For the fiscal year ended February 2, 2008

or

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES AND EXCHANGE ACT OF 1934**
For the transition period from to

Commission file number 000-49885

Kirkland s, Inc.
(Exact name of registrant as specified in its charter)

Tennessee	**62-1287151**
(State or other jurisdiction of incorporation or organization)	*(I.R.S. Employer Identification No.)*
431 Smith Lane, Jackson, Tennessee	**38301**
(Address of principal executive offices)	*(Zip Code)*

Registrant s telephone number, including area code:
(615) 872-4995

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	**Name of Each Exchange on Which Registered**
Common Stock, no par value per share	The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:
(None)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes o No þ

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes o No þ

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer o	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company þ

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes o No þ

The aggregate market value of the common stock held by non-affiliates of the registrant as of August 3rd, 2007 the last business day of the registrant s most recently completed second fiscal quarter, was approximately $25,018,239 based on the last sale price of the common stock as reported by The Nasdaq Stock Market.

As of April 11, 2008, there were 19,614,657 shares of the registrant s common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive Proxy Statement for the Annual Meeting of Shareholders of Kirkland s, Inc. to be held June 16, 2008, are incorporated by reference into Part III of this Form 10-K.

FORWARD-LOOKING STATEMENTS

This Form 10-K contains forward-looking statements within the meaning of the federal securities laws and the Private Securities Litigation Reform Act of 1995. These statements may be found throughout this Form 10-K, particularly under the headings Business and Management s Discussion and Analysis of Financial Condition and Results of Operations, among others. Forward-looking statements typically are identified by the use of terms such as may, will, should, expect, anticipate, believe, estimate, intend and similar words, although some forward-looking statem expressed differently. You should consider statements that contain these words carefully because they describe our expectations, plans, strategies and goals and our beliefs concerning future business conditions, our results of operations, financial position and our business outlook or state other forward-looking information based on currently available information. The factors listed below under the heading Risk Factors and in the other sections of this Form 10-K provide examples of risks, uncertainties and events that could cause our actual results to differ materially from the expectations expressed in our forward-looking statements.

The forward-looking statements made in this Form 10-K relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events.

The terms Kirkland s, we, us, and our as used in this Form 10-K refer to Kirkland s, Inc.

PART I

Item 1. *Business*

General

We are a specialty retailer of home décor in the United States, operating 335 stores in 35 states as of February 2, 2008. Our stores present a broad selection of distinctive merchandise, including framed art, mirrors, wall décor, candles, lamps, decorative accessories, accent furniture, textiles, garden accessories and artificial floral products. Our stores also offer an extensive assortment of holiday merchandise as well as items carried throughout the year suitable for giving as gifts. In addition, we use innovative design and packaging to market home décor items as gifts. We provide our predominantly female customers an engaging shopping experience characterized by a diverse, ever-changing merchandise selection at surprisingly attractive prices. Our stores offer a unique combination of style and value that has led to our emergence as a recognized name in home décor and has enabled us to develop a strong customer franchise. As a result, we have achieved substantial growth over our history and have expanded our store base into different regions of the country.

During the 52 weeks ended February 2, 2008 (fiscal 2007), we opened 35 new stores and closed 49 stores. All of our fiscal 2007 new stores are located in off-mall venues, and all of our closings except two stores were located in malls. We anticipate that all of our new store openings during fiscal 2008 will be in off-mall venues, while substantially all of our closings will be stores located in mall venues.

Business Strategy

Our goal is to be the leading specialty retailer of home décor in each of our markets. We believe the following elements of our business strategy differentiate us from our competitors and position us for profitable growth:

Item-focused merchandising. While our stores contain items covering a broad range of complementary product categories, we emphasize traditional style, trend-right key items within our targeted categories rather than merchandising complete product classifications. Although we do not attempt to be a fashion leader, our buyers work closely with our vendors to identify and develop stylish merchandise reflecting the latest trends and appealing to a broad base of customers. We test-market products where appropriate and monitor individual item sales, which enables us to identify and quickly reorder best selling items in order to maximize sales. We constantly evaluate market trends and merchandise sales data and work with vendors to develop additional products to be sold in our stores, frequently on an exclusive basis. In most cases, this exclusive merchandise is the result of our buying team s experience in interpreting market and merchandise trends in a way that appeals to our customer.

Ever-changing merchandise mix. We believe our ever-changing merchandise mix creates an exciting treasure hunt environment, encouraging strong customer loyalty and frequent return visits to our stores. The merchandise in our stores is typically traditionally styled for broad market appeal, yet it reflects an understanding of our customer s desire for newness. Our information systems permit close tracking of individual item sales, enabling us to react quickly to both fast-selling and slow-moving items. Accordingly, we actively change our merchandise throughout the year in response to market trends, sales results and changes in seasons. We also strategically increase selling space devoted to gifts and seasonal merchandise in advance of holidays.

Stimulating visual presentation. Our stores have a distinctive, interior design look that helps customers visualize the merchandise in their own homes and inspires decorating and gift-giving ideas. Using multiple merchandise

arrangements to simulate home settings, we group complementary merchandise creatively throughout the store. We believe this cross-category merchandising strategy encourages customers to browse for longer periods of time, promoting add-on sales.

Strong value proposition. Our customers regularly experience the satisfaction of paying noticeably less for items similar or identical to those sold by other retail stores or through other retail channels. This strategy of providing a unique combination of style and value is an important element in making Kirkland s a

3

---

destination store. While we carry items in our stores that sell for several hundred dollars, most items sell for under $20 and are perceived by our customers as very affordable home décor and gifts. Our longstanding relationships with vendors and our ability to place and sell through large orders of a single item enhance our ability to attain favorable product pricing from vendors.

Broad market appeal. Our stores operate successfully across a wide spectrum of different regions and market sizes. As of February 2, 2008, we operated stores in 35 states. Although originally focused in the Southeast, approximately 46% of our stores are now located outside that region. The flexibility of our concept enables us to select the most promising real estate opportunities that meet requisite economic and demographic criteria within our target markets where our customers live and shop.

Store Development Strategy

Our strategy on store development in previous years has been to open new stores in existing and new markets. Over the past three years, we have slowed our new store growth and decreased our overall number of stores from 347 as of the end of fiscal 2005 to 335 stores as of the end of fiscal 2007. New stores generally have been larger, off-mall stores, while store closings mostly have consisted of smaller mall stores. We anticipate that we will open substantially all of our new stores in off-mall locations. As of February 2, 2008, we had commitments to open three new stores during fiscal 2008. Depending upon the progress of the business and the available real estate opportunities, we have identified an additional three to five potential locations that we believe will create a strong positive cash flow result. These additional three to five locations represent relocations of existing productive stores that are at the end of their lease term. This plan represents the extent of our new store development for fiscal 2008, allowing our operators to concentrate more on maximizing the existing store base, rather than managing new store growth. We expect to close approximately 40 stores during the 52 weeks ending January 31, 2009 (fiscal 2008).

Our store model produces strong store-level cash flow and provides an attractive store-level return on investment. Of the 143 new stores opened during the past three fiscal years, 142 of these are located in off-mall venues. Among the group of 142 off-mall stores, 108 have been open at least a full twelve months, and their average first-year sales volume was approximately $1,400,000. These stores often generate a positive store contribution in their first full year of operation. Since fiscal 2003, when we began to focus our growth on off-mall opportunities, we have recorded higher average sales volume and store contribution from our off-mall new stores as compared to mall stores.

We use store contribution, which consists of store gross profit minus store operating expenses, as our primary measure of operating profitability for a single store or group of stores. Store contribution specifically excludes the allocation of corporate overhead and distribution costs, and therefore should not be considered comparable to operating income or other GAAP profit measures that are appropriate for assessing overall corporate financial performance. Store contribution also excludes depreciation and amortization charges. We track these non-cash charges for each store and for Kirkland s as a whole. However, we exclude these charges from store contribution in order to more closely measure the cash flow produced by each store in relation to the cash invested in that store in the form of capital assets and inventory.

Merchandising

Merchandising strategy. Our merchandising strategy is to (i) offer distinctive and often exclusive, high quality home décor at affordable prices which represent value to our customers, (ii) maintain a breadth of productive merchandise categories, (iii) provide a carefully edited selection of key items within targeted categories, rather than merchandising complete product classifications, (iv) emphasize new and fresh-to-market merchandise by continually updating our merchandise mix, and (v) present merchandise in a visually appealing manner to create an inviting atmosphere which inspires decorating and gift-giving ideas.

Our information systems permit close tracking of individual item sales, which enables us to react quickly to market trends and best or slow sellers. This daily sales and gross margin information helps us to maximize the productivity of successful products and categories, and minimize the accumulation of slow-moving

inventory. Our core merchandise assortment is consistent across the chain. We address regional differences in home décor by tailoring inventories to geographic considerations and store sales results in selected categories.

We continuously introduce new and often exclusive products to our merchandise assortment in order to (i) maintain customer interest due to the freshness of our product selections, encouraging frequent return visits to our stores, (ii) enhance our reputation as a source for identifying or developing high quality, fashionable products, and (iii) allow merchandise which has peaked in sales to be quickly discontinued and replaced by new items. In addition, we strategically increase selling space devoted to gifts and holiday merchandise during the third and fourth quarters of the calendar year. Our flexible store design and fixtures allow for selling space changes as needed to capitalize on selling trends.

Our average store generally carries approximately 2,400-2,500 Stock Keeping Units (SKUs). We regularly monitor the sell-through on each item, and therefore, the number and make-up of our active SKUs is continuously changing based on changes in selling trends. New and different SKUs are introduced to our stores constantly.

We purchase merchandise from approximately 275 vendors, and our buying team works closely with vendors to differentiate Kirkland s merchandise from that of our competitors. For products that are not manufactured specifically for Kirkland s, we may create custom packaging as a way to differentiate our merchandise offering and reinforce our brand. Exclusive or proprietary products distinguish us from our competition, enhance the value of our merchandise and provide opportunity to improve our net sales and gross margin. Our strategy is to continue to grow our exclusive and proprietary products within our merchandise mix.

Product assortment. Our major merchandise categories include wall décor (framed art, mirrors, metal and other wall ornaments), lamps, decorative accessories, candles and related items, textiles, garden accessories, and artificial floral products. Our stores also offer an extensive assortment of holiday merchandise, as well as items carried throughout the year suitable for giving as gifts. Consistent with our item-focused strategy, a vital part of the product mix is a variety of home décor and other assorted merchandise that does not necessarily fit into a specific product category. Decorative accessories consist of such varied products as vases and clocks. Other merchandise includes housewares, picture frames and miscellaneous items. Throughout the year and especially for the fourth quarter of the calendar year, our buying team uses its experience in home décor to develop products that are equally appropriate for gift-giving.

The following table presents the percentage of net sales contributed by our major merchandise categories over the last three fiscal years:

		% of Net Sales	
Merchandise Category	**Fiscal 2007**	**Fiscal 2006**	**Fiscal 2005**
Wall Décor (including framed art, mirrors, metal and other wall ornaments)	31%	29%	29%
Decorative Accessories	13	12	10
Candles	11	11	10
Accent Furniture	8	8	6
Holiday	8	7	8
Lamps	6	8	10
Textiles	6	8	9
Garden	5	5	6

Gifts	5	2	4
Other (including housewares, picture frames and other miscellaneous items)	4	5	4
Floral	3	5	4
Total	100%	100%	100%

Value to customer. Through our distinctive merchandising, together with carefully coordinated in-store marketing, visual presentation and product packaging, we continually strive to increase the perceived value of our products to our customers. Our shoppers regularly experience the satisfaction of paying noticeably less for items similar or identical to those sold by other retail stores or through catalogs. Our stores typically have two semi-annual clearance events, one in January and one in July. We also run category and other promotions periodically throughout the year. We believe our value-oriented pricing strategy, coupled with an adherence to high quality standards, is an important element in establishing our distinct brand identity and solidifying our connection with our customers.

Store Operations

General. As of February 2, 2008, we operated 335 stores in 35 states, with stores generally operating seven days a week. In addition to corporate management, two Regional Vice Presidents and approximately 20 District Team Leaders (who generally have responsibility for approximately 16 stores within a geographic district) manage store operations. A Store Team Leader and one to three Assistant Store Team Leaders manage individual stores. The Store Team Leader is responsible for the day-to-day operation of the store, including sales, guest service, merchandise display, human resource functions and store security. A typical store operates with an average of eight to 10 team members including a full-time stock person and a combination of full and part-time team members, depending on the volume of the store and the season. Additional part-time sales associates are typically hired to assist with increased traffic and sales volume in the fourth quarter of the calendar year.

Formats. We operate stores in both mall and off-mall venues. As of February 2, 2008, we operated 121 stores in enclosed malls and 214 stores in a variety of off-mall venues including lifestyle strip centers, power strip centers, outlet centers and freestanding locations. Off-mall stores tend to be larger than mall stores, and have a lower occupancy cost per square foot. The average size of our mall stores is approximately 4,700 square feet, and the average size of our off-mall stores is approximately 6,300 square feet. The average size of the new stores we opened in fiscal 2007 was approximately 7,400 square feet, and we expect our fiscal 2008 new stores to be of similar size. In fiscal 2006, we developed and implemented a new store design package which utilized new colors, surfaces, fixtures, and product positioning.

Visual merchandising. Merchandise in both mall and off-mall stores is generally displayed according to display guidelines and directives given to each store from the Marketing and Merchandising teams with input from Store Operations. This procedure promotes uniform display standards throughout the chain. Using multiple types of fixtures, we group complementary merchandise creatively throughout the store, and also display certain products strictly by category or product type.

Because of the nature of our merchandise and our focus on identifying and developing best-selling items, we emphasize our visual merchandising standards. Our Marketing and Merchandising teams provide Store Team Leaders with recommended directives such as photographs and diagrams and placement guides. Each Store Team Leader has flexibility to creatively highlight those products that are expected to have the greatest appeal to local shoppers. Effective and consistent visual merchandising enhances a store s ability to reach its full sales potential.

Personnel recruitment and training. We believe our continued success is dependent in part on our ability to attract, retain and motivate quality team members. In particular, the success of our strategy depends on our ability to promote and/or recruit qualified District and Store Team Leaders and maintain quality team members. A multi-week training program is provided for new District Team Leaders and Store Team Leaders. Many Store Team Leaders begin their Kirkland s career as sales associates, but complete a formal five week training program before taking responsibility for a store. This five week training program includes two weeks in a designated training store, working directly with a qualified Training Store Team Leader. District Team Leaders are primarily responsible for recruiting new Store Team Leaders. Store Team Leaders are responsible for the hiring and training of new team members, assisted where

appropriate by a Regional Human Resources

Manager. We constantly look for motivated and talented people to promote from within Kirkland s, in addition to recruiting outside Kirkland s.

