**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2019

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-225

KIMBERLY-CLARK CORPORATION

(Exact name of registrant as specified in its charter)

Delaware **39-0394230**
(State or other jurisdiction of (I.R.S. Employer
incorporation) Identification No.)

P. O. Box 619100

Dallas, Texas

75261-9100

(Address of principal executive offices)
(Zip code)

(972) 281-1200

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of April 15, 2019, there were 343,795,330 shares of the Corporation's common stock outstanding.

KIMBERLY-CLARK CORPORATION AND SUBSIDIARIES
NOTES TO THE UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Accounting Policies

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all material adjustments which are of a normal and recurring nature necessary for a fair presentation of the results for the periods presented have been reflected. Dollar amounts are reported in millions, except per share dollar amounts, unless otherwise noted.

For further information, refer to the consolidated financial statements and footnotes included in our Annual Report on Form 10-K for the year ended December 31, 2018. The terms "Corporation," "Kimberly-Clark," "K-C," "we," "our" and "us" refer to Kimberly-Clark Corporation and its consolidated subsidiaries.

Highly Inflationary Accounting in Argentina

GAAP guidance requires the use of highly inflationary accounting for countries whose cumulative three-year inflation exceeds 100 percent. In the second quarter of 2018, published inflation indices indicated that the three-year cumulative inflation in Argentina exceeded 100 percent, and as of July 1, 2018, we elected to adopt highly inflationary accounting for our subsidiaries in Argentina ("K-C Argentina"). Under highly inflationary accounting, K-C Argentina's functional currency became the U.S. dollar, and its income statement and balance sheet have been measured in U.S. dollars using both current and historical rates of exchange. The effect of changes in exchange rates on peso-denominated monetary assets and liabilities has been reflected in earnings in Other (income) and expense, net and was not material. As of March 31, 2019, K-C Argentina had a small net peso monetary position. Net sales of K-C Argentina were less than 2 percent of our consolidated net sales for the three months ended March 31, 2019 and 2018.

Leases

Lease assets and lease liabilities are recognized at the commencement of an arrangement where it is determined at inception that a lease exists. Lease assets represent the right to use an underlying asset for the lease term, and lease liabilities represent the obligation to make lease payments arising from the lease. These assets and liabilities are initially recognized based on the present value of lease payments over the lease term calculated using our incremental borrowing rate generally applicable to the location of the lease asset, unless the implicit rate is readily determinable. Lease assets also include any upfront lease payments made and exclude lease incentives. Lease terms include options to extend or terminate the lease when it is reasonably certain that those options will be exercised.

Variable lease payments are generally expensed as incurred and include certain index-based changes in rent, certain nonlease components, such as maintenance and other services provided by the lessor, and other charges included in the lease. Leases with an initial term of 12 months or less are not recorded on the balance sheet, and the expense for these short-term leases and for operating leases is recognized on a straight-line basis over the lease term.

Lease agreements with lease and nonlease components are combined as a single lease component. The depreciable life of lease assets and leasehold improvements is limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise.

Recently Adopted Accounting Standards

The Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") No. 2016-02, *Leases (Topic 842)*, amended by ASU 2018-11, *Leases (Topic 842): Targeted Improvements*. The new guidance requires a lessee to recognize assets and liabilities for all leases with lease terms of more than 12 months and provide additional disclosures. The ASU requires adoption using a modified retrospective transition approach with either 1) periods prior to the adoption date being recast or 2) a cumulative-effect adjustment recognized to the opening balance of retained earnings on the adoption date with prior periods not recast. We adopted this standard on January 1, 2019 using the cumulative-effect adjustment approach. We elected the package of practical expedients in transition for leases that commenced prior to January 1, 2019 whereby these contracts were not reassessed or reclassified from their

previous assessment as of December 31, 2018. We also elected certain other practical expedients in transition including not reassessing existing land easements as lease contracts. For all new and modified leases after adoption of the ASU, we have taken the component election allowing us to account for lease components together with non lease components in the calculation of the lease asset and corresponding liability. We implemented processes and a lease accounting system to ensure adequate internal controls were in place to assess our contracts and enable proper accounting and reporting of

5

financial information upon adoption. No cumulative-effect adjustment was recognized as the amount was not material, and the impact on our results of operations and cash flows was also not material. See Note 7 for the financial position impact and additional disclosures.

The FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities*. The new standard makes more financial and non-financial hedging strategies eligible for hedge accounting. It also amends presentation and disclosure requirements and changes how companies assess hedge effectiveness. This ASU requires adoption using a modified retrospective transition approach with a cumulative-effect adjustment recognized to the opening balance of retained earnings on the adoption date with prior periods not recast. We adopted this standard on January 1, 2019 with no cumulative-effect adjustment as the amount was not material. The effects of this standard on our financial position, results of operations and cash flows were not material.

Accounting Standards Issued - Not Yet Adopted

The FASB issued ASU No. 2018-13, *Fair Value Measurement (Topic 820)*. The new guidance modifies disclosure requirements related to fair value measurement. The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Implementation on a prospective or retrospective basis varies by specific disclosure requirement. Early adoption is permitted. The standard also allows for early adoption of any removed or modified disclosures upon issuance of this ASU while delaying adoption of the additional disclosures until their effective date.

The FASB issued ASU No. 2018-15, *Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40)*. The new guidance reduces complexity for the accounting for costs of implementing a cloud computing service arrangement and aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal use software license). For public companies, the amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. Implementation should be applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption. The effects of this standard on our financial position, results of operations or cash flows are not expected to be material.

