FOR IMMEDIATE RELEASE

BANCO LATINOAMERICANO DE EXPORTACIONES, S.A. ("BLADEX")
REPORTS FIRST QUARTER 2004 NET INCOME OF US\$29.8 MILLION

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

1Q04 Financial Highlights

- o Net Income was US\$29.8 million in the 1Q04, compared to US\$16.2 million for the 4Q03, and US\$10.4 million for the 1Q03.
- o Exposure in Argentina (net of allowance for credit losses and impairment loss) is US\$222 million, down 45% from a year ago, and down 7% from last quarter.

Panama City, Republic of Panama, May 4, 2004 - Banco Latinoamericano de Exportaciones, S.A. ("BLADEX" or "the Bank") (NYSE: BLX), announced today its results for the first quarter ended March 31, 2004. (The Bank's financial statements are prepared in accordance with U.S. GAAP, and all figures are stated in U.S. dollars.)

The Bank reported net income of US\$29.8 million for the first quarter of 2004, or US\$0.76 per share, compared to net income of US\$16.2 million, or US\$0.41 per share, in the previous quarter, and net income of US\$10.4 million, or US\$0.58 per share, in the first quarter of 2003.

Net income for the first quarter of 2004 reflected the effect of US\$36 million in partial payments and prepayments of Argentine restructured loans, which contributed to the reversals of the allowance for credit losses in the amount of US\$19 million out of a total of US\$21.4 million.

Key Figures

	1Q03	4Q03	1Q04
Net Income (In US\$ million)	\$10.4	\$16.2	\$29.8
EPS*	\$0.58	\$0.41	\$0.76
Return on Average Equity	12.1%	11.2%	20.2%
Tier 1 Capital Ratio	18.2%	35.4%	37.9%
Net interest margin	1.73%	2.07%	1.69%

*Earnings per share calculations are based on the average number of shares outstanding during each period. During the first quarter of 2004 the average number of common shares was 39.4 million, compared to 39.3 million in the fourth quarter of 2003, and 17.3 million during the first quarter of 2003.

Comments from the Chief Executive Officer

Jaime Rivera, Chief Executive Officer of BLADEX stated, "With the turnaround of the Bank now complete, the overall framework of our operations is being defined by significantly improved prospects for economic growth in the Region, continued progress on our plan to strengthen and broaden the scope of our business model and, generally, a stable or improved risk profile in our portfolio. Within this context, the first quarter's financial results were driven by three factors: first, strong principal repayments in Argentina; second, a market temporarily flushed with liquidity, resulting in declining interest rates and pressure on

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

lending margins, and third, continued progress on improving our efficiency levels.

The strong performance of our portfolio in Argentina was related to generally increasing levels of liquidity in the local market, and to record high commodity (export) prices. I'm pleased to report that we collected US\$36 million in principal repayments during the period, bringing our total net exposure to US\$222 million, 7% lower than at year-end 2003.

Regarding the pressure on margins that we saw during the quarter, we have taken the position that, given the improved economic growth prospects in the Region, this trend is likely to reverse itself as credit demand strengthens. As a result, we elected to slow down our lending in order to preserve lending capacity within our credit limits and have it available once pricing terms improve in our favor.

The approximate 5 basis point decrease in short-term LIBOR interest rates over the quarter hurt us because, with our assets re-pricing faster than our liabilities, our balance sheet is positioned to take advantage of interest rate increases. We maintain our view that interest rates are heading for an increase, however, and currently expect to keep our maturity profile unchanged. All other things being equal, we estimate that a 25 basis points increase in the general level of interest rates would result in a US\$2.1 million additional net interest income through year-end.

The most exciting developments during the quarter took place outside the scope of the financial statements, however. With the arrival of Mr. Rubens Amaral to head our commercial operations out of our New York Agency, we put in place the last of the missing pieces needed to put the transformation of the Bank into high gear. We are taking steps to optimize our client coverage model, changing the segmentation of our client base to allow for more effective cross selling tactics identifying and pursuing new product opportunities, optimizing the structure of our sales force, and incorporating the feedback developed during our brand and perception study into our plans. Most importantly, we have been very successful in attracting top caliber people to our team.

I'm pleased to report that at our Annual Shareholders' Meeting, we received approval by practically 100% of the votes cast on all items submitted to shareholders. Furthermore, we are seeing greater interest from the market in our company, evidenced by a greater flow of our information, broader analyst coverage, and an overall higher level of Investor Relations activity.