Compensation and incentives. We compensate our Regional Vice Presidents with a base salary, plus an annual performance bonus based on overall Company performance. District and Store Team Leaders are compensated with a base salary or on an hourly basis, plus a quarterly performance bonus based on store sales, product margins, and expense control. Sales associates are compensated on an hourly basis. In addition, we periodically run a variety of contests that reward associates for outstanding achievement in sales and other corporate initiatives.

Real Estate

Strategy. Our real estate strategy is to identify retail properties that are convenient and attractive to our target female customer. The flexibility and broad appeal of our stores and our merchandise allow us to operate successfully in major metropolitan markets such as Houston, Texas and Atlanta, Georgia; middle markets such as Birmingham, Alabama, and Nashville, Tennessee; and smaller markets such as Lafayette, Louisiana, and Amarillo, Texas.

Site selection. Our current strategy is to locate our stores in off-mall venues which are destinations for large numbers of shoppers and which reinforce our quality image and brand. To assess potential new locations, we review financial and demographic criteria and infrastructure for access. We also analyze the quality and relative location of co-tenants and competitive factors, square footage availability, frontage space and other relevant criteria to determine the overall acceptability of a property and the optimal locations within it.

Until recent years, we preferred to locate stores in regional or super-regional malls with a history of high sales per square foot and multiple national department stores as anchors. Beginning in fiscal 2003, we began to explore more off-mall real estate alternatives. We have experienced better financial results in these off-mall venues, primarily due to higher sales volumes and lower occupancy costs. We also believe that our target shopper prefers the off-mall location for convenience in her home décor shopping experience. Of our 335 stores as of February 2, 2008, 214 were in a variety of off-mall venues including lifestyle strip centers, power centers, outlet centers and freestanding locations. Off-mall stores tend to be slightly larger than mall stores, and have lower occupancy cost per square foot. We currently anticipate that all of the new stores opening in fiscal 2008 will be located in off-mall venues.

We believe we are a desirable tenant to developers because of our long and successful operating history, sales productivity, ability to attract customers and our strong position with co-tenants in the home décor category. The following table provides a history of our store openings and closings by venue for the last five fiscal years.

	Fiscal 2007	Fiscal 2006	Fiscal 2005	Fiscal 2004	Fiscal 2003
Mall					
Stores open at beginning of period	168	210	241	245	231

Stores open at end of period	335	349	347	320	280

Buying and Inventory Management

Merchandise sourcing and product development. Our merchandise team purchases inventory on a centralized basis to take advantage of our consolidated buying power and our technology to closely control the merchandise mix in our stores. Our buying team selects all of our products, negotiates with vendors and works closely with our planning and allocation team to optimize store-level merchandise quantity and mix by category, classification and item. Non-exclusive merchandise may be boxed or packaged exclusively for Kirkland s utilizing Kirkland s proprietary brands.

We purchase merchandise from approximately 275 vendors. Approximately 75% of our total purchases are from importers of merchandise manufactured primarily in the Far East and India, with the balance purchased from domestic manufacturers and wholesalers. For our purchases of merchandise manufactured abroad, we have historically bought from importers or U.S.-based representatives of foreign manufacturers rather than dealing directly with foreign manufacturers. This process has enabled us to maximize flexibility and minimize product liability and credit risks. As we execute our strategy, we are continually evaluating the best ways to source and differentiate our merchandise while attaining our sales and gross margin objectives. For certain categories and items, the strategic use of domestic manufacturers and wholesalers enables us to reduce the lead times between ordering products and offering them in our stores.

Planning and allocation. Our merchandise planning and allocation team works closely with our buying team, field management and store personnel to meet the requirements of individual stores for appropriate merchandise in

sufficient quantities. This team also manages inventory levels, allocates merchandise to stores and replenishes inventory based upon information generated by our information systems. Our inventory control systems monitor current inventory levels at each store and total company. We also continually monitor recent selling history within each store by category, classification and item to properly allocate future purchases to maximize sales and gross margin.

Each of our stores is internally classified for merchandising purposes based on certain criteria including store sales, size, location and historical performance. Although all of our stores carry similar merchandise, the

variety and depth of products in a given store may vary depending on the store s rank and classification. Inventory purchases and allocation are also tailored based on regional or demographic differences between stores in selected categories.

Distribution and Logistics

We have implemented a comprehensive approach to the management of our merchandise supply chain. This approach entails a thorough evaluation of all parts of the supply chain, from merchandise vendor to the store selling floor. We have developed strategies that incorporate the needs and expertise of many different parts of the Company including logistics, merchandising, store operations, information technology, and finance. During fiscal 2003, we reached agreement to lease a new, 771,000-square-foot distribution center in Jackson, Tennessee. This building was built to our specifications and opened in May 2004.

The commencement of operations in the new distribution center was accompanied by the implementation of a new warehouse management system as well as investments in material handling equipment designed to streamline the flow of goods within the distribution center. In fiscal 2008 and beyond, our goal is to achieve better labor productivity, better transportation efficiency, leaner store-level inventories and reduced store-level storage and handling costs.

In addition to making improvements to our distribution center operation, we have taken important steps to improve our efficiency in transporting merchandise to stores. We currently utilize third-party carriers to transport merchandise from our Jackson distribution center to our stores. Prior to fiscal 2006, the majority of our merchandise deliveries were handled by either less-than-truckload (LTL) carriers or full truckload deliveries to regional pool points , with local delivery agents handling the actual store delivery function. As of the end of fiscal 2007, approximately 89% of our stores utilize a third alternative-less frequent full truckload deliveries. This alternative results in a lower cost and allows our field personnel better ability to plan the payroll needs surrounding merchandise receiving. The optimal delivery method for a given store depends on the store s sales volume, square footage, geographic location and other factors.

An important part of our efforts to achieve efficiencies, cost reductions and net sales growth is the continued identification and implementation of improvements to our planning, logistical and distribution infrastructure and our supply chain, including merchandise ordering, transportation and receipt processing. We also need to ensure that our distribution infrastructure and supply chain are kept in sync with our anticipated store count. For the foreseeable future, we believe our current distribution infrastructure is adequate to support our operational needs.

Internet

We believe the Internet offers opportunities to complement our brick-and-mortar stores, increase sales and increase consumer brand awareness of our products. We maintain a web site at www.kirklands.com, which provides our customers with a resource to locate a store, preview our merchandise, apply for a Kirkland s credit card, and purchase gift cards online. We currently do not sell any merchandise through our web site. The information contained or incorporated in our web site is not a part of this annual report on Form 10-K.

Information Systems

Our store information systems include a server in each store that runs our automated point-of-sale (POS) application on multiple POS registers. The server provides Store Team Leaders with convenient access to detailed sales and inventory information for the store. Our POS registers provide a price look-up function (all merchandise is bar-coded), time and attendance, and automated check, credit card, debit card and gift card processing. Through nightly two-way electronic communication with each store, we upload SKU-level sales, gross margin information and payroll hours to

our home office system and download new merchandise pricing, price changes for existing merchandise, purchase orders and system maintenance tasks to the store server. Based upon the evaluation of information obtained through daily polling, our planning and allocation team implements merchandising decisions regarding inventory levels, reorders, price changes and allocation of merchandise to our stores.

Table of Contents

The core of our home office information system is the integrated GERS retail management software. This system integrates all merchandising and financial applications, including category, classification and SKU inventory tracking, purchase order management, automated ticket making, general ledger, sales audit and accounts payable.

We moved into our new distribution center during the second quarter of 2004. Concurrent with this move, we implemented a new warehouse management system (WMS) designed by High Jump Software. The WMS was tailored to our specifications and provides us with a fully automated solution for all operations within the distribution center. We utilize a Lawson Software package for our payroll and human resources functions.

Marketing

Our marketing efforts emphasize in-store signage, store and window banners and displays and other techniques to attract customers and provide an exciting shopping experience. Historically, we have not engaged in extensive media advertising because we believe that we have benefited from our strategic locations in high-traffic shopping centers and valuable word-of-mouth advertising by our customers. We are actively evaluating ways to enhance our marketing to customers through media inserts and e-mail communications. We utilize marketing efforts and other in-store activity to promote specific events in our stores, including our semi-annual clearance events.

As part of our effort to reach out to customers, in fiscal 2004, we introduced our Kirkland s private-label credit card. This program is administered by a third-party, who bears the credit risk associated with the card program without recourse to us. As a cardholder, customers are automatically enrolled in a loyalty program whereby they earn loyalty points for their purchases. Customers attaining specified levels of loyalty points are eligible for special discounts on future purchases. We believe that customers using the card visit our stores and purchase merchandise more frequently as well as spend more per visit than our customers not using the card. As of February 2, 2008, there were approximately 500,000 Kirkland s private-label credit card holders.

Trademarks

All of our stores operate under the names Kirkland s , Kirkland s Home , Kirkland s Home Outlet , and Kirkland s other than 3 stores, which continue to operate under the name Briar Patch by Kirkland s. We acquired the Briar Patch stores in 1998. As these stores are remodeled or relocated, we intend to change their name to Kirkland s or Kirkland s Home.

We have registered several trademarks with the United States Patent and Trademark Office on the Principal Register that are used in connection with the Kirkland s stores, including KIRKLAND®S logo design, THE KIRKLAND COLLECTION®, HOME COLLECTION BY KIRKLAND S®, KIRKLAND S OUTLET®, KIRKLAND S HOME®, as well as several trademark registrations for Kirkland s private label brand, the CEDAR CREEK COLLECTION®. In addition to the registrations, Kirkland s also is the common law owner of the trademark BRIAR PATCH™. These marks have historically been very important components in our merchandising and marketing strategy. We are not aware of any claims of infringement or other challenges to our right to use our marks in the United States.

Competition

The retail market for home décor is highly competitive. Accordingly, we compete with a variety of specialty stores, department stores, discount stores and catalog retailers that carry merchandise in one or more categories also carried by our stores. Our product offerings also compete with a variety of national, regional and local retailers, including such specialty retailers as Bed, Bath & Beyond, Cost Plus World Market, Linens n Things, Michael s Stores, Pier 1 Imports and Williams-Sonoma. Department stores typically have higher prices than our stores for similar merchandise. Specialty retailers tend to have higher prices and a narrower assortment of home décor products.

Wholesale clubs may have lower prices than our stores, but the product assortment is generally more limited. We believe that the principal competitive factors influencing our business are merchandise quality and selection, price, customer service, visual appeal of the merchandise and the store, and the convenience of location.

The number of companies offering a selection of home décor products that overlaps generally with our product assortment has increased over the last 10 years. However, we believe that our stores still occupy a distinct niche in the marketplace: traditionally-styled merchandise, reflective of current market trends, offered at a value price combined with a unique store experience. We believe we compete effectively with other retailers due to our experience in identifying a broad collection of distinctive merchandise, pricing it to be attractive to the target Kirkland s customer, presenting it in a visually appealing manner, and providing a quality store experience.

In addition to competing for customers, we compete with other retailers for suitable store locations and qualified management personnel and sales associates. Many of our competitors are larger and have substantially greater financial, marketing and other resources than we do. See Risk Factors We face an extremely competitive specialty retail business market, and such competition could result in a reduction of our prices, adversely impacting sales and gross margin and create a loss of our market share.

Employees

We employed 3,843 employees at March 28, 2008. The number of employees fluctuates with seasonal needs. None of our employees is covered by a collective bargaining agreement. We believe our employee relations are good.

Availability of SEC Reports

We file annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and other information with the SEC. Members of the public may read and copy materials that we file with the SEC at the SEC s Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Members of the public may also obtain information on the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet web site that contains reports, proxy and information statements and other information regarding issuers, including Kirkland s, that file electronically with the SEC. The address of that site is http://www.sec.gov. Our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and other information filed by us with the SEC are available, without charge, on our Internet web site, http://www.kirklands.com, as soon as reasonably practicable after they are filed electronically with the SEC. Copies are also available, without charge, by written request to: Secretary, Kirkland s, Inc., 431 Smith Lane, Jackson, TN 38301.

Executive Officers of Kirkland s

The name, age as of March 31, 2008, and position of each of our executive officers is as follows:

Robert E. Alderson, 61, has been a Director of Kirkland s since September 1986 and has been Chief Executive Officer since February 2006. He also served as Chief Executive Officer from March 2001 to May 2005. He currently serves as President of Kirkland s, and he also served as President from February 2006 to March 2006 and as President from November 1997 to May 2005. He served as Chief Operating Officer of Kirkland s from November 1997 through March 2001 and as Senior Vice President of Kirkland s upon joining in 1986 through November 1997. He also served as Chief Administrative Officer of Kirkland s from 1986 to 1997. Prior to joining Kirkland s, Mr. Alderson was a senior partner at the law firm of Menzies, Rainey, Kizer & Alderson.

W. Michael Madden, 38, has been Senior Vice President and Chief Financial Officer since January 2008 and Vice President and Chief Financial Officer since May 2006. Prior to his appointment as Chief Financial Officer, Mr. Madden served as Vice President of Finance since May 2005. Prior to May 2005, he served as Director of Finance since July 2000. Prior to joining Kirkland s, Mr. Madden served as Assistant Controller with Trammell Crow Company and was with PricewaterhouseCoopers LLP. At PricewaterhouseCoopers, LLP, he served in positions of increasing responsibility over six years culminating as Manager-Assurance and Business Advisory Services where he

worked with various clients, public and private, in the retail and consumer products industries.

Table of Contents

No family relationships exist among any of the above-listed officers, and there are no arrangements or understandings between any of the above-listed officers and any other person pursuant to which they serve as an officer. All officers are elected to hold office for one year or until their successors are elected and qualified.

Item 1A. *Risk Factors*

Investing in our common stock involves risk. You should carefully consider the following risks, as well as the other information contained in this 10-K, including our consolidated financial statements and the related notes, before investing in our common stock.

If We Are Unable to Successfully Execute Our Turnaround Strategy, Our Results of Operations Will Not Improve.

Over the past several fiscal years, a number of key financial and operating metrics for our company have declined, including net income, operating income and comparable store sales. We have reported a net loss for the past two fiscal years, and for the first time in our history as a public company, we have reported a decline in total revenue as compared to the prior fiscal year. In order to attempt to reverse these trends, we have embarked on an operating strategy designed to improve our operating and financial performance, including improved merchandising, improved guest service, aggressive closing of underperforming stores, and expense reductions.

If our turnaround strategy is not successful, our financial and operating results are unlikely to improve, and the market value of our stock could decline.

A Prolonged Economic Downturn Could Result in Reduced Net Sales and Profitability.

Our net sales are also subject to a number of factors relating to consumer spending, including general economic conditions affecting disposable consumer income such as unemployment rates, business conditions, interest rates, levels of consumer confidence, energy prices, mortgage rates, the level of consumer debt and taxation. A weak retail environment could impact customer traffic in our stores and also adversely affect our net sales. Purchases of home décor items may decline during recessionary periods, and a prolonged recession may have a material adverse effect on our business, financial condition and results of operations. In addition, economic downturns during the last quarter of our fiscal year could adversely affect us to a greater extent than if such downturns occurred at other times of the year.

