## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES <br> NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

## Note 1. Nature of Business

Community Bancorp is a bank holding company headquartered in Las Vegas, Nevada with four wholly-owned subsidiaries: 1) Community Bank of Nevada, 2) Community Bank of Arizona, 3) Community Bancorp (NV) Statutory Trust II and 4) Community Bancorp (NV) Statutory Trust III. Community Bancorp exists primarily for the purpose of holding the stock of its wholly-owned subsidiaries and facilitating their activities. Community Bancorp and its consolidated subsidiaries discussed below are collectively referred to herein as the Company.

Community Bank of Nevada is a Nevada state chartered bank providing a full range of commercial and consumer bank products through thirteen branches located in the greater Las Vegas area and a loan production office in Arizona.

Community Bank of Arizona is an Arizona state chartered bank providing a full range of commercial and consumer bank products through three branches and one administrative office located in the greater Phoenix, Arizona area. Community Bank of Arizona was acquired in September 2006.

The statutory trusts were formed for the exclusive purpose of issuing and selling trust preferred securities (see Note 2 and Note 8). The trust preferred securities issued through Community Bancorp (NV) Statutory Trust I were redeemed in September 2007 and management has dissolved this entity.

Community Bancorp s principal source of income is currently dividends from its two bank subsidiaries, Community Bank of Nevada and Community Bank of Arizona. The expenses of Community Bancorp, including interest from junior subordinated debt, salaries, legal, accounting and NASDAQ listing fees, have been and will generally be paid from dividends and management fees paid to Community Bancorp by its bank subsidiaries.

## Note 2. Basis of Presentation

The unaudited consolidated financial statements include the accounts of Community Bancorp, Community Bank of Nevada and Community Bank of Arizona. Significant intercompany items and transactions have been eliminated in consolidation. The statutory trusts are not consolidated, as disclosed in Note 8.

The interim consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America ( GAAP ) for unaudited financial statements. The information furnished in these interim statements reflects all adjustments that are, in the opinion of management, necessary for the fair statement of results for the periods presented. All adjustments are of a normal and recurring nature. Results for the three months ended March 31, 2008 are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted. The unaudited consolidated financial statements should be read in conjunction with the audited financial statements and notes included in the Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended December 31, 2007.

A consolidated statement of stockholders equity is not included as part of these interim financial statements since there have been no material changes, other than net income, during the three months ended March 31, 2008.

Certain amounts in the 2007 Consolidated Statement of Cash Flows have been reclassified to conform to the 2008 presentation.

## Note 3. Significant Accounting Policies

Accounting policies are fully described in Note 2 of the Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended December 31, 2007 and there have been no material changes during the three months ended March 31, 2008.

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Note 4. Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which addresses how companies should measure fair value when they are required to use a fair value measure for recognition or disclosure purposes under GAAP. SFAS No. 157 provides a common definition of fair value to be used throughout GAAP. The FASB believes that the new standard will make the measurement of fair value more consistent and comparable and improve disclosures about those measures. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The Company adopted SFAS No. 157 effective January 1, 2008. The adoption of SFAS No. 157 had no effect on the Company s Consolidated Balance Sheet or Consolidated Statement of Income.

In September 2006, the FASB ratified the consensus reached by the EITF on Issue 06-5, Accounting for Purchases of Life Insurance-Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance ( EITF 06-5 ). The effective date of EITF 06-5 is for fiscal years beginning after December 15, 2006. The EITF concluded that a policyholder should consider any additional amounts included in the contractual terms of the policy in determining the amount that could be realized under the insurance contract. Amounts that are recoverable by the policyholder at the discretion of the insurance company should be excluded from the amount that could be realized. The Company adopted EITF 06-5 effective January 1, 2007. The adoption of EITF 06-5 had no effect on the Company s Consolidated Balance Sheet or Consolidated Statement of Income.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits an entity to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 applies to all reporting entities, including not-for-profit organizations, and contains financial statement presentation and disclosure requirements for assets and liabilities reported at fair value. For companies electing the fair value option for financial instruments under SFAS No. 159, unrealized gains and losses will be reported in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. However, early adoption was permitted subject to certain conditions including the adoption of SFAS No. 157 at the same time. The Company adopted SFAS No. 159 on January 1, 2008. The adoption of SFAS No. 159 had no effect on the Company s Consolidated Balance Sheet and Consolidated Statement of Income.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133. SFAS No. 161 requires enhanced disclosures about derivative instruments and hedging activities. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company is currently assessing the extent, if any, of any additional required disclosures.

## Note 5. Loans

The composition of the Company s loan portfolio as of March 31, 2008 and December 31, 2007 is as follows:

|  | December |  |
| :--- | ---: | :---: |
|  | March 31, | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 8}$ | (In thousands) |
| Commercial and industrial | $\$ 234,713$ | $\$$ |
| Real estate: | 210,614 |  |
| Commercial | 389,569 | 370,464 |
| Residential | 42,463 | 43,212 |
| Construction and land development | 796,307 | 789,185 |
| Consumer and other | 5,020 | 5,707 |
|  |  | $1,468,072$ |

## Less:

Allowance for loan losses $\quad 19,831 \quad 17,098$
$\begin{array}{lll}\text { Net unearned loan fees and discounts } & 4,369 & 5,194\end{array}$

Total net loans
\$ 1,443,872 $\$ 1,396,890$

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Changes in the allowance for loan losses for the three months ended March 31, 2008 and 2007 are as follows:
$\left.\begin{array}{lcc} & \begin{array}{c}\text { For the three months } \\ \text { ended March 31, } \\ \text { 2008 }\end{array} \\ \text { (In thousands) }\end{array}\right]$

At March 31, 2008, total impaired were $\$ 41.2$ million, including $\$ 13.7$ million in non-accrual loans, and total loans past due 90 days or more and still accruing interest were $\$ 3,000$. At December 31, 2007, total impaired were $\$ 29.8$ million, including $\$ 12.1$ million in non-accrual loans, and total loans past due 90 days or more and still accruing interest were $\$ 20,000$.

## Note 6. Other Real Estate Owned

At March 31, 2008, other real estate owned (OREO) consisted of two properties totaling $\$ 2.8$ million. OREO is real estate that is held for sale and is carried at the lower of cost or fair value, less estimated costs of disposal. The Company recognized a write down to fair value of $\$ 1.0$ million at the time the properties were transfered to OREO through a charge to the allowance for loan losses. Substantially all of the OREO consists of one residential project under construction in which the Company has a $30.0 \%$ undivided interest.

OREO is evaluated regularly to ensure the recorded amount is supported by its current fair value and valuation allowances. Reductions in the carrying amount are recorded as necessary. Costs relating to the development and improvement of the OREO are capitalized to the extent that the total does not exceed the property s net realizable value.

## Note 7. Borrowings

The Company regularly uses the Federal Home Loan Bank of San Francisco ( FHLB ) for short term and long term borrowings. FHLB term debt, which matures from April 2008 through March 2009, amounted to $\$ 71.0$ million at March 31, 2008. Interest on all FHLB borrowings accrued at an average rate of $4.32 \%$ and $5.16 \%$ for the three months ended March 31, 2008 and 2007, respectively. Remaining available debt financing through the FHLB amounted to $\$ 79.3$ million at March 31, 2008.

The Company also has agreements with other lending institutions under which it can purchase up to $\$ 113.0$ million of federal funds. The interest rate charged on borrowings is determined by the lending institutions at the time of borrowings. Each line is unsecured. As of March 31, 2008 and December 31, 2007, there were no federal funds purchased.

