ULTRAPETROL REPORTS FINANCIAL RESULTS
FOR FIRST QUARTER 2012

NASSAU, Bahamas, May 15, 2012 -- Ultrapetrol (Bahamas) Limited (NASDAQ: ULTR), an industrial transportation company serving marine transportation needs in three markets (River Business, Offshore Supply Business and Ocean Business), today announced financial results for the first quarter ended March 31, 2012.

First Quarter 2012 and subsequent events highlights:

- Recorded first quarter 2012 revenues of \$64.5 million;
- Recorded adjusted EBITDA of \$7.3 million in the first quarter of 2012;¹ which includes \$(0.5) million from River Business segment adjusted EBITDA, \$6.4 million from Offshore Supply Business segment adjusted EBITDA, \$0.1 million from Ocean Business segment adjusted EBITDA and \$1.3 million from financial income and other financial income;
- Recorded total adjusted net loss and EPS of \$(13.1) million and \$(0.44), respectively, in 2012 which includes the effect of a \$0.7 million gain for deferred taxes on an unrealized foreign exchange loss on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business.² Excluding the effect of this gain, the net loss and net loss per share are \$(13.8) million and \$(0.47) per share, respectively;
- Offshore Supply Business segment adjusted EBITDA increased 78% compared with same period of 2011;
- Continued as planned with the construction of the Company's PSV new building program of four vessels in the Offshore Supply Business. UP Jade, the first of the PSVs under construction in India, is expected to be delivered within May 2012; including UP Jade, the Company will have nine vessels operating in its PSV fleet;
- Sold and delivered during the first quarter of 2012 five jumbo dry barges built in our Punta Alvear Yard in South America to a third party for export to Colombia; and
- Continued with the re-engining and re-powering of three pushboats in our River Business fleet, two of which are expected to be delivered during the second quarter of 2012, increasing the number of re-engined pushboats to six out of a total of eleven to be re-engined as part of the initiative.

¹ For a reconciliation of non-GAAP measures, please see the tables included under the supplemental information section of this release.

2 For a detailed explanation of these adjustments and other adjustments elsewhere in this release, see "Overview of Financial Results" and the tables included under the Supplemental Information section of this release.

Felipe Menéndez, Ultrapetrol's President and Chief Executive Officer, said, "We continue to focus on implementing our growth strategy for the long-term benefit of shareholders. Our ninth new PSV is now undergoing sea trials and is scheduled to be delivered on a favorable charter in Brazil later this month and two pushboats in our re-engining and re-powering program are expected to be in service by the end of the second quarter. Additionally, we sold and delivered five jumbo barges built at our Punta Alvear Yard to a third party and shipped them to Colombia in March 2012 together with a pushboat and 14 barges previously sold to the same buyers."

Mr. Menéndez continued, "The severe drought in the Hidrovia region has had a significant impact on soybean crops, leading to lower output on the river. The decline in production, coupled with lower levels of water on the Upper Paraguay River had a negative impact on our River Business during the first quarter. We have booked substantially more iron ore to compensate for the reduced volume of soybeans and if river levels allow for normal navigation we expect that by year end total tons transported will be very close to what we carried last year. In our Offshore Supply Business, we increased our adjusted EBITDA 78% year-over-year, which reflects all eight of our PSVs operating on charter for a full quarter. In our Ocean Business we benefited from a number of developments including the full quarter operation of one of our container feeder vessels which continued to perform better than in 2011 with full loads on the southbound leg. Also in the first quarter MT Amadeo conducted its regular drydock which extended into part of the second quarter but is now back in service."

Mr. Menéndez concluded, "The growth in the cargo volume and the expansion of the seeded area, despite this year's drought, confirm our view that there is a unique opportunity to capitalize on the efficiencies of our integrated River Business unit. Our fully automated yard continues to produce new jumbo size barges for our fleet and for third parties at profitable levels and our new fuel efficient pushboats allow us to progressively capture larger margins from our freights. The unprecedented expansion of the offshore activity in Brazil finds us ideally positioned to operate our new fleet of state-of-the-art PSVs. These elements have been the pillars of our investment plan over the past few years and we believe they will enhance the Company's future earnings power."

Overview of Financial Results

Total revenues for the first quarter 2012 were \$64.5 million as compared with \$58.3 million in the same period of 2011.

Adjusted EBITDA for the first quarter 2012 was \$7.3 million as compared with \$11.9 million in the same period of 2011. For a reconciliation of adjusted EBITDA to cash flows from operating activities, please see the tables at the end of this release.