Note 2. 2018 Global Restructuring Program

In January 2018, we announced the 2018 Global Restructuring Program to reduce our structural cost base by streamlining and simplifying our manufacturing supply chain and overhead organization. We expect to close or sell approximately 10 manufacturing facilities and expand production capacity at several others. We expect to exit or divest some lower-margin businesses that generate approximately 1 percent of our net sales. The sales are concentrated in our consumer tissue business segment. The restructuring is expected to impact our organizations in all major geographies. Workforce reductions are expected to be in the range of 5,000 to 5,500. Certain capital appropriations under the 2018 Global Restructuring Program are being finalized. Accounting for actions related to each appropriation will commence when the appropriation is authorized for execution.

The restructuring is expected to be completed by the end of 2020, with total costs anticipated to be \$1.7 billion to \$1.9 billion pre-tax (\$1.35 billion to \$1.5 billion after tax). Cash costs are expected to be \$900 to \$1.0 billion, primarily related to workforce reductions. Non-cash charges are expected to be \$800 to \$900 pre-tax and will primarily consist of incremental depreciation, asset write-offs and pension settlement and curtailment charges. Restructuring charges in 2019 are expected to be \$600 to \$750 pre-tax (\$470 to \$570 after tax).

The following charges were incurred in connection with the 2018 Global Restructuring Program:

	Three Months Ended March 31, 2019	Three Months Ended March 31, 2018
Cost of products sold:		
Charges for workforce reductions	\$ 30	\$ 119
Asset impairments	—	74
Asset write-offs	12	55
Incremental depreciation	67	28
Other exit costs	16	1
Total	125	277
Marketing, research and general expenses:		
Charges for workforce reductions	4	286
Other exit costs	24	14
Total	28	300
Other (income) and expense, net	(1)	—
Total charges	152	577
Provision for income taxes	(31)	(143)
Net charges	121	434
Net impact related to equity companies and noncontrolling interests	1	(6)
Net charges attributable to Kimberly-Clark Corporation	\$ 122	\$ 428

The asset impairment charges were measured based on the excess of the carrying value of the impacted asset groups over their fair values. These fair values were measured by using discounted cash flows expected over the limited time the assets would remain in use and as a result, the assets were essentially written off. The use of discounted cash flows represents a level 3 measure under the fair value hierarchy.

The following summarizes the 2019 restructuring liabilities activity:

	2019	2018
Restructuring liabilities at January 1	\$210	\$—
Charges for workforce reductions and other cash exit costs	74	418
Cash payments	(71)	(14)
Currency and other	6	3
Restructuring liabilities at March 31	\$219	\$407

Restructuring liabilities of \$132 and \$306 are recorded in Accrued expenses and other current liabilities and \$87 and \$101 are recorded in Other Liabilities as of March 31, 2019 and 2018, respectively. The impact related to restructuring charges is recorded in Operating working capital and Other Operating Activities, as appropriate, in our consolidated cash flow statement.

Through March 31, 2019, cumulative pre-tax charges for the 2018 Global Restructuring Program were \$1.2 billion (\$905 after tax).

Note 3. U.S. Tax Reform

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). In the period ended December 31, 2017, we recorded a provisional discrete net tax benefit related to the transition tax, remeasurement of deferred taxes, our reassessment of permanently reinvested earnings, uncertain tax positions and valuation allowances, and actions taken in anticipation of the Tax Act. The provisional amounts recorded in 2017 were finalized in 2018. During 2018, we recorded discrete net tax expense related to new guidance issued during 2018 affecting tax benefits we recorded in the period ended December 31, 2017 for the transition tax and certain tax planning actions taken in anticipation of the Tax Act. At December 31, 2018, we

finalized our policy and elected to use the period cost method for global intangible low-taxed income (“GILTI”) provisions and therefore have not recorded deferred taxes for basis differences expected to reverse in future periods.

7

In the first quarter of 2018, we recorded discrete net tax expense of \$82 primarily related to guidance issued affecting tax benefits we recorded in the fourth quarter of 2017 for certain tax planning actions taken in anticipation of the Tax Act.

Note 4. Fair Value Information

The following fair value information is based on a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels in the hierarchy used to measure fair value are:

Level 1 – Unadjusted quoted prices in active markets accessible at the reporting date for identical assets and liabilities.

Level 2 – Quoted prices for similar assets or liabilities in active markets. Quoted prices for identical or similar assets and liabilities in markets that are not considered active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are significant to the valuation and are unobservable.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

During the three months ended March 31, 2019 and for the full year 2018, there were no significant transfers among level 1, 2, or 3 fair value determinations.

Derivative assets and liabilities are measured on a recurring basis at fair value. At March 31, 2019 and December 31, 2018, derivative assets were \$29 and \$30, respectively, and derivative liabilities were \$29 and \$18, respectively. The fair values of derivatives used to manage interest rate risk and commodity price risk are based on LIBOR rates and interest rate swap curves and NYMEX price quotations, respectively. The fair values of hedging instruments used to manage foreign currency risk are based on published quotations of spot currency rates and forward points, which are converted into implied forward currency rates. Measurement of our derivative assets and liabilities is considered a level 2 measurement. Additional information on our classification and use of derivative instruments is contained in Note 8.

Redeemable preferred securities of subsidiaries are measured on a recurring basis at fair value and were \$64 at both March 31, 2019 and December 31, 2018. They are not traded in active markets. For certain redeemable securities, fair values were calculated using a floating rate pricing model that compared the stated spread to the fair value spread to determine the price at which each of the financial instruments should trade. The model used the following inputs to calculate fair values: face value, current LIBOR rate, unobservable fair value credit spread, stated spread, maturity date and interest or dividend payment dates. The fair values of the remaining redeemable securities were based on a discounted cash flow valuation model. Measurement of the redeemable preferred securities is considered a level 3 measurement.