In September 2007, the Company borrowed $\$ 15.5$ million and used the proceeds to redeem junior subordinated debt owed to Community Bancorp (NV) Statutory Trust I which used the proceeds to redeem its trust preferred issuances. The borrowing is unsecured, bears interest at the one month LIBOR plus $1.50 \%$ (equal to $4.15 \%$ at March 31, 2008), is payable in the amount of approximately $\$ 462,000$ monthly with all unpaid interest and principal due on September 26, 2010 and requires the lender s approval prior to issuing dividends to shareholders. The outstanding balance on the note was $\$ 13.1$ million and $\$ 14.3$ million as of March 31, 2008 and December 31, 2007, respectively.
Note 8. Junior Subordinated Debt

The Company had $\$ 72.2$ million of subordinated debentures outstanding at March 31, 2008, which bore interest at a rate of $6.43 \%$ for the three months ended March 31, 2008. The subordinated debentures were issued in three separate series. Each issuance has a maturity of thirty years from its date of issue. The subordinated debentures were issued to trusts established by the Company, which in turn issued trust preferred securities. The proceeds from the issuance of the securities were used to fund the Company s 2005 and 2006 acquisitions.

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES <br> NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

In accordance with FIN 46 (revised December 2004), Consolidation of Variable Interest Entities-an interpretation of ARB No. 51, statutory trusts are not reported on a consolidated basis. Therefore, the trust preferred debt securities of $\$ 70.0$ million do not appear on the Consolidated Balance Sheets. Instead, the junior subordinated debentures of $\$ 72.2$ million payable by Community Bancorp to the statutory trusts and the investment in the statutory trusts common stock of $\$ 2.2$ million (included in other assets) are reported on the Consolidated Balance Sheets.

The Company has the option to defer payments of interest on the trust preferred securities for a period of up to five years, as long as the Company is not in default on the payment of interest. If the Company elects to defer payments of interest by extending the interest distribution period, then the Company may not declare or pay any dividends or distributions on, or redeem, purchase, acquire, or make a liquidation payment with respect to any of the Company s common stock, until such time as all deferred interest is paid.

In the event of certain changes or amendments to regulatory requirements or federal tax rules, the debt is redeemable in whole. Certain obligations under these instruments are fully and unconditionally guaranteed by the Company and rank subordinate and junior in right of payment to all other liabilities of the Company.

In March 2005, the Federal Reserve Bank adopted a final rule that allows the continued inclusion of trust preferred securities in the Tier I capital of bank holding companies, subject to stricter quantitative limits and qualitative standards. Under the final ruling, qualifying mandatory preferred securities may be included in Tier I capital, subject to a limit of $25 \%$ of all core capital. Amounts of restricted core capital elements in excess of this limit generally may be included in Tier II capital. The qualitative limits become effective on March 31, 2009. As of March 31, 2008, the trust preferred securities have been included in Tier I capital for regulatory capital purposes up to the specified limit ( $\$ 70.0$ million).
Note 9. Commitments and Contingencies

## Financial Instruments with Off-Balance Sheet Risk

The Company is party to financial instruments with off-balance sheet risk in the normal course of business in order to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. They involve, to varying degrees, elements of credit risk in excess of amounts recognized in the Consolidated Balance Sheets.

The Company s exposure to credit loss for these commitments, in the event of nonperformance, is represented by the contractual amounts of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

A summary of the contract amount of the Company s exposure to off-balance sheet risk as of March 31, 2008 and December 31, 2007 is as follows:

## Outstanding commitments

Commitments to extend credit, including unsecured commitments of approximately $\$ 25,750$ for 2008 and $\$ 28,137$ for 2007

| March | December |
| :---: | :---: |
| 31, | 31, |
| 2008 | 2007 |

(In thousands)
\$395,126 \$ 430,093
Credit card commitments, including unsecured amounts of approximately \$804 for 2008 and $\$ 818$ for 2007

Standby letters of credit, including unsecured commitments of approximately $\$ 2,194$ for 2008 and $\$ 2,485$ for 2007

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Commitments to extend credit are agreements to lend to a customer as long as there are no violations of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer s creditworthiness on a case-by-case basis. The amount of collateral obtained is based on management s credit evaluation of the party. Collateral held varies, but may include accounts receivable; inventory; property and equipment; residential real estate; income-producing commercial properties; and owner-occupied commercial properties. The Company had approximately $\$ 989,000$ and $\$ 877,000$ at March 31, 2008 and December 31, 2007, respectively, reflected in other liabilities for the allowance for loan losses of off-balance sheet risk associated with commitments to extend credit.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Collateral held varies as specified above and is required as the Company deems necessary. Essentially all letters of credit issued have expiration dates within one year. Upon entering into letters of credit, the Company records the related liability at fair value pursuant to FASB Interpretation No. 45 ( FIN 45 ). Thereafter, the liability is evaluated pursuant to FASB Statement No. 5, Accounting for Contingencies. As of March 31, 2008 and December 31, 2007, the amount of the liability related to guarantees was approximately $\$ 11,000$ and $\$ 10,000$, respectively.

In connection with standby letters of credit, the Company recognizes the related commitment fee received from the third party as a liability at the inception of the guarantee arrangement pursuant to FIN 45 . Commitment fees, where the likelihood of exercise of the commitment is remote, are generally recognized as service fee income on a straight line basis over the commitment period. All other commitment fees are deferred over the entire commitment period and are not recognized as service fee income until the expiration of the commitment period.

## Financial Instruments with Concentrations of Credit Risk

The Company makes commercial, commercial real estate, residential real estate and consumer loans to customers primarily in the greater Las Vegas, Nevada and Phoenix, Arizona areas. Real estate loans accounted for approximately $84 \%$ of the total gross loans as of March 31, 2008. Substantially all of these loans are secured by first liens with an initial loan-to-value ratio of generally not more than $75 \%$. Approximately $2 \%$ of total gross loans were unsecured as of March 31, 2008. The Company s loans are expected to be repaid from cash flows or from proceeds from the sale of selected assets of the borrowers.

At March 31, 2008 the Company s impaired loans totaled $\$ 41.2$ million, including $\$ 13.7$ million in non-accrual loans. Approximately $96.2 \%$ and $98.7 \%$ of the non-accrual loans and impaired loans, respectively, were related to borrowers in the greater Las Vegas, Nevada geographic region.

At March 31, 2008, ten customer balances totaling $\$ 421.2$ million comprised $31.9 \%$ of total deposits. These customer balances constitute all brokered deposits at March 31, 2008. Of these deposits at March 31, 2008, $\$ 341.3$ million were interest bearing wholesale demand deposits and $\$ 79.9$ million were other time deposits.

## Lease Commitments

The Company leases certain branches and office facilities under operating leases. The Company has lease obligations for ten of its branch locations and its corporate headquarters under various non-cancelable agreements with expiration dates through March 2018, which require various minimum annual rentals.

In January 2008, the Company executed a new land lease agreement for property on which it will construct a new branch. The Company took possession of the property on March 21, 2008 and will commence construction of the branch.. The initial term of the lease is ten years with four ten year renewal options. Monthly rent will commence on the date the branch facility is open for business or at the latest December 31, 2008.

## Contingencies

In the normal course of business, the Company is involved in various legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the consolidated financial statements.