Adjusted net loss for the first quarter of 2012 was \$(13.1) million, or \$(0.44) per share as compared with net loss of \$(6.6) million, or \$(0.22) per share, during the same period of 2011. First quarter 2012 net loss includes a \$0.7 million provision, or \$0.03 per share, for unrealized foreign exchange rate gains on U.S. dollar-denominated debt of our Brazilian subsidiary in the Offshore Supply Business. Excluding the effect of this gain, the net loss for the first quarter of 2012 was \$(13.8) million, or \$(0.47) per share.

Len Hoskinson, Ultrapetrol's Chief Financial Officer, said, "We are experiencing stronger results from our offshore segment as new ships are added to our fleet. We have adapted our Capex based on our River Business's 2012 needs. We are building tank barges for our fleet and we have been producing barges for third parties as well. We believe that we have a well balanced financial situation which will allow us to further strengthen the Company's leading commercial position as its new assets are put into operation."

Business Segment Highlights

River

The River Business experienced a 34% decrease in the volume of cargo transported in the first quarter of 2012 as compared with the same period of 2011 as a consequence of the combined effect of a severe drought that affected the soybean production in the region and lower than usual water levels in the Upper Paraguay River.

First quarter 2012 River Business segment adjusted EBITDA was \$(0.5) million versus \$6.8 million in the same period of 2011, a \$7.3 million decrease. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Our operating costs in the River Business, particularly manning and maintenance costs, have been impacted by revaluation of the local currency or by inflationary pressure on costs not dampened by a proportional devaluation of the local currencies with respect to the U.S. dollar.

The soybean crop in Paraguay for 2011 was 8.4 million tons. In its latest report issued on May 7, 2012, the USDA estimates that the soybean crop in Paraguay will likely decrease to 4.2 million tons in 2012, a decrease of 50% year over year. This decrease is mainly attributable to the effects of a severe drought and higher than average temperatures in January and February in large parts of Argentina and central Brazil as well as Paraguay. Soybean and particularly the early variety crop in Paraguay suffered severe impacts on its yields. Compounding this effect, low river levels limited the draft at which we could operate through the Upper Paraguay River, to a larger extent than what would have been normal for the first quarter of the year when accounting for seasonality. However, the long-term growth prospects of the agricultural sector along the Hidrovia remains strong as the seeded area is expected to continue to grow, fostered by the strong prices of soybean and other agricultural commodities. This steady long-term growth trend represents an important demand driver for Ultrapetrol's River Business. Partially offsetting the milder prospects for agricultural products in the Hidrovia region for 2012, iron ore production in the three mines connected with the river system has increased substantially. Early in the year we went into the market to fix the available capacity left by agricultural products on contracts for carrying iron ore. Although these ore volumes will partially replace volume-wise the decrease in soybean cargo, such replacement will come at lower margins due to the longer round trips associated with iron ore and consequent higher fuel consumption. Additionally, this temporary shift in our cargo mix towards a larger share of iron ore places more pressure on our pushing capacity. The Company continues to add capacity and implement various margin-expansion initiatives as we position Ultrapetrol to profitably capitalize on the segment's long term growing demand.

The Company's barge building shipyard, which is the most modern in South America, has been in operation since the first quarter of 2010. We believe this shipyard will allow the Company to meet the incremental demand growth resulting from the projected increases in volumes of liquids, soybeans and iron ore produced in the region, as well as the need to replace a large proportion of the river system fleet within the next few years. The Company also builds jumbo barges for third parties in its Punta Alvear Yard and as part of that effort built and delivered twenty jumbo barges for third parties in 2011 and five additional jumbo barges during the first quarter of 2012 (nineteen of which, together with one pushboat, were exported to Colombia). The Company has successfully continued its re-engining and re-powering programs that aim to convert engines on eleven of its main pushboats from diesel to heavy fuel consuming. Four fuel-consuming pushboats are now in operation and two more are expected to commence operation at the end of the second quarter of 2012. We expect this program to lead to substantial savings in fuel expense and to an increase in tow size and navigation speed.

Offshore Supply

In the Offshore Supply Business, with the introduction of our UP Jasper into a long-term charter in the North Sea in October 2011, we began to operate a fleet of eight PSVs which will turn to nine when our UP Jade gets delivered in May 2012. The adjusted EBITDA generated by the Offshore Supply Business segment during the first quarter of 2012 was \$6.4 million, or 78% higher than the \$3.6 million generated in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Total revenues from the Offshore Supply Business for the first quarter of 2012 increased by \$4.4 million compared with the same period of 2011. This difference represents a 34% increase which was primarily attributable to the full quarter operation of our UP Turquoise and UP Jasper in their charter contracts in Brazil and in UK's North Sea, respectively.