We May Not Be Able to Successfully Anticipate Consumer Trends and Our Failure to Do So May Lead to Loss of Consumer Acceptance of Our Products Resulting in Reduced Net Sales.

Our success depends on our ability to anticipate and respond to changing merchandise trends and consumer demands in a timely manner. If we fail to identify and respond to emerging trends, consumer acceptance of the merchandise in our stores and our image with our customers may be harmed, which could reduce customer traffic in our stores and materially adversely affect our net sales. Additionally, if we misjudge market trends, we may significantly overstock unpopular products and be forced to take significant inventory markdowns, which would have a negative impact on our gross profit and cash flow. Conversely, shortages of items that prove popular could reduce our net sales. In addition, a major shift in consumer demand away from home décor could also have a material adverse effect on our business, results of operations and financial condition.

The Market Price for Our Common Stock Might Be Volatile and Could Result in a Decline in the Value of Your Investment.

The price at which our common stock trades may be volatile. The market price of our common stock could be subject to significant fluctuations in response to our operating results, general trends and prospects for the retail industry,

announcements by our competitors, analyst recommendations, our ability to meet or exceed analysts or investors expectations, the condition of the financial markets and other factors. In addition, the stock market in recent years has experienced extreme price and volume fluctuations that often

have been unrelated or disproportionate to the operating performance of companies. These fluctuations, as well as general economic and market conditions, may adversely affect the market price of our common stock notwithstanding our actual operating performance.

Our Comparable Store Net Sales Fluctuate Due to a Variety of Factors.

Numerous factors affect our comparable store net sales results, including among others, weather conditions, retail trends, the retail sales environment, economic conditions, the impact of competition and our ability to execute our business strategy efficiently. Our comparable store net sales results have historically experienced fluctuations, and in the past several years, we have experienced declines in comparable store sales. Our comparable store net sales may not increase from quarter to quarter and may continue to decline. As a result, the unpredictability of our comparable store net sales may cause our revenues and operating results to vary quarter to quarter, and an unanticipated decline in revenues or comparable store net sales may cause the price of our common stock to fluctuate significantly.

We Face an Extremely Competitive Specialty Retail Business Market, and Such Competition Could Result in a Reduction of Our Prices and a Loss of Our Market Share.

The retail market is highly competitive. We compete against a diverse group of retailers, including specialty stores, department stores, discount stores and catalog retailers, which carry merchandise in one or more categories also carried by us. Our product offerings also compete with a variety of national, regional and local retailers, including such specialty retailers as Bed, Bath & Beyond, Cost Plus World Market, Linens n Things, Michaels Stores, Pier 1 Imports and Pottery Barn. We also compete with these and other retailers for suitable retail locations, suppliers, qualified employees and management personnel. One or more of our competitors are present in substantially all of the markets in which we have stores. Many of our competitors are larger and have significantly greater financial, marketing and other resources than we do. This competition could result in the reduction of our prices and a loss of our market share. Our net sales are also impacted by store liquidations of our competitors. We believe that our stores compete primarily on the basis of merchandise quality and selection, price, visual appeal of the merchandise and the store and convenience of location.

We Depend on a Number of Vendors to Supply Our Merchandise, and Any Delay in Merchandise Deliveries from Certain Vendors May Lead to a Decline in Inventory Which Could Result in a Loss of Net Sales.

We purchase our products from approximately 275 vendors with which we have no long-term purchase commitments or exclusive contracts. None of our vendors supplied more than 10% of our merchandise purchases during fiscal 2007. Historically, we have retained our vendors and we have generally not experienced difficulty in obtaining desired merchandise from vendors on acceptable terms. However, our arrangements with these vendors do not guarantee the availability of merchandise, establish guaranteed prices or provide for the continuation of particular pricing practices. Our current vendors may not continue to sell products to us on current terms or at all, and we may not be able to establish relationships with new vendors to ensure delivery of products in a timely manner or on terms acceptable to us. In addition, our recent unfavorable financial performance may make it difficult for some of our vendors to arrange for the financing or factoring of their orders with manufacturers, which could result in our inability to obtain desired merchandise from those vendors.

We may not be able to acquire desired merchandise in sufficient quantities on terms acceptable to us in the future. Also, our business would be adversely affected if there were delays in product shipments to us due to freight difficulties, strikes or other difficulties at our principal transport providers or otherwise. We have from time to time experienced delays of this nature. We are also dependent on vendors for assuring the quality of merchandise supplied to us. Our inability to acquire suitable merchandise in the future or the loss of one or more of our vendors and our failure to replace any one or more of them may harm our relationship with our customers resulting in a loss of net

sales.

We Are Dependent on Foreign Imports for a Significant Portion of Our Merchandise, and Any Changes in the Trading Relations and Conditions Between the United States and the Relevant Foreign Countries May Lead to a Decline in Inventory Resulting in a Decline in Net Sales, or an Increase in the Cost of Sales Resulting in Reduced Gross Profit.

Most of our merchandise is purchased through vendors in the United States who import the merchandise from foreign countries including China and India. Our vendors are subject to the risks involved with relying on products manufactured abroad, and we remain subject to those risks to the extent that their effects are passed through to us by our vendors or cause disruptions in supply. These risks include changes in import duties, quotas, loss of most favored nation trading status with the United States for a particular foreign country, work stoppages, delays in shipments, freight cost increases, terrorism, war, economic uncertainties (including inflation, foreign government regulations and political unrest) and trade restrictions (including the United States imposing antidumping or countervailing duty orders, safeguards, remedies or compensation and retaliation due to illegal foreign trade practices). If any of these or other factors were to cause a disruption of trade from the countries in which the suppliers of our vendors are located, our inventory levels may be reduced or the cost of our products may increase.

Historically, instability in the political and economic environments of the countries in which our vendors obtain our products has not had a material adverse effect on our operations. However, we cannot predict the effect that future changes in economic or political conditions in such foreign countries may have on our operations. Although we believe that we could access alternative sources in the event of disruptions or delays in supply due to economic, political or health conditions in foreign countries on our vendors, such disruptions or delays may adversely affect our results of operations unless and until alternative supply arrangements could be made. In addition, merchandise purchased from alternative sources may be of lesser quality or more expensive than the merchandise we currently purchase abroad.

Countries from which our vendors obtain these products may, from time to time, impose new or adjust prevailing quotas or other restrictions on exported products, and the United States may impose new duties, quotas and other restrictions on imported products. This could disrupt the supply of such products to us and adversely affect our operations. The United States Congress periodically considers other restrictions on the importation of products obtained for us by vendors. The cost of such products may increase for us if applicable duties are raised or import quotas with respect to such products are imposed or made more restrictive.

We are also subject to the risk that the manufacturers abroad who ultimately manufacture our products may employ labor practices that are not consistent with acceptable practices in the United States. In any such event we could be hurt by negative publicity with respect to those practices and, in some cases, face liability for those practices.

Our Success Is Highly Dependent on Our Planning and Control Processes and Our Supply Chain, and Any Disruption in or Failure to Continue to Improve These Processes May Result in a Loss of Net Sales and Net Income.

An important part of our efforts to achieve efficiencies, cost reductions and net sales growth is the continued identification and implementation of improvements to our planning, logistical and distribution infrastructure and our supply chain, including merchandise ordering, transportation and receipt processing. In addition, recent increases in energy prices have resulted, and are expected to continue to result, in increased merchandise and freight costs, which cannot readily be offset through higher prices because of competitive factors.

A significant portion of the distribution to our stores is coordinated through our distribution facility in Jackson, Tennessee. Any significant disruption in the operations of this facility would have a material adverse effect on our ability to maintain proper inventory levels in our stores which could result in a loss of net sales and net income.

Our Business Is Highly Seasonal and Our Fourth Quarter Contributes a Disproportionate Amount of Our Net Sales, Net Income and Cash Flow, and Any Factors Negatively Impacting Us During Our Fourth Quarter Could Reduce Our Net Sales, Net Income and Cash Flow, Leaving Us with Excess Inventory and Making It More Difficult for Us to Finance Our Capital Requirements.

We have experienced, and expect to continue to experience, substantial seasonal fluctuations in our net sales and operating results, which are typical of many specialty retailers and common to most retailers generally. Due to the importance of the fall selling season, which includes Thanksgiving and Christmas, the last quarter of our fiscal year has historically contributed, and is expected to continue to contribute, a disproportionate amount of our net sales, net income and cash flow for the entire fiscal year. We expect this pattern to continue during the current fiscal year and anticipate that in subsequent fiscal years, the last quarter of our fiscal year will continue to contribute disproportionately to our operating results and cash flow. Any factors negatively affecting us during the last quarter of our fiscal year, including unfavorable economic or weather conditions, could have a material adverse effect on our financial condition and results of operations, reducing our cash flow, leaving us with excess inventory and making it more difficult for us to finance our capital requirements.

We May Experience Significant Variations in Our Quarterly Results.

Our quarterly results of operations may also fluctuate significantly based upon such factors as the timing of new store openings, pre-opening expenses associated with new stores, the relative proportion of new stores to mature stores, net sales contributed by new stores, increases or decreases in comparable store net sales, adverse weather conditions, shifts in the timing of holidays, the timing and level of markdowns, changes in fuel and other shipping costs, changes in our product mix and actions taken by our competitors.

The Agreement Governing Our Debt Places Certain Reporting and Consent Requirements on Us Which May Affect Our Ability to Operate Our Business in Accordance with Our Business Strategy.

Our senior credit facility contains a number of covenants requiring us to report to our lender or to obtain our lender s consent in connection with certain activities we may wish to pursue in the operation of our business. These requirements may affect our ability to operate our business and consummate our business strategy and may limit our ability to take advantage of potential business opportunities as they arise. These requirements affect our ability to, among other things:

- incur additional indebtedness;
- create liens;
- pay dividends or make other distributions;
- make investments;
- sell assets;
- enter into transactions with affiliates;
- repurchase capital stock; and
- enter into certain mergers and consolidations.

The senior credit facility has one financial covenant. This covenant requires us to maintain excess availability, as defined in our credit agreement, of at least $3 million to $4.5 million depending upon the size of our borrowing base. Any failure to comply with this or other covenants would allow the lenders to accelerate repayment of their debt, prohibit further borrowing under the facility, declare an event of default, take possession of their collateral or take other actions available to a secured senior creditor.

If compliance with our debt obligations materially hinders our ability to operate our business and adapt to changing industry conditions, we may lose market share, our revenue may decline and our operating results

may suffer. This could have a material adverse effect on the market value and marketability of our common stock.

We Are Highly Dependent on Customer Traffic in Malls and Shopping Centers, and Any Reduction in the Overall Level of Traffic Could Reduce Our Net Sales and Increase Our Sales and Marketing Expenses.

We rely heavily on the ability of mall and shopping center anchor tenants and other tenants to generate customer traffic in the vicinity of our stores. Historically, we have not relied on extensive media advertising and promotion in order to attract customers to our stores. Our future operating results will also depend on many other factors that are beyond our control, including the overall level of traffic and general economic conditions affecting consumer confidence and spending. Any significant reduction in the overall level of traffic could reduce our net sales.

Our Hardware and Software Systems Are Vulnerable to Damage that Could Harm Our Business.

We rely upon our existing information systems for operating and monitoring all major aspects of our business, including sales, warehousing, distribution, purchasing, inventory control, merchandise planning and replenishment, as well as various financial functions. These systems and our operations are vulnerable to damage or interruption from:

- fire, flood and other natural disasters;

- power loss, computer systems failures, internet and telecommunications or data network failure, operator negligence, improper operation by or supervision of employees, physical and electronic loss of data or security breaches, misappropriation and similar events; and

- computer viruses.

Any disruption in the operation of our information systems, the loss of employees knowledgeable about such systems or our failure to continue to effectively modify such systems could interrupt our operations or interfere with our ability to monitor inventory, which could result in reduced net sales and affect our operations and financial performance. We also need to ensure that our systems are consistently adequate to handle our anticipated store growth and are upgraded as necessary to meet our needs. The cost of any such system upgrades or enhancements would be significant.

We Depend on Key Personnel, and if We Lose the Services of Any Member of Our Senior Management Team, We May Not Be Able to Run Our Business Effectively.

We have benefited substantially from the leadership and performance of our senior management team. Our success will depend on our ability to retain our current senior management members and to attract and retain qualified personnel in the future. Competition for senior management personnel is intense and there can be no assurances that we will be able to retain our personnel. The loss of a member of senior management would require the remaining executive officers to divert immediate and substantial attention to seeking a replacement.

Our Charter and Bylaw Provisions and Certain Provisions of Tennessee Law May Make It Difficult in Some Respects to Cause a Change in Control of Kirkland s and Replace Incumbent Management.

Our charter authorizes the issuance of blank check preferred stock with such designations, rights and preferences as may be determined from time to time by our Board of Directors. Accordingly, the Board of Directors is empowered, without shareholder approval, to issue preferred stock with dividend, liquidation, conversion, voting or other rights that could materially adversely affect the voting power or other rights of the holders of our common stock. Holders of the common stock do not have preemptive rights to subscribe for a pro rata portion of any capital stock which may be issued by us. In the event of issuance, such preferred stock could be utilized, under certain circumstances, as a method

of discouraging, delaying or preventing a change

---

in control of Kirkland s. Although we have no present intention to issue any new shares of preferred stock, we may do so in the future.

Our charter and bylaws contain certain corporate governance provisions that may make it more difficult to challenge management, may deter and inhibit unsolicited changes in control of Kirkland s and may have the effect of depriving our shareholders of an opportunity to receive a premium over the prevailing market price of our common stock in the event of an attempted hostile takeover. First, the charter provides for a classified Board of Directors, with directors (after the expiration of the terms of the initial classified board of directors) serving three year terms from the year of their respective elections and being subject to removal only for cause and upon the vote of 80% of the voting power of all outstanding capital stock entitled to vote (the Voting Power). Second, our charter and bylaws do not generally permit shareholders to call, or require that the Board of Directors call, a special meeting of shareholders. The charter and bylaws also limit the business permitted to be conducted at any such special meeting. In addition, Tennessee law permits action to be taken by the shareholders by written consent only if the action is consented to by holders of the number of shares required to authorize shareholder action and if all shareholders entitled to vote are parties to the written consent. Third, the bylaws establish an advance notice procedure for shareholders to nominate candidates for election as directors or to bring other business before meetings of the shareholders. Only those shareholder nominees who are nominated in accordance with this procedure are eligible for election as directors of Kirkland s, and only such shareholder proposals may be considered at a meeting of shareholders as have been presented to Kirkland s in accordance with the procedure. Finally, the charter provides that the amendment or repeal of any of the foregoing provisions of the charter mentioned previously in this paragraph requires the affirmative vote of at least 80% of the Voting Power. In addition, the bylaws provide that the amendment or repeal by shareholders of any bylaws made by our Board of Directors requires the affirmative vote of at least 80% of the Voting Power.