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Note 10. Derivative Financial Instruments

During 2006, the Company originated two fixed rate loans with an aggregate principal balance of approximately $\$ 20.0$ million. The Company also entered into two interest rate swap agreements with notional values equal to the principal balance of the two fixed rate loans. The interest rate swap agreements are LIBOR-based where the Company s interest payments are based on a fixed interest rate and the Company s receipt of interest payments are based on a variable interest rate. The Company retains any net swap settlement income and pays any net swap settlement expense. As the Company has not used hedge accounting, the net swap settlement has been recorded in non-interest income.

The interest rate swap agreements are recorded at fair value as required by SFAS No. 133 and as amended, by SFAS No. 155. The fair values of the swap agreements are reflected in other assets or other liabilities, as applicable and any amounts owed to the borrower are recorded in other liabilities on the Consolidated Balance Sheet. As a result of a decrease in market value associated with the interest rate swaps, a loss of $\$ 829,000$ was recorded in the Company s Consolidated Statement of Income and Comprehensive Income for the three months ended March 31, 2008. For the three months ended March 31, 2007, there was no corresponding loss on interest rate swaps.

Fair values for the swap agreements are based upon quoted market prices.

## Note 11. Earnings per Share

Basic earnings per share ( EPS ) represents income available to common stockholders divided by the weighted-average number of common shares outstanding (excluding non-vested restricted stock) during the period. Diluted EPS reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued. Potential common shares that may be issued by the Company relate to outstanding options and non-vested restricted stock, and are determined using the treasury stock method.

EPS has been computed based on the following:

|  | For the Three Months Ended March 31, |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2008 |  |  |  | 2007 |  |  |  |
|  | (In thousands, except earnings per share data) |  |  |  |  |  |  |  |
|  | Average |  |  |  | Average |  |  |  |
|  | Net | Number of |  | Per Share | Net | $\begin{gathered} \text { Number } \\ \text { of } \end{gathered}$ |  | $\begin{aligned} & \text { er } \\ & \text { nare } \end{aligned}$ |
|  | Income | Shares |  | mounts | Income | Shares |  | ounts |
| Basic EPS | \$ 2,692 | 10,109 | \$ | 0.27 | \$ 5,449 | 10,416 | \$ | 0.52 |
| Effect of dilutive securities: |  |  |  |  |  |  |  |  |
| Stock options |  | 13 |  |  |  | 78 |  |  |
| Restricted stock |  | 103 |  | (0.01) |  |  |  |  |
| Diluted EPS | \$ 2,692 | 10,225 | \$ | 0.26 | \$ 5,449 | 10,494 | \$ | 0.52 |

Options not included in the computation of diluted earnings per share because they would have had an anti-dilutive effect amounted to 536,000 shares and 344,000 shares at March 31, 2008 and 2007, respectively.

## Note 12. Share-Based Compensation

## Stock options

As of March 31, 2008, the Company has outstanding options under two share-based compensation plans. The related compensation cost was approximately $\$ 189,000$ and $\$ 197,000$ for the three months ended March 31, 2008 and 2007, respectively. No share-based compensation was capitalized. No stock options were granted during the three months ended March 31, 2008 and 2007.

## Table of Contents

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) <br> Restricted stock

In August and September 2007, the Company issued a total of approximately 163,000 shares of restricted common stock to certain employees and directors. Restricted common stock issued to employees is subject to a three year cliff vesting and the directors restricted common stock vest annually over a three year period. Share-based compensation costs associated with the issuance of the restricted common stock is recognized on a straight-line basis over three years and amounted to approximately $\$ 253,000$ for the three months ended March 31, 2008.

## Stock appreciation rights

In July 2000, the Company s Board of Directors approved the 2000 Stock Appreciation Rights Plan. The Company accounts for the Stock Appreciation Rights ( SAR ) using liability accounting which requires the Company to record the liability of the SAR at fair value, rather than intrinsic value. All outstanding SAR were settled, with cash payments made in April 2007 and, accordingly, there was no accrued liability for SAR at March 31, 2008. SAR expense for the three months ended March 31, 2008 and 2007 was $\$ 0$ and $\$ 32,000$, respectively.

The compensation cost related to share-based compensation plans was included in salaries, wages and employee benefits expense for grants to employees and directors fees for grants to board members in the Consolidated Statement of Income and Comprehensive Income.

## Note 13. Segments

The Company provides a full range of banking services through its two consolidated subsidiaries, Community Bank of Nevada and Community Bank of Arizona. The Company currently manages its business with a primary focus on each bank subsidiary. Accordingly, the Company has two reportable segments. Community Bancorp s financial information is included in the Other category, as it represents overhead and funding costs.

(3) Includes intersegment
eliminations and reclassifications.

## COMMUNITY BANCORP AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Note 14. Sale of Property

On February 13, 2008, the Company completed the sale of its Warm Springs property. Gross proceeds from the sale were approximately $\$ 2.7$ million (approximately $\$ 2.6$ million after selling costs) and the related gain of approximately $\$ 1.2$ million was recorded in non-interest income.

## Note 15. Adoption of New Accounting Pronouncements

As discussed in Note 4, on January 1, 2008 the Company adopted SFAS No. 157, Fair Value Measurements, and SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115. The adoption of SFAS No. 157 and 159 had no affect on the Company s December 31, 2007 and March 31, 2007 Consolidated Balance Sheets or the Consolidated Statement of Income and Comprehensive Income for the three months ended March 31, 2008.

SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value. SFAS No. 159 permits an entity to choose to measure many financial instruments and certain other items at fair value and contains financial statement presentation and disclosure requirements for assets and liabilities for which the fair value option under this pronouncement is elected. Upon adoption of SFAS No. 159, none of the Company s assets or liabilities were valued using the fair value option allowed under this pronouncement.

SFAS No. 157 also establishes a hierarchy for determining fair value measurement. The hierarchy includes three levels and is based upon the valuation techniques used to measure assets and liabilities. The three levels are as follow:

Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets;

Level 2 Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.
The following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to valuation methodology.
Securities Where quoted prices are available in an active market, securities are classified within level 1 of the hierarchy. Level 1 includes securities that have quoted prices in an active market for identical assets. If quoted market prices are not available, then fair values are estimated using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. The Company has categorized its securities as level 2.
Impaired loans SFAS No. 157 applies to loans measured for impairment using the practical expedients permitted by SFAS No. 114, Accounting by Creditors for Impairment of a Loan, including impaired loans measured at an observable market price (if available) or at the fair value of the loan s collateral (if collateral dependent). Fair value of the loan s collateral is determined by appraisals or independent valuation which is then adjusted for the cost related to liquidation of the collateral.
OREO The Company s OREO is measured at fair value less cost to sell. Fair value was determined based on various offers and/or appraisals. Cost to sell the OREO was based on standard market factors. The Company has categorized its OREO as level 2.
Interest rate swaps The Company determines the fair value of its interest rate swaps based on termination estimates provided by the counter party to the swaps. These values are then validated by management using internal valuation models based on market information. The Company has categorized its interest rate swaps as level 2.