In Brazil, operating costs, particularly manning costs, have been increasing as a result of the revaluation of the local currency and inflationary pressure on salaries and expenses both of which affected our earnings during parts of 2011. Nevertheless, during the first quarter of 2012 the Brazilian real has seen a slight devaluation which has eased the upward trend of our costs.

As planned, Ultrapetrol continues its building program in India that will add four new vessels to the fleet and increase capacity by 50%. We expect to take delivery of the first of these four PSVs, UP Jade, during the second quarter of 2012.

The Company believes that the Brazilian market will grow hand in hand with Petrobras' aggressive capital expenditure plans. The North Sea should follow as the natural balancing out of the market occurs in the forthcoming years. Ultrapetrol's fleet has the advantage of being very modern and technologically capable of supporting deep sea oil drilling in both markets.

Ocean

The Ocean Business segment generated adjusted EBITDA of \$0.1 million in the first quarter of 2012 as compared to adjusted EBITDA of \$1.2 million in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

The 26% increase in revenues from \$14.4 million to \$18.1 million is mainly attributable to three factors: 1) the transportation of the nineteen barges built for, and one pushboat sold to, a third party to Colombia; 2) the operation of one of our container feeder vessel, M.V. Argentino, for the entire first quarter of 2012 which had started operations in

mid January 2011; and 3) the effect of the adjustment in the hire of our Product Tanker fleet to reflect increased manning costs. These effects were partly offset by 58 offhire days of our Amadeo which underwent its scheduled drydock during the first quarter of 2012 (the time lost in drydock extended partially into the second quarter).

The Company operated a total of four vessels in its Product Tanker fleet in the first quarter of 2012 (Miranda I, Amadeo, Alejandrina, and Austral) which continue to be employed in the South American coastal trade on charters with oil majors that operate in the region.

In our Ocean Business, again inflationary pressures particularly in manning costs not compensated by a proportional devaluation of the local currency against the U.S. dollar have resulted in increased operating costs. The volumes in our container service particularly in the southbound leg have been sustained at high levels.

Use of Non-GAAP Measures

Ultrapetrol believes that the disclosed non-Generally Accepted Accounting Principles ("GAAP") measures such as adjusted EBITDA, adjusted net income and any other adjustments thereto, when presented in conjunction with comparable GAAP measures, are useful for investors to use in evaluating the liquidity of the company. These non-GAAP measures should not be considered a substitute for, or superior to, measures of liquidity prepared in accordance with GAAP. A reconciliation of adjusted EBITDA to segment operating profit and cash flow from operations is presented in the tables that accompany this press release.

Investment Community Conference Call

Ultrapetrol will host a conference call for investors and analysts on Wednesday, May 16, 2012, at 10:00 a.m. EDT accessible via telephone and Internet with an accompanying slide presentation. Investors and analysts may participate in the live conference call by dialing 1-888-469-2076 (toll-free U.S.) or +1-212-547-0287 (outside of the U.S.); passcode: ULTR. Please register at least 10 minutes before the conference call begins. A replay of the call will be available for one week via telephone starting approximately one hour after the call ends. The replay can be accessed at 1-866-509-3936 (toll-free U.S.) or +1-203-369-1923 (outside of the U.S.); passcode: 5162012. The webcast will be archived on Ultrapetrol's Web site for 30 days after the call.

About Ultrapetrol

Ultrapetrol is an industrial transportation company serving the marine transportation needs of its clients in the markets on which it focuses. It serves the shipping markets for containers, grain and soya bean products, forest products, minerals, crude oil, petroleum, and refined petroleum products, as well as the offshore oil platform supply market with its extensive and diverse fleet of vessels. These include river barges and pushboats, platform supply vessels, tankers and two container feeder vessels. More information on Ultrapetrol can be found at www.ultrapetrol.net.

Forward-Looking Language

The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include future operating or financial results; pending or recent acquisitions, business strategy and expected capital spending or operating expenses, including dry docking and insurance costs; general market conditions and trends, including charter rates, vessel values, and factors affecting vessel supply and demand; our ability to obtain additional financing; our financial condition and liquidity, including our ability to obtain financing in the future to fund capital expenditures, acquisitions and other general corporate activities; our expectations about the availability of vessels to purchase, the time that it may take to construct new vessels, or vessels' useful lives; our dependence upon the abilities and efforts of our management team; changes in governmental rules and regulations or actions taken by regulatory authorities; adverse weather conditions that can affect production of the goods we transport and navigability of the river system; the highly competitive nature of the oceangoing transportation industry; the loss of one or more key customers; fluctuations in foreign exchange rates and devaluations; potential liability from future litigation; and other factors. Please see our filings with the

Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.