Company-owned life insurance ("COLI") assets are measured on a recurring basis at fair value. COLI assets were \$69 and \$64 at March 31, 2019 and December 31, 2018, respectively. The COLI policies are a source of funding primarily for our nonqualified employee benefits and are included in other assets. The COLI policies are measured at fair value using the net asset value per share practical expedient, and therefore, are not classified in the fair value hierarchy.

The following table includes the fair value of our financial instruments for which disclosure of fair value is required:

	Fair Value Hierarchy Level	Estimated Fair Value		Estimated Fair Value	
		Carrying Amount	March 31, 2019	Carrying Amount	December 31, 2018
Assets					
Cash and cash equivalents ^(a)	1	\$491	\$ 491	\$539	\$ 539
Time deposits ^(b)	1	260	260	256	256
Liabilities and redeemable securities of subsidiaries					
Short-term debt ^(c)	2	1,338	1,338	495	495
Long-term debt ^(d)	2	6,552	7,017	6,960	7,192

(a) Cash equivalents are composed of certificates of deposit, time deposits and other interest-bearing investments with original maturity dates of 90 days or less.

(a) Cash equivalents are recorded at cost, which approximates fair value.

(b) Time deposits are composed of deposits with original maturities of more than 90 days but less than one year and instruments with original maturities of greater than one year, included in other current assets or other assets in the consolidated balance sheet, as appropriate. Time deposits are recorded at cost, which approximates fair value.

(c) Short-term debt is composed of U.S. commercial paper and/or other similar short-term debt issued by non-U.S. subsidiaries, all of which are recorded at cost, which approximates fair value.

(d) Long-term debt includes the current portion of these debt instruments. Fair values were estimated based on quoted prices for financial instruments for which all significant inputs were observable, either directly or indirectly.

Note 5. Earnings Per Share ("EPS")

There are no adjustments required to be made to net income for purposes of computing EPS. The average number of common shares outstanding is reconciled to those used in the basic and diluted EPS computations as follows:

(Millions of shares)	Three Months Ended March 31	
	2019	2018
Basic	344.3	350.4
Dilutive effect of stock options and restricted share unit awards	1.7	2.2
Diluted	346.0	352.6

The impact of options outstanding that were not included in the computation of diluted EPS because their exercise price was greater than the average market price of the common shares was insignificant. The number of common shares outstanding as of March 31, 2019 and 2018 was 343.9 million and 349.6 million, respectively.

Note 6. Stockholders' Equity

Set forth below is a reconciliation for the three months ended March 31, 2019 and 2018 of the carrying amount of total stockholders' equity from the beginning of the period to the end of the period.

	Stockholders' Equity Attributable to	
	The Corporation	Noncontrolling Interests
Balance at December 31, 2018	\$(287)	\$ 241
Net Income	454	11
Other comprehensive income, net of tax	10	(5)
Stock-based awards exercised or vested	28	—
Recognition of stock-based compensation	17	—
Shares repurchased	(174)	—
Dividends declared (\$1.03 per share)	(354)	(24)
Other	1	—
Balance at March 31, 2019	\$(305)	\$ 223

	Stockholders' Equity	
	Attributable to	
	The Corporation	Noncontrolling Interests
Balance at December 31, 2017	\$ 629	\$ 253
Net Income	93	3
Other comprehensive income, net of tax	115	1
Stock-based awards exercised or vested	14	—
Recognition of stock-based compensation	17	—
Shares repurchased	(211)	—
Dividends declared (\$1.00 per share)	(350)	(20)
Other	10	1
Balance at March 31, 2018	\$317	\$ 238

During the three months ended March 31, 2019, we repurchased 1.4 million shares at a total cost of \$167 pursuant to a share repurchase program authorized by our Board of Directors.

Net unrealized currency gains or losses resulting from the translation of assets and liabilities of foreign subsidiaries, except those in highly inflationary economies, are recorded in Accumulated Other Comprehensive Income ("AOCI"). For these operations, changes in exchange rates generally do not affect cash flows; therefore, unrealized translation adjustments are recorded in AOCI rather than net income. Upon sale or substantially complete liquidation of any of these subsidiaries, the applicable unrealized translation would be removed from AOCI and reported as part of the gain or loss on the sale or liquidation.

Also included in unrealized translation amounts are the effects of foreign exchange rate changes on intercompany balances of a long-term investment nature and transactions designated as hedges of net foreign investments.

The change in net unrealized currency translation for the three months ended March 31, 2019 was primarily due to strengthening of foreign currencies versus the U.S. dollar.

The changes in the components of AOCI attributable to Kimberly-Clark, net of tax, are as follows:

	Unrealized Translation	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Cash Flow Hedges and Other
Balance as of December 31, 2017	\$(1,864)	\$(976)	\$ (39)	\$(40)
Other comprehensive income (loss) before reclassifications	116	(10)	—	(9)
Loss reclassified from AOCI	—	10	(a) —	8
Net current period other comprehensive income (loss)	116	—	—	(1)
Balance as of March 31, 2018	\$(1,748)	\$(976)	\$ (39)	\$(41)
Balance as of December 31, 2018	\$(2,297)	\$(1,017)	\$ 12	\$3
Other comprehensive income (loss) before reclassifications	31	(7)	—	(12)
(Income) loss reclassified from AOCI	—	3	(a) —	(5)
Net current period other comprehensive income (loss)	31	(4)	—	(17)
Balance as of March 31, 2019	\$(2,266)	\$(1,021)	\$ 12	\$(14)

(a) Included in computation of net periodic benefit costs.

Note 7. Leases

We have entered into leases for certain facilities, vehicles, material handling and other equipment. Our leases have remaining contractual terms up to 20 years, some of which include options to extend the leases for up to 20 years, and some of which include options to terminate the leases within 1 year. Our lease agreements do not contain any material residual value guarantees or material restrictive covenants. Our operating lease costs are primarily related to facility leases for inventory warehousing and administration offices, and our finance leases are immaterial.