## Table of Contents

The following table represents the assets and liabilities measured at fair value on recurring basis by the Company:

| Quoted <br> Prices |  |  |
| :---: | :---: | :---: |

## Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

## Forward-Looking Statements

When used in this document, the words or phrases such as will likely result in, management expects that, will continue, is anticipated, estimate, projected, or similar expressions are intended to identify forward-looking statem within the meaning of the Private Securities Litigation Reform Act of 1995 ( PSLRA ). Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Specific factors include, but are not limited to the recent fluctuations in the U.S. capital and credit markets, loan production, balance sheet management, the economic condition of the markets in Las Vegas, Nevada, or Phoenix, Arizona and their deteriorating real estate sectors, net interest margin, loan quality, the ability to control costs and expenses, interest rate changes and financial policies of the United States government, our ability to manage systemic risks and control operating risks, and general economic conditions. Additional information on these and other factors that could affect financial results are included in
Item 1A. Risk Factors of our Annual Report on Form 10K for the year ended December 31, 2007, and our other Securities and Exchange Commission filings. Readers should not place undue reliance on forward-looking statements, which reflect management s view only as of the date hereof. Community Bancorp undertakes no obligation to publicly revise these forward-looking statements to reflect subsequent events or circumstances. This statement is included for the express purpose of protecting Community Bancorp under the PSLRA s safe harbor provisions. When relying on forward-looking statements to make decisions with respect to our Company, investors and others are cautioned to consider these and other risks and uncertainties.

## EXECUTIVE OVERVIEW

Community Bancorp is a bank holding company headquartered in Las Vegas, Nevada, with four wholly-owned subsidiaries: 1) Community Bank of Nevada, 2) Community Bank of Arizona, 3) Community Bancorp (NV) Statutory Trust II and 4) Community Bancorp (NV) Statutory Trust III. Community Bancorp exists primarily for the purpose of holding the stock of its wholly-owned subsidiaries and facilitating their activities. In accordance with FIN 46 (revised December 2004), the statutory trusts are not reported on a consolidated basis. Community Bancorp and its consolidated subsidiaries are collectively referred to herein as the Company. Community Bank of Nevada and Community Bank of Arizona are collectively referred to herein as the Banks.

The following are significant highlights of the Company s results of operations and financial condition:
Results of operations
Net income for the quarter ended March 31, 2008 was $\$ 2.7$ million, or $\$ 0.26$ per diluted share, compared to $\$ 5.4$ million, or $\$ 0.52$ per diluted share, in the same period in 2007.

Provision for loan losses and charge-offs (net of recoveries) were $\$ 4.2$ million and $\$ 1.4$ million, respectively, for the first quarter of 2008, compared to a provision for loan losses of $\$ 482,000$ and net recoveries of $\$ 160,000$ for the first quarter of 2007.
Financial condition
Total gross loans increased to $\$ 1.5$ billion, or $3.4 \%$, at March 31, 2008, compared to $\$ 1.4$ billion at December 31, 2007.

Non-performing loans totaled $\$ 13.7$ million, or $0.93 \%$ of total gross loans, at March 31, 2008, compared to $\$ 12.1$ million, or $0.85 \%$ of total gross loans, at December 31, 2007.

Other real estate owned (OREO) was $\$ 2.8$ million at March 31, 2008, and the Company had no OREO at December 31, 2007.

(1) Net interest margin
represents net interest income on a tax equivalent basis as a percentage of average interest-earning assets.
(2) Efficiency ratio represents non-interest expenses, excluding provision for loan losses, as a percentage of the aggregate of net interest income and non-interest income.
(3) Non-performing loans are defined as loans that are past due 90 days or more plus loans placed in non-accrual status.
(4) Non-performing assets are defined as assets that are past due 90 days or more plus assets placed in non-accrual status plus other real estate owned.
(5) Annualized.

## Table of Contents

## KEY FACTORS IN EVALUATING FINANCIAL CONDITION AND OPERATING PERFORMANCE

Return on average shareholders equity. For the first quarter of 2008, the Company s return on average shareholders equity ( ROAE ) was $4.5 \%$, compared to $9.9 \%$ for the first quarter of 2007. The decrease in ROAE was due to lower net interest income before provision for loan losses, an increase in the provision for loan losses, the loss on interest rate swaps for which there was no corresponding loss in 2007 and increases in other non-interest expenses. Partially mitigating these increases was the gain recognized on the sale of the Warm Springs property (a duplicate branch facility resulting from the Company s 2006 Valley Bancorp acquisition).

Diluted earnings per share decreased to $\$ 0.26$ for the three months ended March 31, 2008, respectively, compared to $\$ 0.52$ for the three months ended March 31, 2007. The decrease in the Company s diluted earnings per share was primarily due to the following factors:

An increase in the provision for loan losses of $\$ 3.7$ million.
An increase in the loss on interest rate swaps of $\$ 829,000$.
Mitigated, in part, by the gain on the sale of the Company s Warm Springs property of $\$ 1.2$ million.
Return on average assets. Return on average assets ( ROAA ) was $0.6 \%$ for the quarter ended March 31, 2008, compared to $1.4 \%$ for the same period in 2007. The decrease in the ROAA was directly related to the Company s decrease in net income for the quarter ended March 31, 2008, compared to the same period in 2007.

Asset growth. Total assets increased by $1.8 \%$ to $\$ 1.72$ billion as of March 31, 2008, from $\$ 1.69$ billion as of December 31, 2007. The increase in total assets was driven primarily by a $\$ 48.9$ million increase in total gross loans off-set in part by a reduction in securities available-for-sale of $\$ 17.8$ million from December 31, 2007 to March 31, 2008. Asset growth during the first three months of 2008 was funded primarily through increases in deposits of $\$ 88.3$ million, which also funded the decrease in the Company s borrowings of $\$ 62.3$ million, and current year income of $\$ 2.7$ million.

Asset quality. Non-performing loans and OREO were $\$ 13.7$ million and $\$ 2.8$ million, respectively, at March 31, 2008, totaling $\$ 16.5$ million in non-performing assets. Non-performing loans at December 31, 2007 amounted to $\$ 12.1$ million and the Company had no OREO. As of March 31, 2008, approximately $\$ 11.8$ million, or $86.3 \%$, of non-performing loans was composed of five borrowers.

Substantially all of the OREO consists of one residential project under construction on which the foreclosure was completed in March 2008. Concurrent with the foreclosure process, the Company recognized a $\$ 1.0$ million charge-off representing the difference between the estimated fair value of the property and outstanding loan balance.

Operating efficiency. The Company s efficiency ratio increased to $57.1 \%$ for the first quarter ended March 31, 2008, compared to $51.5 \%$ for the same period in 2007. The Company s increased efficiency ratio was the result of higher non-interest expense (net interest income before provision for loan losses was relatively stable in the aggregate for the quarters ended March 31, 2008 and 2007). Impacting the increase in non-interest expense were increases in salaries, wages and employee benefits, advertising and public relations, professional fees, insurance and the loss on interest rate swaps.

Primary markets. Recently, economic trends in Las Vegas, Nevada and Phoenix, Arizona have been influenced by the weakening United States economy. The residential real estate market deteriorated significantly during 2007 and has continued to weaken during the first quarter of 2008, which has led to an increase in the Company s allowance for loan losses, OREO, charged-off loans and the provision for loan losses during the first quarter of 2008, compared to the same period in 2007 and the quarter ended December 31, 2007.

## CRITICAL ACCOUNTING POLICIES

The Company s accounting policies are integral to understanding the financial results reported. The most complex accounting policies require management $s$ judgment to ascertain the valuation of assets, liabilities, commitments and contingencies. The Company has established policies and procedures that are intended to ensure that the valuation methods are well-controlled and applied consistently from period to period. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The following is a brief description of our current accounting policies involving significant management valuation judgments.

