terms of more than 12 months. Consistent with current GAAP, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. The ASU requires additional disclosures. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The ASU requires adoption based upon a modified retrospective transition approach. The effects of this standard will be to increase total assets and total liabilities by an amount yet to be determined. The impact on our results of operations and cash flows is not expected to be material.

#### Note 2. 2018 Global Restructuring Program

On January 23, 2018, we announced the 2018 Global Restructuring Program to reduce our structural cost base by streamlining and simplifying our manufacturing supply chain and overhead organization. We expect to close or sell approximately 10 manufacturing facilities and expand production capacity at several others. We expect to exit or divest some lower-margin businesses that generate approximately 1 percent of our net sales. The sales are concentrated in our consumer tissue business segment. The restructuring is expected to impact our organizations in all major geographies. Workforce reductions are expected to be in the range of 5,000 to 5,500. Certain capital appropriations under the 2018 Global Restructuring Program are being finalized. Accounting for actions related to each appropriation will commence when the appropriation is authorized for execution.

The restructuring is expected to be completed by the end of 2020, with total costs anticipated to be \$1.7 billion to \$1.9 billion pre-tax (\$1.35 billion to \$1.5 billion after tax). Cash costs are expected to be \$900 to \$1.0 billion, primarily related to workforce reductions. Non-cash charges are expected to be \$800 to \$900 pre-tax and will primarily consist of incremental depreciation and asset impairments. Restructuring charges in 2018 are expected to be \$1.2 billion to \$1.35 billion pre-tax (\$950 to \$1.05 billion after tax).

The following charges were incurred in connection with the 2018 Global Restructuring Program:

	Three Months Ended June 30, 2018	Six Months Ended June 30, 2018
Cost of products sold:		
Charges for workforce reductions	\$ 6	\$ 125
Asset impairments	—	74
Asset write-offs	31	86
Incremental depreciation	40	68
Other exit costs	8	9
Total	85	362
Marketing, research and general expenses:		
Charges (adjustments) for workforce reductions	(16 )	270
Other exit costs	31	45
Total	15	315
Nonoperating expense <sup>(a)</sup>	30	30
Total charges	130	707
Provision for income taxes	(24 )	(167 )
Net charges	106	540
Net impact related to equity companies and noncontrolling interests	(4 )	(10 )
Net charges attributable to Kimberly-Clark Corporation	\$ 102	\$ 530

(a) Represents non-cash pension settlement charges resulting from restructuring actions.

The asset impairments charge measurement was based on the excess of the carrying value of the impacted asset groups over their fair values. These fair values were measured by using discounted cash flows expected over the limited time the assets would remain in use and as a result, the assets were essentially written off. The use of discounted cash flows represents a level 3 measure under the fair value hierarchy.

The following summarizes the restructuring liabilities activity:

	2018
Restructuring liabilities at January 1	\$—
Charges for workforce reductions and other cash exit costs	446
Cash payments	(158 )
Currency and other	(13 )
Restructuring liabilities at June 30	\$275

As of June 30, 2018, restructuring liabilities of \$157 are recorded in Accrued expenses and \$118 are recorded in Other Liabilities. The cash impact related to restructuring charges is recorded in Operating working capital and Other Operating Activities, as appropriate, in our consolidated cash flow statement.

#### Note 3. U.S. Tax Reform

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act made changes to the U.S. tax code, which included (1) reduced U.S. corporate tax rate from 35 percent to 21 percent, (2) implemented a base erosion and anti-abuse tax, (3) generally eliminated U.S. federal income taxes on dividends from foreign subsidiaries, (4) a new provision designed to tax global intangible low-taxed income ("GILTI") of foreign subsidiaries which allows for the possibility of utilizing foreign tax credits to offset the tax liability (subject to some limitations), (5) a lower effective U.S. tax rate on certain revenues from sources outside the U.S., and (6) a one-time transition tax on certain undistributed earnings of foreign subsidiaries.

In the period ended December 31, 2017, we recorded a provisional discrete net tax benefit associated with the Tax Act and related matters. In the first quarter of 2018, we recorded discrete net tax expense of \$82 primarily related to new

guidance issued affecting tax benefits we recorded in fourth quarter 2017 for certain tax planning actions taken in anticipation of the Tax Act.