Operating Lease Cost

	Three Months Ended March 31, 2019	Income Statement Classification
Lease cost	\$ 39	Cost of products sold, Marketing, research and general expenses
Variable lease cost ^(a)	37	Cost of products sold, Marketing, research and general expenses
Total lease cost	\$ 76	

(a) Includes short-term leases, which are immaterial.

Operating Lease Assets and Liabilities

	March 31, 2019	Balance Sheet Classification
Lease assets	\$ 421	Other Assets
Current lease liabilities	\$ 131	Accrued expenses and other current liabilities
Noncurrent lease liabilities	301	Other Liabilities
Total lease liabilities	\$ 432	

Maturity of Operating Lease Liabilities

	March 31, 2019
2019	\$ 114
2020	124
2021	86
2022	58
2023	40
Thereafter	73
Total lease payments	495
Less imputed interest	63
Present value of lease liabilities	\$ 432

As of March 31, 2019, our operating leases have a weighted-average remaining lease term of 4.6 years and a weighted-average discount rate of 5.2 percent. Cash paid for amounts included in the measurement of operating lease liabilities was \$39 for the three months ended March 31, 2019.

The future minimum obligations under operating leases in effect as of December 31, 2018 having a noncancelable term in excess of one year as determined prior to the adoption of ASU 842 are as follows:

	December 31, 2018
2019	\$ 160
2020	123
2021	85
2022	57
2023	41
Thereafter	72
Future minimum obligations	\$ 538

Note 8. Objectives and Strategies for Using Derivatives

As a multinational enterprise, we are exposed to financial risks, such as changes in foreign currency exchange rates, interest rates, and commodity prices. We employ a number of practices to manage these risks, including operating and financing activities and, where appropriate, the use of derivative instruments. We enter into derivative instruments to hedge a portion of forecasted cash flows denominated in foreign currencies for non-U.S. operations' purchases of raw

materials, which are priced in U.S. dollars, and imports of intercompany finished goods and work-in-process priced predominantly in U.S. dollars and euros. The derivative instruments used to manage these exposures are designated and qualify as cash flow hedges. The foreign currency exposure on

certain non-functional currency denominated monetary assets and liabilities, primarily intercompany loans and accounts payable, is hedged with primarily undesignated derivative instruments.

Interest rate risk is managed using a portfolio of variable and fixed-rate debt composed of short and long-term instruments. Interest rate swap contracts may be used to facilitate the maintenance of the desired ratio of variable and fixed-rate debt and are designated and qualify as fair value hedges. From time to time, we also hedge the anticipated issuance of fixed-rate debt, and these contracts are designated as cash flow hedges.

We use derivative instruments, such as forward swap contracts, to hedge a limited portion of our exposure to market risk arising from changes in prices of certain commodities. These derivatives are designated as cash flow hedges of specific quantities of the underlying commodity expected to be purchased in future months.

Translation adjustments result from translating foreign entities' financial statements into U.S. dollars from their functional currencies. The risk to any particular entity's net assets is reduced to the extent that the entity is financed with local currency borrowings. A portion of our balance sheet translation exposure for certain affiliates, which results from changes in translation rates between the affiliates' functional currencies and the U.S. dollar, is hedged with financial instruments. These instruments are designated as net investment hedges and have an aggregate notional value of \$1.1 billion at March 31, 2019. Changes in fair value of net investment hedges are recorded in AOCI as part of the cumulative translation adjustment. For the three months ended March 31, 2019, \$12 of unrealized gains related to net investment hedge fair value changes were recorded in AOCI and no significant amounts were reclassified from AOCI to Interest expense.

At March 31, 2019 and December 31, 2018, derivative assets were \$29 and \$30, respectively, and derivative liabilities were \$29 and \$18, respectively, primarily comprised of foreign currency exchange contracts. Derivative assets are recorded in Other current assets or Other Assets, as appropriate, and derivative liabilities are recorded in Accrued expenses and other current liabilities or Other Liabilities, as appropriate.

Derivative instruments that are designated and qualify as fair value hedges are predominantly used to manage interest rate risk. The fair values of these interest rate derivative instruments are recorded as an asset or liability, as appropriate, with the offset recorded in Interest expense. The offset to the change in fair values of the related debt is also recorded in Interest expense. Any realized gain or loss on the derivatives that hedge interest rate risk is amortized to Interest expense over the life of the related debt. As of March 31, 2019, the aggregate notional values and carrying values of outstanding interest rate contracts designated as fair value hedges were \$300 and \$299, respectively. For the three months ended March 31, 2019 and 2018, gains or losses recognized in Interest expense for interest rate swaps were not significant. The cumulative changes in fair value of related hedged items for which hedge accounting has been discontinued were not significant as of March 31, 2019.

For derivative instruments that are designated and qualify as cash flow hedges, the gain or loss on the derivative instrument is initially recorded in AOCI, net of related income taxes, and recognized in earnings in the same income statement line and period that the hedged exposure affects earnings. As of March 31, 2019, outstanding commodity forward contracts were in place to hedge a limited portion of our estimated requirements of the related underlying commodities in the remainder of 2019 and future periods. As of March 31, 2019, the aggregate notional values of outstanding foreign exchange and interest rate derivative contracts designated as cash flow hedges were \$625 and \$100, respectively. For the three months ended March 31, 2019 and 2018, no significant gains or losses were reclassified into Interest expense, Cost of products sold or Other (income) and expense, net as a result of the discontinuance of cash flow hedges due to the original forecasted transaction no longer being probable of occurring. At March 31, 2019, amounts to be reclassified from AOCI into Interest expense, Cost of products sold or Other (income) and expense, net during the next twelve months are not expected to be material. The maximum maturity of cash flow hedges in place at March 31, 2019 is March 2021.