## Table of Contents

Allowance for loan losses. The allowance for loan losses represents the Company s best estimate of the probable losses inherent in the existing loan portfolio. The allowance for loan losses is increased by the provision for loan losses charged to expense and reduced when loans charged-off exceed loan recoveries. The allowance for loan losses is evaluated at least quarterly. The quarterly evaluation includes management $s$ assessment of various factors affecting the collectibility of loans, including current economic conditions, past credit experience, delinquency status, the value of the underlying collateral, if any, and a continuing review of the portfolio of loans. In addition to assessing these various factors, management considers a number of quantitative and qualitative factors, including levels and trends of past due and non-accrual loans, asset classifications, loan grades, changes in the volume of loans, collateral value, historical loss experiences, peer group loss experiences, size and complexity of individual credits and economic conditions. The provision for loan losses contains a general and specific component. The general component is based on a portfolio segmentation based on risk grading, with a further evaluation of the various quantitative and qualitative factors noted above. The specific component is for impaired loans, where the expected or anticipated loss is measurable (e.g., impairment).

Available-for-sale securities. Statement of Financial Accounting Standards ( SFAS ) No. 115, Accounting for Certain Investments in Debt and Equity Securities, requires that available-for-sale securities be carried at fair value. The Company believes this to be a critical accounting estimate in that the fair value of a security is based on quoted market prices or, if quoted market prices are not available, fair values are extrapolated from the quoted prices of similar instruments.

Goodwill and other intangibles. Net assets of entities acquired in purchase transactions are recorded at fair value at the date of acquisition. Identified intangibles are amortized on a straight-line basis over the period benefited. Goodwill is not amortized, although it is reviewed for impairment on an annual basis or if events or circumstances indicate a potential impairment. The impairment test is performed in two phases. The first step of the goodwill impairment test compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, an additional procedure must be performed. That additional procedure compares the implied fair value of the reporting unit s goodwill (as defined in SFAS No. 142, Goodwill and Other Intangible Assets) with the carrying amount of that goodwill. An impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

Other intangible assets subject to amortization are evaluated for impairment in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. An impairment loss will be recognized if the carrying amount of the intangible asset is not recoverable and exceeds fair value. The carrying amount of the intangible is considered not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use of the asset.

Share-based compensation. The Company recognizes share-based compensation expense under the provisions of the FASB issued Statement No. 123 (revised 2004) ( SFAS No. 123R ), Share-Based Payment, and SEC Staff Accounting Bulletin No. 107 ( SAB 107 ), which requires the measurement and recognition of all share-based compensation under the fair value method. In determining the fair value of stock options, the Company employs the following assumptions:
§ Expected volatility based on the historical volatility of similar entities stock price that have been public for a period of time at least equal to the expected life of the option.
§ Expected term of the option based on the simple average of the vesting term and the original contract term.
§ Risk-free rate based upon the rate on a zero coupon U.S. Treasury bill, for periods within the expected term of the option.
§ Dividend yield the Company currently has a no dividend policy and accordingly, no dividend yield is utilized. The fair value of restricted stock grants is based on the closing price of the Company s common stock on the date of grant.

Segment reporting. With the acquisition of Community Bank of Arizona in September 2006, the Company expanded to the greater Phoenix, Arizona market. During the quarter ended December 31, 2006, certain changes were implemented in the management and reporting of the Company s business units, resulting in two reportable operating segments: Community Bank of Nevada and Community Bank of Arizona.

Fair Value Measurements. Effective January 1, 2008 the Company adopted SFAS No. 157, Fair Value Measurements, and SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value.

## Table of Contents

SFAS No. 157 also establishes a hierarchy for determining fair value measurement. The hierarchy includes three levels and is based upon the valuation techniques used to measure assets and liabilities. The three levels are as follow: Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets;

Level 2 Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement. RESULTS OF OPERATIONS

As previously noted, the Company recorded net income of $\$ 2.7$ million for the first quarter of 2008, compared to $\$ 5.4$ million for the first quarter of 2007 . The Company earns income from two primary sources: net interest income, which is the difference between interest income generated from interest earning assets and interest expense created by interest bearing liabilities; and non-interest income, of which a majority is fees and charges earned from customer services. Income from these sources is offset by the provision for loan losses, non-interest expense and income taxes.

|  |  |  |  |  |
| Total interest expense | $\$ 1,974$ | $\$(2,204)$ | $\$$ | $(230)$ |

Net interest income is derived from interest and dividends received on interest earning assets, less interest expense incurred on interest bearing liabilities. The most significant impact on the Company s net interest income between periods is derived from the interaction of changes in volumes and rates. The volume of loans, investment securities and other interest earning assets, compared to the volume of interest bearing deposits and indebtedness, combined with the rate relationships, produces changes in the net interest income between periods.

For the three months ended March 31, 2008, interest and dividend income was $\$ 30.0$ million, compared to $\$ 30.9$ million, for the same period in 2007. The relatively stable level of interest and dividend income resulted from two offsetting factors. Average interest earning assets increased to $\$ 1.5$ billion for the quarter ended March 31, 2008, compared to $\$ 1.4$ billion for the same period in 2007. In a stable rate environment, the increase in average interest earning assets would have increased the Company s interest and dividend income for the three months ended March 31,2008 by approximately $\$ 3.1$ million, compared to the same period in 2007 . However, the Company s average yield on interest earning assets for the three months ended March 31, 2008 was $7.89 \%$, compared to $8.85 \%$ in the same period in 2007. During this period average market rates decreased 209 basis points in response to decreases in market rate targets set by the Federal Open Market Committee (FOMC) (During the period of September 2007 through March 2008 the FOMC lowered interest rates six times in the aggregate amount of 300 basis points). Yields were further reduced by an increase in non-performing loans to $\$ 13.7$ million at March 31, 2008.

For the three months ended March 31, 2008, interest expense was $\$ 12.7$ million, compared to $\$ 13.4$ million for the same period in 2007. The decrease in interest expense was driven primarily by decreases in interest rates paid on interest bearing liabilities, reflecting the decreases in interest rate targets set by the FOMC noted above, offset in large part by an unfavorable change in funding liability mix at March 31, 2008 from March 31, 2007. The unfavorable mix
change occurred as a substantial amount of the Company s loan growth over the past twelve months and the decrease in average core deposits during the quarter ended March 31, 2008, compared to March 31, 2007 were funded with wholesale deposits and FHLB borrowings.

For the three months ended March 31, 2008, the Company s net interest margin was $4.56 \%$, compared to $5.03 \%$, in the same period in 2007. The decrease in net interest margin was primarily attributable to a slower decrease in the cost of interest bearing liabilities, compared to the decrease in yields on interest earning assets, due to the unfavorable mix change noted above.

## Table of Contents

For the three months ended March 31, 2008, net interest income before provision for loan losses was relatively stable, compared to the same period in 2007, as decreases in interest and dividend income were essentially offset by lower costs of interest bearing liabilities.

## Provision for Loan Losses

The Company has established an allowance for loan losses through charges to earnings that are reflected in the Consolidated Statements of Income and Comprehensive Income as provision for loan losses. Specifically, the provision for loan losses represents the amount charged against current period earnings to achieve an allowance for loan losses that, in management s judgment, is adequate to address the risks in the Company s loan portfolio. To quantify these risks, the Company performs a quarterly assessment of the losses inherent in its loan portfolio, as well as a detailed review of each significant loan with identified weaknesses.

A provision for loan losses of $\$ 4.2$ million was recorded for the first quarter of 2008, compared to $\$ 482,000$ for the first quarter of 2007. The increase in the provision for loan losses for the first quarter of 2008, compared the same period in 2007, was attributable to in increase in loans charged-off and an increase in the valuation allowance for impaired loans. The allowance for loan losses was $\$ 19.8$ million, or $1.35 \%$ of total loans, as of March 31, 2008, compared to $\$ 17.1$ million, or $1.20 \%$ of total loans, at December 31, 2007. While management believes that the allowance for loan losses was adequate at March 31, 2008, future additions to the allowance will be subject to continuing evaluation of estimated, known and inherent risks in the loan portfolio.