2

Lastly, we continue studying the capital management question closely, aiming to arrive at a solution that will make the most sense in view of risk levels, growth opportunities, and our shareholders' best interests. Assuming a stable scenario, it is the Bank's intention to take additional action on the capital management front during 2004."

NET INTEREST INCOME

Net interest income in the first quarter of 2004 amounted to US\$11.3 million, compared to US\$13.3 million in the fourth quarter of 2003, and US\$13.8 million in the first quarter 2003. The US\$1.9 million decline in the first quarter 2004 compared to the fourth quarter of 2003 was mainly attributable to lower lending margins, decreased scheduled interest payments on the Bank's single non-accrual loan outside Argentina, and lower interest rates, which had a negative impact on the interest rate gap, which currently is asset sensitive. These factors were partially offset by higher average loan volumes.

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

Net interest margin

The table below provides the net interest margin (net interest income divided by the average balance of interest-earning assets), and net interest spread (average yield earned on interest-earning assets, less the average rate paid on interest-bearing liabilities) for the periods indicated:

	1Q03	4Q03	1Q04
Net Interest Margin	1.73%	2.07%	1.69%
Net Interest Spread	1.13%	1.41%	1.11%

1Q04 vs. 4Q03

The decreases in net interest margin and net interest spread for the first quarter of 2004, compared to the fourth quarter of 2003, were 38 basis points and 30 basis points, respectively. The 38 basis point decrease in the net interest margin was mainly due to: (i) lower spreads over LIBOR on the accruing loan and investment portfolio (-15 basis points); (ii) lower interest collections on the Bank's single non-accrual loan portfolio outside Argentina, resulting from lower interest payment scheduled maturities during the first quarter of 2004 (-13 basis points); and (iii) falling interest rates, which had a negative impact on the asset sensitive interest rate gap, and generated a lower return on the Bank's available capital funds (-10 basis points). The decrease in net interest spread reflects the combination of re-pricing assets in a falling interest rate environment, and generally lower lending spreads over LIBOR.

COMMISSION INCOME

The following table shows the components of commission income for the periods indicated:

(In US\$ thousands)	1Q03	4Q03	1Q04
Letters of credit	\$1,241	\$794	\$1,124
Guarantees:			
Country risk coverage business	328	309	306
Other guarantees	294	145	130
Loans	576	346	165
Total Commission Income	\$2,438	\$1,595	\$1,724

Commission income for the first quarter of 2004 increased by 8% compared to the fourth quarter of 2003 mostly due to increased volumes in letters of credit.

PROVISIONS FOR CREDIT LOSSES

During the first quarter of 2004, the Bank reversed US\$21.4 million of its

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

allowance for credit losses, mainly as a result of principal payments on Argentine restructured loans. During the quarter as well, the Bank increased its general reserve coverage for Dominican Republic credits, and lowered certain general reserves in line with reduced country exposure levels. (For additional information, please refer to Asset Quality section on page 10.)

OPERATING EXPENSES

The following table shows a breakdown of the components of operating expenses for the periods indicated:

(In US\$ thousands)

	1Q03	4Q03	1Q04
Salaries and other employee expenses	\$2,549	\$4,298	\$2,377
Depreciation	376	381	359
Professional services	488	984	507
Maintenance and repairs	214	335	256
Other operating expenses	958	1,813	1,190
Total Operating Expenses	\$4,585	\$7,812	\$4,689

1Q04 vs. 4Q03

Salaries and other employee expenses for the fourth quarter of 2003 and first quarter of 2004 include variable compensation and severance provisions of US\$2.1 million and US\$0.4 million, respectively. Excluding the impact of these provisions, salaries and other employee expenses for the first quarter of 2004 decreased by 12%. Professional service expenses for the first quarter of 2004 decreased by US\$0.5 million (49%), reflecting the one-time nature of recruiting and legal fees during the fourth quarter of 2003. Other operating expenses for the first quarter of 2004 decreased by US\$0.6 million (34%), primarily due to expenses related to the Bank's brand image project incurred during the fourth quarter of 2003.

As of March 31, 2004, the Bank's gross portfolio in Argentina amounted to US\$403 million, a reduction of US\$421 million, or 51%, compared to March 31, 2003, and US\$37 million, or 8%, since December 31, 2003. The US\$37 million reduction in the first quarter of 2004 was mainly due to the repayments under restructured Argentine loans.