No significant amounts were excluded from the assessment of net investment, fair value or cash flow hedge effectiveness as of March 31, 2019.

Gains or losses on undesignated foreign exchange hedging instruments are immediately recognized in Other (income) and expense, net. Losses of \$8 and \$3 were recorded in the three months ended March 31, 2019 and 2018, respectively. The effect on earnings from the use of these non-designated derivatives is substantially neutralized by the transactional gains and losses recorded on the underlying assets and liabilities. At March 31, 2019, the notional

value of these undesignated derivative instruments was approximately \$1.7 billion.

12

Note 9. Business Segment Information

We are organized into operating segments based on product groupings. These operating segments have been aggregated into three reportable global business segments: Personal Care, Consumer Tissue and K-C Professional. The reportable segments were determined in accordance with how our chief operating decision maker and our executive managers develop and execute global strategies to drive growth and profitability. These strategies include global plans for branding and product positioning, technology, research and development programs, cost reductions including supply chain management, and capacity and capital investments for each of these businesses. Segment management is evaluated on several factors, including operating profit. Segment operating profit excludes Other (income) and expense, net and income and expense not associated with ongoing operations of the business segments, including the costs of corporate decisions related to the 2018 Global Restructuring Program described in Note 2. The principal sources of revenue in each global business segment are described below:

Personal Care brands offer our consumers a trusted partner in caring for themselves and their families by delivering confidence, protection and discretion through a wide variety of innovative solutions and products such as disposable diapers, training and youth pants, swimpants, baby wipes, feminine and incontinence care products, and other related products. Products in this segment are sold under the Huggies, Pull-Ups, Little Swimmers, GoodNites, DryNites, Kotex, U by Kotex, Intimus, Depend, Plenitud, Poise and other brand names.

Consumer Tissue offers a wide variety of innovative solutions and trusted brands that responsibly improve everyday living for families around the world. Products in this segment include facial and bathroom tissue, paper towels, napkins and related products, and are sold under the Kleenex, Scott, Cottonelle, Viva, Andrex, Scottex, Neve and other brand names.

K-C Professional partners with businesses to create Exceptional Workplaces, helping to make them healthier, safer and more productive through a range of solutions and supporting products such as wipers, tissue, towels, apparel, soaps and sanitizers. Our brands, including Kleenex, Scott, WypAll, Kimtech and KleenGuard are well known for quality and trusted to help people around the world work better.

Information concerning consolidated operations by business segment is presented in the following tables:

	Three Months Ended			
	March 31			
	2019	2018	Change	
NET SALES				
Personal Care	\$2,275	\$2,307	-1	%

Less accumulated depreciation	(10,685)	(10,555)
Total	\$7,139	\$ 7,159

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

This management's discussion and analysis ("MD&A") of financial condition and results of operations is intended to provide investors with an understanding of our recent performance, financial condition and prospects. The following will be discussed and analyzed:

• Overview of First Quarter 2019 Results

• Results of Operations and Related Information

• Liquidity and Capital Resources

• Business Outlook

• Information Concerning Forward-Looking Statements

We describe our business outside North America in two groups – Developing and Emerging Markets ("D&E") and Developed Markets. D&E markets comprise Eastern Europe, the Middle East and Africa, Latin America and Asia-Pacific, excluding Australia and South Korea. Developed Markets consist of Western and Central Europe, Australia and South Korea.

This section presents a discussion and analysis of our first quarter 2019 net sales, operating profit and other information relevant to an understanding of the results of operations. In addition, we provide commentary regarding organic sales growth, which describes the impact of changes in volume, net selling prices and product mix on net sales. Change in foreign currency exchange rates and exited businesses also impact the year-over-year change in net sales. Our analysis compares the three months ended March 31, 2019 results to the same period in 2018.

Throughout this MD&A, we refer to financial measures that have not been calculated in accordance with accounting principles generally accepted in the U.S., or GAAP, and are therefore referred to as non-GAAP financial measures.

These measures include adjusted gross and operating profit, adjusted net income, adjusted earnings per share, adjusted other (income) and expense, net and adjusted effective tax rate. We believe these measures provide our investors with additional information about our underlying results and trends, as well as insight into some of the financial measures used to evaluate management.

Non-GAAP financial measures are not meant to be considered in isolation or as a substitute for the comparable GAAP measures, and they should be read only in conjunction with our unaudited interim consolidated financial statements prepared in accordance with GAAP. There are limitations to these non-GAAP financial measures because they are not prepared in accordance with GAAP and may not be comparable to similarly titled measures of other companies due to potential differences in methods of calculation and items being excluded. We compensate for these limitations by using these non-GAAP financial measures as a supplement to the GAAP measures and by providing reconciliations of the non-GAAP and comparable GAAP financial measures.

The non-GAAP financial measures exclude the following items for the relevant time periods as indicated in the reconciliations included later in this MD&A:

2018 Global Restructuring Program - In 2018, we initiated this restructuring program to reduce our structural cost base by streamlining and simplifying our manufacturing supply chain and overhead organization. See Note 2 to the unaudited interim consolidated financial statements for details.

U.S. Tax Reform Related Matters - In 2018, we recognized net charges associated with U.S. tax reform related matters. See Note 3 to the unaudited interim consolidated financial statements for details.

Overview of First Quarter 2019 Results

Net sales of \$4.6 billion decreased 2 percent compared to the year-ago period. Changes in foreign currency exchange rates reduced sales by 5 percent, while organic sales increased 3 percent including higher net selling prices of 4 percent.