## Non-Interest Income

The following table sets forth the various components of the Company s non-interest income for the periods indicated:

Service charges and other income
Income from bank owned life insurance
Net swap settlements
Rental income
Gain on sale of securities
Gain on sale of property
Three months ended
September 30, March 31,

\left.|  | March 31, |  | 2008 | 2007 |
| :--- | :---: | :---: | :---: | :---: |
| Increase |  |  |  |  |
| (decrease) |  |  |  |  |$\right)$

Total non-interest income
\$ 2,156 \$ 867 \$ 1,289

Non-interest income increased to $\$ 2.2$ million for the first quarter of 2008, compared to $\$ 867,000$ for the first quarter of 2007. The $\$ 1.3$ million increase was primarily the result of the sale of the Company s Warm Springs property in February 2008 which resulted in a gain of approximately $\$ 1.2$ million and gains on sale of securities that resulted from calls on certain of the Company $s$ investments.

## Table of Contents

## Non-Interest Expense

The following table sets forth the components of non-interest expense for the periods indicated:
$\left.\begin{array}{l|ccc} & \begin{array}{c}\text { Three months ended } \\ \text { March 31, }\end{array} \\ \text { 2007 }\end{array} \quad \begin{array}{c}\text { Increase } \\ \text { (decrease) }\end{array}\right)$

For the three months ended March 31, 2008, non-interest expense was $\$ 11.1$ million, compared to $\$ 9.5$ million for the first quarter of 2007.

Salaries, wages and employee benefits were $\$ 5.9$ million for the quarter ended March 31, 2008, compared to $\$ 5.7$ million in the same period in 2007 . The increase resulted primarily from cost of living and merit increases given to employees during the first quarter of 2008, offset in part by a reduction in management s estimate of 2008 bonuses.

Advertising and public relations were $\$ 377,000$ for the quarter ended March 31,2008 , compared to $\$ 273,000$ in the same period in 2007. The increase was primarily due to increased advertising costs associated with management s efforts to expand the Company s brand recognition within its primary markets.

Professional fees were $\$ 590,000$ for the quarter ended March 31,2008 , compared to $\$ 272,000$ in the same period in 2007. The increase was primarily the result of increased fees associated with the Company s annual audit and increases in legal and consulting costs associated Securities and Exchange Commission reporting as well as an efficiency/compliance study of its Bank Secrecy Act function. The increased fees associated with the annual audit included expanded procedures due to the Company s 2006 mergers (i.e., goodwill impairment testing) and expanded procedures due to credit issues at the national and local level.

Insurance expense was $\$ 224,000$ for the quarter ended March 31,2008 , compared to $\$ 119,000$ in the same period in 2007. The increase was primarily related to higher Federal Deposit Insurance Corporation (FDIC) insurance expense. The increase resulted from deposit growth, including deposits associated with the Valley Bancorp merger during the fourth quarter of 2006 (the increase in insurance expense associated with this merger was not factored into the Company s costs by the FDIC until the second quarter of 2007) and increases in rates associated with the Federal Deposit Insurance Reform Act of 2005.

## Table of Contents

For the quarter ended March 31, 2008, the Company recognized a mark-to-market loss of \$829,000 associated with interest rate swaps entered into during 2006. Since the Company did not use hedge accounting for these swaps, any fair value adjustment is included in non-interest expense. For the quarter ended March 31, 2007 there was no corresponding loss on interest rate swaps.

Other operating expenses were $\$ 657,000$, compared to $\$ 541,000$ in the same period in 2007. The increase was primarily a result of increases in the Company s allowance for loan losses for off-balance commitments to extend credit of approximately $\$ 112,000$.

## Income Tax Expense

Income tax expense is the sum of two components, current tax expense and deferred tax expense. Current tax expense is the result of applying the current tax rate to taxable income. Deferred tax expense reflects the income on which taxes are paid versus financial statement pre-tax income, as some items of income and expense are recognized differently for income tax purposes than for the financial statements.

For the first quarter of 2008 and 2007, the provisions for income taxes were $\$ 1.5$ million and $\$ 3.0$ million, respectively, representing effective tax rates of $35.2 \%$ and $35.4 \%$, respectively. The primary reason for the difference from the federal statutory tax rate of $35 \%$ are the inclusion of state taxes and reductions related to tax-advantaged investments in municipal obligations and bank owned life insurance.

Deferred income tax assets or liabilities reflect the estimated future tax effects attributable to differences as to when certain items of income or expense are reported in the financial statements versus when they are reported in the tax return. The Company had a deferred tax asset of $\$ 1.2$ and $\$ 1.5$ million as of March 31, 2008 and December 31, 2007, respectively. The change in deferred taxes was primarily attributable to the tax effect of the fair market value change in available-for-sale securities.

## FINANCIAL CONDITION

## Investment Securities

The following table summarizes the amortized cost, fair value and distribution of the Company s investment securities as of the dates indicated:

Available for sale:

| U.S. Government-sponsored agencies | $\$ 10,636$ | $\$ 10,867$ | $\$ 26,537$ | $\$ 26,811$ |
| :--- | ---: | ---: | ---: | ---: |
| Municipal bonds | 20,213 | 20,644 | 20,750 | 20,982 |
| SBA loan pools | 421 | 419 | 501 | 497 |
| Mortgage-backed securities | 38,055 | 38,502 | 40,300 | 39,897 |
| Mutual funds |  |  | 30 | 30 |

Total available for sale
$\$ 69,325 \quad \$ 70,432 \quad \$ 88,118$
\$88,217

Held to maturity:

| Municipal bonds | $\$$ | 646 | $\$$ | 661 |  | $\$$ | 646 | $\$$ | 661 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| SBA loan pools |  | 146 |  | 147 |  | 155 |  | 156 |  |
|  |  |  |  |  |  |  |  |  |  |
| Total held to maturity | $\$$ | 792 | $\$$ | 808 | $\$$ | 801 | $\$$ | 817 |  |

## Total investment securities <br> $\$ 70,117 \quad \$ 71,240 \quad \$ 88,919 \quad \$ 89,034$

As of March 31, 2008, investment securities totaled $\$ 71.2$ million, or $4.1 \%$ of total assets, compared to $\$ 89.0$ million, or $5.3 \%$ of total assets, as of December 31, 2007. The decrease in the investment portfolio was due primarily to normal

## Table of Contents

maturities and calls on securities. The proceeds from these maturities were used in part to fund the Company s loan growth and reduce funding liabilities.

Available-for-sale securities totaled $\$ 70.4$ million as of March 31, 2008, compared to $\$ 88.2$ million at December 31, 2007. Available-for-sale securities as a percentage of total assets decreased to $4.1 \%$ as of March 31, 2008, compared to $5.2 \%$ at December 31, 2007. Securities held to maturity decreased to $\$ 792,000$ at March 31, 2008 from $\$ 801,000$ at December 31, 2007. For the first three months of 2008, the tax equivalent yield on the average investment portfolio was $5.23 \%$, representing a decrease of 7 basis points, compared to $5.30 \%$ for the same period in 2007.