7

The Bank's entire exposure in Argentina continues to be denominated in U.S. dollars (93%) and Euros (7%). The Argentine credit portfolio distribution by industry type as of March 31, 2004 was as follows:

In addition, as of March 31, 2004, the Bank had reverse repurchase agreements with Argentine counterparties totaling US\$132 million, which were fully collateralized with U.S. Treasury securities, an amount unchanged from December 31, 2003 and March 31, 2003. These assets are classified as U.S. country risk.

Interest payments on Argentine credits (loans and securities) are recorded on a cash basis. The Bank collected interest from Argentine borrowers of approximately US\$5 million during the first quarter 2004, an amount unchanged from the fourth quarter of 2003. The ratio of interest collected from Argentine borrowers to total interest payments due and payable from these borrowers during the first quarter 2004 was 98%, a figure unchanged from the fourth quarter 2003, and compared to 74% during the first quarter of 2003. Although significant amounts of interest have been received on a consistent basis from most of the Bank's clients in the country, the ultimate collection of principal on these credits is evaluated separately.

The composition and maturity profile of the Argentine credit portfolio in terms of restructured loans as of March 31, 2004 was as follows:

8

(In US\$ million, except percentages)

Pa

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

Status	Outstanding As of Mar. 31, 2004	%	2004	2005

Not yet restructured and not paying interest	34	8%	5	8
Total	\$399	100%	\$80	\$81

The portfolio of restructured and performing loans, under the renegotiated terms, has an average life of 2.3 years. No restructurings have involved discounts or losses of principal. Assets not yet restructured and not paying interest consist of obligations from four companies in the utilities sector.

BRAZILIAN EXPOSURE

At March 31, 2004, December 31, 2003, and March 31, 2003, the Bank's exposure in Brazil was as follows:

(In US\$ million)

	Loans	Investments	Contingencies	Total
Nominal Value	\$948	\$15	\$110	\$1,073
Fair value adjustments	n.a.	1	n.a.	1
Credit Portfolio at Mar. 31, 2004	948	16	110	1,074

Net Exposure at Mar. 31, 2003	\$851	\$31	\$187	\$1,069

As of March 31, 2004, the Bank's credit exposure in Brazil was composed of 78% obligations due from banks and 22% from non-financial entities, a distribution unchanged from December 31, 2003. As of March 31, 2004, the trade finance segment of the Brazilian credit portfolio was 82%, compared to 78% as of December 31, 2003, and 65% as of March 31, 2003.

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

At the end of the first quarter of 2004, the Brazilian portfolio had no past due interest amounts, and included one impaired loan on non-accrual status in the amount of US\$47 million to a Brazilian corporation, for which the Bank has established a US\$17 million specific allowance for possible loan losses. During the first quarter of 2004, the Bank collected interest income on a cash basis of US\$0.9 million from this borrower, versus US\$1.6 million of interest income collected in the fourth quarter of 2003, due to lower interest payment scheduled maturities.

9

LIQUIDITY

Deposits increased by 25% to US\$719 million from a year ago, primarily reflecting new deposits from central banks and state-owned companies in the Region.

Since the third quarter of 2003, the Bank has been managing its liquidity funds to gradually match historical levels. The Bank's net cash position (cash due from banks, plus interest bearing deposits with banks) as a percentage of its overall balance sheet was 7.6% at the end of the first quarter of 2004, compared to 9.9% as of December 31, 2003, and 18.8% as of March 31, 2003, respectively. The Bank's net cash position represented 25.6% of deposits as of March 31, 2004, 35.9% as of December 31, 2003, and 92.9% as of March 31, 2003.

ASSET QUALITY

The Bank's US\$237 million allowance for credit losses as of March 31, 2004 compares to an allowance of US\$258 million as of December 31, 2003, and US\$446 million as of March 31, 2003. The US\$21 million decrease in the allowance for credit losses in the first quarter of 2004 was principally due to: i) a US\$19 million reduction in specific reserves assigned to Argentine credits as a result of principal payments received on restructured loans and prepayments; ii) a US\$5 million reduction in general reserves mainly as a result of the reduction of the Bank's exposure in Brazil and Venezuela; and iii) US\$3 million increase in general reserves in the Dominican Republic.

The following table sets forth changes in the Bank's allowance for credit losses for the quarters ended at the dates indicated:

(In US\$ million)

	31-MAR-03	30-JUN-03	30-SEP-03	31-DEC-03	31-MAR-04

Balance at end of period	\$445.6	\$322.8	\$272.3	\$258.3	\$237.1

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

(1) Includes reversals in the provision for loan losses of US\$44.1 million, US\$9.9 million and US\$8.7 million as a result of the sale of Argentine loans during the 2Q03, 3Q03 and 4Q03, respectively.