9

---

As of June 30, 2018, the amounts recorded for the Tax Act remain provisional for the transition tax, the remeasurement of deferred taxes, and our reassessment of permanently reinvested earnings, uncertain tax positions and valuation allowances. These estimates may be impacted by further analysis and future clarification and guidance regarding available tax accounting methods and elections, earnings and profits computations, state tax conformity to federal tax changes and the impact of the GILTI provisions. At June 30, 2018, we were not able to reasonably estimate, and therefore have not recorded, deferred taxes for the GILTI provisions. We have not yet determined our policy election with respect to whether to record deferred taxes for basis differences expected to reverse as a result of the GILTI provisions in future periods or use the period cost method. We have, however, included an estimate of the current GILTI impact in our tax provision for 2018.

#### Note 4. Fair Value Information

The following fair value information is based on a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels in the hierarchy used to measure fair value are:

Level 1 – Unadjusted quoted prices in active markets accessible at the reporting date for identical assets and liabilities.

Level 2 – Quoted prices for similar assets or liabilities in active markets. Quoted prices for identical or similar assets and liabilities in markets that are not considered active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are significant to the valuation and are unobservable.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

During the six months ended June 30, 2018 and for the full year 2017, there were no significant transfers among level 1, 2, or 3 fair value determinations.

Derivative assets and liabilities are measured on a recurring basis at fair value. At June 30, 2018 and December 31, 2017, derivative assets were \$39 and \$27, respectively, and derivative liabilities were \$63 and \$51, respectively. The fair values of derivatives used to manage interest rate risk and commodity price risk are based on LIBOR rates and interest rate swap curves and NYMEX price quotations, respectively. The fair values of hedging instruments used to manage foreign currency risk are based on published quotations of spot currency rates and forward points, which are converted into implied forward currency rates. Measurement of our derivative assets and liabilities is considered a level 2 measurement. Additional information on our classification and use of derivative instruments is contained in Note 7.

Redeemable preferred securities of subsidiaries are measured on a recurring basis at fair value and were \$61 at both June 30, 2018 and December 31, 2017. They are not traded in active markets. For certain redeemable securities, fair values were calculated using a floating rate pricing model that compared the stated spread to the fair value spread to determine the price at which each of the financial instruments should trade. The model used the following inputs to calculate fair values: face value, current LIBOR rate, unobservable fair value credit spread, stated spread, maturity date and interest or dividend payment dates. The fair values of the remaining redeemable securities were based on a discounted cash flow valuation model. Measurement of the redeemable preferred securities is considered a level 3 measurement.

Company-owned life insurance ("COLI") assets are measured on a recurring basis at fair value. COLI assets were \$69 and \$68 at June 30, 2018 and December 31, 2017, respectively. The COLI policies are a source of funding primarily for our nonqualified employee benefits and are included in other assets. The COLI policies are measured at fair value using the net asset value per share practical expedient, and therefore, are not classified in the fair value hierarchy.

The following table includes the fair value of our financial instruments for which disclosure of fair value is required:

	Fair Value Hierarchy Level	Estimated Carrying Amount		Estimated Carrying Amount	
		June 30, 2018	Value	December 31, 2017	Value
<b>Assets</b>					
Cash and cash equivalents <sup>(a)</sup>	1	\$484	\$ 484	\$ 616	\$ 616
Time deposits <sup>(b)</sup>	1	229	229	185	185
<b>Liabilities and redeemable securities of subsidiaries</b>					
Short-term debt <sup>(c)</sup>	2	638	638	547	547
Long-term debt <sup>(d)</sup>	2	6,849	7,102	6,878	7,398

(a) Cash equivalents are composed of certificates of deposit, time deposits and other interest-bearing investments with original maturity dates of 90 days or less. Cash equivalents are recorded at cost, which approximates fair value.

(b) Time deposits are composed of deposits with original maturities of more than 90 days but less than one year and instruments with original maturities of greater than one year, included in other current assets or other assets in the consolidated balance sheet, as appropriate. Time deposits are recorded at cost, which approximates fair value.

(c) Short-term debt is composed of U.S. commercial paper and/or other similar short-term debt issued by non-U.S. subsidiaries, all of which are recorded at cost, which approximates fair value.

(d) Long-term debt includes the current portion of these debt instruments. Fair values were estimated based on quoted prices for financial instruments for which all significant inputs were observable, either directly or indirectly.

#### Note 5. Earnings Per Share ("EPS")

There are no adjustments required to be made to net income for purposes of computing EPS. The average number of common shares outstanding is reconciled to those used in the basic and diluted EPS computations as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	2018	2017	2018	2017
(Millions of shares)	2018	2017	2018	2017
Basic	348.8	354.4	349.6	355.2
Dilutive effect of stock options and restricted share unit awards	1.5	2.3	1.7	2.4
Diluted	350.3	356.7	351.3	357.6

The impact of options outstanding that were not included in the computation of diluted EPS because their exercise price was greater than the average market price of the common shares was insignificant. The number of common shares outstanding as of June 30, 2018 and 2017 was 347.9 million and 353.4 million, respectively.