Loans
The following table sets forth the composition of the Company $s$ loan portfolio as of the dates indicated:

|  | $\begin{aligned} & \text { March 31, } \\ & 2008 \text { (In } \end{aligned}$ | san | $\begin{aligned} & \text { ecember } \\ & \text { 31, } \\ & 2007 \\ & \text { Is) } \end{aligned}$ |

| Total net loans | \$ 1,443,872 | \$ | 1,396,890 |
| (1) Owner-occupied commercial real estate loans were approximately $48.9 \%$ and $50.5 \%$ of the Company s commercial real estate loan portfolio as of March 31, 2008 and December 31, 2007, respectively. |  |  |  |

(2) Includes
farmland loans
and loans for
custom homes
to high net worth customers and home equity lines of credit.
(3) Includes loans for undeveloped land of approximately $\$ 180.0$ million and \$178.3
million as of March 31, 2008 and December 31, 2007, respectively.
(4) Includes loans
for property
zoned for 1-4
family
residential real estate, which amounted to \$242.5 million and
\$226.7 million as of March 31, 2008 and December 31, 2007,
respectively.
The Company s loan portfolio represents the largest single portion of earning assets. The quality and diversification of the Company s loans are important considerations when reviewing the Company s results of operations. The Company s lending activities consist of commercial and industrial, commercial real estate, residential real estate, construction and land development and consumer and other. None of these categories of the loan portfolio contain sub-prime mortgages.

As of March 31, 2008 and December 31, 2007, total gross loans represented $85.2 \%$ and $83.8 \%$, respectively of total assets.

## Table of Contents

## Non-performing Assets

Non-performing assets include non-accrual loans, loans past due 90 days or more still accruing interest, loans renegotiated in troubled debt restructurings and OREO. The following table sets forth information regarding non-performing assets as of the dates indicated:

|  |  | $\begin{gathered} \text { March } \\ \text { 31, } \\ 2008 \end{gathered}$ |  | nber <br> , <br> n <br> ands) | $\begin{aligned} & \text { March } \\ & \text { 31, } \\ & 2007 \end{aligned}$ |  |

| NPAs to total gross loans and OREO | $1.12 \%$ | $0.85 \%$ | $0.10 \%$ |
| NPAs to |  |  |  |

NPAs to total assets
0.95\%
0.71\%
0.08\%

The composite of non-accrual loans as of March 31, 2008 and December 31, 2007 was as follows:

Non-performing loans and OREO were $\$ 13.7$ million and $\$ 2.8$ million, respectively, at March 31, 2008, totaling $\$ 16.5$ million in non-performing assets. Non-performing loans at December 31, 2007 amounted to $\$ 12.1$ million and the Company had no OREO. As of March 31, 2008, approximately $\$ 11.8$ million, or $86.3 \%$, of non-performing loans was composed of five borrowers. All of these loans are currently in the process of collection and in foreclosure.

Substantially all of the OREO consists of one residential project under construction (in which the Company was a $30 \%$ undivided interest) on which the foreclosure was completed in March 2008. Concurrent with the foreclosure process, the Company recognized a $\$ 1.0$ million charge-off representing the difference between the estimated fair

## Edgar Filing: Community Bancorp - Form 10-Q

value of the property and outstanding loan balance. The Company anticipates the project will be sold in its present condition and has no obligation for future investment in the property (e.g., costs associated with the completion of the project).

## Impaired Loans

Impaired loans are loans for which it is probable that the Company will not be able to collect all amounts due according to the original contractual terms of the loan agreement. The category of impaired loans includes all non-accrual loans, regardless of size, as well as other loans, in excess of $\$ 200,000$, that management believes it is probable that the Company will not be able to collect all amounts due according to the contractual terms of the loan agreement .

## Table of Contents

The following table sets forth information regarding impaired loans as of the dates indicated:

|  | $\begin{aligned} & \text { March } \\ & \text { 31, } \\ & \text { 2008 } \\ & \quad \text { (In } \end{aligned}$ | us | mber <br> 1, <br> 07 |
| :---: | :---: | :---: | :---: |
| Impaired loans with a valuation allowance | \$ 16,623 | \$ | 3,097 |
| Impaired loans without a valuation allowance | 24,568 |  | 26,702 |
| Total impaired loans | \$41,191 | \$ | 29,799 |
| Average balance of impaired loans (1) | \$44,095 | \$ | 15,163 |
| Related valuation allowance | \$ 4,947 | \$ | 1,283 |
| Interest income recognized on impaired loans (1) | \$ 890 | \$ | 1,551 |
| Interest income recognized on a cash basis on impaired loans (1) | \$ 344 | \$ | 948 |

(1) For the three
months ended
March 31, 2008
and twelve
months ended
December 31,
2007.

Impaired loans totaled $\$ 41.2$ million, which included all non-accrual loans in the amount of $\$ 13.7$ million and classified loans in the amount of $\$ 27.5$ million. The $\$ 27.5$ million balance as of March 31, 2008, is comprised of: 1) five loans totaling $\$ 15.6$ million that management believes are well secured and does not anticipate any losses; 2) two real estate construction and land development loans totaling $\$ 10.9$ million and; 3) one commercial and industrial loan in the amount of $\$ 1.0$ million. Valuation allowances for the two construction and land development loans and one commercial and industrial loan totaled $\$ 3.4$ million at March 31, 2008.

Allowance for Loan Losses
The following table sets forth information regarding the Company s allowance for loan losses for the dates indicated:

## Selected ratios:

Net charge-offs (recoveries) to average loans

| (annualized) | $0.40 \%$ | $0.09 \%$ | $-0.05 \%$ |
| :--- | :---: | :---: | :---: |
| Provision for loan losses to average loans (annualized) | $1.17 \%$ | $0.25 \%$ | $0.15 \%$ |
| Allowance for loan losses to total gross loans <br> outstanding at end of period | $1.35 \%$ | $1.20 \%$ | $1.20 \%$ |
| Allowance for loan losses to total non-performing loans | $145 \%$ | $141 \%$ | $1,192 \%$ |

Due to increased charge-offs and an increase in the valuation allowance for impaired loans, the Company s allowance for loan losses increased to $\$ 19.8$ million as of March 31, 2008, compared to $\$ 17.1$ million and $\$ 15.6$ million at December 31, 2007 and March 31, 2007, respectively. As a result of these factors the Company recorded a provision of $\$ 4.2$ million for first quarter of 2008, compared to $\$ 482,000$ for the first quarter of 2007. As of March 31, 2008, the allowance for loan losses was $1.35 \%$ of total gross loans, compared to $1.20 \%$ at December 31, 2007.

Management believes the level of allowance as of March 31, 2008 is adequate to absorb the estimated losses from any known or inherent risks in the loan portfolio. However, the Company s results can be significantly influenced by changes in the credit quality of its borrowers. The Company s allowance for loan losses, OREO, charged-off loans and the provision of loan losses all increased significantly in the first quarter of 2008, compared to the same period in 2007 and the quarter ended

## Table of Contents

December 31, 2007. These increases are primarily the result of the weakening economies and deterioration of the residential real estate sectors experienced in the Company s primary markets during the second half of 2007 and continuing into the first quarter of 2008 and the effect these conditions had on its commercial and industrial, commercial real estate, residential and construction and land development loans (e.g., increased charge-offs and an increase in the valuation allowance for impaired loans). As a result, while management believes the allowance for loan losses is adequate to absorb the estimated losses from any known or inherent risks in the loan portfolio, any prolonged or further deterioration in the real estate markets with resulting declines in the value of real estate collateral may cause higher levels of non-performing assets and loan losses in future periods.