Operating profit was \$655 in 2019 and \$247 in 2018. Net Income Attributable to Kimberly-Clark Corporation was \$454 in 2019 compared to \$93 in 2018, and diluted earnings per share were \$1.31 in 2019 compared to \$0.26 in 2018. Results in 2019 and 2018 include charges related to the 2018 Global Restructuring Program. Results in 2018 also include a net charge associated with U.S. tax reform related matters.

Results of Operations and Related Information

This section presents a discussion and analysis of our first quarter 2019 net sales, operating profit and other information relevant to an understanding of the results of operations.

Analysis of Consolidated Results

	Percent Change For the Three Months Ended March 31, 2019	Adjusted Operating Profit	Percent Change For the Three Months Ended March 31, 2019
Net Sales	(2)	Volume	(2)
	4	Net Price	20
	1	Input Costs	(16)
	(5)	Cost Savings ^(c)	14
Total ^(a)	(2)	Currency Translation	(3)
		Other ^(d)	(15)
Organic ^(b)	3	Total	(2)

(a) Total may not equal the sum of volume, net price, mix/other and currency due to rounding.

(b) Combined impact of changes in volume, net price and mix/other.

(c) Combined benefits of the FORCE (Focused On Reducing Costs Everywhere) program and 2018 Global Restructuring Program.

(d) Includes impact of changes in product mix, marketing, research and general expenses, foreign currency transaction effects and other manufacturing costs.

Net sales of \$4.6 billion in the first quarter of 2019 decreased 2 percent compared to the year-ago period. Changes in foreign currency exchange rates reduced sales by 5 percent. Organic sales increased 3 percent. Changes in net selling prices increased sales by approximately 4 percent and changes in product mix increased sales by 1 percent, while sales volumes fell about 2 percent. In North America, organic sales increased 1 percent in both consumer products and K-C Professional. Outside North America, organic sales rose 7 percent in D&E markets and 1 percent in developed markets.

Operating profit in the first quarter was \$655 in 2019 and \$247 in 2018. Results in both periods include charges related to the 2018 Global Restructuring Program. First quarter adjusted operating profit was \$807 in 2019 and \$824 in 2018. Results were impacted by \$135 of higher input costs, driven by \$60 in pulp and \$45 in other raw materials. In addition, foreign currency translation effects reduced operating profit by \$25 and transaction effects also negatively impacted the comparison. Advertising spending also increased year-on-year. Results benefited from higher net selling prices, \$60 of cost savings from the 2018 Global Restructuring Program and \$55 of cost savings from our FORCE program.

The first quarter effective tax rate was 24.6 percent in 2019 and 59.8 percent in 2018, which included an \$82 net charge associated with U.S. tax reform related matters. The first quarter adjusted effective tax rate was 23.7 percent in 2019 and 22.0 percent in 2018. The rate in 2018 benefited from the resolution of certain tax matters.

Our share of net income of equity companies in the first quarter was \$27, even with the year-ago period. Results were impacted by higher input costs, but benefited from organic sales growth and cost savings.

Diluted net income per share for the first quarter of 2019 was \$1.31. First quarter adjusted earnings per share were \$1.66 in 2019, a decrease of 3 percent compared to adjusted earnings per share of \$1.71 in 2018.

Results by Business Segments**Personal Care**

	Three Months Ended March 31		Three Months Ended March 31	
	2019	2018	2019	2018
Net Sales	\$2,275	\$2,307	Operating Profit	\$484 \$470

Net Sales	Percent Change	Operating Profit	Percent Change
Volume	1	Volume	4
Net Price	2	Net Price	12

Currency	(6)	Cost Savings ^(c)	16
Total ^(a)	(1)	Currency Translation	(4)
		Other ^(d)	(12)
Organic ^(b)	5	Total	3

(a) Total may not equal the sum of volume, net price, mix/other and currency due to rounding.

(b) Combined impact of changes in volume, net price and mix/other.

(c) Combined benefits of the FORCE program and 2018 Global Restructuring Program.

(d) Includes impact of changes in product mix, marketing, research and general expenses, foreign currency transaction effects and other manufacturing costs.

First quarter net sales of \$2.3 billion decreased 1 percent. Changes in foreign currency exchange rates reduced sales by 6 percent. Changes in net selling prices increased sales approximately 2 percent, sales volumes rose 1 percent and changes in product mix improved sales by 1 percent. First quarter operating profit of \$484 increased 3 percent. The comparison benefited from organic sales growth and cost savings, while results were impacted by unfavorable foreign currency effects, input cost inflation and increased advertising spending.

Net sales in North America increased 3 percent driven by higher sales volumes. Volumes were up high-single digits in adult care, including benefits from category growth, innovations and increased marketing support. Volumes increased low-single digits in baby and child care.

Net sales in D&E markets decreased 5 percent. Changes in foreign currency exchange rates decreased sales by 13 percent, including significant declines in Latin America. Changes in net selling prices and product mix increased sales by 8 percent and 2 percent, respectively, while sales volumes fell 2 percent. The higher net selling prices were primarily in Latin America and secondarily in the Middle East/Eastern Europe/Africa, partially offset by decreases in China. The lower volumes included declines in China and Argentina, and increases in Eastern Europe and ASEAN. Net sales in developed markets outside North America decreased 6 percent, including a 6 percent decrease due to unfavorable changes in foreign currency exchange rates. Changes in net selling prices decreased sales by 3 percent, while sales volumes increased 2 percent.

Consumer Tissue

	Three Months Ended March 31		Three Months Ended March 31	
	2019	2018	2019	2018
Net Sales	\$1,526	\$1,579	Operating Profit	\$241 \$249

Net Sales	Percent Change	Operating Profit	Percent Change
Volume	(6)	Volume	(14)
Net Price	6	Net Price	35
Mix/Other	—	Input Costs	(18)
Currency	(3)	Cost Savings ^(c)	8
Total ^(a)	(3)	Currency Translation	—
		Other ^(d)	(14)
Organic ^(b)	—	Total	(3)

(a) Total may not equal the sum of volume, net price, mix/other and currency due to rounding.