Furthermore, Kirkland s is subject to certain provisions of Tennessee law, including certain Tennessee corporate takeover acts that are, or may be, applicable to us. These acts include the Investor Protection Act, the Business Combination Act and the Tennessee Greenmail Act, and these acts seek to limit the parameters in which certain business combinations and share exchanges occur. The charter, bylaws and Tennessee law provisions may have an anti-takeover effect, including possibly discouraging takeover attempts that might result in a premium over the market price for our common stock.

Concentration of Ownership among Our Existing Directors, Executive Officers, and Their Affiliates May Prevent New Investors from Influencing Significant Corporate Decisions.

As of the date of this filing, our current directors, executive officers and their affiliates, in the aggregate, beneficially own approximately 42% of our outstanding common stock. As a result, these shareholders are able to exercise a controlling influence over matters requiring shareholder approval, including the election of directors and approval of significant corporate transactions, and will have significant control over our management and policies. These shareholders may support proposals and actions with which you may disagree or which are not in your interests.

Item 2. ***Properties***

We lease all of our store locations and expect to continue our practice of leasing rather than owning. Our leases for mall stores typically provide for 10-year terms, many with the ability for us (or the landlord) to terminate the lease at specified points during the term if net sales at the leased premises do not reach a certain annual level. Our leases for off-mall stores typically provide for terms ranging from 5 to 10 years. Many of our leases provide for payment of percentage rent (i.e., a percentage of net sales in excess of a specified level) and the rate of increase in key ancillary charges is generally capped.

As current leases expire, we believe we will be able either to obtain lease renewals if desired for present store locations or to obtain leases for equivalent or better locations in the same general area. To date, we have not experienced unusual difficulty in either renewing leases for existing locations or securing leases for

Table of Contents

suitable locations for new stores. A majority of our store leases contain provisions permitting the landlord to terminate the lease upon a change in control of Kirkland s.

We own a building in Jackson, Tennessee formerly used as our corporate headquarters, which consists of approximately 40,000 square feet of office space which we intend to sell. We currently lease one central distribution facility, consisting of 771,000 square feet, also located in Jackson, Tennessee. This lease has a 15-year initial term, with two five-year options. On March 1, 2007, we entered into an Office Lease Agreement, effective as of March 1, 2007 with a landlord, whereby we leased 27,547 square feet of office space in Nashville, Tennessee for a seven-year term. The Agreement provides for annual rent beginning at $13 per square foot for the first year and increasing each year to $15.45 per square foot in the last year. The Agreement also includes an option to renew the lease for an additional seven years, with the rent for such option period to be at the then-current market rental rate. The office houses the merchandising and marketing, store operations and real estate teams, as well as certain other senior management personnel.

Table of Contents

The following table indicates the states where our stores are located and the number of stores within each state as of February 2, 2008:

State	Stores
Alabama	18
Arizona	12
Arkansas	7
California	10
Colorado	2
Connecticut	2
Delaware	1
Florida	46
Georgia	19
Illinois	7
Indiana	7
Iowa	1
Kansas	2
Kentucky	8
Louisiana	11
Maryland	5
Massachusetts	2
Michigan	3
Minnesota	4
Mississippi	11
Missouri	6
Nebraska	3
Nevada	3
New Jersey	3
New York	7
North Carolina	20
Ohio	7
Oklahoma	5
Pennsylvania	10
South Carolina	8
Tennessee	15
Texas	53
Utah	1
Virginia	13
Wisconsin	3
Total	335

Item 3. ***Legal Proceedings***

We are involved in various routine legal proceedings incidental to the conduct of our business. We believe any resulting liability from existing legal proceedings, individually or in the aggregate, will not have a material adverse effect on our operations or financial condition.

Item 4. ***Submission of Matters to a Vote of Security Holders***

We did not submit any matters to a vote of security holders during the fourth quarter of fiscal 2007.

PART II

Item 5. ***Market for Registrant s Common Equity and Related Shareholder Matters***

Our common stock is listed on The Nasdaq Stock Market under the symbol KIRK. We commenced trading on The Nasdaq Stock Market on July 11, 2002. On April 3, 2008, there were approximately 98 holders of record, and approximately 1,850 beneficial owners, of our common stock. The following table sets forth the high and low last sale prices of our common stock for the periods indicated.

	Fiscal 2007		Fiscal 2006	
	High	**Low**	**High**	**Low**
First Quarter	$ 5.68	$ 4.50	$ 7.74	$ 4.95
Second Quarter	$ 5.24	$ 2.20	$ 6.88	$ 5.05
Third Quarter	$ 2.13	$ 0.95	$ 5.25	$ 4.18
Fourth Quarter	$ 1.11	$ 0.58	$ 5.64	$ 4.40

Dividend Policy

We intend to retain all future earnings to finance the continued growth and development of our business, and do not, therefore, anticipate paying any cash dividends on our common stock in the foreseeable future. In addition, our senior credit facility restricts the payment of cash dividends. There have been no dividends declared on any class of our common stock during the past two fiscal years. Future cash dividends, if any, will be determined by our Board of Directors and will be based upon our earnings, capital requirements, financial condition, debt covenants and other factors deemed relevant by our Board of Directors.

Item 7. ***Management s Discussion and Analysis of Financial Condition and Results of Operations***

The following discussion should be read with our consolidated financial statements and related notes included elsewhere in this annual report on Form 10-K. A number of the matters and subject areas discussed in Management s Discussion and Analysis of Financial Condition and Results of Operations and Business and elsewhere in this annual report on Form 10-K are not limited to historical or current facts and deal with potential future circumstances and developments and are accordingly forward-looking statements. You are cautioned that such forward-looking statements, which may be identified by words such as anticipate, believe, expect, estimate, intend, plan and s expressions, are only predictions and that actual events or results may differ materially.

Our fiscal year is comprised of the 52 or 53-week period ending on the Saturday closest to January 31. Accordingly, fiscal 2007 represented 52 weeks ended on February 2, 2008. Fiscal 2006 represented 53 weeks ended on February 3, 2007.

Introduction

We are a specialty retailer of home décor in the United States, operating 335 stores in 35 states as of February 2, 2008. Our stores present a broad selection of distinctive merchandise, including framed art, mirrors, wall décor, candles,

lamps, decorative accessories, accent furniture, textiles, garden accessories and artificial floral products. Our stores also offer an extensive assortment of holiday merchandise, as well as items carried throughout the year suitable for giving as gifts. For the fiscal year ended February 2, 2008, we recorded total revenues of $396.7 million, which included approximately $772,000 related to gift certificate and gift card breakage.

Our stores offer a unique combination of style and value that has led to our emergence as a recognized name in home décor and has enabled us to develop a strong customer franchise. As a result, we have achieved

substantial growth over our history and have expanded our store base into different regions of the country. During the past nine years, we have more than doubled our store base, principally through new store openings. During the 52 weeks ended February 2, 2008 (fiscal 2007), we opened 35 new stores and closed 49 stores. All of our fiscal 2007 new stores are located in off-mall venues, and all of our closings except two stores were located in malls.

Overview of Key Financial Measures

Net sales and gross profit are the most significant drivers to our operating performance. Net sales consists of all merchandise sales to customers, net of estimated returns and exclusive of sales taxes. Our net sales for fiscal 2007 decreased by 10.7% to $395.9 million from $443.2 million in fiscal 2006, including the extra week in the fiscal 2006 retail calendar. The additional week included in the 2006 fiscal calendar accounted for approximately $8 million in sales. The sales comparison was also impacted by the changes in our store count. During fiscal 2007, we opened 35 new stores and closed 49 stores. Comparable store sales declined 13.3% for fiscal 2007. We use comparable store sales to measure our ability to achieve sales increases from stores that have been open for at least 13 full fiscal months. Increases in comparable store sales are an important factor in maintaining or increasing the profitability of existing stores.

Gross profit is the difference between total revenue and cost of sales. Cost of sales has four distinct components: product cost (including inbound freight), outbound freight cost, store occupancy cost and central distribution cost. Product cost comprises the majority of cost of sales, while central distribution cost is the least significant of these four elements. Product and freight cost are variable, while occupancy and distribution costs are largely fixed. Accordingly, gross profit expressed as a percentage of total revenue can be influenced by many factors including overall sales performance. For fiscal 2007, gross profit decreased 19.0% to $113.7 million from $140.4 million for fiscal 2006. Gross profit includes the recognition of $772,000 and $3.6 million in gift certificate and gift card breakage revenue in fiscal 2007 and 2006, respectively. During the fourth quarter of fiscal 2006, we completed a review of our historical redemption patterns related to gift certificates and gift cards, and initially recorded $3.6 million in breakage revenue. Gross margin for fiscal 2007 decreased to 28.7% of total revenue from 31.4% of total revenue for fiscal 2006, primarily due to the recognition of the $3.6 million in gift certificate and gift card breakage revenue in fiscal 2006 and higher levels of markdowns during fiscal 2007.

Operating expenses, including the costs of operating our stores and corporate headquarters, are also an important component of our operating performance. Compensation and benefits comprise the majority of our operating expenses. Operating expenses contain fixed and variable costs, and managing the operating expense ratio (operating expenses expressed as a percentage of net sales) is an important focus of management as we seek to maintain or increase our overall profitability. Operating expenses include cash costs as well as non-cash costs such as depreciation and amortization. Due to the significant fixed cost component of operating expenses, as well as the tendency of many operating costs to rise over time, increases in comparable store sales are typically necessary in order to prevent meaningful increases in the operating expense ratio. Operating expenses can also include certain costs that are of a one-time or non-recurring nature. While these costs must be considered to understand fully our operating performance, we typically identify such costs separately where significant on the consolidated statement of operations so that we can evaluate comparable expense data across different periods.

A complete evaluation of our financial performance incorporates not only operating results, but also an assessment of how effectively we are deploying our capital. We believe that a high return on capital is an indicator of a financially productive business. Accordingly, we evaluate our earnings in relation to inventories and total assets in order to determine if we are achieving acceptable levels of return on our capital. Inventory yield (gross profit divided by average inventories) and return on assets (net income divided by total assets) are two of the measures we use.

We use a number of key performance measures to evaluate our financial performance, including the following:

	Fiscal Year	
	2007	2006
Net sales growth(1)	(10.7)%	6.8%
Comparable store sales growth(2)	(13.3)%	(6.6)%
Average net sales per store (in thousands)(3)	$ 1,126	$ 1,272
Average net sales per square foot(4)	$ 202	$ 247
Merchandise margins as a percentage of net sales(5)	48.4%	50.1%
Gross profit as a percentage of net sales	28.7%	31.7%
Compensation and benefits as a percentage of net sales	18.5%	17.5%
Other operating expenses as a percentage of net sales	10.7%	10.1%
Inventory yield(6)	226.0%	275.0%
Return on assets (ROA)(7)	(21.4)%	(0.1)%

(1) Fiscal 2006 results reflect a 53-week retail calendar, while fiscal 2007 reflects a 52-week retail calendar.

(2) Fiscal 2007 and fiscal 2006 comparable store sales are adjusted for the additional week included in the retail calendar for fiscal 2006. Comparable store sales are calculated by including new stores on the first day of the month following the 13th full fiscal month of sales.

(3) Calculated using net sales of all stores open at both the beginning and the end of the period indicated.

(4) Calculated using the gross square footage of all stores open at both the beginning and the end of the period. Gross square footage includes the storage, receiving and office space that generally occupies approximately 30% of total store space.

(5) Merchandise margin is calculated as net sales minus product cost of sales, excluding outbound freight, store occupancy, and central distribution costs.

(6) Inventory yield is defined as gross profit including gift certificate and gift card breakage divided by average inventory for each of the preceding four quarters.

(7) Return on assets equals net income including gift certificate and gift card breakage divided by total assets.

Strategic Areas of Emphasis

The downturn in our financial performance for the last three fiscal years has primarily resulted from declining comparable store sales and cumulative decreases in our merchandise margin. Accordingly, a central area of emphasis for fiscal 2008 is improving the productivity of our merchandise assortment through comparable store sales increases and improvements in our product margin. This effort encompasses process improvement in identifying and growing appealing merchandise, planning and product allocation, enhancement of merchandising personnel and department structure, and evaluation of competitive factors.

In response to the underperformance of our merchandising assortment, we have shifted our focus in buying from enhancing our style through themed merchandise presentations to a straightforward effort focused on stand-alone

items, priced-right initially to promote immediate customer attention to the value proposition. This effort will be supported by a renewed emphasis and execution to ensure a constant flow of new items to promote an ever-changing mix of inventory. We believe that our customers respond best to a frequently-changing mix of items at value prices, promoting more regular visits and ultimately increasing traffic counts through word-of-mouth. Our efforts in merchandising will support the delivery of this store experience to the customer in 2008.

Another important area of emphasis is enhancing the store experience by improving guest service. Given a competitive retail environment, our in-store guest experience is a key differentiator. Training and store-level incentives for achievement of guest-service goals and metrics will be a focus for us in fiscal 2008. We will measure our success in these initiatives through monitoring key performance metrics including comparable

stores sales, conversion rate (transactions divided by traffic count), average dollar transaction, employee turnover rate, and results from our mystery shopping program.

The decrease in our store base during fiscal 2007 reflects our focus on aggressively closing underperforming stores and a slowed pace of new store growth. The closing of unproductive stores will be a key focus of our fiscal 2008 strategy. As of the end of fiscal 2007, there were approximately 108 stores through mid-2009 with expiring leases or other opportunities to exit locations at no cash cost to the Company. We are evaluating each of these properties closely, with cash flow and profitability being the key determinants in our ultimate course of action. Through this evaluation, we expect to close approximately 40 stores in fiscal 2008.

As of February 2, 2008, we had commitments to open three new stores during fiscal 2008. Depending upon the progress of the business and the available real estate opportunities, we have identified an additional three to five potential locations that we believe will create a strong positive cash flow result. These additional three to five locations represent relocations of existing productive stores that are at the end of their lease term. This plan represents the extent of our new store development for fiscal 2008, allowing our operators to concentrate more on maximizing the existing store base, rather than managing new store growth. Capital expenditures related to new stores are expected to be in the range of $2.5 to $3 million as compared to $13.1 million in fiscal 2007.