At March 31, 2004, the allowance for credit losses and net exposure on a per country basis was as follows:

10

(In US\$ million)

	Loans and Contingencies (Nominal Value)	Allowance for credit losses	Loans and Contingencies (Net Value)	Investments (Net of impairment loss)	Net Exposure
Argentina	\$393	\$(176)	\$217	\$5	\$222
Brazil	1,058	(33)	1,024	16	1,040
Other Countries	1,180	(27)	1,153	57	1,210
Total	\$2,631	\$(237)	\$2,394	\$78	\$2,473

PERFORMANCE AND CAPITAL RATIOS

At the end of the first quarter of 2004, the number of common shares outstanding was 39.4 million, compared to 17.3 million common shares outstanding at March 31, 2003, reflecting a 22 million increase in the number of shares resulting from the issuance of new equity capital in the amount of US\$147 million at the end of the second quarter of 2003.

The return on average shareholder's equity and the return on average assets for the first quarter of 2004 were 20.2% and 4.7%, respectively, compared to 11.2% and 2.7%, respectively, for the fourth quarter of 2003, and 12.1% and 1.5%, respectively, for the first quarter of 2003.

Although the Bank is not subject to the capital adequacy requirements of the Federal Reserve Board, if the Federal Reserve Board risk-based capital adequacy requirements were applied, the Bank's Tier 1 and Total Capital Ratios as of March 31, 2004 would have been 37.9% and 39.2%, respectively. Equivalent figures for December 31, 2003, would have been 35.4% and 36.7%, respectively, and 18.2% and 19.4%, respectively, for March 31, 2003.

RECENT EVENTS

- o Indexed Option Plan: On April 13, 2004, the Board of Directors granted options to purchase Class E shares under a new indexed option plan for Executive Officers and Directors. The plan uses an option exercise price, which is indexed to a customized Latin American general market index. The underlying rationale of the plan is to reward option holders for BLADEX stock price performance superior to the market index. Options have a seven-year term, with cliff vesting after four years. Depending on

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

position and individual performance, executive officers are eligible for grants equivalent to 40% to 100% of yearly salary. Directors are eligible for grants valued at US\$10,000 per year, except for the Chairman, who is eligible for a US\$15,000 yearly grant.

- o Payment of Quarterly Dividends - On April 5, 2004, BLADEX's paid quarterly cash dividends of US\$0.10 per common share.

11

- o Annual Shareholders Meeting - BLADEX's Annual Shareholders Meeting took place on April 14, 2004, in Panama. At this meeting, Herminio Blanco, William Hayes and Alexandre Lodygensky were elected to fill the three available Director positions representing Class E shares. Two of these three Class E Board seats represent positions formerly held by representatives of the Bank's Class B shares, which were forfeited to the Class E shareholders when the Class B ownership of the Bank fell below 10%. Also, during the Annual Shareholders' meeting, Maria da Graca Franca was elected as a Class A Director, and CEO Jaime Rivera was elected as a Director to represent all share classes.

ABOUT BLADEX

BLADEX is a multinational Bank originally established by the Central Banks of Latin American and Caribbean countries to promote trade finance in the Region. Based in Panama, its shareholders include central and commercial banks in 23 countries of the Region, as well as international banks and private investors. Through March 31, 2004, over its 25 years of operations, BLADEX had disbursed accumulated credits of over US\$125 billion in the Region.

Note: Various numbers and percentages set out in this press release have been rounded, and accordingly, may not total exactly.

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the trend of pressure on margins reversing itself as credit demand strengthens and the increase in interest rates in the future. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: a decline in the willingness of international lenders and depositors to provide funding to the Bank, causing a contraction of the Bank's credit portfolio, adverse economic or political developments in the Region, particularly in Argentina or Brazil, which could increase the level of impaired loans in the Bank's loan portfolio and, if sufficiently severe, result in the Bank's allowance for probable credit losses being insufficient to cover losses in the portfolio, unanticipated developments with respect to international banking transactions (including among other things, interest rate spreads and competitive conditions), a change in the Bank's credit ratings, events in Argentina and Brazil or other countries in the Region unfolding in a manner that is detrimental to the Bank, or which might result in adequate liquidity being unavailable to the Bank, or the Bank's operations being less profitable than anticipated.