## Deposits

Total deposits increased by $\$ 88.3$ million, or $7.2 \%$, to $\$ 1.3$ billion as of March 31, 2008, from $\$ 1.2$ billion as of December 31, 2007. The increase in deposits is directly attributed to an increase in wholesale interest bearing demand deposits and wholesale time deposits, which were secured to reduce the Company s short term Federal Home Loan Bank (FHLB) borrowings and fund a substantial portion of the Company s loan growth during the first quarter of 2008. Borrowings and Junior Subordinated Debt
The Company regularly uses the FHLB for short term and long term borrowings. FHLB term debt, which matures from April 2008 through March 2009, amounted to $\$ 71.0$ million at March 31, 2008. Interest on all FHLB borrowings accrued at an average rate of $4.32 \%$ and $5.16 \%$ for the three months ended March 31, 2008 and 2007, respectively. Remaining available debt financing through the FHLB amounted to $\$ 79.3$ million at March 31, 2008.

The Company also has agreements with other lending institutions under which it can purchase up to $\$ 113.0$ million of federal funds. The interest rate charged on borrowings is determined by the lending institutions at the time of borrowings. Each line is unsecured. As of March 31, 2008 and December 31, 2007, there were no federal funds purchased.

In September 2007, the Company borrowed $\$ 15.5$ million and used the proceeds to redeem junior subordinated debt owed to Community Bancorp (NV) Statutory Trust I which used the proceeds to redeem its trust preferred issuances. The borrowing is unsecured, bears interest at the one month LIBOR plus $1.50 \%$ (equal to $4.15 \%$ at March 31, 2008), is payable in the amount of approximately $\$ 473,000$ monthly with all unpaid interest and principal due on September 26, 2010 and requires the lender s approval prior to issuing dividends to shareholders. The outstanding balance on the note was $\$ 13.4$ million and $\$ 14.3$ million as of March 31, 2008 and December 31, 2007, respectively.

The Company had aggregate of $\$ 72.2$ million of subordinated debentures outstanding at March 31, 2008, which bore interest at a rate of $6.43 \%$ for the three months ended March 31, 2008. The subordinated debentures were issued in three separate series. Each issuance has a maturity of thirty years from its date of issue. The subordinated debentures were issued to trusts established by the Company, which in turn issued trust preferred securities. The proceeds from the issuance of the securities were used to fund the Company s 2005 and 2006 acquisitions.

In accordance with FIN 46 (revised December 2004), Consolidation of Variable Interest Entities-an interpretation of ARB No. 51, statutory trusts are not reported on a consolidated basis. Therefore, the trust preferred debt securities of $\$ 70.0$ million do not appear on the Consolidated Balance Sheets. Instead, the junior subordinated debentures of $\$ 72.2$ million payable by Community Bancorp to the statutory trusts and the investment in the statutory trusts common stock of $\$ 2.2$ million (included in other assets) are reported on the Consolidated Balance Sheets.

## REGULATORY MATTERS

The regulatory capital guidelines as well as the actual capital ratios for Community Bank of Nevada, Community Bank of Arizona and the Company as of March 31, 2008 are as follows:

|  |  | Actual <br> Community |  |  | Community |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Minimum <br> Regulatory | Well <br> Capitalized | Bank of <br> Nevada | Bank of <br> Arizona | Community <br> Bancorp |
| Tier 1 leverage capital | $4.00 \%$ | $5.00 \%$ | $11.54 \%$ | $26.31 \%$ | $11.85 \%$ |
| Tier 1 risk-based capital | $4.00 \%$ | $6.00 \%$ | $11.03 \%$ | $24.73 \%$ | $11.27 \%$ |
| Total risk-based capital | $8.00 \%$ | $10.00 \%$ | $12.22 \%$ | $25.98 \%$ | $12.46 \%$ |

In March 2005, the Federal Reserve Bank adopted a final rule that allows the continued inclusion of trust preferred securities in the Tier I capital of bank holding companies, subject to stricter quantitative limits and qualitative standards. Under the final ruling, qualifying mandatory preferred securities may be included in Tier I capital, subject to a limit of $25 \%$ of all core capital. Amounts of restricted core capital elements in excess of this limit generally may be included in Tier II capital. The qualitative limits become effective on March 31, 2009, after a four-year transition period. As of March 31, 2008, the junior subordinated debentures have been included in Tier I capital for regulatory capital purposes up to the specified limit ( $\$ 70.0$ million).

## LIQUIDITY MANAGEMENT

The Company s liquidity represented by cash and due from banks, federal funds sold and available-for-sale securities, is a result of its operating, investing and financing activities and related cash flows. In order to ensure funds are available at all times, the Company devotes resources to projecting the amount of funds that will be required and maintains relationships with a diversified customer base so that funds are accessible. The Company has the ability to increase liquidity by soliciting higher levels of deposit accounts through promotional activities, wholesale funding, borrowing from its correspondent banks, and the FHLB.

Management believes the Company s liquid assets are adequate to meet its cash flow needs for loan funding and deposit withdrawals. At March 31, 2008, the Company had $\$ 91.6$ million in liquid assets comprised of $\$ 21.2$ million in cash and cash equivalents and $\$ 70.4$ million in available-for-sale securities. The $\$ 16.0$ million decrease in liquidity since December 31, 2007 was primarily a result of lower available-for-sale securities resulting from scheduled maturities which were used in part to fund the Company s 2008 loan growth.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices, interest rates, foreign currency exchange rates, commodity prices and equity prices. The Company s market risk arises primarily from interest rate risk inherent in its lending and deposit taking activities. Management uses various asset/liability strategies to manage the re-pricing characteristics of the Company searning assets and funding liabilities to ensure that exposure to interest rate fluctuations is within its guidelines of acceptable risk-taking. Hedging strategies, including the terms and pricing of loans and deposits, and managing the deployment of the Company s securities are used to reduce mismatches in interest rate re-pricing opportunities of portfolio assets and their funding sources.

Interest rate risk is addressed by our Asset Liability Management Committee ( ALCO ) which is comprised of executive officers of the Company. The ALCO monitors interest rate risk by analyzing the potential impact on the net equity value and net interest income from potential changes in interest rates, and considers the impact of alternative strategies or changes in balance sheet structure. The ALCO manages the Company s balance sheet in part to maintain, within acceptable ranges, the potential impact on net equity value and net interest income despite fluctuations in market interest rates.

Exposure to interest rate risk is reviewed on at least a quarterly basis by the ALCO and the Board of Directors. Interest rate risk exposure is measured using interest rate sensitivity analysis to determine the change in net portfolio value in the event of hypothetical changes in interest rates. If potential changes to net equity value and net interest income resulting from hypothetical interest rate changes are not within the limits established by the Board of Directors, management may adjust the asset and liability mix to bring interest rate risk within approved limits.

## Item 4. Controls and Procedures

## Evaluation of Controls and Procedures

With the participation of management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of the Company s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act )) were evaluated as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, the Company s Chief Executive Officer and Chief Financial Officer have concluded that:
(a) information required to be disclosed by the Company in this Quarterly Report on Form 10-Q and the other reports which the Company files or submits under the Exchange Act would be accumulated and communicated to the Company s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure;
(b) information required to be disclosed by the Company in this Quarterly Report on Form 10-Q and the other reports which the Company files or submits under the Exchange Act would be recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms; and
(c) the Company s disclosure controls and procedures are effective as of the end of the period covered by this Quarterly Report on Form 10-Q to ensure that material information relating to the Company and its consolidated subsidiary is made known to them, particularly during the period for which periodic reports, including this Quarterly Report on Form 10-Q, are being prepared.

## Changes in Internal Control over Financial Reporting

There were no changes during the period covered by this Quarterly Report on Form 10-Q in the Company s internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.