The following table summarizes our stores and square footage under lease in mall and off-mall locations as of February 2, 2008 and February 3, 2007:

		As of February 2, 2008			As of February 3, 2007	
	Mall	**Off-Mall**	**Total**	**Mall**	**Off-Mall**	**Total**
Number of Stores	121	214	335	168	181	349
Square footage	581,930	1,345,891	1,990,167	809,337	1,095,425	1,904,762
Average square footage per store	4,809	6,289	5,941	4,817	6,052	5,458

		For the Fiscal Year Ended February 2, 2008			For the Fiscal Year Ended February 3, 2007	
	Mall	**Off-Mall**	**Total**	**Mall**	**Off-Mall**	**Total**
Average net sales per store (in thousands)(1)	$ 994	$ 1,216	$ 1,126	$ 1,180	$ 1,388	$ 1,272
Average net sales per square foot(1)(2)	$ 211	$ 200	$ 204	$ 250	$ 245	$ 247

(1) Calculated using net sales of all stores open at both the beginning and the end of the period indicated.

(2) The decrease in net sales per square foot from fiscal 2007 to 2006 was due primarily to the comparable store sales decrease coupled with a higher average square footage per store in fiscal 2007.

Another important area of emphasis will be inventory management. We plan to operate the business at an inventory level that supports the trends of the business, careful not to harm the ability to drive sales. We have been able to consistently maintain good liquidity, in part due to our success in inventory management and keeping the levels of investment in line with business trends.

As part of our late 2007 efforts to improve the Company s liquidity and manage the business during a period of difficulty, we took action to reduce the fixed overhead costs in the business. This will continue to be an important focus in 2008. During 2008, we expect a year-over-year reduction in our corporate operating expenses of approximately $3.5 million as a result of personnel restructuring activities and other cost reductions that occurred during the second half of fiscal 2007.

Our cash balances decreased from $25.4 million at February 3, 2007 to $5.8 million at February 2, 2008 primarily due to our negative comparable store sales performance during fiscal 2007. Our objective is to finance all of our operating and investing activities for fiscal 2008 with cash provided by operations,

borrowings under our revolving credit line, and to the extent available the sale of our corporate airplane and our former headquarters building in Jackson, TN. We have also filed for a tax refund in the amount of $2.9 million as a result of our ability to carry-back losses from 2007 to the previous two tax years. We expect that capital expenditures for fiscal 2008 will range from $3 to $5 million, primarily to fund the leasehold improvements of approximately three to eight new stores and maintain our investments in existing stores, our distribution center and information technology infrastructure.

Fiscal 2007 Compared to Fiscal 2006

Results of operations. The table below sets forth selected results of our operations in dollars and expressed as a percentage of total revenue for the periods indicated (dollars in thousands):

	Fiscal 2007		Fiscal 2006		Change	
	$	%	$	%	$	%
Net sales	$ 395,929	99.8%	$ 443,248	99.2%	$ (47,319)	(10.7)%
Gift certificate and gift card breakage revenue	772	0.2%	3,580	0.8%	(2,808)	(78.4)%
Total revenue	396,701	100.0%	446,828	100.0%	(50,127)	(11.2)%
Cost of sales	283,040	71.3%	306,469	68.6%	(23,429)	(7.6)%
Gross profit	113,661	28.7%	140,359	31.4%	(26,698)	(19.0)%
Operating expenses:						
Compensation and benefits	73,392	18.5%	77,465	17.3%	(4,073)	(5.3)%
Other operating expenses	42,363	10.7%	44,800	10.0%	(2,437)	(5.4)%
Impairment charge	3,453	0.9%	688	0.2%	2,765	401.9%
Depreciation and amortization	20,391	5.1%	18,084	4.0%	2,307	12.8%
Operating income (loss)	(25,938)	(6.5)%	(678)	0.2%	(25,260)	(3,725.7)%
Interest (income) expense, net	440	0.1%	(14)	0.0%	454	3,242.9%
Other income, net	(112)	0.0%	(507)	(0.1)%	395	77.9%
Income (loss) before income taxes	(26,266)	(6.6)%	(157)	0.0%	(26,109)	(16,629.9)%
Income tax provision (benefit)	(360)	(0.1)%	(17)	0.0%	(343)	(2,017.6)%
Net income (loss)	$ (25,906)	(6.5)%	$ (140)	0.0%	$ (25,766)	(18,404.3)%

Net sales. Net sales decreased by 10.7% to $395.9 million for fiscal 2007 from $443.2 million for fiscal 2006. The net sales decrease in fiscal 2007 resulted primarily from the decrease in comparable store sales. We opened 35 new stores in fiscal 2007 and 49 new stores in fiscal 2006, and we closed 49 stores in fiscal 2007 and 47 stores in fiscal 2006. During fiscal 2007, comparable store sales decreased 13.3% as compared to a 6.6% decrease in fiscal 2006. Comparable store sales in our mall store locations were down 14.1% for the year, while comparable store sales for our

off-mall store locations were down 12.7%. The comparable store sales decline resulted from several factors, including a difficult sales environment in the home décor retail sector and weak customer traffic trends. The overall traffic declines led to lower transaction volumes. Customer conversion rates were also lower as compared to prior year. The lower transaction volumes also included a lower average dollar transaction, driven by a decrease in our average retail selling price and a slight decrease in items per transaction. Most of our key merchandise categories experienced negative comparable store sales declines during fiscal 2007. The negative comparable store sales performance accounted for a $46.8 million decrease in net sales from the prior year including the additional retail week in fiscal 2006 which amounted to approximately $8 million in net sales.

Gift certificate and gift card breakage revenue. Revenues from our gift certificates and gift cards are recognized when tendered for payment and included in Net sales. While we will continue to honor all gift certificates and gift cards presented for payment, we determine the likelihood of redemption to be remote for certain gift certificates and gift card balances due to, among other things, long periods of inactivity. In fiscal

2006, the Company began using the Redemption Recognition Method to account for breakage for unused gift card and gift certificate amounts where breakage is recognized as gift certificates or gift cards are redeemed for the purchase of goods based upon a historical breakage rate. In these circumstances, to the extent we determine there is no requirement for remitting certificate or card balances to government agencies under unclaimed property laws, breakage is recognized in the consolidated statement of operations as a component of revenue. After completing a review of our historical redemption patterns during the fourth quarter of fiscal 2006, we recognized an initial $3.6 million of revenue and operating income related to gift certificate and gift card breakage. Approximately $772,000 of revenue and operating income was recognized during fiscal 2007. There was no revenue recognized on unredeemed gift certificates or gift card balances prior to fiscal 2006 because sufficient data was not available during those periods to support an alternative position.

Gross profit. Gross profit decreased $26.7 million, or 19.0%, to $113.7 million for fiscal 2007 from $140.4 million for fiscal 2006. Gross profit expressed as a percentage of total revenue decreased to 28.7% for fiscal 2007, from 31.4% for fiscal 2006. The decrease in gross profit as a percentage of total revenue was primarily driven by lower merchandise margins due to higher levels of promotional activity and markdowns as compared to the prior year as well as the impact of the initial recognition of gift certificate and gift card breakage revenue in fiscal 2006. Merchandise margins as a percentage of net sales declined from 50.1% in fiscal 2006 to 48.4% in fiscal 2007. Increased markdowns were necessary throughout the year to clear through an unproductive merchandise assortment. This, combined with an increase in promotional activity and poor performance in our holiday seasonal assortment, led to the margin decline. Store occupancy costs during fiscal 2007 were $54.3 million, or 13.7% of total revenue versus $54.9 million, or 12.3% of total revenue in fiscal 2006. The increase as a percent of total revenue was primarily due to the de-leveraging of fixed rental costs due to the sales decline. Freight expenses decreased as a percentage of total revenue despite rising fuel costs as we realized savings throughout the year due to the implementation of changes in our store delivery methods. Central distribution costs were slightly higher as a percentage of net sales for the year due to the decrease in sales.

Compensation and benefits. Compensation and benefits, including both store and corporate personnel, was $73.4 million, or 18.5% of total revenue, for fiscal 2007 as compared to $77.5 million, or 17.3% for fiscal 2006. The increase in the compensation and benefits ratio was primarily due to the negative comparable store sales performance. At the store level, payroll costs increased as a percentage of total revenue versus the prior year due to the comparable store sales decline and our inability to reduce hours enough to offset the impact and still maintain proper store coverage. At the corporate level, during the third quarter of fiscal 2007, we incurred a charge related to separation costs associated with a restructuring of corporate personnel. This charge totaled approximately $965,000, or $0.04 per share. We also incurred a charge during the fourth quarter of fiscal 2007 related to the separation costs associated with the departure of our former President and Chief Operating Officer. This charge totaled approximately $412,000, but was offset by a reversal of previously recorded stock compensation in the amount of $353,000 related to a forfeited restricted stock grant associated with this separation. In the prior year, we incurred a pre-tax expense of approximately $400,000 related to the termination of our former Chief Executive Officer and a pre-tax expense of approximately $728,000 related to a post-retirement benefit agreement with our current Chief Executive Officer.

Other operating expenses. Other operating expenses, including both store and corporate costs, were $42.4 million, or 10.7% of total revenue, for fiscal 2007 as compared to $44.8 million, or 10.0% of total revenue, for fiscal 2006. The increase in these operating expenses as a percentage of net sales was primarily the result of the negative comparable store sales performance and the de-leveraging effect on the fixed components of store and corporate operating expenses. Store-level operating expenses increased slightly as a percentage of total revenue due to higher utility costs related to our larger off-mall stores and increases in insurance expense. These increases were partly offset by a change in estimate regarding breakage associated with discount certificates issued to our private-label credit card customers. Corporate-level operating expenses were slightly higher as a percentage of total revenues compared to prior year. This increase reflects the one time costs of $1.3 million related to the opening of a satellite office in Nashville, Tennessee.

Impairment charge. During fiscal 2007, we incurred a non-cash charge related to the impairment of fixed assets related to certain underperforming stores in the pre-tax amount of approximately $2.1 million, or

$0.11 per share, compared with $688,000, or $0.02 per share in fiscal 2006. During the fourth quarter of fiscal 2007, we incurred a goodwill impairment charge of approximately $1.4 million, or $0.07 per share, as the fair value of the business was estimated to be less than the carrying value of our net assets as of February 2, 2008.

Depreciation and amortization. Depreciation and amortization expense was $20.4 million, or 5.1% of total revenue, for fiscal 2007 as compared to $18.1 million, or 4.0% of total revenue, for fiscal 2006. The increase in depreciation and amortization was the result of new store openings in fiscal 2006 and 2007 and acceleration of depreciation on planned store closings totaling approximately $500,000.

Interest expense, net. Net interest expense increased as a result of higher average revolver borrowings in fiscal 2007 and lower interest rates on invested cash.

Other income, net. Other income was lower than the prior year primarily due to the receipt of insurance proceeds in fiscal 2006 of approximately $284,000 related to property damage caused by Hurricane Katrina.

Income tax benefit. Income tax benefit was 1.4% of the loss before income taxes for fiscal 2007 as compared to a benefit of 10.8% of the loss before income taxes for the prior year period. The reduction in our tax rate for fiscal 2007 is primarily the result of an increase in the valuation allowance against our net deferred tax assets of approximately $8.2 million.

We evaluate the realizability of our deferred tax assets on an ongoing basis, considering all available positive and negative evidence, including the reversal patterns of assets and liabilities, past financial results, future taxable income projections and on-going prudent and feasible tax planning strategies. A significant factor impacting this evaluation was our cumulative losses in recent periods.

Net income (loss). As a result of the foregoing, we reported a net loss of $25.9 million, or $(1.33) per diluted share for fiscal 2007 compared to $140,000, or $(0.01) per diluted share for fiscal 2006.

Liquidity and Capital Resources

Our principal capital requirements are for working capital and capital expenditures. Working capital consists mainly of merchandise inventories offset by accounts payable, which typically reach their peak by the end of the third quarter of each fiscal year. Capital expenditures primarily relate to new store openings; existing store expansions, remodels or relocations; and purchases of equipment or information technology assets for our stores, distribution facilities or corporate headquarters. Historically, we have funded our working capital and capital expenditure requirements with internally generated cash and borrowings under our credit facility.

Cash flows from operating activities. Net cash provided by (used in) operating activities was $(4.9) million and $29.5 million for fiscal 2007 and fiscal 2006, respectively. Net cash provided by (used in) operating activities depends heavily on operating performance, changes in working capital and the timing and amount of payments for income taxes. The change in the amount of cash from operations as compared to the prior year period was primarily the result of the decline in our operating performance resulting from the 13.3% decrease in our comparable store sales and the decline in profit margin. Inventories decreased approximately $3.5 million during fiscal 2007 as compared to a decrease of $4.4 million during the prior year period. Inventories averaged approximately $123,000 per store at February 2, 2008, as compared to $128,000 per store at February 3, 2007. Accounts payable decreased $4.8 million during fiscal 2007 as compared to a decrease of $3.7 million for the prior year period. The change in accounts payable is primarily due to the timing and amount of merchandise receipt flow.

Cash flows from investing activities. Net cash used in investing activities for fiscal 2007 consisted principally of $14.8 million in capital expenditures as compared to $19.5 million for the prior year period. These expenditures primarily related to the opening of new stores. During fiscal 2007, we opened 35 new stores. We expect that capital expenditures for all of fiscal 2008 will range from $3 million to $5 million, primarily to fund the maintenance of our existing investments in stores, information technology, and the distribution center, as well as the opening of three to eight new stores. As of February 2, 2008, we had lease commitments to three new stores. We anticipate that capital expenditures, including leasehold improvements

and furniture and fixtures, and equipment for our new stores in fiscal 2008 will average approximately $400,000 to $430,000 per store. We anticipate that we will continue to receive landlord allowances, which help to reduce our cash invested in leasehold improvements. These allowances are reflected as a component of cash flows from operating activities within our consolidated statement of cash flows.

Cash flows from financing activities. Net cash provided by financing activities was $0.1 million and $0.4 million for fiscal 2007 and fiscal 2006, respectively. Cash flows from financing activities for fiscal 2007 were primarily comprised of borrowings and repayments under our revolving credit facility. The facility was drawn to a peak of $21.1 million and paid down to zero by the end of the fiscal year. During fiscal 2006, cash flows from financing activities also primarily related to bank revolver activity. We borrowed to a peak of $13.2 million and paid down to zero by the end of the year for fiscal 2006.

Revolving credit facility. Effective October 4, 2004, we entered into a five-year senior secured revolving credit facility with a revolving loan limit of up to $45 million. On August 6, 2007, we entered into the First Amendment to Loan and Security Agreement (the Amendment) which provided the Company with additional availability under our borrowing base through higher advance rates on eligible inventory. As a result of the amendment, the aggregate size of the overall credit facility remained unchanged at $45 million, but the term of the facility was extended two years making the new expiration date October 4, 2011. Amounts outstanding under the amended revolving credit facility, other than First In Last Out (FILO) loans, bear interest at a floating rate equal to the 60-day LIBOR rate (3.11% at February 2, 2008) plus 1.25% to 1.50% (depending on the amount of excess availability under the borrowing base). FILO loans, which apply to the first approximate $2 million borrowed at any given time, bear interest at a floating rate equal to the 60-day LIBOR rate plus 2.25% to 2.5% (depending on the amount of excess availability under the borrowing base). Additionally, we pay a quarterly fee to the bank equal to a rate of 0.2% per annum on the unused portion of the revolving line of credit. Borrowings under the facility are collateralized by substantially all of our assets and guaranteed by our subsidiaries. The maximum availability under the credit facility is limited by a borrowing base formula, which consists of a percentage of eligible inventory and receivables less reserves. The facility also contains provisions that could result in changes to the presented terms or the acceleration of maturity. Circumstances that could lead to such changes or acceleration include a material adverse change in the business or an event of default under the credit agreement. The facility has one financial covenant that requires the Company to maintain excess availability under the borrowing base, as defined in the credit agreement, of at least $3 to $4.5 million depending on the size of the borrowing base, at all times.

