Internet Gold Expands International Reach: Adds POP in Frankfurt to Existing London and New York POPs

Wednesday January 12, 10:57 am ET

State-of-the-Art VoIP-Enabled Network Will Support Full Range of International Business Voice and Data Services

PETACH TIKVA, Israel, January 12 /PRNewswire-FirstCall/ -- Internet Gold (NASDAQ: IGLD - News) today announced that it has launched a new international POP (Point Of Presence) in Frankfurt, Germany. Its third international POP, the new activity joins Internet Gold's existing international POPs in New York and London.

The Frankfurt POP is an important component of Internet Gold's ongoing efforts to expand and upgrade its advanced IP infrastructure, and to extend the range of state-of-the-art services that it offers to international companies.

The POP will be connected to Internet Gold's network in Israel via 155MB STM1 lines, and will support GIGA-rate transmission to the Internet backbone. Traffic will be transmitted using the advanced MPLS protocol, enabling the Company to closely manage and monitor the end-to-end quality (QoS) of all services provided. To support the full range of voice services, the POP has been equipped with cutting-edge VoIP gateways from Veraz Networks, the same equipment deployed successfully to support Internet Gold's Israel-based VoIP services.

"The establishment of our Frankfurt POP is an important step that will enhance our ability to serve the international business community and improve our overall technological platform," said Mr. Eli Holtzman, Internet Gold's CEO. "It allows us to immediately begin marketing an expanded range of high-quality services to the international business community, including highly cost-effective International Voice and VPN offerings. As such, we believe the new POP will increase our business customer list significantly, boosting our traffic and improving our profitability."

About Internet Gold

Internet Gold is a communications company that provides Internet access and related value-added services, international telephony, e-advertising, content and e-Commerce services throughout Israel to both residential and business customers.

Internet Gold's operations are carried out through four subsidiaries. Its fully-owned subsidiary Internet Gold International specializes in the provision of international Internet and communication services. Its fully-owned subsidiary Gold Mind focuses on the provision of Internet value-added services. Through MSN Israel, its joint-venture with Microsoft Corp., the Company operates two of Israel's leading Internet portals, MSN-Israel and Start.co.il. Through P1000, its e-Commerce joint venture, the Company has established itself as one of Israel's leading e-Commerce providers.