#### Note 6. Stockholders' Equity (Deficit)

Set forth below is a reconciliation for the six months ended June 30, 2018 of the carrying amount of total stockholders' equity from the beginning of the period to the end of the period.

	Stockholders' Equity (Deficit) Attributable to The Noncontrolling Corporation Interests	
Balance at December 31, 2017	\$629	\$ 253
Net Income	548	12
Other comprehensive income, net of tax	(147 )	(10 )
Stock-based awards exercised or vested	24	—
Recognition of stock-based compensation	25	—
Shares repurchased	(447 )	—

Edgar Filing: KIMBERLY CLARK CORP - Form 10-Q

Dividends declared	(699 ) (20 )
Other	10 —
Balance at June 30, 2018	\$(57 ) \$ 235

During the six months ended June 30, 2018, we repurchased 3.9 million shares at a total cost of \$427 pursuant to a share repurchase program authorized by our Board of Directors.

11

---

Net unrealized currency gains or losses resulting from the translation of assets and liabilities of foreign subsidiaries, except those in highly inflationary economies, are recorded in AOCI. For these operations, changes in exchange rates generally do not affect cash flows; therefore, unrealized translation adjustments are recorded in AOCI rather than net income. Upon sale or substantially complete liquidation of any of these subsidiaries, the applicable unrealized translation would be removed from AOCI and reported as part of the gain or loss on the sale or liquidation. Also included in unrealized translation amounts are the effects of foreign exchange rate changes on intercompany balances of a long-term investment nature and transactions designated as hedges of net foreign investments. The change in net unrealized currency translation for the six months ended June 30, 2018 was primarily due to the weakening of most foreign currencies versus the U.S. dollar, including the Brazilian real, Australian dollar and South Korean won.

The changes in the components of AOCI attributable to Kimberly-Clark, net of tax, are as follows:

	Unrealized Translation	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Cash Flow Hedges and Other
Balance as of December 31, 2016	\$ (2,351 )	\$(1,097)	\$ (31 )	\$ 5
Other comprehensive income (loss) before reclassifications	310	(17 )	—	(37 )

#### Note 7. Objectives and Strategies for Using Derivatives

As a multinational enterprise, we are exposed to financial risks, such as changes in foreign currency exchange rates, interest rates, and commodity prices. We employ a number of practices to manage these risks, including operating and financing activities and, where appropriate, the use of derivative instruments. We enter into derivative instruments to hedge a portion of forecasted cash flows denominated in foreign currencies for non-U.S. operations' purchases of raw materials, which are priced in U.S. dollars, and imports of intercompany finished goods and work-in-process priced predominantly in U.S. dollars and euros. The derivative instruments used to manage these exposures are designated and qualify as cash flow hedges. The foreign currency exposure on certain non-functional currency denominated monetary assets and liabilities, primarily intercompany loans and accounts payable, is hedged with primarily undesignated derivative instruments.

Interest rate risk is managed using a portfolio of variable and fixed-rate debt composed of short and long-term instruments. Interest rate swap contracts may be used to facilitate the maintenance of the desired ratio of variable and fixed-rate debt and are designated and qualify as fair value hedges. From time to time, we also hedge the anticipated issuance of fixed-rate debt, and these contracts are designated as cash flow hedges.

We use derivative instruments, such as forward swap contracts, to hedge a limited portion of our exposure to market risk arising from changes in prices of certain commodities. These derivatives are designated as cash flow hedges of specific quantities of the underlying commodity expected to be purchased in future months.

Translation adjustments result from translating foreign entities' financial statements into U.S. dollars from their functional currencies. The risk to any particular entity's net assets is reduced to the extent that the entity is financed with local currency borrowings. A portion of our balance sheet translation exposure for certain affiliates, which results

from changes in translation rates between the affiliates' functional currencies and the U.S. dollar, is hedged with financial instruments. These instruments are

12

---

designated as net investment hedges and have an aggregate notional value of \$808 at June 30, 2018. Changes in fair value of net investment hedges are recorded in AOCI as part of the cumulative translation adjustment.

At June 30, 2018 and December 31, 2017, derivative assets were \$39 and \$27, respectively, and derivative liabilities were \$63 and \$51, respectively, primarily comprised of foreign currency exchange contracts.