As of February 2, 2008, we were in compliance with the covenants in the facility and there were no outstanding borrowings under the credit facility, with approximately $22.1 million available for borrowing (net of the availability block as described above).

At February 2, 2008, our balance of cash and cash equivalents was approximately $5.8 million and the borrowing availability under our facility was $22.1 million (net of the availability block as described above). During fiscal 2007, we undertook a number of measures to reduce expenses and improve liquidity, including corporate headcount reductions, slowing store growth, closing underperforming stores, commencing the sale of non-productive assets, enhancing and maximizing our existing credit facility, and reducing our planned inventory needs. We also filed for an income tax refund in the amount of $2.9 million during the first quarter of fiscal 2008. Our plan for fiscal 2008 contemplates incurring additional operating losses; however, we believe that cash flow from operations, including the impact of the aforementioned initiatives, coupled with funds received from the sale of assets and the collection of the tax refund will result in peak borrowings that are lower than the prior year and will be sufficient to fund our planned capital expenditures and working capital requirements for at least the next twelve months.

Seasonality and Quarterly Results

We have historically experienced and expect to continue to experience substantial seasonal fluctuations in our net sales and operating income. We believe this is the general pattern typical of our segment of the retail industry and, as a result, expect that this pattern will continue in the future. Our quarterly results of operations may also fluctuate significantly as a result of a variety of other factors, including the timing of new store openings, net sales contributed by new stores, shifts in the timing of certain holidays and competition. Consequently, comparisons between quarters are not necessarily meaningful and the results for any quarter are not necessarily indicative of future results.

Our strongest sales period is the fourth quarter of our fiscal year when we generally realize a disproportionate amount of our net sales and a substantial majority of our operating and net income. In anticipation of the increased sales activity during the fourth quarter of our fiscal year, we purchase large amounts of inventory and hire temporary staffing help for our stores. Our operating performance could suffer if net sales were below seasonal norms during the fourth quarter of our fiscal year.

The following table sets forth certain unaudited financial and operating data for Kirkland s in each fiscal quarter during fiscal 2007 and fiscal 2006. The unaudited quarterly information includes all normal recurring adjustments that we consider necessary for a fair statement of the information shown. Fiscal 2006 results reflect a 53-week retail calendar, while fiscal 2007 reflects a 52-week retail calendar.

	Fiscal 2007 Quarter Ended			
	May 5, 2007	August 4, 2007	November 3, 2007	February 2, 2008

Basic	(0.16)	(0.29)	(0.15)	0.59
Diluted	(0.16)	(0.29)	(0.15)	0.58
Stores open at end of period	338	342	356	349

Comparable store net sales decrease	(5.1)%	(9.0)%	(6.7)%	(6.1)%

(1) During the third quarter of fiscal 2007, we incurred a charge totaling approximately $965,000, or $0.04 per share, related to separation costs associated with a restructuring of corporate personnel. During the first, second and fourth quarters of fiscal 2007, we incurred non-cash charges related to the impairment of fixed assets related to certain underperforming stores in the pre-tax amount of approximately $273,000, $540,000, and $1,259,000, respectively. During the fourth quarter of fiscal 2007, we incurred a goodwill impairment charge of approximately $1.4 million, or $0.07 per share.

(2) The income tax benefit was 1.4% of the loss before income taxes for fiscal 2007 as compared to a benefit of 10.8% of the loss before income taxes for the prior year period. The tax rate for fiscal 2007 is the result of our ability to carry-back fiscal 2007 s losses to the two previous tax years resulting in a benefit of approximately $2.9 million. During the first quarter of fiscal 2007 we recorded an adjustment of approximately $353,000, or $0.02 per diluted share, to correct the prior year income tax provision for deferred tax liabilities related to fixed assets. Also included in fiscal 2007 s income tax benefit is an adjustment made in the second quarter to record a valuation allowance against our net deferred tax assets of approximately $2.8 million, or $0.14 per diluted share. During Q3, the Company recorded income tax expense of $1.8 million despite a pretax loss during the quarter of $8.8 million as a result of increasing our expected pretax loss for the year compared to what had been estimated in previous quarters determination of the effective tax rate which reduced the income tax benefit for the quarter $3.7 million. This continued in Q4 as our results were again lower than expected resulting in a change in the estimate of our effective tax rate for the year which increased income tax expense for the quarter $2.9 million.

(3) Total revenue includes the initial revenue recognized on unredeemed gift certificates and gift cards of $3.6 million in the fourth quarter of fiscal 2006 pursuant to the Company s use of the Redemption Recognition Method. There was no revenue recognized on unredeemed gift certificates or gift card balances prior to fiscal 2006.

(4) During the second quarter of fiscal 2006, we experienced an increased level of markdown activity which resulted in a lower gross profit when compared to the first and third quarter of the fiscal year.

(5) During the fourth quarter of fiscal 2006, the Company recorded a change in estimate of $1.4 million related to the breakage of discount certificates issued to its private label credit card customers, which has been recorded as an increase in other operating expenses, resulting in an increase in net loss of $0.04 per diluted share.

Inflation

We do not believe that our operating results have been materially affected by inflation during the preceding three fiscal years. There can be no assurance, however, that our operating results will not be adversely affected by inflation in the future.

Recent Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company does not expect the adoption of SFAS No. 157 to have a material effect on its financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Liabilities. This statement permits entities to choose to measure many financial instruments and certain other items at fair value. If the fair value option is elected, unrealized gains and losses will be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material effect on its financial statements.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and the results of our operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates that affect the reported amounts contained in the financial statements and related disclosures. We base our estimates on historical experience and on various other assumptions which are believed to be reasonable under the circumstances. Actual results may differ from these estimates. Our critical accounting policies are discussed in the notes to our consolidated financial statements. Certain judgments and estimates utilized in implementing these accounting policies are likewise discussed in the notes to our consolidated financial statements. The following discussion aggregates the various critical accounting policies

addressed throughout the financial statements, the judgments and uncertainties affecting the application of these policies and the likelihood that materially different amounts would be reported under varying conditions and assumptions.

Cost of sales (excluding depreciation and amortization) and inventory valuation Cost of sales includes all costs of product purchased from vendors, including inbound freight to the extent that it is not included in the vendor pricing. Receiving costs, inspection costs, warehousing costs, internal transfer costs, outbound freight, and all overhead associated with our distribution facility and its network are included in the cost of sales. Our cost of sales also includes store occupancy costs. Our inventory is stated at the lower of cost or market, net of reserves and allowances, with cost determined using the average cost method with average cost approximating current cost. We estimate the amount of shrinkage that has occurred through theft or damage and adjust that to actual at the time of our physical inventory counts which occur throughout the fiscal year. We also evaluate the cost of our inventory by category and class of merchandise in relation to the estimated sales price. This evaluation is performed to ensure that we do not carry inventory at a value in excess of the amount we expect to realize upon the sale of the merchandise. We believe we have the appropriate merchandise valuation and pricing controls in place to minimize the risk that our inventory values would be materially misstated.

Impairments In accordance with the provisions of Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS 144), we evaluate the recoverability of the carrying amounts of long-lived assets, such as property and equipment, covered by this standard whenever events or changes in circumstances dictate that the carrying value may not be recoverable. As part of the evaluation, we review performance at the store level to identify any stores with current period cash flow losses that should be considered for impairment. We compare the sum of the undiscounted expected future cash flows with the carrying amounts of the assets. If impairment is indicated by the above evaluation, the amount by which the carrying amount of the assets exceeds the fair value of the assets is recognized as an impairment loss where fair value is estimated based on discounted expected future cash flows. Cash flows for retail assets are identified at the individual store level. Our judgments regarding a store s ability to realize undiscounted cash flows in excess of the carrying amounts of store assets are affected by factors such as the ongoing maintenance and improvements of the assets, changes in economic conditions and changes in operating performance. As we assess the ongoing expected cash flows and carrying amounts of our long-lived assets, these factors could cause us to realize material impairment charges.

Based on the estimated fair values of certain long-lived assets, we have recorded impairment charges of $2.1 million and $688,000 during fiscal 2007 and fiscal 2006, respectively.

Depreciation Approximately 52% of our assets at February 2, 2008, represent investments in property and equipment. Determining appropriate depreciable lives requires judgments and estimates.

We utilize the straight-line method of depreciation and a variety of depreciable lives. Land is not depreciated. Buildings are depreciated over 40 years. Furniture, fixtures and equipment are generally depreciated over 5 years. Computer software and equipment is depreciated over 3-5 years. Leasehold improvements are amortized over the shorter of the useful lives of the assets or the original non-cancelable lease term. Our lease terms typically range from 5 to 10 years.

To the extent we replace or dispose of fixtures or equipment prior to the end of its assigned depreciable life, we could realize a loss or gain on the disposition. To the extent our assets are used beyond their assigned depreciable life, no depreciation expense is being realized. We reassess the depreciable lives in an effort to reduce the risk of significant losses or gains arising from either the disposition of our assets or the utilization of assets with no depreciation charges.

Insurance reserves Workers compensation, general liability and employee medical insurance programs are partially self-insured. It is our policy to record a self-insurance liability using estimates of claims incurred but not yet reported or paid, based on historical claims experience and trends. Actual results can vary from estimates for many reasons, including, among others, inflation rates, claim settlement patterns, litigation trends and legal interpretations. We monitor our claims experience in light of these factors and revise our estimates

of insurance reserves accordingly. The level of our insurance reserves may increase or decrease as a result of these changing circumstances or trends.

Income taxes We record income tax liabilities utilizing known obligations and estimates of potential obligations. A deferred tax asset or liability is recognized whenever there are future tax effects from existing temporary differences and operating loss and tax credit carryforwards. We record a valuation allowance to reduce deferred tax assets to the balance that is more likely than not to be realized. We must make estimates and judgments on future taxable income, considering feasible tax planning strategies and taking into account existing facts and circumstances, to determine the proper valuation allowance. When we determine that deferred tax assets could be realized in greater or lesser amounts than recorded, the asset balance and income statement reflects the change in the period such determination is made. Due to changes in facts and circumstances and the estimates and judgments that are involved in determining the proper valuation allowance, differences between actual future events and prior estimates and judgments could result in adjustments to this valuation allowance. We use an estimate of our annual effective tax rate at each interim period based on the facts and circumstances available at that time while the actual effective tax rate is calculated at year-end.

Stock options and warrants As of January 29, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment (SFAS 123(R)) which requires us to value and record, as compensation expense, stock awards granted to employees under a fair value based method.

SFAS 123(R) applies to new awards and to awards modified, repurchased or canceled after January 28, 2006 and to those which were unvested at January 28, 2006. We have adopted SFAS 123(R) utilizing the modified prospective transition method which requires share-based compensation expense recognized since January 28, 2006, to be based on the following: a) grant date fair value estimated in accordance with the original provisions of SFAS 123 for unvested options granted prior to the adoption date; b) grant date fair value estimated in accordance with the provisions of SFAS 123(R) for options granted subsequent to the adoption date; and c) the discount on shares purchased by employees through our employee stock purchase plan post-adoption, which represents the difference between the grant date fair value and the employee purchase price. This compensation expense was recorded in the statements of operations with a corresponding credit to common stock.

We use the Black-Scholes-Merton option pricing model which requires the input of highly subjective assumptions. These assumptions include estimating the length of time employees will retain their stock options before exercising them (expected term), the estimated volatility of our common stock price over the expected term and the number of options that will ultimately not complete their vesting requirements (forfeitures). Changes in the subjective assumptions can materially affect the estimate of fair value of stock-based compensation and consequently, the related amount recognized in the consolidated statements of operations.

Item 8. ***Financial Statements and Supplementary Data***

The financial statements and schedules are listed under Item 15(a) and filed as part of this annual report on Form 10-K.

The supplementary financial data is set forth under Item 7 of this annual report on Form 10-K.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

None

Item 9A. ***Controls and Procedures***

Evaluation of Disclosure Controls and Procedures

We have established and maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized, and reported within the

time periods specified in the Securities and Exchange Commission s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the date of such evaluation.

Management s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of our internal control over financial reporting as of February 2, 2008 based on the *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, our management concluded that our internal control over financial reporting was effective as of February 2, 2008.

This annual report does not include an attestation report of our independent registered public accounting firm regarding internal control over financial reporting. Management s report was not subject to attestation by our independent registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management s report in this annual report.

Changes in Internal Control Over Financial Reporting

There have been no changes in internal controls over financial reporting identified in connection with the foregoing evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. ***Other Information***

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Kirkland s, Inc.

We have audited the accompanying consolidated balance sheets of Kirkland s, Inc. as of February 2, 2008 and February 3, 2007, and the related consolidated statements of operations, shareholders equity, and cash flows for each of the two years in the period ended February 2, 2008. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company s internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Kirkland s, Inc. as of February 2, 2008 and February 3, 2007, and the consolidated results of its operations and its cash flows for each of the two years in the period ended February 2, 2008, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 4 to the consolidated financial statements, the Company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109, effective February 4, 2007.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Description of Business and Significant Accounting Policies

Kirkland s, Inc. (the Company) is a specialty retailer of home décor with 335 stores in 35 states as of February 2, 2008. The consolidated financial statements of the Company include the accounts of Kirkland s, Inc. and its wholly-owned subsidiaries Kirkland s Stores, Inc. and Kirklands.com, Inc. Significant intercompany accounts and transactions have been eliminated.

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used.

Changes in estimates are recognized in the period when new information becomes available to management. Areas where the nature of the estimate makes it reasonably possible that actual results could materially differ from amounts estimated include: impairment assessments on long-lived assets (including goodwill), inventory reserves, self-insurance reserves, income tax liabilities, stock-based compensation, gift certificate and gift card breakage, customer loyalty program accruals and contingent liabilities.

Fiscal year The Company s fiscal year is comprised of the 52 or 53-week period ending on the Saturday closest to January 31. Accordingly, fiscal 2007 represented 52 weeks ended on February 2, 2008 and fiscal 2006 represented 53 weeks ended on February 3, 2007.

Cash equivalents Cash and cash equivalents consist of cash on deposit in banks and investments with maturities of 90 days or less at the date of purchase.