(b) Combined impact of changes in volume, net price and mix/other.

(c) Combined benefits of the FORCE program and 2018 Global Restructuring Program.

(d) Includes impact of changes in marketing, research and general expenses, foreign currency transaction effects and other manufacturing costs.

First quarter net sales of \$1.5 billion decreased 3 percent. Changes in foreign currency exchange rates reduced sales 3 percent. Changes in net selling prices increased sales by 6 percent, while sales volumes decreased 6 percent compared to a 7 percent increase in the base period. First quarter operating profit of \$241 decreased 3 percent. The comparison was impacted by lower volumes, input cost inflation, other manufacturing cost increases and unfavorable foreign currencies, while results benefited from increased net selling prices and cost savings.

Net sales in North America decreased 3 percent. Changes in net selling prices increased sales by 7 percent, while sales volumes fell 10 percent compared to a 9 percent increase in the prior year. The volume decline reflects lower promotion activity, the impact of price increases and a severe cold and flu season in the year-ago period that benefited facial tissue sales.

Net sales in D&E markets decreased 4 percent. Changes in foreign currency exchange rates decreased sales by 8 percent, primarily in Latin America. Changes in net selling prices and product mix increased sales by 5 percent and 1 percent, respectively, while sales volumes fell 2 percent.

Net sales in developed markets outside North America decreased 5 percent. Changes in foreign currency exchange rates reduced sales by 6 percent. Changes in net selling prices increased sales by 4 percent and sales volumes fell 3 percent, with the changes mostly in Western/Central Europe.

K-C Professional

	Three Months Ended March 31		Three Months Ended March 31	
	2019	2018	2019	2018
Net Sales	\$817	\$832	Operating Profit \$ 150	\$ 158

Net Sales	Percent Change	Operating Profit	Percent Change
Volume	(1)	Volume	2
Net Price	3	Net Price	13
Mix/Other	1	Input Costs	(18)
Exited Businesses ^(e)	(1)	Cost Savings ^(c)	12
Currency	(4)	Currency Translation	(4)
Total ^(a)	(2)	Other ^(d)	(10)
Organic ^(b)	3	Total	(5)

(a) Total may not equal the sum of volume, net price, mix/other, exited businesses and currency due to rounding.

(b) Combined impact of changes in volume, net price and mix/other.

(c) Combined benefits of the FORCE program and 2018 Global Restructuring Program.

(d) Includes impact of changes in product mix, marketing, research and general expenses, foreign currency transaction effects and other manufacturing costs.

(e) Exited businesses in conjunction with the 2018 Global Restructuring Program.

First quarter net sales of \$0.8 billion decreased 2 percent. Changes in foreign currency exchange rates reduced sales by 4 percent, and business exits in conjunction with the 2018 Global Restructuring Program reduced sales by 1 percent. Changes in net selling prices increased sales approximately 3 percent and changes in product mix improved sales by 1 percent, while sales volumes were down about 1 percent. First quarter operating profit of \$150 decreased 5 percent. The comparison was impacted by input cost inflation and unfavorable foreign currency effects, while results benefited from higher net selling prices and cost savings.

Net sales in North America were even year-on-year. Business exits in conjunction with the 2018 Global Restructuring Program reduced sales 1 percent. Changes in net selling prices and product mix increased sales by 2 percent and 1 percent, respectively, while sales volumes fell 2 percent.

Net sales in D&E markets decreased 3 percent, including a decrease in sales of approximately 9 percent from unfavorable changes in foreign currency exchange rates. Changes in net selling prices increased sales by 4 percent, and sales volumes increased 1 percent.

Net sales in developed markets outside North America were down 3 percent. Changes in foreign currency exchange rates decreased sales by 7 percent. Changes in product mix and net selling prices improved sales by 2 percent and 1 percent, respectively, and sales volumes rose 1 percent.

2018 Global Restructuring Program

Annual pre-tax savings from the 2018 Global Restructuring Program are expected to be \$500 to \$550 by 2021. In addition, to implement this program, we expect to incur incremental capital spending of approximately \$600 to \$700 by the end of 2020. See Item 1, Note 2 to the unaudited interim consolidated financial statements for additional information.

We generated savings of \$60 in the three months ended March 31, 2019 and expect to generate savings of \$100 to \$125 in 2019. Savings in the three months ended March 31, 2018 were insignificant. We have generated cumulative savings of \$195 through March 31, 2019.

Liquidity and Capital ResourcesCash Provided by Operations

Cash provided by operations was \$317 for the first three months of 2019 compared to \$542 in the prior year. The decrease was primarily driven by increased working capital and payments related to the 2018 Global Restructuring

Program.

Investing

During the first three months of 2019, our capital spending was \$316 compared to \$189 in the prior year. We anticipate that full year capital spending will be \$1.1 billion to \$1.3 billion, including incremental spending associated with the 2018 Global Restructuring Program.

20

Financing

Our short-term debt, which consists of U.S. commercial paper with original maturities up to 90 days and/or other similar short-term debt issued by non-U.S. subsidiaries, was \$1.3 billion as of March 31, 2019 (included in Debt payable within one year on the consolidated balance sheet). The average month-end balance of short-term debt for the first quarter of 2019 was \$1.2 billion. These short-term borrowings provide supplemental funding for supporting our operations. The level of short-term debt generally fluctuates depending upon the amount of operating cash flows and the timing of customer receipts and payments for items such as dividends and income taxes.

At March 31, 2019 and December 31, 2018, total debt was \$7.9 billion and \$7.5 billion, respectively.