Derivative instruments that are designated and qualify as fair value hedges are predominantly used to manage interest rate risk. The fair values of these derivative instruments are recorded as an asset or liability, as appropriate, with the offset recorded in current earnings. The offset to the change in fair values of the related hedged items also is recorded in current earnings. Any realized gain or loss on the derivatives that hedge interest rate risk is amortized to interest expense over the life of the related debt. As of June 30, 2018, the aggregate notional value of outstanding interest rate contracts designated as fair value hedges was \$300. Fair value hedges resulted in no significant ineffectiveness in the six months ended June 30, 2018 and 2017, and gains or losses recognized in interest expense for interest rate swaps were not significant. For the six months ended June 30, 2018 and 2017, no gains or losses were recognized in earnings as a result of a hedged firm commitment no longer qualifying as a fair value hedge.

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is initially recorded in AOCI, net of related income taxes, and recognized in earnings in the same period that the hedged exposure affects earnings. As of June 30, 2018, outstanding commodity forward contracts were in place to hedge a limited portion of our estimated requirements of the related underlying commodities in the remainder of 2018 and future periods. As of June 30, 2018, the aggregate notional values of outstanding foreign exchange and interest rate derivative contracts designated as cash flow hedges were \$699 and \$100, respectively. Cash flow hedges resulted in no significant ineffectiveness for the six months ended June 30, 2018 and 2017, and no significant gains or losses were reclassified into earnings as a result of the discontinuance of cash flow hedges due to the original forecasted transaction no longer being probable of occurring. At June 30, 2018, amounts to be reclassified from AOCI during the next twelve months are not expected to be material. The maximum maturity of cash flow hedges in place at June 30, 2018 is June 2020.

Gains or losses on undesignated foreign exchange hedging instruments are immediately recognized in other (income) and expense, net. A loss of \$40 and a gain of \$19 were recorded in the three months ended June 30, 2018 and 2017, respectively. A loss of \$37 and a gain of \$16 were recorded in the six months ended June 30, 2018 and 2017, respectively. The effect on earnings from the use of these non-designated derivatives is substantially neutralized by the transactional gains and losses recorded on the underlying assets and liabilities. At June 30, 2018, the notional value of these undesignated derivative instruments was approximately \$2.3 billion.

#### Note 8. Business Segment Information

We are organized into operating segments based on product groupings. These operating segments have been aggregated into three reportable global business segments: Personal Care, Consumer Tissue and K-C Professional. The reportable segments were determined in accordance with how our chief operating decision maker and our executive managers develop and execute global strategies to drive growth and profitability. These strategies include global plans for branding and product positioning, technology, research and development programs, cost reductions including supply chain management, and capacity and capital investments for each of these businesses. Segment management is evaluated on several factors, including operating profit. Segment operating profit excludes other (income) and expense, net and income and expense not associated with ongoing operations of the business segments, including the costs of corporate decisions related to the 2018 Global Restructuring Program described in Note 2. The principal sources of revenue in each global business segment are described below:

Personal Care brands offer our consumers a trusted partner in caring for themselves and their families by delivering confidence, protection and discretion through a wide variety of innovative solutions and products such as disposable diapers, training and youth pants, swimpants, baby wipes, feminine and incontinence care products, and other related products. Products in this segment are sold under the Huggies, Pull-Ups, Little Swimmers, GoodNites, DryNites, Kotex, U by Kotex, Intimus, Depend, Plenitud, Poise and other brand names.

Consumer Tissue offers a wide variety of innovative solutions and trusted brands that touch and improve people's lives every day. Products in this segment include facial and bathroom tissue, paper towels, napkins and related products, and are sold under the Kleenex, Scott, Cottonelle, Viva, Andrex, Scottex, Neve and other brand names.

K-C Professional partners with businesses to create Exceptional Workplaces, helping to make them healthier, safer and more productive through a range of solutions and supporting products such as wipers, tissue, towels, apparel, soaps and sanitizers. Our brands, including Kleenex, Scott, WypAll, Kimtech and Jackson Safety, are well-known for quality and trusted to help people around the world work better.

Information concerning consolidated operations by business segment is presented in the following tables:

	Three Months			Six Months		
	Ended June 30			Ended June 30		
	2018	2017	Change	2018	2017	Change
<b>NET SALES</b>						
Personal Care	\$2,257	\$2,270	-1 %	\$4,564	\$4,520	+1 %
Consumer Tissue	1,472	1,463	+1 %	3,051	2,918	+5 %