Cost of sales and inventory valuation Cost of sales includes all costs of product purchased from vendors, including inbound freight to the extent that it is not included in the vendor pricing. Receiving costs, inspection costs, warehousing costs, internal transfer costs, outbound freight, and all overhead associated with our distribution facility and its network are included in cost of sales. Our cost of sales also includes store occupancy costs. Our inventory is stated at the lower of cost or market, net of reserves and allowances, with cost determined using the average cost method with average cost approximating current cost. We estimate the amount of shrinkage that has occurred through theft or damage and adjust that to actual at the time of our physical inventory counts which occur throughout the fiscal year. We also evaluate the cost of our inventory by category and class of merchandise in relation to the estimated sales price. This evaluation is performed to ensure that we do not carry inventory at a value in excess of the amount we expect to realize upon the sale of the merchandise.

Vendor allowances We receive various payments and allowances from our vendors, including rebates and other credits. The amounts received are subject to the terms of vendor agreements, which generally do not state an expiration date, but are subject to ongoing negotiations that may be impacted in the future based on changes in market conditions and changes in the profitability, quality, or sell-through of the related merchandise. For all such vendor allowances, the Company applies the guidance pursuant to the Emerging Issues Task Force Issue No. 02-16, Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor (EITF 02-16), by recording the vendor funds as a reduction of inventories that are recognized as a reduction to cost of sales as the inventories are sold. The Company s vendor funding arrangements generally do not provide for any reimbursement arrangements that are for specific, incremental, identifiable costs that are permitted under EITF 02-16 for the funding

to be recorded as a reduction to advertising or other operating, selling, general and administrative expenses.

Prepaid expenses and other current assets Prepaid expenses and other current assets consist primarily of prepaid rent, prepaid insurance and receivables from landlords for tenant allowances. Tenant allowance receivables were $2,865,000 and $635,000 at February 2, 2008, and February 3, 2007, respectively.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Property and equipment Property and equipment are stated at cost. Depreciation is computed on a straight-line basis over the estimated useful lives of the respective assets. Furniture, fixtures and equipment are generally depreciated over 5 years. Buildings are depreciated over 40 years. Leasehold improvements are amortized over the shorter of the useful life of the asset or the expected lease term ranging from five to 10 years. Maintenance and repairs are expensed as incurred and improvements are capitalized. Gains or losses on the disposition of fixed assets are recorded upon disposal.

Impairment of long-lived assets In accordance with the provisions of Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS 144), we evaluate the recoverability of the carrying amounts of long-lived assets, such as property and equipment, covered by this standard whenever events or changes in circumstances dictate that the carrying value may not be recoverable. As part of the evaluation, we review performance at the store level to identify any stores with current period cash flow losses that should be considered for impairment. We compare the sum of the undiscounted expected future cash flows with the carrying amounts of the assets. If impairment is indicated by the above evaluation, the amount by which the carrying amount of the assets exceeds the fair value of the assets is recognized as an impairment loss where fair value is estimated based on discounted expected future cash flows. Cash flows for retail assets are identified at the individual store level. Our judgments regarding a store s ability to realize undiscounted cash flows in excess of the carrying amounts of store assets are affected by factors such as the ongoing maintenance and improvements of the assets, changes in economic conditions and changes in operating performance. As we assess the ongoing expected cash flows and carrying amounts of long-lived assets, these factors could cause the Company to realize material impairment charges.

The Company recorded impairment charges of $2,072,000, and $688,000 during fiscal 2007 and fiscal 2006, respectively, which represents the impairment of the leasehold improvements, furniture and fixtures, and equipment of certain underperforming stores. As of February 2, 2008, and February 3, 2007, these stores had a remaining carrying value of long-lived assets totaling $1,343,000 and $647,000, respectively.

Goodwill The Company accounts for its goodwill in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. Accordingly, goodwill is not amortized but reviewed for impairment on an annual basis during each fourth quarter or more frequently when events and circumstances indicate that an impairment may have occurred. During the fourth quarter of fiscal 2007, we incurred a charge of approximately $1,381,000 relating to goodwill recorded in connection with a prior acquisition as the fair value of the business was estimated to be less than the carrying value of the net assets as of February 2, 2008.

Insurance reserves Workers compensation, general liability and employee medical insurance programs are partially self-insured. It is our policy to record a self-insurance liability using estimates of claims incurred but not yet reported or paid, based on historical claims experience and trends. Actual results can vary from estimates for many reasons, including, among others, inflation rates, claim settlement patterns, litigation trends and legal interpretations. We monitor our claims experience in light of these factors and revise our estimates of insurance reserves accordingly. The level of our insurance reserves may increase or decrease as a result of these changing circumstances or trends.

Customer loyalty program The Company has established a private-label credit card program for its customers. The card program is operated and managed by a third-party bank that assumes all credit risk with no recourse to the Company. All cardholders are automatically enrolled in a loyalty program whereby cardholders earn loyalty points in return for making purchases in the Company s stores. Attaining specified loyalty point levels results in the issuance of

discount certificates to the cardholder. The Company accrues for the expected liability associated with the discount certificates issued as well as the accumulated points that have not yet resulted in the issuance of a certificate adjusted for expected redemption rates. This liability is included within accrued expenses on the consolidated balance sheet and the changes to the liability are included within other operating expenses on the consolidated statements of operations. During the fourth quarter of fiscal 2007, the Company recorded a change of estimate of $655,000, $0.03 per diluted share,

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

reducing the liability related to the anticipated breakage of discount certificates issued to its private label credit card customers. During the fourth quarter of fiscal 2006, the Company recorded a change of estimate of $1.4 million ($864,000 after tax), or $0.04 per diluted share increasing the liability.

Deferred rent Many of the Company s operating leases contain predetermined fixed escalations of minimum rentals during the initial term. Additionally, the Company does not typically pay rent during the construction period for its new stores. For these leases, the Company recognizes the related rental expense on a straight-line basis over the life of the lease commencing with the date of initial access to the leased space, and records the difference between amounts charged to operations and amounts paid as a liability. The cumulative net excess of recorded rent expense over lease payments totaled $7.9 million, of which $886,000 was reflected as a current liability in accrued expenses and $7.0 million was reflected as a noncurrent liability in deferred rent on the consolidated balance sheet as of February 2, 2008. As of February 3, 2007, $1.3 million was reflected as a current liability in accrued expenses and $6.8 million was reflected as a noncurrent liability in deferred rent on the consolidated balance sheet.

The Company also receives incentives from landlords in the form of construction allowances. These construction allowances are recorded as deferred rent and amortized as a reduction to rent expense over the lease term. As of February 2, 2008, the unamortized amount of construction allowances totaled $35.6 million, of which $8.1 million was reflected as a current liability in accrued expenses and $27.5 million was reflected as a noncurrent liability in deferred rent on the consolidated balance sheet. As of February 3, 2007, $6.0 million was reflected as a current liability in accrued expenses and $24.9 was reflected as a noncurrent liability in deferred rent on the consolidated balance sheet.

Revenue recognition The Company recognizes revenue at the time of sale of merchandise to customers. Net sales include the sale of merchandise, net of estimated returns and exclusive of sales taxes.

Revenues from our gift certificates and gift cards are recognized as revenue when tendered for payment. While the Company will continue to honor all gift certificates and gift cards presented for payment, the Company determines the likelihood of redemption to be remote for certain gift certificates and gift card balances due to, among other factors, long periods of inactivity. In fiscal 2006, the Company began using the Redemption Recognition Method to account for breakage for unused gift card and gift certificate amounts where breakage is recognized as gift certificates or gift cards are redeemed for the purchase of goods based upon a historical breakage rate. In these circumstances, to the extent the Company determines there is no requirement for remitting certificate or card balances to government agencies under unclaimed property laws, gift certificate and gift card balances are recognized in the consolidated statement of operations as revenue. After completing a review of its historical redemption patterns, the Company recognized an initial $3.6 million of revenue and operating income related to gift certificate and gift card breakage during fiscal 2006. The Company recognized approximately $772,000 in gift certificate and gift card breakage during fiscal 2007. There was no revenue recognized on unredeemed gift certificates or gift card balances prior to fiscal 2006 because sufficient data was not available during those periods to support an alternative position.

Compensation and benefits Compensation and benefits includes all store and corporate office salaries and wages and incentive pay as well as employee health benefits, 401(k) plan benefits, social security and unemployment taxes. During the third quarter of fiscal 2007, the Company incurred a charge related to separation costs associated with a restructuring of corporate personnel. This charge totaled approximately $965,000, representing the elimination of certain corporate positions, including field multi-unit management positions and positions at the Company s Jackson and Nashville corporate offices. There were other charges related to other executive severance during the year totaling

approximately $528,000. Payments made against these charges were approximately $610,000 during fiscal 2007 leaving a payable remaining of approximately $883,000 at February 2, 2008. The Company does not anticipate any additional charges related to these events.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock options and warrants As of January 29, 2006, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment (SFAS 123(R)) which requires the Company to value and record, as compensation expense, stock awards granted to employees under a fair value based method.

SFAS 123(R) applies to new awards and to awards modified, repurchased or canceled after January 28, 2006 and to those awards which are unvested at January 28, 2006. The Company adopted SFAS 123(R) utilizing the modified prospective transition method which required share-based compensation expense recognized since January 28, 2006, to be based on the following: a) grant date fair value estimated in accordance with the original provisions of SFAS 123 for unvested options granted prior to the adoption date; b) grant date fair value estimated in accordance with the provisions of SFAS 123(R) for options granted subsequent to the adoption date; and c) the discount on shares purchased by employees through our employee stock purchase plan post-adoption, which represents the difference between the purchase date fair value and the employee purchase price. This compensation expense is recorded within compensation and benefits in the statements of operations with a corresponding credit to common stock.

Other operating expenses Other operating expenses consist of such items as insurance, advertising, property taxes, supplies, losses on disposal of assets and various other store and corporate expenses.

Preopening expenses Preopening expenses, which consist primarily of payroll and occupancy costs, are expensed as incurred.

Advertising expenses Advertising costs are expensed in the period in which the related advertising activity first takes place. Advertising expense was $4,897,000 and $4,296,000 for fiscal years 2007 and 2006, respectively.

Other income, net Other (income) expense consists of sales tax rebates of $(193,000) and $(213,000) for fiscal years 2007 and 2006, respectively, and other miscellaneous (income) expense of $81,000 and $(294,000) for fiscal years 2007 and 2006, respectively.

Income Taxes Deferred tax assets and liabilities are recognized based on the differences between the financial statement and the tax law treatment of certain items. Realization of certain components of deferred tax assets is dependent upon the occurrence of future events. The Company records valuation allowances to reduce its deferred tax assets to the amount it believes is more likely than not to be realized. These valuation allowances can be impacted by changes in tax laws, changes to statutory tax rates, and future taxable income levels and are based on the Company s judgment, estimates, and assumptions regarding those future events. In the event the Company were to determine that it would not be able to realize all or a portion of the net deferred tax assets in the future, the Company would increase the valuation allowance through a charge to income tax expense in the period that such determination is made. Conversely, if the Company were to determine that it would be able to realize its deferred tax assets in the future, in excess of the net carrying amounts, the Company would decrease the recorded valuation allowance through a decrease to income tax expense in the period that such determination is made.

The Company provides for uncertain tax positions and the related interest and penalties, if any, based upon management s assessment of whether a tax benefit is more likely than not to be sustained upon examination by tax authorities. At February 2, 2008, the Company believes it has appropriately accounted for any unrecognized tax benefits. To the extent the Company prevails in matters for which a liability for an unrecognized tax benefit is established or is required to pay amounts in excess of the liability, the Company s effective tax rate in a given financial statement period may be affected.

Sales and Use Taxes Governmental authorities assess sales and use taxes on the sale of goods and services. The Company excludes taxes collected from customers in its reported sales results, such amounts are reflected as accrued expenses until remitted to the taxing authorities.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Use of estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosure of contingencies at the date of the financial statements and the related reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair value of financial instruments The carrying amount of cash and cash equivalents, accounts receivable, other current assets and accounts payable approximate fair value because of their short maturities.

Earnings per share Basic earnings per share is computed by dividing net income or loss by the weighted average number of shares outstanding during each period presented, which excludes non-vested restricted stock. Diluted earnings per share is computed by dividing net income or loss by the weighted average number of shares outstanding plus the dilutive effect of stock equivalents outstanding during the applicable periods using the treasury stock method. The diluted loss per share amounts for fiscal 2007 and fiscal 2006 have been calculated using the same denominator as used in the basic loss per share calculation as the inclusion of dilutive securities in the denominator would have been anti-dilutive. Stock options that were not included in the diluted earnings per share computation because they would have been ant-dilutive were approximately 839,000 shares and 1,120,000 shares at February 2, 2008 and February 3, 2007, respectively.

Comprehensive income Comprehensive income does not differ from the consolidated net income (loss) presented in the consolidated statements of operations.

Operating segments An operating segment is defined as a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses and about which separate financial information is regularly evaluated by the chief operating decision maker in deciding how to allocate resources. Due to the similar economic characteristics of the Company s mall and off-mall stores, and the similar nature of the Company s products, type of customer, and method used to distribute the Company s products, the Company operates as one business segment and does not disclose separate segment information.

Recent accounting pronouncements In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company does not expect the adoption of SFAS No. 157 to have a material effect on its financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Liabilities (SFAS No. 159). This statement permits entities to choose to measure many financial instruments and certain other items at fair value. If the fair value option is elected, unrealized gains and losses will be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material effect on its financial statements.

Table of Contents

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 2 Property and Equipment

Property and equipment is comprised of the following (in thousands):

	February 2, 2008	February 3, 2007
Land	$ 402	$ 402
Buildings	3,481	3,481
Equipment	27,001	33,407
Furniture and fixtures	45,016	47,912
Leasehold improvements	61,644	60,155
Projects in progress	419	399
	137,963	145,756
Less: accumulated depreciation	74,961	74,442
	$ 63,002	$ 71,314

Note 3 Accrued Expenses

Accrued expenses are comprised of the following (in thousands):

	February 2, 2008	February 3, 2007
Salaries and wages	$ 3,643	$ 3,641
Gift certificates and store credits	6,480	6,735
Sales taxes	2,143	2,668
Deferred rent	8,989	7,269
Other	4,311	5,483
	$ 25,566	$ 25,796

Note 4 Income Taxes

The benefit for income taxes consist of the following (in thousands):

	52 Weeks Ended	53 Weeks Ended

	February 2, 2008	February 3, 2007
Current:		
Federal	$ (1,898)	$ 784
State	578	55
Deferred:		
Federal	(6,118)	(756)
State	(1,090)	(100)
Valuation allowance	8,168	
Income tax benefit	$ (360)	$ (17)

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The provision for income taxes differs from the amount computed by applying the statutory federal income tax rate to income before income taxes. A reconciliation of the provision (benefit) for income taxes at the statutory federal income tax rate to the amount provided (benefited) is as follows (in thousands):

	52 Weeks Ended February 2, 2008	53 Weeks Ended February 3, 2007
Tax at federal statutory rate	$ (9,193)	$ (55)
State income taxes (net of federal benefit)	(512)	28
Goodwill impairment	483	
Change in valuation allowance	8,168	
Other permanent items	694	10
Income tax benefit	$ (360)	$ (17)

At February 2, 2008 and February 3, 2007, the Company has net operating loss (NOL) carry forwards for federal income tax purposes of $8.9 million and zero, respectively, which will begin to expire in 2022. At February 2, 2008 and February 3, 2007, the Company has NOL carry forwards for state income tax purposes of $19.9 million and $1.1 million, respectively, which expire between 2015 through 2022.