We maintain a \$2.0 billion revolving credit facility which expires in June 2023 and a \$500 revolving credit facility which expires in June 2019. These facilities, currently unused, support our commercial paper program, and would provide liquidity in the event our access to the commercial paper markets is unavailable for any reason.

In April 2019, we entered into an additional \$300 revolving credit facility, of which \$100 remains unused, which expires in October 2019. This facility is for general corporate purposes.

We repurchase shares of Kimberly-Clark common stock from time to time pursuant to publicly announced share repurchase programs. During the first three months of 2019, we repurchased 1.4 million shares of our common stock at a cost of \$167 through a broker in the open market. We are targeting full-year 2019 share repurchases between \$600 and \$900, subject to market conditions.

Our subsidiaries in Argentina (“K-C Argentina”) began accounting for their operations as highly inflationary effective July 1, 2018, as required by GAAP. Under highly inflationary accounting, K-C Argentina’s functional currency became the U.S. dollar, and its income statement and balance sheet have been measured in U.S. dollars using both current and historical rates of exchange. The effect of changes in exchange rates on peso-denominated monetary assets and liabilities has been reflected in earnings in Other (income) and expense, net and was not material. As of March 31, 2019, K-C Argentina had a small net peso monetary position. Net sales of K-C Argentina were less than 2 percent of our consolidated net sales for the three months ended March 31, 2019 and 2018.

We believe that our ability to generate cash from operations and our capacity to issue short-term and long-term debt are adequate to fund working capital, payments for our 2018 Global Restructuring Program, capital spending, pension contributions, dividends and other needs for the foreseeable future. Further, we do not expect restrictions or taxes on repatriation of cash held outside of the U.S. to have a material effect on our overall business, liquidity, financial condition or results of operations for the foreseeable future.

Business Outlook

In 2019, we plan to focus on our strategies for long-term success, including growing our brands, leveraging our financial discipline and allocating capital in value-creating ways. In 2019, we expect earnings per share to be \$4.85 to \$5.35. Adjusted earnings per share are expected to be \$6.50 to \$6.70, which excludes 2018 Global Restructuring Program charges equivalent to \$1.35 to \$1.65. Our adjusted earnings per share guidance is based on the assumptions described below:

We expect net sales to decrease 1 to 2 percent. We anticipate changes in foreign currency exchange rates to have an unfavorable impact of 3 to 4 percent. Exited businesses in conjunction with the 2018 Global Restructuring Program are expected to reduce sales slightly, mostly in K-C Professional.

• We expect organic sales to increase approximately 2 percent, driven by higher net selling prices of at least 3 percent.

• We expect adjusted operating profit growth of 1 to 4 percent.

• We plan to achieve cost savings of \$400 to \$450, including \$300 to \$325 from our FORCE program and \$100 to \$125 from the 2018 Global Restructuring Program.

• We expect inflation in key cost inputs of \$300 to \$400. We anticipate the majority of the inflation to occur in international markets.

• We expect foreign currency translation effects to reduce operating profit by 2 to 3 percent and transaction effects to also negatively impact the comparison.

• We expect interest expense to increase somewhat year-on-year.

• We expect an adjusted effective tax rate of 23 to 25 percent compared to 21 percent in 2018. At the mid-point, the higher rate is equivalent to an approximate 3 ½ percent reduction in adjusted earnings per share.

We expect net income from equity companies to be similar year-on-year.

21

Information Concerning Forward-Looking Statements

Certain matters contained in this report concerning the business outlook, including the anticipated cost savings from our FORCE program, charges and savings from the 2018 Global Restructuring Program, cash flow and uses of cash, growth initiatives, innovations, marketing and other spending, net sales, anticipated currency rates and exchange risks, including the impact in Argentina, raw material, energy and other input costs, effective tax rate, contingencies and anticipated transactions of Kimberly-Clark, including dividends and share repurchases, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and are based upon management's expectations and beliefs concerning future events impacting Kimberly-Clark. There can be no assurance that these future events will occur as anticipated or that our results will be as estimated. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to publicly update them.

The assumptions used as a basis for the forward-looking statements include many estimates that, among other things, depend on the achievement of future cost savings and projected volume increases. In addition, many factors outside our control, including fluctuations in foreign currency exchange rates, the prices and availability of our raw materials, potential competitive pressures on selling prices for our products, energy costs, our ability to maintain key customer relationships and retail trade customer actions, as well as general economic and political conditions globally and in the markets in which we do business, could affect the realization of these estimates.

For a description of certain factors that could cause our future results to differ from those expressed in these forward-looking statements, see Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2018 entitled "Risk Factors." Other factors not presently known to us or that we presently consider immaterial could also affect our business operations and financial results.

Item 4. Controls and Procedures

As of March 31, 2019, an evaluation was performed under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of March 31, 2019. There were no changes in our internal control over financial reporting during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Purchases of Equity Securities by the Issuer and Affiliated Purchasers

We repurchase shares of Kimberly-Clark common stock from time to time pursuant to publicly announced share repurchase programs. All our share repurchases during the first quarter of 2019 were made through a broker in the open market.

The following table contains information for shares repurchased during the first quarter of 2019. None of the shares in this table were repurchased directly from any of our officers or directors.

Period (2019)	Total Number of Shares Purchased^(a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
January 1 to January 31	592,800	\$112.86	24,786,144	15,213,856
February 1 to February 28	445,100	115.70	25,231,244	14,768,756
March 1 to March 31	411,300	118.38	25,642,544	14,357,456
Total	1,449,200			

^(a) Share repurchases were made pursuant to a share repurchase program authorized by our Board of Directors on November 13, 2014. This program allows for the repurchase of 40 million shares in an amount not to exceed \$5 billion.