The Company s income tax provision is computed based on the federal statutory rates and the state statutory rates, net of related federal benefit.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company s deferred tax assets and liabilities are as follows (in thousands):

	February 2, 2008	February 3, 2007
Deferred tax assets:		
Net operating loss carry forwards	$ 4,273	$ 101
Accruals	2,583	2,625
Inventory valuation	376	333
Deferred rent and other	4,693	3,845
Total gross deferred tax assets	11,925	6,904
Less: Valuation allowance	(8,168)	
Total net deferred tax assets	3,757	6,904

Deferred tax liabilities:		
Depreciation	(3,476)	(5,659)
Prepaid assets	(281)	(285)
Net deferred tax (liability)	(3,757)	(5,944)
Total net deferred taxes	$	$ 960

Future utilization of the deferred tax assets is evaluated by the Company on an annual basis and the valuation allowance is adjusted accordingly. In 2007, the valuation allowance increased by $8.2 million as the Company incurred a loss above the historical income which could be offset by a net operating loss carryback. The Company is uncertain about its ability to use the net deferred tax assets; therefore, a full valuation allowance was established.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company and one or more of its subsidiaries file income tax returns in the U. S. federal jurisdiction and various state and local jurisdictions. The Company is no longer subject to U. S. federal income tax examinations by authorities for years prior to 2004. With few exceptions, the Company is no longer subject to state and local income tax examinations for years prior to 2002. The Company has no ongoing U. S. federal, state or local income tax examinations.

The Company adopted the provisions of FASB Interpretation No. 48 on February 4, 2007. As a result of the implementation, the Company recognized a $79,000 increase in the liability for unrecognized tax benefits, which was accounted for as a reduction of the February 4, 2007 balance of retained earnings. The Company recognizes interest and penalties accrued related to unrecognized tax benefits in tax expense. The Company had a $351,000 liability recorded for unrecognized tax benefits as of February 4, 2007 which included interest and penalties of $153,000. At February 2, 2008, the unrecognized tax benefit for interest and penalty increased to $210,000. The total net amount of unrecognized tax benefits as of February 4, 2007 that, if recognized, would affect the effective tax rate was $263,000. At February 2, 2008, the total net amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is $406,000. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Balance at February 4, 2007	$	198
Additions based on tax positions related to the current year		
Additions for tax positions of prior years		492
Reductions for tax positions of prior years		
Settlements		
Lapse of the Statute of Limitations		
Balance at February 2, 2008	$	690

In the February 2, 2008 balance of unrecognized tax benefits, there are two tax positions for which the ultimate deductibility is highly certain but the timing of such deductibility is uncertain. Accordingly the impact to the deferred tax accounting for these tax positions has been considered.

Note 5 Senior Credit Facility

Effective October 4, 2004, the Company entered into a five-year senior secured revolving credit facility with a revolving loan limit of up to $45 million. On August 6, 2007, the Company entered into a First Amendment to Loan and Security Agreement (the Amendment) which provided the Company with additional availability under our borrowing base through higher advanced rates on eligible inventory. As a result of the amendment, the aggregate size of the overall credit facility remained unchanged at $45 million, but the term of the facility was extended two years making the new expiration date October 4, 2011. The amended revolving credit facility, other than First In Last Out (FILO) loans, bears interest at a floating rate equal to the 60-day LIBOR rate (3.11% at February 2, 2008) plus 1.25% to 1.50% (depending on the amount of excess availability under the borrowing base). FILO loans, which apply to the first $2 million borrowed at any given time, bear interest at a floating rate equal to the 60-day LIBOR rate plus 2.25% to 2.5% (depending on the amount of excess availability under the borrowing base). Additionally, the Company pays a fee to the bank equal to a rate of 0.2% per annum on the unused portion of the revolving line of credit. Borrowings

under the facility are collateralized by substantially all of our assets and guaranteed by our subsidiaries. The maximum availability under the credit facility is limited by a borrowing base formula, which consists of a percentage of eligible inventory and receivables less reserves. The facility also contains provisions that could result in changes to the presented terms or the acceleration of maturity. Circumstances that could lead to such changes or acceleration include a material adverse change in the business or an event of default under the credit agreement. The facility has one financial covenant that requires the Company to maintain excess

Table of Contents

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

availability under the borrowing base, as defined in the credit agreement, of at least $3 to $4.5 million depending on the size of the borrowing base, at all times.

As of February 2, 2008, the Company was in compliance with the covenants in the facility and there was zero in outstanding borrowings under the credit facility, with approximately $22.1 million available for borrowing (net of the availability block as described above).

Note 6 Long-Term Leases

The Company leases retail store facilities, warehouse facilities and certain equipment under operating leases with terms ranging up to 15 years and expiring at various dates through 2020. Most of the retail store lease agreements include renewal options and provide for minimum rentals and contingent rentals based on sales performance in excess of specified minimums. Rent expense, including extra charges under operating leases was $57,222,000 and $57,205,000 in fiscal years 2007 and 2006, respectively. Contingent rental expense was $70,000 and $155,000 for fiscal years 2007 and 2006, respectively.

Future minimum lease payments under all operating leases with initial terms of one year or more are as follows: $57,426,000 in 2008; $49,412,000 in 2009; $42,022,000 in 2010; $35,859,000 in 2011 $32,773,000 in 2012 and $92,277,000 thereafter.

Note 7 Employee Benefit Plans

Stock options On June 12, 1996, the Company adopted the 1996 Executive Incentive and Non-Qualified Stock Option Plan (the 1996 Plan), which provides employees and officers with opportunities to purchase shares of the Company s common stock. The 1996 Plan authorized the grant of incentive and non-qualified stock options and required that the exercise price of incentive stock options be at least 100% of the fair market value of the stock at the date of the grant. As of February 2, 2008, options to purchase 182,737 shares of common stock were outstanding under the 1996 Plan at an exercise price of $1.29. Options issued to employees under the 1996 Plan have maximum contractual terms of 10 years and vest ratably over 3 years. No additional options may be granted under the 1996 Plan.

In July 2002, the Company adopted the Kirkland s, Inc. 2002 Equity Incentive Plan (the 2002 Plan). The 2002 Plan provides for the award of restricted stock, restricted stock units, incentive stock options, non-qualified stock options and stock appreciation rights with respect to shares of common stock to employees, directors, consultants and other individuals who perform services for the Company. The 2002 Plan is authorized to provide awards for up to a maximum of 2,500,000 shares of common stock. Options issued to employees under the 2002 Plan have maximum contractual terms of 10 years and generally vest ratably over 3 years. Options issued to non-employee directors vest immediately on the date of the grant. As of February 2, 2008, options to purchase 655,833 shares of common stock were outstanding under the 2002 Plan at exercise prices ranging from $4.25 to $18.55 per share.

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes information about employee stock options outstanding and exercisable at February 2, 2008:

	Options Outstanding				Options Exercisable		
Range of Exercise Prices	Number of Shares	Weighted Average Remaining Contractual Life (In Years)	Weighted Average Exercise Price		Number of Shares	Weighted Average Exercise Price	
$1.29	182,737	3.8	$	1.29	182,737	$	1.29
$4.25 - $10.90	513,333	7.8	$	8.31	427,494	$	8.82
$11.05 - $18.55	142,500	5.9	$	15.47	142,500	$	15.47
Total	838,570	6.6	$	8.00	752,731	$	8.25

As of February 2, 2008, there were no outstanding in-the-money options. Shares reserved for future option grants approximated 1.8 million at February 2, 2008. The weighted average grant date fair value of options granted during fiscal 2007 and fiscal 2006 were $2.15 and $3.09, respectively. For fiscal 2007, unrecognized stock compensation expense related to the unvested portion of outstanding stock options was approximately $222,000 which is expected to be recognized over a weighted average period of 1.2 years.

Transactions under the Company s stock option plans in each of the periods indicated are as follows:

	Number of Options	Weighted Average Exercise Price	
Balance at January 28, 2006	1,116,195	$	8.55
Options granted	380,000	$	6.37
Options exercised	(78,369)	$	1.30
Options forfeited	(466,687)	$	9.35
Balance at February 3, 2007	951,139	$	7.88
Options granted	70,000	$	4.54
Options exercised	(15,112)	$	1.72
Options forfeited	(167,457)	$	6.46
Balance at February 2, 2008	838,570	$	8.00

Options Exercisable As of:			
February 2, 2008	752,731	$	8.25
February 3, 2007	591,118	$	8.13

Total share-based compensation expense (a component of compensation and benefits) was approximately $387,000 for the 52 week period ended February 2, 2008 and $932,000 for the 53 week period ended February 3, 2007. The impact of adopting SFAS 123(R) on future results will depend on, among other things, levels of share-based payments granted in the future, actual forfeiture rates and the timing of option exercises.

The fair value of each option is recorded as compensation expense on a straight-line basis between the grant date for the award and each vesting date. The Company has estimated the fair value of all stock option awards as of the date of the grant by applying the Black-Scholes multiple-option pricing valuation model. The application of this valuation model involves assumptions that are judgmental and highly sensitive in the determination of compensation expense. The weighted average for key assumptions used in determining the

KIRKLAND S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

fair value of options granted in the 52 week period ended February 2, 2008 and 53 week period ended February 3, 2007 and a summary of the methodology applied to develop each assumption are as follows:

	2007	2006
Expected price volatility	0.44	0.43
Risk-free interest rate	4.7%	5.0%
Expected life	5.5 years	5.9 years
Forfeiture rate	5%	5%
Dividend yield	0%	0%

Expected Price Volatility This is a measure of the amount by which the stock price has fluctuated or is expected to fluctuate. The Company uses actual historical changes in the market value of its stock to calculate the volatility assumption as it is management s belief that this is the best indicator of future volatility. The Company calculates daily market value changes to the date of grant over a period beginning one year following the Company s initial public offering date. An increase in the expected volatility will increase compensation expense.

Risk-Free Interest Rate This is the U.S. Treasury rate for the week of the grant having a term equal to the expected life of the option. An increase in the risk-free interest rate will increase compensation expense.

Expected Lives This is the period of time over which the options granted are expected to remain outstanding. The Company uses the simplified method found in the Securities and Exchange Commission s Staff Accounting Bulletin No. 107 to estimate the expected life of stock option grants. Options granted have a maximum term of ten years. An increase in the expected life will increase compensation expense.

Forfeiture Rate This is the estimated percentage of options granted that are expected to be forfeited or canceled before becoming fully vested. This estimate is based on historical experience of similar grants. An increase in the forfeiture rate will decrease compensation expense.

Dividend Yield The Company has not made any dividend payments nor does it have plans to pay dividends in the foreseeable future. An increase in the dividend yield will decrease compensation expense.

Forfeitures are estimated at the time of valuation and reduce expense ratably over the vesting period. This estimate is adjusted periodically based on the extent to which actual forfeitures differ, or are expected to differ, from the previous estimate. The Company s forfeiture estimate has a minimal effect on expense as the majority of the share based awards vest quarterly.

Restricted Stock During the first quarter of fiscal 2006, the Company granted 150,000 shares of restricted stock to its former President and Chief Operating Officer. The award was scheduled to fully vest after five years of continuous employment with the Company. The value of this grant was measured at the market value of the Company s common stock on the service inception date. In the fourth quarter of fiscal 2007, the executive separated from the Company and forfeited all 150,000 shares of unvested restricted stock. All compensation expense associated with this grant which had previously been recognized up to the point of the separation was reversed resulting in a credit to compensation and benefits in the amount of $353,000. The Company also issued a restricted stock unit (RSU) grant of

100,000 shares of common stock to this former employee during fiscal 2006 which would vest only when a pre-determined performance condition was met by the Company. Since achieving this performance condition was not probable, no compensation expense was ever recognized related to the RSU grant. The RSU grant was also forfeited in the fourth quarter of fiscal 2007.

Employee Stock Purchase Plan In July 2002, the Company adopted an Employee Stock Purchase Plan (ESPP). Under the ESPP, full-time employees who have completed twelve consecutive months of service are allowed to purchase shares of the Company s common stock, subject to certain limitations, through payroll

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

deduction, at 85% of the fair market value. The Company s ESPP is authorized to issue up to 500,000 shares of common stock. During fiscal 2007 and fiscal 2006, there were 92,916 and 55,315 shares of common stock, respectively, issued to participants under the ESPP.

401(k) Savings Plan The Company maintains a defined contribution 401(k) employee benefit plan, which covers all employees meeting certain age and service requirements. Up to 6% of the employee s compensation may be matched at the Company s discretion. For all fiscal years presented, this discretionary percentage was 50% of an employee s contribution subject to Plan maximums. The Company s matching contributions were approximately $335,000 and $261,000 in fiscal 2007 and 2006, respectively. The Company has the option to make additional contributions to the Plan on behalf of covered employees; however, no such contributions were made in fiscal 2007 or 2006.

Deferred Compensation Plan Effective March 1, 2005, the Company adopted The Executive Non-Qualified Excess Plan (the Deferred Compensation Plan). The Deferred Compensation Plan is available for certain employees whose benefits under the 401(k) Savings Plan are limited due to provisions of the Internal Revenue Code. The Company s matching contribution was approximately $39,000 and $60,000 in fiscal years 2007 and 2006, respectively.

Post-employment benefits Effective May 30, 2006, the Company entered into a letter agreement with its Chief Executive Officer, providing for certain compensatory and health benefits which take effect upon separation from the Company for any reason. This agreement resulted in a charge of approximately $728,000 which was included as a component of compensation and benefits within the consolidated statements of operations during fiscal 2006.

Note 8 Commitments and Contingencies

Financial instruments that potentially subject the Company to concentration of risk are primarily cash and cash equivalents. The Company places its cash and cash equivalents in insured depository institutions and limits the amount of credit exposure to any one institution within the covenant restrictions imposed by the Company s debt agreements.

The Company is party to pending legal proceedings and claims. Although the outcome of such proceedings and claims cannot be determined with certainty, the Company s management is of the opinion that it is remote that these proceedings and claims will have a material effect on the financial condition, operating results or cash flows of the Company.
